If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering. "

CALCULATION OF REGISTRATION FEE

	Proposed Maximum	
Title of Each Class of Securities to be Registered	Aggregate Offering Price (1)(2)	Amount of Registration Fee
Ordinary Shares, par value NIS 0.01	\$100,000,000	\$12,880

(1) Estimated solely for the purpose of calculating the registration fee pursuant to Rule 457(o) under the Securities Act of 1933.

(2) Includes shares granted pursuant to the underwriters' option to purchase additional shares.

The Registrant hereby amends this Registration Statement on such date or dates as may be necessary to delay its effective date until the Registrant shall file a further amendment which specifically states that this Registration Statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act or until the Registration Statement shall become effective on such date as the Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

Table of Contents

The information in this prospectus is not complete and may be changed. Neither we nor the selling shareholders may sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities, and neither we nor the selling shareholders are soliciting an offer to buy these securities in any jurisdiction where the offer or sale is not permitted.

Subject to completion, dated October 1, 2013

PRELIMINARY PROSPECTUS

Shares

Ordinary Shares

This is the initial public offering of Wix.com Ltd. Prior to this offering, there has been no public market for our ordinary shares. We are selling ordinary shares and the selling shareholders named in this prospectus are selling ordinary shares. We will not receive any proceeds from the sale of the shares by the selling shareholders. The estimated initial public offering price is between \$ and \$ per share.

We have applied to have the ordinary shares listed on the New York Stock Exchange under the symbol WIX.

	Per Share	Total
Public offering price	\$	\$
Underwriting discounts and commissions (1)	\$	\$
Proceeds to us (before expenses)	\$	\$
Proceeds to the selling shareholders (before expenses)	\$	\$

(1) See Underwriting for a description of compensation payable to the underwriters.

We and the selling shareholders have granted the underwriters an option to purchase up to additional ordinary shares.

We are an emerging growth company as defined under the federal securities laws and, as such, may elect to comply with certain reduced public company reporting requirements for future filings. Investing in our ordinary shares involves a high degree of risk. See Risk Factors beginning on page 11.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the ordinary shares to purchasers on or about , 2013.

SUMMARY

This summary highlights selected information contained elsewhere in this prospectus. This summary does not contain all the information that you should consider before deciding to invest in our ordinary shares. You should read the entire prospectus carefully, including Risk Factors and our consolidated financial statements and notes to those consolidated financial statements, before making an investment decision. In this prospectus, the terms Wix, we, us, our and the company refer to Wix.com Ltd. and its subsidiaries.

Our Vision

We believe that the Internet should be accessible to everyone, not just to access information but also to develop, create and contribute.

We see many similarities in our vision with the desktop revolution, when computer hardware and software evolved to provide everyone with the capability to develop, create and print professional-quality documents from their desktop. Access expanded to everyone, document creation became a core human skill, and the asset-heavy approach was abandoned. This same revolution has not yet happened online. Today, professional skill and capital is needed to turn ideas into high-quality web content. We believe that by providing an easy-to-use and affordable solution with professional-quality results, we are leading the Webtop Revolution.

Our Business

We are a leading global web development platform with one of the largest number of registered users in the world. We empower more than 37 million registered users in 190 countries to create and manage a fully integrated and dynamic digital presence. We are pioneering a new approach to web development and management that provides an easy-to-use yet powerful cloud-based platform that eliminates the need for complex coding and supplants expensive design services. Our solutions enable millions of businesses, organizations, professionals and individuals to take their businesses, brands and workflow online. We offer our solutions through a freemium and subscription model and as of August 31, 2013, we had 679,536 premium subscriptions.

Our core product is a drag-and-drop visual development and editing environment complete with high quality templates, graphics, image galleries and fonts. With our platform, Wix users can create and manage a professional-quality digital presence tailored to their brands' specific look and feel, accessible across all major browsers and the most widely used desktop, tablet and mobile devices. Our cloud-based platform is accessed through a hosted environment, allowing our users to update their site and manage their business or organization at any time. We provide our users with flexibility and scalability, allowing them to expand their digital presence as their business, organizational, professional or individual needs change and grow. Through our highly curated App Market, which we launched in the last quarter of 2012, we offer users the ability to easily install more than 140 different apps that were carefully identified and selected for inclusion in the App Market by us based on user needs and demand. These apps add additional functionality and are easily integrated into users' websites with one click and without any coding. Revenues from our App Market have been negligible to date.

Our scale and reach makes us an attractive partner for companies interested in distributing their own solutions to our users, which are primarily small business owners, organizations and entrepreneurs. As we expand our platform through partnerships, we are able to increase our value proposition for existing users and more easily attract new users.

By developing business intelligence using the data we have generated over several years of operation, we have been able to leverage online channels effectively for the majority of our marketing efforts without the need for a direct sales force. In addition, many of our users refer us within their personal and professional networks.

Table of Contents

As a result, we generate a large volume of traffic through word-of-mouth, with organic and direct traffic, meaning visitor traffic that reached our website, Wix.com, via unpaid search results or by typing the URL of our website in their browser, accounting for approximately 59% of the premium subscriptions generated by users that registered in August 2013.

We are removing not only technological, but also geographic and linguistic barriers to web development by offering our platform in several languages, including English, French, Spanish, Portuguese and Italian.

Through June 30, 2013, we had achieved 14 consecutive quarters of sequential growth in the number of premium subscriptions. We have also achieved 14 consecutive quarters of growth in revenues and collections. We had revenues of \$9.9 million, \$24.6 million and \$43.7 million and collections of \$13.8 million, \$29.6 million and \$52.5 million in 2010, 2011, and 2012, respectively. We had a net loss of \$11.5 million, \$22.7 million and \$15.0 million in 2010, 2011, and 2012, respectively. We had revenues of \$34.1 million, collections of \$41.9 million and a net loss of \$10.1 million during the six months ended June 30, 2013.

Industry Background

Increasing need for a dynamic digital presence

According to a June 2013 Netcraft survey, there are more than 673 million websites across all domains, nearly four times the number that existed five years ago. The way that consumers interact with websites, however, continues to expand with the evolution of technology. Consumers have come to expect a high level of personalization, engagement and functionality; a static website is no longer satisfactory and can even negatively affect overall brand perception for businesses, organizations and professionals.

In the current market, businesses, organizations and professionals need a dynamic digital presence with tools to manage interactions with customers, suppliers, partners and employees online and in real time. These interactions include back-end activities like invoicing, customer relationship management and payment processing, as well as front-end activities such as communications, online marketing, reservations and scheduling and social media integration.

Use of dynamic web content and services for high level customer engagement is becoming increasingly prolific. Businesses, organizations and professionals that have access to the latest technology and large budgets are able to create this fully functional, integrated and engaging digital presence and widen the competitive gap between themselves and those that lack access.

Creating a dynamic digital presence is challenging

Building this presence is becoming more challenging for businesses, organizations, professionals and individuals for the following reasons:

Developing a dynamic digital presence with professional quality is expensive. Developing and maintaining a professional-quality digital presence today often requires the engagement of professional designers and developers, which is not an option for many small businesses with limited budgets.

Learning to code is difficult, time consuming and out of reach for most. As coding languages continue to evolve over time to allow for additional features and functionality, the complexity and level of skill required to develop a digital presence increases dramatically. As a result, these professional-quality improvements are generally out of reach for those that have limited or no experience with computer programming.

The ability to manage and modify in real time is limited and time consuming. Hiring a third-party to dynamically update a site is costly, impractical and often time consuming even for relatively small changes. Most website template solutions provide options but have limited flexibility in terms of what can be changed once a website is published.

Table of Contents

Integrating functionality requires advanced skills and access to multiple vendors. Proficiently discovering, managing and integrating multiple applications and tools is complex and typically requires hiring costly developers.

There are many platforms, browsers and devices which each have different compatibility requirements. In order to develop a digital presence that is widely accessible across the growing number of platforms, browsers and devices, there is often a need to recreate an entire site multiple times with different specifications. This is costly and time consuming for even the largest companies.

Our Solution

We offer our web development, design and management solutions and apps through a cloud-based online platform that enables our more than 37 million businesses, organizations, professionals and individuals to create a sophisticated and professional digital presence. Our large user base provides our partners with a massive distribution channel for their products, enhancing the value we can provide our users.

Benefits to Our Users

We believe that our solution offers the following key benefits to our users:

Professional quality at an affordable price. We provide customizable and professionally designed content, allowing users to encapsulate their vision consistent with their brand and establish credibility. We have a dedicated team of over 40 design professionals, and users may access our professional content and features at a material discount to the cost of hiring a professional or in many cases at no cost at all.

Easy-to-use technology. Our platform provides our users with a powerful and easy-to-use cloud-based solution that takes the technological complexity out of web development and management, allowing anyone to create a dynamic digital presence. Our drag-and-drop editing environment enables users with basic computer skills to create a fully functional digital presence without the need to develop an advanced new skill set.

User-driven website management. Our cloud-based platform makes ongoing management simple, enabling users to maintain their dynamic digital presence at any time without the need to pay for expensive design professionals to make even small changes. We also have an in-house team of 130 support and call center professionals available for our users.

Access to third-party apps. We offer a selection of over 140 free and paid apps through our highly curated App Market that were carefully identified and selected for inclusion in the App Market by us based on user needs and demand. These apps provide online workflow and management tools that users can add through the Wix Editor. The required coding is managed automatically by our proprietary software without any effort needed by the user, making integration with our users' sites seamless.

Multi-platform. Our technology addresses the challenges posed by the wide range of browsers and devices used to access the web. We handle all the code customizations and required site compatibility with new device and browser platforms, removing additional cost and effort for our users.

Table of Contents

Benefits to Our Partners

We believe that our solution offers the following key benefits to our partners:

Distribution to a large user base. We attract interest from multiple companies seeking to market their solutions effectively to our large and highly engaged audience of businesses, organizations, professionals and individuals through free and paid apps available in our App Market, as well as other offers, features and services.

Seamless integration of offered solutions. We help developers get their products discovered and provide easy installation and integration. We also collect and process payments from our users for paid apps, further reducing friction for both our users and our partners.

Our Strengths

We believe the following key strengths provide us with competitive advantages:

Proprietary technology platform. Our core strength is our technology that reduces the challenges and complexities of web development and management for our users. Our environment enables simple drag-and-drop functionality, and our use of HTML5 gives our users the ability to easily incorporate video, audio, fonts, graphics and animations into their site. Our users also benefit from enhanced workflow functionalities through the seamless integration of third-party apps.

Large user base and growing global ecosystem. As of August 31, 2013, we had over 37 million registered users across 190 countries and offer our platform in several languages, empowering our users to create and manage a digital presence in their own language. As our community grows, we become increasingly valuable as a distribution channel for partners and developers, who in turn expand our offering to our users with additional features and services through the development of apps.

Superior design and content. More than 10% of our workforce is comprised of designers. We believe this investment in design provides our users with a superior starting point and allows them to create a visually engaging and professional-quality digital presence.

Efficient marketing and customer acquisition. Our marketing activities are based on a constant analysis of behavior response data generated on our platform, enabling us to operate different marketing campaigns efficiently across a variety of advertising channels and without a direct sales force.

Embedded solution for our users. As the basis of their online operating platform, Wix becomes a core aspect of our users' businesses. Our solutions are designed to cater to the varying needs of most business categories while supporting users throughout the evolution of their business lifecycle, greatly increasing the likelihood that they remain users.

Our Strategy

Key elements of our strategy include:

Growing our user base. The value of our platform continues to increase as our user base expands. We intend to continue to build our user base in the following ways:

Leveraging our data to increase and optimize our paid marketing. We will continue to leverage the intelligence derived from the large quantities of marketing data we have gathered since our launch to optimize our marketing spend.

Growing our brand. We plan to invest in brand marketing initiatives that will further associate Wix as the go-to platform for web development and management, increasing our long-term ability to acquire users.

Table of Contents

Expanding to underserved geographic markets. We plan to make our solution, support and communication channels available in more languages and expand our billing infrastructure to drive growth in underserved geographic markets.

Developing new solutions. We intend to create additional value for our users and increase our platform's monetization in the following ways:

Investing in product development to offer additional services. We plan to leverage our experience and knowledge in web development and workflow management to build new solutions, such as apps, data management and mobile solutions that our users need to operate and succeed online.

Expanding our partner ecosystem. We will seek to attract more partners that will provide our users with free and paid apps through our App Market as well as other features and services, further enriching our solutions and creating additional monetization opportunities.

Risk Factors

Investing in our ordinary shares involves risks. You should carefully consider the risks described in "Risk Factors" beginning on page 11 before making a decision to invest in our ordinary shares. If any of these risks actually occurs, our business, financial condition or results of operations would likely be materially adversely affected. In such case, the trading price of our ordinary shares would likely decline, and you may lose all or part of your investment. The following is a summary of some of the principal risks we face:

Our results of operations and future prospects will be harmed if we are unable to attract new registered users and premium subscriptions at a sufficient rate.

Our results of operations would be adversely affected if our selling and marketing activities fail to generate traffic to our website, users and premium subscriptions at levels that we anticipate.

Our limited operating history in a new and developing market makes it difficult to evaluate our current business and future prospects, and may increase the risk that we will not be successful.

We have a history of operating losses and may not be able to achieve profitability in the future.

A decrease in annual subscriptions or renewal rates of our existing premium subscriptions could adversely impact our collections and revenues, and harm our ability to forecast our business.

If we are unable to maintain and enhance our brand, or if events occur that damage our reputation and brand, our ability to expand our base of users and premium subscriptions may be impaired, and our business and financial results may be harmed.

Our results of operations and business could be harmed if we fail to manage the growth of our infrastructure effectively.

Failures of the third-party hardware, software and infrastructure on which we rely, including third-party data center hosting facilities, could adversely affect our business.

We rely on search engines and social networking sites to attract a meaningful portion of our users, and if those search engines or social networking sites change their listings or policies regarding advertising, or increase their pricing or suffer problems, it may limit our ability to attract new users.

We may face challenges expanding our premium subscription base and increasing revenues in emerging markets due to difficulties in these markets associated with payment collections as well as legal, economic, tax and political risks that are greater than more developed markets.

We face potential liability and expense for legal claims based on the content on our platform.

Table of Contents

Activities of users or the content of their websites could damage our reputation and brand, or harm our ability to expand our base of users and premium subscriptions, and our business and financial results.

Our Principal Shareholders

Following the closing of this offering, entities affiliated with Mangrove Capital Partners, Bessemer Venture Partners, Insight Venture Partners and Benchmark Capital Partners will beneficially own % of our outstanding ordinary shares in the aggregate (or % if the underwriters exercise in full their option to purchase additional shares), and our executive officers will beneficially own % of our outstanding ordinary shares in the aggregate (or % if the underwriters exercise in full their option to purchase additional shares). Following the closing of this offering, we will not be a party to and are not otherwise aware of any voting agreement among our shareholders. For further information about the ownership of our ordinary shares following this offering, see Principal and Selling Shareholders.

Corporate Information

Our principal executive offices are located at 40 Namal Tel Aviv St., Tel Aviv 6350671, Israel, and our telephone number is +972 (3) 545-4900. Our website address is www.wix.com. Information contained on, or that can be accessed through, our website does not constitute a part of this prospectus and is not incorporated by reference herein. We have included our website address in this prospectus solely for informational purposes. Our agent for service of process in the United States is Wix.com, Inc., located at 2601 Mission Street, San Francisco, CA 94110, telephone number (415) 643-6479.

Throughout this prospectus, we refer to various trademarks, service marks and trade names that we use in our business. The Wix.com design logo is the property of Wix.com Ltd. Wix® is our registered trademark in the United States. We have several other trademarks, service marks and pending applications relating to our solutions. Other trademarks and service marks appearing in this prospectus are the property of their respective holders.

Table of Contents

The Offering

Ordinary shares offered:

by us	ordinary shares
by the selling shareholders	ordinary shares
Ordinary shares to be outstanding after this offering	ordinary shares

Underwriters option We and the selling shareholders have granted the underwriters an option for a period of 30 days after the date of this prospectus to purchase up to additional ordinary shares.

Use of proceeds We intend to use the net proceeds from this offering for general corporate purposes, including selling and marketing expenses aimed at growing our business through user acquisition activities and research and development expenses focused on product development. We may also use a portion of the net proceeds to make acquisitions or investments in complementary companies or technologies, although we do not have any agreement or understanding with respect to any such acquisition or investment at this time. We will not receive any of the proceeds from the sale of shares by the selling shareholders. See Use of Proceeds.

Risk factors See Risk Factors and other information included in this prospectus for a discussion of factors you should carefully consider before deciding to invest in our ordinary shares.

Proposed NYSE symbol WIX
 The number of ordinary shares to be outstanding after this offering is based on 10,059,409 ordinary shares outstanding as of June 30, 2013. The number of ordinary shares to be outstanding after this offering excludes (1) 2,373,640 ordinary shares reserved for issuance under our equity incentive plans as of June 30, 2013, of which options to purchase 2,278,185 shares had been granted at weighted average exercise price of \$2.36 per share and (2) warrants to purchase 9,766 ordinary shares with an exercise price of \$20.48 per share.

Unless otherwise indicated, this prospectus:

reflects the conversion on a one-for-one basis of all outstanding preferred shares into 7,703,182 ordinary shares, which will occur automatically upon the closing of this offering;

assumes an initial public offering price of \$ per ordinary share, the midpoint of the estimated initial public offering price range, set forth on the cover page of this prospectus;

assumes no exercise of the underwriters option to purchase up to an additional ordinary shares from us and the selling shareholders; and

reflects a for share split effected on , 2013 by means of a share dividend of ordinary shares for each ordinary shares outstanding.

Table of Contents**Summary Consolidated Financial and Other Data**

The following tables set forth our summary consolidated financial and other data. You should read the following summary consolidated financial and other data in conjunction with Selected Consolidated Financial and Other Data, Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes included elsewhere in this prospectus. Historical results are not necessarily indicative of the results that may be expected in the future. Our financial statements have been prepared in accordance with U.S. Generally Accepted Accounting Principles, or U.S. GAAP.

The summary consolidated statements of operations data for each of the years in the three-year period ended December 31, 2012 are derived from our audited consolidated financial statements appearing elsewhere in this prospectus. The summary consolidated statements of operations data for the six months ended June 30, 2012 and 2013 and the summary consolidated balance sheet data as of June 30, 2013 have been derived from our unaudited interim condensed consolidated financial statements included elsewhere in this prospectus. In the opinion of management, these unaudited interim condensed consolidated financial statements include all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of our financial position and results of operations for these periods. Results from interim periods are not necessarily indicative of results that may be expected for the entire year.

(in thousands)					
Cost of revenues	\$ 14	\$ 40	\$ 105	\$ 47	\$ 68
Research and development	659	1,939	553	260	503
Selling and marketing	95	222	101	44	106
General and administrative	343	2,532	261	144	424
Total share-based compensation expenses	\$ 1,111	\$ 4,733	\$ 1,020	\$ 495	\$ 1,101

- (2) Basic and diluted net loss per ordinary share is computed based on the weighted average number of ordinary shares outstanding during each period. For additional information, see Notes 2q and 10 to our consolidated financial statements included elsewhere in this prospectus.
- (3) Pro forma net loss per share and pro forma weighted average shares outstanding assumes the conversion of preferred shares into ordinary shares, which will occur upon the closing of this offering, but does not include the issuance of shares in connection with this offering. For additional information on the conversion of the preferred shares see Note 2q and Note 10 to our consolidated financial statements included elsewhere in this prospectus.
- (4) Pro forma as adjusted gives effect to (a) the conversion of our preferred shares into ordinary shares, which will occur upon the closing of this offering, and (b) the issuance and sale of ordinary shares by us in this offering at an assumed initial public offering price of \$ per ordinary share after deducting underwriting discounts and commissions and estimated offering expenses payable by us.
- (5) See Non-GAAP Financial Measures for how we define and calculate collections and free cash flow, a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP measures, and a discussion about the limitations of these non-GAAP financial measures.
- (6) Number of registered users at period end is defined as the total number of users, including those who purchase premium subscriptions, who are registered with Wix.com with a unique email address at the end of the period. The length of time that users take following registration to design and publish a website varies significantly from hours to years, and many users never publish a website. We have no means of assessing the level of engagement of a particular user following registration or how close a user is to potentially publishing their website. Accordingly, our use of the term user herein is not intended to necessarily indicate a level of engagement. See Risk Factors Risks Related Our Business and Our Industry The number of our registered users may be higher than the number of actual users and we have no means of assessing the level of engagement of a particular user following registration.
- (7) A single user can purchase multiple premium subscriptions. Our premium subscriptions in any given period are derived from users that registered with us during that period and a range of prior periods with the largest contribution from most recently registered users. See Management's Discussion and Analysis of Financial Condition and Results of Operations Overview Premium Subscription Analysis.

Non-GAAP Financial Measures

Collections

Collections is a non-GAAP financial measure that we define as total cash collected by us from our customers in a given period. Collections is calculated by adding the change in deferred revenues for a particular period to revenues for the same period. Collections consists primarily of amounts from annual and monthly premium subscriptions by users, which are deferred and recognized as revenues over the terms of the subscriptions and payments by our users for

Table of Contents

domains, which are also recognized ratably over the term of the service period. The following table reconciles revenues, the most directly comparable U.S. GAAP measure, to collections for the periods presented:

	Year Ended December 31,			Six Months Ended June 30,	
	2010	2011	2012	2012	2013
	(in thousands)				
Reconciliation of Revenues to Collections:					
Revenues	\$ 9,850	\$ 24,600	\$ 43,676	\$ 18,884	\$ 34,116
Change in long-term and short-term deferred revenues	3,903	5,048	8,803	3,369	7,788
Collections	\$ 13,753	\$ 29,648	\$ 52,479	\$ 22,253	\$ 41,904

For a description of how we use collections to evaluate our business, see Management's Discussion and Analysis of Financial Condition and Results of Operations Key Financial and Operating Metrics. We believe that this non-GAAP financial measure is useful in evaluating our business because it is a leading indicator of our revenue growth and the growth of our overall business. Nevertheless, this information should be considered as supplemental in nature and is not meant as a substitute for revenues recognized in accordance with U.S. GAAP.

Free Cash Flow

Free cash flow is a non-GAAP measure defined as cash flow from operating activities minus capital expenditures. The following table reconciles cash flow from operating activities, the most directly comparable U.S. GAAP measure, to free cash flow:

	Year Ended December 31,			Six Months Ended June 30,	
	2010	2011	2012	2012	2013
	(in thousands)				
Reconciliation of cash flow from operating activities to free cash flow:					
Net cash provided by (used in) operating activities	\$ (5,310)	\$ (10,599)	\$ (3,608)	\$ (2,775)	\$ 1,281
Capital expenditures (1)	(1,064)	(1,754)	(947)	(406)	(1,077)
Free cash flow	\$ (6,374)	\$ (12,353)	\$ (4,555)	\$ (3,181)	\$ 204

(1) Capital expenditures consist primarily of investments in leasehold improvements for our office space and the purchase of computers and related equipment. For a description of how we use free cash flow to evaluate our business, see Management's Discussion and Analysis of Financial Condition and Results of Operations Key Financial and Operating Metrics. We believe that this non-GAAP financial measure is useful in evaluating our business because free cash flow reflects the cash surplus available or used to fund the expansion of our business after payment of capital expenditures relating to the necessary components of ongoing operations. Nevertheless, this information should be considered as supplemental in nature and is not meant as a substitute for net cash flows from operating activities presented in accordance with U.S. GAAP.

Other companies, including companies in our industry, may calculate collections and free cash flow differently or not at all, which reduces their usefulness as a comparative measure. You should consider collections and free cash flow along with other financial performance measures, including revenues, net cash used in operating activities, and our financial results presented in accordance with U.S. GAAP.

Table of Contents

RISK FACTORS

This offering and an investment in our ordinary shares involve a high degree of risk. You should consider carefully the risks described below and all other information contained in this prospectus, before you decide to buy our ordinary shares. If any of the following risks actually occurs, our business, financial condition and results of operations could be materially and adversely affected. In that event, the trading price of our ordinary shares would likely decline and you might lose all or part of your investment.

Risks Related to Our Business and Our Industry

Our results of operations and future prospects will be harmed if we are unable to attract new registered users and premium subscriptions at a sufficient rate.

The number of new registered users we attract is a key factor in growing our premium subscription base, which in turn drives our revenues and collections. To date, we have grown the number of registered users and premium subscriptions through the provision of complimentary user-friendly, drag-and-drop web development, design and management software, which can be upgraded to a subscription-based package with various additional solutions and services. Over half of our new premium subscriptions in any given month are generated by users who registered in earlier months. We therefore attribute considerable importance to continued growth of our user base since they are our primary source of premium subscriptions. Although we do not expect to maintain the same period-over-period user and premium subscription growth rate that we have experienced in recent quarters, we do seek to add a larger absolute number of registered users and premium subscriptions each quarter in the immediate future. A number of factors could impact our ability to attract new registered users and premium subscriptions, including:

the quality and design of our platform compared to other similar solutions and services;

our ability to develop new technologies or offer new products and service offerings;

the pricing of our solutions and services compared to our competitors;

the reliability and availability of our customer service; and

our ability to provide value-added third-party applications, solutions and services that integrate into our solutions.

Our results of operations would be adversely affected if our selling and marketing activities fail to generate traffic to our website, users and premium subscriptions at the levels that we anticipate.

We acquire many of our users through paid marketing channels, such as cost-per-click advertisements on search engines and social networking sites and targeted and generic banner advertisements on other sites. A portion of the users acquired through these channels purchase premium subscriptions over time. In order to maintain our current revenues and grow our business, we need to continuously optimize marketing campaigns aimed at acquiring new registered users and premium subscriptions. In the years ended December 31, 2010, 2011 and 2012 and the six months ended June 30, 2013, selling and marketing expenses were \$9.8 million, \$21.6 million, \$29.1 million and \$22.6 million, respectively, representing 100%, 88%, 67% and 66% of our revenues, respectively. We conduct search engine optimization and A/B testing, a marketing approach which aims to identify which changes to our website will increase or maximize user interest and user acquisition. We also rely upon the assumption that historical user behavior can be extrapolated to predict future user behavior, and we structure our marketing activities in the manner that we believe is most likely to encourage the user behaviors that lead to desired future outcomes, such as purchasing premium subscriptions. However, we may fail to accurately predict user acquisition, interest, or to fully understand or estimate the conditions and behaviors that drove historical user behavior and thus, fail to generate the return on marketing we expected. For example, events outside our control, such as announcements by our competitors or other third-parties of significant business developments, have in the past adversely affected the returns we had anticipated on our marketing expenses in the short-term. If any of our marketing campaigns prove less successful than anticipated in attracting users and

Table of Contents

premium subscriptions, we may not achieve our return-on-investment targets, and our rate of user and premium subscription acquisition may fail to meet market expectations, which could have a material adverse effect on our share price.

Our limited operating history in a new and developing market makes it difficult to evaluate our current business and future prospects, and may increase the risk that we will not be successful.

We were founded in 2006 and the majority of our revenue growth has occurred since 2011. This short history makes it difficult to assess effectively our future prospects. We also operate in a new and developing market that may not develop as expected. We believe that the growth in our user base and revenues may indicate that our business strategy is successful, but you should consider our future prospects in light of the challenges and uncertainties that we face, including the fact that our business has grown rapidly and it may not be possible to discern fully the trends that we are subject to, that we operate in a new and developing market, and that elements of our business strategy are new and subject to ongoing development.

We have a history of operating losses and may not be able to achieve profitability in the future.

We have incurred net losses in each fiscal year since our inception and, as of June 30, 2013, we had an accumulated deficit of \$69.9 million. We expect that our operating expenses will continue to increase in the near term at a rate that will offset all or substantially all of any future growth in revenues. We believe that this increase in operating expenses will result primarily from increased selling and marketing expenses related to user acquisition activities and increased research and development expenses related to enhancing the functionality of our solutions. We seek to leverage these expenses across a growing base of premium subscriptions while maintaining or increasing the amount of revenues per premium subscription in order to achieve profitability. As a result, if we are unable to grow our premium subscriptions at the required rate or to maintain or increase revenues per user, or if we incur unexpected expenses, we may be unable to achieve or sustain profitable operations.

A decrease in annual subscriptions or renewal rates of our existing premium subscriptions could adversely impact our collections and revenues, and harm our ability to forecast our business.

The rate at which annual premium subscriptions are purchased and the rate at which premium subscriptions are renewed significantly impact the overall number of premium subscriptions and, as a result, our collections and our revenues. Our annual subscription renewal rates have historically increased based on the length of time a subscription has been active. One of the key drivers of renewal rates is whether premium subscriptions are annual or monthly. Annual subscriptions have higher renewal rates than monthly subscriptions since there is one-twelfth as many opportunities in a given annual period to fail to renew a subscription than a monthly subscription whether deliberately or through failure to update credit card information upon expiration. As such, our overall renewal rates may drop if there is a decrease in the number of premium annual subscriptions compared to premium monthly subscriptions, and will affect our ability to forecast our future results of operations. If the number of annual premium subscriptions or renewal rates fail to meet our expectations, our profitability and future prospects may be adversely impacted.

If we are unable to maintain and enhance our brand, or if events occur that damage our reputation and brand, our ability to expand our base of users and premium subscriptions may be impaired, and our business and financial results may be harmed.

Maintaining, promoting and enhancing the Wix brand is critical to expanding our base of users and premium subscriptions. For both users and premium subscriptions, we market our solutions and services primarily through cost-per-click advertisements on search engines and social networking sites, participation in social networking sites, and free and paid banner advertisements on other websites, and small Wix advertisements on our users' websites that do not currently have a premium subscription. Our ability to attract additional users depends in part on increasing our brand recognition. In addition, our solutions and services are also marketed through free traffic sources, including customer referrals, word-of-mouth and direct searches for our Wix name, or web presence solutions, in search engines. Maintaining and enhancing our brand will depend largely on our ability to continue

Table of Contents

to provide high-quality, well-designed, useful, reliable, and innovative solutions and services, which we may not do successfully. We may introduce new solutions or terms of service that users do not like, which may negatively affect our brand. Additionally, if users have a negative experience using third-party applications and websites integrated with Wix, such an experience may affect our brand. Our Wix Arena Marketplace enables independent web designers to offer their services to users who engage them directly. As we conduct only a limited evaluation of these designers' credentials, our reputation may be harmed if any of the services provided by these independent designers do not meet users' quality expectations. Maintaining and enhancing our brand may require us to make substantial investments and these investments may not be successful. Additionally, errors, defects, disruptions or other performance problems with our products and platform, including the products and solutions we license from third parties, may reduce our revenue, harm our reputation and brand and adversely affect our ability to attract new users and premium subscriptions, especially if these errors occur when we introduce new services or features. If we fail to successfully promote and maintain the Wix brand or if we incur excessive expenses in this effort, we could be subject to claims regarding our business and financial results may be adversely affected.

Our results of operations and business could be harmed if we fail to manage the growth of our infrastructure effectively.

We have experienced rapid growth in our business and operations, which places substantial demands on our operational infrastructure. The scalability and flexibility of our cloud-based infrastructure depends on the functionality of our third-party servers and their ability to handle increased traffic and demand for bandwidth. The significant growth in the number of users and transactions has increased the amount of both our stored marketing and research data and the data of our users. Any loss of such data due to disruptions in our infrastructure could result in harm to our brand or reputation. Moreover, as our user base grows, and as users use our platform for more complicated tasks, we will need to devote additional resources to improving our infrastructure and continuing to enhance its scalability in order to maintain the performance of our platform and solutions. Our need to effectively manage our operations and growth will also require that we continue to assess and improve our operational, financial and management controls, reporting systems and procedures. We may encounter difficulties obtaining the necessary personnel or expertise to improve those controls, systems and procedures on a timely basis relative to our growth. If we do not manage the growth of our business and operations effectively, the quality of our platform and efficiency of our operations could suffer, which could harm our results of operations and business.

Failures or loss of the third-party hardware, software and infrastructure on which we rely, including third-party data center hosting facilities, could adversely affect our business.

We rely on leased servers and other third-party hardware and infrastructure to support our operations. Our primary data centers are in two geographically separate locations in the United States with a back-up data center in Europe. We lease our primary data centers in the United States from Hostway Services, Inc. pursuant to purchase orders issued under an agreement that automatically renews on an annual basis unless terminated by us by notice at least 60 days before the annual renewal date or by either party at any time with 180 days advance notice. If Hostway ceases to make these data centers available to us without sufficient advance notice, we would likely experience delays in delivering our solutions until migration to an alternate data center provider is completed.

Furthermore, the owners and operators of these facilities do not guarantee that our users' access to our platform will be uninterrupted or error-free. We do not control the operation of these facilities, and such facilities could be subject to break-ins, computer viruses, sabotage, intentional acts of vandalism and other misconduct. For example, in the past, one of our hosting providers was subject to cyber-attacks and another experienced damage from a fire, both of which caused interruptions in our service. Further, our servers and data centers are vulnerable to damage or interruption from natural disasters, terrorist attacks, power loss, telecommunications failures or similar catastrophic events. Moreover, if for any reason our arrangement with one or more of the providers of the servers that we use is terminated, we could incur additional expenses in arranging for new facilities and support. Disruptions to these servers could interrupt our ability to provide our platform and solutions and materially and adversely affect our business and results of operations.

Table of Contents

We rely on search engines and social networking sites to attract a meaningful portion of our users, and if those search engines or social networking sites change their listings or policies regarding advertising, or increase their pricing or suffer problems, it may limit our ability to attract new users.

We rely on search engines and social networking sites to attract new users, and many of our users locate our website and solutions by clicking through on search results displayed by search engines such as Google and Yahoo!, and advertisements on social networking sites such as Facebook. Search engines typically provide two types of search results, natural (i.e., non-paid) and purchased listings. Natural search results are determined and organized solely by automated criteria set by the search engine and a ranking level cannot be purchased. Advertisers can also pay search engines to place listings more prominently in search results and websites in order to attract users to advertisers' websites. To some extent, we rely on natural searches in order to attract free traffic to our website. Search engines revise their algorithms from time to time in an attempt to optimize their search result listings. If search engines on which we rely for algorithmic listings modify their algorithms, our websites may appear less prominently or not at all in search results, which could result in fewer users clicking through to our website. For example, in one instance in the past, traffic was mistakenly directed to one of our homepages that was not in the language of the search performed and resulted in lower users and premium subscriptions for that period. Furthermore, competitors may in the future bid on our name from search services in an attempt to capture potential traffic. Preventing such actions and recapturing potential traffic could increase our expenses. Further, search engines or social networking sites may change their policies from time to time regarding pay-per-click or other means of advertising. If any change to these policies delays or prevents us from advertising these through channels, this could result in fewer users clicking through to our website.

We may face challenges expanding our premium subscription base and increasing revenues in emerging markets due to difficulties in these markets associated with payment collections as well as legal, economic, tax and political risks that are greater than more developed markets.

Expanding our business into emerging markets is an important component of our growth strategy and presents challenges that are different than those associated with more developed international markets. In particular, regulations limiting the use of local credit cards could constrain our growth in certain countries. For example, regulations in certain countries do not permit recurring charges on credit cards. In the last quarter of 2011, we established a Brazilian subsidiary to process local credit cards in Brazil in compliance with Brazilian currency controls. It is often difficult to establish an effective local business model, and we may need to enter into agreements with third-parties to process credit cards on our behalf or modify our business plans or operations in order to establish a local presence in emerging countries, which may delay our entry into these markets or increase our costs. Additionally, in emerging markets we face the risk of more rapidly changing government policies and encountering sudden currency revaluations. It is possible that governments of one or more countries may censor or block access to the Internet due to political concerns or in response to certain incidents or significant events, thereby preventing people in these countries, including our users, from accessing our products. The growth of our business may be adversely affected if we are unable to expand our user base in emerging markets.

We face potential liability and expense for legal claims based on the content on our platform.

Our platform allows users to create websites. At present, we do not require that our users post on their websites, or require their visitors to agree to, any terms of service, privacy policy, disclaimer or any other contractual documentation or policy. If our users do not post or require agreement to the appropriate documentation and policies on their websites, or should our users fail to take steps necessary to enjoy the benefits of certain statutory safe harbors, such as those set forth in Section 512 of the United States Copyright Act, then they may expose themselves to civil and criminal liability under applicable law, for example, where the visitors post information which is libelous, defamatory, in breach of regulation concerning unacceptable content or publications, or in breach of any third-party intellectual property rights or where our users or their suppliers fail to process personal data in accordance with applicable law. It is possible that we could also be subject to liability. In many jurisdictions, including the United States and countries in Europe, laws relating to the liability of providers of online services for activities of their users and other third parties are currently being tested by a

Table of Contents

number of claims, including actions based on defamation, invasion of privacy and other torts, unfair competition, copyright and trademark infringement, and other theories based on the nature and content of the materials searched, the ads posted, or the content provided by users. Any court ruling or other governmental action that imposes liability on providers of online services for the activities of their users and other third parties could harm our business. In such circumstances we may also be subject to liability under applicable law in a way which may not be fully mitigated by the user terms of service we require our users to agree to. Any liability attributed to us could adversely affect our brand, reputation, our ability to expand our user base and our financial position. Further, our indemnity from the users may also not be fully effective as a matter of practice if any user does not have sufficient assets, insurance or other means to back that indemnity. In addition, rising concern about the use of the Internet for illegal conduct, such as the unauthorized dissemination of national security information, money laundering or supporting terrorist activities may in the future produce legislation or other governmental action that could require changes to our products, solutions or services, restrict or impose additional costs upon the conduct of our business or cause users to abandon material aspects of our service. Any such adverse legal or regulatory developments could substantially harm our operating results and business.

Activities of users or the content of their websites could damage our reputation and brand, or harm our ability to expand our base of users and premium subscriptions, and our business and financial results.

Our reputation and brand may be negatively affected by the actions of users that are deemed to be hostile, offensive or inappropriate to other users, or by users acting under false or inauthentic identities. This particularly applies to our users who do not have premium subscriptions and who therefore maintain the Wix logo on their websites. We do not monitor or review the appropriateness of the domain names our users register or the content of our users' websites, and we do not have control over the activities in which our users engage. While we have adopted policies regarding illegal or offensive use of our services by our users and retain authority to terminate domain name registrations and to take down websites that violate these policies, users could nonetheless engage in these activities. The safeguards we have in place may not be sufficient to avoid harm to our reputation and brand, especially if such hostile, offensive or inappropriate use was high profile, which could adversely affect our ability to expand our user base, and our business and financial results.

We are exposed to risks associated with credit card and debit card payment processing.

We accept payments primarily through credit and debit card transactions and currently use an internal billing system, as well as third-party billing systems that are integrated into our website and provide a portal for users to submit credit or debit card information for processing. We are subject to a number of risks related to credit and debit card payments, including:

we pay interchange and other fees, which may increase over time and could require us to either increase the prices we charge for our products or experience an increase in our operating expenses;

if our billing systems fail to work properly and, as a result, we do not automatically charge our premium subscriptions' credit cards on a timely basis or at all, we could lose revenues; and

if we are unable to maintain our chargeback rate at acceptable levels, our credit card fees for chargeback transactions, or our fees for other credit and debit card transactions or issuers, may increase, or issuers may terminate their relationship with us.

Our internal billing system interfaces with a number of different gateway providers that link to a number of different payment card processors based on the jurisdiction and other factors. In connection with this system, we have implemented data security standards, operating rules and certification requirements in accordance with Payment Card Industry, or PCI, Data Security Standards in connection with internal controls requirements under Israeli law and we received PCI compliance level 1 certification in February 2013. There can be no assurance that our billing system data security standards, or those of our third-party billing service providers, will adequately comply with the billing standards of any future jurisdiction in which we seek to market our service offering and establish a local billing solution.

Table of Contents

If third-party applications change such that we do not or cannot maintain the compatibility of our platform and solutions with these applications or if we fail to provide third-party applications that our users desire to add to their websites, demand for our solutions and platform could decline.

The attractiveness of our platform depends, in part, on our ability to integrate third-party applications which our users desire into their websites. Third-party application providers may change the features of their applications and platforms or alter the terms governing use of their applications and platforms in an adverse manner. Further, third-party application providers may refuse to partner with us, or limit or restrict our access to their applications and platforms. Such changes could functionally limit or terminate our ability to use these third-party applications and platforms with our platform, which could negatively impact our offerings and harm our business. If we fail to integrate our platform with new third-party applications that our users need for their websites, or to adapt to the data transfer requirements of such third-party applications and platforms, we may not be able to offer the functionality that our users expect, which would negatively impact our offerings and, as a result, harm our business.

Our business and prospects would be harmed if changes to technologies used in our solutions or new versions or upgrades of operating systems and Internet browsers adversely impact the process by which users interface with our platform.

The user interface for our platform is currently simple and straightforward, which we believe has helped us to expand our user base even among users with little technical expertise. In the future, Microsoft, the dominant operating system provider, or any other provider of Internet browsers, could introduce new features that would make it difficult to use our platform. In addition, Internet browsers for desktop or mobile devices could introduce new features, or change existing browser specifications such that they would be incompatible with our products and solutions, or prevent end users from accessing our users' sites. For example, operating systems or major Internet browsers such as Firefox, Internet Explorer or Safari, could become unstable or be incompatible with HTML5-based products and solutions. Any changes to technologies used in our solutions, including within operating systems or Internet browsers that make it difficult for users to access our platform or end-users to access our users' sites, may slow the growth of our user base, and adversely impact our business and prospects.

Our ability to enhance our products may be harmed if we are unable to attract and retain sufficient research and development personnel.

In order to remain competitive, we must continue to develop new solutions, applications and enhancements to our existing platform. Our principal research and development activities are conducted from our headquarters in Tel Aviv, Israel, and we face significant competition for suitably skilled developers in this region. We also engage a small number of developers in the Ukraine through a third-party service organization in order to benefit from the significant pool of talent that is more readily available in that market. Many larger companies expend considerably greater amounts on employee recruitment and may be able to offer more favorable compensation and incentive packages than us. If we cannot attract or retain sufficient skilled research and development employees, our business, prospects and results of operations could be adversely affected.

Our future prospects may be adversely affected if we are unable to generate revenues from sources other than our premium subscription packages.

In addition to our editor, we provide all of our users with access to additional products and services that enhance their digital presence. For example, in the last quarter of 2012 we launched the Wix App Market, which is integrated into our platform. Through the App Market, we offer our users a range of software applications that can be integrated as add-ons to their free or premium websites. The App Market offers both applications that are developed by us and by third-party developers. We cannot offer any assurances that sales of applications or other value-added solutions and services we may offer in the future will be a significant part of our revenues. In addition, our selling efforts for these items may negatively impact our users' perception of us due to our email marketing to generate sales. If we do not succeed in selling these items, our future prospects may be adversely affected.

Table of Contents

We may face increased competition in a highly competitive market.

While there are other providers who offer features similar to those features found in our solutions, we believe that we do not compete with traditional web development firms as we focus on not only web development but also technology, design and business work flow processes. Nevertheless, we do compete with aspects of the services provided by web-based website design platforms and software programs, as well as some of the service offerings of a number of smaller template-based web builder companies and designers, as well as those who offer domain registration services, particularly using a freemium business model similar to ours. In the future, we may experience increased competition from web design companies if they broaden their product and service offerings, or significantly lower their pricing. In addition, it is possible that other providers may in the future decide that offering a platform similar to our platform represents an attractive business opportunity. In particular, if a more established company were to target our market, we may face significant competition from a company that enjoys potential competitive advantages, such as greater name recognition, longer operating histories, substantially greater market share, larger existing user bases and substantially greater financial, technical and other resources. These companies may use these advantages to offer solutions and service similar to ours at a lower price, develop different solutions to compete with our current solutions and respond more quickly and effectively than we do to new or changing opportunities, technologies, standards or client requirements. Increased competition could result in us failing to attract users or obtain premium subscriptions at the same rate. It could also cause us to have higher acquisition costs or force us to lower our prices or take other steps that may materially and adversely impact our results of operations.

If we fail to develop and introduce new products and services and keep up with rapid changes in design and technology, our business may be materially and adversely affected.

Our future success will depend on our ability to improve the look, function, performance and reliability of our solutions and services, including integrating Apps developed by third parties. The development of new and upgraded solutions and new service offerings involves a significant amount of time for our research and development team, as it can take our developers months to update, code and test new and upgraded solutions and integrate them into our platform. Further, our design team spends a significant amount of time and resources in order to incorporate various design elements, such as customized colors, fonts, content and other features into our new and upgraded solutions. The introduction of these new and upgraded design features, solutions and services also involves a significant amount of marketing spending. We must also manage our existing offerings, as we continually test, support, and market these solutions and applications. Our revenues and competitive position could be materially and adversely affected if we fail to improve our design features or technology, or if our solutions fail to achieve widespread acceptance.

Our corporate culture has contributed to our success, and if we cannot maintain this culture as we grow, we could lose the innovation, creativity, and teamwork fostered by our culture, and our business may be harmed.

We believe that an important contributor to our success has been our corporate culture, which we believe fosters innovation, teamwork, passion for our users, and a focus on attractive designs and technologically advanced products. Other than our executive officers, as a result of our growth most of our employees have been with us for fewer than two years. As we continue to grow, we must effectively integrate, develop and motivate a growing number of new employees, including employees in international markets. As a result, we may find it difficult to maintain important aspects of our corporate culture, which could limit our ability to innovate and operate effectively. Any failure to preserve our culture could also negatively affect our ability to retain and recruit personnel, continue to perform at current levels or execute on our business strategy.

If we fail to maintain a consistently high level of customer service, our brand, business and financial results may be harmed.

We believe our focus on customer support is critical to retaining, expanding and further penetrating our user base. As a result, we have invested in the quality and training of our customer support and call center personnel. If we are unable to maintain a consistently high level of customer service, we may lose existing users and find it more difficult to attract new users. In addition, regardless of the performance of our customer support and call

Table of Contents

center, users of online services base their purchasing decisions on a number of factors, including price, design, integration abilities, functionality of services, reputation and ease of use. If we fail to maintain adequate customer support which improves the functionality of our solutions and their ease of use, our reputation, financial results and business prospects may be harmed.

Our business relies on the experience and expertise of our senior management.

The success of our business is dependent to a large degree on the continued service of our executive officers. If we lose the services of any of our key personnel and fail to manage a smooth transition to new personnel, our business could suffer. We do not carry key person insurance on any of our executive officers or other key personnel. We have entered into employment and services agreements with our executive officers and key employees that contain non-compete covenants. Despite these agreements, we may not be able to retain these officers and employees. If we cannot enforce the non-compete covenants, we may be unable to prevent our competitors from benefiting from the expertise of our former employees, which could materially and adversely affect our business and results of operations.

Our revenues may not increase if we are unable to maintain market share for mobile sites and applications, or if our mobile products fail to achieve widespread acceptance, which may affect our business and future prospects.

Consumers are increasingly accessing the Internet through devices other than personal computers, including mobile phones, smartphones and tablets. This trend has increased dramatically in the past few years and is projected to continue to increase. Acknowledging this trend, we launched our first free mobile offering in 2011, offering our users the ability to quickly and easily deploy an HTML5 mobile-optimized website. The mobile device market is characterized by the frequent introduction of new products and solutions, short product life cycles, evolving industry standards, continuous improvement in performance characteristics and rapid adoption of technological and product advancements. We may incur additional costs in order to adapt our current functionalities to other operating systems and we may face technical challenges adapting our products to different versions of already supported operating systems, such as Android variants offered by different mobile phone manufacturers. If we are unable to offer continual improvements to our mobile solutions or adapt their functionalities to new and different operating systems, our mobile solutions may fail to achieve widespread acceptance by our users. Additionally, the providers of certain platforms, such as Apple, may limit or restrict access entirely to their platforms. Therefore, our revenues may not increase even if we continue to penetrate the mobile device market.

Exchange rate fluctuations may negatively affect our results of operations.

Our results of operations and cash flows are affected by fluctuations due to changes in foreign currency exchange rates. In 2012, 89% of our revenues were denominated in U.S. dollars and 11% in other currencies, primarily in euros. Conversely, in 2012, 58% of our cost of revenues and operating expenses were denominated in U.S. dollars and 42% in New Israeli Shekels, or NIS. Our NIS-denominated expenses consist primarily of personnel and overhead costs. Since a significant portion of our expenses are denominated in NIS, any appreciation of the NIS relative to the U.S. dollar would adversely impact our net loss or net income (if any). We estimate that a 10% increase (decrease) in the value of the NIS against the U.S. dollar would have decreased (increased) our net income by approximately \$2.5 million in 2012. To protect against the increase in value of forecasted foreign currency cash flow resulting from expenses paid in NIS during the year, we have instituted a foreign currency cash flow hedging program. We hedge portions of the anticipated payroll of our Israeli employees, Israeli suppliers and anticipated rent expenses of our Israeli premises denominated in NIS for a period of one to twelve months with forward contracts and other derivative instruments. We cannot provide any assurances that our hedging activities will be successful in protecting us from adverse impacts from currency exchange rate fluctuations. See Management's Discussion and Analysis of Financial Condition and Results of Operations Quantitative and Qualitative Disclosure About Market Risk Foreign Currency Risk.

Table of Contents

Because we recognize revenues from premium subscriptions over the term of an agreement, downturns or upturns in sales are not immediately reflected in full in our operating results.

We recognize revenues over the term of our contracts. During the six months ended June 30, 2013, approximately 59% of our premium subscription revenues were from annual subscriptions and approximately 41% were from monthly subscriptions. As a result, much of the revenue we report each quarter is the recognition of deferred revenue from premium subscriptions entered into during previous quarters. Consequently, a shortfall in demand for our solutions and services or a decline in new or renewed contracts in any one quarter may not significantly reduce our revenues for that quarter but could negatively affect our revenues in future quarters. Accordingly, the effect of significant downturns in new or renewed sales of our solutions and service offerings are not reflected in full in our results of operations until future periods.

The impact of worldwide economic conditions, including the resulting effect on spending by small to medium-sized businesses, may adversely affect our business, operating results and financial condition.

Our performance is subject to worldwide economic conditions and their impact on levels of spending by small and medium-sized businesses, which may be disproportionately affected by economic downturns. To the extent that worldwide economic conditions materially deteriorate, our existing and potential premium subscriptions may no longer consider investment in our solutions and platform a necessity, or may elect to reduce budgets for maintaining a digital presence. Economic conditions may adversely impact levels of user spending, which could adversely impact the numbers of users visiting our website. User purchases of discretionary items generally decline during recessionary periods and other periods in which disposable income is adversely affected, which could have a material adverse effect on our financial condition and results of operations.

Our business will suffer if the small business market for our solutions proves less lucrative than projected or if we fail to effectively acquire and service small business users.

We market and develop solutions for small businesses and a majority of our premium subscriptions are from small businesses. Small businesses frequently have limited budgets and may choose to allocate resources to items other than our solutions, especially in times of economic uncertainty or recessions. We believe that the small business market is underserved, and we intend to continue to devote substantial resources to it. We aim to grow our revenues by adding new small business customers, selling additional services to existing small business customers and encouraging existing small business customers to renew their subscriptions to our premium solutions. If the small business market fails to be as lucrative as we project or we are unable to market and sell our services to small businesses effectively, our ability to grow our revenues quickly and become profitable will be harmed.

We are subject to trade and economic sanctions and export laws that may govern or restrict our business and we, and our directors and officers, may be subject to fines or other penalties for non-compliance with those laws.

U.S. Laws and Regulations

We are subject to U.S. laws and regulations that may govern or restrict our business and activities in certain countries and with certain persons, including the trade and economic sanctions regulations administered by the U.S. Treasury Department's Office of Foreign Assets Control, or OFAC, and the export administration regulations administered by the U.S. Commerce Department's Bureau of Industry and Security, or BIS. In the course of an internal review in early 2013, we determined that we had 16 premium subscriptions, out of a total of approximately 583,000 premium subscriptions, with geographic internet protocols, or GEOIP, addresses in Cuba, Iran, North Korea, North Sudan or Syria (U.S. Sanctioned Countries) or that had otherwise provided personal information indicating that they may be located in U.S. Sanctioned Countries. As part of a subsequent internal review, we also determined that we had 32,600 users, or less than 0.1% of our total user base of approximately 33 million as measured as of April 30, 2013, with GEOIP addresses in U.S. Sanctioned Countries.

