At October 31, 2013, the concentration of the Trust s investments in the various states and territories, determined as a percentage of total investments, is as follows:

New York	12.4%
Texas	10.7%
Others, representing less than 10% individually	76.9%
	· · · · · · · · · · · · · · · · · · ·

The Trust invests primarily in debt securities issued by municipalities. The ability of the issuers of the debt securities to meet their obligations may be affected by economic developments in a specific industry or municipality. In order to reduce the risk associated with such economic developments, at October 31, 2013, 6.0% of total investments are backed by bond insurance of various financial institutions and financial guaranty assurance agencies. The aggregate percentage insured by an individual financial institution or financial guaranty assurance agency ranged from 1.5% to 2.6% of total investments.

(1) Security represents the municipal bond held by a trust that issues residual interest bonds.

(2) Security (or a portion thereof) has been pledged as collateral for residual interest bond transactions. The aggregate value of such collateral is \$28,502,160

The Trust did not have any open financial instruments at October 31, 2013.

Edgar Filing: Eaton Vance Municipal Income Term Trust - Form N-Q

The cost and unrealized appreciation (depreciation) of investments of the Trust at October 31, 2013, as determined on a federal income tax basis, were as follows:

Aggregate cost	\$ 196,466,396
Gross unrealized appreciation	\$ 2,044,527
Gross unrealized depreciation	(21,765,865)
Net unrealized depreciation	\$ (19,721,338)

Under generally accepted accounting principles for fair value measurements, a three-tier hierarchy to prioritize the assumptions, referred to as inputs, is used in valuation techniques to measure fair value. The three-tier hierarchy of inputs is summarized in the three broad levels listed below.

Level 1 quoted prices in active markets for identical investments

Level 2 other significant observable inputs (including quoted prices for similar investments, interest rates, prepayment speeds, credit risk, etc.)

Level 3 significant unobservable inputs (including a fund s own assumptions in determining the fair value of investments) In cases where the inputs used to measure fair value fall in different levels of the fair value hierarchy, the level disclosed is determined based on the lowest level input that is significant to the fair value measurement in its entirety. The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities.

At October 31, 2013, the hierarchy of inputs used in valuing the Trust s investments, which are carried at value, were as follows:

Asset Description	Level 1	Level 2	Level 3	Total
Tax-Exempt Investments	\$	\$ 307,000,058	\$	\$ 307,000,058
Total Investments	\$	\$ 307,000,058	\$	\$ 307.000.058

For information on the Trust s policy regarding the valuation of investments and other significant accounting policies, please refer to the Trust s most recent financial statements included in its semiannual report to shareholders.
