UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

Quarterly Report Pursuant to Section 13 or 15 (d)
of the Securities Exchange Act of 1934
For the quarterly period ended September 30, 2013
Commission File No.: 001-12933

AUTOLIV, INC.

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

51-0378542
(I.R.S. Employer
Identification No.)

**Vasagatan 11, 7th floor, SE-111 20,
Box 70381,
SE-107 24 Stockholm, Sweden
(Address of principal executive offices)**

**N/A
(Zip Code)**

+46 8 587 20 600

(Registrant's telephone number, including area code)

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes: No:

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§ 232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes: No:

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company.

Large accelerated filer:

Accelerated filer:

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes: No:

Indicate the number of shares outstanding of each of the registrant's classes of common stock, as of the latest practicable date: As of October 17, 2013, there were 95,892,944 shares of common stock of Autoliv, Inc., par value \$1.00 per share, outstanding.

Table of Contents

FORWARD-LOOKING STATEMENTS

This Quarterly Report on Form 10-Q contains statements that are not historical facts but rather forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995. Such forward-looking statements include those that address activities, events or developments that Autoliv, Inc. (Autoliv, the Company or we) or its management believes or anticipates may occur in the future. For example, forward-looking statements include, without limitation, statements relating to industry trends, business opportunities, sales contracts, sales backlog, and on-going commercial arrangements and discussions, as well as any statements about future operating performance or financial results.

In some cases, you can identify these statements by forward-looking words such as estimates, expects, anticipates, foresee, projects, plans, intends, believes, may, might, will, should, or the negative of these terms and comparable terminology, although not all forward-looking statements contain such words.

All forward-looking statements, including without limitation, management's examination of historical operating trends and data, are based upon our current expectations, various assumptions and data available from third parties. Our expectations and assumptions are expressed in good faith and we believe there is a reasonable basis for them. However, there can be no assurance that such forward-looking statements will materialize or prove to be correct as forward-looking statements are inherently subject to known and unknown risks, uncertainties and other factors which may cause actual future results, performance or achievements to differ materially from the future results, performance or achievements expressed in or implied by such forward-looking statements.

Because these forward-looking statements involve risks and uncertainties, the outcomes could differ materially from those set out in the forward-looking statements for a variety of reasons, including without limitation, changes in and the successful execution of our capacity alignment, restructuring and cost reduction initiatives discussed herein and the market reaction thereto; changes in general industry market conditions or regional growth or declines; loss of business from increased competition; higher raw material, fuel and energy costs; changes in consumer and customer preferences for end products; customer losses; changes in regulatory conditions; customer bankruptcies; consolidations or restructuring; divestiture of customer brands; unfavorable fluctuations in currencies or interest rates among the various jurisdictions in which we operate; fluctuation in vehicle production schedules for which the Company is a supplier; component shortages; market acceptance of our new products; costs or difficulties related to the integration of any new or acquired businesses and technologies; continued uncertainty in program awards and performance; the financial results of companies in

Table of Contents

which Autoliv has made technology investments or joint-venture arrangements; pricing negotiations with customers; our ability to be awarded new business; product liability, warranty and recall claims and other litigation and customer reactions thereto; higher expenses for our pension and other postretirement benefits including higher funding requirements of our pension plans; work stoppages or other labor issues at our facilities or at the facilities of our customers or suppliers; possible adverse results of pending or future litigation or infringement claims; negative impacts of antitrust investigations or other governmental investigations and associated litigation relating to the conduct of our business (including securities or other litigation); tax assessments by governmental authorities; dependence on key personnel; legislative or regulatory changes limiting our business; political conditions; dependence on customers and suppliers; and other risks and uncertainties identified in Item 1A Risk Factors and Item 7

Management's Discussion and Analysis of Financial Condition and Results of Operations in our Annual Report on Form 10-K for the year ended December 31, 2012. The Company undertakes no obligation to update publicly or revise any forward-looking statements in light of new information or future events.

For any forward-looking statements contained in this or any other document, we claim the protection of the safe harbor for forward-looking statements contained in the Private Securities Litigation Reform Act of 1995, and we assume no obligation to update any such statement.

NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unless otherwise noted, all amounts are presented in millions of dollars, except for per share amounts)

September 30, 2013

1 Basis of Presentation

The accompanying interim unaudited condensed consolidated financial statements have been prepared in accordance with United States generally accepted accounting principles (GAAP) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all the information and footnotes required by GAAP for complete financial statements. In the opinion of management, unaudited condensed consolidated financial statements have been prepared on the same basis as the prior year audited financial statements and all adjustments considered necessary for a fair presentation have been included in the financial statements. All such adjustments are of a normal recurring nature. The result for the interim period is not necessarily indicative of the results to be expected for any future period or for the fiscal year ending December 31, 2013. Certain prior-year amounts have been reclassified to conform to current year presentation.

The condensed consolidated balance sheet at December 31, 2012 has been derived from the audited financial statements at that date, but does not include all the information and footnotes required by GAAP for complete financial statements.

Statements in this report that are not of historical fact are forward-looking statements that involve risks and uncertainties that could affect the actual results of the Company. A description of the important factors that could cause Autoliv's actual results to differ materially from the forward-looking statements contained in this report may be found in this report and Autoliv's other reports filed with the Securities and Exchange Commission (the SEC). For further information, refer to the consolidated financial statements, footnotes and definitions thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012, filed with the SEC on February 22, 2013.

2 New Accounting Pronouncements

The following accounting guidance has been issued and is effective for the Company in or after fiscal year 2013:

In December 2011, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2011-11, *Disclosures about Offsetting Assets and Liabilities*, which requires disclosure of financial instruments and derivatives that are either offset on the balance sheet in accordance with Accounting Standards Codification (ASC) 210-20-45 or ASC 815-10-45, or subject to a master netting arrangement, irrespective of whether they are offset on the balance sheet. ASU No. 2011-11 is effective for annual periods beginning on or after January 1, 2013 and interim periods within those annual periods. Entities should provide the disclosures required by this ASU retrospectively for all comparative periods presented. Subsequent to the issuance of ASU 2011-11, the FASB issued in January 2013 ASU 2013-01 and limited the scope of the new balance sheet offsetting disclosure requirements to certain derivatives, repurchase agreements and securities lending arrangements. The adoption of ASU 2011-11 and ASU 2013-01 had an impact on the Company's disclosures about its financial instruments in the consolidated financial statements.

3 Fair Value Measurement

Assets and liabilities measured at fair value on a recurring basis

The Company uses derivative financial instruments, derivatives, as part of its debt management to mitigate the market risk that occurs from its exposure to changes in interest and foreign exchange rates. The Company does not enter into derivatives for trading or other speculative purposes. The Company's use of derivatives is in accordance with the strategies contained in the Company's overall financial policy. The derivatives outstanding at September 30, 2013 are foreign exchange swaps. All swaps principally match the terms and maturity of the underlying debt and no swaps have a maturity beyond six months. All derivatives are recognized in the consolidated financial statements at fair value. Certain derivatives are from time to time designated either as fair value hedges or cash flow hedges in line with the hedge accounting criteria. For certain other derivatives hedge accounting is not applied either because non-hedge accounting treatment creates the same accounting result or the hedge does not meet the hedge accounting requirements, although entered into applying the same rationale concerning mitigating market risk that occurs from changes in interest and foreign exchange rates.

When a hedge is classified as a fair value hedge, the change in the fair value of the hedge is recognized in the Consolidated Statement of Net Income along with the off-setting change in the fair value of the hedged item. When a hedge is classified as a cash flow hedge, any change in the fair value of the hedge is initially recorded in

Table of Contents

equity as a component of Other Comprehensive Income, (OCI), and reclassified into the Consolidated Statement of Net Income when the hedge transaction affects net earnings. There were no reclassifications from OCI to the Consolidated Statement of Net Income during the three and nine months ended September 30, 2013 and September 30, 2012 and, likewise, no reclassifications are expected for the next twelve months. Any ineffectiveness has been immaterial. During the first quarter of 2013 the Company closed a \$60 million interest rate swap and the amount received was included in the debt balance and will be amortized over the remaining life of the underlying debt. No fair value adjustments were made as a consequence of the close-out.

The Company records derivatives at fair value. Any gains and losses on derivatives recorded at fair value are reflected in the Consolidated Statement of Net Income with the exception of cash flow hedges where an immaterial portion of the fair value is reflected in other comprehensive income. The degree of judgment utilized in measuring the fair value of the instruments generally correlates to the level of pricing observability. Pricing observability is impacted by a number of factors, including the type of asset or liability, whether the asset or liability has an established market and the characteristics specific to the transaction. Derivatives with readily active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of pricing observability and a lesser degree of judgment utilized in measuring fair value. Conversely, assets rarely traded or not quoted will generally have less, or no, pricing observability and a higher degree of judgment utilized in measuring fair value.