In May 2013, we made a voluntary self-disclosure to OFAC and BIS. We cannot predict when OFAC and BIS will complete their respective reviews and determinations as to whether any violation of relevant U.S. sanctions or export laws occurred or is ongoing. In case of an apparent violation, OFAC and/or BIS could decide

Table of Contents

not to impose penalties but issue only a warning or cautionary letter. However, if OFAC or BIS determines that we have violated applicable regulations, we may face civil and/or criminal penalties and may also suffer reputational harm, any of which could have a material adverse effect on our business and financial results.

We have undertaken a number of remedial measures, including terminating the users and the premium subscriptions that may have been from a U.S. Sanctioned Country, and blocking the ability of new users with or without a premium subscription that have a GEOIP address in a U.S. Sanctioned Country to access our cloud-based software or services. We have also since instituted new periodic screening practices and updated our systems to prevent users from U.S. Sanctioned Countries entering billing information with an address in that location. We are working to implement other measures related to our billing practices.

Israeli Laws and Regulations

The Israeli Trading with the Enemy Ordinance - 1939 (the Ordinance) prohibits any Israeli person from trading goods with enemy countries or with the residents of enemy countries. The Israeli Ministry of Finance, which is responsible for implementing the Ordinance, has currently determined enemy countries to be Iran, Lebanon and Syria (Israeli Sanctioned Countries). The Ordinance was enacted in 1939 and does not expressly address online services. We therefore cannot state with certainty how the provisions of the Ordinance apply to the type of services that we provide.

We voluntarily approached the Israeli Ministry of Finance in September 2013 and asked for its formal position regarding the applicability of the Ordinance to the type of services that we provide. We do not know the extent to which the Ministry of Finance will want to have further discussions with us, the timing of those discussions or the ultimate outcome of their deliberations. Although the Ordinance allows Israeli persons to apply for a permit to trade with Israeli Sanctioned Countries or their residents, we are not aware of a permit being granted or denied in the past to a person providing the type of services that we provide.

Lebanon is the only Israeli Sanctioned Country that is not also a U.S. Sanctioned Country. We have ceased providing services to users with a GEOIP address in a U.S. Sanctioned Country. The number of users and premium subscribers that we have in Lebanon is not material to our business, however, if we stop providing services in Lebanon, it may decrease the number of our current and future subscribers from other countries, particularly in the Middle East, who may cease using our services in protest to us blocking accounts in Israeli Sanctioned Countries.

In addition, if it is determined by a competent court that sanctions under the Ordinance cover the type of services that we provide, we, our officers and employees may be subject to criminal and/or civil actions. We believe that our initiation of voluntary discussions with the Israeli Ministry of Finance may reduce such exposure, but any liability to which we are subject to could adversely affect our personnel, brand and reputation.

We are subject to privacy and data protection laws and regulations as well as contractual privacy and data protection obligations, and our failure to comply with these or any future laws, regulations, or obligations could subject us to sanctions and damages and could harm our reputation and business.

We hold certain personal data of our users, primarily, username and email address, and may hold certain personal data of the visitors to our users websites. We have implemented data security standards, operating rules and certification requirements in accordance with PCI Data Security Standards and we received PCI compliance level 1 certification in February 2013. Since we began using our internal billing system in the first quarter of 2013, we have begun to also collect billing information, such as credit card numbers, full names, billing address and phone numbers in compliance with these data security standards. We do not regularly monitor or review the content that our users upload and store and, therefore, do not control the substance of the content within our hosted environment, including sensitive personal information.

We are subject to the privacy and data protection laws and regulations adopted by Israel and potentially, other jurisdictions. For example, although we do not have an operating entity in the Netherlands, the control that we exert over our servers in the Netherlands may result in our activities in Europe being deemed to be subject to Dutch law. Where the local data protection and privacy laws of a jurisdiction apply, we may be required to

Table of Contents

register our operations in that jurisdiction or make changes to our business so that user data is only collected and processed in accordance with applicable local law. Privacy laws restrict our storage, use, processing, disclosure, transfer and protection of personal information, including credit card data, provided to us by our users, and possibly the visitors to our users' websites. We strive to comply with all applicable laws, regulations, policies and legal obligations, as well as with certain industry standards (including voluntary third-party certification bodies such as TRUSTe) relating to privacy and data protection. We are also subject to the privacy and data security-related obligations set forth in our terms of use with our users, and we may be liable to third parties in the event we are deemed to have wrongfully processed personal data.

The regulatory framework for privacy and data security issues worldwide is currently in flux and is likely to remain so for the foreseeable future. In particular, the European Union has traditionally taken a broader view as to what is considered personal information and has imposed greater obligations under their privacy and data protection laws. For example, the European Union issued a proposal for a new General Data Protection Regulation at the beginning of 2012 which will replace the European Data Protection Directive and is likely to include more stringent obligations for online businesses, such as to conduct a data protection impact assessment for certain higher-risk processing operations, to introduce a more frequent need for the user's consent, to impose an obligation to act on data breaches, to restrict the collection and use of sensitive personal data and to expand the legislative requirements for data processors, as well as to introduce a stricter regime of enforcement. Additionally, the proposed regulation is stated to have extra-territorial effect and seeks to regulate the European activities of businesses regardless of their location or the locations of their servers. While it is currently expected that the proposed regulation will not take effect until 2015 or later, the more stringent requirements on privacy user notifications and data handling will require us to adapt our business and are likely to incur additional cost should we become subject to these and other laws and regulations, which could force us to incur material costs of require us to adapt our business.

A failure by us or a third-party contractor providing services to us to comply with applicable privacy and data security laws, regulations, self-regulatory requirements or industry guidelines, or our terms of use with our users, may result in sanctions, statutory or contractual damages or litigation. These proceedings or violations could force us to spend money in defense or settlement of these proceedings, result in the imposition of monetary liability, incur additional management resource, increase our costs of doing business, and adversely affect our reputation and the demand for our solutions.

If the security of the confidential information or personal information of our users and the visitors to our users' websites stored in our systems is breached or otherwise subjected to unauthorized access, our reputation may be harmed and we may be exposed to liability.

Due to the nature of our business, our system stores personally identifiable information, credit card information and other critical data for our users and the visitors of our users' websites. We believe that we take reasonable steps to protect the security, integrity and confidentiality of the information we collect and store, but there is no guarantee that inadvertent (e.g., software bugs or other technical malfunctions, employee error or malfeasance, or other factors) or unauthorized disclosure will not occur or that third parties will not gain unauthorized access to this information despite our efforts. Like many online companies, we have experienced attempts by third parties to circumvent the security of our systems but are not aware of any successful attempts. We may in the future experience successful attempts by third parties to obtain unauthorized access to our data despite our security measures. Since techniques used to obtain unauthorized access change frequently, we may be unable to anticipate these techniques or to implement adequate preventative measures. If our security measures are breached because of third-party action, employee error, malfeasance or otherwise, or if design flaws in our software are exposed and exploited, and, as a result, a third party obtains unauthorized access to any of our users' data, our relationships with our users may be damaged, and we could incur liability. In addition, some jurisdictions have enacted laws requiring companies to notify individuals of data security breaches involving certain types of personal data, and our agreements with certain partners require us to notify them in the event of a security incident. These mandatory disclosures regarding a security breach sometimes lead to negative publicity and may cause our users to lose confidence in the effectiveness of our data security measures. Any security breach, whether actual or perceived, may harm our reputation, and we could lose users or fail to acquire new users.

Table of Contents

If our security measures fail to protect credit card information adequately, we could be liable to both our users for their losses, as well as the vendors under our agreements with them such that we could be subject to fines and higher transaction fees, we could face regulatory action, and our users and vendors could end their relationships with us, any of which could harm our business, results of operations or financial condition. Any willful or accidental security breaches or other unauthorized access or unlawful processing could expose us to liability for the loss of such information, adverse regulatory action by governments in the United States, Israel, and elsewhere, investigation and litigation, downtime of our systems and other possible liabilities. There can be no assurance that the limitations of liability in our contracts would be enforceable or adequate or would otherwise protect us from any such liabilities or damages with respect to any particular claim. We also cannot assure you that our existing general liability insurance coverage and coverage for errors and omissions will continue to be available on acceptable terms or will be available in sufficient amounts to cover one or more large claims, or that the insurer will not deny coverage as to any future claim. The successful assertion of one or more large claims against us that exceeds available insurance coverage, or the occurrence of changes in our insurance policies, including premium increases or the imposition of large deductible or co-insurance requirements, could have a material adverse effect on our business, financial condition and results of operations.

We are subject to the rules and regulations adopted by the payment card networks, such as Visa and MasterCard, and if we fail to adhere to their rules and regulations, we would be in breach of our contractual obligations to payment processors and merchant banks, which could subject us to damages and liability and could eventually prevent us from processing or accepting credit card payments.

The payment card networks, such as Visa and MasterCard have adopted rules and regulations that apply to all merchants who process and accept credit cards for payment of goods and services. We are obligated to comply with these rules and regulations as part of the contracts we enter into with payment processors and merchant banks. The rules and regulations adopted by the payment card networks include the Payment Card Industry Data Security Standards, or PCI DSS. Under the PCI DSS, we are required to adopt and implement internal controls over the use, storage and security of payment card data to help prevent fraud. If we fail to comply with the rules and regulations adopted by the payment card networks, including the PCI DSS, we would be in breach of our contractual obligations to payment processors and merchant banks. Such failure to comply may subject us to fines, penalties, damages, higher transaction fees, and civil liability, and could eventually prevent us from processing or accepting debit and credit cards or could lead to a loss of payment processor partners. We also cannot guarantee that such compliance will prevent illegal or improper use of our payments systems or the theft, loss or misuse of the debit or credit card data of users or participants or regulatory or criminal investigations. A failure to adequately control fraudulent credit card transactions would result in significantly higher credit card-related costs and any increases in our credit card and debit card fees could adversely affect our results of operations. Moreover, any such illegal or improper payments could harm our reputation and may result in a loss of service for our users, which would adversely affect our business, operating results and financial condition.

We may be unable to obtain, maintain and protect our intellectual property rights and proprietary information or prevent third parties from making unauthorized use of our technology.

Our intellectual property rights are important to our business. We rely on a combination of confidentiality clauses, trade secrets, copyrights and trademarks to protect our intellectual property and know-how. In addition, we have filed a number of applications for patents to protect our technologies. However, the steps we take to protect our intellectual property may be inadequate. We will not be able to protect our intellectual property if we are unable to enforce our rights or if we do not detect unauthorized use of our intellectual property. Despite our precautions, it may be possible for unauthorized third parties to copy our products and use information that we regard as proprietary to create solutions and services that compete with ours. Some license provisions protecting against unauthorized use, copying, transfer and disclosure of our solutions may be unenforceable under the laws of certain jurisdictions and foreign countries.

We enter into confidentiality and invention assignment agreements with our employees and consultants and enter into confidentiality agreements with the parties with whom we have strategic relationships and business

Table of Contents

alliances. No assurance can be given that these agreements will be effective in controlling access to our proprietary information. Further, these agreements do not prevent our competitors from independently developing technologies that are substantially equivalent or superior to our solutions. Additionally, we may from time to time be subject to opposition or similar proceedings with respect to applications for registrations of our intellectual property, including but not limited to our trademarks and patent applications. While we aim to acquire adequate protection of our brand through trademark registrations in key markets, occasionally third parties may have already registered or otherwise acquired rights to identical or similar marks for solutions that also address the software market. Additionally, the process of seeking patent protection can be lengthy and expensive. Any of our pending or future patent or trademark applications, whether or not challenged, may not be issued with the scope of the claims we seek, if at all. We are unable to guarantee that additional patents or trademarks will issue from pending or future applications or that, if patents or trademarks issue, they will not be challenged, invalidated or circumvented, or that the rights granted under the patents will provide us with meaningful protection or any commercial advantage. We rely on our brand and trademarks to identify our solutions to our users and to differentiate our solutions from those of our competitors, if we are unable to adequately protect our trademarks, third parties may use our brand names or trademarks similar to ours in a manner that may cause confusion to our users or confusion in the market, or dilute our brand names or trademarks, which could decrease the value of our brand.

From time to time, we may discover that third parties are infringing, misappropriating or otherwise violating our intellectual property rights. However, policing unauthorized use of our intellectual property and misappropriation of our technology is difficult and we may therefore not always be aware of such unauthorized use or misappropriation. Despite our efforts to protect our intellectual property rights, unauthorized third parties may attempt to use, copy or otherwise obtain and market or distribute our intellectual property rights or technology or otherwise develop solutions with the same or similar functionality as our solutions. If competitors infringe, misappropriate or otherwise misuse our intellectual property rights and we are not adequately protected, or if such competitors are able to develop solutions with the same or similar functionality as ours without infringing our intellectual property, our competitive position and results of operations could be harmed and our legal costs could increase.

We are subject to claims by third parties of intellectual property infringement and may in the future become subject to additional claims that, regardless of merit, could result in litigation and materially adversely affect our business, results of operations or financial condition.

There can be no assurance that third parties will not assert that our solutions, services and intellectual property infringe, misappropriate or otherwise violate their intellectual property or other proprietary rights. Such claims may be made by competitors seeking to obtain a competitive advantage or by other parties. Additionally, in recent years, non-practicing entities, or NPEs, have begun purchasing intellectual property assets for the purpose of making claims of infringement and attempting to extract settlements from companies like ours.

For example, we are currently subject to a patent infringement litigation that was filed against us on December 7, 2012 by CreateAds LLC, an entity that we believe is an NPE. The complaint alleges that we infringe a U.S. patent owned by CreateAds LLC. CreateAds LLC has filed similar complaints alleging infringement against at least forty other defendants. We filed a motion to dismiss the complaint in its entirety on February 1, 2013, on the grounds that the patent-in-suit claims only abstract ideas. On February 25, 2013, the plaintiff opposed our motion and on March 14, 2013 we filed a reply in support of the motion. We intend to continue pursuing the dismissal of the case. Due to the early stage of the proceedings, we currently do not have the ability to assess the probability of a particular outcome or the potential exposure from this lawsuit. We also recently entered into a settlement agreement with another NPE with respect to a claim that we infringed its patent. See Business Legal Proceedings.

Any such claims, regardless of merit, that result in litigation, could result in substantial expenses, divert the attention of management, cause significant delays in introducing new solutions or services, materially disrupt the conduct of our business and have a material and adverse effect on our brand, reputation, business, financial

Table of Contents

condition and results of operations. As a consequence of such claims, we could be required to pay substantial damages, develop non-infringing technology, enter into royalty-bearing licensing agreements, stop selling or marketing some or all of our solutions or services or re-brand our solutions or services. If it appears necessary, we may seek to license intellectual property that we are alleged to infringe, potentially even if we believe such claims to be without merit. If required licenses cannot be obtained, or if existing licenses are not renewed, litigation could result. Litigation is inherently uncertain and any adverse decision could result in a loss of our proprietary rights, subject us to significant liabilities, require us to seek licenses for alternative technologies from third parties and otherwise negatively affect our business.

Our platform contains open source software, which may pose particular risks to our proprietary software and solutions.

We use open source software in connection with our software development. From time to time, companies that use open source software have faced claims challenging the use of open source software and/or compliance with open source license terms, and we may be subject to such claims in the future. Some open source licenses require users who distribute software containing open source to make available all or part of such software, which in some circumstances could include valuable proprietary code of the user. While we monitor the use of open source software and try to ensure that none is used in a manner that would require us to disclose our proprietary source code or that would otherwise breach the terms of an open source agreement, it is our view that we do not distribute our software, since no installation of our software is necessary and editing and design platform is accessible solely through the cloud. Nevertheless, this position could be challenged. Any requirement to disclose our proprietary source code or pay damages for breach of contract could be harmful to our business, results of operations or financial condition, and could help our competitors develop products and services that are similar to or better than ours.

The number of our registered users may be higher than the number of actual users, and we have no means of assessing the level of engagement of a particular user following registration.

We use the definition user to mean the number of unique email addresses registered on Wix.com. The number of users as we define it may be higher than the actual number of users because some users have multiple registrations and others may have registered under different or fictitious names. In addition, we have no means of assessing the level of engagement of a particular user following registration. The length of time that users take following registration to design and publish a website varies significantly from hours to years. Some users may never publish a website, but have not cancelled their registration. Even if it were measurable, we do not consider the level of engagement of our registered users to be material to our business. Rather, we consider the rate at which users from a particular period generate premium subscriptions to be material to our business. For example, in the second quarter of 2013, 43% of our premium subscriptions were purchased by users that registered with us in the same quarter and the remaining 57% were from users who registered in earlier quarters. Nevertheless, if the number of our registered users is materially inconsistent with the number of our actual users, our user base, which we believe is important to the growth of our premium subscriptions, may be overstated. If that is the case, our business may not grow as fast as we expect, and our financial results and business prospects may be harmed.

We may become subject to claims for remuneration or royalties for assigned service invention rights by our contractors or employees, which could result in litigation and adversely affect our business.

We enter into assignment of invention agreements with certain of our employees pursuant to which such individuals agree to assign to us all rights to any inventions created in the scope of their employment or engagement with us. Under the Israeli Patent Law, inventions conceived by an employee or a person deemed to be an employee during the scope of their employment with a company are regarded as service inventions, which belong to the employer, absent a specific agreement between employee and employer giving the employee service invention rights. The Patent Law also provides that if there is no such agreement between an employer and an employee, the Israeli Compensation and Royalties Committee shall determine whether the employee or contractor is entitled to remuneration for their inventions. However, recent decisions by the Israeli Compensation

Table of Contents

and Royalties Committee and the Supreme Court have created uncertainty in this area, as the Supreme Court held that employees may be entitled to remuneration for their service inventions despite having specifically waived such rights. Further, the Committee has not yet determined the method for calculating this Committee-enforced remuneration. Although our contractors or employees have agreed to assign to us service invention rights, we may face claims challenging such agreements and demanding remuneration in consideration for assigned inventions. As a consequence of such claims, we could be required to pay additional remuneration or royalties to our contractors or employees, or be forced to litigate such claims, which could otherwise negatively affect our business.

U.S. states may seek to impose state and local business taxes and sales/use taxes and current EU taxes on Internet sales may increase.

There is a risk that U.S. states could assert that we or our non-U.S. subsidiaries are liable for U.S. state and local business activity taxes based upon income or gross receipts or for the collection of U.S. local sales/use taxes. This risk exists regardless of whether we and our non-U.S. subsidiaries are subject to U.S. federal income tax. States are becoming increasingly aggressive in asserting a nexus for business activity tax purposes and imposing sales/use taxes on products and services provided over the Internet. We and our non-U.S. subsidiaries could be subject to U.S. state and local taxation if a state tax authority asserts that our activities or the activities of our non-U.S. subsidiaries give rise to a nexus. We and our non-U.S. subsidiaries could also be liable for the collection of U.S. state and local sales/use taxes if a state tax authority asserts that distribution of our products over the Internet is subject to sales/use taxes. Additionally, pending legislation in the U.S. Congress, if enacted, could grant states additional authority to collect sales/use taxes on the sale of our premium subscriptions over the Internet. Further, if a state tax authority asserts that distribution of our products or services is subject to such sales/use taxes, our premium subscribers could also be subjected to sales/use taxes, which may decrease the likelihood that such users would purchase or continue to renew their premium subscriptions. Additionally, sales of our solutions subject to value-added tax, or VAT, at the applicable rate in each jurisdiction, which may increase and cause either our prices to increase or our revenues to decline. New obligations to collect or pay taxes of any kind could substantially increase our cost of doing business.

We may need to raise additional funds to pursue our growth strategy or continue our operations, and we may be unable to raise capital when needed or on acceptable terms.

From time to time, in addition to this offering, we may seek additional equity or debt financing to fund our growth, develop new solutions and services or make acquisitions or other investments. Our business plans may change, general economic, financial or political conditions in our markets may change, or other circumstances may arise, that have a material adverse effect on our cash flow and the anticipated cash needs of our business. Any of these events or circumstances could result in significant additional funding needs, requiring us to raise additional capital. We cannot predict the timing or amount of any such capital requirements at this time. If financing is not available on satisfactory terms, or at all, we may be unable to expand our business or to develop new business at the rate desired and our results of operations may suffer.

We may make acquisitions and investments, which could result in operating difficulties, dilution and other harmful consequences.

From time to time, we evaluate potential strategic acquisition or investment opportunities. Any transactions that we enter into could be material to our financial condition and results of operations. The process of integrating an acquired company, business or technology could create unforeseen operating difficulties and expenditures. Acquisitions and investments carry with them a number of risks, including the following:

diversion of management time and focus from operating our business;

implementation or remediation of controls, procedures and policies of the acquired company;

coordination of product, engineering and selling and marketing functions;

retention of employees from the acquired company;

Table of Contents

unforeseen liabilities;

litigation or other claims arising in connection with the acquired company; and

in the case of foreign acquisitions, the need to integrate operations across different cultures and languages and to address the particular economic, currency, political and regulatory risks associated with specific countries.

Our failure to address these risks or other problems encountered in connection with acquisitions and investments could cause us to fail to realize the anticipated benefits of such acquisitions or investments, incur unanticipated liabilities and harm our business, results of operations and financial condition.

Risks Related to Our Ordinary Shares and the Offering

Our share price may be volatile, and you may lose all or part of your investment.

The initial public offering price for the ordinary shares sold in this offering will be determined by negotiation between us and representatives of the underwriters. This price may not reflect the market price of our ordinary shares following this offering and the price of our ordinary shares may decline. In addition, the market price of our ordinary shares could be highly volatile and may fluctuate substantially as a result of many factors, including:

actual or anticipated fluctuations in our results of operations;

variance in our financial performance from the expectations of market analysts;

announcements by us or our competitors of significant business developments, changes in service provider relationships, acquisitions or expansion plans;

changes in the prices of our solutions;

our involvement in litigation;

our sale of ordinary shares or other securities in the future;

market conditions in our industry;

changes in key personnel;

the trading volume of our ordinary shares;

changes in the estimation of the future size and growth rate of our markets; and

general economic and market conditions.

In addition, the stock markets have experienced extreme price and volume fluctuations. Broad market and industry factors may materially harm the market price of our ordinary shares, regardless of our operating performance. In the past, following periods of volatility in the market price of a company's securities, securities class action litigation has often been instituted against that company. If we were involved in any similar litigation we could incur substantial costs and our management's attention and resources could be diverted.

There has been no prior public market for our ordinary shares, and an active trading market may not develop.

Prior to this offering, there has been no public market for our ordinary shares. An active trading market may not develop following completion of this offering or, if developed, may not be sustained. The lack of an active market may impair your ability to sell your shares at the time you wish to sell them or at a price that you consider reasonable. The lack of an active market may also reduce the fair market value of your shares. An inactive market may also impair our ability to raise capital by selling shares of capital stock and may impair our ability to acquire other companies by using our shares as consideration.

Table of Contents

If we do not meet the expectations of equity research analysts, if they do not publish research or reports about our business or if they issue unfavorable commentary or downgrade our ordinary shares, the price of our ordinary shares could decline.

The trading market for our ordinary shares will rely in part on the research and reports that equity research analysts publish about us and our business. The analysts' estimates are based upon their own opinions and are often different from our estimates or expectations. If our results of operations are below the estimates or expectations of public market analysts and investors, our stock price could decline. Moreover, the price of our ordinary shares could decline if one or more securities analysts downgrade our ordinary shares or if those analysts issue other unfavorable commentary or cease publishing reports about us or our business.

Following the closing of this offering, a small number of significant beneficial owners of our shares acting together will have a controlling influence over matters requiring shareholder approval, which could delay or prevent a change of control.

Following the closing of this offering, the largest beneficial owners of our shares, entities and individuals affiliated with Mangrove Capital Partners, Bessemer Venture Partners, Insight Venture Partners, and Benchmark Capital Partners, each of which currently beneficially owns more than 10.0% of our outstanding shares, will beneficially own in the aggregate % of our ordinary shares or % if the underwriters exercise their option to purchase additional ordinary shares. As a result, these shareholders, acting together, could exercise a controlling influence over our operations and business strategy and will have sufficient voting power to control the outcome of matters requiring shareholder approval. These matters may include:

the composition of our board of directors which has the authority to direct our business and to appoint and remove our officers;

approving or rejecting a merger, consolidation or other business combination;

raising future capital; and

amending our articles of association which govern the rights attached to our ordinary shares.

This concentration of ownership of our ordinary shares could delay or prevent proxy contests, mergers, tender offers, open-market purchase programs or other purchases of our ordinary shares that might otherwise give you the opportunity to realize a premium over the then-prevailing market price of our ordinary shares. This concentration of ownership may also adversely affect our share price.

As a foreign private issuer, we may follow certain home country corporate governance practices instead of certain New York Stock Exchange, or NYSE, corporate governance requirements.

As a foreign private issuer, in reliance on Section 303A.11 of the NYSE Listed Company Manual, which permits a foreign private issuer to follow the corporate governance practices of its home country, we will be permitted to follow certain Israeli corporate governance practices instead of those otherwise required under the corporate governance standards for U.S. domestic issuers. As of the consummation of this offering, we intend to follow the NYSE corporate governance standards for domestic issuers. We may in the future elect to follow home country practice in Israel with regard to matters such as the formation of compensation, nominating and corporate governance committees, separate executive sessions of independent directors and non-management directors and the requirement to obtain shareholder approval for certain dilutive events (such as for the establishment or amendment of certain equity-based compensation plans, issuances that will result in a change of control of the company, certain transactions other than a public offering involving issuances of a 20% or more interest in the company and certain acquisitions of the stock or assets of another company). Accordingly, our shareholders may not be afforded the same protection as provided under NYSE corporate governance rules. Following our home country governance practices as opposed to the requirements that would otherwise apply to a United States company listed on the NYSE may provide less protection than is accorded to investors of domestic issuers. See Management Corporate Governance Practices.

Table of Contents

As a foreign private issuer we will not be subject to U.S. proxy rules and will be exempt from filing certain Exchange Act reports.

As a foreign private issuer, we will be exempt from the rules and regulations under the United States Securities Exchange Act of 1934, as amended, or the Exchange Act, related to the furnishing and content of proxy statements, and our officers, directors, and principal shareholders will be exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. We will also be exempt from Regulation FD, which prohibits issuers from making selective disclosures of material non-public information. In addition, we will not be required under the Exchange Act to file annual, quarterly and current reports and financial statements with the Securities and Exchange Commission, or SEC, as frequently or as promptly as domestic companies whose securities are registered under the Exchange Act.

In addition, we would lose our foreign private issuer status if a majority of our directors or executive officers are U.S. citizens or residents and we fail to meet additional requirements necessary to avoid loss of foreign private issuer status. Although we have elected to comply with certain U.S. regulatory provisions, our loss of foreign private issuer status would make such provisions mandatory. The regulatory and compliance costs to us under U.S. securities laws as a U.S. domestic issuer may be significantly higher. If we are not a foreign private issuer, we will be required to file periodic reports and registration statements on U.S. domestic issuer forms with the SEC, which are more detailed and extensive than the forms available to a foreign private issuer. We may also be required to modify certain of our policies to comply with good governance practices associated with U.S. domestic issuers. Such conversion and modifications will involve additional costs. In addition, we may lose our ability to rely upon exemptions from certain corporate governance requirements on U.S. stock exchanges that are available to foreign private issuers.

We are an emerging growth company and we cannot be certain whether the reduced requirements applicable to emerging growth companies will make our ordinary shares less attractive to investors.

We are an emerging growth company, as defined in the Jumpstart Our Business Startups Act of 2012 effective on April 5, 2012, or the JOBS Act, and we may take advantage of certain exemptions from various requirements that are applicable to other public companies that are not emerging growth companies. Most of such requirements relate to disclosures that we would only be required to make if we cease to be a foreign private issuer in the future. Nevertheless, as a foreign private issuer that is an emerging growth company, we will not be required to comply with the auditor attestation requirements of Section 404 of the Sarbanes-Oxley Act of 2002, or the Sarbanes-Oxley Act, for up to five fiscal years after the date of this offering. We will remain an emerging growth company until the earliest of: (a) the last day of our fiscal year during which we have total annual gross revenues of at least \$1.0 billion; (b) the last day of our fiscal year following the fifth anniversary of the completion of this offering; (c) the date on which we have, during the previous three-year period, issued more than \$1.0 billion in non-convertible debt; or (d) the date on which we are deemed to be a large accelerated filer under the Exchange Act. When we are no longer deemed to be an emerging growth company, we will not be entitled to the exemptions provided in the JOBS Act discussed above. We cannot predict if investors will find our ordinary shares less attractive as a result of our reliance on exemptions under the JOBS Act. If some investors find our ordinary shares less attractive as a result, there may be a less active trading market for our ordinary shares and our share price may be more volatile.

The market price of our ordinary shares could be negatively affected by future sales of our ordinary shares.

After this offering, there will be _____ shares of our ordinary shares outstanding. Sales by us or our shareholders of a substantial number of ordinary shares in the public market following this offering, or the perception that these sales might occur, could cause the market price of our ordinary shares to decline or could impair our ability to raise capital through a future sale of, or pay for acquisitions using, our equity securities. Of our issued and outstanding shares, all the ordinary shares sold in this offering will be freely transferable, except for any shares acquired by our affiliates, as that term is defined in Rule 144 under the U.S. Securities Act of 1933. Following completion of this offering, _____ % of our outstanding ordinary shares (or _____ % if the underwriters exercise their option in full) will be considered restricted shares and will be held by our affiliates.

Table of Contents

Such securities can be resold into the public markets in the future in accordance with the requirements of Rule 144, including volume limitations, manner of sale requirements and notice requirements. See [Shares Eligible for Future Sale](#).

We, our executive officers and directors, and the holders of substantially all of our outstanding ordinary shares, have agreed with the underwriters that, subject to limited exceptions, for a period of 180 days after the date of this prospectus, we and they will not directly or indirectly offer, pledge, sell, contract to sell, grant any option to purchase or otherwise dispose of any ordinary shares or any securities convertible into or exercisable or exchangeable for ordinary shares, or in any manner transfer all or a portion of the economic consequences associated with the ownership of ordinary shares, or cause a registration statement covering any ordinary shares to be filed except for the ordinary shares offered in this offering, without the prior written consent of the designated representatives of the underwriters, who may, in their sole discretion and at any time without notice, release all or any portion of the shares subject to these lock-up agreements.

Starting six months after the closing of this offering, all of our shareholders prior to this offering are entitled to require that we register their shares under the U.S. Securities Act of 1933 for resale into the public markets. All shares sold pursuant to an offering covered by such registration statement will be freely transferable. See [Certain Relationships and Related Party Transactions](#) [Registration Rights](#).

In addition to our current shareholders' registration rights, as of June 30, 2013, 2,278,185 ordinary shares were outstanding share options granted under our equity incentive plans and we had outstanding warrants to purchase 9,766 ordinary shares. Following this offering, we intend to file a registration statement on Form S-8 under the U.S. Securities Act of 1933 registering _____ shares under our equity incentive plans. Shares included in such registration statement will be available for sale in the public market immediately after such filing, subject to vesting provisions, except for shares held by affiliates who will have certain restrictions on their ability to sell.

You may be subject to adverse United States federal income tax consequences if we are classified as a Controlled Foreign Corporation.

Each Ten Percent Shareholder in a non-U.S. corporation that is classified as a controlled foreign corporation, or a CFC, for United States federal income tax purposes generally is required to include in income for U.S. federal tax purposes such Ten Percent Shareholder's pro rata share of the CFC's Subpart F income and investment of earnings in U.S. property, even if the CFC has made no distributions to its shareholders. A non-U.S. corporation generally will be classified as a CFC for United States federal income tax purposes if Ten Percent Shareholders own, directly or indirectly, more than 50% of either the total combined voting power of all classes of stock of such corporation entitled to vote or of the total value of the stock of such corporation. A Ten Percent Shareholder is a United States person (as defined by the U.S. Internal Revenue Code of 1986, as amended (the "Code")) who owns or is considered to own 10% or more of the total combined voting power of all classes of stock entitled to vote of such corporation. The determination of CFC status is complex and includes attribution rules, the application of which is not entirely certain.

We do not believe that we were a CFC for the taxable year ended December 31, 2012 or that we are currently a CFC. It is possible, however, that following this offering, a shareholder treated as a United States person for United States federal income tax purposes will acquire, directly or indirectly, enough shares to be treated as a Ten Percent Shareholder after application of the constructive ownership rules and, together with any other Ten Percent Shareholders of the Company, cause the Company to be treated as a CFC for United States federal income tax purposes. We believe that immediately following this offering certain of our shareholders are Ten Percent Shareholders for United States federal income tax purposes. Holders should consult their own tax advisors with respect to the potential adverse U.S. tax consequences of becoming a Ten Percent Shareholder in a CFC.

Our U.S. shareholders may suffer adverse tax consequences if we are characterized as a passive foreign investment company.

Generally, if for any taxable year 75% or more of our gross income is passive income, or at least 50% of the average quarterly value of our assets (which, assuming we were not a CFC for the year being tested, would be

Table of Contents

measured by fair market value of the assets, and for which purpose the total value of our assets may be determined in part by the market value of our ordinary shares, which is subject to change) are held for the production of, or produce, passive income, we would be characterized as a passive foreign investment company, or PFIC, for United States federal income tax purposes. Our status as a passive foreign investment company may also depend on how quickly we utilize the cash proceeds from this offering in our business. Based on our belief that we were not a CFC prior to this offering in the current taxable year and on certain estimates of our gross income and gross assets, our intended use of proceeds of this offering, and the nature of our business, we do not expect that we will be classified as a PFIC for the taxable year ending December 31, 2013. However, because PFIC status is based on our income, assets and activities for the entire taxable year, it is not possible to determine whether we will be characterized as a PFIC for the 2013 taxable year until after the close of the year. There can be no assurance that we will not be considered a PFIC for any taxable year. If we are characterized as a PFIC, our United States shareholders may suffer adverse tax consequences, including having gains realized on the sale of our ordinary shares treated as ordinary income, rather than a capital gain, the loss of the preferential rate applicable to dividends received on our ordinary shares by individuals who are United States holders, and having interest charges apply to distributions by us and the proceeds of share sales. If we are characterized as a PFIC, certain elections may be available that would alleviate some of the adverse consequences of PFIC status and result in an alternative treatment (such as mark-to-market treatment) of our ordinary shares; however, we do not intend to provide the information necessary for U.S. holders to make qualified electing fund elections if we are classified as a PFIC. See **Taxation and Government Programs** **United States Federal Income Taxation** **Passive Foreign Investment Company Considerations**.

You will experience immediate and substantial dilution in the net tangible book value of the ordinary shares you purchase in this offering.

The initial public offering price of our ordinary shares substantially exceeds the net tangible book value per share of our ordinary shares immediately after this offering. Therefore, if you purchase our ordinary shares in this offering, you will suffer, as of _____, 2013, immediate dilution of \$ _____, per share or \$ _____ if the underwriters exercise their option in full, in net tangible book value after giving effect to the sale of ordinary shares in this offering at an assumed public offering price of \$ _____ per share, the midpoint of the estimated initial public offering price range set forth on the cover page of this prospectus, less underwriting discounts and commissions and the estimated expenses payable by us. If outstanding options to purchase our ordinary shares are exercised in the future, you will experience additional dilution. See **Dilution**.

Provisions of Israeli law and our amended and restated articles of association to be effective upon the closing of this offering may delay, prevent or make undesirable an acquisition of all or a significant portion of our shares or assets.

Provisions of Israeli law and our amended and restated articles of association to be effective upon the closing of this offering could have the effect of delaying or preventing a change in control and may make it more difficult for a third-party to acquire us or our shareholders to elect different individuals to our board of directors, even if doing so would be considered to be beneficial by some of our shareholders, and may limit the price that investors may be willing to pay in the future for our ordinary shares. Among other things:

Israeli corporate law regulates mergers and requires that a tender offer be effected when more than a specified percentage of shares in a company are purchased;

Israeli corporate law does not provide for shareholder action by written consent unless such consent is unanimous, thereby requiring all shareholder actions to be taken at a general meeting of shareholders;

our articles of association divide our directors into three classes each of which is elected once every three years;

our articles of association do not permit a director to be removed except by a vote of 75% of our shareholders entitled to vote at a general meeting of shareholders;

our articles of association require that director vacancies may only be filled by our board of directors; and

Table of Contents

our articles of association prevent business combinations with interested shareholders for a period of three years after the date of the transaction in which the person became an interested shareholder, unless the business combination is approved in accordance with our articles of association by a general meeting of our shareholders or satisfies other requirements specified in our articles of association.

Further, Israeli tax considerations may make potential transactions undesirable to us or to some of our shareholders whose country of residence does not have a tax treaty with Israel granting tax relief to such shareholders from Israeli tax. With respect to mergers, Israeli tax law allows for tax deferral in certain circumstances but makes the deferral contingent on the fulfillment of numerous conditions, including a holding period of two years from the date of the transaction during which certain sales and dispositions of shares of the participating companies are restricted. Moreover, with respect to certain share swap transactions, the tax deferral is limited in time, and when such time expires, the tax becomes payable even if no actual disposition of the shares has occurred. See Description of Share Capital Acquisitions under Israeli Law.

We have broad discretion over the use of proceeds we receive in this offering and may not apply the proceeds in ways that increase the value of your investment.

Our management will have broad discretion in the application of the net proceeds from this offering and, as a result, you will have to rely upon the judgment of our management with respect to the use of these proceeds. Our management may spend a portion or all of the net proceeds in ways that not all shareholders approve of or that may not yield a favorable return. The failure by our management to apply these funds effectively could harm our business.

We have not yet determined whether our existing internal controls over financial reporting systems are compliant with Section 404 of the Sarbanes-Oxley Act, and we cannot provide any assurance that there are no material weaknesses or significant deficiencies in our existing internal controls.

Pursuant to Section 404 of the Sarbanes-Oxley Act and the related rules adopted by the SEC and the Public Company Accounting Oversight Board, starting with the second annual report that we file with the SEC after the consummation of this offering, our management will be required to report on the effectiveness of our internal control over financial reporting. In addition, once we no longer qualify as an emerging growth company under the JOBS Act and lose the ability to rely on the exemptions related thereto discussed above, our independent registered public accounting firm will also need to attest to the effectiveness of our internal control over financial reporting under Section 404. We have not yet commenced the process of determining whether our existing internal controls over financial reporting systems are compliant with Section 404 and whether there are any material weaknesses or significant deficiencies in our existing internal controls. This process will require the investment of substantial time and resources, including by our Chief Financial Officer and other members of our senior management. In addition, we cannot predict the outcome of this determination and whether we will need to implement remedial actions in order to implement effective control over financial reporting. The determination and any remedial actions required could result in us incurring additional costs that we did not anticipate. Irrespective of compliance with Section 404, any failure of our internal controls could have a material adverse effect on our stated results of operations and harm our reputation. As a result, we may experience higher than anticipated operating expenses, as well as higher independent auditor fees during and after the implementation of these changes. If we are unable to implement any of the required changes to our internal control over financial reporting effectively or efficiently or are required to do so earlier than anticipated, it could adversely affect our operations, financial reporting and/or results of operations and could result in an adverse opinion on internal controls from our independent auditors.

Risks Relating to Our Incorporation and Location in Israel

Conditions in Israel could adversely affect our business.

We are incorporated under Israeli law and our principal executive offices are located in Israel. Accordingly, political, economic and military conditions in Israel directly affect our business. Since the State of Israel was

Table of Contents

established in 1948, a number of armed conflicts have occurred between Israel and its Arab neighbors. Although Israel has entered into various agreements with Egypt, Jordan and the Palestinian Authority, there has been an increase in unrest and terrorist activity, which began in September 2000 and has continued with varying levels of severity into 2013. In mid-2006, Israel was engaged in an armed conflict with Hezbollah in Lebanon, resulting in thousands of rockets being fired from Lebanon and disrupting most day-to-day civilian activity in northern Israel. Starting in December 2008, for approximately three weeks, Israel engaged in an armed conflict with Hamas in the Gaza Strip, which involved missile strikes against civilian targets in various parts of Israel and negatively affected business conditions in Israel. In 2012 once again Israel engaged in an armed conflict with Hamas in the Gaza Strip, with missiles reaching as far as Tel-Aviv. Popular uprisings in various countries in the Middle East and North Africa are affecting the political stability of those countries. Such instability may lead to deterioration in the political and trade relationships that exist between the State of Israel and these countries. Any armed conflicts, terrorist activities or political instability in the region could adversely affect our business, financial condition and results of operations. Our commercial insurance does not cover losses that may occur as a result of events associated with the security situation in the Middle East, such as damages to our facilities resulting in disruption of our operations. Although the Israeli government currently covers the reinstatement value of direct damages that are caused by terrorist attacks or acts of war, we cannot assure you that this government coverage will be maintained or will be adequate in the event we submit a claim.

A number of countries, principally in the Middle East, still restrict doing business with Israel and Israeli companies, and additional countries may impose restrictions on doing business with Israel and Israeli companies if hostilities in Israel or political instability in the region continue or increase. These restrictions may limit materially our ability to distribute our products to users in these countries or establish distributor relationships with companies operating in these regions. Any hostilities involving Israel or the interruption or curtailment of trade between Israel and its present trading partners, or significant downturn in the economic or financial condition of Israel, could adversely affect our operations, cause our revenues to decrease and adversely affect the share price of publicly traded companies having operations in Israel, such as us. Similarly, Israeli corporations are limited in conducting business with entities from several countries. For example, in 2008 the Israeli legislature adopted a law forbidding any investments in entities that transact business with Iran. Moreover, individuals in certain geographical regions may refrain from doing business with Israel and Israeli companies as a result of their objection to Israeli foreign or domestic policies.

Our operations may be disrupted by the obligations of personnel to perform military service.

As of June 30, 2013, we had 346 employees based in Israel. Our employees in Israel, including executive officers, may be called upon to perform up to 56 days per each three year period, (in some cases more, e.g. officers may be called to serve up to 84 days per each three year period) of military reserve duty until they reach the age of 40 (and in some cases, depending on their certain military profession up to 45 or even 49) and, in emergency circumstances, could be called to immediate and unlimited active duty (however, this would need to be approved by the Israeli government). In response to increased tension and hostilities, there have been since September 2000 occasional call-ups of military reservists, including in connection with the mid-2006 war in Lebanon, the December 2008 conflict with Hamas and the 2012 conflict in the Gaza Strip, and it is possible that there will be additional call-ups in the future. Our operations could be disrupted by the absence of a significant number of employees related to military service or the absence for extended periods of one or more of our key employees for military service. Such disruptions in the future could materially adversely affect our business and results of operations, especially if we are unable to replace these key employees with other personnel qualified in information technology and data optimization.

The tax benefits that are available to us require us to continue to meet various conditions and may be terminated or reduced in the future, which could increase our costs and taxes.

We are eligible for certain tax benefits provided to Beneficiary Enterprises under the Israeli Law for the Encouragement of Capital Investments, 1959, referred to as the Investment Law. In order to remain eligible for the tax benefits for Beneficiary Enterprises we must continue to meet certain conditions stipulated in the

Table of Contents

Investment Law and its regulations, as amended. In addition, In September 2011, we received a tax ruling from the Israeli Tax Authorities, according to which, among other things, the Israeli Tax Authorities approved the following: (i) our status as an Industrial Enterprise ; and (ii) that the expansion of our enterprise is considered as a Beneficiary Enterprise with 2009 as an elected year of operations, all under the Investment Law as amended by 2005 Amendment. The benefits available to us under this tax ruling are subject to the fulfillment of conditions stipulated in the ruling. If we do not meet these conditions, the ruling may be abolished which would result in adverse tax consequences to us. Further, in the future these tax benefits may be reduced or discontinued. If these tax benefits are reduced, cancelled or discontinued, our Israeli taxable income would be subject to regular Israeli corporate tax rates. The standard corporate tax rate for Israeli companies in 2010 was 25% of their taxable income and was reduced to 24% in 2011. The corporate tax rate was increased to 25% in 2012 and to 26.5% for 2014 and thereafter. Additionally, if we increase our activities outside of Israel through acquisitions, for example, our expanded activities might not be eligible for inclusion in future Israeli tax benefit programs. See Taxation and Government Programs Israeli Tax Considerations and Government Programs Law for the Encouragement of Capital Investments, 5719-1959.

It may be difficult to enforce a U.S. judgment against us, our officers and directors and the Israeli experts named in this prospectus in Israel or the United States, or to assert U.S. securities laws claims in Israel or serve process on our officers and directors and these experts.

We are incorporated in Israel. Only some of our directors and none of our executive officers are resident in the United States. Our independent registered public accounting firm is not a resident of the United States. Most of our assets and the assets of these persons are located outside the United States. Therefore, it may be difficult for an investor, or any other person or entity, to enforce a U.S. court judgment based upon the civil liability provisions of the U.S. federal securities laws against us or any of these persons in a U.S. or Israeli court, or to effect service of process upon these persons in the United States. Additionally, it may be difficult for an investor, or any other person or entity, to assert a claim based on U.S. securities laws in original actions instituted in Israel. Israeli courts may refuse to hear a claim based on a violation of U.S. securities laws on the grounds that Israel is not the most appropriate forum in which to bring such a claim. Even if an Israeli court agrees to hear a claim, it may determine that Israeli law and not U.S. law is applicable to the claim. If U.S. law is found to be applicable, the content of applicable U.S. law must be proved as a fact which can be a time-consuming and costly process. Certain matters of procedure will also be governed by Israeli law. There is little binding case law in Israel addressing the matters described above. See Enforceability of Civil Liabilities.

Your rights and responsibilities as our shareholder will be governed by Israeli law which may differ in some respects from the rights and responsibilities of shareholders of U.S. corporations.

Since we are incorporated under Israeli law, the rights and responsibilities of our shareholders are governed by our articles of association and Israeli law. These rights and responsibilities differ in some respects from the rights and responsibilities of shareholders in United States-based corporations. In particular, a shareholder of an Israeli company has a duty to act in good faith and in a customary manner in exercising its rights and performing its obligations towards the company and other shareholders and to refrain from abusing its power in the company, including, among other things, in voting at the general meeting of shareholders on certain matters, such as an amendment to the company's articles of association, an increase of the company's authorized share capital, a merger of the company and approval of related party transactions that require shareholder approval. A shareholder also has a general duty to refrain from discriminating against other shareholders. In addition, a controlling shareholder or a shareholder who knows that it possesses the power to determine the outcome of a shareholders' vote or to appoint or prevent the appointment of an office holder in the company or has another power with respect to the company, has a duty to act in fairness towards the company. However, Israeli law does not define the substance of this duty of fairness. See Management Approval of Related Party Transactions under Israeli Law Fiduciary Duties of Directors and Executive Officers. Because Israeli corporate law underwent extensive revisions approximately fifteen years ago, some of the parameters and implications of the provisions that govern shareholder behavior have not been clearly determined. These provisions may be

Table of Contents

interpreted to impose additional obligations and liabilities on our shareholders that are not typically imposed on shareholders of United States corporations.

Additionally, we expect the quorum requirements for meetings of our shareholders to be lower than is customary for domestic issuers. As permitted under the Companies Law, pursuant to our amended and restated articles of association to be effective upon the closing of this offering, the quorum required for an ordinary meeting of shareholders will consist of at least two shareholders present in person, by proxy or by other voting instrument in accordance with the Companies Law, who hold at least 25% of the voting power of our shares (and in an adjourned meeting, with some exceptions, any number of shareholders). For an adjourned meeting at which a quorum is not present, the meeting may generally proceed irrespective of the number of shareholders present at the end of half an hour following the time fixed for the meeting.

Table of Contents

SPECIAL NOTE REGARDING FORWARD-LOOKING STATEMENTS

We make forward-looking statements in this prospectus that are subject to risks and uncertainties. These forward-looking statements include information about possible or assumed future results of our business, financial condition, results of operations, liquidity, plans and objectives. In some cases, you can identify forward-looking statements by terminology such as believe, may, estimate, continue, anticipate, intend, should, plan, expect, predict, potential, or the negative of these terms or other similar expressions. The statements we make regarding the following matters are forward-looking by their nature:

our expectations regarding future changes in our cost of revenues and our operating expenses on an absolute basis and as a percentage of our revenues;

our expectation that the percentage of revenues we derive from outside of North America will increase in the future;

our planned level of capital expenditures and our belief that our existing cash and cash from operations will be sufficient to fund our operations for at least the next twelve months; and

our plans to make our product, support and communication channels available in additional languages and to expand our payment infrastructure to transact in additional local currencies and accept additional payment methods.

The preceding list is not intended to be an exhaustive list of all of our forward-looking statements. The forward-looking statements are based on our beliefs, assumptions and expectations of future performance, taking into account the information currently available to us. These statements are only predictions based upon our current expectations and projections about future events. There are important factors that could cause our actual results, levels of activity, performance or achievements to differ materially from the results, levels of activity, performance or achievements expressed or implied by the forward-looking statements. In particular, you should consider the risks provided under Risk Factors in this prospectus.

You should not rely upon forward-looking statements as predictions of future events. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that future results, levels of activity, performance and events and circumstances reflected in the forward-looking statements will be achieved or will occur. Except as required by law, we undertake no obligation to update publicly any forward-looking statements for any reason after the date of this prospectus, to conform these statements to actual results or to changes in our expectations.

Table of Contents

USE OF PROCEEDS

We estimate that the net proceeds to us from this offering, after deducting underwriting discounts and estimated offering expenses, will be approximately \$ million (or approximately \$ million if the underwriters exercise their option in full), assuming the shares are offered at \$ per share, which is the midpoint of the estimated offering price range set forth on the cover page of this prospectus.

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ per share would increase (decrease) the net proceeds to us from this offering by approximately \$ million, assuming the number of shares offered by us as set forth on the cover page of this prospectus remains the same and after deducting the underwriting discounts and commissions. Similarly, each increase (decrease) of 100,000 shares in the number of ordinary shares offered by us would increase (decrease) the net proceeds to us from this offering by approximately \$ million, assuming that the assumed initial public offering price remains the same, and after deducting the underwriting discounts and commissions.

The principal purposes of this offering are to obtain additional working capital, to create a public market for our ordinary shares and to facilitate our future access to the public equity markets. We intend to use the net proceeds from this offering for general corporate purposes focused on growing our business. We expect to use a significant portion to hire additional personnel for our research and development and support and call center functions, and to increase our selling and marketing expenses focused on user acquisition. We may also use a portion of the net proceeds to make acquisitions or investments in complementary companies or technologies, although we do not have any agreement or understanding with respect to any such acquisition or investment at this time. However, we do not currently have specific plans or commitments with respect to the net proceeds from this offering and, accordingly, are unable to quantify the allocation of such proceeds among the various potential uses. We will have broad discretion in the way that we use the net proceeds of this offering.

We will not receive any of the proceeds from the sale of ordinary shares by the selling shareholders.

Table of Contents

DIVIDEND POLICY

We have never declared or paid any dividends on our ordinary shares. We do not anticipate paying any dividends in the foreseeable future. We currently intend to retain future earnings, if any, to finance operations and expand our business. Our board of directors has sole discretion whether to pay dividends. If our board of directors decides to pay dividends, the form, frequency and amount will depend upon our future operations and earnings, capital requirements and surplus, general financial condition, contractual restrictions and other factors that our directors may deem relevant.

Table of Contents**CAPITALIZATION**

The following table sets forth our cash and cash equivalents and total capitalization as of June 30, 2013, as follows:

on an actual basis;

on a pro forma basis to reflect the automatic conversion of all outstanding preferred shares into ordinary shares upon the closing of this offering;

on a pro forma as adjusted basis to give effect to the conversion described in the preceding clause and to reflect the issuance and sale of ordinary shares in this offering at an assumed initial public offering price of \$ per ordinary share, the midpoint of the initial public offering price range set forth on the cover page of this prospectus, after deducting underwriting discounts and commissions and the estimated offering expenses payable by us.

You should read this information in conjunction with our consolidated financial statements and the related notes appearing at the end of this prospectus and the Management's Discussion and Analysis of Financial Condition and Results of Operations section and other financial information contained in this prospectus.

