Unisys Corporation

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)

In the opinion of management, the financial information furnished herein reflects all adjustments necessary for a fair presentation of the financial position, results of operations, comprehensive income and cash flows for the interim periods specified. These adjustments consist only of normal recurring accruals except as disclosed herein. Because of seasonal and other factors, results for interim periods are not necessarily indicative of the results to be expected for the full year.

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions about future events. These estimates and assumptions affect the amounts of assets and liabilities reported, disclosures about contingent assets and liabilities and the reported amounts of revenue and expenses. Such estimates include the valuation of accounts receivable, inventories, outsourcing assets, marketable software, goodwill and other long-lived assets, legal contingencies, indemnifications, and assumptions used in the calculation for systems integration projects, income taxes and retirement and other post-employment benefits, among others. These estimates and assumptions are based on management's best estimates and judgment. Management evaluates its estimates and assumptions on an ongoing basis using historical experience and other factors, including the current economic environment, which management believes to be reasonable under the circumstances. Management adjusts such estimates and assumptions when facts and circumstances dictate. As future events and their effects cannot be determined with precision, actual results could differ significantly from these estimates. Changes in those estimates resulting from continuing changes in the economic environment will be reflected in the financial statements in future periods.

The company's accounting policies are set forth in detail in note 1 of the notes to the consolidated financial statements in the company's Annual Report on Form 10-K for the year ended December 31, 2013 filed with the Securities and Exchange Commission. Such Annual Report also contains a discussion of the company's critical accounting policies. The company believes that these critical accounting policies affect its more significant estimates and judgments used in the preparation of the company's consolidated financial statements. There have been no changes in the company's critical accounting policies from those disclosed in the company's Annual Report on Form 10-K for the year ended December 31, 2013.

a. Earnings per Common Share. The following table shows how the loss per common share attributable to Unisys Corporation was computed for the three months ended March 31, 2014 and 2013 (dollars in millions, shares in thousands):

	Three Months Ended March 31,	
	2014	2013
Basic Loss Per Common Share		
Net loss attributable to Unisys Corporation common shareholders	\$ (53.5)	\$ (33.9)
Weighted average shares	46,343	44,054
Total	\$ (1.15)	\$ (.77)
Diluted Loss Per Common Share		

Edgar Filing: UNISYS CORP - Form 10-Q

Net loss attributable to Unisys Corporation common shareholders	\$ (53.5)	\$ (33.9)
Add preferred stock dividends		
Net loss attributable to Unisys Corporation for diluted earnings per share	\$ (53.5)	\$ (33.9)
Weighted average shares	46,343	44,054
Plus incremental shares from assumed conversions		
Employee stock plans		
Preferred stock		
Adjusted weighted average shares	46,343	44,054
Total	\$ (1.15)	\$ (.77)

In the three months ended March 31, 2014 and 2013, the following weighted-average number of stock options and restricted stock units were antidilutive and therefore excluded from the computation of diluted earnings per share (in thousands): 3,619 and 3,648, respectively. In the three months ended March 31, 2014 and 2013, the following weighted-average number of mandatory convertible preferred stock was antidilutive and therefore excluded from the computation of diluted earnings per share (in thousands): 1,754 and 2,587, respectively.

b. Pension and Postretirement Benefits. Net periodic pension expense for the three months ended March 31, 2014 and 2013 is presented below (in millions of dollars):

	Three Months Ended March 31, 2014			Three Months Ended March 31, 2013		
	Total	U.S.	Int 1.	Total	U.S.	Int 1.
		Plans	Plans		Plans	Plans
Service cost	\$ 2.4	\$	\$ 2.4	\$ 2.6	\$	\$ 2.6
Interest cost	92.3	62.5	29.8	81.1	54.8	26.3
Expected return on plan assets	(112.7)	(72.0)	(40.7)	(108.0)	(73.0)	(35.0)
Amortization of prior service cost	(.3)	.2	(.5)	(.1)	.2	(.3)
Recognized net actuarial loss	37.8	27.8	10.0	47.6	34.9	12.7
Net periodic pension expense	\$ 19.5	\$ 18.5	\$ 1.0	\$ 23.2	\$ 16.9	\$ 6.3

In 2014, the company expects to make cash contributions of approximately \$234 million to its worldwide defined benefit pension plans, which is comprised of \$108 million primarily for non-U.S. defined benefit pension plans and \$126 million for the company's U.S. qualified defined benefit pension plan. In 2013, the company made cash contributions of \$147.2 million to its worldwide defined benefit pension plans. For the three months ended March 31, 2014 and 2013, \$55.5 million and \$26.6 million, respectively, of cash contributions have been made.

Net periodic postretirement benefit expense for the three months ended March 31, 2014 and 2013 is presented below (in millions of dollars):

	Three Months Ended March 31,	
	2014	2013
Service cost	\$.2	\$.1
Interest cost	2.0	2.0
Expected return on assets	(.1)	(.1)
Amortization of prior service cost	.4	.4
Recognized net actuarial loss	.8	1.4
Net periodic postretirement benefit expense	\$ 3.3	\$ 3.8

The company expects to make cash contributions of approximately \$19 million to its postretirement benefit plan in 2014 compared with \$18.0 million in 2013. For the three months ended March 31, 2014 and 2013, \$2.7 million and \$2.9 million, respectively, of cash contributions have been made.

c. Fair Value Measurements. Due to its foreign operations, the company is exposed to the effects of foreign currency exchange rate fluctuations on the U.S. dollar, principally related to intercompany account balances. The company uses

derivative financial instruments to reduce its exposure to market risks from changes in foreign currency exchange rates on such balances. The company enters into foreign exchange forward contracts, generally having maturities of one month, which have not been designated as hedging instruments. At March 31, 2014 and 2013, the notional amount of these contracts was \$486.0 million and \$393.3 million, respectively. At March 31, 2014 and 2013, the fair value of such contracts was a net gain of \$1.6 million and \$1.0 million, respectively, of which \$1.8 million and \$1.2 million, respectively, has been recognized in Prepaid expenses and other current assets and \$.2 million has been recognized in Other accrued liabilities in the company's consolidated balance sheet at both March 31, 2014 and 2013. For the three months ended March 31, 2014 and 2013, changes in the fair value of these instruments were a gain of \$2.4 million and a gain of \$3.0 million, respectively, which has been recognized in earnings in Other income (expense), net in the company's consolidated statement of income. The fair value of these forward contracts is based on quoted prices for similar but not identical financial instruments; as such, the inputs are considered Level 2 inputs.

Financial assets with carrying values approximating fair value include cash and cash equivalents and accounts receivable. Financial liabilities with carrying values approximating fair value include accounts payable and other accrued liabilities. The carrying amounts of these financial assets and liabilities approximate fair value due to their short maturities. At March 31, 2014 and December 31, 2013, the carrying amount of long-term debt was less than the fair value, which is based on market prices (Level 2 inputs), of such debt by approximately \$19 million and \$15 million, respectively.

d. Stock Options. Under stockholder approved stock-based plans, stock options, stock appreciation rights, restricted stock and restricted stock units may be granted to officers, directors and other key employees. At March 31, 2014, 2.3 million shares of unissued common stock of the company were available for granting under these plans.