Under existing GAAP, there is a hierarchical disclosure framework associated with the level of pricing observability utilized in measuring assets and liabilities at fair value. The three broad levels defined by the hierarchy are as follows:

Level 1 - Quoted prices are available in active markets for identical assets or liabilities as of the reported date.

Level 2 - Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reported date. The nature of these assets and liabilities include items for which quoted prices are available but traded less frequently, and items that are fair valued using other financial instruments, the parameters of which can be directly observed.

Level 3 - Assets and liabilities that have little to no pricing observability as of the reported date. These items do not have two-way markets and are measured using management's best estimate of fair value, where the inputs into the determination of fair value require significant management judgment or estimation.

The following tables summarize the valuation of the Company's derivatives by the above noted pricing observability levels:

**Fair Value
Measurements at

Table of Contents

The tables below present information about the Company's financial assets and liabilities measured at fair value on a recurring basis as of September 30, 2013 and December 31, 2012. Although the Company is party to close-out netting agreements with all derivative counterparties, the fair values in the tables below and in the Consolidated Balance Sheets at September 30, 2013 and December 31, 2012, have been presented on a gross basis. The net amounts subject to netting agreements that the Company choose not to offset are presented in footnotes. According to the close-out netting agreements, transaction amounts payable to a counterparty on the same date and in the same currency can be netted.

All amounts recognized in the Consolidated Statement of Net Income related to derivatives, not designated as hedging instruments, relate to economic hedges and thus have been materially off-set by an opposite Consolidated Statement of Net Income effect of the related financial liabilities or financial assets.

The carrying value of cash and cash equivalents, accounts receivable, accounts payable, other current liabilities and short-term debt approximate their fair value because of the short term maturity of these instruments. The fair value of long-term debt is determined either from quoted market prices as provided by participants in the secondary market or for long-term debt without quoted market prices, estimated using a discounted cash flow method based on the Company's current borrowing rates for similar types of financing. The fair value of derivatives is estimated using a discounted cash flow method based on quoted market prices. The fair value and carrying value of debt is summarized in the table below. The Company has determined that each of these fair value measurements of debt reside within Level 2 of the fair value hierarchy. The discount rates for all derivative contracts are based on bank deposit or swap interest rates. Credit risk has been considered when determining the discount rates used for the derivative contracts, which when aggregated by counterparty, are in a liability position.

Fair Value of Debt

	September 30, 2013 Carrying value ¹⁾	September 30, 2013 Fair value	December 31, 2012 Carrying value ¹⁾	December 31, 2012 Fair value

Total	\$ 216.4	\$ 218.1	\$ 69.8	\$ 69.8
--------------	-----------------	-----------------	----------------	----------------

1) Debt as reported in balance sheet.

Assets and liabilities measured at fair value on a non-recurring basis

In addition to assets and liabilities that are measured at fair value on a recurring basis, the Company also has assets and liabilities in its balance sheet that are measured at fair value on a non-recurring basis. Assets and liabilities that are measured at fair value on a non-recurring basis include long-lived assets, including investments in affiliates, and restructuring liabilities (see Note 6).

The Company has determined that the fair value measurements included in each of these assets and liabilities rely primarily on Company-specific inputs and the Company's assumptions about the use of the assets and settlements of liabilities, as observable inputs are not available. The Company has determined that each of these fair value measurements reside within Level 3 of the fair value hierarchy. To determine the fair value of long-lived assets, the Company utilizes the projected cash flows expected to be generated by the long-lived assets, then discounts the future cash flows over the expected life of the long-lived assets. For restructuring obligations, the amount recorded represents the fair value of the payments expected to be made, and such provisions are discounted if the payments are expected to extend beyond one year.

Table of Contents

As of September 30, 2013 the Company had \$68.9 million of restructuring reserves which were measured at fair value upon initial recognition of the associated liability (see Note 6). For the three and nine months ended September 30, 2013, the Company did not record any impairment charges on its long-lived assets.

4 Income Taxes

For the first nine months of 2013, the effective tax rate was 27.8%, compared with an effective tax rate of 30.7% in the first nine months of 2012. In the first nine months of 2013, the net impact of discrete tax items caused a 0.5% decrease to the effective tax rate. The net impact of discrete tax items in the first nine months of 2012 caused a 1.7% increase to the effective tax rate.

The Company files income tax returns in the United States federal jurisdiction, various state jurisdictions and foreign jurisdictions. At any given time, the Company is undergoing tax audits in several tax jurisdictions covering multiple years. The Company is effectively no longer subject to income tax examination by the U.S. Federal tax authorities for years prior to 2009. In addition, with few exceptions, the Company is also no longer subject to income tax examination by U.S. state and local and non-U.S. tax authorities for years prior to 2004.

The Company is undergoing tax audits in several jurisdictions covering multiple years. As of September 30, 2013, as a result of those tax examinations, the Company is not aware of any proposed income tax adjustments that would have a material impact on the Company's financial statements. The conclusion of such audits could result in additional increases or decreases to unrecognized tax benefits in some future period or periods.

During the third quarter of 2013, the Company recorded a net increase of \$2.6 million to income tax reserves for unrecognized tax benefits based on tax positions related to the current and prior years, including accruing additional interest related to unrecognized tax benefits of prior years. Of the total unrecognized tax benefits of \$23.1 million recorded at September 30, 2013, \$2.3 million is classified as current tax payable and \$20.8 million is classified as non-current tax payable on the Condensed Consolidated Balance Sheet.

5 Inventories

Inventories are stated at the lower of cost (principally FIFO) or market. The components of inventories were as follows:

	As of	
	September 30, 2013	December 31, 2012
Raw materials	\$ 313.7	\$ 287.7
Work in progress	233.8	225.9
Finished products	182.4	180.9
Inventories	729.9	694.5
Inventory valuation reserve	(87.5)	(83.5)
Total inventories, net of reserve	\$ 642.4	\$ 611.0

6 Restructuring

Restructuring provisions are made on a case-by-case basis and primarily include severance costs incurred in connection with headcount reductions and plant consolidations. The Company expects to finance restructuring programs over the next several years through cash generated from its ongoing operations or through cash available under existing credit facilities. The Company does not expect that the execution of these activities will have a material adverse impact on its liquidity position.

Table of Contents**Third quarter of 2013**

The employee-related restructuring provisions in the third quarter of 2013 mainly relate to headcount reductions in Europe. The cash payments mainly relate to high-cost countries in Europe. The changes in the employee-related reserves were charged against Other income (expense), net in the Consolidated Statements of Net Income. The table below summarizes the change in the balance sheet position of the restructuring reserves from June 30, 2013 to September 30, 2013.

	June 30, 2013	Provision/ Charge	Provision/ Reversal	Cash payments	Translation difference	September 30, 2013
Restructuring employee-related	\$ 70.2	\$ 1.0	\$ (0.1)	\$ (5.0)	\$ 2.3	\$ 68.4
Other	0.5			(0.0)	0.0	0.5
Total reserve	\$ 70.7	\$ 1.0	\$ (0.1)	\$ (5.0)	\$ 2.3	\$ 68.9

Second quarter of 2013

The employee-related restructuring provisions in the second quarter of 2013 mainly relate to headcount reductions in Europe. The cash payments mainly relate to high-cost countries in Europe. The changes in the employee-related reserves were charged against Other income (expense), net in the Consolidated Statements of Net Income. The table below summarizes the change in the balance sheet position of the restructuring reserves from March 31, 2013 to June 30, 2013.

	March 31, 2013	Provision/ Charge	Provision/ Reversal	Cash payments	Translation difference	June 30, 2013
Restructuring employee-related	\$ 70.1	\$ 3.0	\$ (0.1)	\$ (4.1)	\$ 1.3	\$ 70.2
Other	0.5			(0.0)	0.0	0.5
Total reserve	\$ 70.6	\$ 3.0	\$ (0.1)	\$ (4.1)	\$ 1.3	\$ 70.7

First quarter of 2013

The employee-related restructuring provisions in the first quarter of 2013 mainly relate to headcount reductions in Europe. The cash payments mainly relate to high-cost countries in Europe. The changes in the employee-related reserves were charged against Other income (expense), net in the Consolidated Statements of Net Income. The table below summarizes the change in the balance sheet position of the restructuring reserves from December 31, 2012 to March 31, 2013.