	As of June 30, 2013		
	Actual (in thousands, except share and per share amounts)	Pro Forma	Pro Forma As Adjusted
Cash and cash equivalents	\$ 7,821	\$ 7,821	\$
Ordinary shares, par value NIS 0.01 per share; 7,018,542 shares authorized, actual; 15,000,000 shares authorized, pro forma; shares authorized, pro forma as adjusted; 2,356,227 shares issued and outstanding, actual; 10,059,409 shares issued and outstanding, pro forma; shares issued and outstanding, pro forma as adjusted	\$ 5	\$ 26	\$
Preferred shares, par value NIS 0.01 per share; 7,981,458 shares authorized and actual; zero shares authorized pro forma and zero shares pro forma as adjusted; 7,703,182 shares issued and outstanding, actual; zero shares issued and outstanding, pro forma; zero shares issued and outstanding, pro forma as adjusted	\$ 21	\$	\$
Additional paid-in capital	50,778	50,778	
Other comprehensive loss	(93)	(93)	
Accumulated deficit	(69,859)	(69,859)	
Total shareholders' equity (deficiency)	(19,148)	(19,148)	
Total capitalization	\$ 19,889	\$ 19,889	\$

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ per ordinary share, would increase (decrease) the as adjusted amount of each of cash and cash equivalents, additional paid-in capital, total equity and total capitalization by approximately \$ million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

Table of Contents**DILUTION**

If you invest in our ordinary shares in this offering, your ownership interest will be immediately diluted to the extent of the difference between the initial public offering price per share and the pro forma as adjusted net tangible book value per ordinary share after this offering. Our net tangible book value as of June 30, 2013 was \$ per ordinary share.

After giving effect to the automatic conversion of all outstanding preferred shares upon the closing of this offering and the sale of ordinary shares that we are offering at an assumed initial public offering price of \$ per share, after deducting underwriting discounts and commissions and estimated offering expenses payable by us, our net tangible book value on an adjusted basis as of June 30, 2013 would have been \$ per ordinary share. This amount represents an immediate decrease in net tangible book value of \$ per ordinary share to our existing shareholders and an immediate increase in net tangible book value of \$ per ordinary share to new investors purchasing ordinary shares in this offering. We determine dilution by subtracting the pro forma as adjusted net tangible book value per share after this offering from the amount of cash that a new investor paid for an ordinary share.

The following table illustrates this dilution:

Assumed initial public offering price per share	\$
Pro forma net tangible book value per share as of June 30, 2013	\$
Increase per share attributable to this offering	
Pro forma as adjusted net tangible book value per share after this offering	
Dilution per share to new investors in this offering.	\$

A \$1.00 increase (decrease) in the assumed initial public offering price of \$ per ordinary share would increase (decrease) the pro forma as adjusted amount of each of cash, cash equivalents and short-term investments, share capital, share premium, additional paid-in capital, total equity and total capitalization by approximately \$ million, assuming that the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting underwriting discounts and commissions and estimated offering expenses payable by us.

If the underwriters exercise their option to purchase additional ordinary shares in full in this offering, the pro forma as adjusted net tangible book value after the offering would be \$ per share, the decrease in net tangible book value per share to existing shareholders would be \$ and the increase in net tangible book value per share to new investors would be \$ per share, in each case assuming an initial public offering price of \$ per ordinary share.

The following table summarizes, as of , 2013, the differences between the number of shares purchased from us, the total consideration paid to us in cash and the average price per share that existing shareholders paid during the past five years, on the one hand, and new investors are paying in this offering, on the other hand. The calculation below is based on an assumed initial public offering price of \$ per share before deducting underwriting discounts and commissions and estimated offering expenses payable by us.

	Shares Purchased		Total Consideration		Average Price Per Share
	Number	Percent	Amount	Percent	
Existing shareholders		%	\$	%	\$
New investors					
Total		100%		100%	

The foregoing tables and calculations exclude (1) 2,373,640 ordinary shares reserved for issuance under our equity incentive plans as of June 30, 2013 of which options to purchase 2,278,185 shares had been granted at a weighted average exercise price of \$2.36 per share, and (2) warrants to purchase 9,766 ordinary shares with an exercise price of \$20.48 per share.

Table of Contents

To the extent any of these outstanding options is exercised, there will be further dilution to new investors. To the extent all of such outstanding options had been exercised as of June 30, 2013, the pro forma as adjusted net tangible book value per share after this offering would be \$ _____, and total dilution per share to new investors would be \$ _____.

If the underwriters exercise their option to purchase additional shares in full:

the percentage of ordinary shares held by existing shareholders will decrease to approximately _____ % of the total number of our ordinary shares outstanding after this offering; and

the number of shares held by new investors will increase to _____, or approximately _____ % of the total number of our ordinary shares outstanding after this offering.

Table of Contents**SELECTED CONSOLIDATED FINANCIAL AND OTHER DATA**

The following tables set forth our selected consolidated financial and other data. You should read the following selected consolidated financial and other data in conjunction with Management's Discussion and Analysis of Financial Condition and Results of Operations and our consolidated financial statements and related notes included elsewhere in this prospectus. Historical results are not necessarily indicative of the results that may be expected in the future. Our financial statements have been prepared in accordance with U.S. GAAP.

The selected consolidated statements of operations data for each of the years in the three-year period ended December 31, 2012 and the consolidated balance sheet data as of December 31, 2011 and 2012 are derived from our audited consolidated financial statements appearing elsewhere in this prospectus. The consolidated balance sheet data as of December 31, 2010 are derived from our audited consolidated financial statements that are not included in this prospectus. The selected consolidated statements of operations data for the six months ended June 30, 2012 and 2013 and the selected consolidated balance sheet data as of June 30, 2013 have been derived from our unaudited interim condensed consolidated financial statements included elsewhere in this prospectus. In the opinion of management, these unaudited interim condensed consolidated financial statements include all adjustments, consisting of normal recurring adjustments, necessary for a fair presentation of our financial position and results of operations for these periods. Results from interim periods are not necessarily indicative of results that may be expected for the entire year.

**MANAGEMENT'S DISCUSSION AND ANALYSIS OF
FINANCIAL CONDITION AND RESULTS OF OPERATIONS**

The following discussion should be read in conjunction with our consolidated financial statements and the related notes included elsewhere in this prospectus. This discussion contains forward-looking statements that are subject to known and unknown risks and uncertainties. Actual results and the timing of events may differ significantly from those expressed or implied in such forward-looking statements due to a number of factors, including those set forth in the section entitled "Risk Factors" and elsewhere in this prospectus. You should read the following discussion in conjunction with "Special note regarding forward-looking statements" and "Risk Factors."

Overview

We are a leading global web development platform with one of the largest number of registered users in the world. We empower more than 37 million registered users in 190 countries to create and manage a fully integrated and dynamic digital presence. We are pioneering a new approach to web development and management that provides an easy-to-use yet powerful cloud-based platform that eliminates complex coding and expensive design services. Our solutions enable millions of businesses, organizations, professionals and individuals to take their businesses, brands and workflow online without the need to engage expensive development and design firms or other costly professionals.

We were founded in late 2006 and have achieved a number of significant milestones since then:

In April 2008, we launched our Wix Editor, which enabled the creation of a digital presence in Flash format.

In October 2008, we launched our premium subscription offering and by July 2009 gained our first one million users and 20,495 premium subscriptions.

By June 2011, we reached 10 million users and by January 2012, we supported five languages across 190 countries.

In March 2012, we released our advanced HTML5 Editor, which greatly improved our service offering and support for mobile devices, allowed our users greater functionality and customization and expanded our abilities to develop new solutions to offer our users. By April 2012, we reached 20 million registered users.

In October 2012, we introduced the Wix App Market with Wix and third-party developed applications, or apps, providing users with additional workflow functionality which can be integrated into their websites.

Throughout 2013, we continued to grow at a rapid pace and as of August 31, 2013, we had more than 37 million registered users and 679,536 premium subscriptions and averaged 19,762 app installations per day during the month of August.

We have experienced significant growth in our user base and premium subscriptions in recent periods. Our users grew from 6.5 million at December 31, 2010 to 28.2 million at December 31, 2012, representing a 108% compounded annual growth rate. Our premium subscriptions have grown from 149,084 to 469,589 over the same period, representing a 78% compounded annual growth rate. Through June 30, 2013, we had achieved 14 consecutive quarters of sequential growth in the accumulated number of premium subscriptions. We have also achieved 14 consecutive quarters of growth in revenues and collections. We had revenues of \$9.9 million, \$24.6 million and \$43.7 million and collections of \$13.8 million, \$29.6 million and \$52.5 million in 2010, 2011 and 2012, respectively. We had a net loss of \$11.5 million, \$22.7 million and \$15.0 million in 2010, 2011 and 2012, respectively. We had revenues of \$34.1 million, collections of \$41.9 million and a net loss of \$10.1 million during the six months ended June 30, 2013.

Table of Contents

How We Generate Revenues

We derive the substantial majority of our revenue from monthly and annual premium subscriptions for our solutions. Annual subscriptions provide benefits to our operating model because we are able to collect cash up front, increase overall retention rates and have greater visibility into revenues. As a result, we provide incentives to drive annual subscriptions, including a lower average monthly price relative to a monthly subscription. We have noticed, however, that promotions that further lower the effective price of an annual subscription can result in attracting users who do not renew their subscription once the promotion is no longer available. We therefore seek to strike a balance between attracting annual subscriptions and maintaining a user base that is loyal to our offering. As of August 31, 2013, 64% of our overall premium subscriptions were annual and 36% were monthly.

In addition, we generate revenues from selling third-party domain registration, revenue from Wix-developed apps and revenues from sharing agreements with third-party developers for apps sold through our App Market. We launched our App Market in the last quarter of 2012 and therefore generated negligible revenues from it in 2012.

Our solutions are offered through a freemium model in which users can register with an e-mail address and build, launch and manage a digital presence for free for an unlimited amount of time. A premium subscription, which provides users with additional solutions such as extra bandwidth and storage, Wix ad removal, access to Google Analytics, domain connectivity and eCommerce solutions, can be purchased at any time. Because we increase our pipeline of potential premium subscriptions by acquiring more registered users and over half of the new premium subscriptions in a typical month in recent periods were generated by registered users who registered in previous months, we are focused on building a large user base. The number of new registered users we attract is therefore a key factor in growing our premium subscription base, which drives our revenues and collections. Users that purchase premium subscriptions often decide to do so several months, quarters or years after initially registering with us. Thus, in each period, new premium subscriptions include users who registered in that period as well as users who initially registered with us in previous periods. We believe this characteristic of our business model provides us with a growing pipeline of potential subscriptions as our user base grows.

User Acquisition Spending

Approximately 59% of the premium subscriptions generated by users that registered in August 2013 came from organic and direct sources, meaning visitors that reached us via unpaid search results or by typing the URL of our website in their browser. Our selling and marketing spending to attract additional new registered users focuses primarily on online advertising. The types of paid marketing channels that we target are cost-per-click advertisements on search engines and social networking sites and targeted and generic banner advertisements on other sites.

Our registered user acquisition strategy is based on the significant amounts of data that we have accumulated regarding the behavior of registered users that we acquire from different sources. We extrapolate from this historical user behavior data to predict future user behavior and make decisions regarding our marketing expenditures. In order to grow our registered user base and in turn our premium subscriptions, we consider the time period over which we seek to return an amount of collections equal to the marketing expenditures used to attract a specific group of registered users during a particular period, which we refer to as a cohort. In order to achieve the targeted time for return on those marketing expenditures, we adjust the paid marketing channels that we use and the amounts that we pay to acquire new registered users in addition to considering those registered users that come from organic and direct sources. For example, we could pay a substantially identical amount to acquire fewer users that generate premium subscriptions at a higher rate versus acquiring more users that generate premium subscriptions at a lower rate. The net amount of premium subscriptions would be the same, but in the former case we would have acquired fewer new registered users overall. We prefer the latter case due to the benefit of gaining more registered users and having a larger pipeline of registered users that can generate premium subscriptions over time based on the long tail of premium subscriptions that each cohort generates. This larger number of users also creates more overall users of our platform who can recommend others to our site. In addition, a single registered user can purchase multiple

Table of Contents

premium subscriptions. This fact, coupled with our preference to grow the size of our user base even if the rate of purchase of premium subscriptions is lower, is why we do not consider the rate at which registered users purchase a premium subscription (or any other measure of conversion) to be a meaningful measure of the success of our business.

Since we target our marketing expenditures by extrapolating from historical user behavior to predict future user behavior, an event that disrupts that behavior can adversely impact the returns that we projected for a particular cohort. For example, an event such as a change to or a bug in a browser that affects all websites viewed on that browser, including websites created using our platform, can adversely impact user behavior and in turn our projected returns. Moreover, significant announcements by third parties can also have the same effect. For example, an announcement by Adobe to stop supporting Flash on mobile devices when our platform was Flash-based only, in the past caused us to attract less new registered users than we projected during the short-term impact of such announcement.

Premium Subscription Origination Analysis

To track our growth, progress and execution of marketing efforts, including achievement of our targeted time for return on marketing expenditures, we regularly review the relationship between origination of our users and origination of premium subscriptions.

First Quarter 2010 User Cohort. The following chart summarizes the number of premium subscriptions that originated during each quarterly period from the first quarter of 2010 to the first quarter of 2013 from the 919,221 registered users that first registered with us in the first quarter of 2010. We refer to this group of users as our first quarter 2010 User Cohort. The first quarter 2010 User Cohort is representative of trends we have seen in premium subscription originations, and we believe it is consistent with our users' subscription purchasing behavior in recent periods.

Through June 30, 2013, the first quarter 2010 User Cohort generated a total of 64,493 new premium subscriptions and continued to generate premium subscriptions up through and during the third quarter of 2013. As of the end of its first quarter, there were 18,562 premium subscriptions that had been purchased by users from the first quarter 2010 User Cohort. Fourteen quarters later there were still 19,472 premium subscriptions from users that originated from this same cohort. We spent approximately \$1.1 million in advertising expenses to acquire this user cohort. Since originating, premium subscriptions from users in this cohort have resulted in aggregate revenues recognized of \$7.8 million and \$9.0 million in collections through the second quarter of 2013. Approximately \$1.2 million of deferred revenue relating to purchases by this user cohort remained outstanding at June 30, 2013. Furthermore, this cohort continues to generate revenue and collections beyond that date.

Premium Subscriptions From First Quarter 2010 User Cohort

Table of Contents

Second Quarter 2013 Premium Subscription Cohort. The following chart summarizes the composition of premium subscriptions purchased in the second quarter of 2013 by user registration date. In the second quarter of 2013, we sold 154,171 premium subscriptions, of which 65,857 premium subscriptions, or 43% of the total, were purchased by users that first registered with us in the same quarter. The remaining 57% of premium subscriptions purchased in the second quarter of 2013 were by users who initially registered in earlier quarters.

Premium Subscriptions in First Quarter 2013 by User Registration Date

Some users account for multiple premium subscriptions. For example, users who are professional web designers often use our platform to support their business, building and designing sites for their own customers. We believe these trends illustrate the increasing value of our user base as we continue to increase the number of our users.

Key Financial and Operating Metrics

We monitor the following key operating and financial metrics to evaluate the growth of our business, measure the effectiveness of our marketing efforts, identify trends affecting our business, formulate financial projections and make strategic decisions:

Collections. We define collections as total cash collected by us from our customers in a given period. Collections is calculated by adding the change in deferred revenues for a particular period to revenues for the same period. Collections consists primarily of amounts from annual and monthly premium subscriptions by users, which are deferred and recognized as revenues over the terms of the subscriptions and payments by our users for domains, which are also recognized ratably over the term of the service period. We believe that collections is a leading indicator of the growth of our overall business. Collections is non-GAAP financial measure. For a reconciliation of collections to the most directly comparable U.S. GAAP measure, see Summary Summary Consolidated Financial and Other Data Non-GAAP Financial Measures Collections.

Free cash flow. We define free cash flow as cash flow from operating activities minus capital expenditures. We believe that free cash flow is useful in evaluating our business because free cash flow reflects the cash surplus available or used to fund the expansion of our business after the payment of capital expenditures relating to the necessary components of ongoing operations. Free cash flow is currently negative because of the substantial investments that we are making in expanding our business. Free cash flow is a non-GAAP financial measure. For reconciliation of free cash flow to the

Table of Contents

most directly comparable U.S. GAAP measure, see Summary Summary Consolidated Financial and Other Data Non-GAAP Financial Measures Free Cash Flow.

Number of registered users at period end. We define this metric as the total number of users, including those who have purchased premium subscriptions, who are registered with Wix.com with a unique e-mail address at the end of the period. The length of time that users take following registration to design and publish a website varies significantly from hours to years, and many users never publish a website. We have no means of assessing the level of engagement of a particular user following registration or how close a user is to potentially publishing their website. We view the number of users at the end of a given period as a key indicator of the attractiveness and usability of our product, as well as the strength of our pipeline that can generate premium subscriptions over time. We believe that growth in premium subscriptions will be driven significantly by our ability to add users to our platform and to further enhance our product and service offerings.

Number of premium subscriptions at period end. We define this metric as the total monthly and annual premium subscriptions as of the end of the period. A single user can purchase multiple premium subscriptions. Because we derive the majority of our revenues and collections from premium subscriptions, we believe that this is a key metric in understanding our growth. The total number of premium subscriptions is also impacted by the renewal rates of our existing premium subscriptions. Premium subscriptions terminate due to an active decision by a user not to renew their subscription or due to the failure of a user to update his or her credit card information upon expiration or termination. Our renewal rates demonstrate our strong value proposition to our premium subscriptions. We observe the average renewal rates of the cohorts of our users with premium subscriptions to measure the effectiveness of our platform and satisfaction of our users. From January 1, 2010 to June 30, 2013, an average of 71% of our registered users with annual subscriptions renewed their subscriptions after the first year. Over the same period, an average of 51% of our registered users with monthly subscriptions maintained their subscriptions after one year. Renewal rates improved in the second and third years of subscription for both annual and monthly subscriptions. Registered users with annual subscriptions who had renewed in the first year, renewed at a rate of 71% in the second year, while those with monthly subscriptions renewed at a rate of 65% in the second year. Registered users with annual subscriptions who had renewed for two years, renewed at a rate of 72% in the third year, while those with monthly subscriptions renewed at a rate of 68% in the third year.

Components of Statements of Operations**Revenues**

Sources of Revenues. We derive the substantial majority of our revenues from monthly and annual premium subscriptions by businesses, organizations, professionals and individuals to our various premium subscriptions, which include extra bandwidth and storage, Wix ad removal, access to Google Analytics, domain connectivity and eCommerce solutions.

We derive a small portion of our revenues from selling third-party domain registration. Revenues from domain name registrations accounted for approximately 5% of revenues in 2012 and 6% of revenues in the six months ended June 30, 2013. We also derive a small portion of our revenues from our App Market consisting of revenues derived from sharing agreements with third parties pursuant to which we receive a portion of the collected revenues of any app to which our users subscribe. Revenues from app installations from our App Market accounted for a negligible amount of revenues in 2012 and the six months ended June 30, 2013. We plan to increase the number of value-added services that we offer and the associated revenues we derive from these services.

Payment and Revenue Recognition. Revenues from premium subscriptions, domain name registration and apps developed by us are recognized ratably over the term of the service period. We offer new premium subscription packages for a 14-day trial period during which the user can cancel the subscription at any time and receive a full refund. We classify such amounts collected from new subscriptions as customer deposits until the

Table of Contents

end of the 14-day trial period. After the 14-day trial period has ended, we recognize premium subscription revenues ratably over the term of the service period, either monthly or annually. We do not offer trial periods for domain name registrations. Substantially all deferred revenues consist of amounts received from premium subscriptions and domain registration sales that are not yet recognized as revenues. For revenues from apps developed by third-party app developers, we account on a net basis by recognizing only the commission we retain from each sale. We do not reflect in our financial statements the portion of the gross amount billed to users with apps that we remit to third-party app developers. See Application of Critical Accounting Policies and Estimates Revenue Recognition.

We bill our premium subscriptions in advance through our users' credit or debit cards and a small amount through PayPal. We currently use third-party billing systems integrated into our website, and an internal billing system, both which provide a portal for users to submit credit or debit card information for processing. Payment occurs after the credit card information entered for the transaction passes through the validation and verification process of our internal and third-party billing providers and processors.

Geographic Breakdown of Revenues

The following table sets forth the geographic breakdown of revenues for the periods indicated:

	Year Ended December 31,			Six Months Ended June 30,	
	2010	2011	2012	2012	2013
North America	71%	67%	60%	62%	56%
Europe	17	18	21	20	23
Latin America	3	6	10	9	11
Asia and Others	9	9	9	9	10
Total	100%	100%	100%	100%	100%

We expect the percentage of revenues derived from outside of North America to increase over time as we continue to further penetrate internationally. Additional international adoption of our solutions and services is driven by our ability to offer our platform in local languages and offer local billing solutions. When penetrating new markets, we first focus on establishing an operational online billing system, if needed, prior to launching and investing in local marketing activities. We currently offer our platform in five languages—English, French, Spanish, Portuguese and Italian, and we have plans to add more languages. We have historically launched our platform in new markets without the need for local support staff.

Costs and Expenses

Cost of Revenues. Cost of revenues consists primarily of costs directly associated with the provision of services, namely, bandwidth and hosting costs for our platform, customer support software solutions and related call center costs along with domain name registration costs. Cost of revenues also consists of personnel and the related overhead costs, including share-based compensation. We expect cost of revenues to increase with the increase in the number of users but to slightly decrease as a percentage of revenues.

Research and Development. Research and development expenses consist primarily of personnel and the related overhead costs, including share-based compensation, related to our solutions and service development activities including new initiatives, quality assurance and other related development activities. We expect research and development costs and expenses to continue to increase on an absolute basis, but to decrease as a percentage of revenues, as we develop new solutions and add functionalities to our existing solutions and services and expand our mobile app offering.

Selling and Marketing. Our primary operating expense is selling and marketing. The significant majority of our selling and marketing expenses are user acquisition costs, which consist primarily of fees paid to third parties for our cost-per-click advertising, social networking and marketing campaigns and other media advertisements. We intend to continue expanding our user acquisition efforts to drive revenue growth while focusing on our return-on-

Table of Contents

investment targets. Other selling and marketing expenses also consist primarily of personnel and the related overhead costs, including share-based compensation for personnel engaged in marketing, advertising and promotional activities. Our marketing expenses also include billing costs in connection with the processing fee of our collections. We expect our expenses to increase on an absolute basis as we penetrate our existing markets and expand to new markets, hire additional personnel and increase our business and collections.

General and Administrative. General and administrative expenses primarily consist of personnel and overhead related costs, including share-based compensation, for our executive, finance, human resources and administrative personnel. General and administrative expenses also include legal, accounting and other professional service fees and other corporate expenses. We expect our general and administrative expenses to increase on an absolute basis, but decrease as a percentage of revenues, as we penetrate our existing markets and expand to new markets, hire additional personnel and incur additional costs related to the growth of our business. We will also incur costs associated with being a public company in the United States, including compliance under the Sarbanes-Oxley Act of 2002 and rules promulgated by the SEC and the New York Stock Exchange, and director and officer liability insurance.

Financial Income (Expenses), Net. Financial income (expenses), net consists primarily of costs related to derivative instruments we enter into for foreign exchange transactions to hedge a portion of our payments in NIS, as well as income and expenses related to the change in the fair value of such derivative instruments. In addition, financial income (expenses), net includes the fluctuation in value due to foreign exchange differences between our monetary assets and liabilities denominated in NIS. We do not have any indebtedness for borrowed amounts.

Other Expenses. During 2011, we relocated to our current corporate headquarters in Tel Aviv. This relocation resulted in us incurring a capital loss due to the disposal of leasehold improvements and fixed assets. Therefore, we recorded a capital loss of \$0.1 million in 2011 while we recorded no capital gains or losses in 2010 and a minimal amount in 2012 and the six months ended June 30, 2013.

Taxes on Income. As of June 30, 2013, we had not yet generated taxable income in Israel. At the end of our last fiscal year, our net operating loss carry forwards for Israeli tax purposes amounted to approximately \$36.2 million. After we utilize our net operating loss carry forwards, we are eligible for certain tax benefits in Israel under the Law for the Encouragement of Capital Investments, 1959, or the Investment Law. Accordingly, if we generate taxable income in Israel during the benefit period, we expect our effective tax rate will be lower than the standard corporate tax rate for Israeli companies, which was 25% in 2010, 24% in 2011 and 25% in 2012 and 2013. The standard corporate tax rate is set to increase to 26.5% in 2014. Our benefit period currently ends in 2020. Our taxable income generated outside of Israel or derived from other sources in Israel which is not eligible for tax benefits will be subject to the regular corporate tax rate. For more information about the tax benefits available to us as a Beneficiary Enterprise, see Taxation and Government Programs.

Table of Contents**Comparison of Period to Period Results of Operations**

The following tables set forth our results of operations in dollars and as a percentage of revenues for the periods indicated:

	2010	Year Ended December 31,		Six Months Ended June 30,

Edgar Filing: Wix.com Ltd. - Form F-1

Revenues. Revenues increased by \$15.2 million, or 80.4%, from \$18.9 million in the six months ended June 30, 2012 to \$34.1 million in the six months ended June 30, 2013. The substantial majority of this increase was driven by 65.8% growth in the number of premium subscriptions from 377,945 as of June 30, 2012 to 626,733 as of June 30, 2013. The number of premium subscriptions was favorably impacted by the introduction of versions of our HTML5 product in languages other than English in July 2012, and the introduction of our eCommerce platform for HTML5 in August 2012. Premium subscriptions were also impacted favorably in the six months ended June 30, 2013 by an increase in marketing spend, particularly on social media platforms.

Table of Contents

Collections increased by \$19.6 million, or 87.9%, from \$22.3 million in the six months ended June 30, 2012 to \$41.9 million in the six months ended June 30, 2013. This increase was due to an increase in premium subscriptions from 377,945 to 626,733 as well as domain name registration to a lesser extent.

Costs and Expenses

Cost of Revenues. Cost of revenues increased by \$2.5 million, or 64.1%, from \$3.9 million in the six months ended June 30, 2012 to \$6.4 million in the six months ended June 30, 2013. This increase was primarily attributable to an increase of \$1.1 million in payroll expenses due to increased headcount from 91 to 130, an increase of \$0.7 million in domain name costs, an increase of \$0.6 million in bandwidth and hosting costs, and an increase of \$0.1 million related to allocated overhead expenses and other costs due to expanded activities.

Research and Development. Research and development expenses increased by \$3.6 million, or 45.6%, from \$7.9 million in the six months ended June 30, 2012 to \$11.5 million in the six months ended June 30, 2013. This increase was attributable to an increase of \$2.4 million in payroll and consultant fees due to increased headcount from 131 to 202 to support our development plans, an increase of \$0.5 million related to allocated overhead expenses, an increase of \$0.5 million in other development costs due to expanded activities, and an increase of \$0.2 million in share-based compensation costs.

Selling and Marketing. Selling and marketing expenses increased by \$9.6 million, or 73.8%, from \$13.0 million in the six months ended June 30, 2012 to \$22.6 million in the six months ended June 30, 2013. This increase was attributable to an increase of \$7.8 million in user acquisition costs and other marketing activities from \$10.0 million in the six months ended June 30, 2012 to \$17.8 million in the six months ended June 30, 2013 due to the expansion of distribution channels for our products and services, especially via social networking platforms. It also resulted from an increase of \$0.8 million in processing costs of our collections, an increase of \$0.7 million in payroll expenses due to increased headcount from 53 to 66, and an increase of \$0.3 million in related allocated overhead expenses.

General and Administrative. General and administrative expenses increased by \$1.4 million, or 82.4%, from \$1.7 million in the six months ended June 30, 2012 to \$3.1 million in the six months ended June 30, 2013. This increase was primarily attributable to an increase of \$0.7 million in legal, audit and other consulting services costs primarily associated with the increase in our operations and our preparation to become a public company, an increase of \$0.6 million in payroll expenses due to increased headcount from 19 to 27, which included an increase of \$0.3 million in share-based compensation expenses and an increase of \$0.1 million related to allocated overhead expenses and other costs.

Financial Expenses (Income), Net. Financial expenses (income), net decreased by \$0.07 million from financial expenses of \$0.11 million in the six months ended June 30, 2012 to financial expenses of \$0.04 million in the six months ended June 30, 2013. Financial expenses in the six months ended June 30, 2013 was primarily due to \$0.3 million in share-based compensation costs related to warrants granted in connection with our revolving credit facility, which was offset with a gain of \$0.4 million due to foreign exchange fluctuations of the NIS against the U.S. dollar, losses from hedging transactions of \$0.1 million and interest expenses of \$0.1 million.

Taxes on Income. Taxes on income increased by \$0.5 million from \$0.1 million in the six months ended June 30, 2012 to \$0.6 million in the six months ended June 30, 2013. This increase was attributable to an increase of \$0.2 million in taxes in the United States and an increase of \$0.3 million in taxes in Brazil.

Year Ended December 31, 2012 Compared to Year Ended December 31, 2011

Revenues. Revenues increased by \$19.1 million, or 77.6%, from \$24.6 million in 2011 to \$43.7 million in 2012. The substantial majority of this increase in revenues was driven by 56% growth in the number of premium subscriptions from 298,143 as of December 31, 2011 to 469,589 as of December 31, 2012 with virtually no impact from changes in pricing. The number of premium subscriptions was favorably impacted by the

Table of Contents

introduction of our HTML5 platform in March 2012, the introduction of versions of our HTML5 platform in languages other than English in July 2012, and the introduction of our eCommerce platform for HTML5 in August 2012. Premium subscriptions were also impacted favorably in 2012 by an increase in marketing spending.

Collections increased by \$22.9 million, from \$29.6 million in 2011 to \$52.5 million in 2012. This increase was due to an increase in premium subscriptions and domain name registration sales.

Costs and Expenses

Cost of Revenues. Cost of revenues increased by \$3.9 million, or 73.6%, from \$5.3 million in 2011 to \$9.2 million in 2012. This increase was primarily attributable to an increase of \$1.4 million in payroll expenses due to increased headcount from 73 to 114, an increase of \$1.0 million in bandwidth and hosting costs, an increase of \$0.9 million in domain name costs as we started to sell third-party domain names in May 2011, and an increase of \$0.6 million related to allocated overhead expenses due to expanded activities.

Research and Development. Research and development expenses increased by \$2.1 million, or 14.3%, from \$14.7 million in 2011 to \$16.8 million in 2012. This increase was attributable to an increase of \$2.8 million in payroll and consultants fees due to increased headcount from 126 to 176 to support our development plans, which was partly offset by a decrease of \$1.4 million in share-based compensation costs, and an increase of \$0.7 million related to allocated overhead expenses due to expanded activities.

Selling and Marketing. Selling and marketing expenses increased by \$7.5 million, or 34.7%, from \$21.6 million in 2011 to \$29.1 million in 2012. This increase was attributable to an increase of \$6.0 million in user acquisition costs and other marketing activities from \$16.2 million in 2011 to \$22.2 million in 2012 due to the expansion of distribution channels for our products and services. It also resulted from an increase of \$0.8 million in payroll expenses due to increased headcount from 44 to 56, and an increase of \$0.6 million in processing costs of our collections and an increase of \$0.1 million in facilities costs.

General and Administrative. General and administrative expenses decreased by \$1.7 million, or 31.5%, from \$5.4 million in 2011 to \$3.7 million in 2012. This decrease was primarily attributable to a decrease of \$2.1 million in payroll expenses, which included a decrease of \$2.3 million in share-based compensation expenses recorded in 2011 that was partly offset by an increase of \$0.2 million in payroll fees. There was also an increase of \$0.4 million in external services and other costs.

Financial Income (Expenses), Net. Financial income (expenses), net increased by \$0.5 million from 2011 to 2012. Financial income in 2012 was primarily due to gains from hedging transactions entered into to mitigate foreign exchange fluctuations of the NIS against the U.S. dollar. This increase was partially offset by exchange rate differences.

Taxes on Income. Taxes on income increased by \$0.3 million from \$0.1 million in 2011 to \$0.4 million in 2012. This increase was primarily attributable to an increase of \$0.2 million in taxes in Brazil and increase of \$0.1 million in taxes in the U.S.

Year Ended December 31, 2011 Compared to Year Ended December 31, 2010

Revenues. Revenues increased by \$14.7 million, or 148%, from \$9.9 million in 2010 to \$24.6 million in 2011. The substantial majority of this increase was attributable to the increase in premium subscriptions, with virtually no impact from changes in product pricing. The increase in premium subscription revenues was driven by a 104% growth in our premium subscriptions from 149,084 as of December 31, 2010 to 298,143 as of December 31, 2011. This increase resulted from us more than doubling our marketing expenses from 2010 to 2011 and introducing our platform in additional languages, including French, Italian, Portuguese and Spanish, which contributed to increased revenues.

Table of Contents

Collections increased by \$15.8 million from \$13.8 million in 2010 to \$29.6 million in 2011. This increase was due to an increase in premium subscriptions and also due to sales of domain name registration sales which was introduced in May 2011.

Costs and Expenses

Cost of Revenues. Cost of revenues increased by \$3.1 million, or 140.9%, from \$2.2 million in 2010 to \$5.3 million in 2011. Cost of revenues increased primarily due an increase of \$1.7 million in payroll expenses due to increased headcount from 42 to 73, an increase of \$0.9 million related to allocated overhead due to expanded activities and an increase of \$0.5 million in bandwidth and hosting costs. The increase in 2011 is attributed to our call center office which began operations in the end of 2010 and increased its activity through 2011.

Research and Development. Research and development expenses increased by \$7.4 million, or 101.4%, from \$7.3 million in 2010 to \$14.7 million in 2011. This increase was attributable to an increase of \$6.2 in payroll and consultant fees, which includes \$4.9 million due to increased headcount from 80 to 126 to support new product initiatives and \$1.3 million due to an increase in share-based and option compensation expenses. There was also an increase of \$1.2 million related to facilities fee and allocated overhead expenses due to growth in headcount.

Selling and Marketing. Selling and marketing expenses increased by \$11.8 million, or 120.4%, from \$9.8 million in 2010 to \$21.6 million in 2011. This increase was primarily attributable to an increase of \$9.7 million in user acquisition and marketing activity costs from \$6.5 million in 2010 to \$16.2 million in 2011 due to the expansion of our distribution channels such as paid searches and online media buying. This increase was also due to an increase of \$0.9 million due to increased payroll expenses associated with increased headcount from 36 to 44, an increase of \$0.8 million in processing costs and an increase of \$0.4 million in facilities fees.

General and Administrative. General and administrative expenses increased by \$3.6 million, or 200.0%, from \$1.8 million in 2010 to \$5.4 million in 2011. This increase was due to an increase of \$2.2 million of share-based compensation expenses, as well as an increase of \$0.7 million in personnel-related costs and an increase of \$0.7 million due to third-party professional services fees and overhead expenses.

Financial Income (Expenses), Net. Financial expenses increased from 2010 to 2011 primarily due to currency hedging activities, which were partially offset by an increase in interest income on cash balances and exchange rate differences.

Taxes on Income. Taxes on income remained consistent from 2010 to 2011.

Table of Contents**Quarterly Results of Operations and Seasonality**

The following tables present our unaudited condensed consolidated quarterly results of operations in dollars and as a percentage of revenues for the periods indicated. Our quarterly collections and free cash flow as well as reconciliations of revenues to collections and reconciliations of net cash used in operating activities to free cash flow for the same periods are also presented. This information should be read in conjunction with our consolidated financial statements and related notes included elsewhere in this prospectus. The historical quarterly results presented are not necessarily indicative of the results that may be expected for any future quarters or periods.

Free cash flow(1)	\$ (1,047)	\$ (3,249)	\$ (5,105)	\$ (2,952)	\$ (1,374)	\$ (1,809)	\$ (1,849)	\$ 477	\$ 236	\$ (32)

(1) See Summary Consolidated Financial and Other Data Non-GAAP Financial Measures for how we define and calculate collections and free cash flow, a reconciliation of these non-GAAP financial measures to the most directly comparable GAAP measures, and a discussion about the limitations of these non-GAAP financial measures.

(2) Number of users at period end is defined as the total number of users, including those who purchase premium subscriptions, who are registered with Wix.com with a unique email address at the end of the period.

(3) A single user can purchase multiple premium subscriptions.

Table of Contents

Although our revenues and collections have grown quarter over quarter for the eight quarters presented above, our net loss has fluctuated from quarter to quarter. These quarterly fluctuations in net loss result primarily from increases in selling and marketing expenses for user acquisition in order to generate revenues in subsequent periods.

We believe there are slight seasonal impacts to our business during major holiday periods when we experience lower than average daily site traffic. However to date, seasonal impacts have not been clearly visible in our quarterly consolidated results of operations, which we believe may be due to the rapid growth of our business and our geographic breadth. In the future, seasonal trends may cause fluctuations in our quarterly results, including fluctuations in sequential collections.

Liquidity and Capital Resources

Since our inception, we have financed our operations primarily through the proceeds from the issuance of our preferred shares and cash flows from operations. As of June 30, 2013, we had \$7.8 million of cash and cash equivalents. In addition, we had \$2.3 million as restricted deposits of which \$1.4 million related to our currency hedging transactions and the remaining balance consisted of restricted bank deposits for our leases, credit card agreements and also reserves deposit to secure our online merchant activity with one of our billing processors.

A substantial source of our cash provided by operating activities is our deferred revenues, which is included on our consolidated balance sheet as a liability. Deferred revenues consist of the unrecognized portion of upfront payments from our premium subscriptions as well as domain name registration sales. We assess our liquidity, in part, through an analysis of the anticipated recognition of deferred revenues into revenues together with our other sources of liquidity. As of June 30, 2013, we had a working capital deficit of \$23.2 million, which included \$25.7 million of short-term deferred revenues recorded as a current liability, and we also had \$1.1 million of long-term deferred revenues. These deferred revenues remains unrecognized generally for one to 12 months for premium subscriptions and one to 36 months for domain name registration sales, and will be recognized as revenues ratably over the term of the service period when all of the revenue recognition criteria are met in accordance with our revenue recognition policy.

While our primary source of liquidity is cash flow from operations, we also have funds available under a revolving credit facility with Silicon Valley Bank. The facility is denominated in the U.S. dollar and has a borrowing capacity of the lower of (1) our last month's eligible collections or (2) \$10 million. Our eligible collections for June 2013 were \$7.0 million. Any borrowings under the facility bear interest at an annual rate equal to a daily floating prime rate, as published in the Wall Street Journal, plus 2.25%. The agreement governing the revolving credit facility contains customary terms and conditions. The agreement also contains the following negative covenants, for which the lender's consent is required:

a commitment not to make distributions or payments to our current or former shareholders, except in the ordinary course of business or as compensation to officers, directors and employees;

negative pledges by us and our wholly-owned Delaware subsidiary, Wix.Com, Inc.

limitations on dissolution, any subordinated debt arrangement, mergers, acquisitions and dispositions not in the ordinary course of business; and

restrictions on changes in business, management, ownership or business locations, including the addition of new offices or business locations, or changes in organizational structure.

Failure to meet these financial and other covenants would enable the bank to demand immediate repayment of all outstanding balances under the facility. As of June 30, 2013, we were in compliance with all such covenants. All borrowings under the revolving credit facility must be repaid by December 31, 2014. As of June 30, 2013, we had no outstanding borrowings under this credit facility.

We believe our existing cash and cash from operations will be sufficient to fund our operations for at least the next twelve months. In addition we believe that these resources, together with borrowings under our credit facility and the net proceeds from this offering, will serve to accelerate our growth plans and future operations.

Table of Contents

We expect to spend approximately \$2.0 million through December 31, 2013 for capital expenditures, primarily related to leasehold improvements as we expand our office space. Our future capital requirements will depend on many factors, including our rate of revenue growth, the expansion of our selling and marketing activities, the timing and extent of our spending on research and development efforts, and international expansion. We may also seek to invest in or acquire complementary businesses or technologies. To the extent that existing cash, cash from operations and net proceeds from this offering are insufficient to fund our future activities, we may need to raise additional funding through debt and equity financing. Additional funds may not be available on favorable terms or at all.

The following table presents the major components of net cash flows for the periods presented:

	Year Ended December 31,			Six Months Ended June 30,	
	2010	2011	2012	2012	2013
	(in thousands)				
Net cash provided by (used in) operating activities	\$ (5,310)	\$ (10,599)	\$ (3,608)	\$ (2,775)	\$ 1,281
Net cash provided by (used in) investing activities	(1,766)	(4,553)	683	1,247	(843)
Net cash provided by financing activities	10,103	21,025	61	24	98

Cash Used in Operating Activities

Net cash used in operating activities grew from 2010 to 2011 and decreased through 2012 and the six months ended June 30, 2013. In the six months ended June 30, 2013, operating activities provided \$1.3 million in cash. Our primary source of cash from operating activities has been cash collections from our premium subscriptions. Our primary uses of cash from operating activities have been selling and marketing expenses, personnel and related overhead costs. The increase in cash used in operating activities from 2010 to 2011 resulted from an increase in selling and marketing expenses, research and development activities and support costs for new users partially offset by the growth in collections from our premium subscriptions. The decrease from 2011 to 2012, as well as the positive cash from operations generated in the six months ended June 30, 2013, was due to the significant growth in collections from our premium subscriptions. We expect cash inflows from operating activities to be affected by increases in sales and the timing of collections. We expect cash outflows from operating activities to be affected by increases in marketing and increases in personnel costs as we grow our business.

For the six months ended June 30, 2013, operating activities provided \$1.3 million in cash. Despite generating positive cashflow, our operating cash needs resulted primarily from our net loss of \$10.1 million, which included \$2.0 million of non-cash charges related primarily to share-based compensation expenses, depreciation and tax benefits related to the exercise of share options. Our net loss (after adjusting for such non-cash items) was offset primarily by a net change of \$9.4 in our operating assets and liabilities, which was primarily the result of an increase of \$7.9 million in deferred revenues due to an increase in collections from our premium subscriptions and a \$3.5 million increase in payroll accruals and other liabilities primarily due to trade payables and others. These increases were offset by a \$1.6 million increase in prepaid expenses and other current and long term assets as a result of growth in our business and a \$0.4 million increase in trade receivables due to an increase in sales.

For the six months ended June 30, 2012, operating activities used \$2.8 million in cash, primarily as a result of our net loss of \$7.8 million, offset by non-cash charges of \$0.9 million as well as a net change of \$4.1 million in our net operating assets and liabilities. Non-cash charges included share-based compensation expenses, depreciation and tax benefits related to the exercise of share options.

For the year ended December 31, 2012, operating activities used \$3.6 million in cash, primarily as a result of a net loss of \$15.0 million, offset by non-cash charges of \$2.1 million as well as a net change of \$9.3 million in our net operating assets and liabilities. Non-cash charges included share-based compensation expenses, depreciation, deferred income taxes, net and tax benefits related to the exercise of share options. The net change in our operating assets and liabilities was primarily the result of an increase of \$8.8 million in deferred revenues due to an increase in collections from our premium subscriptions and a \$2.4 million increase in payroll accruals and other liabilities primarily due to trade payables and others. These increases were offset by a \$0.6 million increase in trade receivables due to an increase in sales and a \$1.3 million increase in prepaid expenses and other current and long term assets as a result of growth in our business.

Table of Contents

For the year ended December 31, 2011, operating activities used \$10.6 million in cash as a result of a net loss of \$22.7 million, partially offset by non-cash charges of \$5.4 million as well as a net change of \$6.7 million in our net operating assets and liabilities. Non-cash charges included share-based compensation expenses, depreciation, tax benefits related to the exercise of share options, deferred income taxes, net and capital loss. The net change in our operating assets and liabilities was primarily the result of a \$5.0 million increase in deferred revenues mainly due to an increase in sales of premium subscriptions, as well as a \$2.9 million increase in accrued and other liabilities as a result of growing our business. These increases were partially offset by a \$1.0 million increase in prepaid expenses and other assets as a result of growth in our business and a \$0.2 million increase in trade receivables due to an increase in sales.

For the year ended December 31, 2010, operating activities used \$5.3 million in cash as a result of a net loss of \$11.5 million, partially offset by a net change of \$5.0 million in our net operating assets and liabilities, as well as non-cash charges of \$1.2 million.

Cash Provided by (Used in) Investing Activities

Cash used in investing activities was \$0.8 million in the six months ended June 30, 2013. Cash provided by investing activities was \$0.7 million in 2012. Cash used in investing activities was \$1.8 million and \$4.6 million in 2010 and 2011, respectively. Investing activities have consisted primarily of investment and proceeds of restricted deposits and purchase of property and equipment.

Cash Provided by Financing Activities

Our financing activities have primarily consisted of proceeds from the issuance and sale of preferred shares and proceeds from the exercise of share options. For the six months ended June 30, 2013 and the years ended December 31, 2010, 2011 and 2012, financing activities provided \$0.1 million, \$10.1 million, \$21.0 million and \$0.1 million in cash, respectively, primarily as a result of net proceeds from the issuance and sale of preferred shares and proceeds from the exercise of share options. We expect the completion of this offering to result in a material increase in our cash flows from financing activities.

Contractual Obligations

Our significant contractual obligations as of December 31, 2012 are summarized in the following table:

	Total	Payments Due by Period (1)				Thereafter
		2013	2014	2015	2016	
Operating lease obligations (2)	\$ 4,704	\$ 1,770	\$ 1,463	\$ 1,361	\$ 110	\$

(1) Does not include short-term obligations that accrue monthly and are payable to third-party distributors and Internet search providers.

(2) Consists of future lease payments for our rented office facilities located in Tel Aviv, Israel, New York, New York, and San Francisco, California, as well as future lease payments for leased motor vehicles, the leases for each of which will expire in 2016.

Application of Critical Accounting Policies and Estimates

Our accounting policies and their effect on our financial condition and results of operations are more fully described in our consolidated financial statements included elsewhere in this prospectus. We have prepared our financial statements in conformity with U.S. GAAP, which requires management to make estimates and assumptions that in certain circumstances affect the reported amounts of assets and liabilities, revenues and expenses and disclosure of contingent assets and liabilities. These estimates are prepared using our best judgment, after considering past and current events and economic conditions. While management believes the factors evaluated provide a meaningful basis for establishing and applying sound accounting policies, management cannot guarantee that the estimates will always be consistent with actual results. In addition, certain information relied upon by us in preparing such estimates includes internally generated financial and operating information, external market information, when available, and when necessary, information obtained from consultations with third-parties. Actual results could differ from these estimates and could have a material adverse effect on our reported results. See Risk Factors for a discussion of the possible risks which may affect these estimates.

Table of Contents

We believe that the accounting policies discussed below are critical to our financial results and to the understanding of our past and future performance, as these policies relate to the more significant areas involving management's estimates and assumptions. We consider an accounting estimate to be critical if: (1) it requires us to make assumptions because information was not available at the time or it included matters that were highly uncertain at the time we were making our estimate; and (2) changes in the estimate could have a material impact on our financial condition or results of operations.

Revenue Recognition

We derive most of our revenues from monthly and annual premium subscriptions. We derive a portion of our revenues from selling third-party domain registration. We also derive a portion of our revenues from our App Market consisting of revenues derived from sharing agreements with third parties pursuant to which we receive a portion of the collected revenues of any app to which our users subscribe.

We recognize revenues in accordance with ASC No. 605-10-S99, (SEC Staff Accounting Bulletin No. 104, *Revenue Recognition*), when (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred or services have been rendered to the customer, (iii) the fee is fixed or determinable, and (iv) collectability is reasonably assured.

Revenues related to services for websites and the purchase and registration of domain names are recognized ratably over the term of the service period. Revenues related to apps developed by third-party developers are recognized when earned. We account for such sales on a net basis by recognizing the commission we retain from each sale. The portion of the gross amount billed to users that is remitted by us to third-party app developers is not reflected in our consolidated statements of operations.

We offer new premium subscription packages for a 14-day trial period during which the user can cancel the subscription at any time and receive a full refund. We consider such amounts collected from new premium subscriptions as customer deposits until the end of the 14-day trial period. After the 14-day trial period has ended, we recognize premium subscription revenues ratably over the term of the service period, either monthly or annually. We do not offer trial periods for domain name registrations. Deferred service revenues primarily include unearned amounts received from customers but not recognized as revenues.

Although in general, we do not grant rights of refund, there are certain instances where such refunds occur. Since we collect most of our revenues through online credit card billing, a small portion of our users elect to chargeback due to disputes over the credit card statements and/or claims of false transaction, and accordingly ask for refunds. We maintain a provision for chargebacks and refunds in accordance with ASC No. 605, *Revenue Recognition*, which we estimate based primarily on historical experience as well as management judgment and is recorded through a reduction of revenues.

A portion of our revenue transactions include multiple elements within a single contract if it is determined that multiple units of accounting exist. Commencing January 1, 2011, we adopted Accounting Standards Update (ASU) No. 2009-13, *Multiple-Deliverable Revenue Arrangements*, (amendments to ASC Topic 605, *Revenue Recognition*) (ASU No. 2009-13). ASU No. 2009-13 requires entities to allocate revenue in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy. The amendments eliminate the residual method of revenue allocation and require revenue to be allocated using the relative selling price method.

The primary types of transactions in which we engage for which ASU No. 2009-13 is applicable are agreements that include multiple elements which are delivered at different points in time. Such elements may include some or all of the following:

services for websites;

purchase and registration of domain names; and

third-party apps.

Table of Contents

We consider the sale of each of the above stated elements in bundled agreement to be a separate unit of accounting for the arrangement and defer the relative sales price of the undelivered element to the period in which revenue is earned.

Pursuant to the guidance under ASU No. 2009-13, when a sales arrangement contains multiple elements, the Company allocates revenue to each element based on a selling price hierarchy. The selling price for a deliverable is based on its VSOE if available, third-party evidence (TPE) if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. VSOE of selling price is based on the price charged when the element is sold separately. In determining VSOE, it is required that a substantial majority of the selling prices fall within a reasonable range based on historical discounting trends for specific services. TPE of selling price is established by evaluating largely interchangeable competitor services in stand-alone sales to similarly situated customers.

Monthly and annual premium subscriptions and domain name registrations are sold separately and therefore the selling price is based on VSOE.

Share-Based Compensation

Under U.S. GAAP, we account for our share-based compensation for employees in accordance with the provisions of the Financial Accounting Standards Board's Accounting Standards Codification Topic 718 Compensation Stock Based Compensation, which requires us to measure the cost of options based on the fair value of the award on the grant date. The Company also applies ASC 718 Compensation Stock Compensation (ASC No. 718) and ASC No. 505-50 Equity Based Payments to Non-Employees (ASC No. 505-50) with respect to options issued to non-employees consultants.

We selected the Black-Scholes-Merton option pricing model as the most appropriate method for determining the estimated fair value of our share-based awards. The resulting cost of an equity incentive award is recognized as an expense over the requisite service period of the award, which is usually the vesting period. We recognize compensation expense over the vesting period using the straight-line method and classify these amounts in the consolidated financial statements based on the department to which the related employee reports.

Option Valuations

The determination of the grant date fair value of options using an option pricing model is affected by estimates and assumptions regarding a number of complex and subjective variables. These variables include the expected volatility of our share price over the expected term of the options, share option exercise and cancellation behaviors, risk-free interest rates and expected dividends, which are estimated as follows:

Fair Value of our Ordinary Shares. Because our shares are not publicly traded, we must estimate the fair value of ordinary shares, as discussed in Ordinary Share Valuations below.

Expected Term. The expected term of options granted represents the period of time that options granted are expected to be outstanding, and is determined based on the simplified method in accordance with ASC No. 718-10-S99-1, (SAB No. 110), as adequate historical experience is not available to provide a reasonable estimate.

Volatility. The expected share price volatility was based on the historical equity volatility of the ordinary shares of comparable companies that are publicly traded.

Risk-free Rate. The risk-free interest rate is based on the yield from U.S. Treasury zero-coupon bonds with a term equivalent to the contractual life of the options.

Dividend Yield. We have never declared or paid any cash dividends and do not presently plan to pay cash dividends in the foreseeable future. Consequently, we used an expected dividend yield of zero.

Table of Contents

If any of the assumptions used in the Black-Scholes-Merton model change significantly, share-based compensation for future awards may differ materially compared with the awards granted previously.

The following table presents the weighted-average assumptions used to estimate the fair value of options granted to employees during the periods presented. The number of options granted to non-employees was immaterial.

	Year Ended December 31, 2012	Six Months Ended June 30, 2013
Expected volatility	70%	58-65%
Expected dividends	0%	0%
Expected term	6.11 years	4-5.3 years
Risk-free rate	1.0%-1.6%	0.5%-0.8%

The following table presents the grant dates, number of underlying shares and related exercise prices of awards granted to employees and non-employees, from January 1, 2012 through August 31, 2013, as well as the estimated fair value of the underlying ordinary shares on the grant date.