The fair value of stock option awards was estimated using the Black-Scholes option pricing model with the following assumptions and weighted-average fair values:

	Three Months Ended March 31,	
	2014	2013
Weighted-average fair value of grant	\$ 11.28	\$ 8.86
Risk-free interest rate	1.04%	.54%
Expected volatility	45.65%	50.19%
Expected life of options in years	3.71	3.69
Expected dividend yield		

Restricted stock unit awards may contain time-based units, performance-based units or a combination of both. Each performance-based unit will vest into zero to 1.5 shares depending on the degree to which the performance goals are met. Compensation expense resulting from these awards is recognized as expense ratably for each installment from the date of grant until the date the restrictions lapse and is based on the fair market value at the date of grant and the probability of achievement of the specific performance-related goals.

The company records all share-based expense in selling, general and administrative expense.

During the three months ended March 31, 2014 and 2013, the company recorded \$7.2 million and \$5.9 million of share-based compensation expense, respectively, which is comprised of \$2.1 million and \$2.3 million of restricted stock unit expense and \$5.1 million and \$3.6 million of stock option expense, respectively.

A summary of stock option activity for the three months ended March 31, 2014 follows (shares in thousands):

Options	Shares	Weighted-Average Exercise Price	Weighted-Average Remaining Contractual Term (years)	Aggregate Intrinsic Value (\$ in millions)
Outstanding at December 31, 2013	2,698	\$ 32.74		
Granted	745	32.30		
Exercised	(232)	13.24		
Forfeited and expired	(132)	137.32		
Outstanding at March 31, 2014	3,079	29.65	3.10	\$ 11.2

Edgar Filing: UNISYS CORP - Form 10-Q

Expected to vest at March 31, 2014	1,446	27.24	4.22	6.0
Exercisable at March 31, 2014	1,579	31.88	2.03	5.1

The aggregate intrinsic value represents the total pretax value of the difference between the company's closing stock price on the last trading day of the period and the exercise price of the options, multiplied by the number of

in-the-money stock options that would have been received by the option holders had all option holders exercised their options on March 31, 2014. The intrinsic value of the company's stock options changes based on the closing price of the company's stock. The total intrinsic value of options exercised for the three months ended March 31, 2014 and 2013 was \$4.5 million and \$.6 million, respectively. As of March 31, 2014, \$6.3 million of total unrecognized compensation cost related to stock options is expected to be recognized over a weighted-average period of 2.1 years.

A summary of restricted stock unit activity for the three months ended March 31, 2014 follows (shares in thousands):

	Restricted Stock Units	Weighted- Average Grant-Date Fair Value
Outstanding at December 31, 2013	401	\$ 23.45
Granted	392	32.22
Vested	(73)	27.29
Forfeited and expired	(181)	23.88
Outstanding at March 31, 2014	539	29.15

The fair value of restricted stock units is determined based on the trading price of the company's common shares on the date of grant. The aggregate weighted-average grant-date fair value of restricted stock units granted during the three months ended March 31, 2014 and 2013 was \$12.6 million and \$4.7 million, respectively. As of March 31, 2014, there was \$12.0 million of total unrecognized compensation cost related to outstanding restricted stock units granted under the company's plans. That cost is expected to be recognized over a weighted-average period of 2.8 years. The aggregate weighted-average grant-date fair value of restricted share units vested during the three months ended March 31, 2014 and 2013 was \$2.0 million and \$4.2 million, respectively.

Common stock issued upon exercise of stock options or upon lapse of restrictions on restricted stock units is newly issued shares. Cash received from the exercise of stock options for the three months ended March 31, 2014 and 2013 was \$2.6 million and \$.5 million, respectively. The company is currently not recognizing any tax benefits from the exercise of stock options or upon issuance of stock upon lapse of restrictions on restricted stock units in light of its tax position. Tax benefits resulting from tax deductions in excess of the compensation costs recognized are classified as financing cash flows.

e. Segment Information. The company has two business segments: Services and Technology. Revenue classifications by segment are as follows: Services - systems integration and consulting, outsourcing, infrastructure services and core maintenance; Technology - enterprise-class software and servers and other technology.

The accounting policies of each business segment are the same as those followed by the company as a whole. Intersegment sales and transfers are priced as if the sales or transfers were to third parties. Accordingly, the Technology segment recognizes intersegment revenue and manufacturing profit on hardware and software shipments to customers under Services contracts. The Services segment, in turn, recognizes customer revenue and marketing profits on such shipments of company hardware and software to customers. The Services segment also includes the sale of hardware and software products sourced from third parties that are sold to customers through the company's Services channels. In the company's consolidated statements of income, the manufacturing costs of products sourced from the Technology segment and sold to Services customers are reported in cost of revenue for Services.

Also included in the Technology segment's sales and operating profit are sales of hardware and software sold to the Services segment for internal use in Services engagements. The amount of such profit included in operating income of the Technology segment for the three months ended March 31, 2014 and 2013 was \$.4 million and \$.3 million, respectively. The profit on these transactions is eliminated in Corporate.

The company evaluates business segment performance based on operating income exclusive of pension income or expense, restructuring charges and unusual and nonrecurring items, which are included in Corporate. All other corporate and centrally incurred costs are allocated to the business segments based principally on revenue, employees, square footage or usage.

Edgar Filing: UNISYS CORP - Form 10-Q

A summary of the company's operations by business segment for the three-month periods ended March 31, 2014 and 2013 is presented below (in millions of dollars):

	Total	Corporate	Services	Technology
Three Months Ended March 31, 2014				
Customer revenue	\$ 761.7		\$ 690.9	\$ 70.8
Intersegment		\$ (9.6)	.2	9.4
Total revenue	\$ 761.7	\$ (9.6)	\$ 691.1	\$ 80.2
Operating income (loss)	\$ (19.9)	\$ (16.3)	\$ 13.4	\$ (17.0)
Three Months Ended March 31, 2013

Customer revenue by classes of similar products or services, by segment, is presented below (in millions of dollars):

	Three Months Ended March 31	
	2014	2013
Services		
Systems integration and consulting	\$ 211.1	\$ 211.7
Outsourcing	341.5	361.3
Infrastructure services	92.8	105.1
Core maintenance	45.5	44.9
	690.9	723.0

Edgar Filing: UNISYS CORP - Form 10-Q

Technology		
Enterprise-class software and servers	62.7	80.0
Other technology	8.1	6.9
	70.8	86.9
Total	\$ 761.7	\$ 809.9

Geographic information about the company's revenue, which is principally based on location of the selling organization, is presented below (in millions of dollars):

	Three Months Ended March 31	
	2014	2013
United States	\$ 311.3	\$ 327.2
United Kingdom	96.3	102.1
Other foreign	354.1	380.6
Total	\$ 761.7	\$ 809.9

f. Accumulated Other Comprehensive Income. Accumulated other comprehensive loss as of December 31, 2013 and March 31, 2014 is as follows (in millions of dollars):

	Total	Translation Adjustments	Postretirement Plans
Balance at December 31, 2013	\$ (3,333.4)	\$ (676.8)	\$ (2,656.6)
Other comprehensive income before reclassifications	9.9	14.4	(4.5)
Amounts reclassified from accumulated other comprehensive income	36.6		36.6
Current period other comprehensive income	46.5	14.4	32.1
Balance at March 31, 2014	\$ (3,286.9)	\$ (662.4)	\$ (2,624.5)

Amounts related to postretirement plans not reclassified in their entirety out of accumulated other comprehensive income for the three months ended March 31, 2014 and 2013 were as follows (in millions of dollars):

	Three Months Ended March 31	
	2014	2013
Amortization of prior service cost*	\$.2	\$.2
Amortization of actuarial losses*	38.0	48.3
Total before tax	38.0	48.5
Income tax benefit	(1.4)	(1.8)
Net of tax	\$ 36.6	\$ 46.7

* These items are included in net periodic postretirement cost (see note (b)).