	December 31, 2012	Provision/ Charge	Provision/ Reversal	Cash payments	Translation difference	March 31, 2013
Restructuring employee-related	\$ 74.9	\$ 2.3	\$ (0.1)	\$ (4.7)	\$ (2.3)	\$ 70.1
Other	0.9			(0.4)	0.0	0.5
Total reserve	\$ 75.8	\$ 2.3	\$ (0.1)	\$ (5.1)	\$ (2.3)	\$ 70.6

2012

In 2012, the employee-related restructuring provisions mainly related to headcount reductions throughout Europe. The cash payments mainly related to high-cost countries in Europe. The changes in the employee-related reserves have been charged against Other income (expense), net in the Consolidated Statements of Net Income. The table below summarizes the change in the balance sheet position of the restructuring reserves from December 31, 2011 to December 31, 2012.

	December 31, 2011	Provision/ Charge	Provision/ Reversal	Cash payments	Translation difference	December 31, 2012
Restructuring employee-related	\$ 31.4	\$ 76.6	\$ (1.8)	\$ (33.3)	\$ 2.0	\$ 74.9
Other	0.9	0.3	(0.3)	(0.0)		0.9
Total reserve	\$ 32.3	\$ 76.9	\$ (2.1)	\$ (33.3)	\$ 2.0	\$ 75.8

7 Product-Related Liabilities

The Company has reserves for product risks. Such reserves are related to product performance issues including recall, product liability and warranty issues.

The Company records liabilities for product-related risks when probable claims are identified and when it is possible to reasonably estimate costs. Provisions for warranty claims are estimated based on prior experience, likely changes in performance of newer products and the mix and volume of the products sold. The provisions are recorded on an accrual basis. For further explanation, see Note 11 Contingent Liabilities below.

Table of Contents

The table below summarizes the change in the balance sheet position of the product-related liabilities. The provisions for the three months ended September 30, 2013 mainly relate to warranty related issues and the nine months ended September 30, 2013 mainly relate to recall related issues. The cash paid for the three and nine months ended September 30, 2013 related mainly to warranty related issues. The provisions and cash paid for the three and nine months ended September 30, 2012 mainly related to warranty related issues.

	Three months ended		Nine months ended	
	September 30, 2013	September 30, 2012	September 30, 2013	September 30, 2012
Reserve at beginning of the period	\$ 37.1	\$ 31.6	\$ 29.9	\$ 33.0
Change in reserve	2.9	3.5	16.4	13.3
Cash payments	(2.8)	(4.5)	(8.5)	(15.3)
Translation difference	0.6	0.7	(0.0)	0.3
Reserve at end of the period	\$ 37.8	\$ 31.3	\$ 37.8	\$ 31.3

8 Retirement Plans

The Company has contributory and non-contributory defined benefit pension plans covering employees at most operations in the United States and in certain other countries. The main plan is the U.S. plan for which the benefits are based on an average of the employee's earnings in the years preceding retirement and on credited service. Certain supplemental funded and unfunded plan arrangements also provide retirement benefits to specified groups of participants.

The Company has frozen participation in the U.S. pension plans to include only those employees hired as of December 31, 2003. The U.K. defined benefit plan is the most significant individual non-U.S. pension plan and the Company has frozen participation to include only those employees hired as of April 30, 2003.

The Net Periodic Benefit Costs related to Other Post-retirement Benefits were not significant to the Condensed Consolidated Financial Statements of the Company for the three and nine months ended September 30, 2013 and September 30, 2012.

For further information on Pension Plans and Other Post-retirement Benefits, see Note 18 to the Consolidated Financial Statements of the Company included in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 filed with the SEC on February 22, 2013.

The components of total Net Periodic Benefit Cost associated with the Company's defined benefit retirement plans are as follows:

	Three months ended		Nine months ended	
	September 30, 2013	September 30, 2012	September 30, 2013	September 30, 2012
Service cost	\$ 5.6	\$ 4.9	\$ 16.9	\$ 14.6
Interest cost	4.9	4.7	14.8	14.1
Expected return on plan assets	(3.9)	(3.5)	(11.7)	(10.5)

Amortization prior service credit	(0.2)	(0.3)	(0.6)	(0.7)
Amortization of actuarial loss	3.1	2.3	9.2	6.7

Net Periodic Benefit Cost	\$ 9.5	\$ 8.1	\$ 28.6	\$ 24.2
9 Equity and Equity Units Offering				

On March 30, 2009, the Company sold, in an underwritten registered public offering, approximately 14.7 million common shares from treasury stock and 6.6 million equity units (the Equity Units), listed on the NYSE as Corporate Units, for an aggregate stated amount and public offering price of \$235 million and \$165 million, respectively. Equity Units is a term that describes a security that is either a Corporate Unit or a Treasury Unit, depending upon what type of note is used by the holder to secure the forward purchase contract (either a Note or a Treasury Security, as described below). The Equity Units initially consisted of a Corporate Unit which is (i) a forward purchase contract obligating the holder to purchase from the Company for a price in cash of \$25, on the purchase contract settlement date of April 30, 2012, subject to early settlement in accordance with the terms of the Purchase Contract and Pledge Agreement, a certain number (at the Settlement Rate outlined in the Purchase Contract and Pledge Agreement) of shares of Common Stock and (ii) a 1/40, or 2.5%, undivided beneficial ownership interest in a \$1,000 principal amount of the Company's 8% senior notes due 2014 (the Senior Notes).

Table of Contents

The Company allocated proceeds received upon issuance of the Equity Units based on relative fair values at the time of issuance. The fair value of the purchase contract at issuance was \$3.75 and the fair value of the note was \$21.25. The discount on the notes is amortized using the effective interest rate method. Accordingly, the difference between the stated rate (i.e. cash payments of interest) and the effective interest rate is credited to the value of the notes. Thus, at the end of the three years, the notes were stated on the balance sheet at their face amount. The Company allocated 1% of the 6% of underwriting commissions paid to the debt as deferred charges based on commissions paid for similar debt issuances, but including factors for market conditions at the time of the offering and the Company's credit rating. The deferred charges were being amortized over the life of the note (until the remarketing settlement date on March 15, 2012) using the effective interest rate method. The remaining underwriting commissions of 5% were allocated to the equity forward and recorded as a reduction to paid-in capital. The fees associated with the remarketing were allocated the same way and the deferred charges will be similarly amortized over the life of the notes until April 30, 2014. Following separately negotiated accelerated exchanges with holders representing an aggregate of approximately 2.3 million Equity Units in the second quarter 2010, 4,250,920 Equity Units remained outstanding prior to settlement on April 30, 2012.

The Company successfully completed the remarketing of the Senior Notes in March 2012, pursuant to which the interest rate on the Senior Notes was reset and certain other terms of the Senior Notes were modified. On March 15, 2012, the coupon was reset to 3.854% with a yield of 2.875% per annum which will be applicable until final maturity on April 30, 2014. Autoliv did not receive any proceeds from the remarketing until the settlement of the forward stock purchase contracts on April 30, 2012. On April 30, 2012, Autoliv settled the purchase contracts by issuing approximately 5.8 million shares of common stock in exchange for \$106,273,000 in proceeds generated by the maturity of the U.S. Treasury securities purchased following the remarketing. The settlement of the purchase contracts concluded Autoliv's equity obligations under the Equity Units.

11 Contingent Liabilities**Legal Proceedings**

Various claims, lawsuits and proceedings are pending or threatened against the Company or its subsidiaries, covering a range of matters that arise in the ordinary course of its business activities with respect to commercial, product liability and other matters. Litigation is subject to many uncertainties, and the outcome of any litigation cannot be assured. After discussions with counsel, and with the exception of losses resulting from the antitrust proceedings described below, it is the opinion of management that the various legal proceedings and investigations to which the Company currently is a party will not have a material adverse impact on the consolidated financial position of Autoliv, but the Company cannot provide assurance that Autoliv will not experience material litigation, product liability or other losses in the future.

General Litigation

In 2009, Autoliv initiated a closure of its Normandy Precision Components (NPC) plant located in France. Most of the former NPC-employees that were not protected (i.e. not union representatives) filed claims in a French court claiming damages in an aggregate amount of 12 million (approximately \$16 million) and/or other remedies. In February 2012, the French court ruled in favor of plaintiffs in an aggregate amount of 5.6 million (approximately \$7.5 million), while rejecting certain other claims. As required under French law, Autoliv had previously paid the 5.6 million award while appealing the matter. On appeal, the court reduced the amount owed by Autoliv to some employees and increased the amount to be paid to others. The court also assessed the compensation to be paid to the French government for past unemployment payments, for a total additional cost of approximately 1.0 million (approximately \$1.3 million).

Antitrust Matters

Authorities in several jurisdictions are currently conducting broad, and in some cases, long-running investigations of suspected anti-competitive behavior among parts suppliers in the global automotive vehicle industry. These

investigations include, but are not limited to, segments in which the Company operates. In addition to pending matters, authorities of other countries with significant light vehicle manufacturing or sales may initiate similar investigations. It is the Company's policy to cooperate with governmental investigations.