Date of Grant	Number of Shares		Exercise Price Per Share	Estimated Fair Value Per Ordinary Share at Grant Date
	Subject to Awards Granted			
March 2012	62,450		\$ 3.15	\$ 7.47
May 2012	2,200		3.15	9.09
May 2012	117,850		7.01	9.09
August 2012	67,000		7.01	11.29
January 2013	166,700		7.01	17.39
May 2013	98,200		7.01	27.00
July 2013	899,304		0.01	30.35
July 2013	22,000		17.39	30.35
July 2013	515,535		22.00	30.35
August 2013	9,000		22.00	30.35
August 2013	77,000		30.35	30.35

Based on the assumed initial public offering price of \$ per share, the midpoint of the estimated initial public offering price range, set forth on the cover page of this prospectus, the intrinsic value of the awards outstanding as of June 30, 2013 was \$ million, of which \$ million related to vested options and \$ million related to unvested options.

Ordinary Share Valuations

Due to the absence of an active market for our ordinary shares, the fair value of our ordinary shares for purposes of determining the exercise price for award grants was determined in good faith by our management and approved by our board of directors. In connection with preparing our financial statements for this offering, our management considered the fair value of our ordinary shares based on a number of objective and subjective factors consistent with the methodologies outlined in the American Institute of Certified Public Accountants Practice Aid, Valuation of Privately-Held-Company Equity Securities Issued as Compensation, referred to as the AICPA Practice Aid, including:

the likelihood of achieving a liquidity event, such as an initial public offering, given prevailing market conditions and the potential effect of such event on our stock price

third-party valuations of our ordinary shares;

the prices, rights, preferences and privileges of our preferred shares relative to our ordinary shares;

the prices of our preferred shares sold to outside investors in arms-length transactions;

the ordinary shares underlying the award involved illiquid securities in a private company;

our results of operations and financial position;

Table of Contents

the material risks related to our business;

our business strategy;

the market performance of publicly traded companies in the web services space; and

external market conditions affecting the web services space.

For the purpose of the valuation referred to above, we used the discounted cash flow method to determine our enterprise value. Using this method, our projected after-tax cash flows available to return to holders of invested capital are discounted back to present value, using the discount rate. The discount rate, known as the weighted cost of capital, accounts for the time value of money and the appropriate degree of risks inherent in the business.

We determined our enterprise value, and allocated that enterprise value to each element of our capital structure (preferred shares, ordinary shares and options), using two methodologies:

First, we determined our enterprise value based on a fully diluted scenario where all preferred shares convert into ordinary shares in an exit scenario due to a liquidity event, such as an initial public offering, or IPO. In this scenario, we based our enterprise value on the most recent investment round prior to the valuation (where such investment round occurred sufficient recently) or otherwise used a combination of the guideline company method and information based on our preliminary discussions with the underwriters. For the guideline company method, we identified public companies that we determined had business and financial risks comparable to us. We considered the enterprise value to revenue multiple and enterprise value to EBITDA multiple of those comparable companies to derive our enterprise value. The enterprise value was then divided by the resulting number of shares to determine a per share value.

Second, we determined our enterprise value based an assumed liquidity scenario in which the preferred stock benefitted from its liquidation preference, such as a sale, merger or liquidation. We used the discounted cash flow, or DCF, method to determine our enterprise value, and the option pricing methodology, or OPM to allocate it to each element of our capital structure.

Under the DCF, our projected after-tax cash flows available to return to holders of invested capital were discounted back to present value, using the discount rate. The discount rate, known as the weighted cost of capital, accounts for the time value of money and the appropriate degree of risk inherent in a business.

Under the OPM, ordinary and preferred shares are treated as call options, with the preferred shares having an exercise price based on the liquidation preference of the preferred shares. Ordinary shares will only have value if funds available for distribution to the shareholders exceed the value of the liquidation preference at the time of a liquidity event such as a merger, sale or initial public offering, assuming the enterprise has funds available to make a liquidation preference meaningful and collectible to the shareholders. The ordinary shares are modeled as call options with a meaningful enterprise at an exercise price equal to the remaining value immediately after the convertible preferred shares are liquidated. The value of the call options is determined using the Black Sholes option-pricing model.

Each valuation scenario under the full dilution scenario and liquidity event scenario was then assigned a probability weighting based on management's discussions with our board of directors and our assessment of market conditions under the Probability Weighed Expected Return Method (PWERM). The valuation is then discounted due to factors such as marketability and restrictions on shares.

Table of Contents

We have set out below the application of the above methodologies to the valuation of our ordinary shares on each of the grant dates:

March 2012 Grant. We determined that the fair value of our ordinary shares as of March 1, 2012 was \$7.47 per share. As part of this determination, along with market considerations, our management considered a third-party valuation dated March 22, 2013.

For the purpose of the fully diluted scenario, we used the enterprise value derived from the purchase at arms length of our Series E preferred shares pursuant to an agreement entered into in February 2011. In considering the appropriateness of using this enterprise value, we considered the fact that it reflected a higher enterprise value than would be obtained as of March 2012 using the guideline public company method based on 12 months trailing revenue or 2013 projected revenue and that no significant events had occurred since February 2011 either to our business, or valuation of the comparable companies, that would lead to a conclusion that our enterprise value had declined since the February 2011 investment. This resulted in a value per ordinary share of \$20.48. We believe that the \$20.48 ordinary share value under the fully diluted scenario reflected the value that investors perceived we might achieve in a future exit event and not just our going concern value.

For the purpose of the liquidity scenario, we used a discount rate of 21.9%. The resulting enterprise value was allocated among the elements of our capital structure using the OPM assuming a liquidity event in 2.5 years. This resulted in a value per ordinary share of \$8.10.

Using the PWERM, we then estimated that the probability of the fully diluted scenario was 10%, while the probability of the liquidity scenario was 90%. Applying these weightings, we arrived at a value of \$9.34 per ordinary share, which we discounted by 20% due to lack of marketability, to arrive at a fair value of \$7.47 per share.

May 2012 Grant. In reviewing the grant made in May 2012, our management considered the valuation analyses conducted in March 2012 and August 2012, and concluded that the continued development of our business made it appropriate to apply a value of \$9.09 per ordinary shares based on a straight line approach between those two valuations. Specifically, we launched our HTML5 platform at the end of March 2012. While no negative events were reported, we did not have assurance of widespread market success in May 2012. Accordingly, we determined that the reasonable approach was to take the estimated fair value based on the linear progression of the two valuations to reflect the ongoing growth of our business.

August 2012 Grant. We determined that the fair value of our ordinary shares as of August 1, 2012 was \$11.29 per share. As part of this determination, along with market considerations, our management considered a third-party valuation analysis dated March 22, 2013.

For the purpose of the fully diluted scenario, we continued to use the enterprise value derived from the purchase at arms length of our Series E preferred stock pursuant to an agreement entered into in February 2011. Our reasons as to the appropriateness of using this valuation were the same as in March 2012. This resulted in a value per ordinary share of \$20.48.

For the purpose of the liquidity scenario, we used a discount rate of 20.5%. The reason for the decrease compared to March 2012 was the later stage of development of our company and a decrease in the interest rate of 20-year Treasury bills. The resulting enterprise value was allocated among the elements of our capital structure using the OPM assuming a liquidity event in 1.08 years. This resulted in a value per ordinary share of \$10.88.

Table of Contents

Using the PWERM, we then estimated that the probability of the fully diluted scenario was 25%, while the probability of the liquidity scenario was 75%. Applying these weightings, we arrived at a value of \$13.28 per ordinary share, which we discounted by 15% due to lack of marketability, to arrive at a fair value of \$11.29 per share. The reason for the decrease in the discount for lack of marketability compared to March 2012 was a shorter time horizon until an IPO and decreased market volatility.

January 2013 Grant. We determined that the fair value of our ordinary shares as of January 9, 2013 was \$17.39 per share. As part of this determination, along with market considerations, our management considered a third-party valuation analysis dated May 7, 2013.

For the purpose of the fully diluted scenario, we used the guideline company method to determine our enterprise value. At that time, we were discussing the possibility of an IPO with investment banks and planned to commence such a process in the coming months. Therefore, we decided that it was not appropriate to continue to use the February 2011 enterprise value, but that we should use a valuation methodology similar to those that the investment banks and potential investors in an IPO would use, such as the guideline company method. We used a 6.0 multiple of enterprise value to trailing 12 months revenue, a 3.5 multiple of enterprise value to projected 2013 revenue and a 10.0 multiple of enterprise value to projected 2015 EBITDA. This resulted in a value per ordinary share of \$23.71.

For the purpose of the liquidity scenario, we used a discount rate of 20% for the DCF method, which was substantially identical to the discount rate used in August 2012. The resulting enterprise value was allocated among the elements of our capital structure using the OPM assuming a liquidity event in 0.98 years. This resulted in a value per ordinary share of \$17.22. The reason for the significant increase in our value under the liquidity scenario was that our projected results of operations had improved significantly since we had last determined our value using the DCF method. Our HTML5 platform had been launched over 10 months before and we had seen its impact on our user base. As a result, we increased our financial projections materially.

Using the PWERM, we then estimated that the probability of the fully diluted scenario was 50% as we had begun to contemplate an IPO. The probability of a liquidity scenario was thus estimated at 50%. Applying these weightings, we arrived at a value of \$20.46 per ordinary share, which we discounted by 15% due to lack of marketability, to arrive at a final value of \$17.39 per share.

May 2013 Grant. We determined that the fair value of our ordinary shares as of May 2, 2013 was \$27.00 per share. As part of this determination, along with market considerations, our management considered a third-party valuation analysis dated August 13, 2013.

For the purpose of the fully diluted scenario, we considered the preliminary valuation discussions that we had held with the underwriters in April 2013 assuming an IPO in the fourth quarter of 2013. This resulted in an estimated fair value per ordinary share of \$37.35 after discounting to present value the preliminary estimated IPO valuation. We then used the guideline company method in order to test the reasonableness of this fair value. The resulting revenue multiples were above the range of historical market participant guideline revenue multiples, but within the range of market participant guideline multiples based upon projected performance. Our multiples of projected EBITDA were above the market participant range in 2016, and within the market participant range in 2017. These results were considered reasonable reflecting the fact that we are at an earlier stage of our development, but growing more rapidly than market participant guideline companies.

For the purpose of the liquidity scenario, we used a discount rate of 17% for the DCF method. We then used the guideline company method in order to test the reasonableness of the resulting fair value. Our revenue multiples were within the ranges of market participant guideline revenue multiples for 2012 and 2013, and slightly below for 2014 and 2015. Our EBITDA multiples for 2016 and 2017 were within the market participant ranges. These results were considered

Table of Contents

reasonable based on the considerations described above. The resulting enterprise value was allocated among the elements of our capital structure using the OPM assuming a liquidity event in 1.67 years, which was approximately one year later than the projected IPO should the latter not occur. This resulted in a value per ordinary share of \$19.29.

Using the PWERM, we then estimated that the probability of the fully diluted scenario was 65% as we were already in the process of preparing for an IPO. The probability of a liquidity scenario was thus estimated at 35%. Applying these weightings, we arrived at a value of \$31.03 per ordinary share, which we discounted by 13% due to lack of marketability, to arrive at a fair value of \$27.00 per share.

July 2013 Grant. We determined that the fair value of our ordinary shares as of July 11, 2013 was \$30.35 per share. As part of this determination, and along with market considerations, our management considered a third-party valuation analysis dated August 13, 2013.

For the purpose of the fully diluted scenario, we considered the further preliminary valuation discussions that we had held with the underwriters in April 2013 assuming an IPO in the fourth quarter of 2013. This resulted in an estimated fair value per ordinary share of \$40.79 after discounting to present value the preliminary estimated IPO valuation. We then used the guideline company method in order to test the reasonableness of this fair value. In connection with the DCF method. Our resulting revenue multiples were above the range of historical market participant guideline revenue multiples, but within the range of market participant guideline multiples based upon projected performance. Our EBITDA multiples for 2016 were above the market participant ranges and within the market participant range for 2017. These results were considered reasonable reflecting the fact that we are at an earlier stage of our development, but growing more rapidly than the market participant guideline companies.

For the purpose of the liquidity scenario, we used a discount rate of 16% in connection with the DCF method, which was substantially identical to the discount rate used in May 2013. We then used the guideline company method in order to test the reasonableness of the resulting fair value. Our revenue multiples were within the ranges of the market participants for all periods tested (2012, 2013, 2014 and 2015). Our EBITDA multiples for 2016 and 2017 were within or near the market participant ranges. These results were considered reasonable based on the considerations described above. The resulting enterprise value was allocated among the elements of our capital structure using the OPM assuming a liquidity event in 1.47 years. This resulted in a value per ordinary share of \$23.36.

Using the PWERM, we then estimated that the probability of an IPO under each of the fully diluted scenario was 65%, the same as in May 2013. The probability of a liquidity scenario was thus estimated at 35%. Applying these weightings, we arrived at a value of \$34.69 per ordinary share, which we discounted by 12.5% due to lack of marketability, to arrive at a final value of \$30.35 per share. We compared this value against the value paid for a recent third party, arms-length sale of a small number of our ordinary shares and found them to be substantially identical.

August 2013 Grant. In reviewing the grant made in August 2013, our management considered the valuation analysis as of July 11, 2013, and concluded that, as no significant developments had occurred in our business from July 11, 2013 to August 13, 2013, it was appropriate to continue to use a fair value of \$30.35 per ordinary share for all grants made.

Derivatives and Hedging

We account for derivatives and hedging based on ASC 815 *Derivatives and Hedging*, which requires us to recognize all derivatives on the balance sheet at their fair value. We do not meet the definitions of the pronouncement regarding designated and effective hedging and as result gains and losses related to such derivative instruments are recorded in financial income (expenses), net.

Table of Contents

Income Taxes

As part of the process of preparing our consolidated financial statements we are required to estimate our taxes in each of the jurisdictions in which we operate. We estimate actual current tax exposure together with assessing temporary differences resulting from differing treatment of items, such as accruals and allowances not currently deductible for tax purposes. These differences result in deferred tax assets and liabilities, which are included in our consolidated balance sheets. We must assess the likelihood that our deferred tax assets will be recovered from future taxable income and to the extent we believe that recovery is not likely, we must establish a valuation allowance.

Management must exercise significant judgment to determine our provision for income taxes, our deferred tax assets and liabilities and any valuation allowance recorded against our net deferred tax assets. We base the valuation allowance on our estimates of taxable income in each jurisdiction in which we operate and the period over which our deferred tax assets are more likely than not to be recoverable. As of December 31, 2012, we had a net operating loss carryforward of approximately \$36.7 million and had recorded a valuation allowance against most of our net deferred tax assets, based on the available evidence, we believed at that time it was more likely than not that we would not be able to utilize all of these deferred tax assets in the future.

U.S. GAAP requires that the impact of an uncertain income tax position on the income tax return is recognized at the largest amount that is more likely than not to be sustained upon audit by the relevant tax authority. If we ultimately determine that the payment of these liabilities will be unnecessary, we reverse the liability and recognize a tax benefit during that period. Conversely, we should then record additional tax charges in a period in which we determine that a recorded tax liability is less than we expect the ultimate assessment to be. We did not recognize any significant unrecognized tax benefits during the periods presented in this prospectus.

Off-Balance Sheet Arrangements

We do not currently engage in off-balance sheet financing arrangements. In addition, we do not have any interest in entities referred to as variable interest entities, which includes special purposes entities and other structured finance entities.

Quantitative and Qualitative Disclosure about Market Risk

Foreign Currency Risk

Our results of operations and cash flows are affected by fluctuations due to changes in foreign currency exchange rates. In 2012, 89% of our revenues were denominated in U.S. dollars and 11% in other currencies, primarily in euros. In 2012, 58% of our cost of revenues and operating expenses were denominated in U.S. dollars and 42% in NIS. Our NIS-denominated expenses consist primarily of personnel and overhead costs. Since significant portions of our expenses are incurred in NIS, any appreciation of the NIS relative to the U.S. dollar would adversely impact our net loss or net income (if any).

Our primary processing provider converts payments collected from by our premium users in British pound- and Euro-denominated payments to us into U.S. dollars in consideration for the payment of an additional fee; however, since the original payment are not received in dollars this does not overall reduce our exposure to exchange rate fluctuations between these currencies and the U.S. dollar.

The following table presents information about the changes in the exchange rates of the NIS against the U.S. dollar:

Period	Change in Average Exchange Rate of the NIS against the U.S. Dollar (%)
2010	(4.9)
2011	(4.1)
2012	7.8
2013 (through June 30, 2013)	(5.0)

Table of Contents

The figures above represent the change in the average exchange rate in the given period compared to the average exchange rate in the immediately preceding period. Negative figures represent depreciation of the U.S. dollar compared to the NIS.

A 10% increase (decrease) in the value of the NIS against the U.S. dollar would have decreased (increased) our net loss by approximately \$2.5 million in 2012.

To protect against the increase in value of forecasted foreign currency cash flow resulting from expenses paid in NIS during the year, we have instituted a foreign currency cash flow hedging program. We hedge limited portions of the anticipated payroll of our Israeli employees, Israeli suppliers and anticipated rent expenses of our Israeli premises denominated in NIS for a period of one to twelve months with forward contracts and other derivative instruments.

Our results of operations may also be impacted by currency translation gains and losses on monetary assets and liabilities, primarily cash and cash equivalents and restricted deposits denominated in currencies other than the U.S. dollar. Any such gains or losses only impact the dollar value of our non-dollar denominated cash and cash equivalents and restricted deposits and result from changes in reported values due to exchange rate fluctuations between the beginning and the end of reporting periods. As of June 30, 2013, we had \$2.4 million and \$1.7 million in cash and cash equivalents and restricted deposits denominated in NIS and the Brazilian real, respectively, while we had \$6.0 million denominated in U.S. dollars.

Other Market Risks

We do not believe that we have material exposure to interest rate risk due to the fact that we have no long-term borrowings.

We do not believe that we have any material exposure to inflationary risks.

New and Revised Financial Accounting Standards

The JOBS Act permits emerging growth companies such as us to delay adopting new or revised accounting standards until such time as those standards apply to private companies. We have irrevocably elected not to avail ourselves of this and, therefore, we will be subject to the same new or revised accounting standards as other public companies that are not emerging growth companies.

Recently Issued and Adopted Accounting Pronouncements

In December 2011, the Financial Accounting Standards Board, or FASB, issued ASU No. 2011-11, Balance Sheet (210): Disclosures about Offsetting Assets and Liabilities, which requires additional disclosures about the nature of an entity's rights of setoff and related arrangements associated with its financial instruments and derivative instruments. The disclosure requirements are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods therein, with retrospective application required. In January 2013, the FASB issued Accounting Standard Update No. 2013-01, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. We believe that the adoption of both the standard and the update will not have a material impact on our consolidated financial statements.

Table of Contents

BUSINESS

Vision

We believe that the Internet should be accessible to everyone, not just to access information but also to develop, create and contribute.

We see many similarities in our vision with the desktop revolution, when computer hardware and software evolved to provide everyone with the capability to develop, create and print professional-quality documents from their desktop. Access expanded to everyone, document creation became a core human skill, and the asset-heavy approach was abandoned. This same revolution has not yet happened online. Today, professional skill and capital is needed to turn ideas into high-quality web content. We believe that by providing an easy-to-use and affordable solution with professional-quality results, we are leading the Webtop Revolution .

Company Overview

We are a leading global web development platform with one of the largest number of registered users in the world. We empower more than 37 million registered users in 190 countries to create and manage a fully integrated and dynamic digital presence. We are pioneering a new approach to web development and management that provides an easy-to-use yet powerful cloud-based platform that eliminates the need for complex coding and supplants expensive design services. Our solutions enable millions of businesses, organizations, professionals and individuals to take their businesses, brands and workflow online. We offer our solutions through a freemium and subscription model and as of August 31, 2013, we had 679,536 premium subscriptions.

Our core product is a drag-and-drop visual development and editing environment complete with high quality templates, graphics, image galleries and fonts. With our platform, Wix users can create and manage a professional quality digital presence tailored to their brands' specific look and feel, accessible across all major browsers and the most widely used desktop, tablet and mobile devices.

Our cloud-based platform is accessed through a hosted environment, allowing our users to update their site and manage their business or organization at any time. We provide our users with flexibility and scalability, allowing them to expand their digital presence as their business, organizational, professional or individual needs change and grow.

Through our highly curated App Market, which was launched in the last quarter of 2012, we offer users the ability to easily install and uninstall more than 140 different apps that were carefully identified and selected for inclusion in the App Market by us based on user needs and demand, such as social plug-ins, online marketing and customer relationship management tools, contact forms and payment processing capabilities. These apps add additional functionality and are easily integrated into users' websites with one click and without any coding.

We believe the substantial majority of our users are small business owners, organizations and entrepreneurs. Our scale and reach makes us an attractive partner for companies interested in distributing their own solutions to this audience. As we expand our platform through partnerships we are able to increase our value proposition for existing users and more easily attract new users.

By developing business intelligence using the data we have generated over several years of operation, we are able to create efficiencies in our marketing budget. We have therefore been able to leverage online channels effectively for the majority of our marketing efforts without the need for a direct sales force. In addition, many of our users refer us within their personal and professional networks. As a result, we generate a large volume of traffic through word-of-mouth, with organic and direct traffic, meaning visitor traffic that reached our website, Wix.com, via unpaid search results or by typing the URL of our website in their browser, accounting for approximately 59% of the premium subscriptions generated by users that registered in August 2013.

We are removing not only technological, but also geographic and linguistic barriers to web development, in order to empower everyone to create and manage a digital presence in their own language. We currently offer our platform in several languages - English, French, Spanish, Portuguese, and Italian - with others, such Polish, German, Russian and Japanese in recently-launched test formats, and we plan to add more languages in the future.

Table of Contents

Our users grew from 6.5 million at December 31, 2010 to 28.2 million at December 31, 2012, representing a 108% compounded annual growth rate. Our premium subscriptions have grown from 149,084 to 469,589 over the same period, representing a 78% compounded annual growth rate. Through June 30, 2013, we had achieved 14 consecutive quarters of sequential growth in the accumulated number of premium subscriptions. We have also achieved 14 consecutive quarters of growth in revenues and collections. We had revenues of \$9.9 million, \$24.6 million and \$43.7 million and collections of \$13.8 million, \$29.6 million and \$52.5 million in 2010, 2011 and 2012, respectively. We had a net loss of \$11.5 million, \$22.7 million and \$15.0 million in 2010, 2011 and 2012, respectively. We had revenues of \$34.1 million, collections of \$41.9 million and a net loss of \$10.1 million during the six months ended June 30, 2013.

Industry Overview and Market Opportunity

Increasing need for a dynamic digital presence

According to a June 2013 Netcraft survey, there are more than 673 million websites across all domains, nearly four times the number that existed five years ago. 79 million of these websites were added in 2012 alone. The way that consumers interact with websites, however, continues to expand with the evolution of technology. Consumers have come to expect a high level of personalization, engagement and functionality; a static website is no longer satisfactory and can even negatively affect overall brand perception for businesses, organizations and professionals.

In the current market, businesses, organizations and professionals need a dynamic digital presence with tools to manage interactions with customers, suppliers, partners and employees online and in real time. These interactions include back-end activities like invoicing, customer relationship management and payment processing, as well as front-end activities such as communications, online marketing, reservations and scheduling, and social media integration.

Use of dynamic web content and services for high level customer engagement is becoming increasingly prolific. For example:

more than 113 million diners were seated through reservations made through OpenTable, a leading online restaurant reservation website, in 2012;

more than 108 million unique visitors visited Yelp, a leading local business information and review website, to find ratings and reviews of local businesses in the second quarter of 2013; and

more than 7.6 million payments are processed through PayPal, a leading payments and eCommerce business, every day.

Businesses, organizations and professionals that have access to the latest technology and large budgets are able to create this fully functional, integrated and engaging digital presence and widen the competitive gap between themselves and those that lack access.

Creating a dynamic digital presence is challenging

Building this presence is becoming more challenging for businesses, organizations, professionals and individuals for the following reasons:

Developing a dynamic digital presence with professional quality is expensive. As an extension of the brand, a business website needs to be professional-quality and provide the owner with creative tools to customize to its unique specifications. Developing and maintaining a professional-quality digital presence today often requires hiring professional designers and developers, which is not an option for many small businesses with limited budgets.

Learning to code is difficult, time consuming and out of reach for most. While basic website building solutions are available to those with limited needs, creating a professional-quality digital presence typically requires time and effort to learn coding languages. As these languages continue to evolve over

Table of Contents

time to allow for additional features and functionality, such as the recent launch of HTML5, the complexity and level of skill required to develop a digital presence increases dramatically. As a result, these professional-quality improvements are generally out of reach for those that have no experience with computer programming.

The ability to manage and modify in real time is limited and time consuming. Managing a web presence often requires regular updates, editing and real time changes. Adding newly-created workflow tools to a site requires changes to the site's content and layout. Making these modifications typically requires the ability to edit code, which requires most businesses, organizations, professionals and individuals to hire a professional. Hiring a third-party to dynamically update a site is costly, impractical and often means even small changes take a significant amount of time. Most website template solutions provide options, but have very limited flexibility, in terms of what can be changed once a website is published.

Integrating functionality requires advanced skills and access to multiple vendors. Proficiently managing and integrating multiple applications and tools such as payment processing, eCommerce capabilities and online marketing is complex. There are a wide variety of point solutions available from many different vendors which can further complicate the process. Discovering which solutions are available and then finding the best-fit solutions is time consuming and can be confusing. Once solutions are found, integrating them in a way that maintains structural, permission, and access controls both within a website and between applications typically requires the hiring of costly developers.

There are many platforms, browsers and devices which each have different compatibility requirements. There are a large and growing number of platforms, browsers, and devices that are used to access the Internet. Each of these has different design and compatibility requirements, ranging from screen size to coding language to security features. In order to develop a digital presence that is widely accessible, there is often a need to recreate an entire site multiple times with different specifications. This is costly and time consuming for even the largest companies.

We believe there is a significant opportunity to provide an elegant solution that caters to the accelerating demands of businesses, organizations, professionals and individuals who need to create and manage a dynamic, professional digital presence at a reasonable cost.

Table of Contents

Our Solution

How Wix Works

From registration on Wix.com to publishing and maintaining a digital presence, we offer a simple and code-free web development platform supported by our customer service experts at every step in the process:

Table of Contents

- (1) Organic sources of traffic means traffic to our website in respect of which there is no direct cost to us associated with such source of traffic, which includes but are not limited to: (i) clicks on unpaid links which navigate directly to our homepage, (ii) clicks on a non-paid Wix advertisement banner on a Wix free site, and (iii) Search Engine Optimization, which refers to the way in which we develop our site to improve our ranking on search engines when a relevant search engine query that does not contain the term "Wix" is entered.
- (2) Paid sources of traffic means traffic to our website in respect of which there is a direct cost to us associated with such source of traffic, which includes but are not limited to: (i) Search Engine Marketing, which refers to pay-per-click links to our website generated in search engine results for which we pay a fee to the search engine, (ii) banner ads that we pay for on various websites, and (iii) advertisements we pay for on social networking sites.

Benefits to Our Users

We believe that our solution provides the following key benefits to our users:

Professional quality at an affordable price. We provide customizable and professionally designed content so anyone can develop a high quality digital presence, without the need for design or coding skills. We are committed to providing high quality design elements and features so users can create a digital presence that encapsulates their vision, serves their brand and establishes their credibility. As of June 30, 2013, we had a dedicated team of over 40 design professionals, whose deep understanding of web design trends is reflected in hundreds of website templates catering to a wide variety of business verticals. Users may access our professional content and features at a material discount to the cost of hiring a professional or in many cases at no cost at all.

Easy-to-use technology. Our platform provides our users with a powerful and easy-to-use cloud-based solution that takes the technological complexity out of web development and management, allowing anyone to have a dynamic digital presence. Our drag-and-drop editing environment enables users with basic computer skills to create a fully functional digital presence without the need to develop an advanced new skill set.

User-driven website management. Our cloud-based platform makes ongoing management simple, enabling users to maintain their dynamic digital presence at any time. For example, retailers can post seasonal or one time promotions, artists can update portfolios and individuals can post new photos, all without the need to pay for expensive design professionals and wait for them to make small changes. We also have an in-house team of 130 support and call center professionals available for our users.

Access to third-party apps. We offer a selection of over 140 free and paid apps providing online workflow and management tools that users can add through the Wix Editor, from maps and contact forms to email and newsletters. We help users find and discover apps that are relevant and useful to them. Users can simply select apps and drag-and-drop them into their websites, enabling them to manage their digital presence in one place. Our proprietary software manages any coding required without any effort needed by the user, making integration with our users' sites seamless. This means that permissions and controls with the site are managed automatically, as are integrations between apps. In addition, we allow users to connect to a variety of tools and services across the web, such as Facebook, Twitter, Yelp, and OpenTable.

Multi-platform. Our technology addresses the challenges posed by the wide range of browsers and devices used to access the web. With our HTML5 builder, Wix users can create websites that are adaptable and of same quality regardless of the device or browser with which they are accessed. In addition, we handle all the code customizations required to maintain and be responsive to a dynamic market with rapidly changing technologies. As technologies, browsers and specifications change, we update our editing environment so our users are not impacted. Our multi-platform approach removes additional costs associated with the need to develop sites compatible with new device and browser platforms.

Table of Contents

Benefits to Our Partners

We believe that our solution offers the following key benefits to our partners:

Distribution to a large user base. Our large user base of more than 37 million users consists of small businesses, organizations, professionals and individuals that provide us with valuable insight into their behavior. We attract interest from multiple companies seeking to market their solutions effectively to this large and highly engaged audience through free and paid apps available in our App Market, as well as other offers, features and services. We also offer data to our partners on the engagement and use of their solutions that are offered through our platform, providing our partners with valuable feedback.

Seamless integration of offered solutions. We help developers get their products discovered and provide easy installation and integration. We require that all solutions or apps offered by our partners are compatible with our platform, which enables easy integration for our users. This integration ensures our partners' solutions will not require additional coding or advanced skills in order to work on our platform. We collect payments from our users for paid apps, further reducing friction for both our users and our partners.

Our Strengths

We believe the following key strengths provide us with competitive advantages:

Proprietary technology platform. Our core strength is our technology that reduces the challenges and complexities of web development and management for our users. Our environment enables simple drag-and-drop capabilities that are used to build sophisticated websites. Our technology uses HTML5, the most advanced markup language available, which gives our users the ability to easily incorporate video, audio, fonts, graphics and animations into their site. Our users also benefit from enhanced workflow functionalities through the seamless integration of third-party apps, which can be purchased in our App Market. In addition, we have a culture of innovation, meaning our developers are constantly working on finding and developing new solutions to improve the quality of our product and the breadth of our platform.

Large user base and growing global ecosystem. As of August 31, 2013, we had more than 37 million users across 190 countries. We currently offer our platform in several languages in order to empower our users to create and manage a digital presence in their own language. Our users often become Wix advocates, recommending us to their communities, building sites for their friends, or using the platform to launch their own web development business. As the Wix user base and community grows, we become increasingly valuable as a distribution channel for partners and developers, who in turn expand our offering to our users with additional features and services through the development of additional apps.

Superior design and content. One of our core focuses is developing high quality design elements for our users. As a result, more than 10% of our workforce is comprised of designers. We believe that our investment in design, which allows our users to create a visually engaging and professional-quality digital presence, sets us apart. Because we provide our users with a superior web design starting point, including easily editable layouts with dynamic galleries, graphics, color-palettes, and fonts, we believe we attract users that have a higher likelihood of subscribing to our services and renewing at regular intervals.

Efficient marketing and customer acquisition. Our marketing activities are based on a constant analysis of behavior response data generated on our platform. This enables us to operate different marketing campaigns efficiently across a variety of advertising channels. Based on this deep comprehension of acquisition and retention channels, we have been able to grow our user base without a direct sales force.

Edgar Filing: Wix.com Ltd. - Form F-1

Embedded solution for our users. Because our solution provides the base platform for businesses to operate, Wix becomes a core aspect of our users' business, enabling them to run their business online. Our solutions are designed to cater to the varying needs of most business categories while supporting users throughout the evolution of their business lifecycle, greatly increasing the likelihood that they

Table of Contents

remain users. We offer our users the ability to customize our offerings to fit the specific need of their business, and we curate apps specifically designed for each type of user. We also offer vertically-focused packages and applications specifically designed for various types of businesses, including, but not limited to, restaurants, health and beauty businesses and eCommerce sites.

Our Strategy

Key elements of our strategy include:

Growing our user base. The value of our platform continues to increase as our user base expands. Growth of our user base is generally a leading driver and indicator of the growth of the number of our premium subscriptions. We intend to continue to build our user base in the following ways:

Leveraging our data to increase and optimize our paid marketing. Since Wix was launched, we have generated large quantities of marketing data, which we analyze to develop business intelligence. We will continue to leverage this intelligence to optimize our marketing spending.

Growing our brand. We plan to invest in brand marketing initiatives that will further the association of Wix as the go-to platform for web development and management. We believe this investment will further increase our long-term ability to acquire users.

Expanding to underserved geographic markets. We plan to make our product, support and communication channels available in more languages to facilitate growth in underserved geographic markets. We also plan to expand our billing infrastructure in order to transact with multiple local currencies and payment methods across the globe.

Developing new solutions. We believe we have built unique technology that simplifies the process of building and managing a digital presence. We intend to create additional value for our users, and increase our platform's monetization in the following ways:

Investing in product development to offer additional services. We plan to leverage our experience and knowledge in web development and workflow management to build new solutions that businesses, organizations, professionals and individuals need to operate and succeed online. These additional paid services will improve our ability to grow and monetize our existing user base. We have a number of product offerings already in development such as a variety of apps, data management and mobile solutions. For example, we recently launched an updated offering for mobile devices in September 2013. This new offering allows our users to design their site so it fits numerous screen-size-factors (e.g., desktop, tablet and smartphone) yet will share design elements and all site data between the different variants. We believe this solution will enable our users to develop sites that provide consumers easy access to business information and a way to interact with the site's owner, while adapting the design of the site for numerous screen sizes. We plan to further update our mobile offering to include the ability to customize and modify sites from different devices.

Expanding our partner ecosystem. As our Wix platform serves tens of millions of businesses, organizations, professionals and individuals, we attract interest from third parties seeking to efficiently market their services to these audiences. Although revenues derived from our App Market were negligible in 2012 and in the six months ended June 30, 2013, we are seeking to increase our opportunities and thereby our revenues from the App Market by attracting more partners that will provide free and paid apps through our App Market as well as other features and services. While these partnerships are in the early stages of development, they already contribute to the Wix ecosystem by enriching our solutions and creating additional monetization opportunities.

Our Offerings

Edgar Filing: Wix.com Ltd. - Form F-1

We offer our web development, design and management solutions and apps through an attractive online platform that enables our large user base of businesses, organizations, professionals and individuals to create a sophisticated and professional digital presence. Our web development technology is built based on HTML5 and offers HTML5 compatible capabilities, web design and layout tools, domain hosting, and other marketing and

Table of Contents

work flow management applications and services. By registering with our website, our users receive access to the Wix Editor, an online editor that enables the user to design and manage an unlimited number of websites in order to establish or enhance their digital presence. No installation of software is necessary to use the Wix Editor, as our advanced editing and design platform is accessible through the cloud directly from our website.

Professional Site Review						ü

Free Products. Our users receive access to hundreds of free design templates for personal and business use, free web hosting through the Wix domain, free apps from our App Market, and blog and social network page support. The websites developed using our free product contain Wix advertisements in the footer of the website, and tags, or metadata, which contain our name. Our domain name is also contained in the link to the user's website.

Our free product and service offering includes the following features and capabilities:

Wix Editor. At the core of our platform is the Wix Editor, which currently supports five languages, and allows users to maximize their digital presence by designing an unlimited number of websites, which are customizable using images, layouts, colors, fonts and other content provided by Wix, or content uploaded by the user, including visual and audio media. All websites designed using our editor are fully customizable with HTML5 technology, and contain back-up and firewall protection, as well as protection from denial-of-service attacks.

Wix Mobile. All of our products allow users to create mobile sites for their existing Wix websites. Our mobile site technology is based on HTML5 and allows users to customize their sites for different mobile devices, yet share design elements and all site data between the different variants. Currently, over 800,000 of our registered users have used our mobile solutions. We do not currently charge for our mobile solution.

Wix SEO Tool. All of our products enable users to increase the visibility of their Wix website by using our Search Engine Optimization, or Wix SEO tool. Through this tool, users may attach to their

Table of Contents

sites a description and key words that relate to the site, so that web viewers or customers may find our users' sites easily by searching for the descriptive or key words, using Internet search engines. Our customer support team, through online video tutorials or one-on-one support, guides our users on the most efficient key words and site descriptions, in order to help users maximize the benefits of SEO and attain a larger digital presence.

Premium Subscriptions. Our premium subscriptions are purchased primarily by businesses, organizations and professionals in a variety of fields, such as art, finance, entertainment, music, beauty, sports or news. Premium subscriptions are not concentrated in any particular field. Our premium subscriptions offer all of the features of our Wix Editor, but also include features tailored to business' needs, such as eCommerce and appointment applications, and marketing tools such as Google Analytics and mailing lists. Our premium subscriptions also offer storage and bandwidth for our users' data and premium technical support services. We also offer ad vouchers with certain of our premium subscriptions, which allow users to expand their digital presence by advertising their pages on third-party sites, such as Facebook and Google.

To date, most of our revenues have been from selling our Combo and Unlimited premium subscriptions. These solutions are primarily purchased by businesses, organizations and professionals, which make up the substantial majority of our total user base.

Our premium subscriptions offer the following additional features and capabilities:

Connect Your Domain. All of our premium subscriptions allow users to connect their own domain name to their website, which means that the Wix domain name will not be present in the user's website address. The user's domain name can also be purchased and managed directly through the Wix platform. Users who do not purchase premium subscriptions can also choose to purchase a domain name as a stand-alone product, and continue using our free Wix Editor product to develop and maintain their website.

Google Analytics. All of our premium subscriptions give users access to Google Analytics, a third-party application that has the ability to track the number of people that visit their website, the geographic location of their visitors, the length of time that visitors stay on their website, and the key words that were used to find the website. This feature allows our business users to collect and use data for marketing and other commercial purposes.

Ads Free. Our Combo, Unlimited, and eCommerce premium subscriptions provide a website free of Wix advertisements that are placed on the free Wix websites.

Add Favicon. Our Combo, Unlimited, and eCommerce premium subscriptions allow users to change the Favorite Icon, or Favicon, that appears next to the user's page address and bookmark in most internet browsers. Users can change the Favicon that appears on the website by either uploading their own Favicon, or choosing one from our Favicons Gallery. This feature enhances the professional design of users' digital presence.

Wix eCommerce Solutions. Our eCommerce premium subscription allows our users to create a virtual store through which they may sell their products online and process payments using an integrated shopping cart app, which is already included in the subscription. eCommerce users can tailor the style of the online store to their business, and with the shopping cart application, the users may accept payment for products or services through PayPal. In the future, we plan to develop an upgrade to the shopping cart application, which will allow eCommerce users to accept credit card payments. Other eCommerce apps, such as shipping and tax-calculation apps, may be separately purchased as add-ons through the Wix App Market.

VIP Services. We offer our VIP subscribers four additional features. Our VIP Support feature enables these subscribers to contact a dedicated team of support specialists. If a support specialist is not available immediately, we will call the VIP subscriber back within a matter of minutes via our Priority Call Back service. In addition, VIP subscribers have the option of receiving our Instant Response service during business hours via Wix Answers, our online automated ask-and-answer database.

Table of Contents

Finally, we will review the completed sites of our VIP subscribers and provide feedback regarding how the sites' structure and SEO can be improved via our Professional Site Review service.

Applications and Value-Added Services

Wix App Market. The Wix App Market is an online platform that offers our users a range of software apps which can be seamlessly integrated as add-ons into our users' websites. The App Market includes over 140 free and purchasable marketing, social and media apps, as well as audio and visual content. Since the launch of the App Market in October 2012 through August 31, 2013, users had installed 5,526,602 apps, 19,060 of which were purchased. Users gain access to apps in the App Market, and through our easy-to-use drag-and-drop technology they can install or remove as many apps as they would like within moments. The App Market consists of apps that are developed by us or by third-party developers. Our research and development team creates our Wix Apps, and also tests and evaluates apps created by third-party developers. We have sales agreements with third-party developers and we customarily share in 30% of revenues from the sale of every third-party app purchased through our App Market. We are responsible for the development, operation and maintenance of apps that we create, and the third-party developers are responsible for the apps that they create. However, we may remove a third-party app at any time if it does not meet our standards or for other reasons.

Wix Databases. Our application development and data technology, Wix Databases is a platform that allows our users and developers to create their own apps and work management tools, such as contact forms and FAQ lists. This platform uses our drag-and-drop, style engine and smart layout technology, so that the user or developer may create professional-looking applications and tools with customized styles, colors, and layouts. The apps and tools created through Wix Databases may be fully integrated into our users' websites through publishing on the Wix Editor platform.

Wix Email. We offer users the ability to purchase Google email services with addresses linked to their Wix website domain. Wix Email features advanced filtering and search capabilities, as well as automatic mail forwarding and responding. This product is integrated into our premium subscriptions, but is also available for purchase on a standalone basis.

Professional Services Marketplace. Through the Wix Arena Marketplace, found on our website, we provide a community for independent designers to offer their audio or visual media content and personal web design services, using our platform. As of August 31, 2013, the Wix Arena Marketplace had 319 independent designers who offer web design and development content or services each month. These independent designers are hired directly by our users and are responsible for negotiating the terms of service and price with such users. We provide a market for these services and are not a party to, and do not generate any revenue from these agreements. We do not assume responsibility for the quality or cost of the services.

Customer Support

We offer our users the following support and services:

Wix Support and Call Center. Our customer solutions experts operate the Wix Support and Call Center. Our customer solutions team is responsible for providing users with direct and indirect support, including monitoring and updating forums for user questions and knowledge databases, such as our online automated ask-and-answer database, Wix Answers. Because our support team is able to address many of our users' questions through these online and automated channels, direct customer support is often not needed to address user questions or technical issues. However, our support staff provides web-based technical support through chat, email and remote support through the use of LogMeIn, a remote access program. The Wix Call Center also provides telephonic support during U.S. business hours and email support during extended hours. We do not currently offer telephonic support outside of U.S. business hours. Our Support and Call Center employees offer telephonic and email support in the non-English languages in which we offer our platform: French, Spanish, Portuguese and Italian. For

Table of Contents

example, our customer support staff and technical staff with Italian and Portuguese-language capabilities provide Italian and Portuguese-language support by updating forums in response to customer questions and updating knowledge databases, such as Wix Answers, and translating the how-to videos in the Wix Support Center. We plan to hire additional employees with other fluencies as we add more languages and have already engaged a small number of employees to provide telephone and email support in Japanese or Korean. As of June 30, 2013, we had 130 Support and Call Center employees, located in both the United States and Israel, 32 of whom offer direct customer service in languages other than English and Spanish.

Wix Premium Support. All of our premium subscriptions contain access to Wix Premium Support. Those users with premium subscriptions receive access to all the benefits of the Wix Support Center and Call Center, but they also receive priority access to our team of customer solutions experts, who prioritize premium subscription questions and requests over other user questions.

Selling and Marketing

Our selling and marketing expenses focus primarily on online advertising and we do not employ a direct sales force. Our main online acquisition channels include Google, Facebook and direct media buying.

We market our solutions and apps to businesses, organizations, professionals and individuals, including entrepreneurs and freelancers. We are able to attract a high volume of users and premium subscriptions by offering free solutions and services and upgrades and improvements to our premium subscriptions. We also offer 14-day money-back versions of our premium subscriptions. As of August 31, 2013, we had more than 37 million users and 679,536 premium subscriptions across 190 countries. Our App Market averaged 19,762 installations per day during the month of August 2013.

We also provide a free co-working and event space in our two Wix Lounges, located in New York City and San Francisco. These lounges provide designers who use our solutions, as well as freelancers, artists and entrepreneurs, with a workspace and an opportunity to network with others. We also host events at our lounges that allow our users the ability to showcase their work, free of charge. We have found that our lounges enhance our brand and strengthen our network of users.

User Acquisition

We engage in online advertising with a focus on acquiring new users to our platform. We acquire the majority of our users through free traffic to our website, primarily through search engine optimization or direct traffic, meaning visitor traffic that reached our website, Wix.com, via unpaid search results or by typing the URL of our website in their browser, to our website, which includes customer referrals. We also acquire a small amount of free traffic through our participation on social networking sites and the banner advertisements we place on our non-paying users websites. In order to increase our exposure and optimize organic, or free, search engine results, we constantly test our search engine optimization strategy to ensure that our website is relevant to those potential customers seeking web development and design products. Further, we continually evaluate our marketing spending and its effectiveness and invest in those activities that are most likely to maximize our return by generating premium subscriptions. In 2013, we are continuing to focus our marketing spending on channels that bring new users to visit, register and begin using our products and services.

We believe our user acquisition strategy further benefits from the brand we have built as a leading web development and design platform for businesses, organizations, professionals and individuals. We believe that our branding efforts have accounted for a significant portion of users who come directly to our website, through typing our URL directly into their browsers, or through searching for Wix or a term related to establishing a digital presence. We believe that these users are also attracted due to referrals from other users, and via word-of-mouth regarding our products and services. Our acquisition strategy also benefits from our use of A/B testing on our website, a marketing approach that aims to identify changes to our website which will increase or maximize user interest and acquisition. Our Design Studio team, consisting of 40 designers as of June 30, 2013, changes the

Table of Contents

layout of our website from time to time, and engages in A/B testing in order to determine which layouts and graphics are the most successful in maximizing user acquisition.

Our marketing expenditures directed to advertising were \$6.4 million in 2010, \$15.9 million in 2011, \$21.5 million in 2012 and \$17.2 million in the six months ended June 30, 2013. Our marketing expenditures are directed toward the following channels:

Cost-Per-Click Advertising. We pay leading search engines to provide search results that provide our solutions and services with the maximum exposure when users search for key terms related to establishing a digital presence. We do this both by elevating the placement of our website address in search results and by placing targeted display or banner advertisements on the search results. We pay search engines on a cost-per-click, or CPC, basis each time a person clicks on such a paid search result or advertisement.

Online Presence and Branding. We have established an active online presence in social networking sites such as Facebook, Twitter, and Instagram, and we also market our solutions by purchasing generic and targeted advertisements on these websites and others. We also consult public and media relation firms to help brand and advertise our solutions and services.

Other expenditures. A small portion of our marketing expenses are directed towards more traditional advertising, such as radio and television commercials in the United States and Israel. We also maintain the Wix Affiliate Program, a program where our affiliates receive a commission for directing visitors to our website, by placing Wix ads on their personal websites. From time to time we also hold webinars, promotional contests, user meet-ups and public relations events at our Tel Aviv, New York and San Francisco offices.

User Retention

Once we attract visitors to our website, our preliminary goal is to register them as users. We distribute marketing and promotional emails and support tools to our registered users to help them build their site. These materials are created by our Wix Design Studio team, which complements our marketing efforts by focusing on the consistency of our branding message online, in our offline merchandise and at our community events. Users who convert to a premium subscription gain access to additional features such as extra bandwidth and storage, Wix ad removal, access to Google Analytics, domain connectivity and eCommerce solutions. We offer a 14-day premium subscription trial to introduce users to these additional products and solutions. Users can choose either an annual or monthly premium subscription and as of August 31, 2013, 64% of our premium subscriptions were annual and 36% were monthly. We seek to increase the number of premium annual subscriptions by offering seasonal promotions and discounts on annual subscriptions. We also send our subscribing users emails reminding them to renew their subscriptions before expiration, as well as coupons and other discounts on products and services. We seek to retain premium subscriptions by offering upgrades for our premium products and free and premium apps in our App Market.

We further retain premium subscriptions by developing relationships with subscribing users through the Wix Support and Call Center, a forum where we address our users' technological needs and concerns. Through the Support and Call Center, we also help non-paying users transition to premium subscriptions, by providing guidance on integration of premium subscription features into existing websites created with our Wix Editor. We seek to maintain goodwill with all of our users, and retain them as registered users, even if they do not choose to subscribe to or renew their premium subscriptions.

Our Technology and Infrastructure

Our cloud-based platform provides our users with a suite of web design, development and workflow management products and apps, as well as hosting for our users' sites. All of these tools are accessible directly through our platform. In order to enhance our suite of products, we also conduct product and quality assurance testing on all new and existing technology integrated into our platform.

Table of Contents

Wix Cloud

We use a flexible hybrid cloud, comprised of both cloud-based storage and data centers, to host our products and apps, and the websites that our users create. We lease our data centers from third parties. Our primary data centers are in two geographically separate locations in the United States with a back-up data center in Europe. We lease our primary data centers in the United States from Hostway Services, Inc. pursuant to purchase orders issued under an agreement that automatically renews on an annual basis unless terminated by us by notice at least 60 days before the annual renewal date or by either party at any time with 180 days advance notice. To date, we have not experienced any material outages or service interruptions. This highly-scalable multi-tenant technology enables us to serve all of our users simultaneously and consistently, and scales based on overall traffic and capacity. As a result, our platform is not affected or slowed down by growth in the number of users in our cloud. Our cloud technology is also capable of full resource sharing, meaning that our users can access information via their individual website database easily over the Internet without the need for manual download, with content delivery provided by proven international cloud delivery network vendors, such as Akamai and Level 3. To further ensure that all of our data and our users' data are stored safely, we also use Amazon and Google cloud services to backup our users' data. In order to ensure that our cloud is protected from potential attacks or vulnerabilities, we engage in penetration testing to expose and address any vulnerability in our technology.

HTML5-Based Design Capabilities

HTML5 is the latest and most advanced markup language available for structuring and presenting dynamic content on the Internet. Unlike websites built using older HTML versions, websites using HTML5 can seamlessly incorporate video, audio, fonts, graphics and animations. Moreover, rich and interactive web design and app integration can be achieved without the use of Flash. Because of HTML5's advanced capabilities, we use it as the basis for our products and have eliminated the need to combine Flash and HTML coding. We developed our HTML5 based technology by leveraging our many years of experience in developing web development and design tools.

Style Engine and Smart Layout Technology

Our style engine technology provides users with advanced customization capabilities, making all aspects of a user's website customizable. Our technology, which uses dropdown lists and customized color palettes, allows the user to quickly brand or re-brand their website with just a few clicks in our editor. In one click, users can customize backgrounds, banners, buttons, fonts and font sizes using a dropdown list. Users can customize colors using a color palette. One click also allows users to simultaneously apply all color and style changes to all elements on the user's website. This type of customization is generally time-consuming and requires knowledge of advance HTML5 & CSS3 coding skills. However, with our style engine technology, our users can change their websites' style and branding in moments.

Our Wix Editor's Smart Layout technology offers both functionality and customization. Our technology provides for dynamic layout and content, meaning that no one component box on a user's website is static or incapable of being moved to other areas of the user's page. Component boxes added to our users' websites identify the user's site structure and automatically adapt to the size and style of other component boxes within the site. These capabilities allow the user full control over the layout of their website, allowing the user to create a design-rich, professional website.

Web Service Creation Environment

We use a powerful software development kit, or SDK, with an application programming interface, or API, which allows apps and widgets to be seamlessly embedded into the websites designed by our users. This technology allows the user to embed third-party apps or widgets, such as contact forms, FAQ lists and blogs, into the user's website by linking the app or widget's URL to the user's website link. All integration is done with one click, using the Wix App Market, where the user can choose which apps they would like to add to their website. The added app or widget may then be opened as a pop-up on the user's website, which further adds to our

Table of Contents

editor's dynamic layout capabilities. Further, SEO used in connection with the user's website will also attach to the embedded widget or app data, increasing the overall visibility of the user's digital presence.

Infrastructure

We realize efficiencies in our operations, including marketing and delivery, since they are completely online-based. Our hybrid cloud and content delivery network enables our users to purchase and use our products and services through our website. As a result of these efficiencies, we have built a large user base while limiting the number of physical offices required for conducting our business. We also have no need for a physical sales force, as our marketing and customer support operations are supported by online marketing tools such as CPC advertising, SEO and email distributions, and by customer support tools such as online forums and Wix Answers, an advanced user self service support system using online ticketing and a database of questions and answers.