Noncontrolling interests as of December 31, 2013 and March 31, 2014 is as follows (in millions of dollars):

	Noncontrolling Interests
Balance at December 31, 2013	\$ 36.6
Net income	3.1
Translation adjustments	.5
Postretirement plans	.5
Sale of subsidiary	1.5
Balance at March 31, 2014	\$ 42.2

g. Supplemental Cash Flow Information. Cash paid, net of refunds, during the three months ended March 31, 2014 and 2013 for income taxes was \$13.2 million and \$14.7 million, respectively.

Cash paid during the three months ended March 31, 2014 and 2013 for interest was \$6.6 million and \$6.3 million, respectively.

h. Commitments and Contingencies. There are various lawsuits, claims, investigations and proceedings that have been brought or asserted against the company, which arise in the ordinary course of business, including actions with respect to commercial and government contracts, labor and employment, employee benefits, environmental matters, intellectual property, and non-income tax and employment compensation in Brazil. The company records a provision for these matters when it is both probable that a liability has been incurred and the amount of the loss can be reasonably estimated. Any provisions are reviewed at least quarterly and are adjusted to reflect the impact and status of settlements, rulings, advice of counsel and other information and events pertinent to a particular matter.

The company believes that it has valid defenses with respect to legal matters pending against it. Based on its experience, the company also believes that the

damage amounts claimed in the lawsuits disclosed below are not a meaningful indicator of the company's potential liability. Litigation is inherently unpredictable, however, and it is possible that the company's results of operations or cash flow could be materially affected in any particular period by the resolution of one or more of the legal matters pending against it.

In April 2007, the Ministry of Justice of Belgium sued Unisys Belgium SA-NV, a Unisys subsidiary (Unisys Belgium), in the Court of First Instance of Brussels. The Belgian government had engaged the company to design and develop software for a computerized system to be used to manage the Belgian court system. The Belgian State terminated the contract and in its lawsuit has alleged that the termination was justified because Unisys Belgium failed to deliver satisfactory software in a timely manner. It claims damages of approximately 28 million Euros. Unisys Belgium filed its defense and counterclaim in April 2008, in the amount of approximately 18.5 million Euros. The company believes it has valid defenses to the claims and contends that the Belgian State's termination of the contract was unjustified.

In December 2007, Lufthansa AG sued Unisys Deutschland GmbH, a Unisys subsidiary (Unisys Germany), in the District Court of Frankfurt, Germany, for allegedly failing to perform properly its obligations during the initial phase of a 2004 software design and development contract relating to a Lufthansa customer loyalty program. Under the contract, either party was free to withdraw from the project at the conclusion of the initial design phase. Rather than withdraw, Lufthansa instead terminated the contract and failed to pay the balance owed to Unisys Germany for the initial phase. Lufthansa's lawsuit alleges that Unisys Germany breached the contract by failing to deliver a proper design for the new system and seeks approximately 21.4 million Euros in damages. The company believes it has valid defenses and filed its defense and a counterclaim in the amount of approximately 1.5 million Euros. In July 2013, the District Court issued a decision finding Unisys Germany liable for failing to perform its obligations under the initial phase of the contract. It also dismissed Unisys Germany's counterclaim. The District Court did not conduct the damage phase of the proceeding. Unisys Germany appealed the decision on liability in August 2013. The company and outside counsel believe that the District Court decision is flawed and that there are very good arguments to challenge it. Under German law, the appellate court will review the case *de novo* without deference to the factual findings or legal conclusions of the District Court.

The company's Brazilian operations, along with those of many other companies doing business in Brazil, are involved in various litigation matters, including numerous governmental assessments related to indirect and other taxes, as well as disputes associated with former employees and contract labor. The tax-related matters pertain to value added taxes, customs, duties, sales and other non-income related tax exposures. The labor-related matters include claims related to compensation matters. The company believes that appropriate accruals have been established for such matters based on information currently available. At March 31, 2014, excluding those matters that have been assessed by management as being remote as to the likelihood of ultimately resulting in a loss, the amount related to unreserved tax-related matters, inclusive of any related interest, is estimated to be up to approximately \$141 million.

The company has been involved in a matter arising from the sale of its Health Information Management (HIM) business to Molina Information Systems, LLC (Molina) under a 2010 Asset Purchase Agreement (APA). The HIM business provided system solutions and services to state governments, including the state of Idaho, for administering Medicaid programs. In August 2012, Molina sued the company in Federal District Court in Delaware alleging breaches of contract, negligent misrepresentation and intentional misrepresentation with respect to the APA and the Medicaid contract with Idaho. Molina sought compensatory damages, punitive damages, lost profits, indemnification, and declaratory relief. Molina alleged losses of approximately \$35 million in the complaint. In June 2013, the District Court granted the company's motion to dismiss the complaint and allowed Molina to replead certain claims and file an amended complaint. In August 2013, Molina filed an amended complaint. Molina continues to allege losses of approximately \$35 million and again seeks compensatory damages, punitive damages, lost profits, indemnification and declaratory relief. Unisys has filed a motion to dismiss the amended complaint.

With respect to the specific legal proceedings and claims described above, except as otherwise noted, either (i) the amount or range of possible losses in excess of amounts accrued, if any, is not reasonably estimable or (ii) the company believes that the amount or range of possible losses in excess of amounts accrued that are estimable would not be material.

Litigation is inherently unpredictable and unfavorable resolutions could occur. Accordingly, it is possible that an adverse outcome from such matters could

exceed the amounts accrued in an amount that could be material to the company's financial condition, results of operations and cash flows in any particular reporting period.

Notwithstanding that the ultimate results of the lawsuits, claims, investigations and proceedings that have been brought or asserted against the company are not currently determinable, the company believes that at March 31, 2014, it has adequate provisions for any such matters.

i. **Income Taxes.** Accounting rules governing income taxes require that deferred tax assets and liabilities be recognized using enacted tax rates for the effect of temporary differences between the book and tax bases of recorded assets and liabilities. These rules also require that deferred tax assets be reduced by a valuation allowance if it is more likely than not that some portion or the entire deferred tax asset will not be realized.