On February 8, 2011, a Company subsidiary received a grand jury subpoena from the Antitrust Division of the U.S. Department of Justice (DOJ) related to its investigation of anti-competitive behavior among suppliers of occupant safety systems. On June 6, 2012, the Company entered into a plea agreement with the DOJ and

Table of Contents

subsequently pled guilty to two counts of antitrust law violations involving a Japanese subsidiary and paid a fine of \$14.5 million. Under the terms of the agreement the Company will continue to cooperate with the DOJ in its investigation of other suppliers, but the DOJ will not otherwise prosecute Autoliv or any of its subsidiaries, present or former directors, officers or employees for the matters investigated (the DOJ did reserve the option to prosecute three specific employees, none of whom is a member of the senior management of the Company).

On June 7-9, 2011, representatives of the European Commission (EC), the European antitrust authority, visited two facilities of a Company subsidiary in Germany to gather information for a similar investigation. The investigation is still pending and the Company remains unable to estimate the financial impact such investigation will have or predict the reporting periods in which such financial impact may be recorded and has consequently not recorded a provision for loss as of September 30, 2013. However, management has concluded that it is probable that the Company's operating results and cash flows will be materially adversely impacted for the reporting periods in which the EC investigation is resolved or becomes estimable.

On October 3, 2012, the Company received a letter from the Competition Bureau of Canada (CBC) related to the subjects investigated by the DOJ and EC, seeking the voluntary production of certain corporate records and information related to sales subject to Canadian jurisdiction. The Company cooperated with CBC's request. Based on information from the CBC, the Company currently does not anticipate an adverse outcome from the CBC related to sales subject to Canadian jurisdiction.

On November 6, 2012, the Korean Fair Trade Commission visited one of the Company's South Korean subsidiaries to gather information for a similar investigation. The Company cannot predict the duration, scope or ultimate outcome of this investigation and is unable to estimate the financial impact it may have, or predict the reporting periods in which any such financial impacts may be recorded. Consequently, the Company has not recorded a provision for loss as of September 30, 2013 with respect to this investigation. Also, since the Company's plea agreement with the DOJ involved the actions of employees of a Japanese subsidiary of the Company, the Japan Fair Trade Commission is evaluating whether to initiate an investigation.

The Company is also subject to civil litigation alleging anti-competitive conduct. Notably, the Company, several of its subsidiaries and its competitors are defendants in a total of sixteen purported antitrust class action lawsuits filed between July 2012 and July 2013. Thirteen of these lawsuits, brought by direct purchasers, auto dealers and end-payors, have been consolidated in the Occupant Safety Systems (OSS) segment of the Automobile Parts Antitrust Litigation, a Multi-District Litigation (MDL) proceeding in the United States District Court for the Eastern District of Michigan. Based on current schedules, substantive discovery in the OSS segment of the MDL, which includes Autoliv, is not likely to begin before May 2014. The other three lawsuits are pending in Canada (Sheridan Chevrolet Cadillac Ltd. et al. v. Autoliv, Inc. et al., filed in the Ontario Superior Court of Justice on January 18, 2013; M. Serge Asselin v. Autoliv, Inc. et al., filed in the Superior Court of Quebec on March 14, 2013; and Ewert v. Autoliv, Inc. et al., filed in the Supreme Court of British Columbia on July 18, 2013). The Canadian cases assert claims on behalf of putative classes of auto dealers and end-payors. Substantive discovery in those cases will likely be deferred pending a ruling in an unrelated case by the Supreme Court of Canada on whether indirect purchasers can sue for antitrust damages.

Plaintiffs in the above U.S. and Canadian civil antitrust class actions generally allege that the defendants have engaged in long-running global conspiracies to fix the prices of occupant safety systems or components thereof in violation of various antitrust laws and unfair or deceptive trade practice statutes. Plaintiffs seek to represent purported classes of direct purchasers, auto dealers and end-payors (e.g. consumers) who purchased occupant safety systems or components either directly from a defendant or indirectly through purchases of new vehicles containing such systems. Plaintiffs seek injunctive relief, treble damages and attorneys' fees. The plaintiffs in these cases make allegations that

extend significantly beyond the specific admissions of the plea discussed above. The Company denies these overly broad allegations and intends to actively defend itself against the same. While it is probable that the Company will incur losses as a result of these antitrust cases, the duration or ultimate outcome of these cases currently cannot be predicted or estimated and no provision for a loss has been recorded as of September 30, 2013.

On April 17, 2013, the Construction Laborers Pension Trust of Greater St. Louis (Plaintiff) filed a purported class action securities lawsuit against Autoliv and two of its officers in the United States District Court for the Southern District of New York (Civil Action File No. 13-CIV-2546). On October 21, 2013, Plaintiff filed an amended complaint in that lawsuit, adding as a third individual defendant an employee of one of the Company's subsidiaries. The amended complaint alleges misrepresentations or failures to disclose material facts that artificially inflated the Company's stock price in violation of the federal securities laws, in particular Section 10(b) and Section 20(a) of the Securities Exchange Act of 1934, as amended, and failed to disclose prior to June 6, 2012 that employees had engaged in certain price fixing activity in violation of the law and that the Company's prior financial results allegedly had been inflated as a result of the anti-competitive activity. Plaintiff purports to bring this lawsuit on behalf of a class of purchasers of common stock of the Company between October 26, 2010 and July 21, 2011. Plaintiff seeks to recover damages in an unspecified amount. The Company and its two officers deny any wrongdoing, believe the claims are baseless, and will defend accordingly.

Product Warranty, Recalls and Intellectual Property

Autoliv is exposed to various claims for damages and compensation if products fail to perform as expected. Such claims can be made, and result in costs and other losses to the Company, even where the product is eventually found to have functioned properly. Where a product (actually or allegedly) fails to perform as expected the Company faces warranty and recall claims. Where such (actual or alleged) failure results, or is alleged to result, in bodily injury and/or property damage, the Company may also face product-liability claims. There can be no assurance that the Company will not experience material warranty, recall or product (or other)

Table of Contents

liability claims or losses in the future, or that the Company will not incur significant costs to defend against such claims. The Company may be required to participate in a recall involving its products. Each vehicle manufacturer has its own practices regarding product recalls and other product liability actions relating to its suppliers. As suppliers become more integrally involved in the vehicle design process and assume more of the vehicle assembly functions, vehicle manufacturers are increasingly looking to their suppliers for contribution when faced with recalls and product liability claims. A warranty, recall or product-liability claim brought against the Company in excess of its insurance may have a material adverse effect on the Company's business. Vehicle manufacturers are also increasingly requiring their outside suppliers to guarantee or warrant their products and bear the costs of repair and replacement of such products under new vehicle warranties. A vehicle manufacturer may attempt to hold the Company responsible for some, or all, of the repair or replacement costs of products when the product supplied did not perform as represented by us or expected by the customer. Accordingly, the future costs of warranty claims by the customers may be material. However, the Company believes its established reserves are adequate to cover potential warranty settlements. Autoliv's warranty reserves are based upon the Company's best estimates of amounts necessary to settle future and existing claims. The Company regularly evaluates the appropriateness of these reserves, and adjusts them when appropriate. However, the final amounts determined to be due related to these matters could differ materially from the Company's recorded estimates.

In addition, the global platforms and procedures used by vehicle manufacturers have led to quality performance evaluations being conducted on an increasingly global basis. Any one or more quality, warranty or other recall issue(s) (including those affecting few units and/or having a small financial impact) may cause a vehicle manufacturer to implement measures such as a temporary or prolonged suspension of new orders, which may have a material impact on the Company's results of operations.

The Company believes that it is currently reasonably insured against recall and product liability risks, at levels sufficient to cover potential claims that are reasonably likely to arise in the Company's businesses based on past experience. Autoliv cannot assure that the level of coverage will be sufficient to cover every possible claim that can arise in our businesses, now or in the future, or that such coverage always will be available should we, now or in the future, wish to extend or increase insurance.

In its products, the Company utilizes technologies which may be subject to intellectual property rights of third parties. While the Company does seek to identify the intellectual property rights of relevance to its products, and to procure the necessary rights to utilize such intellectual property rights, we may fail to do so. Where the Company so fails, the Company may be exposed to material claims from the owners of such rights. Where the Company has sold products which infringe upon such rights, our customers may be entitled to be indemnified by us for the claims they suffer as a result thereof. Such claims could be material.

The table in Note 7 Product-Related Liabilities above summarizes the change in the balance sheet position of the product related liabilities for the three and nine months ended September 30, 2013 and September 30, 2012, respectively.