We currently process the majority of payments using a third-party billing system that interfaces seamlessly with our website and provides a portal for users to submit credit or debit card information for processing. We are in the process of transitioning to a new billing system that we have developed internally. This system interfaces with a number of different payment gateway providers who then link to a number of different payment card processors based on the user's jurisdiction. With this internal system, we do not expect to be dependent on any single gateway provider or payment card processor. As we transition fully to the internal billing system, our current third-party billing system will continue to be used in order to process and remit to us recurring payments from existing premium subscriptions.

Our infrastructure includes servers and bandwidth capacity leased from third parties located in the United States and the Netherlands. We use our own servers to run our research and development activities and to operate our office applications. Our use of over 200 servers in different locations protects against accidental data loss and ensures minimal disruption to our operations from server outages or physical damage to a server. We have maintained robust server operations since our inception, which has provided our growing user base with reliable access to our products and consistent service provisions.

Research and Development

As of June 30, 2013, we had 201 employees and contractors focused on research and development. Our research and development team is comprised of individuals with extensive experience in web development, design, data management and data analysis. Substantially all these employees and consultants are located in our Tel Aviv headquarters. We also engage a small number of software developers in the Ukraine through a third-party service organization in order to benefit from the significant pool of talent that is more readily available in that market. Our research and development personnel focus primarily on developing new apps and product and service offerings as well as quality assurance. Our research and development personnel also includes our design team.

Our research and development spending was \$7.3 million in 2010, \$14.7 million in 2011, \$16.8 million in 2012 and \$11.5 million in the six months ended June 30, 2013. We invest in research and development in order to enhance and expand our product and service offerings, tailor our marketing efforts, and expand our user base. Our development strategy is focused on identifying updates and features for our existing offerings, and developing new offerings that are tailored to our users' needs and often arise out of their suggestions. For this, we rely heavily on sophisticated, internally-developed tools, such as automated process systems. These automated processes enable us to quickly react to our users' requests. For example, through the use of our automated request system on our website, users are able to request new product features and upgrades. We also engage in A/B testing in order to measure the effectiveness of our upgrades and new product features.

We recruit talented individuals for our research and development team in Tel Aviv through a variety of techniques, including cooperation with local universities and recruiting events. We are a member of key industry organizations and regularly attend and participate in industry events, where our employees frequently speak. We also engage potential talents by hosting technology meet-ups in our Tel Aviv, New York and San Francisco offices.

Table of Contents

Intellectual Property

Our success depends upon our ability to protect our core technology and intellectual property. We rely on a combination of confidentiality clauses, trade secrets, copyrights and trademarks to protect our intellectual property and know-how. In addition, we have filed a number of applications for patents in the United States, Israel and Germany in order to protect our inventions. We cannot be certain that our applications will issue as patents. We actively monitor innovation within our company so as to properly consider whether to file additional patent applications. We enter into confidentiality and proprietary rights agreements with our employees, consultants and business partners, and we control access to and distribution of our proprietary information.

The Wix brand is central to our business strategy, and we believe that maintaining, protecting and enhancing the Wix brand is important to expanding our business. We have obtained trademark registrations in certain jurisdictions that we consider material to the marketing of our products, including the marks WIX® and the Wix logo. We have trademark applications for additional marks that we use to identify certain product collections used for certain of our products. While we expect to submit additional trademark applications and for our pending applications to mature into registrations, we cannot be certain that we will obtain such registrations.

Our in-house know-how is an important element of our intellectual property. The development of our web development and design software and management of our data analysis and marketing programs requires sophisticated coordination among many specialized employees. We believe that duplication of this coordination by competitors or individuals seeking to copy our software offering would be difficult. This risk is further mitigated by the fact that our product and service offerings are cloud-based such that most of the core technology operating on our systems is never exposed to a user or to our competitors.

To protect our technology, we implement multiple layers of security. Access to our platform requires system usernames and passwords. We also add additional layers of security such as IP address filtering and IP address lockout.

Competition

We enable our users to create a customizable, fully-integrated and professional digital presence through an attractive platform with various marketing and workflow management capabilities. We believe that we do not currently compete with any provider that offers the same design capabilities or range of products and services that we offer. Nevertheless, we do compete with aspects of the services provided by web-based website design platforms and software programs, as well as some of the service offerings of a number of smaller template-based web builder companies and designers who target our market of users as well as those who offer domain registration services, especially those companies who use a freemium business model similar to ours. The market for providing web-based website design platforms and software programs is highly fragmented.

In the future it is possible that other providers may decide that offering a comprehensive web development platform to enhance digital presence through easy-to-use design tools and applications represents an attractive business opportunity. In particular, if a more established company were to target our market, we may face significant competition from a company that enjoys potential competitive advantages, such as greater name recognition, longer operating histories, substantially greater market share, larger existing user bases and substantially greater financial, technical and other resources. These companies may use these advantages to offer products and service similar to ours at a lower price, develop different products to compete with our current solutions and respond more quickly and effectively than we do to new or changing opportunities, technologies, standards or client requirements. However, we believe that we do not directly compete with traditional web development firms, as we focus on not only website development but also design and business work flow processes. Nevertheless, we may compete with some of the service offerings of a number of smaller template-based web builder companies and designers who target our market of users as well as those who offer domain registration services, especially those companies who use a freemium business model similar to ours.

While we offer a broader range of solutions, we believe that the key competitive factors for the web development and design industry include price, the quality of the designs, user-friendly design tools, and brand recognition and reputation. We believe that we compete favorably on these factors because of our efficiencies in

Table of Contents

operations, brand recognition and marketing expertise, professional suite of design and digital presence products, advanced technology and product integration, longstanding customer, designer and developer relationships, large user base, and track record of successfully attracting new users to our website and products.

Government Legislation and Regulation

Actions of our Users

In many jurisdictions, including the United States and countries in Europe, laws relating to the liability of providers of online services for activities of their users and other third parties are currently being tested by a number of claims, including actions based on defamation, breach of data protection and privacy rights and other torts, unfair competition, copyright and trademark infringement, and other theories based on the nature and content of the materials searched, the ads posted, or the content uploaded by users. Any court ruling or other governmental action that imposes liability on providers of online services for the activities of their users and other third parties could harm our business. In addition, rising concern about the use of the Internet for illegal conduct, such as the unauthorized dissemination of national security information, money laundering or supporting terrorist activities may in the future produce legislation or other governmental action that could require changes to our products or services, restrict or impose additional costs upon the conduct of our business or cause users to abandon material aspects of our service.

Data Protection

We hold certain personal data of our users, primarily, username and email address, and may hold certain personal data of the visitors to our users websites. We comply with the data protection and storage laws of the State of Israel, as well as with certain industry standards (including voluntary third-party certification bodies such as TRUSTe). We operate in accordance with the terms of our privacy policy and terms of service, which describe our practices concerning the use, transmission and disclosure of user data.

While it is generally the laws of the jurisdiction in which a business is located that apply, there is a risk that data protection regulators of other countries may seek jurisdiction over our activities in locations in which we process data or have users but do not have an operating entity. Where the local data protection and privacy laws of a jurisdiction apply, we may be required to register our operations in that jurisdiction or make changes to our business so that user data is only collected and processed in accordance with applicable local law. In addition, because our services are accessible worldwide, certain foreign jurisdictions may claim that we are required to comply with their privacy and data protection laws, including in jurisdictions where we have no local entity, employees, or infrastructure. In such cases, we may require additional legal review and resources to ensure compliance with any applicable privacy or data protections laws and regulations.

United States

A number of legislative proposals pending before the U.S. Congress, various state legislative bodies, and foreign governments concerning data protection could affect us. For example, in an effort to enhance data protection, the FTC has updated regulations relating to children's online privacy that were issued under the Children's Online Privacy Protection Act. Additionally, some states have passed proactive, rather than reactive, information security legislation. These state laws require that certain minimum protections and security measures be taken to protect personal information. The costs of compliance with these laws may increase in the future as a result of changes in interpretation.

Europe

Although we do not have an operating entity in the Netherlands, the control that we exert over our servers in the Netherlands may result in our activities in Europe being deemed to be subject to Dutch law. European data privacy laws, which apply in the Netherlands, distinguish between a data controller and a data processor. We may be defined as a Data Controller with respect to the personal data of our users that we collect and are therefore subject to a number of key legal obligations under the Dutch implementation of the European Data Protection Directive (Directive 95/46/EC). For example, among other things, we would be required to provide users with a fair processing notice if we process their data, ensure that inaccurate data is corrected, only retain

Table of Contents

data for so long as is necessary and do not transfer data outside the European Economic Area to jurisdictions which do not ensure an adequate level of protection of personal data without taking certain legitimizing steps. The European e-Privacy Directive (Directive 2002/58/EC as amended by Directive 2009/136/EC) obliges the EU member states to introduce certain national laws regulating privacy in the electronic communications sector. Pursuant to the requirements of the e-Privacy Directive, companies must, among other things, obtain consent to store information or access information already stored, on a user's terminal equipment (e.g., computer or mobile device). These requirements predominantly regulate the use by companies of cookies and similar technologies. Prior to providing such consent, users must receive clear and comprehensive information in accordance with the Data Protection Directive about the access and storage of information. Certain exemptions to these requirements on which we rely are available for technical storage or access for the sole purpose of carrying out the transmission of a communication over an electronic communications network or as strictly necessary to provide a service explicitly requested by the user.

Our users may also collect data through the websites that we host for them; however, because we only provide services that enable users to carry out their own purposes which may or may not include processing personal data, we are most likely a data processor with respect to such data. As a Data Controller, we would be obligated to implement adequate technical and organizational security measures; however, we are not obligated to directly comply with the majority of the requirements under the Dutch implementation of the European Data Protection Directive. Therefore we do not monitor our users' collection or processing of personal data and only act in regards to such personal data when so instructed by our users or a competent authority.

The European Commission issued a proposal for a new General Data Protection Regulation at the beginning of 2012 which will replace the European Data Protection Directive and is likely to include more stringent obligations for online businesses, such as to conduct a data protection impact assessment for risky processing operations, to introduce a more frequent need for the user's consent, to impose an obligation to act on data breaches, to restrict the collection and use of sensitive personal data and to expand the legislative requirements for data processors, as well as to introduce a stricter regime of enforcement. Additionally, the proposed regulation is stated to have extra-territorial effect and seeks to regulate the European activities of businesses regardless of their location or the locations of their servers. While it is currently expected that the proposed regulation will not take effect until 2015 or later, the more stringent requirements on privacy user notifications and data handling might present implementation and compliance challenges to our business in the future should we become subject to these and other laws and regulations.

Employees

As of June 30, 2013, we had 406 employees, 346 of whom were based in Israel and 59 of whom were based in the United States. Of our employees, 362 work full-time and 44 work part-time. As of June 30, 2013, we also engaged the services of 19 contractors in the Ukraine either directly or through a third-party service organization. The following table shows the breakdown of our global workforce of employees and contractors by category of activity as of the dates indicated:

Department	2010	As of December 31,		As of
		2011	2012	June 30, 2013

In regards to our Israeli employees, Israeli labor laws govern the length of the workday, minimum wages for employees, procedures for hiring and dismissing employees, determination of severance pay, annual leave, sick days, advance notice of termination of employment, equal opportunity and anti-discrimination laws and other conditions of employment. Subject to certain exceptions, Israeli law generally requires severance pay upon the retirement, death or dismissal of an employee, and requires us and our employees to make payments to the

Table of Contents

National Insurance Institute, which is similar to the U.S. Social Security Administration. Our employees have pension plans that comply with the applicable Israeli legal requirements and we make monthly contributions to severance pay funds for all employees, which cover potential severance pay obligations.

None of our employees work under any collective bargaining agreements. Extension orders issued by the Israeli Ministry of Industry, Trade and Labor apply to us and affect matters such as cost of living adjustments to salaries, length of working hours and week, recuperation pay, travel expenses, and pension rights.

We have never experienced labor-related work stoppages or strikes and believe that our relations with our employees are satisfactory.

Facilities

Our principal facilities are located in Tel Aviv, Israel and consist of approximately 3,252 square meters (approximately 35,004 square feet) of leased office space. These facilities currently accommodate our principal executive, research and development, marketing, design, business development, human resources, finance, information technology, customer support and administrative activities. The lease for these facilities expires on January 31, 2016. We maintain an office adjacent to our principal facilities that consists of approximately 441 square meters (approximately 4,746 square feet). The lease for this facility expires on August 31, 2015. We also maintain two additional office spaces in Tel Aviv. The first is approximately 598 square meters (approximately 6,437 square feet), with a lease that expires on December 31, 2015, and the second is approximately 519 square meters (approximately 5,586 square feet), with a lease that expires on December 31, 2014. In the United States, we maintain offices in New York City and San Francisco.

Legal Proceedings and Regulatory Matters

CreateAds LLC

We are subject to a patent infringement litigation that was filed against us on December 7, 2012 by CreateAds LLC, an entity that we believe is a non-practicing entity or NPE. An NPE is a party that obtains or purchases patents for the purpose of making infringement claims and extracting settlements by forcing businesses to license the patents-in-suit. As an NPE, CreateAds LLC does not compete with our business. The complaint was filed in the United States District Court for the District of Delaware and alleges infringement of U.S. Patent No. 5,535,320 for a Method of Generating a Visual Design. CreateAds LLC has filed similar complaints alleging infringement against at least forty other defendants. We filed a motion to dismiss the complaint in its entirety on February 1, 2013, on the grounds that the patent-in-suit claims only abstract ideas. As abstract ideas do not constitute patentable subject matter under United States patent law, we have asked the court to declare the patent invalid and dismiss the litigation. On February 25, 2013, the plaintiff opposed our motion and, on March 14, 2013, we filed a reply in support of our motion. We intend to continue pursuing the dismissal of the case and have requested that the court set a date for oral argument on the motion to dismiss. No schedule has been set by the court and it is expected that any trial in the matter would likely not occur until sometime in 2014 or after. The patent-in-suit expires in 2014, although if the plaintiff prevails, it could seek damages, including damages up to three times the amount found or assessed, with respect to our sales since inception and require us to license the technology subject to the patent through the date of its expiration. We intend to vigorously defend ourselves against this action. An adverse outcome with respect to this matter could have a material adverse effect on our operating results and financial condition. Due to the early stage of the proceedings, we currently do not have the ability to assess the probability of a particular outcome or the potential exposure from this lawsuit.

U.S. Voluntary Regulatory Disclosure

In May 2013, we made voluntary self-disclosures to the U.S. Treasury Department's Office of Foreign Assets Control, or OFAC, and U.S. Commerce Department's Bureau of Industry and Security, or BIS. The disclosures related to our determination made during the course of an internal review in early 2013 that we had 16 premium subscriptions, out of a total of approximately 583,000 premium subscriptions, with geographic internet protocols, or GEOIP, addresses in Cuba, Iran, North Korea, North Sudan or Syria (U.S. Sanctioned Countries) or that had otherwise provided personal information indicating that they may be located in U.S. Sanctioned Countries. As part of a subsequent internal review, we also determined that we had 32,600 users, or

Table of Contents

less than 0.1% of our total user base of approximately 33 million as measured as of April 30, 2013, with GEOIP addresses in U.S. Sanctioned Countries. See Risk Factors We are subject to trade and economic and export sanctions laws that may govern or restrict our business and we, and our directors and officers, may be subject to fines or other penalties for non-compliance with those laws.

We noted in our voluntary self-disclosure that we intend to seek an interpretation regarding whether the provision of our services falls within a general license issued by OFAC that authorizes the export to certain U.S. Sanctioned Countries of software and services incident to the exchange of personal communications over the Internet, such as instant messaging, chat and email, social networking, sharing of photos and movies, web browsing, and blogging, provided that such services are publicly available at no cost to the user. OFAC subsequently issued a new general license that expanded the range of free and fee-based services that could be provided to persons in Iran, however, the interpretation continued to prohibit webhosting for commercial endeavors. In light of our inability to know whether our users' websites are for personal or commercial purposes, we have decided at this time not to seek any further interpretation from OFAC. We have terminated the registered users and the premium subscriptions that may have been from a U.S. Sanctioned Country and have blocked the ability of new users with or without a premium subscription that have a GEOIP address in a U.S. Sanctioned Country to access our cloud-based software or services.

We cannot predict when OFAC and BIS will complete their respective reviews and determinations as to whether any violation of relevant U.S. sanctions or export laws occurred or is ongoing. In case of an apparent violation, OFAC and/or BIS could decide not to impose penalties but issue only a warning or cautionary letter. However, if OFAC or BIS determines that we have violated applicable regulations, we may face civil and/or criminal penalties and may also suffer reputational harm, any of which could have a material adverse effect on our business and financial results.

Israeli Voluntary Regulatory Disclosure

In September 2013, we voluntarily approached the Israeli Ministry of Finance and asked for its formal position regarding the applicability of The Israeli Trading with the Enemy Ordinance - 1939 (the Ordinance) to the type of services that we provide. The Ordinance prohibits any Israeli person from trading goods with enemy countries or with the residents of enemy countries. The Israeli Ministry of Finance, which is responsible for implementing the Ordinance, has currently determined enemy countries to be Iran, Lebanon and Syria (Israeli Sanctioned Countries). The Ordinance was enacted in 1939 and does not expressly address online services. We therefore cannot state with certainty how the provisions of the Ordinance apply to the type of services that we provide.

We do not know the extent to which the Ministry of Finance will want to have further discussions with us, the timing of those discussions or the ultimate outcome of their deliberations. Although the Ordinance allows Israeli persons to apply for a permit to trade with Israeli Sanctioned Countries or their residents, we are not aware of a permit being granted or denied in the past to a person providing the type of services that we provide.

Lebanon is the only Israeli Sanctioned Country that is not also a U.S. Sanctioned Country. We have ceased providing services to users with a GEOIP address in a U.S. Sanctioned Country. The number of users and premium subscribers that we have in Lebanon is not material to our business, however, if we stop providing services in Lebanon, it may decrease the number of our current and future subscribers from other countries, particularly in the Middle East, who may cease using our services in protest to us blocking accounts in Israeli Sanctioned Countries.

In addition, if it is determined by a competent court that sanctions under the Ordinance cover the type of services that we provide, we, our officers and employees may be subject to criminal and/or civil actions. We believe that our initiation of voluntary discussions with the Israeli Ministry of Finance may reduce such exposure, but any liability to which we are subject to could adversely affect our personnel, brand and reputation.

Other matters

From time to time, we may be party to litigation or subject to claims incident to the ordinary course of business. Other than as described herein, we are not subject to any litigation the outcome of which might have a material adverse effect on our business, operating results or financial condition.

Table of Contents**MANAGEMENT****Executive Officers and Directors**

The following table sets forth the name, age and position of each of our executive officers and directors as of the date of this prospectus:

Name	Age	Position
<i>Executive Officers</i>		
Avishai Abrahami	42	Co-founder, Chief Executive Officer and Director
Giora Kaplan	43	Co-founder, Chief Technology Officer and Director
Lior Shemesh	43	Chief Financial Officer
Nir Zohar	36	Chief Operating Officer
Omer Shai	36	Vice President of Marketing
Yaniv Even-Haim	38	Vice President of Research and Development
<i>Directors</i>		
Adam Fisher(4)	37	Chairman of the Board
Yuval Cohen(1)(2)(4)(5)	50	Director
Michael Eisenberg(4)	42	Director
Ron Gutler(1)(2)(3)(4)(5)	55	Director
Jeff Horing(4)	49	Director
Roy Saar(4)	43	Director
Mark Tluszczy(4)	47	Director

- (1) Member of our audit committee.
- (2) Member of our compensation committee.
- (3) Member of our nominating and governance committee.
- (4) Independent director under the rules of the NYSE.
- (5) Proposed to serve as an external director under the Israeli Companies Law subject to approval by the Company's shareholders to be sought within three months after the date of this offering.

Executive Officers

Avishai Abrahami is our Co-Founder, and has served as our Chief Executive Officer since September 2010 and as our Co-Chief Executive Officer and a director since October 2006. From 2004 to 2006, Mr. Abrahami was the Vice President of Strategic Alliances at Arel Communications & Software Ltd., a private Israeli company specializing in communication technology. In 1998 he co-founded Sphera Corporation, a private company which develops software for managing data centers, and he served as its Chief Technology Officer from 1998 until 2000 and its Vice President of Product Marketing from 2000 until 2003. In 1993, he co-founded AIT Ltd., a private Israeli software company, and served as its Chief Technology Officer until the company's sale in 1997. Mr. Abrahami served in the Israeli Defense Forces' elite computer intelligence unit from 1990 until 1992.

Giora Kaplan is our Co-Founder, and has served as our Chief Technology Officer since March 2008, was our Co-Chief Executive Officer from 2006 to March 2008, and has served as one of our directors since 2006. From 2004 to 2006, he served as a technology and product management consultant to several start-up companies. Mr. Kaplan was the founder and Chief Executive Officer of Promotix Technologies Ltd., an Internet advertising and publishing company, from 1999 to 2001. He also co-founded and served as Chief Technology Officer of Optimedia Ltd., an electronic and online publishing company, from 1992 to 1999. Mr. Kaplan served in the Israeli Defense Forces' elite computer intelligence unit from 1988 until 1991.

Lior Shemesh has served as our Chief Financial Officer since March 2013. From December 2010, to January 2013, he served as Chief Financial Officer at Alvarion Ltd., a provider of optimized wireless broadband solutions. From October 2008 to December 2010 he served as Alvarion's Vice President of Finance. From

Table of Contents

May 2003 to October 2008, Mr. Shemesh served as Vice President of Finance at Veraz Networks Inc., a provider of softswitch, media gateway and digital compression solutions. Prior to this, Mr. Shemesh served as Controller, and later as Associate Vice President of Finance of the Broadband division, for ECI Telecom Ltd., a network infrastructure provider. Mr. Shemesh holds a B.A. in Accounting and Economics, and an M.B.A. from Bar-Ilan University.

Nir Zohar has served as our Chief Operating Officer since June 2008 and joined our company in May 2007. Prior to joining us, from August 2005 to April 2007, Mr. Zohar was the Budget and Production Manager of M.B. Contact Ltd., a private Israeli event production company. From 2001 until 2005, Mr. Zohar worked for The Jewish Agency and the Israeli Scouts. From 1995 until 2001, Mr. Zohar served as a Lieutenant Commander and Chief Engineer in the Israeli Navy.

Omer Shai has served as our Vice President of Marketing since May 2010. Mr. Shai is the co-founder of Hyperactive, a digital design company, which he led from June 2005 to February 2008. Prior to that, he worked as an online marketing consultant for several brands. From October 2000 to May 2003, Mr. Shai was the Marketing Director at Hackersoftware, a software company. Prior to that, he worked as an online marketing consultant for several brands. Mr. Shai holds a B.Sc. in Economics from The Academic College of Tel-Aviv, Yaffo.

Yaniv Even-Haim has served as our Vice President of Research and Development since September 2010. From August 2009 to September 2010, Mr. Haim was the Vice President of Product at Pudding Media Inc., a mobile advertising solutions company. From September 2001 to August 2009, he was the Head of Research and Development at Converse, Inc., a provider of communications software. From August 1998 to September 2001, Mr. Haim was the Director of Research and Development at EverAd, Inc., a music and advertising company. Mr. Haim holds a B.Sc. in Computers and an M.B.A. from Technion – Israel's Institute of Technology.

Directors

Adam Fisher has served as a member of our board of directors and chairman of the board since November 2007. He also serves as a member of our compensation committee. Since March 2007, Mr. Fisher has served as a partner at Bessemer Venture Partners, a venture capital firm, and is the founder of the firm's investment practice in Herzliya, Israel. From 1998 to 2007, Mr. Fisher was a partner at Jerusalem Venture Partners, a venture capital firm based in Israel. Mr. Fisher is currently a member of the board of directors of several private Bessemer Venture Partners portfolio companies. Mr. Fisher holds a B.S. (with honors) in Foreign Service from Georgetown University.

Yuval Cohen has served as a member of our board of directors since August 2013. Mr. Cohen is the founding and managing partner of Fortissimo Capital, a private equity fund established in January 2003, managing in excess of \$400 million that invests in Israeli-related technology and industrial companies. From 1997 through 2002, Mr. Cohen was a General Partner at Jerusalem Venture Partners, an Israeli-based venture capital fund. Mr. Cohen currently serves as a director of several privately held portfolio companies of Fortissimo Capital and the chairman of the board of SodaStream International Ltd. Mr. Cohen holds a B.Sc. in Industrial Engineering from Tel Aviv University and an M.B.A. from Harvard Business School.

Michael Eisenberg has served as a member of our board of directors since March 2010. Since 2005, Mr. Eisenberg has been a general partner at Benchmark Capital Partners, a technology-focused venture capital firm. From 1997 to 2005, Mr. Eisenberg was as a general partner at Israel Seed Partners, a technology-focused venture capital firm. Prior to that, Mr. Eisenberg co-founded Jerusalem Global Investment Banking, a merchant bank focusing on high-tech investments. Prior to that, he was a consultant at Marttila and Kiley, Inc., a political consulting firm. Mr. Eisenberg is currently a member of the board of directors of several private companies. Mr. Eisenberg received his B.A. in Political Science from Yeshiva University.

Ron Gutler has served as a member of our board of directors since August 2013. Between 2000 and 2011, Mr. Gutler served as the Chairman of G.J.E. 121 Promoting Investment Ltd., a real estate company. Between 2000 and 2002, Mr. Gutler managed the Blue Border Horizon Fund, a global macro fund. Mr. Gutler is a former

Table of Contents

Managing Director and a Partner of Bankers Trust Company, which is currently part of Deutsche Bank. He also established and headed the Israeli office of Bankers Trust. Mr. Gutler is currently a director of Psagot Investment House, PsagotSecurities, Poalim Securities USA Inc., and a member of the Advisory Board of Poalim Real Estate, which is part of Poalim Capital Market Group. Mr. Gutler holds a B.A. in Economics and International Relations and an M.B.A., both from the Hebrew University in Jerusalem.

Jeff Horing has served as a member of our board of directors since March 2011. In 1995, Mr. Horing co-founded and became Managing Director of Insight Venture Partners, a private equity and venture capital firm. Mr. Horing is currently a member of the board of directors of several private companies. Previously, Mr. Horing held various positions at Warburg Pincus LLC, and at Goldman Sachs & Co. Mr. Horing holds a B.S. and B.A. from the University of Pennsylvania's Moore School of Engineering and the Wharton School, respectively. He also holds an M.B.A. from the M.I.T. Sloan School of Management.

Roy Saar has served as a member of our board of directors since January 2007. Since 2011 Mr. Saar has been a consultant to Mangrove III Investment Fund, a European venture capital firm. In 1998, he co-founded Sphera Corporation, a virtual servers technology vendor for SaaS providers. In 2002, Mr. Saar co-founded RFcell Technologies Ltd., a wireless product and service provider in Israel. Mr. Saar is currently a member of the board of directors of several private companies. Mr. Saar holds a B.A. in Business Administration and Economy from Tel Aviv University.

Mark Pluszcz has served as a member of the Company's board of directors since June 2010. Mr. Pluszcz is a Managing Partner and Co-Founder of Mangrove Capital Partners, a venture capital firm, since 2000. Since that date, he has served as a director on its board of directors. Mr. Pluszcz is currently a member of the board of directors of several private Mangrove Capital Partners portfolio companies. Previously, Mr. Pluszcz was a partner for Arthur Anderson LLP in their business consulting practice, and he also led their European venture capital fund.

Corporate Governance Practices

Under the Israeli Companies Law (the "Companies Law"), companies incorporated under the laws of the State of Israel whose shares are publicly traded, including companies with shares listed on the NYSE, are considered public companies under the Companies Law (but not under the Israeli Securities Law) and are required to comply with various corporate governance requirements under the Companies Law relating to such matters as the election of external directors, the composition of our audit committee and compensation committee, and an internal auditor. The Companies Law also requires us to disclose information regarding the compensation of our directors and executive officers. See "Compensation Committee Compensation Policy under the Companies Law." These corporate governance requirements apply to us even though our shares are not listed on the Tel Aviv Stock Exchange (the "TASE") and we do not have public reporting obligations in Israel or to Israeli shareholders specifically which are applicable to companies listed on the TASE. In addition, as a foreign private issuer, we are permitted to comply with Israeli corporate governance practices instead of NYSE corporate governance rules, provided that we disclose which requirements we are not following and the equivalent Israeli requirement.

We intend to comply with the rules generally applicable to U.S. domestic companies listed on the NYSE. We may in the future decide to use the foreign private issuer exemption with respect to some or all of the NYSE corporate governance rules.

Our board of directors has adopted corporate governance guidelines to become effective following the listing of our ordinary shares on the NYSE and that will serve as a flexible framework within which our board of directors and its committees operate subject to the requirements of applicable law and regulations. Under these guidelines, it will be our policy that the positions of Chairman of the Board of Directors and Chief Executive Officer may be held by the same person (subject to approval by our shareholders pursuant to the Israeli Companies Law). Under that circumstance, these guidelines also provide that the board shall designate an

Table of Contents

independent director to serve as lead independent director who shall, among other things, discuss the agenda for board meetings with the Chairman and approve such agenda, and chair executive sessions of the independent directors. The lead director following this offering will be Mark Tluszcz.

Board of Directors

Under the Companies Law and our amended and restated articles of association to be effective upon the closing of this offering, our business and affairs are managed under the direction of board of directors. Our board of directors may exercise all powers and may take all actions that are not specifically granted to our shareholders or to executive management. Our Chief Executive Officer (referred to as a general manager under the Companies Law) is responsible for our day-to-day management. Our Chief Executive Officer is appointed by, and serves at the discretion of, our board of directors, subject to the terms of a consulting agreement that we have entered into with him and his wholly-owned Israeli consulting company. All other executive officers are appointed by the Chief Executive Officer and are subject to the terms of any applicable employment or consulting agreements that we may enter into with them.

We comply with the rules of the NYSE requiring that a majority of our directors are independent. Our board of directors has determined that all of our directors, other than Avishai Abrahami, is independent under such rules. In addition, pursuant to the requirements of Israeli law, Yuval Cohen and Ron Gutler, will also serve as external directors, subject to approval by the Company's shareholders to be sought within three months after the date of this offering. The definition of independent director under NYSE rules and external director under the Companies Law overlap to a significant degree such that we would generally expect the two directors serving as external directors to satisfy the requirements to be independent under NYSE rules. The definition of external director is a rule-based determination while the definition of independent director also requires the board to consider any factor which would impair the ability of a director to exercise independent judgment. In addition, both external directors and independent directors serve for a period of three years; external directors pursuant to the requirements of Israeli law and independent directors pursuant to the staggered board provisions of our amended and restated articles of association. However, external directors must be elected by a special majority of shareholders while an independent director is elected by an ordinary majority. See External Directors for a description of the requirements under the Companies Law for a director to serve as an external director.

Each director, other than external directors, will be appointed by a simple majority vote of holders of our voting shares, participating and voting at an annual meeting of our shareholders.

Under our amended and restated articles of association to be effective upon the closing of this offering, our directors (other than the external directors, whose appointment is required under the Companies Law; see External Directors) will be divided into three classes with staggered three-year terms. Each class of directors consists, as nearly as possible, of one-third of the total number of directors constituting the entire board of directors (other than the external directors). At each annual general meeting of our shareholders, the election or re-election of directors following the expiration of the term of office of the directors of that class of directors, will be for a term of office that expires on the third annual general meeting following such election or re-election, such that from 2014 and after, each year the term of office of only one class of directors will expire. Our directors will be divided among the three classes as follows:

the Class I directors will be _____ and _____, and their terms will expire at the annual general meeting of shareholders to be held in 2014;

the Class II directors, will be _____ and _____, and their terms will expire at our annual meeting of shareholders to be held in 2015; and

the Class III director will be _____, and his term will expire at our annual meeting of shareholders to be held in 2016.

The directors shall be elected by a vote of the holders of a majority of the voting power present and voting at that meeting (excluding abstentions). Each director will hold office until the annual general meeting of our shareholders for the year in which his or her term expires, unless the tenure of such director expires earlier pursuant to the Companies Law or unless he or she is removed from office as described below.

Table of Contents

Under our amended and restated articles of association to be effective upon the closing of this offering, the approval of the holders of at least 75% of the voting rights entitled to vote at a general meeting (excluding abstentions) is generally required to remove any of our directors from office. In addition, vacancies on our board of directors, other than vacancies created by an external director, may only be filled by a vote of a simple majority of the directors then in office. A director so appointed will hold office until the next annual general meeting of our shareholders for the class in respect of which the vacancy was created.

External directors are elected for an initial term of three years and may be elected for additional three-year terms under the circumstances described below. External directors may be removed from office only under limited circumstances set forth in the Companies Law. See [External Directors](#).

Other than our Co-founder and Chief Executive Officer, Avishai Abrahami, and our Co-founder and Vice President of Client Development, Nadav Abrahami, who are brothers, there are no family relationships among any of our directors or executive officers.

Pre-IPO Appointment Rights

Pursuant to our articles of association in effect prior to this offering, certain of our shareholders had rights to appoint members of our board of directors as follows:

The holders of a majority of the ordinary shares are entitled to appoint two directors. Pursuant to this right of appointment, Yuval Cohen and Giora Kaplan were appointed as directors.

The largest holder of the Series A preferred shares is entitled to appoint one director. Pursuant to this right of appointment, Roy Saar was appointed as a director by the largest holder of Series A preferred shares at the time, an entity controlled by Ran Tushia.

The two shareholders holding the largest number of Series B and Series B-1 preferred shares, currently Bessemer Venture Partners and Mangrove Capital Partners, are entitled to appoint two directors. Pursuant to this right of appointment, Adam Fisher was appointed as a director by Bessemer Venture Partners, and Mark Tluszczy was appointed by Mangrove Capital Partners as a director.

Each of Insight Venture Partners and Benchmark Capital Partners are entitled to appoint one director. Pursuant to this right of appointment, Jeff Horing was appointed as a director by Insight Venture Partners, and Michael Eisenberg was appointed as a director by Benchmark Capital Partners.

The majority of the directors in office, including two of the four directors in the two immediately preceding paragraphs, are entitled to appoint one director, as an independent industry expert. Pursuant to this right of appointment, Ron Gutler was appointed as a director.

Our Chief Executive Officer, Avishai Abrahami, was appointed as a director due to his position as our Chief Executive Officer. The foregoing appointment rights will terminate immediately prior to the closing of this offering.

Chairman of the Board

Our amended and restated articles of association to be effective upon the closing of this offering provide that the chairman of the board is appointed by the members of the board of directors and serves as chairman of the board throughout his term as a director, unless resolved otherwise by the board of directors. Under the Companies Law, the Chief Executive Officer (referred to as a [general manager](#) under the Companies Law) or a relative of the Chief Executive may not serve as the chairman of the board of directors, and the chairman or a relative of the chairman may not be vested with authorities of the Chief Executive Officer without shareholder approval consisting of a majority vote of the shares present and voting at a shareholders meeting, provided that either:

such majority includes at least $\frac{2}{3}$ of the shares held by all shareholders who are not controlling shareholders and do not have a personal interest in such appointment, present and voting at such meeting; or

Table of Contents

the total number of shares of non-controlling shareholders and shareholders who do not have a personal interest in such appointment voting against such appointment does not exceed two percent of the aggregate voting rights in the company.

The required approval by our shareholders of the appointment of the Chief Executive Officer as chairman of the board must be obtained no later than three months following the closing of this offering. Further, if the Chief Executive Officer serves as chairman of the board of directors, his or her dual office term shall be limited to three years, which can be extended for additional three-year terms, subject to shareholder approval.

In addition, a person subordinated, directly or indirectly, to the Chief Executive Officer may not serve as the chairman of the board of directors; the chairman of the board may not be vested with authorities that are granted to those subordinated to the Chief Executive Officer; and the chairman of the board may not serve in any other position in the company or a controlled company, but he may serve as a director or chairman of a subsidiary.

Within three months following the closing of this offering, we intend to hold a shareholders meeting to seek approval for the appointment of Avishai Abrahami as our Chief Executive Officer and chairman of our board of directors.

External Directors

Under the Companies Law, we are required to appoint at least two external directors who meet the qualification requirements in the Companies Law. Appointment of external directors must be made by a general meeting of our shareholders no later than three months following the completion of this offering, and therefore we intend to hold a shareholders meeting within three months of the completion of this offering to seek approval for the appointment of two external directors. We intend to nominate Yuval Cohen and Ron Gutler as external directors.

The Companies Law provides for special approval requirements for the election of external directors. External directors must be elected by a majority vote of the shares present and voting at a shareholders meeting, provided that either:

such majority includes at least a majority of the shares held by all shareholders who are not controlling shareholders and do not have a personal interest in such election (other than a personal interest which is not derived from a relationship with a controlling shareholder), present and voting at such meeting; or

the total number of shares of non-controlling shareholders and shareholders who do not have a personal interest in such election (other than a personal interest which is not derived from a relationship with a controlling shareholder) voting against the election of an external director does not exceed 2% of the aggregate voting rights in the company.

After an initial term of three years, external directors may be reelected to serve in that capacity for up to two additional terms of three years each under one of two alternatives. Under the first alternative, the external director may be nominated by the board of directors, and such external director's reelection is approved by the same majority of shareholders who was required to elect such external director in such director's initial election. Under the second alternative, the external director may be nominated by a shareholder(s) holding 1% or more of the voting power and at the general meeting of shareholders such reelection is approved by a majority of those shares present and voting that are held by shareholders who are non-controlling shareholders and do not have a personal interest in the reelection, provided that such shares represent at least 2% of the total voting power in the company.

The term of office for external directors for Israeli companies traded on certain foreign stock exchanges, including the NYSE, may be extended indefinitely in increments of additional three-year terms, provided that, prior to each nomination for reelection, the audit committee and the board of directors of the company confirm that, in light of the external director's expertise and special contribution to the work of the board of directors and its committees, the reelection for such additional period is beneficial to the company (and provided that the reasons for such confirmation are presented to the shareholders at the general meeting at which such reelection is being sought) and the external director is reelected in accordance with the appropriate approval method described above.

Table of Contents

External directors may be removed from office by a special general meeting of shareholders called by the board of directors, which approves such dismissal by the same shareholder vote percentage required for their election or by a court, in each case, only under limited circumstances, including ceasing to meet the statutory qualifications for appointment, or violating their duty of loyalty to the company. If an external directorship becomes vacant and there are fewer than two external directors on the board of directors at the time, then the board of directors is required under the Companies Law to call a shareholders' meeting as soon as practicable to appoint a replacement external director.

Each committee of the board of directors that exercises powers of the board of directors must include at least one external director, except that the audit and compensation committees must include all external directors then serving on the board of directors. Under the Companies Law, external directors of a company are prohibited from receiving, directly or indirectly, any compensation from the company other than for their services as external directors pursuant to the provisions and limitations set forth in regulations promulgated under the Companies Law, which compensation is determined prior to their appointment and may not be changed throughout the term of their service as external directors (except for certain exceptions set forth in the regulations).

The Companies Law provides that a person is not qualified to serve as an external director if, as of the appointment date or at any time during the two years preceding his or her appointment, that person or a relative, partner or employer of that person, any person to whom that person is subordinate (whether directly or indirectly), or any entity under that person's control, had any affiliation or business relationship with the company, any controlling shareholder or relative of a controlling shareholder or an entity that, as of the appointment date is, or at any time during the two years preceding that date was, controlled by the company or by any entity controlling the company.

The term affiliation for this purpose includes (subject to certain exceptions):

an employment relationship;

a business or professional relationship maintained on a regular basis;

control; and

service as an office holder, excluding service as a director in a private company prior to the first offering of its shares to the public if such director was appointed as a director of the private company in order to serve as an external director following the public offering.

The Companies Law defines the term "office holder" of a company to include a general manager, chief business manager, deputy general manager, vice general manager, any other person assuming the responsibilities of any of these positions regardless of such person's title, a director and any other manager directly subordinate to the general manager.

The following additional qualifications apply to an external director:

a person may not be elected as an external director if he or she is a relative of a controlling shareholder;

if a company does not have a controlling shareholder or a holder of 25% or more of the voting power, then a person may not be elected as an external director if he or she (or his or her relative, partner, employer or any entity under his or her control) has, as of the date of the person's election to serve as an external director, any affiliation with the then chairman of the board of directors, Chief Executive Officer, a holder of 5% or more of the issued share capital or voting power, or the most senior financial officer of the company;

Edgar Filing: Wix.com Ltd. - Form F-1

a person may not serve as an external director if he or she (or his or her relative, partner, employer, a person to whom he or she is subordinated or any entity under his or her control) has business or professional relations with anyone with whom affiliation is prohibited as described above, and even if these relations are not on a regular basis (other than immaterial relations); and

Table of Contents

a person may not continue to serve as an external director if he or she accepts, during his or her tenure as an external director, direct or indirect compensation from the company for his or her role as a director, other than the amounts prescribed under the regulations promulgated under the Companies Law, indemnification, the company's undertaking to indemnify such person and insurance coverage.

Furthermore, no person may serve as an external director if that person's professional or other activities create, or may create, a conflict of interest with that person's responsibilities as a director or otherwise interfere with that person's ability to serve as an external director or if such person is an employee of the Israel Securities Authority or of an Israeli stock exchange. Following the termination of an external director's membership on a board of directors, such former external director and his or her spouse and children may not be provided a direct or indirect benefit by the company, its controlling shareholder or any entity under its controlling shareholder's control, including serving as an executive officer or director of the company or a company controlled by its controlling shareholder and cannot be employed by or provide professional services to the company for pay, either directly or indirectly, including through a corporation controlled by that former external director, for a period of two years (the prohibition also applies to relatives of the former external director who are not his or her spouse or children, but only for a period of one year).

If at the time an external director is appointed all members of the board of directors who are not controlling shareholders or their relatives are of the same gender, the external director must be of the other gender. A director of one company may not be appointed as an external director of another company if a director of the other company is acting as an external director of the first company at such time.

Pursuant to the regulations promulgated under the Companies Law, a person may be appointed as an external director only if he or she either has professional qualifications or has accounting and financial expertise as defined in those regulations. In addition, at least one of the external directors must be determined by our board of directors to have accounting and financial expertise and the board is required to determine the minimum number of board members who are required to possess accounting and financial expertise. In determining the number of directors required to have such expertise, the members of our board of directors must consider, among other things, the type and size of the company and the scope and complexity of its operations. Our board of directors has determined that at least one of our directors must possess accounting and financial expertise. In this regard, our board of directors has determined that two of our directors, Yuval Cohen and, Ron Gutler each possesses accounting and financial expertise as such term is defined under the Companies Law.

Audit Committee

Companies Law Requirements

Under the Companies Law, we are required to appoint an audit committee. The audit committee must be comprised of at least three directors, including all of the external directors, and a majority of its members must be unaffiliated directors. An unaffiliated director is an external director or a director who is appointed or classified as such, and who meets the qualifications of an external director (other than the professional qualifications/accounting and financial expertise requirement), whom the audit committee has confirmed to meet the external director qualifications, and who has not served as a director of the company for more than nine consecutive years (with any period of up to two years during which such person does not serve as a director not being viewed as interrupting a nine-year period). For Israeli companies traded on certain foreign stock exchanges, including the NYSE, a director who qualifies as an independent director for the purposes of such director's membership in the audit committee in accordance with the rules of such stock exchange is also deemed to be an unaffiliated director under the Companies Law. Such person must meet the non-affiliation requirements as to relationships with the controlling shareholder (and any entity controlled by the controlling shareholder, other than the company and other entities controlled by the company) and must meet the nine-year requirement described above. Following the nine-year period, a director of an Israeli company traded on such foreign stock exchange may continue to be considered an unaffiliated director for unlimited additional periods of three years each, provided the audit committee and the board of directors of the company confirm that, in light of the director's expertise and special contribution to the work of the board of directors and its committees, the reelection for such additional period is beneficial to the company.

Table of Contents

The audit committee may not include the chairman of the board, any director employed by the company or who regularly provides services to the company (other than as a board member), a controlling shareholder or any relative of the controlling shareholder, as each term is defined in the Companies Law. In addition, the audit committee may not include any director employed by the company's controlling shareholder or by a company controlled by such controlling shareholder, or who provides services to the company's controlling shareholder or a company controlled by such controlling shareholder, on a regular basis, or a director whose main livelihood is from the controlling shareholder. The chairman of the audit committee is required to be an external director.

Listing Requirements

Under the NYSE corporate governance rules, we are required to maintain an audit committee consisting of at least three independent directors, each of whom is financially literate and one of whom has accounting or related financial management expertise.

Following the listing of our ordinary shares on the NYSE, our audit committee will consist of Ron Gutler, Yuval Cohen and . Ron Gutler will serve as the Chairman of the audit committee. All members of our audit committee meet the requirements for financial literacy under the applicable rules and regulations of the Securities and Exchange Commission and the NYSE corporate governance rules. Our board of directors has determined that is an audit committee financial expert as defined by the Securities and Exchange Commission rules and has the requisite financial experience as defined by the NYSE corporate governance rules.

Each of the members of the audit committee is independent as such term is defined in Rule 10A-3(b)(1) under the Securities Exchange Act of 1934, as amended, or the Exchange Act, which is different from the general test for independence of board and committee members.

Audit Committee Role

Our board of directors has adopted an audit committee charter setting forth the responsibilities of the audit committee consistent with the rules of the Securities and Exchange Commission and the NYSE corporate governance rules, which include:

retaining and terminating our independent auditors, subject to board of directors and shareholder ratification;

pre-approval of audit and non-audit services to be provided by the independent auditors;

reviewing with management and our independent director our annual financial reports prior to their submission to the Securities and Exchange Commission; and

approval of certain transactions with office holders and controlling shareholders, as described below, and other related-party transactions.

Additionally, under the Companies Law, an audit committee is required, among other things, to identify deficiencies in the administration of the company (including by consulting with the internal auditor), and recommend remedial actions with respect to such deficiencies, is responsible for reviewing and approving certain related party transactions, including determining whether or not such transactions are extraordinary transactions, and is required to adopt procedures with respect to processing employee complaints in connection with deficiencies in the administration of the company, and the appropriate means of protection afforded to such employees. In addition, the audit committee is responsible to oversee the internal control procedures of the company. Under the Companies Law, the approval of the audit committee is required for specified actions and transactions with office holders and controlling shareholders. See Approval of Related Party Transactions under Israeli Law. However, the audit committee may not approve an action or a transaction with a controlling shareholder or with an office holder unless at the time of approval the majority of the members of the audit committee are present, of whom a majority must be unaffiliated directors and at least one of whom must be an external director.

Table of Contents

Compensation Committee

Companies Law Requirements

Under the Companies Law, the board of directors of a public company must appoint a compensation committee, which must be comprised of at least three directors, including all of the external directors. The additional members of the compensation committee must be directors that receive compensation subject to the provisions and limitations set forth in the regulations promulgated under the Companies Law. An external director shall serve as the chairman of the compensation committee.

Under the Companies Law, the external directors shall constitute a majority of the compensation committee. However, subject to certain exceptions, Israeli companies that are traded on stock exchanges such as , and who do not have a shareholder holding 25% or more of the company's share capital, do not have to meet this requirement; provided, however, that the compensation committee meets other Companies Law composition requirements, as well as the requirements of the jurisdiction where the company is traded.

The compensation committee's duties include recommending compensation policies to the board of directors, overseeing compensation policy implementation, and ratifying the compensation of executive officers.

Compensation Policy under the Companies Law

Under the Companies Law and within nine months following the company's listing on the NYSE, our compensation committee must adopt a policy for director and executive officer, which we refer to in this section as "office holders", compensation. In adopting this compensation policy, the compensation committee shall take into account factors such as the office holder's education, experience, past compensation arrangements with the company, and the proportional difference between the person's compensation and the average compensation of the company's employees.

The compensation policy must be approved at least once every three years at the company's general meeting of shareholders, and is subject to the approval of a majority vote of the shares present and voting at a shareholders meeting, provided that either:

such majority includes at least a majority of the shares held by all shareholders who are not controlling shareholders and do not have a personal interest in such election (other than a personal interest which is not derived from a relationship with a controlling shareholder), present and voting at such meeting; or

the total number of shares of non-controlling shareholders and shareholders who do not have a personal interest in such election (other than a personal interest which is not derived from a relationship with a controlling shareholder) voting against the approval of the compensation policy does not exceed 2% of the aggregate voting rights in the company.

Our board of directors may approve the compensation policy even if the such policy was not approved by our shareholders, provided that the compensation committee and the board resolved, based on detailed consideration and after reconsidering the compensation policy, that approval of the policy, is in the best interest of the company, despite the fact that it was not approved by the shareholders' meeting.

The compensation policy shall serve as the basis for decisions concerning the financial terms of employment or engagement of executive officers and directors, including exculpation, insurance, indemnification or any monetary payment or obligation of payment in respect of employment or engagement. The compensation policy must relate to certain factors, including advancement of the company's objectives, the company's business and its long-term strategy, and creation of appropriate incentives for executives. It must also consider, among other things, the company's risk management, size and the nature of its operations. The compensation policy must furthermore consider the following additional factors:

the knowledge, skills, expertise and accomplishments of the relevant director or executive;

the director's or executive's roles and responsibilities and prior compensation agreements with him or her;

Table of Contents

the relationship between the terms offered to the relevant director or executive and the average compensation of the other employees of the company, including those employed through manpower companies;

the impact of disparities in salary upon work relationships in the company;

the possibility of reducing variable compensation at the discretion of the board of directors; and the possibility of setting a limit on the exercise value of non-cash variable compensation; and

as to severance compensation, the period of service of the director or executive, the terms of his or her compensation during such service period, the company's performance during that period of service, the person's contribution towards the company's achievement of its goals and the maximization of its profits, and the circumstances under which the person is leaving the company.

The compensation policy must also include the following principles:

the link between variable compensation and long-term performance and measurable criteria;

the relationship between variable and fixed compensation, and the ceiling for the value of variable compensation;

the conditions under which a director or executive would be required to repay compensation paid to him or her if it was later shown that the data upon which such compensation was based was inaccurate and was required to be restated in the company's financial statements;

the minimum holding or vesting period for variable, equity-based compensation while referring to appropriate a long-term perspective based incentives; and

maximum limits for severance compensation.

The compensation committee is responsible for (a) recommending the compensation policy to the company's board of directors for its approval (and subsequent approval by our shareholders) and (b) duties related to the compensation policy and to the approval of the terms of engagement of office holders, including:

recommending whether a compensation policy should continue in effect, if the then-current policy has a term of greater than three (3) years (approval of either a new compensation policy or the continuation of an existing compensation policy must in any case occur every three years);

recommending to the board of directors periodic updates to the compensation policy;

assessing implementation of the compensation policy; and
determining whether the compensation terms of a proposed new Chief Executive Officer of the company need not be brought to approval of the shareholders.

Compensation Committee Role

Edgar Filing: Wix.com Ltd. - Form F-1

Following the listing of our ordinary shares on the NYSE, our compensation committee will consist of Yuval Cohen, Ron Gutler and . Our board of directors has adopted a compensation committee charter setting forth the responsibilities of the committee consistent with NYSE rules which include:

reviewing and recommending overall compensation policies with respect to our Chief Executive Officer and other executive officers;

reviewing and approving corporate goals and objectives relevant to the compensation of our Chief Executive Officer and other executive officers including evaluating their performance in light of such goals and objectives;

reviewing and approving the granting of options and other incentive awards; and

reviewing, evaluating and making recommendations regarding the compensation and benefits for our non-employee directors.

Table of Contents

Nominating and Governance Committee

Following the listing of our ordinary shares on the NYSE, our nominating and governance committee will consist of Ron Gutler, _____ and _____. Our board of directors has adopted a nominating and governance committee charter setting forth the responsibilities which include:

_____ overseeing and assisting our board in reviewing and recommending nominees for election as directors;

_____ assessing the performance of the members of our board; and

_____ establishing and maintaining effective corporate governance policies and practices, including, but not limited to, developing and recommending to our board a set of corporate governance guidelines applicable to our company.

Compensation of Directors

Under the Companies Law, the compensation of our directors requires the approval of our compensation committee, the subsequent approval of the board of directors and, unless exempted under the regulations promulgated under the Companies Law, the approval of the shareholders at a general meeting. Where the director is also a controlling shareholder, the requirements for approval of transactions with controlling shareholders apply, as described below under [Disclosure of Personal Interests of a Controlling Shareholder and Approval of Certain Transactions](#).