The company evaluates the realizability of its deferred tax assets by assessing its valuation allowance and by adjusting the amount of such allowance, if necessary. The factors used to assess the likelihood of realization are the company's historical profitability, forecast of future taxable income and available tax-planning strategies that could be implemented to realize the net deferred tax assets. The company uses tax-planning strategies to realize or renew net deferred tax assets to avoid the potential loss of future tax benefits.

A full valuation allowance is currently maintained for all U.S. and certain foreign deferred tax assets in excess of deferred tax liabilities. The company will record a tax provision or benefit for those international subsidiaries that do not have a full valuation allowance against their net deferred tax assets. Any profit or loss recorded for the company's U.S. continuing operations will have no provision or benefit associated with it due to full valuation allowance, except with respect to benefits related to income from discontinued operations, refundable tax credits and withholding taxes not creditable against future taxable income. As a result, the company's provision or benefit for taxes may vary significantly depending on the geographic distribution of income.

j. **Foreign Currency Translation.** Due to inflation rates in recent years, the company's Venezuelan subsidiary has applied highly inflationary accounting beginning January 1, 2010. For those international subsidiaries operating in highly inflationary economies, the U.S. dollar is the functional currency, and as such, nonmonetary assets and liabilities are translated at historical exchange rates, and monetary assets and liabilities are translated at current exchange rates. Exchange gains and losses arising from translation are included in other income (expense), net. Effective February 13, 2013, the Venezuelan government devalued its currency, the bolivar, by resetting the official exchange rate from 4.30 to the U.S. dollar to 6.30 to the U.S. dollar. As a result, the company recorded a pretax foreign exchange loss in the first quarter of 2013 of \$6.5 million.

In January of 2014, the Venezuelan government announced that the exchange rate to be applied to the settlement of certain transactions, including foreign investments and royalties would be changed to the Complementary System of Foreign Currency Administration (SICAD I) auction rate. As a result, the company is changing the exchange rate used to remeasure its Venezuelan subsidiary's financial statements in U.S. dollars from the official rate of 6.3 bolivars to the new SICAD I rate. At March 31, 2014, the SICAD I exchange rate used was 10.7 bolivars to the U.S. dollar. This resulted in the company recording a pretax foreign exchange loss in the first quarter of 2014 of \$5.8 million. The company believes that using the SICAD I exchange rate is more economically representative of what it might expect to receive in a dividend transaction than the official exchange rate. At March 31, 2014 after taking into account the devaluation, the company's operations in Venezuela had net monetary assets denominated in local currency of approximately \$9 million. As indicated above, the SICAD I exchange rate is determined by periodic auctions and, therefore, the potential exists for it to change significantly in future quarters. Additionally, the Venezuelan government may make further changes or introduce new exchange rate mechanisms which could result in further changes in the exchange rate used by the company to remeasure its Venezuelan subsidiary's financial statements in U.S. dollars.

k. Stockholder's Equity. On December 10, 2012, the company announced that its Board of Directors had authorized the company to purchase up to an aggregate of \$50 million of the company's common stock and mandatory convertible preferred stock through December 31, 2014. During the three months ended March 31, 2014, the company repurchased an aggregate of 30,738 shares of common stock for approximately \$.9 million. Actual cash disbursements for repurchased shares may

differ if the settlement dates for shares repurchased occurs after the end of the quarter. At March 31, 2014, there remained approximately \$37.4 million available for future repurchases under the Board authorization.

On March 1, 2014, all of the outstanding shares of 6.25% mandatory convertible preferred stock (2,587,400 shares) were automatically converted (in accordance with its terms) into 6,912,756 shares of the company's common stock. Because March 1, 2014 was not a business day, the mandatory conversion was effected on Monday, March 3, 2014. Annualized cash dividends on such preferred stock were approximately \$16.2 million.

l. Statement of Cash Flows. In the fourth quarter of 2013, the company began to report its defined benefit pension plans expense as a separate line item within the operating cash flow section of its consolidated statements of cash flows. Prior period's statements of cash flows have been changed to present pension plans expense separately and to adjust the amounts presented for other assets and liabilities. There was no change to total net cash provided by operating activities in the prior year.

m. Accounting Standards. In April of 2014, the Financial Accounting Standards Board issued final accounting guidance on reporting discontinued operations. The new guidance is aimed at reducing the frequency of disposals reported as discontinued operations by focusing on strategic shifts that have or are expected to have a major effect on an entity's operations and financial results. Such a shift could include the disposal of a major line of business, a major geographical area, a major equity method investment or other major parts of the entity. In another change from current US GAAP, the guidance permits companies to have continuing cash flows and significant continuing involvement with the disposed component. The guidance does not change the presentation requirements for discontinued operations in the statement of income. The guidance requires expanded disclosures for discontinued operations and new disclosures for individually material disposals that do not meet the definition of a discontinued operation. The company has adopted this guidance effective January 1, 2014. Since the company did not dispose of any operations in the three months ended March 31, 2014, adoption of the guidance did not have an impact on the company's consolidated financial statements.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Overview

The company's revenue and margins in the current quarter were impacted by lower sales of technology and timing and execution issues on a few information technology (IT) services projects, as well as lower than normal sell-and-bill revenue within the company's IT outsourcing customers. This resulted in a net loss attributable to Unisys Corporation common shareholders in the current quarter of \$53.5 million, or a loss of \$1.15 per diluted share, compared with first-quarter 2013 net loss attributable to Unisys Corporation common shareholders of \$33.9 million, or \$.77 per diluted share.

Revenue for the quarter ended March 31, 2014 was \$761.7 million compared with \$809.9 million for the first quarter of 2013, a decrease of 6% from the prior year. Most significantly, the company's technology revenue declined by 19% due to lower sales of the company's ClearPath products.

Results of operations

Company results

Edgar Filing: UNISYS CORP - Form 10-Q

Revenue for the quarter ended March 31, 2014 was \$761.7 million compared with \$809.9 million for the first quarter of 2013, a decrease of 6% from the prior year. Foreign currency fluctuations had a 2 percentage-point negative impact on revenue in the current period compared with the year-ago period.

Services revenue decreased 4% and Technology revenue decreased 19% in the current quarter compared with the year-ago period. The decline in the company's technology revenue was due to lower sales of the company's ClearPath products. U.S. revenue decreased 5% in the first quarter compared with the year-ago period. International revenue decreased 7% in the current quarter due to declines in all geographic areas. Foreign currency had a 3-percentage-point negative impact on international revenue in the three months ended March 31, 2014 compared with the three months ended March 31, 2013.

Total gross profit margin was 17.5% in the three months ended March 31, 2014 compared with 19.9% in the three months ended March 31, 2013 reflecting lower margins in both the company's services and technology businesses.

Selling, general and administrative expense in the three months ended March 31, 2014 was \$138.5 million (18.2% of revenue) compared with \$142.2 million (17.6% of revenue) in the year-ago period.

Research and development (R&D) expenses in the first quarter of 2014 were \$14.4 million compared with \$17.0 million in the first quarter of 2013.