12 Earnings per share

The Company calculates basic earnings per share (EPS) by dividing net income attributable to controlling interest by the weighted-average number of common shares outstanding for the period (net of treasury shares). When it would not be antidilutive (such as during periods of net loss), the diluted EPS also reflects the potential dilution that could occur if common stock were issued for awards under the Stock Incentive Plan.

Edgar Filing: AUTOLIV INC - Form 10-Q

For the three and nine months ended September 30, 2013, approximately 0.0 million and 0.0 million common shares, respectively, were not included in the computation of the diluted EPS, which could potentially dilute basic EPS in the future.

During the nine months ended September 30, 2013 and September 30, 2012 approximately 0.4 million and 0.4 million shares, respectively, from the treasury stock have been utilized by the Stock Incentive Plan.

Actual weighted average shares used in calculating earnings per share were:

(In millions)	Three months ended		Nine months ended	
	September 30, 2013	September 30, 2012	September 30, 2013	September 30, 2012
Weighted average shares basic	95.8	95.4	95.7	92.8
Effect of dilutive securities:				
- stock options/share awards	0.4	0.3	0.3	0.3
- equity units ¹⁾		0.0		1.8
Weighted average shares diluted	96.2	95.7	96.0	94.9

Table of Contents

- 1) For the three and nine months ended September 30, 2012, 0.0 million and 1.8 million shares, respectively, were included in the dilutive weighted average share amount related to the Equity Units. The number of shares that were issued on April 30, 2012, related to the final settlement of the Equity Units, was approximately 5.8 million. This reflects the effect from the exchange of Equity Units discussed in Note 9 and takes into account all previously paid dividends, including the dividend paid in the first quarter 2012.

13 Subsequent Events

There were no reportable events subsequent to September 30, 2013.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion and analysis should be read in conjunction with our Consolidated Financial Statements and accompanying Notes thereto included elsewhere herein and with our Annual Report on Form 10-K for the year ended December 31, 2012 filed with the United States Securities and Exchange Commission (the SEC) on February 22, 2013. Unless otherwise noted, all dollar amounts are in millions.

Autoliv, Inc. (Autoliv or the Company) is a Delaware corporation with its principal executive offices in Stockholm, Sweden. It was created from the merger of Autoliv AB (AAB) and the automotive safety products business of Morton International, Inc., in 1997. The Company functions as a holding corporation and owns two principal subsidiaries, AAB and Autoliv ASP, Inc. (ASP).

AAB and ASP are leading developers, manufacturers and suppliers to the automotive industry of automotive safety systems with a broad range of product offerings, including modules and components for passenger and driver-side airbags, side-impact airbag protection systems, seatbelts, steering wheels, safety electronics, whiplash protection systems and child seats, including components for such systems, as well as vision and night vision systems, radar and other active safety systems.

Autoliv's filings with the SEC, which include this Quarterly Report on Form 10-Q, annual reports on Form 10-K, current reports on Form 8-K, insider transaction reports on Forms 3 and 4 and all related amendments, are made available free of charge on our corporate website at www.autoliv.com and are available as soon as reasonably practicable after they are electronically filed with the SEC.

Shares of Autoliv common stock are traded on the New York Stock Exchange under the symbol ALV. Swedish Depository Receipts representing shares of Autoliv common stock (SDRs) trade on NASDAQ OMX Stockholm under the symbol ALIV SDB, and options in SDRs trade on the same exchange under the name Autoliv SDB. Options in Autoliv shares are traded on NASDAQ OMX Philadelphia and NYSE Amex Options under the symbol ALV. Our fiscal year ends on December 31.

Non-U.S. GAAP financial measures

Some of the following discussions refer to non-U.S. GAAP financial measures: see Organic sales, Operating working capital and Net (cash) debt. Management believes that these non-U.S. GAAP financial measures assist investors in analyzing trends in the Company's business. Additional descriptions regarding management's use of these financial measures are included below. Investors should consider these non-U.S. GAAP financial measures in addition to, rather than as a substitute for, financial reporting measures prepared in accordance with U.S. GAAP. These historical non-U.S. GAAP financial measures have been identified as applicable in each section of this report with a tabular presentation reconciling them to U.S. GAAP. It should be noted that these measures, as defined, may not be comparable to similarly titled measures used by other companies.

RESULTS OF OPERATIONS

Overview

The Company had a solid quarter, delivering strong growth and better than expected margins. As in the previous quarter, China and Active Safety products contributed significantly to Autoliv's strong growth, while operational issues and currencies negatively affected our margins.

The Company recently held an opening ceremony for our new propellant plant in China, the Company's biggest investment to date, which will start production in the beginning of 2014. This is another important step in the Company's investment strategy, a strategy which will support Autoliv's strong growth and build long term competitive advantage as we continue to build the most geographically dispersed global footprint in our industry.

Looking forward, the Company expects strong growth to continue into the fourth quarter, again driven largely by China and Active Safety, but also by important model launches and production ramp-ups in Europe, Japan and Brazil. In addition to the Company's strong growth in Active Safety, it targets to achieve the long term Company margin range of 8% to 9% for this business in the next two to three years. Based on strong order intake over the last few years the Company further believes it is gaining market share in certain product areas.

Table of Contents

In parallel with these positive developments, the Company is challenged to continue the transition of its European footprint at the highest possible pace. An increasing part of the Company's growth is also coming from Europe where it has a currently unfavorable situation and from Brazil where it has supply chain challenges. These challenges in combination with the Company's investments in Active Safety will continue to put pressure on its margins leading into 2014.

The Company's current growth shows that it has the right strategy and as it executes towards its strategic targets as outlined at its capital markets day and completes its current company transformation, we will build an even stronger Autoliv. In the future the Company envisions that its products and systems will save 150,000 lives every year.

The following table shows some of the Company's key ratios. Management uses these measures internally as a means of analyzing the Company's current and future financial performance and our core operations as well as identifying trends in our financial conditions and results of operations. We have provided this information to investors to assist in meaningful comparisons of past and present operating results and to assist in highlighting the results of ongoing core operations. These ratios are more fully explained in this Item 2 Management's Discussion and Analysis of Financial Condition and Results of Operations and should be read in conjunction with the consolidated financial statements in our Annual Report on Form 10-K for the year ended December 31, 2012 and the unaudited condensed consolidated financial statements in this Quarterly Report on Form 10-Q.

THREE MONTHS ENDED SEPTEMBER 30, 2013 COMPARED WITH THREE MONTHS ENDED SEPTEMBER 30, 2012

Market overview

During the three month period from July-September 2013, global Light Vehicle Production (LVP) is estimated by IHS to have increased by almost 4% compared to the same quarter in 2012. This was a slightly larger increase than the 3% growth expected by IHS in July.

In *Europe*, where Autoliv generates more than 30% of its sales, LVP is estimated to have grown by over 2%. This was 5 pp better than IHS's expectations in July. In Western Europe, the LVP is estimated to have grown by 2% compared to the 3% decline expected at the beginning of the quarter. In Eastern Europe the LVP is estimated to have grown by over 3% compared to a 2% decline expected at the beginning of the quarter.

Table of Contents

In the *Americas*, which constitutes roughly 35% of Autoliv's sales, LVP increased by 6%, which was in line with IHS's expectations in July. In North America the increase was 6%, more than 1 pp lower than the previous expectation. In South America the increase was over 4%, a 5 pp improvement compared to the July estimate.

In *China*, which accounts for more than 15% of Autoliv's sales, LVP grew by 8%, an improvement of 1 pp compared to the July expectations.

In *Japan*, which accounts for almost 10% of Autoliv's sales, LVP grew by almost 2%, 2 pp better than expected.

In the *Rest of Asia (RoA)*, which represents approximately 10% of Autoliv's sales, LVP was flat compared to the 3% increase expected in July. Virtually the entire difference came from South Korea, where LVP increased by 2% compared to a previously expected increase of 14%.

Consolidated Sales

The Company has substantial operations outside the United States and at the present time approximately 75% of its sales are denominated in currencies other than the U.S. dollar. This makes the Company and its performance in regions outside the United States sensitive to changes in U.S. dollar exchange rates when translated. The measure

Organic sales presents the increase or decrease in the Company's overall U.S. dollar net sales on a comparative basis, allowing separate discussion of the impacts of acquisitions/divestments and exchange rate fluctuations and our ongoing core operations and results. The tabular reconciliations below for Sales by Product and Sales by Region present the change in Organic sales reconciled to the change in the total net sales for the three months ended September 30, 2013 as can be derived from our unaudited condensed consolidated financial statements set forth in this Quarterly Report on Form 10-Q.