The directors are also entitled to be paid reasonable travel, hotel and other expenses expended by them in attending board meetings and performing their functions as directors of the company, all of which is to be determined by the board of directors.

External directors are entitled to remuneration subject to the provisions and limitations set forth in the regulations promulgated under the Companies Law.

For additional information, see [Compensation of Officers and Directors](#).

Internal Auditor

Under the Companies Law, the board of directors of an Israeli public company must appoint an internal auditor recommended by the audit committee and appointed by the board of directors. An internal auditor may not be:

_____ a person (or a relative of a person) who holds more than 5% of the company's outstanding shares or voting rights;

_____ a person (or a relative of a person) who has the power to appoint a director or the general manager of the company;

_____ an office holder or director of the company; or

_____ a member of the company's independent accounting firm, or anyone on its behalf.

The role of the internal auditor is to examine, among other things, our compliance with applicable law and orderly business procedures. The audit committee is required to oversee the activities and to assess the performance of the internal auditor as well as to review the internal auditor's work plan. We intend to appoint an internal auditor following the closing of this offering.

Our internal auditor will also fulfill the internal audit function required by NYSE corporate governance rules and provide management and the audit committee with ongoing assessments of our risk management processes and system of internal control.

Table of Contents

Approval of Related Party Transactions Under Israeli Law

Fiduciary Duties of Directors and Executive Officers

The Companies Law codifies the fiduciary duties that office holders owe to a company. An office holder is defined in the Companies Law as a general manager, chief business manager, deputy general manager, vice general manager, any other person assuming the responsibilities of any of these positions regardless of such person's title, a director and any other manager directly subordinate to the general manager. Each person listed in the table under "Management - Executive Officers and Directors" is an office holder under the Companies Law.

An office holder's fiduciary duties consist of a duty of care and a duty of loyalty. The duty of care requires an office holder to act with the level of care with which a reasonable office holder in the same position would have acted under the same circumstances. The duty of loyalty requires that an office holder act in good faith and in the best interests of the company.

The duty of care includes a duty to use reasonable means to obtain:

information on the appropriateness of a given action submitted for his or her approval or performed by virtue of his or her position;
and

all other important information pertaining to these actions.

The duty of loyalty includes a duty to:

refrain from any conflict of interest between the performance of his or her duties in the company and his or her personal affairs;

refrain from any activity that is competitive with the business of the company;

refrain from exploiting any business opportunity of the company in order to receive a personal gain for himself or herself or others;
and

disclose to the company any information or documents relating to the company's affairs which the office holder received as a result of his or her position as an office holder.

Disclosure of Personal Interests of an Office Holder and Approval of Certain Transactions

The Companies Law requires that an office holder promptly disclose to the board of directors any personal interest that he or she may have and all related material information known to him or her concerning any existing or proposed transaction with the company. A personal interest includes an interest of any person in an act or transaction of a company, including a personal interest of one's relative or of a corporate body in which such person or a relative of such person is a 5% or greater shareholder, director or general manager or in which he or she has the right to appoint at least one director or the general manager, but excluding a personal interest stemming solely from one's ownership of shares in the company.

If it is determined that an office holder has a personal interest in a non-extraordinary transaction, approval by the board of directors is required for the transaction, unless the company's articles of association provide for a different method of approval. Any transaction that is adverse to the company's interests may not be approved by the board of directors.

Our amended and restated articles of association to be effective upon the closing of this offering provide that for non-extraordinary interested party transactions, the board of directors may delegate its approval, or may provide a general approval to certain types of non-extraordinary interested party transactions.

Edgar Filing: Wix.com Ltd. - Form F-1

Approval first by the company's audit committee and subsequently by the board of directors is required for an extraordinary transaction, meaning any transaction that is not in the ordinary course of business, not on market terms or that is likely to have a material impact on the company's profitability, assets or liabilities.

Table of Contents

A director and any other office holder who has a personal interest in a transaction which is considered at a meeting of the board of directors or the audit committee may generally (unless it is with respect to a transaction which is not an extraordinary transaction) not be present at such a meeting or vote on that matter unless a majority of the directors or members of the audit committee, as applicable, have a personal interest in the matter. If a majority of the members of the audit committee or the board of directors has a personal interest in the approval of such a transaction then all of the directors may participate in deliberations of the audit committee or board of directors, as applicable, with respect to such transaction and vote on the approval thereof and, in such case, shareholder approval is also required.

Pursuant to the Companies Law, compensation arrangements such as insurance, indemnification or exculpation arrangements with office holders who are not the Chief Executive Officer or a director require compensation committee approval and subsequent approval by the board of directors. Compensation arrangements shall be in accordance with the compensation policy of the company. In special circumstances, the compensation committee and the board of directors may approve compensation arrangements that do not match the compensation policy of the company, subject to the approval of a majority vote of the shares present and voting at a shareholders meeting, provided that either: (a) such majority includes at least a majority of the shares held by all shareholders who are not controlling shareholders and do not have a personal interest in such compensation arrangement; or (b) the total number of shares of non-controlling shareholders and shareholders who do not have a personal interest in the compensation arrangement and who vote against the arrangement does not exceed two percent of the company's aggregate voting rights (Special Majority Vote for Compensation). In the event that the Special Majority Vote for Compensation is not obtained, the compensation committee and the board of directors may reconsider the compensation arrangement and approve it, after a detailed review.

Pursuant to the Companies Law, compensation arrangements with the Chief Executive Officer require compensation committee approval, approval by the board of directors and Special Majority for Compensation approval at the shareholders meeting. Compensation arrangements with the Chief Executive Officer shall be in accordance with the compensation policy of the company. In the event that Special Majority Vote for Compensation is not obtained, then the compensation committee and the board of directors may reconsider the compensation arrangement and approve it after a detailed review. Notwithstanding the above, the compensation committee is authorized to refrain from submitting a proposed compensation arrangement with a Chief Executive Officer candidate for shareholder approval, if (a) doing so would jeopardize the company's engagement of the candidate; and if (b) the proposed arrangement complies with the company's compensation policy.

With respect to amending an existing compensation arrangement, only the approval of the compensation committee is required, provided the committee determines that the amendment is not material in relation to the existing compensation arrangement. With respect to amending an existing related-party transaction, only the approval of the audit committee is required, provided the committee determines that the amendment is not material in relation to the existing arrangement.

Compensation arrangements with directors who are not controlling shareholders, including compensation arrangements with directors in their capacities as executive officers, (unless exempted under the applicable regulations), require the approval of the compensation committee, the board of directors and the company's shareholders, in that order.

Disclosure of Personal Interests of Controlling Shareholders and Approval of Certain Transactions

Pursuant to the Companies Law, the disclosure requirements regarding personal interests that apply to directors and executive officers also apply to a controlling shareholder of a public company. A controlling shareholder is a shareholder who has the ability to direct the activities of a company, including a shareholder who holds 25% or more of the voting rights if no other shareholder holds more than 50% of the voting rights. For this purpose, the holdings of all shareholders who have a personal interest in the same transaction will be aggregated.

An extraordinary transaction between a public company and a controlling shareholder, or in which a controlling shareholder has a personal interest, and the terms of any compensation arrangement of a controlling

Table of Contents

shareholder who is an office holder or his relative, require the approval of a company's audit committee (or compensation committee with respect to compensation arrangements), board of directors and shareholders, in that order. In addition, the shareholder approval must fulfill one of the following requirements:

at least a majority of the voting rights in the company held by shareholders who have no personal interest in the transaction and who are present and voting at the general meeting, must be voted in favor of approving the transaction (for this purpose, abstentions are disregarded); or

the voting rights held by shareholders who have no personal interest in the transaction and who are present and voting at the general meeting, and who vote against the transaction, do not exceed 2% of the voting rights in the company.

To the extent that any such transaction with a controlling shareholder or his relative is for a period extending beyond three years, shareholder approval is required once every three years, unless, in respect to certain transactions, the audit committee determines that the duration of the transaction is reasonable under the circumstances.

Pursuant to regulations adopted under the Companies Law, a transaction with a controlling shareholder that would otherwise require approval of the shareholders is exempt from shareholders' approval if the audit committee and the board of directors determine that the transaction is on market terms and in the ordinary course of business and does not otherwise harm the company. Under these regulations, a shareholder holding at least 1% of the issued share capital of the company may require, within 14 days of the publication of such determination, that despite such determination by the audit committee and the board of directors, such transaction will require shareholder approval under the same majority requirements that otherwise apply to such transactions.

Shareholder Duties

Pursuant to the Companies Law, a shareholder has a duty to act in good faith and in a customary manner toward the company and other shareholders and to refrain from abusing his or her power with respect to the company, including, among other things, in voting at a general meeting and at shareholder class meetings with respect to the following matters:

an amendment to the company's articles of association;

an increase of the company's authorized share capital;

a merger; or

interested party transactions that require shareholder approval.

In addition, a shareholder has a general duty to refrain from discriminating against other shareholders.

Certain shareholders also have a duty of fairness toward the company. These shareholders include any controlling shareholder, any shareholder who knows that it has the power to determine the outcome of a shareholder vote and any shareholder who has the power to appoint or to prevent the appointment of an office holder of the company or exercise any other rights available to it under the company's articles of association with respect to the company. The Companies Law does not define the substance of this duty of fairness, except to state that the remedies generally available upon a breach of contract will also apply in the event of a breach of the duty of fairness.

Exculpation, Insurance and Indemnification of Office Holders

Under the Companies Law, a company may not exculpate an office holder from liability for a breach of the duty of loyalty. An Israeli company may exculpate an office holder in advance from liability to the company, in whole or in part, for damages caused to the company as a result of a

Edgar Filing: Wix.com Ltd. - Form F-1

breach of duty of care but only if a provision authorizing such exculpation is included in its articles of association. Our amended and restated articles of association include such a provision. An Israeli company may not exculpate a director from liability arising out of a prohibited dividend or distribution to shareholders.

Table of Contents

An Israeli company may indemnify an office holder in respect of the following liabilities and expenses incurred for acts performed as an office holder, either in advance of an event or following an event, provided a provision authorizing such indemnification is contained in its articles of association:

financial liability imposed on him or her in favor of another person pursuant to a judgment, settlement or arbitrator's award approved by a court. However, if an undertaking to indemnify an office holder with respect to such liability is provided in advance, then such an undertaking must be limited to events which, in the opinion of the board of directors, can be foreseen based on the company's activities when the undertaking to indemnify is given, and to an amount or according to criteria determined by the board of directors as reasonable under the circumstances, and such undertaking shall detail the abovementioned events and amount or criteria;

reasonable litigation expenses, including attorneys' fees, incurred by the office holder as a result of an investigation or proceeding instituted against him or her by an authority authorized to conduct such investigation or proceeding, provided that (i) no indictment was filed against such office holder as a result of such investigation or proceeding; and (ii) no financial liability, such as a criminal penalty, was imposed upon him or her as a substitute for the criminal proceeding as a result of such investigation or proceeding or, if such financial liability was imposed, it was imposed with respect to an offense that does not require proof of criminal intent; and

reasonable litigation expenses, including attorneys' fees, incurred by the office holder or imposed by a court in proceedings instituted against him or her by the company, on its behalf or by a third-party or in connection with criminal proceedings in which the office holder was acquitted or as a result of a conviction for an offense that does not require proof of criminal intent.

An Israeli company may insure an office holder against the following liabilities incurred for acts performed as an office holder if and to the extent provided in the company's articles of association:

a breach of the duty of loyalty to the company, to the extent that the office holder acted in good faith and had a reasonable basis to believe that the act would not prejudice the company;

a breach of the duty of care to the company or to a third-party, including a breach arising out of the negligent conduct of the office holder;

a financial liability imposed on the office holder in favor of a third-party;

a financial liability imposed on the office holder in favor of a third-party harmed by a breach in an administrative proceeding; and

reasonable litigation expenses, including attorneys' fees, incurred by the office holder as a result of an administrative proceeding instituted against him or her.

An Israeli company may not indemnify or insure an office holder against any of the following:

a breach of the duty of loyalty, except to the extent that the office holder acted in good faith and had a reasonable basis to believe that the act would not prejudice the company;

Edgar Filing: Wix.com Ltd. - Form F-1

a breach of the duty of care committed intentionally or recklessly, excluding a breach arising out of the negligent conduct of the office holder;

an act or omission committed with intent to derive illegal personal benefit; or

a fine or forfeit levied against the office holder.

Under the Companies Law, exculpation, indemnification and insurance of office holders must be approved by the compensation committee and the board of directors and, with respect to directors and Chief Executive Officer, also by shareholders.

Table of Contents

Our amended and restated articles of association allow us to indemnify and insure our office holders for any liability imposed on them as a consequence of an act (including any omission) which was performed by virtue of being an office holder. Our office holders are currently covered by a directors and officers liability insurance policy.

We have entered into agreements with each of our directors and executive officers exculpating them, to the fullest extent permitted by law, from liability to us for damages caused to us as a result of a breach of duty of care, and undertaking to indemnify them to the fullest extent permitted by law. This indemnification is limited to events determined as foreseeable by the board of directors based on our activities, and to an amount or according to criteria determined by the board of directors as reasonable under the circumstances.

The maximum indemnification amount set forth in such agreements is limited to an amount equal to 25% of our shareholder's equity as reflected in our most recent consolidated financial statements prior to the date on which the indemnity payment is made. The maximum amount set forth in such agreements is in addition to any amount paid (if paid) under insurance and/or by a third-party pursuant to an indemnification arrangement.

In the opinion of the Securities and Exchange Commission, indemnification of directors and office holders for liabilities arising under the Securities Act of 1933, as amended, or the Securities Act, however, is against public policy and therefore unenforceable.

Compensation of Officers and Directors

The aggregate compensation paid by us and our subsidiaries to our directors and executive officers, including share based compensation, for the year ended December 31, 2012, was approximately \$1.28 million. This amount includes approximately \$0.08 million set aside or accrued to provide pension, severance, retirement or similar benefits or expenses, but does not include business travel, relocation, professional and business association dues and expenses reimbursed to office holders, and other benefits commonly reimbursed or paid by companies in Israel. The share-based compensation granted to our directors and executive officers for the year ended December 31, 2012 related to options to purchase 837,004 shares with exercise prices ranging from \$0.47 to \$7.01. The expiration date of such options is ten years after their date of grant.

Employment and Consulting Agreements with Executive Officers

We have entered into written employment or consulting agreements with all of our executive officers. Each of these agreements contains provisions regarding non-competition, confidentiality of information and assignment of inventions. The non-competition provision applies for a period that is generally 12 months following termination of employment. The enforceability of covenants not to compete in Israel and the United States is subject to limitations. In addition, we are required to provide one to three months notice prior to terminating the employment of our executive officers, other than in the case of a termination for cause.

Directors Service Contracts

Other than with respect to our directors that are also executive officers, there are no arrangements or understandings between us, on the one hand, and any of our directors, on the other hand, providing for benefits upon termination of their service as directors of our company.

Wixpress Ltd. 2007 Share Option Plan

The Wixpress Ltd. 2007 Share Option Plan was adopted by our board of directors on April 1, 2007, approved by our shareholders on March 18, 2008, amended on June 20, 2010 and October 27, 2011 (the Option Plan). The Option Plan generally permits the grant of share options to our affiliates, employees, directors or consultants. As of August 31, 2013, options to purchase 3,058,030 ordinary shares were outstanding under the Option Plan and 582,350 ordinary shares were available for future option grants under the Option Plan. Unless terminated earlier by the compensation committee appointed and maintained by our board of directors, the Option Plan will terminate on April 1, 2017.

Table of Contents

Our board of directors or the compensation committee administers the Option Plan, including (i) designating participants in the Option Plan; (ii) determining the terms and provisions of respective option agreements, including the number of shares to be covered by each option, exercisability, transferability, and other terms and conditions of the option; (iii) accelerating the right of an optionholder to exercise any previously granted option; (iv) determining the fair market value of the shares; and (v) interpreting the provisions and supervising the administration of the Option Plan. The compensation committee may amend or discontinue the Option Plan at any time, except that generally no amendment may impair the rights of an optionholder without his or her written consent, unless such amendment (i) is required to satisfy an existing law, regulation or accounting standard or (ii) would not significantly diminish the benefits provided under the Option Plan. In all other cases, the approval of our shareholders is generally required for any amendment that would (i) increase the maximum number of shares that may be sold or awarded under the Option Plan, (ii) decrease the minimum option exercise price requirements under the Option Plan, (iii) change the class of persons eligible to receive options under the Option Plan, or (iv) extend the duration of the Option Plan or the period during which incentive share options may be exercised.

Options granted under the Option Plan generally vest and become exercisable over a period of four years with 25% of the shares subject to the option vesting on the first anniversary of the grant and the rest vesting monthly over the next three years, subject to continued employment or service by the optionholder. Options generally expire ten years from the grant date.

Unless otherwise determined by our board of directors or the compensation committee, the exercise price of options granted under the Option Plan may not be less than the fair market value per share on the date of grant.

Upon termination of employment or service for any reason, other than for cause or death or disability, the optionholder may exercise his or her vested options within 90 days of the date of termination. If we terminate an optionholder's employment or service for cause, all of the employee's options, whether vested or unvested, expire on the termination date. Upon termination of employment or service due to death or disability, the optionholder or his or her estate may exercise his or her vested options within twelve months from the date of death or disability. An option may not, however, be exercised after the option's expiration date. Subject to applicable law, if the optionholder's employment or services is terminated for fraud, breach of loyalty, theft or other malicious behavior against us, then he or she will be deemed to have offered to our other shareholders the right to purchase all of the shares issued pursuant to his or her option at the exercise price paid by him or her for such shares pro rata to their respective holdings of our issued and outstanding shares.

Options are non-transferable except in the event of an optionholder's death.

If we are party to a merger or consolidation, outstanding options and shares acquired under the Option Plan will be subject to the agreement of merger or consolidation, which will provide for one or more of the following: (i) the continuation of such options by us, (ii) the assumption of such options by the surviving corporation or its parent, (iii) the substitution by the surviving corporation or its parent of new options, (iv) the cancellation of the such options in exchange for payment equaling the market value of the shares subject to the option less the exercise price, or (v) full exercisability of the option and full vesting of the shares subject to the option.

In the event of any variation in our share capital, including a share dividend, share split, combination or exchange of shares, recapitalization, or any other like event, the number, class and kind of shares subject to the Option Plan and outstanding options, and the exercise prices of the options, will be appropriately and equitably adjusted so as to maintain the proportionate number of shares without changing the aggregate exercise price of the options.

Share options granted to Israeli employees under the Option Plan may be granted pursuant to the provisions of Section 102 of the Israeli Income Tax Ordinance. Any options granted pursuant to such provision will be issued to a trustee and be held by the trustee for at least two years from the date of grant of the options.

Table of Contents

PRINCIPAL AND SELLING SHAREHOLDERS

The following table sets forth information with respect to the beneficial ownership of our shares as of the date of this prospectus and after this offering by:

each person or entity known by us to own beneficially more than 5% of our outstanding shares;

each of our directors and executive officers individually;

all of our executive officers and directors as a group; and

the selling shareholders, which consist of the entities and individuals shown as having shares listed in the column **Number of Shares Offered**.

The beneficial ownership of ordinary shares is determined in accordance with the rules of the Securities and Exchange Commission and generally includes any ordinary shares over which a person exercises sole or shared voting or investment power, or the right to receive the economic benefit of ownership. For purposes of the table below, we deem shares subject to options or warrants that are currently exercisable or exercisable within 60 days of July 31, 2013, to be outstanding and to be beneficially owned by the person holding the options or warrants for the purposes of computing the percentage ownership of that person but we do not treat them as outstanding for the purpose of computing the percentage ownership of any other person. The percentage of shares beneficially owned prior to the offering is based on 10,114,387 ordinary shares outstanding as of August 31, 2013. We have also set forth below information known to us regarding any significant change in the percentage ownership of our ordinary shares by any major shareholders during the past three years.

As of August 31, 2013, we had 13 holders of record of our ordinary shares in the United States. These shareholders held in the aggregate 25.6% of our outstanding ordinary shares.

All of our shareholders, including the shareholders listed below, have the same voting rights attached to their ordinary shares. See **Description of Share Capital** **Amended and Restated Articles of Association** **Voting**. Following the closing of this offering, neither our principal shareholders nor our directors and executive officers will have different or special voting rights with respect to their ordinary shares. Unless otherwise noted below, each shareholder's address is Wix.com Ltd., 40 Namal Tel Aviv St., Tel Aviv 6701101 Israel.

A description of any material relationship that our principal shareholders have had with us or any of our predecessors or affiliates within the past three years is included under **Certain Relationships and Related Party Transactions**.

Spurlock. These individuals may be deemed to have shared voting and investment power over the shares held by BCP VI. Our director, Michael Eisenberg, does not hold voting or dispositive power with respect to, and is therefore not a beneficial owner of, the shares held by BCP VI. The address for Benchmark Capital Partners BCP VI and BCMC VI is 2480 Sand Hill Road, Suite 200, Menlo Park, CA 94025.

Table of Contents**CERTAIN RELATIONSHIPS AND RELATED PARTY TRANSACTIONS**

Our policy is to enter into transactions with related parties on terms that, on the whole, are no more favorable, or no less favorable, than those available from unaffiliated third parties. Based on our experience in the business sectors in which we operate and the terms of our transactions with unaffiliated third parties, we believe that all of the transactions described below met this policy standard at the time they occurred.

Financing Transactions

Original Rounds of Financing. Since our founding, we have raised capital through multiple rounds of financing. Between 2007 and 2009, we raised capital through sales of our ordinary shares, Series A, B, B-1 and C preferred shares, and convertible notes. We do not have any convertible notes outstanding today.

Series D Financing. In 2010, we sold Series D preferred shares convertible into 1,272,940 ordinary shares at a price per underlying ordinary share of approximately \$7.99 for an aggregate purchase price of approximately \$10.2 million. Each Series D preferred share will convert into one ordinary share upon the closing of this offering. The following table sets forth the number of ordinary shares resulting from conversion upon the closing of this offering of the Series D preferred shares purchased by entities which, as of the date of this prospectus, beneficially own more than 5% of our ordinary shares assuming the conversion of all of outstanding preferred shares:

	Aggregate Purchase Price (thousands)	Number of Ordinary Shares Resulting from the Conversion of Series D Preferred Shares
Benchmark Capital Partners	\$ 7,009	877,281
Entities affiliated with Bessemer Venture Partners.	\$ 1,580	197,829
Entities affiliated with Mangrove Capital Partners	\$ 1,580	197,830

In connection with the Series D Financing, our founders, Avishai Abrahami, Giora Kaplan and Nadav Abrahami sold to existing shareholders 375,665 ordinary shares for an aggregate price of \$3.0 million representing a price per share of approximately \$7.99. Our board of directors approved this transfer pursuant to the requirements of the shareholders' agreement in effect at the time.

Series E Financing. In 2011, we sold Series E preferred shares convertible into 1,025,227 ordinary shares at a purchase price per underlying ordinary share of approximately \$20.48 in consideration for an aggregate purchase price of \$21.0 million. Each Series E preferred share will convert into one ordinary share upon the closing of this offering. The following table sets forth the number of ordinary shares resulting from conversion at the closing of this offering of the Series E preferred shares purchased by entities which, as of the date of this prospectus, beneficially own more than 5% of our outstanding ordinary shares assuming the conversion of all of outstanding preferred shares:

	Aggregate Purchase Price (in thousands)	Number of Ordinary Shares Resulting from the Conversion of Series E Preferred Shares
Entities affiliated with Insight Venture Partners	\$ 15,000	732,305
Entities affiliated with Bessemer Venture Partners.	\$ 1,894	92,479
Entities affiliated with Mangrove Capital Partners	\$ 1,101	53,767
Benchmark Capital Partners	\$ 1,004	49,035

Table of Contents

In connection with this financing, our founders, Avishai Abrahami, Giora Kaplan and Nadav Abrahami sold to existing shareholders 292,923 ordinary shares for an aggregate price of \$6.0 million representing a price per share of \$20.48. Our board of directors and shareholders approved this transfer pursuant to the requirements of the shareholders' agreement in effect at the time.

Rights of Appointment

Our current board of directors consists of nine directors. Pursuant to our articles of association in effect prior to this offering, certain of our shareholders had rights to appoint members of our board of directors. See **Management Board of Directors**.

All rights to appoint directors and observers will terminate upon the closing of this offering, although currently-serving directors that were appointed prior to this offering will continue to serve pursuant to their appointment until the annual meeting of shareholders at which the term of their class of director expires.

We are not a party to, and are not aware of, any voting agreements among our shareholders.

Registration Rights

Our shareholders' agreement entitles our shareholders to certain registration rights following the closing of this offering. In accordance with this agreement, and subject to conditions listed below, the following entities which as of the date of this prospectus beneficially own more than 5% of our ordinary shares, assuming the conversion of all of outstanding preferred shares, are entitled to registration rights: entities affiliated with each of Bessemer Venture Partners, Insight Venture Partners, Mangrove Capital Partners, and Benchmark Capital Partner.

Form F-1 Demand Rights. Upon the request of the holders of more than 50% of the shares held by our former preferred shareholders given more than 180 days after the effective date of the registration statement related to this offering, we are required to file a registration statement on Form F-1 in respect of the ordinary shares held by our former preferred shareholders. Following a request to effect such a registration, we are required to give notice of the request to the other holders of registrable securities and offer them an opportunity to include their shares in the registration statement. We are not required to effect more than two registrations on Form F-1 and we are only required to do so if the aggregate proceeds from any such registration are estimated in good faith to be in excess of \$2.0 million.

Form F-3 Demand Rights. After we become eligible under applicable securities laws to file a registration statement on Form F-3, which will not be until at least 12 months after the date of this prospectus, upon the request of the holders of more than 50% of the shares held by our former preferred shareholders, we are required to file a registration statement on Form F-3 in respect of the ordinary shares held by our former preferred shareholders. Following a request to effect such a registration, we are required to give notice of the request to the other holders of registrable securities and offer them an opportunity to include their shares in the registration statement. We are not required to effect a registration on Form F-3 more than twice in any 12-month period and are only required to do so if the aggregate proceeds from any such registration are estimated in good faith to be in excess of \$1.0 million.

Piggyback registration rights. Following this offering, shareholders holding registrable securities will also have the right to request that we include their registrable securities in any registration statement filed by us in the future for the purposes of a public offering for cash, subject to specified exceptions.

Cutback. In the event that the managing underwriter advises the registering shareholders that marketing factors require a limitation on the number of shares that can be included in a registered offering, the shares will be included in the registration statement in an agreed order of preference among the holders of registration rights. The same preference also applies in the case of a piggyback registration, but we have first preference and the number of shares of shareholders that are included may not be less than 25% of the total number of shares included in the offering.

Table of Contents

Termination. All registration rights granted to holders of registrable securities terminate on the fifth anniversary of the closing of this offering and, with respect to any of our holders of registrable securities that holds less than 1% of our outstanding shares, when the shares held by such shareholder can be sold within a 90-day period under Rule 144.

Expenses. We will pay all expenses in carrying out the foregoing registrations other than selling shareholders' underwriting discounts and transfer taxes.

Agreements with Directors and Officers

Employment Agreements. We have entered into employment agreements with each of our officers who work for us as employees. We enter into consulting agreements where the executive officer requests that we engage him or her through a wholly-owned personal service corporation. We have entered into such a consulting agreement with Avishai Abrahami, our Chief Executive Officer, which provides that he must devote all of his work time to our company. These agreements each contain provisions regarding noncompetition, confidentiality of information and assignment of inventions. The enforceability of covenants not to compete is subject to limitations.

The provisions of certain of our executive officers' employment agreements contain termination or change of control provisions. With respect to certain executive officers, either we or the executive officer may terminate his or her employment by giving 90 calendar days' advance written notice to the other party. We may also terminate an executive officer's employment agreement for good reason (as defined in the employment agreement), or in the event of a merger or acquisition transaction.

Options. Since our inception we have granted options to purchase our ordinary shares to our officers and certain of our directors. Such option agreements may contain acceleration provisions upon certain merger, acquisition, or change of control transactions. We describe our option plans under Management Wixpress Ltd. 2007 Share Option Plan. If an executive officer is involuntarily terminated without cause or the executive officer voluntarily terminates his employment for good reason (as defined in the employment agreement), all options will immediately vest. Upon the consummation of a merger or acquisition transaction, an executive officer's remaining unvested options will vest either on a monthly basis, with the first installment vesting one month after the closing of the transaction, or over the remaining vesting period, whichever is shorter. If an executive officer is terminated within a certain period following a merger or acquisition transaction, his or her unvested options will vest immediately.

Exculpation, Indemnification and Insurance. Our articles of association permit us to exculpate, indemnify and insure certain of our office holders to the fullest extent permitted by the Companies Law. We have entered into agreements with certain office holders, exculpating them from a breach of their duty of care to us to the fullest extent permitted by law and undertaking to indemnify them to the fullest extent permitted by law, subject to certain exceptions, including with respect to liabilities resulting from this offering to the extent that these liabilities are not covered by insurance. See Management Exculpation, Insurance and Indemnification of Directors and Officers.

Family Relationships

There are familial relationships between certain of our directors and executive officers, and other employees of our company. Our Chief Executive Officer and director, Avishai Abrahami, is the brother of Nadav Abrahami, our executive officer, acting as Vice President of Client Development. Yoav Abrahami, the brother of Avishai Abrahami and Nadav Abrahami, is employed by us as Chief Architect of Research and Development. Further, Nir Zohar, our Chief Operating Officer, is married to our employee, Hagit Zohar, manager of our Design Studio team in our Tel Aviv office. Aside from these relations, we are not aware of any other familial relationships between our directors, officers, and employees.

Table of Contents

DESCRIPTION OF SHARE CAPITAL

Share Capital

Our authorized share capital consists of 500 million ordinary shares, par value NIS 0.01 per share, of which _____ shares will be issued and outstanding following the closing of this offering.

All of our outstanding ordinary shares are validly issued, fully paid and non-assessable. Our ordinary shares are not redeemable and do not have any preemptive rights. All of our ordinary shares have equal rights and are fully paid.

Our board of directors may determine the issue prices and terms for such shares or other securities, and may further determine any other provision relating to such issue of shares or securities. We may also issue and redeem redeemable securities on such terms and in such manner as our board of directors shall determine. Our board of directors may not make calls or assessments on our ordinary shares. Our board of directors is not authorized to issue preferred shares absent an amendment to our articles of association in order to authorize such shares. Such an amendment, as any other amendment of our articles of association, would require the affirmative vote of 75% of our outstanding shares unless 75% of our directors approved lowering such threshold to require the affirmative vote of a majority of our outstanding shares.

The following descriptions of share capital and provisions of our amended and restated articles of association are summaries and are qualified by reference to the amended and restated articles of association to be effective upon the closing of this offering. Copies of these documents will be filed with the SEC as exhibits to our registration statement, of which this prospectus forms a part. The description of the ordinary shares reflects changes to our capital structure that will occur upon the closing of this offering.

Amended and Restated Articles of Association

Objects and Purposes. Our registration number with the Israeli Registrar of Companies is 513881177. Our purpose as set forth in our amended and restated articles of association is to engage in any legal business.

Voting. Holders of our ordinary shares have one vote for each ordinary share held on all matters submitted to a vote of shareholders at a shareholder meeting. Shareholders may vote at shareholder meetings either in person, by proxy or by written ballot. Israeli law does not allow public companies to adopt shareholder resolutions by means of written consent in lieu of a shareholder meeting. Except as otherwise disclosed herein, an amendment to our amended and restated articles of association requires the affirmative vote of at least 75.0% of the shares voting in person or by proxy, unless a lower percentage has been established by our board of directors by a majority of three-quarters of those directors voting at a meeting of the Board which shall have taken place prior to that general meeting.

Share Ownership Restrictions. The ownership or voting of ordinary shares by non-residents of Israel is not restricted in any way by our amended and restated articles of association or the laws of the State of Israel, except that citizens of countries which are in a state of war with Israel may not be recognized as owners of ordinary shares.

Transfer of Shares. Fully paid ordinary shares are issued in registered form and may be freely transferred under our amended and restated articles of association unless the transfer is restricted or prohibited by another instrument, Israeli law or the rules of a stock exchange on which the shares are traded.

Election and Removal of Directors. Our board of directors will be divided into three classes with staggered three year terms. Only one class of directors will be elected at each annual meeting of our shareholders, with the other classes continuing for the remainder of their respective three-year terms. Our ordinary shares do not have

Table of Contents

cumulative voting rights for the election of directors. Rather, under our amended and restated articles of association our directors are elected, upon expiration of the term of office of any director, by the holders of a simple majority of our ordinary shares at a general shareholder meeting (excluding abstentions). As a result, the holders of our ordinary shares that represent more than 50% of the voting power represented at a shareholder meeting and voting thereon (excluding abstentions) have the power to elect any or all of our directors whose positions are being filled at that meeting, subject to the special approval requirements for external directors described under Board Practices Board of Directors External Directors. Shareholders may only remove a director upon the affirmative vote of at least 75% of the shares entitled to vote at a general meeting of shareholders. Vacancies on our board of directors, resulting from a resignation or other termination of service by a then serving director, may only be filled by the vote of a simple majority of the directors then in office as described under Board Practices Board of Directors Directors and Officers. For additional information regarding the election of and voting by directors, see Board Practices Board of Directors.

Dividend and Liquidation Rights. Under Israeli law, we may declare and pay a dividend only if, upon the reasonable determination of our board of directors, the distribution will not prevent us from being able to meet the terms of our existing and contingent obligations as they become due. Under the Companies Law, the distribution amount is further limited to the greater of retained earnings or earnings generated over the two most recent years according to our then last reviewed or audited financial statements, provided that the date of the financial statements is not more than six months prior to the date of distribution. In the event that we do not have retained earnings and earnings legally available for distribution, as defined in the Companies Law, we may seek the approval of the court in order to distribute a dividend. The court may approve our request if it is convinced that there is no reasonable concern that the payment of a dividend will prevent us from satisfying our existing and foreseeable obligations as they become due.

In the event of our liquidation, after satisfaction of liabilities to creditors, our assets will be distributed to the holders of ordinary shares on a pro-rata basis. Dividend and liquidation rights may be affected by the grant of preferential dividend or distribution rights to the holders of a class of shares with preferential rights that may be authorized in the future. See Dividend Policy.

Shareholder Meetings. We are required to convene an annual general meeting of our shareholders once every calendar year, not more than 15 months following the preceding annual general meeting. Our board of directors may convene a special general meeting of our shareholders and is required to do so at the request of one or more holders of 5% or more of our share capital and 1% of our voting power, or at the request of one of more holders of 5% or more of our voting power. All shareholder meetings require prior notice of at least 14 days and, in certain cases, 35 days. Shareholders must comply with advance notice provisions to bring business before, or nominate directors for election at, a shareholder meeting. The chairperson of our board of directors or another one of our directors authorized by our board of directors presides over our general meetings. If either of such persons is not present within 15 minutes from the appointed time for the commencement of the meeting, the directors present at such meeting shall appoint one of our directors as the chairperson for such meeting and if they fail to do so, then the shareholders present shall appoint one of our directors or office holders to act as chairperson and if any such person refuses to so act or is not present, then one of the shareholders present at such meeting shall act as chairperson. Subject to the provisions of the Companies Law and the regulations promulgated thereunder, shareholders entitled to participate and vote at general meetings are the shareholders of record on a date to be decided by the board of directors, which may be between four and 40 days prior to the date of the meeting, depending on the type of meeting and whether written proxies are being used.

Quorum. The quorum required for a meeting of shareholders consists of at least two shareholders present in person, by proxy or by written ballot, who hold or represent between them at least 25% of our voting power. A meeting adjourned for lack of a quorum generally is adjourned to the same day in the following week at the same time and place (without requirement of additional notification to the shareholders), or to a later time, if indicated in the notice to the meeting or to such other time and place as determined by the board of directors in a notice to our shareholders. At the reconvened meeting, if a quorum is not present within half an hour from the appointed time for the commencement of the meeting, the meeting will take place with whatever number of participants are

Table of Contents

present, unless the meeting was called pursuant to a request by our shareholders, in which case the quorum required is the number of shareholders required to call the meeting as described under Shareholder Meetings.

Resolutions. Under the Companies Law, unless otherwise provided in the articles of association or applicable law, all resolutions of the shareholders require a simple majority of the voting rights represented at the meeting, in person, by proxy or by written ballot, and voting on the resolution (excluding abstentions).

Access to Corporate Records. Under the Companies Law, all shareholders generally have the right to review minutes of our general meetings, our shareholder register, including with respect to material shareholders, our articles of association, our financial statements and any document we are required by law to file publicly with the Israeli Companies Registrar or the Israeli Securities Authority. Any shareholder who specifies the purpose of its request may request to review any document in our possession that relates to any action or transaction with a related party which requires shareholder approval under the Companies Law. We may deny a request to review a document if we determine that the request was not made in good faith, that the document contains a trade secret or patent or that the document's disclosure may otherwise impair our interests.

Acquisitions under Israeli Law

Full Tender Offer. A person wishing to acquire shares of a public Israeli company and who could as a result hold over 90% of the target company's voting rights or the target company's issued and outstanding share capital (or of a class thereof), is required by the Companies Law to make a tender offer to all of the company's shareholders for the purchase of all of the issued and outstanding shares of the company (or the applicable class). If (a) the shareholders who do not accept the offer hold less than 5% of the issued and outstanding share capital of the company (or the applicable class) and the shareholders who accept the offer constitute a majority of the offerees that do not have a personal interest in the acceptance of the tender offer or (b) the shareholders who did not accept the tender offer hold less than 2% of the issued and outstanding share capital of the company (or of the applicable class), all of the shares that the acquirer offered to purchase will be transferred to the acquirer by operation of law. A shareholder who had its shares so transferred may petition the court within six months from the date of acceptance of the full tender offer, regardless of whether such shareholder agreed to the offer, to determine whether the tender offer was for less than fair value and whether the fair value should be paid as determined by the court. However, an offeror may provide in the offer that a shareholder who accepted the offer will not be entitled to appraisal rights as described in the preceding sentence, as long as the offeror and the company disclosed the information required by law in connection with the tender offer. If the full tender offer was not accepted in accordance with any of the above alternatives, the acquirer may not acquire shares of the company that will increase its holdings to more than 90% of the company's issued and outstanding share capital (or of the applicable class) from shareholders who accepted the tender offer.

Special Tender Offer. The Companies Law provides that an acquisition of shares of an Israeli public company must be made by means of a special tender offer if as a result of the acquisition the purchaser would become a holder of 25% or more of the voting rights in the company. This rule does not apply if there is already another holder of 25% or more of the voting rights in the company. Similarly, the Companies Law provides that an acquisition of shares in a public company must be made by means of a tender offer if as a result of the acquisition the purchaser would become a holder of more than 45% of the voting rights in the company, if there is no other shareholder of the company who holds more than 45% of the voting rights in the company. These requirements do not apply if the acquisition (i) occurs in the context of a private placement by the company that received shareholder approval, (ii) was from a shareholder holding 25% or more of the voting rights in the company and resulted in the acquirer becoming a holder of 25% or more of the voting rights in the company, or (iii) was from a holder of more than 45% of the voting rights in the company and resulted in the acquirer becoming a holder of more than 45% of the voting rights in the company. A special tender offer may be consummated only if (i) at least 5% of the voting power attached to the company's outstanding shares will be acquired by the offeror and (ii) the number of shares tendered in the offer exceeds the number of shares whose

Table of Contents

holders objected to the offer (excluding controlling shareholders, holders of 25% or more of the voting rights in the company and any person having a personal interest in the acceptance of the tender offer).

In the event that a special tender offer is made, a company's board of directors is required to express its opinion on the advisability of the offer, or shall abstain from expressing any opinion if it is unable to do so, provided that it gives the reasons for its abstention. An office holder in a target company who, in his or her capacity as an office holder, performs an action the purpose of which is to cause the failure of an existing or foreseeable special tender offer or is to impair the chances of its acceptance, is liable to the potential purchaser and shareholders for damages, unless such office holder acted in good faith and had reasonable grounds to believe he or she was acting for the benefit of the company. However, office holders of the target company may negotiate with the potential purchaser in order to improve the terms of the special tender offer, and may further negotiate with third parties in order to obtain a competing offer.

If a special tender offer is accepted, then shareholders who did not respond to or that had objected the offer may accept the offer within four days of the last day set for the acceptance of the offer.

In the event that a special tender offer is accepted, then the purchaser or any person or entity controlling it or under common control with the purchaser or such controlling person or entity may not make a subsequent tender offer for the purchase of shares of the target company and may not enter into a merger with the target company for a period of one year from the date of the offer, unless the purchaser or such person or entity undertook to effect such an offer or merger in the initial special tender offer.

Merger. The Companies Law permits merger transactions if approved by each party's board of directors and, unless certain conditions described under the Companies Law are met, a majority of each party's shareholders. The board of directors of a merging company is required pursuant to the Companies Law to discuss and determine whether in its opinion there exists a reasonable concern that as a result of a proposed merger, the surviving company will not be able to satisfy its obligations towards its creditors, such determination taking into account the financial status of the merging companies. If the board of directors determines that such a concern exists, it may not approve a proposed merger. Following the approval of the board of directors of each of the merging companies, the boards of directors must jointly prepare a merger proposal for submission to the Israeli Registrar of Companies.

For purposes of the shareholder vote, unless a court rules otherwise, if one of the merging companies (or any person who holds 25% or more of the outstanding shares or the right to appoint 25% or more of the directors of one of the merging companies) holds shares in the other merging company, the merger will not be deemed approved if a majority of the shares voted at the shareholders meeting by shareholders other than the other party to the merger, or by any person who holds 25% or more of the outstanding shares or the right to appoint 25% or more of the directors of the other party, vote against the merger. In addition, if the non-surviving entity of the merger has more than one class of shares, the merger must be approved by each class of shareholders. If the transaction would have been approved but for the separate approval of each class or the exclusion of the votes of certain shareholders as provided above, a court may still approve the merger upon the request of holders of at least 25% of the voting rights of a company, if the court holds that the merger is fair and reasonable, taking into account the value of the parties to the merger and the consideration offered to the shareholders. If a merger is with a company's controlling shareholder or if the controlling shareholder has a personal interest in the merger, then the merger is instead subject to the same special majority approval that governs all extraordinary transactions with controlling shareholders (as described above under Approval of Related Party Transactions Under Israeli Law Disclosure of Personal Interests of Controlling Shareholders and Approval of Certain Transactions).

Under the Companies Law, each merging company must inform its secured creditors of the proposed merger plans. Upon the request of a creditor of either party to the proposed merger, the court may delay or prevent the merger if it concludes that there exists a reasonable concern that, as a result of the merger, the surviving company will be unable to satisfy the obligations of any of the parties to the merger, and may further give instructions to secure the rights of creditors.

Table of Contents

In addition, a merger may not be completed unless at least 50 days have passed from the date that a proposal for approval of the merger is filed with the Israeli Registrar of Companies and 30 days from the date that shareholder approval of both merging companies is obtained.

Transactions with Interested Shareholders

Our amended and restated articles of association contain a provision that prohibits us from engaging in any business combination with any interested shareholder for a period of three years following the date that the shareholder became an interested shareholder, unless:

prior to that date, the board of directors of the corporation approved either the business combination or the transaction that resulted in the shareholder becoming an interested shareholder; or

upon consummation of the transaction that resulted in the shareholder becoming an interested shareholder, the interested shareholder owned at least 85% of the voting share of the corporation outstanding at the time the transaction commenced, excluding, for purposes of determining the number of shares outstanding, unissued shares of the company which may be issued pursuant to any agreement, arrangement or understanding, or upon exercise of conversion rights, warrants or options, or otherwise.

A business combination is defined to include the following:

any merger or consolidation involving the corporation and the interested shareholder;

any sale, transfer, pledge or other disposition of 10% or more of the assets of the corporation involving the interested shareholder;

subject to certain exceptions, any transaction that results in the issuance or transfer by the corporation of any shares of the corporation to the interested shareholder;

any transaction involving the corporation that has the effect of increasing the proportionate share of the shares of any class or series of the corporation beneficially owned by the interested shareholder; or

the receipt by the interested shareholder or the benefit of any loans, advances, guarantees, pledges or other financial benefits provided by or through the corporation.

An interested shareholder is defined as an entity or person beneficially owning 15% or more of the outstanding voting shares of the company and any entity or person affiliated with or controlling or controlled by any of these entities or persons.

This provision may have the effect of preventing, delaying or discouraging coercive takeover practices and inadequate takeover bids. This provision is also designed, in part, to encourage persons seeking to acquire control of our company to negotiate first with our board. We believe that the benefits of increased protection of our potential ability to negotiate more favorable terms with an unfriendly or unsolicited acquirer outweigh the disadvantages of discouraging a proposal to acquire our company.

Transfer Agent and Registrar

The transfer agent and registrar for our ordinary shares is American Stock Transfer & Trust Company. Its address is 6201 15th Avenue, Brooklyn, New York 11219, and its telephone number is (800) 937-5449.

Listing

We have applied to have our ordinary shares listed on the NYSE under the symbol WIX.

Table of Contents

SHARES ELIGIBLE FOR FUTURE SALE

Following this offering, we will have an aggregate of _____ ordinary shares outstanding. Of these shares, the _____ shares sold in this offering will be freely tradable without restriction or further registration under the Securities Act, unless purchased by affiliates as that term is defined under Rule 144 of the Securities Act, who may sell only the volume of shares described below and whose sales would be subject to additional restrictions described below. The remaining _____ shares, representing _____ of our outstanding shares will be held by our existing shareholders. These shares will be restricted securities as that phrase is defined in Rule 144. Subject to certain contractual restrictions, including the lock-up agreements described below, holders of restricted shares will be entitled to sell those shares in the public market pursuant to an effective registration statement under the Securities Act or if qualify for an exemption from registration under Rule 144. Sales of these shares in the public market after the restrictions under the lock-up agreements lapse, or the perception that those sales may occur, could cause the prevailing market price to decrease or to be lower than it might be in the absence of those sales or perceptions.

Lock up agreements

We, our executive officers and directors, and the holders of substantially all of our outstanding ordinary shares, have agreed not to offer, sell, agree to sell, directly or indirectly, or otherwise dispose of any ordinary shares or any securities convertible into or exchangeable for ordinary shares except for the ordinary shares offered in this offering without the prior written consent of J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner and Smith Incorporated for a period of 180 days after the date of this prospectus.

Eligibility of restricted shares for sale in the public market

The _____ ordinary shares that are not being sold in this offering, but which will be outstanding at the time this offering is complete, will be eligible for sale into the public market, under the provisions of Rule 144 commencing after the expiration of the restrictions under the lock-up agreements, subject to volume restrictions discussed below under _____ Rule 144.

Rule 144

In general, under Rule 144 under the Securities Act, a person (or persons whose shares are aggregated) who is not deemed to have been an affiliate of ours at any time during the three months preceding a sale, and who has beneficially owned restricted securities within the meaning of Rule 144 for at least six months (including any period of consecutive ownership of preceding non-affiliated holders) would be entitled to sell those shares, subject only to the availability of current public information about us. A non-affiliated person who has beneficially owned restricted securities within the meaning of Rule 144 for at least one year would be entitled to sell those shares without regard to the provisions of Rule 144.

A person (or persons whose shares are aggregated) who is deemed to be an affiliate of ours and who has beneficially owned restricted securities within the meaning of Rule 144 for at least six months would be entitled to sell within any three-month period a number of shares that does not exceed the greater of one percent of the then outstanding shares of our ordinary shares or the average weekly trading volume of our ordinary shares on the during the four calendar weeks preceding such sale. Such sales are also subject to certain manner of sale provisions, notice requirements and the availability of current public information about us. As affiliates of us, commencing after the expiration or waiver of the lock-up agreements described above, _____ will each be able to sell shares that it holds pursuant to the exemption described in this paragraph.

Options

Following the completion of this offering, we intend to file a registration statement on Form S-8 under the Securities Act to register _____ ordinary shares reserved for issuance under our share option plan. The registration statement on Form S-8 will become effective automatically upon filing.

Table of Contents

Ordinary shares issued upon exercise of a share option and registered under the Form S-8 registration statement will, subject to vesting provisions, lock-up agreements with the underwriters and Rule 144 volume limitations applicable to our affiliates, be available for sale in the open market immediately after the 180-day lock up agreements expire. See Management Wixpress Ltd. 2007 Share Option Plan.

Registration rights

Following the completion of this offering, the holders of up to ordinary shares are entitled to request that we register their ordinary shares under the Securities Act, subject to cutback for marketing reasons and certain other conditions. These shareholders are also entitled to piggyback registration rights, which are also subject to cutback for marketing reasons and certain other conditions. Registration of such shares under the Securities Act would result in such shares becoming freely tradable without restriction under the Securities Act, except for shares purchased by affiliates, immediately upon the effectiveness of such registration. See Certain relationships and related person transactions Registration rights. Any sales of securities by these shareholders could have a material adverse effect on the trading price of our ordinary shares.

Table of Contents

TAXATION AND GOVERNMENT PROGRAMS

The following description is not intended to constitute a complete analysis of all tax consequences relating to the acquisition, ownership and disposition of our ordinary shares. You should consult your own tax advisor concerning the tax consequences of your particular situation, as well as any tax consequences that may arise under the laws of any state, local, foreign or other taxing jurisdiction.

Israeli Tax Considerations and Government Programs

The following is a brief summary of the material Israeli tax laws applicable to us, and certain Israeli Government programs that benefit us. This section also contains a discussion of material Israeli tax consequences concerning the ownership and disposition of our ordinary shares purchased by investors in this offering. This summary does not discuss all the aspects of Israeli tax law that may be relevant to a particular investor in light of his or her personal investment circumstances or to some types of investors subject to special treatment under Israeli law. Examples of such investors include residents of Israel or traders in securities who are subject to special tax regimes not covered in this discussion. To the extent that the discussion is based on new tax legislation that has not yet been subject to judicial or administrative interpretation, we cannot assure you that the appropriate tax authorities or the courts will accept the views expressed in this discussion. The discussion below is subject to change, including due to amendments under Israeli law or changes to the applicable judicial or administrative interpretations of Israeli law, which change could affect the tax consequences described below.

General Corporate Tax Structure in Israel

Israeli companies are generally subject to corporate tax. In 2013 and 2012, the corporate tax rate is 25% of their taxable income. The corporate tax rate for 2011 was 24%. In August 2013, the Israeli Knesset approved an increase in the corporate tax rate to 26.5% for 2014 and thereafter. However, the effective tax rate payable by a company that derives income from an Approved Enterprise, a Preferred Enterprise or a Beneficiary Enterprise (as discussed below) may be considerably less. Capital gains derived by an Israeli company are generally subject to the prevailing corporate tax rate.

Law for the Encouragement of Industry (Taxes), 5729-1969

The Law for the Encouragement of Industry (Taxes), 5729-1969, generally referred to as the Industry Encouragement Law, provides several tax benefits for Industrial Companies. We believe that we currently qualify as an Industrial Company within the meaning of the Industry Encouragement Law.

The Industry Encouragement Law defines an Industrial Company as an Israeli resident-company, of which 90% or more of its income in any tax year, other than income from defense loans, is derived from an Industrial Enterprise owned by it. An Industrial Enterprise is defined as an enterprise whose principal activity in a given tax year is industrial production.

The following corporate tax benefits, among others, are available to Industrial Companies:

amortization of the cost of purchased a patent, rights to use a patent, and know-how, which are used for the development or advancement of the company, over an eight-year period, commencing on the year in which such rights were first exercised;

under limited conditions, an election to file consolidated tax returns with related Israeli Industrial Companies; and

expenses related to a public offering are deductible in equal amounts over three years.

Eligibility for benefits under the Industry Encouragement Law is not contingent upon approval of any governmental authority.

There can be no assurance that we will continue to qualify as an Industrial Company or that the benefits described above will be available in the future.

Table of Contents

Tax Benefits and Grants for Research and Development

Israeli tax law allows, under certain conditions, a tax deduction for expenditures, including capital expenditures, for the year in which they are incurred. Expenditures are deemed related to scientific research and development projects, if:

The expenditures are approved by the relevant Israeli government ministry, determined by the field of research;

The research and development must be for the promotion of the company; and

The research and development is carried out by or on behalf of the company seeking such tax deduction.