For the first quarter of 2014, the company reported an operating loss of \$19.9 million compared with an operating profit of \$1.6 million in the first quarter of 2013.

For the three months ended March 31, 2014, pension expense was \$19.5 million compared with pension expense of \$23.2 million for the three months ended March 31, 2013. For the full year 2014, the company expects to recognize pension expense of approximately \$78 million compared with \$93.5 million for the full year of 2013. The company records pension income or expense, as well as other employee-related costs such as payroll taxes and medical insurance costs, in operating income in the following income statement categories: cost of revenue; selling, general and administrative expenses; and research and development expenses. The amount allocated to each category is principally based on where the salaries of active employees are charged.

Interest expense for the three months ended March 31, 2014 was \$2.0 million compared with \$2.7 million for the three months ended March 31, 2013.

Other income (expense), net was an expense of \$9.8 million in the first quarter of 2014 compared with expense of \$4.9 million in 2013. Included in the first quarter of 2014 were foreign exchange losses of \$9.1 million, including \$5.8 million related to Venezuela. Included in the first quarter of 2013 were foreign exchange losses of \$4.3 million, including \$6.5 million related to Venezuela. See note (j) of the Notes to Consolidated Financial Statements for a discussion of the Venezuelan currency losses.

The loss before income taxes for the three months ended March 31, 2014 was \$31.7 million compared with a loss of \$6.0 million for the three months ended March 31, 2013.

The provision for income taxes was \$16.0 million in the current quarter compared with \$21.4 million in the year-ago period. As discussed in Note (i) of the Notes to Consolidated Financial Statements, the company evaluates quarterly the realizability of its deferred tax assets by assessing its valuation allowance and by adjusting the amount of such allowance, if necessary. The company records a tax provision or benefit for those international subsidiaries that do not have a full valuation allowance against their net deferred tax assets. Any profit or loss recorded for the company's U.S. operations has no provision or benefit associated with it due to a full valuation allowance. As a result, the company's provision or benefit for taxes may vary significantly quarter to quarter depending on the geographic distribution of income.

Segment results

The company has two business segments: Services and Technology. Revenue classifications by segment are as follows: Services—systems integration and consulting, outsourcing, infrastructure services and core maintenance; Technology—enterprise-class software and servers and other technology.

The accounting policies of each business segment are the same as those followed by the company as a whole. Intersegment sales and transfers are priced as if the sales or transfers were to third parties. Accordingly, the Technology segment recognizes intersegment revenue and manufacturing profit on hardware and software shipments

to customers under Services contracts. The Services segment, in turn, recognizes customer revenue and marketing profits on such shipments of company hardware and software to customers. The Services segment also includes the sale of hardware and software products sourced from third parties that are sold to customers through the company's Services channels. In the company's consolidated statements of income, the manufacturing costs of products sourced from the Technology segment and sold to Services customers are reported in cost of revenue for Services.

Also included in the Technology segment's sales and operating profit are sales of hardware and software sold to the Services segment for internal use in Services engagements. The amount of such profit included in operating income of the Technology segment for the three months ended March 31, 2014 and 2013 was \$.4 million and \$.3 million, respectively. The profit on these transactions is eliminated in Corporate.

The company evaluates business segment performance based on operating income exclusive of pension income or expense, restructuring charges and unusual and nonrecurring items, which are included in Corporate. All other corporate and centrally incurred costs are allocated to the business segments based principally on revenue, employees, square footage or usage.

Information by business segment is presented below (in millions of dollars):

	Total	Eliminations	Services	Technology
Three Months Ended March 31, 2014				
Customer revenue	\$ 761.7		\$ 690.9	\$ 70.8
Intersegment		\$ (9.6)	.2	9.4
Total revenue	\$ 761.7	\$ (9.6)	\$ 691.1	\$ 80.2
Gross profit percent	17.5%		15.8%	42.5%
Operating profit (loss) percent	(2.6)%		1.9%	(21.2)%
Three Months Ended March 31, 2013				
Customer revenue	\$ 809.9		\$ 723.0	\$ 86.9
Intersegment		\$ (17.3)	.5	16.8
Total revenue	\$ 809.9	\$ (17.3)	\$ 723.5	\$ 103.7
Gross profit percent	19.9%		17.4%	45.8%
Operating profit percent	.2%		3.1%	.2%

Gross profit percent and operating income (loss) percent are as a percent of total revenue.

Customer revenue by classes of similar products or services, by segment, is presented below (in millions of dollars):

	Three Months Ended		Percent Change
	2014	March 31 2013	
Services			
Systems integration and consulting	\$ 211.1	\$ 211.7	(.3)%
Outsourcing	341.5	361.3	(5.5)%
Infrastructure services	92.8	105.1	(11.7)%
Core maintenance	45.5	44.9	1.3%
	690.9	723.0	(4.4)%
Technology			
Enterprise-class software and servers	62.7	80.0	(21.6)%

Edgar Filing: UNISYS CORP - Form 10-Q

Other technology	8.1	6.9	17.4%
	70.8	86.9	(18.5)%
Total	\$ 761.7	\$ 809.9	(6.0)%

In the Services segment, customer revenue was \$690.9 million for the three months ended March 31, 2014, down 4.4% from the three months ended March 31, 2013. Foreign currency translation had a 1 percentage-point negative impact on Services revenue in the current quarter compared with the year-ago period.

Revenue from systems integration and consulting in the March 2014 quarter was flat compared with the March 2013 quarter.

Outsourcing revenue for the three months ended March 31, 2014 decreased 5.5% when compared with the three months ended March 31, 2013. The decrease was driven by lower in-quarter hardware and software sales to outsourcing customers in the current period compared with the prior-year quarter.

Infrastructure services revenue decreased 11.7% for the three month period ended March 31, 2014 compared with the three month period ended March 31, 2013.

Core maintenance revenue increased 1.3% in the current quarter compared with the prior-year quarter.

Services gross profit was 15.8% in the first quarter of 2014 compared with 17.4% in the year-ago period. Services operating income percent was 1.9% in the three months ended March 31, 2014 compared with 3.1% in the three months ended March 31, 2013. The declines in both gross profit and operating profit margins were due to lower services revenue particularly lower in-quarter hardware and software sales to outsourcing customers, as well as timing and execution issues on a few IT services projects.

In the Technology segment, customer revenue declined 18.5% to \$70.8 million in the current quarter compared with \$86.9 million in the year-ago period, due to lower enterprise-class software and servers revenue. Foreign currency translation had a 3 percentage-point negative impact on Technology revenue in the current quarter compared with the year-ago period.

Revenue from the company's enterprise-class software and servers, which includes the company's ClearPath and server product families, decreased 21.6% for the three months ended March 31, 2014 compared with the three months ended March 31, 2013. The decrease was due to lower sales of the company's ClearPath products.

Revenue from other technology for the three months ended March 31, 2014 increased \$1.2 million when compared with the three months ended March 31, 2013.

Technology gross profit was 42.5% in the current quarter compared with 45.8% in the year-ago quarter. Technology operating income (loss) percent was (21.2)% in the three months ended March 31, 2014 compared with .2% in the three months ended March 31, 2013. The decreases reflected lower sales of enterprise-class software and servers in the current quarter.

