**SECTION 19(B) DISCLOSURE**

September 30, 2014 (Unaudited)

Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund (each a Fund and collectively, the Funds ), acting pursuant to a Securities and Exchange Commission ( SEC ) exemptive order and with the approval of each Fund s Board of Trustees (the Board ), have adopted a plan, consistent with each Fund s investment objectives and policies to support a level distribution of income, capital gains and/or return of capital (the Plan ). In accordance with the Plan, Clough Global Allocation Fund and Clough Global Equity Fund currently distribute \$0.105 per share on a monthly basis and Clough Global Opportunities Fund distributes \$0.095 per share on a monthly basis.

The fixed amount distributed per share is subject to change at the discretion of each Fund s Board. Under the Plan, each Fund will distribute all available investment income to its shareholders, consistent with each Fund s primary investment objectives and as required by the Internal Revenue Code of 1986, as amended (the Code ). If sufficient investment income is not available on a monthly basis, each Fund will distribute long-term capital gains and/or return of capital to shareholders in order to maintain a level distribution. Each monthly distribution to shareholders is expected to be at the fixed amount established by the Board, except for extraordinary distributions and potential distribution rate increases or decreases to enable each Fund to comply with the distribution requirements imposed by the Code.

Shareholders should not draw any conclusions about each Fund s investment performance from the amount of these distributions or from the terms of the Plan. Each Fund s total return performance on net asset value is presented in its financial highlights table.

The Board may amend, suspend or terminate each Fund s Plan without prior notice if it deems such action to be in the best interest of either the Fund or its shareholders. The suspension or termination of the Plan could have the effect of creating a trading discount (if a Fund s stock is trading at or above net asset value) or widening an existing trading discount. Each Fund is subject to risks that could have an adverse impact on its ability to maintain level distributions. Examples of potential risks include, but are not limited to, economic downturns impacting the markets, increased market volatility, companies suspending or decreasing corporate dividend distributions and changes in the Code. Please refer to each Fund s prospectus for a more complete description of its risks.

Please refer to Additional Information for a cumulative summary of the Section 19(a) notices for each Fund s current fiscal period. Section 19(a) notices for each Fund, as applicable, are available on the Clough Global Closed-End Funds website [www.cloughglobal.com](http://www.cloughglobal.com).

Clough Global Funds

To Our Shareholders:

**Clough Global Allocation Fund (GLV)**

During the six-months ended September 30, 2014, the Clough Global Allocation Fund's total return, assuming reinvestment of all distributions, was -0.59% based on the net asset value and -1.74% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 6.41% and 2.92%, respectively, over the same period. During the six-months ended September 30, 2014, the Fund paid \$0.63 per share in distributions. As of September 30th, the Fund had a dividend distribution rate on the market price of 8.81%.

**Clough Global Equity Fund (GLQ)**

During the six-months ended September 30, 2014, the Clough Global Equity Fund's total return, assuming reinvestment of all distributions, was -1.09% based on the net asset value and -3.11% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 6.41% and 2.92%, respectively, over the same period. During the six-months ended September 30, 2014, the Fund paid \$0.63 per share in distributions. As of September 30th, the Fund had a dividend distribution rate on the market price of 8.79%.

**Clough Global Opportunities Fund (GLO)**

During the six-months ended September 30, 2014, the Clough Global Opportunities Fund's total return, assuming reinvestment of all distributions, was -0.81% based on the net asset value and -2.12% based on the market price of the Fund. The S&P 500 and the MSCI World Index returned 6.41% and 2.92%, respectively, over the same period. During the six-months ended September 30, 2014, the Fund paid \$0.57 per share in distributions. As of September 30th, the Fund had a dividend distribution rate on the market price of 9.56%.

One thing that has been supportive of equities for the past two years has been the aggressive expansion of liquidity on the part of the Fed. That in turn has depressed securities market volatility. All has now changed. Volatility first emerged in the foreign exchange market several weeks ago, a market where trillions of dollars are traded weekly. One reason for its reemergence is clear: tapering removes that support central bank liquidity has provided the capital markets. Another reason for the rise in volatility is a slowing global economy and the fact that systemic weakness in Europe has finally reached into Germany, where export orders and industrial activity have weakened. Peripheral bond markets have fallen in response and that has brought the Euro under pressure. As an aside, Europe's problems are actually positive for the Fund. As you know we have had a short European bank trade on for some time. Peripheral banks are particularly vulnerable here as they are largely a leveraged bet on their own sovereign spreads, and those spreads are beginning to widen out. We still believe very large capital raises lie ahead for the banks. While some of our strategies have been flat over the last six months, we still believe they have promise for high returns in this new environment.