The amount of such deductible expenses is reduced by the sum of any funds received through government grants for the finance of such scientific research and development projects. No deduction under these research and development deduction rules is allowed if such deduction is related to an expense invested in an asset depreciable under the general depreciation rules of the income Tax Ordinance, 1961. Expenditures not so approved are deductible in equal amounts over three years.

From time to time we may apply the Office of the Chief Scientist for approval to allow a tax deduction for all research and development expenses during the year incurred. There can be no assurance that such application will be accepted.

Law for the Encouragement of Capital Investments, 5719-1959

The Law for the Encouragement of Capital Investments, 5719-1959, generally referred to as the Investment Law, provides certain incentives for capital investments in production facilities (or other eligible assets).

The Investment Law was significantly amended effective January 1, 2011 (the 2011 Amendment). The 2011 Amendment introduced new benefits to replace those granted in accordance with the provisions of the Investment Law in effect prior to the 2011 Amendment. However, companies entitled to benefits under the Investment Law as in effect prior to January 1, 2011 were entitled to choose to continue to enjoy such benefits, provided that certain conditions are met, or elect instead to forego such benefits and have the benefits of the 2011 Amendment apply. Prior to 2011, we did not utilize any of the benefits for which we were eligible under the Investment Law.

Tax Benefits Prior to the 2005 Amendment

An investment program that is implemented in accordance with the provisions of the Investment Law prior to the 2005 Amendment, referred to as an Approved Enterprise, is entitled to certain benefits. A company that wished to receive benefits as an Approved Enterprise must have received approval from the Investment Center of the Israeli Ministry of Industry, Trade and Labor, or the Investment Center. Each certificate of approval for an Approved Enterprise relates to a specific investment program in the Approved Enterprise, delineated both by the financial scope of the investment and by the physical characteristics of the facility or the asset.

In general, an Approved Enterprise is entitled to receive a grant from the Government of Israel or an alternative package of tax benefits, known as the alternative benefits track. The tax benefits from any certificate of approval relate only to taxable profits attributable to the specific Approved Enterprise. Income derived from activity that is not integral to the activity of the Approved Enterprise does not enjoy tax benefits.

In addition, a company that has an Approved Enterprise program is eligible for further tax benefits if it qualifies as a Foreign Investors Company, or FIC, which is a company with a level of foreign investment, as defined in the Investment Law, of more than 25%. The level of foreign investment is measured as the percentage of rights in the company (in terms of shares, rights to profits, voting and appointment of directors), and of combined share and loan capital, that are owned, directly or indirectly, by persons who are not residents of Israel. The determination as to whether a company qualifies as an FIC is made on an annual basis.

Table of Contents

We did not apply for tax benefits under the Investment Law prior to the 2005 amendment.

Tax Benefits Subsequent to the 2005 Amendment

The 2005 Amendment applies to new investment programs and investment programs commencing after 2004, but does not apply to investment programs approved prior to April 1, 2005. The 2005 Amendment provides that terms and benefits included in any certificate of approval that was granted before the 2005 Amendment became effective (April 1, 2005) will remain subject to the provisions of the Investment Law as in effect on the date of such approval. Pursuant to the 2005 Amendment, the Investment Center will continue to grant Approved Enterprise status to qualifying investments. The 2005 Amendment, however, limits the scope of enterprises that may be approved by the Investment Center by setting criteria for the approval of a facility as an Approved Enterprise, such as provisions generally requiring that at least 25% of the Approved Enterprise's income be derived from exports.

The 2005 Amendment provides that Approved Enterprise status will only be necessary for receiving cash grants. As a result, it was no longer necessary for a company to obtain Approved Enterprise status in order to receive the tax benefits previously available under the alternative benefits track. Rather, a company may claim the tax benefits offered by the Investment Law directly in its tax returns, provided that its facilities meet the criteria for tax benefits set forth in the amendment. Companies are entitled to approach the Israeli Tax Authority for a pre-ruling regarding their eligibility for benefits under the Investment Law, as amended.

In order to receive the tax benefits, the 2005 Amendment states that a company must make an investment which meets all of the conditions, including exceeding a minimum investment amount specified in the Investment Law. Such investment allows a company to receive Beneficiary Enterprise status, and may be made over a period of no more than three years from the end of the year in which the company requested to have the tax benefits apply to its Beneficiary Enterprise. Where the company requests to apply the tax benefits to an expansion of existing facilities, only the expansion will be considered to be a Beneficiary Enterprise and the company's effective tax rate will be the weighted average of the applicable rates. In this case, the minimum investment required in order to qualify as a Beneficiary Enterprise is required to exceed a certain percentage of the value of the company's production assets before the expansion.

The extent of the tax benefits available under the 2005 Amendment to qualifying income of a Beneficiary Enterprise depend on, among other things, the geographic location in Israel of the Beneficiary Enterprise. The location will also determine the period for which tax benefits are available. Such tax benefits include an exemption from corporate tax on undistributed income for a period of between two to ten years, depending on the geographic location of the Beneficiary Enterprise in Israel, and a reduced corporate tax rate of between 10% to 25% for the remainder of the benefits period, depending on the level of foreign investment in the company in each year. A company qualifying for tax benefits under the 2005 Amendment which pays a dividend out of income derived by its Beneficiary Enterprise during the tax exemption period will be subject to corporate tax in respect of the gross amount of the dividend at the otherwise applicable rate of 25%, or a lower rate in the case of a qualified FIC which is at least 49% owned by non-Israeli residents. Dividends paid out of income attributed to a Beneficiary Enterprise are generally subject to withholding tax at source at the rate of 15% or such lower rate as may be provided in an applicable tax treaty.

The benefits available to a Beneficiary Enterprise are subject to the fulfillment of conditions stipulated in the Investment Law and its regulations. If a company does not meet these conditions, it may be required to refund the amount of tax benefits, as adjusted by the Israeli consumer price index, and interest, or other monetary penalties.

In September 2011, we received a tax ruling from the Israeli Tax Authorities, according to which, among other things, the Israeli Tax Authorities (i) approved our status as an Industrial Enterprise; and (ii) determined that the expansion of our enterprise is considered as a Beneficiary Enterprise with 2009 as a Year of Election, all under the Investment Law as amended by 2005 Amendment. The benefits available to us under this tax ruling are subject to the fulfillment of conditions stipulated in the ruling. If we do not meet these conditions, the ruling may be abolished which would result in adverse tax consequences to us

Table of Contents

The benefit period begins in the year in which taxable income is first earned, limited to 12 years from the Year of Election. We chose 2009 as a Year of Election.

Tax Benefits Under the 2011 Amendment

The 2011 Amendment canceled the availability of the benefits granted to Industrial Companies under the Investment Law prior to 2011 and, instead, introduced new benefits for income generated by a Preferred Company through its Preferred Enterprise (as such terms are defined in the Investment Law) as of January 1, 2011. The definition of a Preferred Company includes a company incorporated in Israel that is not fully owned by a governmental entity, and that has, among other things, Preferred Enterprise status and is controlled and managed from Israel. Pursuant to the 2011 Amendment, a Preferred Company is entitled to a reduced corporate tax rate of 15% with respect to its income derived by its Preferred Enterprise in 2011 and 2012, unless the Preferred Enterprise is located in a specified development zone, in which case the rate will be 10%. Under the 2011 Amendment, such corporate tax rate was reduced from 15% and 10%, respectively, to 12.5% and 7%, respectively, in 2013 and 2014 and to 12% and 6%, respectively, in 2015 and thereafter. Income derived by a Preferred Company from a Special Preferred Enterprise (as such term is defined in the Investment Law) would be entitled, during a benefits period of 10 years, to further reduced tax rates of 8%, or 5% if the Special Preferred Enterprise is located in a certain development zone.

Dividends paid out of income attributed to a Preferred Enterprise are generally subject to withholding tax at source at the rate of 15% or such lower rate as may be provided in an applicable tax treaty. However, if such dividends are paid to an Israeli company, no tax is required to be withheld. Under the recent amendment, announced in August 2013, beginning in 2014, dividends paid out of income attributed to a Preferred Enterprise will be subject to a withholding tax rate of 20% (instead of 15%). In addition, tax rates under the Preferred Enterprise were also raised effective as of January 1, 2014 to 16% and 9%, respectively (instead of the 12% and 6%, respectively).

The 2011 Amendment also provided transitional provisions to address companies already enjoying existing tax benefits under the Investment Law. These transitional provisions provide, among other things, that: (i) unless a request is made to apply the provisions of the Investment Law as amended in 2011 with respect to income to be derived as of January 1, 2011, the terms and benefits included in any certificate of approval that was granted to a company owns an Approved Enterprise which chose to receive grants before the 2011 Amendment became effective will remain subject to the provisions of the Investment Law as in effect on the date of such approval, and subject to certain conditions, the 25% tax rate applied to income derived by an Approved Enterprise during the benefits period will be replaced with the regular corporate income tax rate (24% in 2011 and 25% as of 2012 and 2013); and (ii) terms and benefits included in any certificate of approval that was granted to an Approved Enterprise which had participated in an alternative benefits track before the 2011 Amendment became effective will remain subject to the provisions of the Investment Law as in effect on the date of such approval, provided that certain conditions are met. However, a company that has such an Approved Enterprise can file a request with the Israeli Tax Authority, according to which its income derived as of January 1, 2011 will be subject to the provisions of the Investment Law, as amended in 2011; and (iii) a Beneficiary Enterprise can elect to continue to benefit from the benefits provided to it before the 2011 Amendment came into effect, provided that certain conditions are met, or file a request with the Israeli Tax Authority according to which its income derived as of January 1, 2011 will be subject to the provisions of the Investment Law as amended in 2011. A Beneficiary Company may elect to file a notice (written on a specific form) in order to apply the benefits of 2011 Amendments to it pursuant to Sections 131 and 132 of the Income Tax Ordinance (New Version) 5721-1961, referred to herein as the Tax Ordinance (i.e. until May 31st of each year), and such benefits shall apply on the tax year subsequent to the year in which such notice was filed.

Currently, we have yet to decide whether to apply the benefits of the 2011 Amendment to us. There can be no assurance that we will comply with the conditions required to remain eligible for benefits under the Investment Law in the future or that we will be entitled to any additional benefits thereunder.

Taxation of our Shareholders

Capital Gains Taxes Applicable to Non-Israeli Resident Shareholders. A non-Israeli resident who derives capital gains from the sale of shares in an Israeli resident company that were purchased after the company was

Table of Contents

listed for trading on a stock exchange outside of Israel will be exempt from Israeli tax so long as the shares were not held through a permanent establishment that the non-resident maintains in Israel. However, non-Israeli corporations will not be entitled to the foregoing exemption if Israeli residents: (i) have a controlling interest of 25% or more in such non-Israeli corporation or (ii) are the beneficiaries of, or are entitled to, 25% or more of the revenues or profits of such non-Israeli corporation, whether directly or indirectly.

Additionally, a sale of securities by a non-Israeli resident may be exempt from Israeli capital gains tax under the provisions of an applicable tax treaty. For example, under Convention Between the Government of the United States of America and the Government of the State of Israel with respect to Taxes on Income, as amended (the United States-Israel Tax Treaty), the sale, exchange or other disposition of shares by a shareholder who is a United States resident (for purposes of the treaty) holding the shares as a capital asset and is entitled to claim the benefits afforded to such a resident by the U.S.-Israel Tax Treaty (a Treaty U.S. Resident) is generally exempt from Israeli capital gains tax unless: (i) the capital gain arising from such sale, exchange or disposition is attributed to real estate located in Israel; (ii) the capital gain arising from such sale, exchange or disposition is attributed to royalties; (iii) the capital gain arising from the such sale, exchange or disposition is attributed to a permanent establishment in Israel, under certain terms; (iv) such Treaty U.S. Resident holds, directly or indirectly, shares representing 10% or more of the voting capital during any part of the 12-month period preceding the disposition, subject to certain conditions; or (v) such Treaty U.S. Resident is an individual and was present in Israel for 183 days or more during the relevant taxable year.

In some instances where our shareholders may be liable for Israeli tax on the sale of their ordinary shares, the payment of the consideration may be subject to the withholding of Israeli tax at source. Shareholders may be required to demonstrate that they are exempt from tax on their capital gains in order to avoid withholding at source at the time of sale.

Taxation of Non-Israeli Shareholders on Receipt of Dividends. Non-Israeli residents are generally subject to Israeli income tax on the receipt of dividends paid on our ordinary shares at the rate of 25%, which tax will be withheld at source, unless relief is provided in a treaty between Israel and the shareholder's country of residence. With respect to a person who is a substantial shareholder at the time of receiving the dividend or on any time during the preceding twelve months, the applicable tax rate is 30%. A substantial shareholder is generally a person who alone or together with such person's relative or another person who collaborates with such person on a permanent basis, holds, directly or indirectly, at least 10% of any of the means of control of the corporation. Means of control generally include the right to vote, receive profits, nominate a director or an executive officer, receive assets upon liquidation, or order someone who holds any of the aforesaid rights how to act, regardless of the source of such right. However, a distribution of dividends to non-Israeli residents is subject to withholding tax at source at a rate of 15% if the dividend is distributed from income attributed to a Preferred Enterprise or Beneficiary Enterprise, unless a reduced tax rate is provided under an applicable tax treaty. For example, under the United States-Israel Tax Treaty, the maximum rate of tax withheld at source in Israel on dividends paid to a holder of our ordinary shares who is a Treaty U.S. Resident is 25%. However, generally, the maximum rate of withholding tax on dividends, not generated by a Preferred Enterprise or Beneficiary Enterprise, that are paid to a United States corporation holding 10% or more of the outstanding voting capital throughout the tax year in which the dividend is distributed as well as during the previous tax year, is 12.5%, provided that not more than 25% of the gross income for such preceding year consists of certain types of dividends and interest. Notwithstanding the foregoing, dividends distributed from income attributed to an Approved Enterprise, Beneficiary Enterprise or Preferred Enterprise are not entitled to such reduction under the tax treaty but are subject to a withholding tax rate of 15% for a shareholder that is a U.S. corporation, provided that the condition related to our gross income for the previous year (as set forth in the previous sentence) is met. If the dividend is attributable partly to income derived from an Approved Enterprise, Benefited Enterprise or Preferred Enterprise, and partly to other sources of income, the withholding rate will be a blended rate reflecting the relative portions of the two types of income. We cannot assure you that we will designate the profits that we may distribute in a way that will reduce shareholders' tax liability.

Table of Contents

United States Federal Income Taxation

The following is a description of the material United States federal income tax consequences of the acquisition, ownership and disposition of our ordinary shares. This description addresses only the United States federal income tax consequences to holders that are initial purchasers of our ordinary shares pursuant to the offering and that will hold such ordinary shares as capital assets. This description does not address tax considerations applicable to holders that may be subject to special tax rules, including, without limitation:

banks, financial institutions or insurance companies;

real estate investment trusts, regulated investment companies or grantor trusts;

dealers or traders in securities, commodities or currencies;

tax-exempt entities or organizations, including an individual retirement account or Roth IRA as defined in Section 408 or 408A of the Code, respectively;

certain former citizens or long-term residents of the United States;

persons that received our shares as compensation for the performance of services;

persons that will hold our shares as part of a hedging, integrated or conversion transaction or as a position in a straddle for United States federal income tax purposes;

partnerships (including entities classified as partnerships for United States federal income tax purposes) or other pass-through entities, or holders that will hold our shares through such an entity;

S corporations;

holders that acquire ordinary shares as a result of holding or owning our preferred shares;

U.S. Holders (as defined below) whose functional currency is not the U.S. Dollar; or

holders that own directly, indirectly or through attribution 10.0% or more of the voting power or value of our shares.

Moreover, this description does not address the United States federal estate, gift or alternative minimum tax consequences, or any state, local or foreign tax consequences, of the acquisition, ownership and disposition of our ordinary shares.

This description is based on the Code, existing, proposed and temporary United States Treasury Regulations and judicial and administrative interpretations thereof, in each case as in effect and available on the date hereof. All of the foregoing is subject to change, which change could apply retroactively and could affect the tax consequences described below. There can be no assurances that the U.S. Internal Revenue Service

Edgar Filing: Wix.com Ltd. - Form F-1

will not take a different position concerning the tax consequences of the acquisition, ownership and disposition of our ordinary shares or that such a position would not be sustained. Holders should consult their own tax advisers concerning the U.S. federal, state, local and foreign tax consequences of purchasing, owning and disposing of our ordinary shares in their particular circumstances.

For purposes of this description, a U.S. Holder is a beneficial owner of our ordinary shares that, for United States federal income tax purposes, is:

a citizen or resident of the United States;

a corporation (or other entity treated as a corporation for United States federal income tax purposes) created or organized in or under the laws of the United States or any state thereof, including the District of Columbia;

an estate the income of which is subject to United States federal income taxation regardless of its source; or

Table of Contents

a trust if such trust has validly elected to be treated as a United States person for United States federal income tax purposes or if (1) a court within the United States is able to exercise primary supervision over its administration and (2) one or more United States persons have the authority to control all of the substantial decisions of such trust.

A Non-U.S. Holder is a beneficial owner of our ordinary shares that is neither a U.S. Holder nor a partnership (or other entity treated as a partnership for United States federal income tax purposes).

If a partnership (or any other entity treated as a partnership for United States federal income tax purposes) holds our ordinary shares, the tax treatment of a partner in such partnership will generally depend on the status of the partner and the activities of the partnership. Such a partner or partnership should consult its tax advisor as to the particular United States federal income tax consequences of acquiring, owning and disposing of our ordinary shares in its particular circumstance.

Unless otherwise indicated, this discussion assumes that the Company is not, and will not become, a passive foreign investment company, or a PFIC, for U.S. federal income tax purposes. See *Taxation Passive Foreign Investment Company Considerations* below.

You should consult your tax advisor with respect to the United States federal, state, local and foreign tax consequences of acquiring, owning and disposing of our ordinary shares.

Distributions

If you are a U.S. Holder, the gross amount of any distribution made to you with respect to our ordinary shares before reduction for any Israeli taxes withheld therefrom, other than certain distributions, if any, of our ordinary shares distributed pro rata to all our shareholders, generally will be includible in your income as dividend income to the extent such distribution is paid out of our current or accumulated earnings and profits as determined under United States federal income tax principles. We do not expect to maintain calculations of our earnings and profits under United States federal income tax principles. Therefore, if you are a U.S. Holder you should expect that the entire amount of any distribution generally will be reported as dividend income to you. Non-corporate U.S. Holders may qualify for the lower rates of taxation with respect to dividends on ordinary shares applicable to long-term capital gains (i.e., gains from the sale of capital assets held for more than one year), provided that certain conditions are met, including certain holding period requirements and the absence of certain risk reduction transactions. However, such dividends will not be eligible for the dividends received deduction generally allowed to corporate U.S. Holders. To the extent that the amount of any distribution by us exceeds our current and accumulated earnings and profits as determined under United States federal income tax principles, it will be treated first as a tax-free return of your adjusted tax basis in our ordinary shares and thereafter as either long-term or short-term capital gain depending upon whether the U.S. Holder has held our ordinary shares for more than one year as of the time such distribution is received.

If you are a U.S. Holder, dividends paid to you with respect to our ordinary shares will be treated as foreign source income, which may be relevant in calculating your foreign tax credit limitation. Subject to certain conditions and limitations, Israeli tax withheld on dividends may be deducted from your taxable income or credited against your United States federal income tax liability. The limitation on foreign taxes eligible for credit is calculated separately with respect to specific classes of income. For this purpose, dividends that we distribute generally should constitute passive category income, or, in the case of certain U.S. Holders, general category income. A foreign tax credit for foreign taxes imposed on distributions may be denied if you do not satisfy certain minimum holding period requirements. The rules relating to the determination of the foreign tax credit are complex, and you should consult your tax advisor to determine whether and to what extent you will be entitled to this credit.

If you are a U.S. Holder, dividends paid in NIS will be included in income in a U.S. dollar amount calculated by reference to the prevailing spot market exchange rate in effect on the day the dividends are received by you, regardless of whether the NIS are converted into U.S. dollars at that time. Any foreign currency gain or

Table of Contents

loss a U.S. Holder realizes on a subsequent conversion of NIS into U.S. dollars will be U.S. source ordinary income or loss. If dividends received in NIS are converted into U.S. dollars on the day they are received, a U.S. Holder generally should not be required to recognize foreign currency gain or loss in respect of the dividend income.

Subject to the discussion below under Backup Withholding Tax and Information Reporting Requirements, if you are a Non-U.S. Holder, you generally will not be subject to United States federal income (or withholding) tax on dividends received by you on your ordinary shares, unless you conduct a trade or business in the United States and such income is effectively connected with that trade or business (or, if required by an applicable income tax treaty, the dividends are attributable to a permanent establishment or fixed base that such holder maintains in the United States).

Sale, Exchange or Other Disposition of Ordinary Shares

If you are a U.S. Holder, you generally will recognize gain or loss on the sale, exchange or other disposition of our ordinary shares equal to the difference between the amount realized on such sale, exchange or other disposition and your adjusted tax basis in our ordinary shares, and such gain or loss will be capital gain or loss. The adjusted tax basis in an ordinary share generally will be equal to the cost of such ordinary share. Except as discussed below with respect to foreign currency gain or loss, if you are a non-corporate U.S. Holder, capital gain from the sale, exchange or other disposition of ordinary shares is generally eligible for a preferential rate of taxation applicable to capital gains, if your holding period for such ordinary shares exceeds one year (i.e., such gain is long-term capital gain). The deductibility of capital losses for United States federal income tax purposes is subject to limitations under the Code. Any such gain or loss that a U.S. Holder recognizes generally will be treated as U.S. source income or loss for foreign tax credit limitation purposes.

For a cash basis taxpayer, units of foreign currency paid or received are translated into U.S. dollars at the spot rate on the settlement date of the purchase or sale. In that case, no foreign currency exchange gain or loss will result from currency fluctuations between the trade date and the settlement date of such a purchase or sale. An accrual basis taxpayer, however, may elect the same treatment required of cash basis taxpayers with respect to purchases and sales of our ordinary shares that are traded on an established securities market, provided the election is applied consistently from year to year. Such election may not be changed without the consent of the IRS. An accrual basis taxpayer who does not make such election may recognize exchange gain or loss based on currency fluctuations between the trade date and the settlement date. Any foreign currency gain or loss a U.S. Holder realizes will be U.S. source ordinary income or loss.

The determination of whether our ordinary shares are traded on an established securities market is not entirely clear under current U.S. federal income tax law. Please consult your tax advisor regarding the proper treatment of foreign currency gains or losses with respect to a sale or other disposition of our ordinary shares.

Subject to the discussion below under Backup Withholding Tax and Information Reporting Requirements, if you are a Non-U.S. Holder, you generally will not be subject to United States federal income or withholding tax on any gain realized on the sale or exchange of such ordinary shares unless:

such gain is effectively connected with your conduct of a trade or business in the United States (or, if required by an applicable income tax treaty, the gain is attributable to a permanent establishment or fixed base that such holder maintains in the United States);
or

you are an individual and have been present in the United States for 183 days or more in the taxable year of such sale or exchange and certain other conditions are met.

Passive Foreign Investment Company Considerations

If we were to be classified as a passive foreign investment company, or PFIC, in any taxable year, a U.S. Holder would be subject to special rules generally intended to reduce or eliminate any benefits from the deferral of U.S. federal income tax that a U.S. Holder could derive from investing in a non-U.S. company that does not distribute all of its earnings on a current basis.

Table of Contents

A non-U.S. corporation will be classified as a PFIC for federal income tax purposes in any taxable year in which, after applying certain look-through rules with respect to the income and assets of subsidiaries, either:

at least 75% of its gross income is passive income ; or

at least 50% of the average quarterly value of its total gross assets (which, assuming we were not a CFC for the year being tested, would be measured by fair market value of the assets, and for which purpose the total value of our assets may be determined in part by the market value of our ordinary shares, which is subject to change) is attributable to assets that produce passive income or are held for the production of passive income.

Passive income for this purpose generally includes dividends, interest, royalties, rents, gains from commodities and securities transactions, the excess of gains over losses from the disposition of assets which produce passive income, and includes amounts derived by reason of the temporary investment of funds raised in offerings of our ordinary shares. If a non-U.S. corporation owns at least 25% by value of the stock of another corporation, the non-U.S. corporation is treated for purposes of the PFIC tests as owning its proportionate share of the assets of the other corporation and as receiving directly its proportionate share of the other corporation's income. If we are classified as a PFIC in any year with respect to which a U.S. Holder owns our ordinary shares, we will continue to be treated as a PFIC with respect to such U.S. Holder in all succeeding years during which the U.S. Holder owns our ordinary shares, regardless of whether we continue to meet the tests described above.

Based on our belief that we were not a CFC prior to this offering in the current taxable year and on certain estimates of our gross income and gross assets, our intended use of the proceeds of this offering, and the nature of our business, we do not expect that we will be classified as a PFIC for the taxable year ending December 31, 2013. However, because PFIC status is based on our income, assets and activities for the entire taxable year, it is not possible to determine whether we will be characterized as a PFIC for the 2013 taxable year until after the close of the year. Moreover, we must determine our PFIC status annually based on tests which are factual in nature, and our status in future years will depend on our income, assets and activities in those years. In addition, our status as a PFIC may depend on how quickly we utilize the cash proceeds from this offering in our business. There can be no assurance that we will not be considered a PFIC for any taxable year. If we were a PFIC, and you are a U.S. Holder, then unless you make one of the elections described below, a special tax regime will apply to both (a) any excess distribution by us to you (generally, your ratable portion of distributions in any year which are greater than 125% of the average annual distribution received by you in the shorter of the three preceding years or your holding period for our ordinary shares) and (b) any gain realized on the sale or other disposition of the ordinary shares. Under this regime, any excess distribution and realized gain will be treated as ordinary income and will be subject to tax as if (a) the excess distribution or gain had been realized ratably over your holding period, (b) the amount deemed realized in each year had been subject to tax in each year of that holding period at the highest marginal rate for such year (other than income allocated to the current period or any taxable period before we became a PFIC, which would be subject to tax at the U.S. Holder's regular ordinary income rate for the current year and would not be subject to the interest charge discussed below), and (c) the interest charge generally applicable to underpayments of tax had been imposed on the taxes deemed to have been payable in those years. In addition, dividend distributions made to you will not qualify for the lower rates of taxation applicable to long-term capital gains discussed above under Distributions. Certain elections may be available that would result in an alternative treatment (such as mark-to-market treatment) of our ordinary shares.

If a U.S. Holder makes the mark-to-market election, the U.S. Holder generally will recognize as ordinary income any excess of the fair market value of the ordinary shares at the end of each taxable year over their adjusted tax basis, and will recognize an ordinary loss in respect of any excess of the adjusted tax basis of the ordinary shares over their fair market value at the end of the taxable year (but only to the extent of the net amount of income previously included as a result of the mark-to-market election). If a U.S. Holder makes the election, the U.S. Holder's tax basis in the ordinary shares will be adjusted to reflect these income or loss amounts. Any gain recognized on the sale or other disposition of ordinary shares in a year when we are a PFIC will be treated as ordinary income and any loss will be treated as an ordinary loss (but only to the extent of the net amount of income previously included as a result of the mark-to-market election). The mark-to-market election is available

Table of Contents

only if we are a PFIC and our ordinary shares are regularly traded on a qualified exchange. Our ordinary shares will be treated as regularly traded in any calendar year in which more than a de minimis quantity of the ordinary shares, are traded on a qualified exchange on at least 15 days during each calendar quarter. The is a qualified exchange for this purpose and, consequently, if the ordinary shares are regularly traded, the mark-to-market election will be available to a U.S. Holder.

We do not intend to provide the information necessary for U.S. Holders to make qualified electing fund elections if we are classified as a PFIC. U.S. Holders should consult their tax advisors to determine whether any of these elections would be available and if so, what the consequences of the alternative treatments would be in their particular circumstances.

If we are determined to be a PFIC, the general tax treatment for U.S. Holders described in this section would apply to indirect distributions and gains deemed to be realized by U.S. Holders in respect of any of our subsidiaries that also may be determined to be PFICs.

If a U.S. Holder owns ordinary shares during any year in which we are a PFIC and the U.S. Holder recognizes gain on a disposition of our ordinary shares or receives distributions with respect to our ordinary shares, the U.S. Holder generally will be required to file an IRS Form 8621 (Information Return by a Shareholder of a Passive Foreign Investment Company or Qualified Electing Fund) with respect to the company, generally with the U.S. Holder's federal income tax return for that year. Additionally, recently enacted legislation creates an additional annual filing requirement for U.S. persons who are shareholders of a PFIC. However, pursuant to recently issued guidance, this additional filing obligation is suspended until the IRS releases the relevant final form. If our company were a PFIC for a given taxable year, then you should consult your tax advisor concerning your annual filing requirements.

U.S. Holders should consult their tax advisors regarding whether we are a PFIC and the potential application of the PFIC rules.

Medicare Tax

Certain U.S. Holders that are individuals, estates or trusts are subject to a 3.8% tax on all or a portion of their net investment income, which may include all or a portion of their dividend income and net gains from the disposition of ordinary shares. Each U.S. Holder that is an individual, estate or trust is urged to consult its tax advisors regarding the applicability of the Medicare tax to its income and gains in respect of its investment in our ordinary shares.

Backup Withholding Tax and Information Reporting Requirements

United States backup withholding tax and information reporting requirements may apply to certain payments to certain holders of stock. Information reporting generally will apply to payments of dividends on, and to proceeds from the sale or redemption of, our ordinary shares made within the United States, or by a United States payor or United States middleman, to a holder of our ordinary shares, other than an exempt recipient (including a payee that is not a United States person that provides an appropriate certification and certain other persons). A payor will be required to withhold backup withholding tax from any payments of dividends on, or the proceeds from the sale or redemption of, ordinary shares within the United States, or by a United States payor or United States middleman, to a holder, other than an exempt recipient, if such holder fails to furnish its correct taxpayer identification number or otherwise fails to comply with, or establish an exemption from, such backup withholding tax requirements. Any amounts withheld under the backup withholding rules will be allowed as a credit against the beneficial owner's United States federal income tax liability, if any, and any excess amounts withheld under the backup withholding rules may be refunded, provided that the required information is timely furnished to the Internal Revenue Service.

Foreign Asset Reporting

Certain U.S. Holders who are individuals are required to report information relating to an interest in our ordinary shares, subject to certain exceptions (including an exception for shares held in accounts maintained by

Table of Contents

financial institutions) by filing IRS Form 8938 (Statement of Specified Foreign Financial Assets) with their federal income tax return. U.S. Holders are urged to consult their tax advisors regarding their information reporting obligations, if any, with respect to their ownership and disposition of our ordinary shares.

The above description is not intended to constitute a complete analysis of all tax consequences relating to acquisition, ownership and disposition of our ordinary shares. You should consult your tax advisor concerning the tax consequences of your particular situation.

Table of Contents**UNDERWRITING**

We and the selling shareholders are offering the ordinary shares described in this prospectus through a number of underwriters. J.P. Morgan Securities LLC, Merrill Lynch, Pierce, Fenner and Smith Incorporated and RBC Capital Markets, LLC are acting as joint book-running managers of the offering, and J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner and Smith Incorporated are acting as representatives of the underwriters. We and the selling shareholders expect to enter into an underwriting agreement with the representatives on behalf of the underwriters. Subject to the terms and conditions of the underwriting agreement, we and the selling shareholders will agree to sell to the underwriters, and each underwriter will severally agree to purchase, at the public offering price less the underwriting discounts and commissions set forth on the cover page of this prospectus, the number of ordinary shares listed next to its name in the following table:

Name	Number of Shares
J.P. Morgan Securities LLC	
Merrill Lynch, Pierce, Fenner & Smith Incorporated	
RBC Capital Markets, LLC	
Needham & Company, LLC	
Oppenheimer & Co. Inc.	
Total	

The underwriters will be committed to purchase all the ordinary shares offered by us and the selling shareholders if they purchase any shares. The underwriting agreement will also provide that if an underwriter defaults, the purchase commitments of non-defaulting underwriters may be increased or the offering may be terminated.

The underwriters propose to offer the ordinary shares directly to the public at the initial public offering price set forth on the cover page of this prospectus and to certain dealers at that price less a concession not in excess of \$ per share. Any such dealers may resell shares to certain other brokers or dealers at a discount of up to \$ per share from the initial public offering price. After the initial public offering of the shares, the offering price and other selling terms may be changed by the underwriters. Sales of shares made outside of the United States may be made by affiliates of the underwriters. The representatives have advised us that the underwriters do not intend to confirm discretionary sales in excess of 5% of the ordinary shares offered in this offering.

The underwriters will have an option to buy up to additional ordinary shares from us and the selling shareholders to cover sales of shares by the underwriters that exceed the number of shares specified in the table above. The underwriters will have 30 days from the date of this prospectus to exercise this option to purchase additional shares. If any shares are purchased with this option, the underwriters will purchase shares in approximately the same proportion as shown in the table above. If any additional ordinary shares are purchased, the underwriters will offer the additional shares on the same terms as those on which the shares are being offered.

Table of Contents

The underwriting discounts and commissions are equal to the public offering price per ordinary share less the amount paid by the underwriters to us and the selling shareholders per ordinary share. The underwriting discounts and commissions are \$ per share. The following table shows the per share and total underwriting discounts and commissions that we and the selling shareholders are to pay to the underwriters in connection with this offering. These amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase additional shares.

	Per Share		Total	
	Without Exercise of Option to Purchase Additional Shares	With Exercise of Option to Purchase Additional Shares	Without Exercise of Option to Purchase Additional Shares	With Exercise of Option to Purchase Additional Shares
Underwriting discounts and commissions paid by us	\$	\$	\$	\$

Underwriting discounts and commissions paid by the selling shareholders

We estimate that the total expenses of this offering, including registration, filing and listing fees, printing fees and legal and accounting expenses, but excluding the underwriting discounts and commissions, will be approximately \$ million, which includes \$ that we have agreed to reimburse the underwriters for certain FINRA-related expenses incurred by them in connection with this offering.

A prospectus in electronic format may be made available on the websites maintained by one or more underwriters, or selling group members, if any, participating in the offering. The underwriters may agree to allocate a number of shares to underwriters and selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the representatives to underwriters and selling group members that may make Internet distributions on the same basis as other allocations.

For a period of 180 days after the date of this prospectus, we will agree that we will not, subject to certain limited exceptions, (1) offer, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, or otherwise transfer or dispose of, directly or indirectly, or file with the SEC a registration statement under the Securities Act relating to, any of our ordinary shares or any securities convertible into or exercisable or exchangeable for our ordinary shares, or publicly disclose the intention to make any offer, sale, pledge, disposition or filing, or (2) enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of our ordinary shares or such other securities, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of our ordinary shares or such other securities, in cash or otherwise, without the prior written consent of J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner and Smith Incorporated.

Our directors and executive officers and holders of our ordinary shares and securities convertible into or exchangeable for our ordinary shares have entered into or will enter into lock-up agreements with the underwriters prior to the commencement of this offering pursuant to which, subject to certain limited exceptions, each of these persons or entities, for a period of 180 days after the date of this prospectus, may not, without the prior written consent of J.P. Morgan Securities LLC and Merrill Lynch, Pierce, Fenner and Smith Incorporated, (1) offer to sell, pledge, sell, contract to sell, sell any option or contract to purchase, purchase any option or contract to sell, grant any option, right or warrant to purchase, or otherwise transfer or dispose of, directly or indirectly, any of our ordinary shares or any securities convertible into or exercisable or exchangeable for our ordinary shares (including without limitation, ordinary shares or such other securities which may be deemed to be beneficially owned by such person or entity in accordance with the rules and regulations of the SEC and securities which may be issued upon exercise of a stock option or warrant), or publicly disclose the intention to make any offer, sale, pledge or disposition, (2) enter into any swap or other agreement that transfers, in whole or in part, any of the economic consequences of ownership of our ordinary shares or such other securities, whether any such transaction described in clause (1) or (2) above is to be settled by delivery of our ordinary shares or such other securities, in cash or

Table of Contents

otherwise or (3) make any demand for or exercise any right with respect to the registration of any our ordinary shares or any security convertible into or exercisable or exchangeable for our ordinary shares. These lock-up restrictions are subject to limited exceptions that are specified in the lock-up agreements.

We and the selling shareholders will agree to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act.

We have applied to list our ordinary shares for trading on the NYSE under the symbol WIX.

In connection with this offering, the underwriters may engage in stabilizing transactions, which involves making bids for, purchasing and selling our ordinary shares in the open market for the purpose of preventing or retarding a decline in the market price of our ordinary shares while this offering is in progress. These stabilizing transactions may include making short sales of the ordinary shares, which involves the sale by the underwriters of a greater number of shares of ordinary shares than they are required to purchase in this offering, and purchasing ordinary shares on the open market to cover positions created by short sales. Short sales may be covered shorts, which are short positions in an amount not greater than the underwriters' over-allotment option referred to above, or may be naked shorts, which are short positions in excess of that amount. The underwriters may close out any covered short position either by exercising their over-allotment option, in whole or in part, or by purchasing shares in the open market. In making this determination, the underwriters will consider, among other things, the price of shares available for purchase in the open market compared to the price at which the underwriters may purchase shares through the over-allotment option. A naked short position is more likely to be created if the underwriters are concerned that there may be downward pressure on the price of the ordinary shares in the open market that could adversely affect investors who purchase in this offering. To the extent that the underwriters create a naked short position, they will purchase shares in the open market to cover the position.

The underwriters have advised us that, pursuant to Regulation M promulgated under the Securities Act, they may also engage in other activities that stabilize, maintain or otherwise affect the price of the ordinary shares, including the imposition of penalty bids. This means that if the representatives of the underwriters purchase ordinary shares in the open market in stabilizing transactions or to cover short sales, the representatives can require the underwriters that sold those shares as part of this offering to repay the underwriting discount received by them.

These activities may have the effect of raising or maintaining the market price of the ordinary shares or preventing or retarding a decline in the market price of the ordinary shares, and, as a result, the price of the ordinary shares may be higher than the price that otherwise might exist in the open market. If the underwriters commence these activities, they may discontinue them at any time. The underwriters may carry out these transactions on the NYSE in the over-the-counter market or otherwise.

Prior to this offering, there has been no public market for our ordinary shares. The initial public offering price will be determined by negotiations among us, the selling shareholders and the representatives of the underwriters. In determining the initial public offering price, we, the selling shareholders and the representatives of the underwriters expect to consider a number of factors including:

the information set forth in this prospectus and otherwise available to the representatives;

our prospects and the history and prospects for the industry in which we compete;

an assessment of our management;

our prospects for future earnings;

the general condition of the securities markets at the time of this offering;

the recent market prices of, and demand for, publicly traded ordinary shares of generally comparable companies; and

other factors deemed relevant by the underwriters and us.

Table of Contents

Neither we nor the underwriters can assure investors that an active trading market will develop for our ordinary shares, or that the shares will trade in the public market at or above the initial public offering price.

Other than in the United States, no action has been taken by us or the underwriters that would permit a public offering of the securities offered by this prospectus in any jurisdiction where action for that purpose is required. The securities offered by this prospectus may not be offered or sold, directly or indirectly, nor may this prospectus or any other offering material or advertisements in connection with the offer and sale of any such securities be distributed or published in any jurisdiction, except under circumstances that will result in compliance with the applicable rules and regulations of that jurisdiction. Persons into whose possession this prospectus comes are advised to inform themselves about and to observe any restrictions relating to the offering and the distribution of this prospectus. This prospectus does not constitute an offer to sell or a solicitation of an offer to buy any securities offered by this prospectus in any jurisdiction in which such an offer or a solicitation is unlawful.

Certain of the underwriters and their affiliates have provided in the past to us and our affiliates and may provide from time to time in the future certain commercial banking, financial advisory, investment banking and other services for us and such affiliates in the ordinary course of their business, for which they have received or will receive customary fees and commissions. In addition, in the ordinary course of their business activities, the underwriters and their affiliates may make or hold a broad array of investments and actively trade debt and equity securities (or related derivative securities) and financial instruments (including bank loans) for their own account and for the accounts of their customers. Such investments and securities activities may involve securities and/or instruments of ours or our affiliates. The underwriters and their affiliates may also make investment recommendations and/or publish or express independent research views in respect of such securities or financial instruments and may hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

United Kingdom

This document is only being distributed to and is only directed at (i) persons who are outside the United Kingdom; (ii) to investment professionals falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005, which we refer to as the Order; or (iii) high net worth entities, and other persons to whom it may lawfully be communicated, falling with Article 49(2)(a) to (d) of the Order (all such persons together being referred to as relevant persons). The securities are only available to, and any invitation, offer or agreement to subscribe, purchase or otherwise acquire such securities will be engaged in only with, relevant persons. Any person who is not a relevant person should not act or rely on this document or any of its contents.

European Economic Area

In relation to each Member State of the European Economic Area which has implemented the Prospectus Directive (Relevant Member State), from and including the date on which the European Union Prospectus Directive (EU Prospectus Directive), is implemented in that Relevant Member State, which we refer to as the Relevant Implementation Date, an offer of securities described in this prospectus may not be made to the public in that Relevant Member State prior to the publication of a prospectus in relation to the shares which has been approved by the competent authority in that Relevant Member State or, where appropriate, approved in another Relevant Member State and notified to the competent authority in that Relevant Member State, all in accordance with the EU Prospectus Directive, except that it may, with effect from and including the Relevant Implementation Date, make an offer of shares to the public in that Relevant Member State at any time:

to legal entities which are authorized or regulated to operate in the financial markets or, if not so authorized or regulated, whose corporate purpose is solely to invest in securities;

to any legal entity which has two or more of (1) an average of at least 250 employees during the last financial year; (2) a total balance sheet of more than 43,000,000 and (3) an annual net turnover of more than 50,000,000, as shown in its last annual or consolidated accounts;

to fewer than 100 natural or legal persons (other than qualified investors as defined in the EU Prospectus Directive) subject to obtaining the prior consent of the book-running managers for any such offer; or

in any other circumstances which do not require the publication by the Issuer of a prospectus pursuant to Article 3 of the EU Prospectus Directive.

For the purposes of this provision, the expression an offer of securities to the public in relation to any securities in any Relevant Member State means the communication in any form and by any means of sufficient information on the terms of the offer and the securities to be offered so as to enable an investor to decide to purchase or subscribe for the securities, as the same may be varied in that Member State by any measure implementing the EU Prospectus Directive in that Member State and the expression EU Prospectus Directive means Directive 2003/71/EC and includes any relevant implementing measure in each Relevant Member State.

Hong Kong

The shares may not be offered or sold by means of any document other than (i) in circumstances which do not constitute an offer to the public within the meaning of the Companies Ordinance (Cap.32, Laws of Hong Kong), or (ii) to professional investors within the meaning of the Securities and Futures Ordinance (Cap.571, Laws of Hong Kong) and any rules made thereunder, or (iii) in other circumstances which do not result in the document being a prospectus within the meaning of the Companies Ordinance (Cap.32, Laws of Hong Kong), and no advertisement, invitation or document relating to the shares may be issued or may be in the possession of any person for the purpose of issue (in each case whether in Hong Kong or elsewhere), which is directed at, or the contents of which are likely to be accessed or read by, the public in Hong Kong (except if permitted to do so under the laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to professional investors within the meaning of the Securities and Futures Ordinance (Cap. 571, Laws of Hong Kong) and any rules made thereunder.

Singapore

This prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, this prospectus and any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares may not be circulated or distributed, nor may the shares be offered or sold, or be made the subject of an invitation for subscription or purchase, whether directly or indirectly, to persons in Singapore other than (i) to an institutional investor under Section 274 of the Securities and Futures Act, Chapter 289 of Singapore, or the SFA, (ii) to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions, specified in Section 275 of the SFA or (iii) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 by a relevant person which is: (a) a corporation (which is not an accredited investor) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary is an accredited investor, shares, debentures and units of shares and debentures of that corporation or the beneficiaries' rights and interest in that trust shall not be transferable for 6 months after that corporation or that trust has acquired the shares under Section 275 except: (1) to an institutional investor under Section 274 of the SFA or to a relevant person, or any person pursuant to Section 275(1A), and in accordance with the conditions, specified in Section 275 of the SFA; (2) where no consideration is given for the transfer; or (3) by operation of law.

Switzerland

This document, as well as any other material relating to our ordinary shares, which are the subject of the offering contemplated by this prospectus, does not constitute an issue prospectus pursuant to Article 652a of the Swiss Code of Obligations. The shares will not be listed on the SIX Swiss Exchange and, therefore, the

Table of Contents

documents relating to the shares, including, but not limited to, this document, do not claim to comply with the disclosure standards of the listing rules of SIX Swiss Exchange and corresponding prospectus schemes annexed to the listing rules of the SIX Swiss Exchange.

The shares are being offered in Switzerland by way of a private placement, i.e., to a small number of selected investors only, without any public offer and only to investors who do not purchase the shares with the intention to distribute them to the public. The investors will be individually approached by us from time to time.

Notice to Prospective Investors in the Dubai International Financial Centre

This prospectus supplement relates to an Exempt Offer in accordance with the Offered Securities Rules of the Dubai Financial Services Authority (DFSA). This prospectus supplement is intended for distribution only to persons of a type specified in the Offered Securities Rules of the DFSA. It must not be delivered to, or relied on by, any other person. The DFSA has no responsibility for reviewing or verifying any documents in connection with Exempt Offers. The DFSA has not approved this prospectus supplement nor taken steps to verify the information set forth herein and has no responsibility for the prospectus supplement. The shares to which this prospectus supplement relates may be illiquid and/or subject to restrictions on their resale. Prospective purchasers of the shares offered should conduct their own due diligence on the shares. If you do not understand the contents of this prospectus supplement you should consult an authorized financial advisor.

Table of Contents

LEGAL MATTERS

The validity of the ordinary shares being offered by this prospectus and other legal matters concerning this offering relating to Israeli law will be passed upon for us by Israeli, Ben-Zvi, Attorneys at Law, Tel Aviv, Israel. Certain legal matters in connection with this offering relating to U.S. law will be passed upon for us by White & Case LLP, New York, New York. Certain legal matters in connection with this offering will be passed upon for the underwriters by Meitar Liquornik Geva Leshem Tal, Ramat Gan, Israel, with respect to Israeli law, and by Wilson Sonsini Goodrich & Rosati, Professional Corporation, Washington, D.C. with respect to U.S. law.

EXPERTS

The consolidated financial statements as of December 31, 2012 and 2011 and for each of the three years in the period ended December 31, 2012, appearing in this prospectus and the registration statement of which this prospectus forms a part, have been so included in reliance on the reports of Kost, Forer, Gabbay and Kasierer, a member of Ernst & Young Global, independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting. The offices of Kost, Forer, Gabbay and Kasierer are located at 3 Aminadav St., Tel-Aviv, 67067 Israel.

ENFORCEABILITY OF CIVIL LIABILITIES

We are incorporated under the laws of the State of Israel. Service of process upon us and upon our directors and officers and any Israeli experts named in this registration statement, most of whom reside outside of the United States, may be difficult to obtain within the United States. Furthermore, because a majority of our assets and most of our directors and officers are located outside of the United States, any judgment obtained in the United States against us or certain of our directors and officers may be difficult to collect within the United States.

We have been informed by our legal counsel in Israel, Israeli, Ben-Zvi, Attorneys at Law, that it may be difficult to assert U.S. securities laws claims in original actions instituted in Israel. Israeli courts may refuse to hear a claim based on a violation of U.S. securities laws because Israel is not the most appropriate forum in which to bring such a claim. In addition, even if an Israeli court agrees to hear a claim, it may determine that Israeli law and not U.S. law is applicable to the claim. If U.S. law is found to be applicable, the content of applicable U.S. law must be proven as a fact which can be a time-consuming and costly process. Matters of procedure will also be governed by Israeli law.

We have irrevocably appointed Wix.com, Inc., as our agent to receive service of process in any action against us in any United States federal or state court arising out of this offering or any purchase or sale of securities in connection with this offering. Subject to specified time limitations and legal procedures, Israeli courts may enforce a United States judgment in a civil matter which is non-appealable, including a judgment based upon the civil liability provisions of the Securities Act or the Exchange Act and including a monetary or compensatory judgment in a non-civil matter, provided that, among other things:

the judgment is obtained after due process before a court of competent jurisdiction, according to the laws of the state in which the judgment is given and the rules of private international law prevailing in Israel;

the prevailing law of the foreign state in which the judgment is rendered allows for the enforcement of judgments of Israeli courts;

adequate service of process has been effected and the defendant has had a reasonable opportunity to be heard and to present his or her evidence;

the judgment is not contrary to public policy of Israel, and the enforcement of the civil liabilities set forth in the judgment is not likely to impair the security or sovereignty of Israel;

Table of Contents

the judgment was not obtained by fraud and does not conflict with any other valid judgment in the same matter between the same parties;

an action between the same parties in the same matter was not pending in any Israeli court at the time at which the lawsuit was instituted in the foreign court; and

the judgment is enforceable according to the laws of Israel and according to the law of the foreign state in which the relief was granted.

If a foreign judgment is enforced by an Israeli court, it generally will be payable in Israeli currency, which can then be converted into non-Israeli currency and transferred out of Israel. The usual practice in an action before an Israeli court to recover an amount in a non-Israeli currency is for the Israeli court to issue a judgment for the equivalent amount in Israeli currency at the rate of exchange in force on the date of the judgment, but the judgment debtor may make payment in foreign currency. Pending collection, the amount of the judgment of an Israeli court stated in Israeli currency ordinarily will be linked to the Israeli consumer price index plus interest at the annual statutory rate set by Israeli regulations prevailing at the time. Judgment creditors must bear the risk of unfavorable exchange rates.

WHERE YOU CAN FIND ADDITIONAL INFORMATION

We have filed with the Securities and Exchange Commission a registration statement on Form F-1 under the Securities Act relating to this offering of our ordinary shares. This prospectus does not contain all of the information contained in the registration statement. The rules and regulations of the Securities and Exchange Commission allow us to omit certain information from this prospectus that is included in the registration statement. Statements made in this prospectus concerning the contents of any contract, agreement or other document are summaries of all material information about the documents summarized, but are not complete descriptions of all terms of these documents. If we filed any of these documents as an exhibit to the registration statement, you may read the document itself for a complete description of its terms.

You may read and copy the registration statement, including the related exhibits and schedules, and any document we file with the Securities and Exchange Commission without charge at the Commission's public reference room at 100 F Street, N.E., Room 1580, Washington, D.C. 20549. You may also obtain copies of the documents at prescribed rates by writing to the Public Reference Section of the Securities and Exchange Commission at 100 F Street, N.E., Room 1580, Washington, DC 20549. Please call the Securities and Exchange Commission at 1-800-SEC-0330 for further information on the public reference room. The Securities and Exchange Commission also maintains an Internet website that contains reports and other information regarding issuers that file electronically with the Commission. Our filings with the Securities and Exchange Commission are also available to the public through the Commission's website at <http://www.sec.gov>.

We are not currently subject to the informational requirements of the Exchange Act. Upon completion of this offering, we will be subject to the information reporting requirements of the Exchange Act that are applicable to foreign private issuers, and under those requirements will file reports with the Securities and Exchange Commission. Those other reports or other information may be inspected without charge at the locations described above. As a foreign private issuer, we will be exempt from the rules under the Exchange Act related to the furnishing and content of proxy statements, and our officers, directors and principal shareholders will be exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. In addition, we will not be required under the Exchange Act to file annual, quarterly and current reports and financial statements with the Securities and Exchange Commission as frequently or as promptly as United States companies whose securities are registered under the Exchange Act. However, we will file with the Securities and Exchange Commission, within four months after the end of each fiscal year, or such applicable time as required by the Commission, an annual report on Form 20-F containing financial statements audited by an independent registered public accounting firm, and will submit to the Commission, on Form 6-K, unaudited quarterly financial information for the first three quarters of each fiscal year within 60 days after the end of each such quarter, or such applicable time as required by the Commission.

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of

WIX.COM LTD. (FORMERLY: WIXPRESS LTD.)

We have audited the accompanying consolidated balance sheets of Wix.com Ltd. (formerly: Wixpress Ltd.) (the Company) and its subsidiaries as of December 31, 2011 and 2012, and the related consolidated statements of operations and comprehensive loss, changes in shareholders equity (deficiency) and cash flows for each of the three years in the period ended December 31, 2012. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement. We were not engaged to perform an audit of the Company's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall consolidated financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the consolidated financial position of the Company and its subsidiaries as of December 31, 2011 and 2012, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2012, in conformity with U.S. generally accepted accounting principles.