New accounting pronouncements

See note (m) of the Notes to Consolidated Financial Statements for a full description of recent accounting pronouncements, including the expected dates of adoption and estimated effects on the company's consolidated financial statements.

Financial condition

The company's principal sources of liquidity are cash on hand, cash from operations and its revolving credit facility, discussed below. The company and certain international subsidiaries have access to uncommitted lines of credit from various banks. The company believes that it will have adequate sources of liquidity to meet its expected near-term cash requirements.

Cash and cash equivalents at March 31, 2014 were \$613.8 million compared with \$639.8 million at December 31, 2013.

As of March 31, 2014, \$378.2 million of cash and cash equivalents were held by the company's foreign subsidiaries and branches operating outside of the U.S. In the future, if these funds are needed for the company's operations in the U.S., the company may be required to accrue and pay taxes to repatriate these funds.

During the three months ended March 31, 2014, cash provided by operations was \$20.1 million compared with \$14.1 million for the three months ended March 31, 2013. Cash provided by operations during the first quarter of 2014 was

negatively impacted by an increase in cash contributions to the company's defined benefit pension plans. During the first quarter of 2014, the company contributed cash of \$55.5 million to such plans compared with \$26.6 million during the first quarter of 2013. The principal reason for the increase was that in the current quarter, the company contributed \$21.5 million to its U.S. qualified defined benefit pension plan compared with zero in the prior-year quarter.

Cash used for investing activities for the three months ended March 31, 2014 was \$41.1 million compared with cash usage of \$24.6 million during the three months ended March 31, 2013. Net proceeds of investments were \$2.6 million for the three months ended March 31, 2014 compared with net proceeds of \$1.1 million in the prior-year period. Proceeds from investments and purchases of investments represent derivative financial instruments used to reduce the company's currency exposure to market risks from changes in foreign currency exchange rates. In addition, in the current quarter, the investment in marketable software was \$20.7 million compared with \$14.8 million in the year-ago period, capital

additions of properties were \$15.2 million in 2014 compared with \$3.6 million in 2013 and capital additions of outsourcing assets were \$8.7 million in 2014 compared with \$7.5 million in 2013. The higher capital expenditures largely reflected increased investments in new products, as well as expenditures on automation tools and leasehold improvements that support further consolidation of the company's real estate.

Cash used for financing activities during the three months ended March 31, 2014 was \$2.3 million compared with cash used of \$3.1 million during the three months ended March 31, 2013.

In June 2011, the company entered into a five-year secured revolving credit facility which provides for loans and letters of credit up to an aggregate amount of \$150 million (with a limit on letters of credit of \$100 million). Borrowing limits under the credit agreement are based upon the amount of eligible U.S. accounts receivable. At March 31, 2014, the company had no borrowings and \$23.9 million of letters of credit outstanding under the facility. At March 31, 2014, availability under the facility was \$85.3 million net of letters of credit issued. Borrowings under the facility will bear interest based on short-term rates. The credit agreement contains customary representations and warranties, including that there has been no material adverse change in the company's business, properties, operations or financial condition. It also contains financial covenants requiring the company to maintain a minimum fixed charge coverage ratio and, if the company's consolidated cash plus availability under the credit facility falls below \$130 million, a maximum secured leverage ratio. The credit agreement allows the company to pay dividends on its preferred stock unless the company is in default and to, among other things, repurchase its equity, prepay other debt, incur other debt or liens, dispose of assets and make acquisitions, loans and investments, provided the company complies with certain requirements and limitations set forth in the agreement. Events of default include non-payment, failure to comply with covenants, materially incorrect representations and warranties, change of control and default under other debt aggregating at least \$50 million. The credit facility is guaranteed by Unisys Holding Corporation, Unisys NPL, Inc., Unisys AP Investment Company I and any future material domestic subsidiaries. The facility is secured by the assets of Unisys Corporation and the subsidiary guarantors, other than certain excluded assets. The company may elect to prepay or terminate the credit facility without penalty.

At March 31, 2014, the company has met all covenants and conditions under its various lending and funding agreements. The company expects to continue to meet these covenants and conditions.

In 2014, the company expects to make cash contributions of approximately \$234 million to its worldwide defined benefit pension plans, which is comprised of \$108 million primarily for non-U.S. defined benefit pension plans and \$126 million for the company's U.S. qualified defined benefit pension plan.

The company has on file with the Securities and Exchange Commission an effective registration statement, expiring in June of 2015, covering debt or equity securities, which enables the company to be prepared for future market opportunities.

The company may, from time to time, redeem, tender for, or repurchase its securities in the open market or in privately negotiated transactions depending upon availability, market conditions and other factors.

On December 10, 2012, the company announced that its Board of Directors had authorized the company to purchase up to an aggregate of \$50 million of the company's common stock and mandatory convertible preferred stock through December 31, 2014. During the three months ended March 31, 2014, the company repurchased an aggregate of 30,738 shares of common stock for approximately \$.9 million. Actual cash disbursements for repurchased shares may differ if the settlement dates for shares repurchased occurs after the end of the quarter. At March 31, 2014, there remained approximately \$37.4 million available for future repurchases under the Board authorization.

On March 1, 2014, all of the outstanding shares of 6.25% mandatory convertible preferred stock (2,587,400 shares) were automatically converted (in accordance with its terms) into 6,912,756 shares of the company's common stock.

Because March 1, 2014 was not a business day, the mandatory conversion was effected on Monday, March 3, 2014. Annualized cash dividends on such preferred stock were approximately \$16.2 million.

Factors that may affect future results

From time to time, the company provides information containing forward-looking statements, as defined in the Private Securities Litigation Reform Act of 1995. Forward-looking statements provide current expectations of future events and include any statement that does not directly relate to any historical or current fact. Words such as anticipates, believes, expects, intends, plans, projects and similar expressions may identify such forward-looking statements. Forward-looking statements rely on assumptions and are subject to risks, uncertainties and other factors that could cause the company's actual results to differ materially from expectations. Factors that could affect future results include, but are not limited to, those discussed below. Any forward-looking statement speaks only as of the date on which that statement is made. The company assumes no obligation to update any forward-looking statement to reflect events or circumstances that occur after the date on which the statement is made.

Factors that could affect future results include the following:

The company's future results will depend upon its ability to effectively anticipate and respond to volatility and rapid technological change in its industry. The company operates in a highly volatile industry characterized by rapid technological change, evolving technology standards, short product life cycles and continually changing customer demand patterns. Future success will depend in part on the company's ability to anticipate and respond to these market trends and to design, develop, introduce, deliver or obtain new and innovative products, services and software on a timely and cost-effective basis using new delivery models such as cloud computing. The company may not be successful in anticipating or responding to changes in technology, industry standards or customer preferences, and the market may not demand or accept its services and product offerings. In addition, products and services developed by competitors may make the company's offerings less competitive.