Compared to the third quarter of 2012, consolidated sales increased by close to 9% to \$2,119 million. This consolidated sales growth compares favorably to the growth of around 5% expected at the beginning of the quarter. Currency effects were negligible, giving organic sales (non-U.S. GAAP measure, see reconciliation tables below) growth of close to 9%. The reason that Autoliv exceeded its quarterly guidance was higher than expected organic sales growth in all regions, primarily in Europe where LVP volumes were higher than previously expected. Favorable vehicle mix in China also contributed to our sales growth.

Sales by Product

Sales of *airbag products* (including steering wheels and passive safety electronics) increased by over 7% to \$1,364 million compared to the same quarter in 2012. Excluding negative currency effects, airbag sales grew by 8% organically (non-U.S. GAAP measure, see reconciliation table below). Sales were particularly strong in Asia with 15% organic growth (non-U.S. GAAP measure) and with knee airbags which globally grew by around 50% organically (non-U.S. GAAP measure).

Sales of *seatbelt products* increased by 6% to \$659 million compared to the same quarter in 2012. Excluding positive currency effects of around 1%, organic sales (non-U.S. GAAP measure, see reconciliation table below) grew by 5%. The strongest growth came from well-performing platforms and production ramp-ups of active seatbelts in Europe as well as production ramp-ups in China.

Sales of *active safety products* (automotive radars, night vision systems and vision cameras with driver assist systems) grew by around 69% to \$96 million compared to the same quarter in 2012. Excluding close to 2 pp positive currency effects, organic sales (non-U.S. GAAP measure, see reconciliation table below) grew by 67%. This strong growth was

primarily driven by the continued roll-out of Collision Prevention Assist for Mercedes and the start of production of Mercedes new S-Class. Production ramp-ups within several GM brands also contributed to the growth.

Reconciliation of the change in Organic sales to GAAP financial measure

Components of net sales increase (decrease)

Three months ended September 30, 2013

	(Dollars in millions)							
	Airbag products		Seatbelt products		Active safety products		Total	
	%	\$	%	\$	%	\$	%	\$
Organic sales change	8.0	101.3	4.9	30.5	66.9	38.2	8.7	170.0
Effect of exchange rates	(0.5)	(6.1)	1.2	7.1	1.7	0.9	0.1	1.9
Impact of acquisitions/divestments								
Reported net sales change	7.5	95.2	6.1	37.6	68.6	39.1	8.8	171.9

Table of Contents**Sales by Region**

Autoliv's third quarter sales outgrew the global LVP with 5%. All regions grew faster organically (non-U.S. GAAP measure) than the LVP, **Europe** by more than 2%, **the Americas** by close to 4% and **Asia** by close to 8%.

Consolidated sales from Autoliv's **European companies** increased by 10% to \$645 million. This included positive currency effects of more than 5%, resulting in an organic sales (non-U.S. GAAP measure, see reconciliation table below) growth of close to 5%. Autoliv's strong performance primarily resulted from higher sales to well-performing premium brands such as BMW, Jaguar/Land Rover and Maserati. Strong sales for several other high Autoliv content vehicles such as Renault's Clio, Peugeot's 2008 and Volvo's V40 also contributed.

Consolidated sales from Autoliv's **companies in the Americas** increased by over 9% to \$757 million. Currency effects were negligible resulting in over 9% organic sales (non-U.S. GAAP measure, see reconciliation table below) growth. In North America Autoliv's growth was mainly due to Collision Prevention Assist related sales to Mercedes. Growth also came from high sales of Ford's Fusion, as well as Nissan's Pathfinder and recently launched Sentra.

Consolidated sales from Autoliv's **companies in China** increased by close to 21% to \$342 million. Excluding positive currency effects of close to 4%, organic sales (non-U.S. GAAP measure, see reconciliation table below) growth was around 17%. This strong performance in China was driven by continued strong demand for high Autoliv content vehicles, especially with Chinese OEMs such as Great Wall's Haval H6 and Jianghuai Auto's Refine S5, as well as Ford's Kuga and Hyundai's Santa Fe.

Consolidated sales from Autoliv's **companies in Japan** declined by close to 14% to \$173 million. Excluding a 21% negative currency effect, organic sales (non-U.S. GAAP measure, see reconciliation table below) grew by 7%. The sales increase was primarily related to the ramp-up of Mazda's CX-5, Toyota's Land Cruiser Prado and RAV 4, all successful export models.

Consolidated sales from Autoliv's **companies in RoA** increased by 9% to \$202 million. Excluding a 1% positive effect from currencies, organic sales (non-U.S. GAAP measure, see reconciliation table below) increased by 8%. This increase was driven by sales increases in South Korea for Hyundai's ix35 and Kia's Sportage and in India by increases with Suzuki, especially A-Star, and Hyundai's recently launched i10. This increase was also due to production ramp-ups in Thailand for Mitsubishi's Mirage and Montero Sport.

Reconciliation of the change in Organic sales to GAAP financial measure**Components of net sales increase (decrease)****Three months ended September 30, 2013**

	(Dollars in millions)											
	Europe		Americas		Japan		China		RoA		Total	
	%	\$	%	\$	%	\$	%	\$	%	\$	%	\$
Organic sales change	4.7	27.4	9.3	64.6	7.1	14.1	17.2	48.6	8.2	15.3	8.7	170.0
Effect of exchange rates	5.3	31.4	0.1	0.7	(20.9)	(41.8)	3.5	10.0	0.9	1.6	0.1	1.9
Impact of acquisitions/divestments												

Reported net sales change	10.0	58.8	9.4	65.3	(13.8)	(27.7)	20.7	58.6	9.1	16.9	8.8	171.9
Earnings												

For the third quarter 2013 gross profit amounted to \$405 million and gross margin to 19.1%, compared to \$388 million and 19.9% respectively, during the same quarter last year. The higher gross profit was mainly driven by our sales growth, while the decline in gross margin was mainly due to operational inefficiencies in Europe and adverse currency effects.

Operating income was \$182 million, or 8.6% of sales, compared to \$187 million, or 9.6% of sales for the third quarter of 2012. Research, Development and Engineering (R, D&E) net, was more than \$23 million higher, due to higher costs and unusually high engineering income in the third quarter of 2012. Costs related to antitrust investigations and capacity alignments of \$3 million reduced the operating margin by almost 0.2 pp.

Table of Contents

Excluding these costs, operating margin was 8.8% (non-U.S. GAAP measure) for the quarter compared to our expectation of around 8.5%. This improvement is driven by the higher than expected organic sales (non-U.S. GAAP measure) growth in the quarter.

Income before taxes increased by \$2 million to \$177 million, despite the lower operating income. Income attributable to controlling interest was \$124 million, compared to \$117 million for the third quarter of 2012. The effective tax rate was 29.3% compared to 32.6% for the same quarter of 2012. In the third quarter of 2012 discrete tax items, net increased the tax rate by 4.1 pp. This quarter the discrete tax items, net are negligible.

Earnings Per Share (EPS) assuming dilution improved by 6 cents, or 5%, to \$1.29, mainly due to a lower effective tax rate and lower interest expense, net. The weighted average number of shares outstanding assuming dilution increased by 0.5% to 96.2 million from 95.7 million during the same quarter of 2012.

NINE MONTHS ENDED SEPTEMBER 30, 2013 COMPARED WITH NINE MONTHS ENDED SEPTEMBER 30, 2012

Market overview

During the nine-month period from January – September 2013, global LVP is estimated by IHS to have increased by more than 2%.

In *Europe*, LVP decreased by more than 1%. In Western Europe the decline was 3%, while LVP in Eastern Europe increased by 1%.

In the *Americas*, LVP increased by 6%. In North America the increase was 5% and in South America 11%.

In *China*, LVP grew by 11% and in the *RoA* by 1%.

In *Japan*, LVP declined by more than 8% compared to the same period in 2012, partly due to the 2012 build-up phase after the 2011 earthquake and tsunami affecting the comparison.

Consolidated Sales

The Company has substantial operations outside the United States and at the present time approximately 75% of its sales are denominated in currencies other than the U.S. dollar. This makes the Company and its performance in regions outside the United States sensitive to changes in U.S. dollar exchange rates when translated. The measure *Organic sales* presents the increase or decrease in the Company's overall U.S. dollar net sales on a comparative basis, allowing separate discussion of the impacts of acquisitions/divestments and exchange rate fluctuations and our ongoing core operations and results. The tabular reconciliations below for *Sales by Product* and *Sales by Region* present the change in *Organic sales* reconciled to the change in the total net sales for the nine months ended September 30, 2013 as can be derived from our unaudited condensed consolidated financial statements set forth in this Quarterly Report on Form 10-Q.

For the first nine months of 2013, consolidated sales increased by close to 4% to \$6,452 million, compared to the same period in 2012. Sales were negatively impacted by \$20 million from adverse currency effects and by \$17 million from a divestiture in 2012. Excluding these negative effects the organic sales (non-U.S. GAAP measure, see reconciliation tables below) increase was more than 4%.