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

U.S. dollars in thousands (except share and per share data)

NOTE 1: GENERAL

- a. Wix.com Ltd. (formerly: Wixpress Ltd.) (the Company) was incorporated on October 5, 2006, under the laws of the State of Israel, and commenced operations on the same date.

The Company develops and markets a solution that allows users to create web content.

- b. On January 8, 2008, the Company established a wholly-owned subsidiary in the United States under the name of Wix.Com, Inc. (the U.S. Subsidiary), which is engaged primarily in customer support and marketing the Company's service. In November 2011, the Company also established a wholly-owned subsidiary in Brazil under the name Wixpress Brazil Serviços de Internet Ltda (the Brazilian Subsidiary). The Brazilian Subsidiary commenced operations in 2012.

NOTE 2: SIGNIFICANT ACCOUNTING POLICIES

The consolidated financial statements have been prepared in accordance with U.S. generally accepted accounting principles (U.S. GAAP).

- a. Use of estimates:

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates, judgments and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The Company evaluates on an ongoing basis its assumptions, including those related to contingencies, income taxes, deferred taxes and liabilities, share-based compensation cost, as well as in estimates used in applying the revenue recognition policy. The Company's management believes that the estimates, judgment and assumptions used are reasonable based upon information available at the time they are made. These estimates, judgments and assumptions can affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the dates of the consolidated financial statements, and the reported amounts of revenue and expenses during the reporting periods. Actual results could differ from those estimates.

- b. Principles of consolidation:

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiaries. Intercompany transactions and balances, have been eliminated upon consolidation.

- c. Unaudited Interim Financial Information:

The accompanying consolidated balance sheet as of June 30, 2013, the consolidated statements of operations and comprehensive loss and cash flows for the six months ended June 30, 2012 and 2013 and the shareholders' deficiency for the six months ended June 30, 2013 are unaudited. The unaudited interim financial statements have been prepared on the same basis as the annual consolidated statements and, in the opinion of management, reflect all adjustments, which include only normal recurring adjustments, necessary to present fairly the Company's financial position and results of operations and cash flows for the six months ended June 30, 2012 and 2013. The financial data and the other information disclosed in these notes to the consolidated financial statements related to the six month periods are unaudited. The results of the six months ended June 30, 2013 are not necessarily indicative of the results to be expected for the fiscal year ending December 31, 2013 or for any other interim period or for any other future year.

Table of Contents

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

d. Unaudited pro forma shareholders' equity:

The Company's board of directors has authorized the filing of a Registration Statement with the U.S. Securities and Exchange Commission to register the Company's Ordinary shares for sale to the public. Upon the closing of the Company's proposed initial public offering (the "IPO") as described in note 8.b.2, all of the authorized, issued, and outstanding Preferred shares will be automatically converted into Ordinary shares. Unaudited pro forma shareholders' equity as of June 30, 2013, as adjusted for the assumed conversion of such shares, is disclosed in the balance sheet.

e. Financial statements in U.S. dollars:

A majority of the Company's revenues are generated in U.S. dollars. In addition, the equity investments were in U.S. dollars and substantial portion of the Company costs are incurred in U.S. dollars. The Company's management believes that the U.S. dollar is the currency of the primary economic environment in which the Company operates. Thus, the functional and reporting currency of the Company is the U.S. dollar.

Accordingly, monetary accounts maintained in currencies other than the U.S. dollar are remeasured into U.S. dollars in accordance with Statement of the Accounting Standard Codification ("ASC") No. 830 "Foreign Currency Matters" ("ASC No. 830"). All transaction gains and losses of the remeasured monetary balance sheet items are reflected in the statement of comprehensive loss as financial income or expenses, as appropriate.

The functional currency of the U.S. Subsidiary is the U.S. dollar.

The functional currency of the Brazilian Subsidiary is the Brazilian Real (BRL). The Brazilian Subsidiary commenced its operation in 2012. All amounts on the Brazilian Subsidiary's balance sheets have been translated into the U.S. dollar using the exchange rates in effect on the relevant balance sheet dates. All amounts in the Brazilian Subsidiary's statements of operations have been translated into the U.S. dollar using the average exchange rate for the respective period on which those transactions are recorded. The resulting translation adjustments were not reported as a component in comprehensive income (loss) statement as of December 31, 2012, due to immateriality.

f. Cash and cash equivalents:

Cash equivalents are short-term highly liquid investments that are readily convertible to cash with original maturities of three months or less, at the date acquired.

g. Restricted deposits:

Restricted deposits are deposits with maturities of more than one month and up to one year. As of December 31, 2011, 2012 and June 30, 2013 (unaudited) the Company's bank deposits were in U.S. dollars and New Israel Shekels (NIS) and bore interest at weighted average interest rates of 0.46%, 0.38% and 0.25% (unaudited), respectively. Restricted deposits are presented at their cost, including accrued interest. These deposits are used as security for the rental of premises, for the Company's credit cards, and as a security for the Company's hedging activities.

Table of Contents**WIX.COM LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****U.S. dollars in thousands (except share and per share data)**

h. Property and equipment:

Property and equipment are stated at cost, net of accumulated depreciation. Depreciation is calculated using the straight-line method over the estimated useful lives of the assets at the following annual rates:

	%
Computers, peripheral equipment and electronic equipment	15 - 33
Office furniture and equipment	6 - 14
Leasehold improvements	Over the shorter of the related lease period or the life of the asset

i. Long-lived assets:

The long-lived assets of the Company and its subsidiaries are reviewed for impairment in accordance with ASC No. 360, Property, Plant and Equipment (ASC No. 360), whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the future undiscounted cash flows expected to be generated by the assets. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. During 2010, 2011 and 2012 and the six months period ended June 30, 2013 (unaudited), no impairment losses have been identified.

j. Derivatives instruments:

ASC No. 815, Derivative and Hedging, requires companies to recognize all of their derivative instruments as either assets or liabilities in the statement of financial position at fair value.

The Company enters into certain foreign exchange transactions to hedge a portion of its payments in NIS. Gains and losses related to such derivative instruments are recorded in financial income (expenses), net, since they do not qualify for hedge accounting treatment. As of December 31, 2011, 2012 and June 30, 2013 (unaudited), the aggregate notional amounts of these hedging contracts were \$ 10,000 and \$ 13,000 and \$ 8,100 (unaudited), respectively. The foreign exchange transactions will expire through October 2013.

The fair value of derivative instruments as of December 31, 2012 and June 30, 2013 (unaudited) totaled \$ 436 and \$ 345 (unaudited), and are presented as part of prepaid expenses and other current assets. The fair value of derivative instruments balance as of December 31, 2011 totaled \$ 240 and are presented as accrued expenses and other current liabilities.

In the years ended December 31, 2010, 2011 and 2012 and the six months periods ended June 30, 2012 (unaudited) and 2013 (unaudited), the Company recorded net financial income (expenses) from hedging transactions in the amount of \$ 19, \$ 239 and \$ (485), \$ (63) (unaudited) and \$ 21 (unaudited) respectively.

k. Severance pay:

The Israeli Severance Pay Law, 1963 (Severance Pay Law), specifies that employees are entitled to severance payment, following the termination of their employment. Under the Severance Pay Law, the severance payment is calculated as one month salary for each year of employment, or a portion thereof.

Table of Contents

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

The majority of the Company's liability for severance pay is covered by the provisions of Section 14 of the Severance Pay Law (Section 14). Under Section 14 employees are entitled to monthly deposits, at a rate of 8.33% of their monthly salary, continued on their behalf to their insurance funds. Payments in accordance with Section 14 release the Company from any future severance payments in respect of those employees. As a result, the Company does not recognize any liability for severance pay due to these employees and the deposits under Section 14 are not recorded as an asset in the Company's balance sheet.

For the Company's employees in Israel who are not subject to section 14, the Company calculated the liability for severance pay pursuant to the Severance Pay Law based on the most recent salary of these employees multiplied by the number of years of employment as of the balance sheet date. The Company's liability for these employees is fully provided for via monthly deposits with severance pay funds, insurance policies and an accrual. The value of these deposits is recorded as an asset on the Company's balance sheet.

Severance expense for the years ended December 31, 2010, 2011 and 2012 and the six months period ended June 30, 2012 (unaudited) and 2013 (unaudited), amounted to \$ 479 \$ 881 and \$ 1,117, \$ 530 (unaudited) and \$ 741 (unaudited) respectively.

l. U.S. employees defined contribution plan:

The U.S. Subsidiary has a 401(K) defined contribution plan covering certain employees in the U.S. All eligible employees may elect to contribute up to 100%, but generally not greater than \$ 17 per year (for certain employees over 50 years of age the maximum contribution is \$ 22 per year), of their annual compensation to the plan through salary deferrals, subject to Internal Revenue Service limits.

The U.S. Subsidiary matches 4% of employee contributions up to the plan with no limitation. During the year ended December 31, 2012 the U.S. Subsidiary recorded expenses for matching contributions in amounts of \$ 41. No expenses for matching contributions were recorded in 2010 and 2011.

m. Revenue recognition:

The Company provides an online platform that enables users to create websites using Flash and HTML5 technology and generates revenues primarily from services related to such websites. The Company also offers its users the ability to purchase and manage domain name and software apps that can be integrated as add-ons to their websites.

The Company recognizes revenues in accordance with ASC No. 605-10-S99, (SEC Staff Accounting Bulletin (SAB) No. 104, Revenue Recognition), when (i) persuasive evidence of an arrangement exists, (ii) delivery has occurred or services have been rendered to the customer, (iii) the fee is fixed or determinable, and (iv) collectability is reasonably assured.

Revenues related to services for websites and, purchase and registration of domain names, are recognized ratably over the term of the service period. Revenues related to software applications developed by third party app developers are recognized when earned. The Company accounts for such sales on a net basis by recognizing the commission it retains from each sale. The portion of the gross amount billed to customers that is remitted by the Company to third-party app developers is not reflected in the Company's consolidated statements of operations and comprehensive loss.

Table of Contents

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

The Company offers a 14-day money back guaranty (Guaranty Period). The Company considers such amounts collected from new premium subscriptions as customer deposits until the end of the 14-day trial period. Revenues are recognized once the Guaranty Period has expired.

Although, in general, the Company does not grant rights of refund, there are certain instances where such refunds occur. Since the Company collects most of its revenues via online credit card billing, a small portion of its users elect to chargeback due to disputes over the credit card statements and/or claims of false transaction, and accordingly ask for refunds. The Company maintains a provision for chargebacks and refunds in accordance with ASC No. 605, Revenue Recognition , which is estimated, based primarily on historical experience as well as management judgment, and is recorded through a reduction of revenue.

Deferred service revenues primarily include unearned amounts received from customers but not recognized as revenues.

Part of the Company s revenue transaction includes multiple elements within a single contract if it is determined that multiple units of accounting exist.

Commencing January 1, 2011, the Company adopted Accounting Standards Update (ASU) No. 2009-13, Multiple-Deliverable Revenue Arrangements, (amendments to ASC Topic 605, Revenue Recognition) (ASU No. 2009-13) . ASU No. 2009-13 requires entities to allocate revenues in an arrangement using estimated selling prices of the delivered goods and services based on a selling price hierarchy. The amendments eliminate the residual method of revenue allocation and require revenues to be allocated using the relative selling price method.

The primary types of transactions in which the Company engages for which ASU No. 2009-13 is applicable are agreements that include multiple elements which are delivered at different points in time. Such elements may include some or all of the following:

Services for websites;

Purchase and registration of domain name; and

Third-party developed applications.

The Company considers the sale of each of the above stated elements in bundled agreement to be a separate unit of accounting for the arrangement and defers the relative selling price of the undelivered element to the period in which revenue is earned.

Pursuant to the guidance under ASU No. 2009-13, when a sales arrangement contains multiple elements, the Company allocates revenues to each element based on a selling price hierarchy. The selling price for a deliverable is based on its VSOE if available, third-party evidence (TPE) if VSOE is not available, or estimated selling price (ESP) if neither VSOE nor TPE is available. VSOE of selling price is based on the price charged when the element is sold separately. In determining VSOE, it is required that a substantial majority of the selling prices fall within a reasonable range based on historical discounting trends for specific services. TPE of selling price is established by evaluating largely interchangeable competitor services in stand-alone sales to similarly situated customers.

Website service and domain name registrations are sold separately and therefore the selling price is based on VSOE.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

n. Research and development costs:

Research and development costs are charged to the statements of operations and comprehensive loss as incurred. ASC 985-20, Software- Costs of Software to Be Sold, Leased, or Marketed, requires capitalization of certain software development costs subsequent to the establishment of technological feasibility.

Based on the Company's product development process, technological feasibility is established upon completion of a working model. Costs incurred by the Company between completion of the working models and the point at which the products are ready for general release, have been insignificant. Therefore, all research and development costs are expensed as incurred.

o. Advertising expenses:

Advertising expenses consist primarily of cost-per click expenses, social networking expenses, marketing campaigns and display advertisements. Advertising expenses are charged to the statement of operations and comprehensive loss, as incurred. Advertising expenses for the years ended December 31, 2010, 2011 and 2012 and the six months ended June 30, 2012 (unaudited) and 2013 (unaudited), amounted to \$ 6,398, \$ 15,914 and \$ 21,473, \$ 9,748 (unaudited) and \$ 17,239 (unaudited), respectively.

p. Share-based compensation:

The Company accounts for share-based compensation in accordance with ASC 718, Compensation Stock Compensation (ASC No. 718). ASC No. 718 requires companies to estimate the fair value of equity-based payment awards on the date of grant using an option-pricing model. The value of the portion of the award that is ultimately expected to vest is recognized as an expense over the requisite service periods in the Company's consolidated statements of operations and comprehensive loss.

The Company recognizes compensation expenses for the value of its awards granted based on the straight line method over the requisite service period of each of the awards, net of estimated forfeitures. ASC No. 718 requires forfeitures to be estimated at the time of grant and revised, if necessary, in subsequent periods if actual forfeitures differ from those estimates.

The Company selected the Black-Scholes option-pricing model as the most appropriate fair value method for its option awards. The option-pricing model requires a number of assumptions, of which the most significant are the expected share price, volatility and the expected option term.

The fair value of ordinary share underlying the options has historically been determined by management and approved by the Company's board of directors. Because there has been no public market for the Company's ordinary shares, the management has determined fair value of an ordinary share at the time of grant of the option by considering a number of objective and subjective factors including financing investment rounds, operating and financial performance, the lack of liquidity of share capital and general and industry specific economic outlook, amongst other factors. The fair value of the underlying ordinary shares will be determined by management until such time as the Company's ordinary shares are listed on an established stock exchange. The Company's management determined the fair value of ordinary shares based on valuations performed using the Option Pricing Method (OPM) for the years ended December 31, 2010, 2011 and 2012.

Table of Contents

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

The Company applies ASC No. 718 and ASC No. 505-50 Equity Based Payments to Non-Employees (ASC No. 505-50) with respect to options and warrants issued to non-employees consultants. ASC No. 718 requires the use of option valuation models to measure the fair value of the options and warrants at the date of grant.

q. Income taxes:

The Company accounts for income taxes in accordance with ASC No. 740, Income Taxes . This codification prescribes the use of the asset and liability method whereby deferred tax asset and liability account balances are determined based on differences between financial reporting and tax bases of assets and liabilities and for carry-forward tax losses. Deferred taxes are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. The Company provides a valuation allowance, if necessary, to reduce deferred tax assets to their estimated realizable value if it is more likely than not that some portion or all of the deferred tax asset will not be realized.

Deferred tax liabilities and assets are classified as current or non-current based on the classification of the related asset or liability for financial reporting, or according to the expected reversal dates of the specific temporary differences, if not related to an asset or liability for financial reporting.

The Company accounts for uncertain tax positions in accordance with the provisions of ASC 740, Income Taxes . Accounting guidance addresses the determination of whether tax benefits claimed or expected to be claimed on a tax return should be recorded in the consolidated financial statements, under which a company may recognize the tax benefit from an uncertain tax position only if it is more likely than not that the tax position will be sustained on examination by the taxing authorities, based on the technical merits of the position.

The tax benefits recognized in the consolidated financial statements from such a position should be measured based on the largest benefit that has a greater than fifty percent likelihood of being realized upon ultimate settlement. Accordingly, the Company reports a liability for unrecognized tax benefits resulting from uncertain tax positions taken or expected to be taken in a tax return. The Company recognizes interest and penalties, if any, related to unrecognized tax benefits in tax expense. The Company did not record a provision due to immateriality.

r. Basic and diluted net loss per share:

The Company applies the two class method as required by ASC No. 260-10, Earnings Per Share (ASC No. 260-10). ASC 260-10 requires the income or loss per share for each class of shares (ordinary and preferred shares) to be calculated assuming 100% of the Company's earnings are distributed as dividends to each class of shares based on their contractual rights. No dividends were declared or paid during the reported periods.

According to the provisions of ASC No. 260-10, the Company's preferred shares are not participating securities in losses and, therefore, are not included in the computation of net loss per share.

Basic and diluted net loss per share is computed based on the weighted-average number of shares of ordinary shares outstanding during each year. Diluted loss per share is computed based on the weighted average number of ordinary shares outstanding during the period, plus dilutive potential shares considered outstanding during the period, in accordance with

Table of Contents

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

ASC 260-10. Basic and diluted net loss per share of ordinary shares was the same for each period presented as the inclusion of all potential ordinary shares outstanding was anti-dilutive.

For the years ended December 31, 2010, 2011 and 2012 and the six months periods ended June 30, 2012 (unaudited) and 2013 (unaudited), all outstanding preferred shares and options have been excluded from the calculation of the diluted net loss per share since their effect was anti-dilutive and the total preferred shares and options that have been excluded from the calculations was 8,380,564, 9,721,734, 9,830,694, 9,823,786 (unaudited) and 9,991,133 (unaudited), respectively.

Basic and diluted pro forma net loss per share (unaudited), as presented in the statements of operations and comprehensive loss, has been calculated as described above and also gives effect to the automatic conversion of all series of preferred shares that will occur upon closing of the Initial Public Offering (IPO).

s. Comprehensive income (loss):

The Company accounts for comprehensive income (loss) in accordance with Accounting Standards Codification No. 220, Comprehensive Income (ASC No. 220). This statement establishes standards for the reporting and display of comprehensive income (loss) and its components in a full set of general purpose financial statements. Comprehensive income (loss) generally represents all changes in shareholders' equity during the period except those resulting from investments by, or distributions to shareholders.

For the year ended December 31, 2012, the Company determined that its items of comprehensive income (loss) relate to functional currency translation, the resulting translation adjustments were not reported as a component of other comprehensive income in shareholders' equity, due to immateriality.

t. Concentration of credit risks:

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of cash and cash equivalents and restricted deposits.

The majority of the Company's and its subsidiaries' cash and cash equivalents and restricted deposits are invested with major bank in Israel, Brazil and the United States. Such investments in the United States may be in excess of insured limits and are not insured in other jurisdictions. Generally, these investments may be redeemed upon demand and, therefore, bear minimal risk.

u. Fair value of financial instruments:

The estimated fair value of financial instruments has been determined by the Company using available market information and valuation methodologies. Considerable judgment is required in estimating fair values. Accordingly, the estimates may not be indicative of the amounts the Company could realize in a current market exchange.

The following methods and assumptions were used by the Company in estimating the fair value of their financial instruments:

The carrying values of cash and cash equivalents, restricted deposits, trade receivables, prepaid expenses and other current assets, trade payables, employees and payroll accruals and accrued expenses and other current liabilities approximate fair values due to the short-term maturities of these instruments.

Table of Contents

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

The Company applies ASC No. 820, Fair Value Measurements and Disclosures (ASC No. 820), with respect to fair value measurements of all financial assets and liabilities.

The fair value of foreign currency contracts (used for hedging purposes) is estimated by obtaining current quotes from banks and third party valuations.

Fair value is an exit price, representing the amount that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants. As such, fair value is a market-based measurement that should be determined based on assumptions that market participants would use in pricing an asset or a liability. A three-tier fair value hierarchy is established as a basis for considering such assumptions and for inputs used in the valuation methodologies in measuring fair value:

- Level 1 Observable inputs that reflect quoted prices (unadjusted) for identical assets or liabilities in active markets.

- Level 2 Include other inputs that are directly or indirectly observable in the marketplace.

- Level 3 Unobservable inputs which are supported by little or no market activity. The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

The fair value hierarchy also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value.

In accordance with ASC 820, the Company measures its foreign currency derivative contracts, at fair value using the market approach valuation technique. Foreign currency derivative contracts as detailed in note 2.j are classified within Level 2 value hierarchy, as the valuation inputs are based on quoted prices and market observable data of similar instruments.

- v. The impact of recently issued accounting standards still not effective for the Company as of December 31, 2012 is as follows:

In December 2011, the FASB issued ASU No. 2011-11, Balance Sheet (210): Disclosures about Offsetting Assets and Liabilities, which requires additional disclosures about the nature of an entity's rights of setoff and related arrangements associated with its financial instruments and derivative instruments. The disclosure requirements are effective for annual reporting periods beginning on or after January 1, 2013, and interim periods therein, with retrospective application required. In January 2013, the FASB issued Accounting Standard Update No. 2013-01, Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. The Company believes that the adoption of both the standard and the update will not have a material impact on its consolidated financial statements.

NOTE 3: PREPAID EXPENSES AND OTHER CURRENT ASSETS

Edgar Filing: Wix.com Ltd. - Form F-1

NOTE 4: PROPERTY AND EQUIPMENT

The composition of property and equipment is as follows:

	December 31, 2011	December 31, 2012	June 30, 2013 Unaudited
Cost:			
Leasehold improvements	\$ 1,803	\$ 2,219	\$ 2,893
Computers, peripheral equipment and electronic equipment	977	1,424	1,766
Office furniture and equipment	198	264	325
	2,978	3,907	4,984
Less accumulated depreciation	768	1,625	2,160
Depreciated cost	\$ 2,210	\$ 2,282	\$ 2,824

Depreciation expense amounted to \$ 119, \$ 592, \$ 871, \$ 403 (unaudited) and \$ 535 (unaudited) for the years ended December 31, 2010, 2011 and 2012 and the six months periods ended June 30, 2012 (unaudited) and 2013 (unaudited), respectively.

During 2011, the Company moved to new offices. As a result the Company abandoned its former offices and recognized a capital loss of \$ 127 due to the disposal of leasehold improvements.

NOTE 5: ACCRUED EXPENSES AND OTHER CURRENT LIABILITIES

	December 31, 2011	December 31, 2012	June 30, 2013 Unaudited
Accrued expenses	\$ 2,102	\$ 3,162	\$ 5,316
Hedging transaction liability	240		
Deferred tax liability	75	56	56
	\$ 2,417	\$ 3,218	\$ 5,372

NOTE 6: CREDIT LINE (UNAUDITED)

On June 24, 2013, the Company entered into a credit line agreement with Silicon Valley Bank (the Lender) pursuant to which the Lender agreed to make a \$ 10,000 line of credit available to the Company until December 31, 2014 (the Credit Line). The utilized amount of the Credit Line should be paid back to the Lender at the earlier of December 31, 2014 or upon termination of the Credit Line agreement by each of the parties, as specified in the Credit Line agreement.

Edgar Filing: Wix.com Ltd. - Form F-1

The credit bears U.S. dollar denominated interest at annual equals to the prime rate as quoted in the Wall Street Journal print edition (Prime Rate) plus 2.25% over the utilized amount of the Credit Line and 0.4% over the unutilized portion of the Credit Line. The Credit Line also includes certain affirmative and negative covenants as further described in the Credit Line agreement.

As part of the credit line Agreement, the Company issued to the Lender 9,766 warrants to purchase Series E Preferred shares of the Company at an exercise price of \$ 20.48 per share. The warrants are can be exercised for a 7 year term.

F-17

Table of Contents**WIX.COM LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****U.S. dollars in thousands (except share and per share data)**

In connection with the issue of the warrants the Company recorded \$ 273 Share-based compensation expenses, which were recorded as financial expenses in the Company's consolidated statements of operations and comprehensive loss.

NOTE 7: COMMITMENTS AND CONTINGENT LIABILITIES

a. Lease commitments:

The Company and its U.S. Subsidiary rent their facilities under various operating lease agreements, which expire through 2016. In addition the Company leases certain motor vehicles under certain car operating lease agreement which expire through 2016. The minimum rental payments under operating leases as of December 31, 2012, are as follows:

	Rental of premises	Lease of motor vehicles
2013	\$ 1,482	\$ 288
2014	1,311	152
2015	1,311	50
2016	109	1
	\$ 4,213	\$ 491

Total rent expenses for the years ended December 31, 2010, 2011 and 2012 were approximately \$ 222, \$ 869 and \$ 1,376, respectively.

Total motor vehicle lease expenses for the years ended December 31, 2010, 2011 and 2012 were approximately \$ 132, \$ 185 and \$ 272, respectively.

b. Pledges:

The Company obtained bank guarantee in the amount of \$ 2,202, in connection with an office lease agreement, credit cards and hedging transactions.

c. Legal contingencies:

The Company is currently involved in various claims and legal proceedings. The Company reviews the status of each matter and assesses its potential financial exposure. If the potential loss from any claim or legal proceeding is considered probable and the amount can be reasonably estimated, the Company accrues a liability for the estimated loss. These accruals are reviewed at least quarterly and adjusted to reflect the impact of negotiations, settlements, rulings, advice of legal counsel and other information and events pertaining to a particular matter.

The Company is subject to a patent infringement litigation that was filed against it (and many other entities) on December 7, 2012 by CreateAds LLC. The complaint was filed in the United States District Court for the District of Delaware and alleges infringement of a U.S. Patent. The

Edgar Filing: Wix.com Ltd. - Form F-1

Company filed a motion to dismiss the complaint in its entirety. The plaintiff opposed the motion. No schedule has been set by the court and it is expected that any trial in the matter would likely not occur until sometime in 2014 or after. The patent-in-suit expires in 2014, although if the plaintiff prevails, it could seek damages, including damages up to three times the amount found or assessed, with respect to our sales since inception and require us to license the

	15,000,000	9,942,564	15,000,000	10,011,983	15,000,000	10,059,409

- b. 1. Ordinary Shares:

The ordinary shares of the Company confer on the holders thereof voting rights, rights to receive dividends and rights to participate in distribution of assets upon liquidation after all the preferred shares received their preference amount in full as detailed below.

2. Preferred Shares:

The Series A, Series B, Series B1, Series C, Series D and Series E preferred shares of the Company (collectively, the Preferred Shares) confer all of the rights of ordinary shares, as well as the certain rights of conversion into ordinary shares and other preferences as described in the Company's Articles of Association.

Liquidation Preference As of December 31, 2012, in the event of any liquidation, dissolution or winding up of the Company, the holders of the Preferred shares are entitled to receive out of the distributable amount, prior and in preference to any other securities of the Company, on a *pari passu* and pro-rata basis with the other holders of the Preferred Shares the following amounts: (i) for each Series A Preferred Share an amount of \$ 1.50; (ii) for each Series B Preferred Share an amount of \$ 2.19; (iii) for each Series B1 Preferred Share an amount of \$ 2.23; (iv) for each Series C Preferred Share an amount of \$ 3.25; (v) for each Series D Preferred Share an amount of \$ 10.38; and (i) for each Series E Preferred Share an amount of \$ 27.76. After full payment of the said liquidation preference amounts to the holders of the Preferred Shares, the remaining assets of the Company legally available for distribution shall be distributed equally among the holders of the ordinary shares of the Company.

Dividends The holders of the Preferred Shares are entitled to receive on a cumulative basis out of any dividends declared by the Board of Directors, prior and in preference to any other securities of the Company, but on a *pari passu* and pro-rata basis with the other holders of the

Preferred Shares the following amounts: (i) for each Series A Preferred

F-19

Table of Contents**WIX.COM LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****U.S. dollars in thousands (except share and per share data)**

Share an amount of \$ 1.81; (ii) for each Series B Preferred Share an amount of \$ 2.56; (iii) for each Series B1 Preferred Share an amount of \$ 2.58; (iv) for each Series C Preferred Share an amount of \$ 3.64; (v) for each Series D Preferred Share an amount of \$ 11.43; and (vi) for each Series E Preferred Share an amount of \$ 29.63. After full payment of the said dividend preference amounts to the holders of the Preferred Shares, the remaining dividend amounts shall be distributed equally among the holders of the ordinary Shares of the Company. As of December 31, 2012 and the date of these financial statements, no dividends had been declared or paid by the Company.

Voting Each of the Preferred Shares shall be voted together with the other shares of the Company, and not as a separate class, in all general meetings of the Company's shareholders with each Preferred Share having votes in such number as if then converted into ordinary shares of the Company.

Conversion Each Preferred Share is convertible into ordinary shares at the election of its holder. In addition, all Series A, Series B, Series B1 and Series C Preferred Shares are mandatorily convertible at the election of the majority of the holders of such shares voting as a single class. All Series D and Series E Preferred Shares, respectively, are mandatorily convertible at the election of the majority of the holders of such class of shares. Furthermore, the Preferred Shares will automatically convert into ordinary shares upon the closing of a public offering yielding at least US \$ 35,000 in net proceeds to the Company at a price per share of at least \$ 40.966 (subject to possible adjustments). The conversion of the Preferred Shares shall be into ordinary shares which are fully paid and non-assessable under a conversion ratio detailed in the Company's Articles of Association. The initial conversion ratio is 1-to-1, subject to certain antidilution adjustments as set forth in the Company's Articles of Association, principally for certain additional issuances of shares. As of December 31, 2012 and the date of these consolidated financial statements, the conversion ratio for all series of Preferred Shares was a 1-to-1 ratio.

c. Issuance of Preferred shares:

1. In March 2010, the Company entered into a Series D Preferred Share purchase agreement, pursuant to which the Company issued an aggregate amount of 1,272,940 shares of Series D Preferred shares, for total consideration of \$ 10,077, net of issuance expenses in the amount of \$ 89.
2. In March 2011, the Company entered into a Series E Preferred Share purchase agreement, pursuant to which the Company issued an aggregate amount of 1,025,227 shares of Series E Preferred Shares, for total consideration of \$ 20,855, net of issuance expenses in the amount of \$ 145.

d. Share based payment:

In April 2007, the Company's Board of Directors adopted an Employee Shares Incentive Plan (the Plan). Under the Plan, options may be granted to employees, officers, non-employees consultants and directors of the Company and its Subsidiaries.

Under the Plan, as of December 31, 2012 and June 30, 2013 (unaudited), an aggregate of 170,554 and 95,455 (unaudited), respectively, shares were still available for future grant. Each option granted under the Plan expires no later than ten years from the date of grant. The vesting period of the options is generally four years, unless the Board of Directors or the Board's Compensation Committee determines otherwise. Any option which is forfeited or cancelled before expiration becomes available for future grants.

U.S. dollars in thousands (except share and per share data)

The total share-based compensation expense related to all of the Company's equity-based awards, recognized for the years ended December 31, 2010, 2011 and 2012 and the six months periods ended June 30, 2012 (unaudited) and 2013 (unaudited), was comprised as follows:

	Year ended December 31,			Six months ended June 30,	
	2010	2011	2012	2012	2013
				Unaudited	
Cost of revenues	\$ 14	\$ 40	\$ 105	\$ 47	\$ 68
Research and development	659	1,939	553	260	503
Sales and marketing	95	222	101	44	106
General and administrative	343	2,532	261	144	424
Total share-based compensation expense	\$ 1,111	\$ 4,733	\$ 1,020	\$ 495	\$ 1,101

The total equity-based compensation expense related to all of the Company's employees and non-employees consultants recognized for the years ended December 31, 2010, 2011 and 2012 and the six months periods ended June 30, 2012 (unaudited) and 2013 (unaudited), was comprised as follows:

	Year ended December 31,			Six months ended June 30,	
	2010	2011	2012	2012	2013
				Unaudited	
Employees	\$ 1,093	\$ 4,692	\$ 950	\$ 444	\$ 874
Non-employees consultants	18	41	70	50	70
Total share-based compensation expense	\$ 1,111	\$ 4,733	\$ 1,020	\$ 495	\$ 1,101

Total unrecognized compensation cost amounted to \$ 2,550 and \$ 5,224 (unaudited) as of December 31, 2012 and June 30, 2013 (unaudited), respectively, and is expected to be recognized over a weighted average period of approximately 3.26 years and 3.32 years (unaudited), respectively.

In parallel to the Series D and E Preferred financing round of the Company and a small number of additional transactions, the investors purchased ordinary shares of the Company, at a price per share equal to the price per Preferred Share in the period, from existing shareholders of the Company who are also officers and/or employees of the Company. Following such transactions, the Company recorded share-based compensation expense in the amount of \$ 762 and \$ 4,058 for the years ended December 31, 2010 and 2011, respectively.

e. Options granted to employees:

A summary of the activity in options granted to employees for the years ended December 31, 2010, 2011 and 2012 and June 30, 2013 (unaudited) is as follows:

	Amount of options	Weighted average exercise price	Weighted average remaining contractual term (in years)	Aggregate intrinsic value
Balance as of January 1, 2010	774,306	\$ 0.60	9.05	\$ 313
Granted	1,075,833	\$ 0.99		
Exercised	(41,038)	\$ 0.58		
Forfeited	(179,318)	\$ 0.76		
Balance as of December 31, 2010	1,629,783	\$ 0.84	9.13	\$ 1,923
Granted	662,840	\$ 2.30		
Exercised	(206,813)	\$ 0.63		
Forfeited	(95,560)	\$ 1.82		
Balance as of December 31, 2011	1,990,250	\$ 1.30	8.61	\$ 12,280
Granted	245,500	\$ 5.99		
Exercised	(69,419)	\$ 0.87		
Forfeited	(71,121)	\$ 3.27		
Balance as of December 31, 2012	2,095,210	\$ 1.80	7.82	\$ 32,671
Granted	240,100	\$ 7.01		
Exercised	(47,426)	\$ 2.05		
Forfeited	(66,801)	\$ 3.34		
Balance as of June 30, 2013 (unaudited)	2,222,183	\$ 2.31	7.55	\$ 62,286
Exercisable as of December 31, 2012	1,060,754	\$ 1.26	7.36	\$ 17,107
Vested and expected to vest as of December 31, 2012	1,991,764	\$ 1.77	7.79	\$ 31,114
Exercisable as of June 30, 2013 (unaudited)	1,209,220	\$ 1.43	6.99	\$ 34,973
Vested and expected to vest as of June 30, 2013 (unaudited)	2,119,897	\$ 2.26	7.52	\$ 59,555

The computation of unexpected volatility is based on actual historical share price volatility of comparable companies. The expected option term represents the period of time that options granted are expected to be outstanding. For stock-option awards which were at the money when granted (plain vanilla stock-options), it is determined based on the simplified method in accordance with SAB No. 110, as adequate historical experience is not available to provide a reasonable estimate. The simplified method will continue to apply until enough historical experience is

Edgar Filing: Wix.com Ltd. - Form F-1

available to provide a reasonable estimate of the expected term. For stock-option awards which were in the money when granted, a binomial model was used to determine the expected term as an input to the Black-Scholes-Merton option pricing model. The Company has historically not paid dividends and has no foreseeable plans to pay dividends and, therefore, uses an expected dividend yield of zero in the option pricing model. The risk-free interest rate is based on the yield of U.S. treasury bonds with equivalent terms.

F-22

Table of Contents**WIX.COM LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

U.S. dollars in thousands (except share and per share data)

The following table set forth the parameters used in computation of the options compensation to employees for the years ended December 31, 2010, 2011 and 2012 and the six months periods ended June 30, 2012 (unaudited) and 2013 (unaudited):

	2010	December 31, 2011	2012	Six months ended June 30, 2012	Six months ended June 30, 2013 Unaudited
Expected volatility	65%	65%	70%	70%	58%-65%
Expected dividends	0%	0%	0%	0%	0%
Expected term (in years)	6.11-7.09	6.11	6.11	6.11	4-5.3
Risk free rate	1.5%-2.8%	1.7%-2.3%	1.0%-1.6%	1%-1.6%	0.5%-0.8%

A summary of options data for the years ended December 31, 2010, 2011 and 2012 and six months periods ended June 30, 2013 (unaudited), is as follows:

	2010	Year ended December 31, 2011	2012	Six months ended June 30 2013
Weighted-average grant date fair value of options granted	\$ 1.53	\$ 2.12	\$ 6.50	\$ 15.41
Total intrinsic value of the options exercised	\$ 59	\$ 1,414	\$ 723	\$ 1,342
Total fair value of shares vested	\$ 255	\$ 517	\$ 835	\$ 338

The aggregate intrinsic value is calculated as the difference between the per-share exercise price and the deemed fair value of the Company's Ordinary share for each share subject to an option multiplied by the number of shares subject to options at the date of exercise. The Company's management deemed the fair value of the Company's Ordinary shares to be \$ 17.39 and \$ 30.35 (unaudited) per share as of December 31, 2012 and June 30, 2013 (unaudited), respectively.

The following tables summarize information about the Company's outstanding and exercisable options granted to employees as of December 31, 2012 and June 30, 2013 (unaudited):

Exercise price	Options outstanding as of December 31, 2012	Weighted average remaining contractual term (years)	Options exercisable as of December 31, 2012	Weighted average remaining contractual term (years)

NOTE 9: INCOME TAXES

The Company's subsidiaries are separately taxed under the domestic tax laws of the jurisdiction of incorporation of each entity.

a. Corporate tax in Israel:

In July 2009, the Knesset passed the Law for Economic Efficiency (Amended Legislation for Implementing the Economic Plan for 2009 and 2010), 2009, which prescribed, among others, an additional gradual reduction in the rates of the Israeli corporate tax and real capital gains tax starting 2011. The tax rate in effect for 2010 and 2011 was 25% and 24%, respectively.

Recently, the Law for Change in the Tax Burden (Legislative Amendments) (Taxes), 5772-2011, (the Tax Burden Law 2011), was published by the Government of Israel. The Tax Burden Law 2011 cancelled the scheduled progressive reduction of the corporate tax rate that was approved in 2009 and instead set the corporate tax rate at 25% from 2012 and thereafter.

On July 30, 2013, the Israeli Parliament (the Knesset) approved the second and third readings of the Economic Plan for 2013-2014 (Amended Budget Law) which consists, among others, of fiscal changes whose main aim is to enhance long-term collection of taxes.

These changes include, among others, raising the Israeli corporate tax rate from 25% to 26.5%, cancelling the lowering of the tax rates applicable to preferred enterprises (9% in development area A and 16% in other areas), taxing revaluation gains and increasing the tax rates on dividends within the scope of the Law for the Encouragement of Capital Investments to 20% effective from January 1, 2014.

The change in tax rates will not affect the deferred tax balances as of June 30, 2013.

b. Loss before taxes on income is comprised as follows:

	Year ended December 31,		
	2010	2011	2012
Domestic	\$ (11,486)	\$ (22,841)	\$ (15,749)

Edgar Filing: Wix.com Ltd. - Form F-1

Foreign	112	230	1,176
Loss before taxes on income	\$ (11,374)	\$ (22,611)	\$ (14,573)

F-25

Table of Contents**WIX.COM LTD.****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

U.S. dollars in thousands (except share and per share data)

c. Deferred income taxes:

Deferred taxes reflect the net tax effect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts recorded for tax purposes. Significant components of the Company's deferred tax assets and liabilities are as follows:

	Year ended December 31,	
	2011	2012
Deferred tax assets:		
Net operating loss carry-forwards	\$ 7,121	\$ 9,276
Capital losses carry-forwards	47	48
Research and development expenses	2,482	3,738
Tax credit carryforwards	63	115
Other	158	304
Deferred tax assets before valuation allowance	9,871	13,481
Valuation allowance	9,808	13,366
Deferred tax asset	\$ 63	\$ 115
Deferred tax liabilities:		
Fixed assets	\$ 75	\$ 56
Deferred tax liabilities	\$ 75	\$ 56

The Company has provided valuation allowances in respect of certain deferred tax assets resulting from tax loss carry-forwards and other reserves and allowances due to its history of losses and uncertainty concerning realization of these deferred tax assets. In addition, a deferred tax liability has been established to reflect the Company's tax depreciation of property and equipment, net which differs from depreciation recorded in the consolidated financial statements.

d. Income taxes are comprised as follows:

	Year ended December 31,		
	2010	2011	2012
Current	\$ 89	\$ 143	\$ 470
Deferred	26	(14)	(71)
	\$ 115	\$ 129	\$ 399

f. Net operating loss carry-forwards

As of December 31, 2012, the Company had carry-forward operating and capital tax losses totaling approximately \$ 36,750 and \$ 190, respectively, out of which approximately \$ 36,200 and \$ 190 of losses, respectively were attributed to Israel and can be carried forward indefinitely and \$ 550 were attributed to the U.S. Subsidiary and can be carried forward up until 2032.

g. The Law for the Encouragement of Capital Investments, 1959 (the Law):

On April 1, 2005, an amendment to the Investment Law came into effect (the Amendment) and has significantly changed the provisions of the Investment Law. The Amendment limits the scope of enterprises which may be approved by the Investment Center by setting criteria for the approval of a facility as an Approved Enterprise, such as provisions generally requiring that at least 25% of the Approved Enterprise's income will be derived from export. Additionally, the Amendment enacted major changes in the manner in which tax benefits are awarded under the Investment Law so that companies no longer require Investment Center approval in order to qualify for tax benefits.

According to the law, the Company is entitled to various tax benefits by virtue of the Beneficiary Enterprise status granted to part of its enterprises, defined by this law.

During 2010, the Company had applied by Tax Pre-ruling to the Israeli Tax Authorities (ITA) to receive Beneficiary Enterprise status and elect 2009 as year of election. During 2011, the Company received a tax decision from the ITA approving its request for Beneficiary Enterprise status and the Company elected 2009 as its year of election. Under the Investment Law and its Amendment and according to the tax decision, the

Edgar Filing: Wix.com Ltd. - Form F-1

Company is entitled to various tax benefits, defined by this law, under the Alternative Benefits track as a Beneficiary Enterprise.

F-27

Table of Contents

WIX.COM LTD.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

U.S. dollars in thousands (except share and per share data)

Pursuant to the beneficiary program, the Company is entitled to a tax benefit period of seven to ten years on income derived from this program as follows: the Company is fully tax exempted for a period of the first two years and for the remaining five to eight subsequent years is subject to tax at a rate of 10% - 25% (based on the percentage of foreign ownership of the Company).

The benefit period begins in the year in which taxable income is first earned, limited to 12 years from the year of election.

If dividends are distributed out of tax exempt profits, the Company will then become liable for tax at the rate applicable to its profits from the Beneficiary enterprise in the year in which the income was earned, as if it had not chosen the alternative track of benefits.

The dividend recipient is subject to withholding tax at the rate of 15% applicable to dividends from Beneficiary enterprises, if the dividend is distributed during the tax benefits period or within twelve years thereafter. This limitation does not apply to a foreign investors' company. The Company currently has no plans to distribute dividends and intends to retain future earnings to finance the development of its business.

The above benefits are conditioned upon the fulfillment of the conditions stipulated by the law and regulations published thereunder. In the event of failure to comply with these conditions, the benefits may be canceled and the Company may be required to refund the amount of the benefits, in whole or in part, including interest and linked to changes in the Israeli CPI.

Management believes that the Company will meet the aforementioned conditions by the year of the elected operations.

As a result of the amendment, tax-exempt income generated under the provisions of the new law will subject the Company to taxes upon distribution or liquidation and the Company may be required to record a deferred tax liability with respect to such tax-exempt income.

Through December 31, 2012, the Company had not generated income under the provision of the new law.

In December 2010, the Israeli Parliament passed the Law for Economic Policy for 2011 and 2012 (Amended Legislation), 2011, which prescribes, among other things, amendments to the Investment Law, effective as of January 1, 2011. According to the amendment, the benefit tracks under the Investment Law were modified and a uniform tax rate will apply to all of the income of an approved or beneficiary enterprise. Companies may elect to irrevocably implement the amendment (while waiving benefits provided under the Investment Law as currently in effect) and subsequently would be subject to the amended tax rates that are: 2011 and 2012 - 15%, 2013 and 2014 - 12.5% and in 2015 and thereafter - 12%.

Under the transition provisions of the new legislation, the Company may decide to irrevocably implement the new law while waiving benefits provided under the current law or to remain subject to the current law.

The Company does not currently intend to implement the amendment, and intends to continue to comply with the Investment Law as in effect prior to enactment of the amendment.

h. Tax assessments:

The Company and its subsidiaries did not have any final tax assessments as of December 31, 2012

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 6. Indemnification of Directors and Officers.

Under the Companies Law, a company may not exculpate an office holder from liability for a breach of the duty of loyalty. An Israeli company may exculpate an office holder in advance from liability to the company, in whole or in part, for damages caused to the company as a result of a breach of duty of care but only if a provision authorizing such exculpation is included in its articles of association. Our amended and restated articles of association to be effective following the closing of this offering include such a provision. The company may not exculpate a director from liability arising out of a prohibited dividend or distribution to shareholders.

Under the Companies Law, a company may indemnify an office holder in respect of the following liabilities and expenses incurred for acts performed as an office holder, either in advance of an event or following an event, provided a provision authorizing such indemnification is contained in its articles of association:

a financial liability imposed on him or her in favor of another person pursuant to a judgment, including a settlement or arbitrator's award approved by a court. However, if an undertaking to indemnify an office holder with respect to such liability is provided in advance, then such an undertaking must be limited to events which, in the opinion of the board of directors, can be foreseen based on the company's activities when the undertaking to indemnify is given, and to an amount or according to criteria determined by the board of directors as reasonable under the circumstances, and such undertaking shall detail the abovementioned events and amount or criteria;

reasonable litigation expenses, including attorneys' fees, incurred by the office holder as a result of an investigation or proceeding instituted against him or her by an authority authorized to conduct such investigation or proceeding, provided that (i) no indictment was filed against such office holder as a result of such investigation or proceeding; and (ii) no financial liability, such as a criminal penalty, was imposed upon him or her as a substitute for the criminal proceeding as a result of such investigation or proceeding or, if such financial liability was imposed, it was imposed with respect to an offense that does not require proof of criminal intent; and

reasonable litigation expenses, including attorneys' fees, incurred by the office holder or imposed by a court in proceedings instituted against him or her by the company, on its behalf or by a third-party or in connection with criminal proceedings in which the office holder was acquitted or as a result of a conviction for an offense that does not require proof of criminal intent.

Under the Companies Law and the Israeli Securities Law, a company may insure an office holder against the following liabilities incurred for acts performed as an office holder if and to the extent provided in the company's articles of association:

a breach of the duty of loyalty to the company, to the extent that the office holder acted in good faith and had a reasonable basis to believe that the act would not prejudice the company;

a breach of the duty of care to the company or to a third-party, including a breach arising out of the negligent conduct of the office holder;

a financial liability imposed on the office holder in favor of a third-party;

a financial liability imposed on the office holder in favor of a third-party harmed by a breach in an administrative proceeding; and

reasonable litigation expenses, including attorneys' fees, incurred by the office holder as a result of an administrative proceeding instituted against him or her.

II-1

Table of Contents

Under the Companies Law, a company may not indemnify, exculpate or insure an office holder against any of the following:

a breach of the duty of loyalty, except to the extent that the office holder acted in good faith and had a reasonable basis to believe that the act would not prejudice the company;

a breach of the duty of care committed intentionally or recklessly, excluding a breach arising out of the negligent conduct of the office holder;

an act or omission committed with intent to derive illegal personal benefit; or

a fine or forfeit levied against the office holder.

Under the Companies Law, exculpation, indemnification and insurance of office holders must be approved by the audit committee and the board of directors and, with respect to directors, also by shareholders.

Our amended and restated articles of association permit us to exculpate, indemnify and insure our office holders for any liability imposed on them as a consequence of an act (including any omission) which was performed by virtue of being an office holder. Our office holders are currently covered by a directors and officers liability insurance policy.

We have entered into agreements with each of our directors and executive officers exculpating them, to the fullest extent permitted by law, from liability to us for damages caused to us as a result of a breach of duty of care, and undertaking to indemnify them to the fullest extent permitted by law. This indemnification is limited to events determined as foreseeable by the board of directors based on our activities, and to an amount or according to criteria determined by the board of directors as reasonable under the circumstances.

Effective as of the date of this offering, the maximum indemnification amount set forth in such agreements is limited to an amount equal to 25% of our shareholder's equity as reflected in our most recent consolidated financial statements prior to the date on which the indemnity payment is made. The maximum amount set forth in such agreements is in addition to any amount paid (if paid) under insurance and/or by a third-party pursuant to an indemnification arrangement.

In the opinion of the Securities and Exchange Commission, indemnification of directors and office holders for liabilities arising under the Securities Act of 1933, as amended, or the Securities Act, however, is against public policy and therefore unenforceable.

There is no pending litigation or proceeding against any of our office holders as to which indemnification is being sought, nor are we aware of any pending or threatened litigation that may result in claims for indemnification by any office holder.

Item 7. Recent Sales of Unregistered Securities.

During the past three years, we issued securities which were not registered under the Securities Act as set forth below. We believe that each of such issuances was exempt from registration under the Securities Act in reliance on Section 4(2) of the Securities Act, Rule 701 and/or Regulation S under the Securities Act.

The following is a summary of transactions during the preceding three fiscal years involving sales of our securities that were not registered under the Securities Act:

In March 2010, we sold Series D preferred shares convertible into 1,272,940 ordinary shares on a one-for-one basis. The price per underlying ordinary share was \$7.99 for an aggregate purchase price of \$10.2 million. In connection with this sale, our founders, Avishai Abrahami, Giora Kaplan, and Nadav Abrahami sold to existing shareholders 375,665 ordinary shares. The price per

Edgar Filing: Wix.com Ltd. - Form F-1

underlying share was \$7.99, for an aggregate purchase price of \$3.0 million. This issuance was exempt from the registration requirements of the Securities Act pursuant to Section 4(2) and/or Regulation S thereunder.

In March 2011, we sold Series E preferred shares convertible into 1,025,227 ordinary shares on a one-for-one basis. The price per underlying ordinary share was \$20.48 and the aggregate consideration

II-2

Table of Contents

received was \$21.0 million. In connection with this sale, our founders, Avishai Abrahami, Giora Kaplan, and Nadav Abrahami sold to existing shareholders 292,923 ordinary shares. The price per underlying share was \$20.48, for an aggregate purchase price of \$6.0 million. This issuance was exempt from the registration requirements of the Securities Act pursuant to Section 4(2) and/or Regulation S thereunder.

In June 2013, we issued to the provider of a line of credit a warrant to purchase 9,766 ordinary shares at a price per share of \$20.48. Since January 1, 2010 through August 31, 2013, we granted options to employees, directors and consultants to purchase 3,795,012 shares under our 2007 Employee Shares Incentive Plan of which 253,281 expired without being exercised. During that period, we issued an aggregate of 388,804 ordinary shares pursuant to the exercise of share options by our employees, directors and consultants. These issuances were exempt from the registration requirements of the Securities Act pursuant to Section 4(2) of the Securities act, Rule 701 and/or Regulation S.

No underwriter or underwriting discount or commission was involved in any of the transactions set forth in Item 7.

Item 8. Exhibits and Financial Statement Schedules.

(a) The Exhibit Index is hereby incorporated herein by reference.

(b) Financial Statement Schedules.

All schedules have been omitted because they are not required, are not applicable or the information is otherwise set forth in the Consolidated Financial Statements and related notes thereto.

Item 9. Undertakings.

Insofar as indemnification for liabilities arising under the Securities Act may be permitted to directors, officers and controlling persons of the Registrant pursuant to the provisions described in Item 6 hereof, or otherwise, the Registrant has been advised that in the opinion of the Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the Registrant of expenses incurred or paid by a director, officer or controlling person of the Registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

The undersigned Registrant hereby undertakes:

1. To provide the underwriters specified in the Underwriting Agreement, at the closing, certificates in such denominations and registered in such names as required by the underwriters to permit prompt delivery to each purchaser.
2. That for purposes of determining any liability under the Securities Act of 1933, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the Registrant pursuant to Rule 424(b)(1) or (4), or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.
3. That for the purpose of determining any liability under the Securities Act of 1933, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and this offering of

such securities at that time shall be deemed to be the initial bona fide offering thereof.