Future results will depend on the company's ability to drive profitable growth in consulting and systems integration. The company's ability to grow profitably in this business will depend on the level of demand for systems integration projects and the portfolio of solutions the company offers for specific industries. It will also depend on an efficient utilization of services delivery personnel. In addition, profit margins in this business are a function of both the portfolio of solutions sold in a given period and the rates the company is able to charge for services and the chargeability of its professionals. If the company is unable to attain sufficient rates and chargeability for its professionals, profit margins will be adversely affected. The rates the company is able to charge for services are affected by a number of factors, including clients' perception of the company's ability to add value through its services; introduction of new services or products by the company or its competitors; pricing policies of competitors; and general economic conditions. Chargeability is also affected by a number of factors, including the company's ability to transition employees from completed projects to new engagements, and its ability to forecast demand for services and thereby maintain an appropriate headcount.

The company's future results will depend on its ability to profitably grow its outsourcing business. The company's outsourcing contracts are multiyear engagements under which the company takes over management and support of a client's data center operations, end user devices, business processes or applications. System development activity on outsourcing contracts may require the company to make upfront investments. The company will need to have available sufficient financial resources in order to make these investments. Outsourcing contracts can be highly complex and can involve the design, development, implementation and operation of new solutions and the transitioning of clients from their existing processes to the new environment. Future results will depend on the company's ability to effectively and timely complete these implementations and transitions.

Future results will also depend on the company's ability to maintain and grow its technology business. The company continues to invest in developing new high-end enterprise server products, cybersecurity software, cloud-based products and other offerings to meet client needs. Future results will depend on the company's ability to effectively market and sell these new products while maintaining its installed base for ClearPath and developing next-generation

ClearPath products.

The company faces aggressive competition in the information services and technology marketplace, which could lead to reduced demand for the company's

products and services and could have an adverse effect on the company's business. The information services and technology markets in which the company operates include a large number of companies vying for customers and market share both domestically and internationally. The company's competitors include consulting and other professional services firms, systems integrators, outsourcing providers, infrastructure services providers, computer hardware manufacturers and software providers. Some of the company's competitors may develop competing products and services that offer better price-performance or that reach the market in advance of the company's offerings. Some competitors also have or may develop greater financial and other resources than the company, with enhanced ability to compete for market share, in some instances through significant economic incentives to secure contracts. Some also may be better able to compete for skilled professionals. Any of these factors could lead to reduced demand for the company's products and services and could have an adverse effect on the company's business. Future results will depend on the company's ability to mitigate the effects of aggressive competition on revenues, pricing and margins and on the company's ability to attract and retain talented people.

The company's future results will depend on its ability to retain significant clients. The company has a number of significant long-term contracts with clients, including governmental entities, and its future success will depend, in part, on retaining its relationships with these clients. The company could lose clients for such reasons as contract expiration, conversion to a competing service provider, disputes with clients or a decision to in-source services, including for contracts with governmental entities as part of the rebid process. The company could also lose clients as a result of their merger, acquisition or business failure. The company may not be able to replace the revenue and earnings from any such lost client.

The company's contracts may not be as profitable as expected or provide the expected level of revenues. In a number of the company's long-term contracts for infrastructure services, outsourcing, help desk and similar services, the company's revenue is based on the volume of products and services provided. As a result, revenue levels anticipated at the contract's inception are not guaranteed. In addition, some of these contracts may permit termination at the customer's discretion before the end of the contract's term or may permit termination or impose other penalties if the company does not meet the performance levels specified in the contracts.

The company's contracts with governmental entities are subject to the availability of appropriated funds. These contracts also contain provisions allowing the governmental entity to terminate the contract at the governmental entity's discretion before the end of the contract's term. In addition, if the company's performance is unacceptable to the customer under a government contract, the government retains the right to pursue remedies under the affected contract, which remedies could include termination.

Certain of the company's outsourcing agreements require that the company's prices be benchmarked if the customer requests it and provide that those prices may be adjusted downward if the pricing for similar services in the market has changed. As a result, revenues anticipated at the beginning of the terms of these contracts may decline in the future.

Some of the company's systems integration contracts are fixed-price contracts under which the company assumes the risk for delivery of the contracted services and products at an agreed-upon fixed price. Should the company experience problems in performing fixed-price contracts on a profitable basis, adjustments to the estimated cost to complete may be required. Future results will depend on the company's ability to perform these services contracts profitably.

The company may face damage to its reputation or legal liability if its clients are not satisfied with its services or products. The success of the company's business is dependent on strong, long-term client relationships and on its reputation for responsiveness and quality. As a result, if a client is not satisfied with the company's services or products, its reputation could be damaged and its business adversely affected. Allegations by private litigants or regulators of improper conduct, as well as negative publicity and press speculation about the company, whatever the outcome and whether or not valid, may harm its reputation. In addition to harm to reputation, if the company fails to meet its contractual obligations, it could be subject to legal liability, which could adversely affect its business,

operating results and financial condition.

Future results will depend in part on the performance and capabilities of third parties with whom the company has commercial relationships. The company maintains business relationships with suppliers, channel partners and other parties that have complementary products, services or skills. Future results will depend, in part, on the performance and capabilities of these third parties, on the ability of external suppliers to deliver components at reasonable prices and in a timely manner, and on the financial condition of, and the company's relationship with, distributors and other indirect channel partners, which can affect the company's capacity to effectively and efficiently serve current and potential customers and end users.

The company's future results will depend in part on its ability to attract, motivate and retain experienced and knowledgeable personnel in key positions. The success of the company's business is dependent upon its ability to employ and train individuals with the requisite knowledge, skills and experience to execute the company's business model and achieve its business objectives.

The company has significant pension obligations and may be required to make additional significant cash contributions to its defined benefit pension plans. The company has unfunded obligations under its U.S. and non-U.S. defined benefit pension plans. In 2013, the company made cash contributions of \$147.2 million to its worldwide defined benefit pension plans. Based on current legislation, recent interest rates and expected returns, in 2014 the company estimates that it will make cash contributions to its worldwide defined benefit pension plans of approximately \$234 million, which is comprised of \$126 million for the company's U.S. qualified defined benefit pension plan and \$108 million primarily for non-U.S. defined benefit pension plans.

Deterioration in the value of the company's worldwide defined benefit pension plan assets, as well as discount rate changes, could require the company to make larger cash contributions to its defined benefit pension plans in the future. In addition, the funding of plan deficits over a shorter period of time than currently anticipated could result in making cash contributions to these plans on a more accelerated basis. Either of these events would reduce the cash available for working capital and other corporate uses and may have an adverse impact on the company's operations, financial condition and liquidity.

The company's future results will depend on its ability to continue to simplify its operations and provide services more cost efficiently. Over the past several years, the company has implemented significant cost-reduction measures and continues to focus on measures intended to further improve cost efficiency. Future results will depend on the success of these efforts as well as on the company's continued ability to focus its global resources and simplify its business structure.