Sales by Product

Sales of **airbag products** grew by close to 3% to \$4,167 million. Excluding adverse currency effects organic sales (non-U.S. GAAP measure, see reconciliation table below) grew by over 3%.

Sales of **seatbelt products** grew by 2% to \$2,041 million. Excluding positive currency effects and a negative effect from a small divestiture in 2012, organic sales (non-U.S. GAAP measure, see reconciliation table below) grew by more than 2%.

Sales of **active safety** products increased by close to 59% to \$244 million. Excluding a positive currency effect of 1%, organic sales (non-U.S. GAAP measure, see reconciliation table below) increased by close to 58%.

Table of Contents**Reconciliation of the change in Organic sales to GAAP financial measure****Components of net sales increase (decrease)****Nine months ended September 30, 2013****(Dollars in millions)**

	Airbag products		Seatbelt products		Active safety products		Total	
	%	\$	%	\$	%	\$	%	\$

Reported net sales change	2.6	104.9	2.1	41.7	58.5	90.1	3.8	236.7

Sales by Region

Sales from Autoliv's *European companies* increased by 1% to \$2,040 million. Excluding positive currency effects of close to 3% and the negative effect from a 2012 divestiture, organic sales (non-U.S. GAAP measure, see reconciliation table below) decreased by almost 1%.

Sales from Autoliv's *companies in the Americas* increased by close to 7% to \$2,301 million. Excluding positive currency effects, the organic sales (non-U.S. GAAP measure, see reconciliation table below) growth was 6%.

Sales from Autoliv's *companies in China* increased by over 21% to \$969 million. Excluding positive currency effects, the organic sales (non-U.S. GAAP measure, see reconciliation table below) growth was 19%.

Sales from Autoliv's *companies in Japan* decreased by 22%, to \$505 million. Excluding negative currency effects of 18%, the organic sales (non-U.S. GAAP measure, see reconciliation table below) decrease was close to 5%.

Sales from Autoliv's *companies in the RoA* increased by 7% to \$637 million. Excluding positive currency effects of close to 2%, the organic sales (non-U.S. GAAP measure, see reconciliation table below) growth was over 5%.

Reconciliation of the change in Organic sales to GAAP financial measure**Components of net sales increase (decrease)****Nine months ended September 30, 2013****(Dollars in millions)**

	Europe		Americas		Japan		China		RoA		Total	
	%	\$	%	\$	%	\$	%	\$	%	\$	%	\$

Reported net sales												
change	1.2	24.8	6.8	146.8	(22.4)	(146.1)	21.2	169.4	7.0	41.8	3.8	236.7
Earnings												

Gross profit amounted to \$1,250 million and gross margin to 19.4% compared to \$1,251 million and 20.1%, respectively, in the first nine months of 2012. The decline in gross margin was mainly due to operational inefficiencies in Europe and adverse currency effects.

Table of Contents

Operating income increased by \$28 million to \$559 million. Operating margin increased by 0.2 pp to 8.7%. Costs for the capacity alignment program were over \$7 million and costs related to the antitrust investigations were \$6 million. These costs were \$66 million lower than in the same period of 2012. Excluding these costs the operating margin (non-U.S. GAAP measure) was 8.9% compared to 9.8% for the same period last year, primarily affected by \$30 million higher R, D&E net, operational inefficiencies and adverse currency effects.

Income before taxes increased by \$41 million to \$539 million, which was \$13 million more than the increase in operating income, mainly due to lower interest expense.

Net income attributable to controlling interest amounted to \$386 million compared to \$344 million for the same period in 2012. Income tax expense was \$150 million. The effective tax rate was 27.8% compared to 30.7% for the same nine month period last year. Discrete tax items, net caused a decrease in the tax rate in 2013 of 0.5 pp versus an increase of 1.7 pp for the same period last year. The country mix effect in 2013 compared favorably to 2012.

Earnings Per Share (EPS) amounted to \$4.02 assuming dilution compared to \$3.63 for the same period of 2012. EPS was positively affected by 51 cents from lower costs related to antitrust investigations and capacity alignments, by 16 cents from a lower effective tax rate and 6 cents from lower interest expense, net. This was partly offset by a 28 cent decrease from lower underlying operating profit and by a 5 cent decrease from having a higher number of shares outstanding. The average number of shares outstanding increased by 1% to approximately 96 million assuming dilution.

LIQUIDITY AND SOURCES OF CAPITAL

Cash flow from operations amounted to \$206 million during the quarter, compared to \$131 million for the same period last year. The strong improvement was mainly due to timing-related effects in working capital.

Cash flow provided by operating activities less used in investing activities amounted to \$112 million during the quarter, compared to \$32 million during the same quarter of 2012. During the first nine months operations generated \$539 million in cash, compared to \$447 million for the same period in 2012. Cash flow provided by operating activities less used in investing activities for the first nine months amounted to \$270 million, compared to \$189 million for the same period in 2012.

Capital expenditures, net of \$93 million were \$22 million more than depreciation and amortization expense in the quarter and \$5 million less than capital expenditures during the same quarter of 2012. During the quarter capital expenditures, net were 4.4% of sales, down from 5.0% in the third quarter of 2012. During the first nine months capital expenditures, net amounted to \$267 million and depreciation and amortization to \$211 million compared to \$261 million and \$204 million, respectively, in the same period in 2012.

Operating working capital (non-U.S. GAAP measure, see reconciliation table below) decreased to 7.9% of sales compared to 8.0% at the end of the previous quarter. The Company has a target that working capital in relation to the last 12 month sales, should not exceed 10%.

Account receivables increased in relation to sales to 73 days outstanding from 72 days on June 30, 2013 and was unchanged compared to September 30, 2012. Days inventory outstanding increased to 31 days from 29 days on June 30, 2013, but decreased from 32 days on September 30, 2012.

The Company uses the non-U.S. GAAP measure Operating working capital, as defined in the table below, in its communications with investors and for management's review of the development of the working capital cash

generation from operations. The reconciling items used to derive this measure are, by contrast, managed as part of the Company's overall cash and debt management, but they are not part of the responsibilities of day-to-day operations management.

Reconciliation of Operating working capital to GAAP financial measure

	(Dollars in millions)			
	September 30, 2013	June 30, 2013	December 31, 2012	September 30, 2012
Total current assets	\$ 3,708.9	\$ 3,595.1	\$ 3,289.2	\$ 3,302.3
Total current liabilities	(2,168.0)	(2,117.2)	(1,849.8)	(1,972.0)
Working capital	1,540.9	1,477.9	1,439.4	1,330.3
Cash and cash equivalents	(1,134.7)	(1,042.4)	(977.7)	(908.2)
Short-term debt	216.4	183.8	69.8	158.1
Derivative (asset) and liability, current	(0.2)	(0.0)	0.0	4.6
Dividends payable	47.9	47.8	47.7	47.7
Operating working capital	\$ 670.3	\$ 667.1	\$ 579.2	\$ 632.5

Table of Contents

The Company's net cash position (non-U.S. GAAP measure, see reconciliation table below) increased by \$76 million during the quarter to \$508 million on September 30, 2013. Gross interest-bearing debt was up \$16 million to \$640 million. During the quarter the Company paid out dividends of \$48 million. The Company's net cash position (non-U.S. GAAP measure, see reconciliation table below) increased to \$508 million on September 30, 2013 from \$361 million nine months earlier, despite dividend payments of \$144 million. Gross interest bearing debt increased by \$7 million to \$640 million.

As part of efficiently managing the Company's overall cost of funds, we routinely enter into debt-related derivatives (DRD) as part of our debt management. Creditors and credit rating agencies use net debt adjusted for DRD in their analyses of the Company's debt. Included in the DRD is also the unamortized fair value adjustment related to a discontinued fair value hedge which will be amortized over the remaining life of the debt. By adjusting for DRD, the total economic liability of net debt is disclosed without grossing it up with currency or interest fair values.

Reconciliation of Net (cash) debt to GAAP financial measure

	(Dollars in millions)			
	September 30, 2013	June 30, 2013	December 31, 2012	September 30, 2012
Short-term debt	\$ 216.4	\$ 183.8	\$ 69.8	\$ 158.1
Long-term debt	423.5	440.2	562.9	497.4
Total debt	639.9	624.0	632.7	655.5
Cash and cash equivalents	(1,134.7)	(1,042.4)	(977.7)	(908.2)
Debt-related derivatives	(13.5)	(13.8)	(15.8)	(12.1)
Net cash	\$ (508.3)	\$ (432.2)	\$ (360.8)	\$ (264.8)

During the quarter total equity increased by \$127 million to \$4,032 million, due to net income of \$125 million, positive currency effects of \$39 million, common stock incentives of \$9 million and pension liabilities of \$2 million, offset by dividends of \$48 million. During the first nine months total equity increased by \$256 million due to \$389 million from net income, \$21 million from common stock incentives and \$5 million from pension liabilities. This was partially offset by dividends of \$144 million and negative currency effects of \$15 million.