The company's business can be adversely affected by global economic conditions, acts of war, terrorism or natural disasters. The company's financial results have been impacted by the global economic slowdown in recent years. If economic conditions worsen, the company could see reductions in demand and increased pressure on revenue and profit margins. The company could also see a further consolidation of clients, which could also result in a decrease in demand. The company's business could also be affected by acts of war, terrorism or natural disasters. Current world tensions could escalate, and this could have unpredictable consequences on the world economy and on the company's business.

The company's contracts with U.S. governmental agencies may subject the company to audits, criminal penalties, sanctions and other expenses and fines. The company frequently enters into contracts with governmental entities. U.S. government agencies, including the Defense Contract Audit Agency and the Department of Labor, routinely audit government contractors. These agencies review a contractor's performance under its contracts, cost structure and compliance with applicable laws, regulations and standards. The U.S. government also may review the adequacy of, and a contractor's compliance with contract terms and conditions, its systems and policies, including the contractor's purchasing, property, estimating, billing, accounting, compensation and management information systems. Any costs found to be overcharged or improperly allocated to a specific contract or any amounts improperly billed or charged for

products or services will be subject to reimbursement to the government. In addition, government contractors, such as the company, are required to disclose credible evidence of certain violations of law and contract overpayments to the federal government. If the company is found to have participated in improper or illegal activities, the company may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or prohibition from doing business with the U.S. government. Any negative publicity related to such contracts, regardless of the accuracy of such publicity, may adversely affect the company's business or reputation.

Breaches of data security could expose the company to legal liability and could harm the company's business and reputation. The company's business includes managing, processing, storing and transmitting proprietary and confidential data, including personal information, within the company's own IT systems and those that the company designs, develops, hosts or manages for clients. Breaches of data security involving these systems by hackers, other third parties or the company's employees, despite established security controls with respect to this data, could result in the loss of data or the unauthorized disclosure or misuse of confidential information of the company, its clients, or others. This could result in litigation and legal liability for the company, lead to the loss of existing or potential clients, adversely affect the market's perception of the security and reliability of the company's products and services and lead to shutdowns or disruptions of the company's IT systems. In addition, such breaches could subject the company to fines and penalties for violations of data privacy laws. This may negatively impact the company's reputation and financial results.

More than half of the company's revenue is derived from operations outside of the United States, and the company is subject to the risks of doing business internationally. More than half of the company's total revenue is derived from international operations. The risks of doing business internationally include foreign currency exchange rate fluctuations, currency restrictions and devaluations, changes in political or economic conditions, trade protection measures, import or export licensing requirements, multiple and possibly overlapping and conflicting tax laws, new tax legislation, weaker intellectual property protections in some jurisdictions and additional legal and regulatory compliance requirements applicable to businesses that operate internationally, including the Foreign Corrupt Practices Act and non-U.S. laws and regulations.

Financial market conditions may inhibit the company's ability to access capital and credit markets to address its liquidity needs. Financial market conditions may impact the company's ability to borrow, to refinance its outstanding debt, or to utilize surety bonds, letters of credit, foreign exchange derivatives and other financial instruments the company uses to conduct its business. Although the company primarily uses cash on hand to address its liquidity needs, its ability to do so assumes that its operations will continue to generate sufficient cash.

The company's services or products may infringe upon the intellectual property rights of others. The company cannot be sure that its services and products do not infringe on the intellectual property rights of third parties, and it may have infringement claims asserted against it or against its clients. These claims could cost the company money, prevent it from offering some services or products, or damage its reputation.

Pending litigation could affect the company's results of operations or cash flow. There are various lawsuits, claims, investigations and proceedings that have been brought or asserted against the company, which arise in the ordinary course of business, including actions with respect to commercial and government contracts, labor and employment, employee benefits, environmental matters, intellectual property and non-income tax and employment compensation in Brazil. See Note (h) of the Notes to Consolidated Financial Statements for more information on litigation. The company believes that it has valid defenses with respect to legal matters pending against it. Litigation is inherently unpredictable, however, and it is possible that the company's results of operations or cash flow could be materially affected in any particular period by the resolution of one or more of the legal matters pending against it.

The company could face business and financial risk in implementing future dispositions or acquisitions. As part of the company's business strategy, it may from time to time consider disposing of existing technologies, products and businesses that may no longer be in alignment with its strategic direction, including transactions of a material size, or acquiring complementary technologies, products and businesses. Potential risks with respect to dispositions include difficulty finding buyers or alternative exit strategies on acceptable terms in a timely manner; potential loss of employees or clients; dispositions at unfavorable prices or on unfavorable terms, including relating to retained liabilities; and post-closing indemnity claims. Any acquisitions may result in the incurrence of substantial additional indebtedness or contingent liabilities. Acquisitions could also result in potentially dilutive issuances of equity securities and an increase in amortization expenses related to intangible

assets. Additional potential risks associated with acquisitions include integration difficulties; difficulties in maintaining or enhancing the profitability of any acquired business; risks of entering markets in which the company has no or limited prior experience; potential loss of employees or failure to maintain or renew any contracts of any acquired business; and expenses of any undiscovered or potential liabilities of the acquired product or business, including relating to employee benefits contribution obligations or environmental requirements. Further, with respect to both dispositions and acquisitions, management's attention could be diverted from other business concerns. Adverse credit conditions could also affect the company's ability to consummate dispositions or acquisitions. The risks associated with dispositions and acquisitions could have a material adverse effect upon the company's business, financial condition and results of operations. There can be no assurance that the company will be successful in consummating future dispositions or acquisitions on favorable terms or at all.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There has been no material change in the company's assessment of its sensitivity to market risk since its disclosure in its Annual Report on Form 10-K for the fiscal year ended December 31, 2013.

Item 4. Controls and Procedures

The company's management, with the participation of the company's Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of the company's disclosure controls and procedures (as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the Exchange Act)) as of the end of the period covered by this report. Based on this evaluation, the company's Chief Executive Officer and Chief Financial Officer concluded that, as of the end of such period, the company's disclosure controls and procedures are effective. Such evaluation did not identify any change in the company's internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the fiscal quarter to which this report relates that has materially affected, or is reasonably likely to materially affect, the company's internal control over financial reporting.

Part II - OTHER INFORMATION

Item 1. Legal Proceedings

Information with respect to litigation is set forth in Note (h) of the Notes to Consolidated Financial Statements, and such information is incorporated herein by reference.

Item 1A. Risk Factors

See Factors that may affect future results in Management's Discussion and Analysis of Financial Condition and Results of Operations for a discussion of risk factors.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Items 2(a) and (b) are not applicable.

2(c) Stock repurchases

On December 10, 2012, the company announced that its Board of Directors had authorized the company to purchase up to an aggregate of \$50 million of the company's common stock and mandatory convertible preferred stock through December 31, 2014.

The following table provides information relating to the company's repurchase of common stock during the three months ended March 31, 2014.

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of the Publicly Announced Plan	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Publicly Announced Plan
Jan. 1, 2014 - Jan. 31, 2014		\$		\$ 38,322,612
Feb. 1, 2014 - Feb. 28, 2014				\$ 38,322,612
March 1, 2014 - March 31, 2014	30,738	29.36	30,738	\$ 37,420,214
Total	30,738	\$ 29.36	30,738