OFF-BALANCE SHEET ARRANGEMENTS

The Company does not have any off-balance sheet arrangements that have, or are reasonably likely to have, a material current or future effect on its financial position, results of operations or cash flows.

Headcount

Compared to the end of the previous quarter, total headcount (permanent employees and temporary personnel) increased by 1,956 persons to 55,511 on September 30, 2013. More than 1,800 of these additions were in low cost countries.

Currently, 72% of Autoliv's total headcount are direct workers in manufacturing, 71% are in low cost countries and 18% are temporary personnel. A year ago these ratios were 71%, 68% and 20%, respectively.

Outlook

For the fourth quarter Autoliv's consolidated sales are expected to grow by around 9% compared to the same quarter of 2012. Excluding negative currency effects organic sales are expected to grow by more than 9%. The operating margin is expected to be around 9%, excluding costs related to antitrust investigations and capacity alignments. The impact from operational inefficiencies, adverse currency effects and higher R, D&E costs are expected to offset the positive margin effect from the higher organic sales.

Full year 2013 organic sales growth is expected to be more than 5%, which is more than 1 pp above the previous indication for growth of around 4%. Consolidated sales growth is expected to be around 5% as currency effects and the effect from a 2012

Table of Contents

divestiture are expected to have a combined negative effect of about 0.5 pp. The operating margin expectation remains unchanged at around 9%, excluding costs related to the antitrust investigations and capacity alignments, as the effects from adverse currency movements, and operational inefficiencies, are expected to offset the benefit from the higher organic sales.

The costs for the capacity alignment program are now expected to be within the \$20 to \$40 million range, compared to the previous indication of \$25 to \$50 million. We now expect the effective tax rate for the full year to be around 28% (excluding any discrete items), up from the previous expectation of around 27%. This increase is primarily due to a shift in mix, where proportionately more earnings are generated from countries with higher tax rates. Operations are expected to generate approximately \$0.7 billion of cash flow and capital expenditures are expected to be around 4.5% of sales in 2013, both unchanged from previous indication.

OTHER RECENT EVENTS

Launches in the 3rd quarter 2013

Nissan's new X-Trail/Rogue: Inflatable curtains, side airbags and safety electronics.

BMW's new X5: Active seatbelts with pretensioners, night vision and vision system.

Hyundai's new i10: Driver airbag, passenger airbag, inflatable curtains, side airbags and safety electronics.

Honda's new Jade: Side airbags and seatbelts with pretensioners.

Guangzhou Auto's new GA3: Driver airbag with steering wheel, passenger airbag, inflatable curtains, side airbags and seatbelts with pretensioners.

BMW's new i3 and i8: Passenger airbag, side airbags, knee airbag, seatbelts with pretensioners and vision system.

Peugeot's new 308: Driver airbag with steering wheel, passenger airbag, seatbelts with pretensioners and safety electronics.

BMW's new 4-series: Inflatable curtains, side airbags, active seatbelts with pretensioners and vision system.

Honda's new Fit: Inflatable curtains.

Other Events

On August 13, 2013, Autoliv's Board of Directors renewed the Company's previous mandate to repurchase up to 3.2 million common shares. Autoliv's management can, subject to legal requirements, now initiate buybacks of Autoliv shares opportunistically at their own discretion. In addition to the required filings with the SEC, purchases under the buyback program would be communicated by the Company on its corporate website (www.autoliv.com/shares) shortly after the end of the calendar month in which the transactions were made.

In conjunction with the Frankfurt Auto show in September, Autoliv announced a new adaptable seatbelt for improved safety for all occupants, especially children. This unique new seatbelt can substantially reduce the load on small occupants while also improving the protection for larger occupants. It is a purely mechanical solution that offers adaptability to the occupant size and the severity of a crash at a reasonable cost.

Autoliv further introduced the world's first Night Vision Fusion System with high definition (HD) and enhanced pedestrian and animal detection. Debuting on the Mercedes' new S-Class, the dual-infrared camera system combines the advantages of a far infrared camera with the benefits of a near infrared camera to deliver the most advanced and effective night vision system ever featured on an automobile.

Dividend

The Company will pay, as previously announced, a quarterly dividend of 50 cents per share for the fourth quarter on Thursday, December 5, 2013 to Autoliv stockholders of record on the close of business on Wednesday, November 20, 2013. The ex-date when the shares will trade without the right to the dividend will be Monday, November 18, 2013.

Next Report

Autoliv intends to publish its quarterly earnings report for the fourth quarter 2013 on Friday, January 31, 2014.

Table of Contents

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

As of September 30, 2013, the Company's future contractual obligations have not changed materially from the amounts reported in the Annual Report on Form 10-K for the year ended December 31, 2012 filed with the SEC on February 22, 2013.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

As of September 30, 2013, there have been no material changes to the information related to quantitative and qualitative disclosures about market risk that was provided in the Company's Annual Report on Form 10-K for the year ended December 31, 2012 filed with the SEC on February 22, 2013.

ITEM 4. CONTROLS AND PROCEDURES

(a) Evaluation of Disclosure Controls and Procedures

An evaluation has been carried out, under the supervision and with the participation of the Company's management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of such period, the Company's disclosure controls and procedures are effective.

(b) Changes in Internal Control over Financial Reporting

There have not been any changes in the Company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the fiscal quarter to which this report relates that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

Various claims, lawsuits and proceedings are pending or threatened against the Company or its subsidiaries, covering a range of matters that arise in the ordinary course of its business activities with respect to commercial, product liability and other matters.

For further discussion of legal proceedings, see Note 11 Contingent Liabilities - Legal Proceedings to our unaudited condensed consolidated financial statements in this Quarterly Report on Form 10-Q.

Litigation is subject to many uncertainties, and the outcome of any litigation cannot be assured. After discussions with counsel, it is the opinion of management that the litigation to which the Company is currently a party will not have a material adverse impact on the consolidated financial position of Autoliv. The Company may, however, experience material product liability or other losses in the future.

The Company believes that it is currently adequately insured against product and other liability risks at levels sufficient to cover potential claims. The level of coverage may, however, be insufficient in the future or unavailable on the market.

ITEM 1A. RISK FACTORS

The risk factors set forth below are in addition to the risk factors previously disclosed in Part I, Item 1A. Risk Factors in our Annual Report on Form 10-K for the year ended December 31, 2012, filed with the SEC on February 22, 2013, which includes a detailed discussion of risk factors that could materially affect our business, financial condition or results of operations, and are incorporated herein by reference.

Table of Contents

We are subject to securities class action litigation in the U.S. and may be subject to additional litigation in the U.S. or elsewhere, including stockholder derivative actions or other claims, that could negatively impact our business

We are subject to a securities class action in the United States alleging a failure to disclose, or misrepresentation of material facts relating to, antitrust violations. The Company may be subject to additional, similar actions in the future, including stockholder derivative actions or other claims relating to antitrust or other issues. These types of lawsuits could require significant management time and attention and could result in significant expenses as well as unfavorable outcomes that could have a material adverse impact on our customer relationships, business prospects, reputation, operating results, cash-flows or financial results. Currently the duration or ultimate outcome of the securities litigation cannot be predicted or estimated.

We are subject to civil antitrust litigation in the U.S. and Canada following the DOJ settlement and may be subject to additional civil antitrust litigation in the U.S. or elsewhere that could negatively impact our business

Following the Company's guilty plea as part of the DOJ settlement, the Company and its competitors were sued in multiple purported class action lawsuits in the U.S. and Canada alleging violations of antitrust and related laws and seeking to recover treble damages for the alleged classes of direct purchasers, auto dealers and vehicle purchasers/lessees. The Company may be subject to additional civil antitrust lawsuits in the future in the U.S., Canada or in other countries that permit such civil claims, including lawsuits or other actions by our customers. These types of lawsuits require significant management time and attention and could result in significant expenses as well as unfavorable outcomes that could have a material adverse impact on our customer relationships, business prospects, reputation, operating results, cash-flows or financial results.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

Stock repurchase program

Since September 15, 2008, Autoliv has made no share repurchases. Since the repurchase program was adopted in 2000, Autoliv has repurchased 34.3 million of its shares at an average cost of US \$42.93 per share.

Under the existing authorizations, approximately another 3.2 million shares may be repurchased. We may from time to time repurchase our shares in the open market under the existing share repurchase program.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

Not applicable.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

Not applicable.