Our positions in the housing sector encompass both homebuilders and companies involved in providing mortgage insurance. The mortgage insurance industry has the potential of being both rapidly growing and highly profitable in the absence of another collapse in residential housing prices. We think that is unlikely. The industry is under-building

demand. Meanwhile apartment rents are 15% higher year-on-year so that alternative to single family housing is getting pricey at a time mortgage costs are declining. The cog in the machine is mortgage availability which is still depressed largely due to regulatory issues but they are likely to ease. Sheila Bair, the former FDIC (Federal Deposit Insurance Corporation) Chair, wrote a piece in *Fortune* suggesting a less restrictive mortgage lending environment. In addition, Fannie Mae and Freddie Mac announced a joint campaign to make credit more accessible to first time home buyers. The recent move lower in 30-year mortgage rates below 4% should also provide a tailwind for the sector. Meanwhile MGIC Investment Corp., a mortgage insurer held by the Fund, reported a 21% year-on-year rise in new insurance in the third quarter in a flat market as the private companies take share from the FHA (Federal Housing Administration). It may require some patience, but a housing cycle seems more likely.

Citigroup Corp., one of the Fund's largest positions reported third quarter revenues rose 10% year-on-year while expenses dropped 6% and total credit costs dropped 11%. Citi Holdings (the so-called "bad bank") was profitable for the second quarter in a row. Net interest margins and trading revenues improved, as did international consumer revenues. Citi's capital and leverage ratios are far above peers, yet the stock still sells 15% below tangible book and 30% below stated book. It is notable that one-third of the company's earnings came from its Asian consumer business. Citi is part of an oligopoly of only three global banks which can offer corporate banking services worldwide.

Healthcare continues to be the largest contributor to performance for 2014. The funds are long names that will continue to benefit from the M&A (Mergers and Acquisitions) environment. Large slow growing names in the space need to acquire companies to maintain product pipelines. We are long mid-cap names with launched products and no partners that make for attractive acquisition targets. The funds also continue to be long hospitals that benefit from the implementation of the Affordable Care Act. Medicaid is now correcting roughly 10% top line losses for hospitals. Potential losses of the past will now be backed by the government. The long position in Healthcare is hedged with shorts in Biotech and HMO's (Health Maintenance Organization) where valuations look vulnerable.

On the Asia front, we think China's A share market (SHCOMP, Shanghai Stock Exchange Composite Index) could be the world's best performing index over the next few years. That index rose 6.9% in September on a 65% year-on-year rise in turnover while western stocks stumbled. Our thinking is based on China's transformation from a credit dependent industrial economy with a mercantilist bent to a consumer-based services economy. The China consumer is spending big time. One piece of evidence of this is a structural change in its current account makeup. China's merchandise trade

**Table of Contents**

Clough Global Funds

Shareholder Letter  
September 30, 2014 (Unaudited)

balance was a positive \$358 billion in 2013, but that merely means it returned to its 2008 peak. However, China's total current account is deteriorating because of a growing deficit in trade from services. That means services consumption is rising rapidly. A boom in transportation and tourism services is simply reflective of the boom in services spending generally across China.

One way to think about Asia is that everywhere in Asia, reform is underway. Reform governments are in power in China and India, the Abe government is the best Japan has had in 30 years outside of Junichiro Koizumi. A former salesperson is in power in Indonesia. The army is currently in charge in Thailand but the army is popular and business friendly. In brief, approximately 8-9% of the Fund is invested here at present, largely in China, India, Japan and South Korea, and we are seeking ways to increase that exposure.

The Funds have benefited this year by being long 30-year Treasuries and A-rated US corporate bonds. 30% of equity in GLV and GLO and 20% of equity in GLQ are currently in fixed income assets. The recent volatility has made pricing more attractive in corporate bonds and we will continue to add to this allocation opportunistically. We still believe we are in a low interest rate world and deflationary forces in Europe will continue to make US Treasuries and corporate debt an attractive source of income.

If you have any questions about your investment, please call 1-877-256-8445.

Sincerely,

Charles I. Clough, Jr.

Robert M. Zdunczyk

*Past performance is no guarantee of future results.*

*The information in this letter represents the opinions of the individual Portfolio Managers and is not intended to be a forecast of future events, a guarantee of future results, or investment advice.*

*The Fund's distribution policy will, under certain circumstances, have certain adverse consequences to the Fund and its shareholders because it may result in a return of capital resulting in less of a shareholder's assets being invested in the Fund and, over time, increase the Fund's expense ratio.*

*Sources of distributions to shareholders may include net investment income, net realized short-term capital gains, net realized long-term capital gains and return of capital. If a distribution includes anything other than net investment*

*income, the applicable Fund provides a Section 19(a) notice of the best estimate of its distribution sources at that time. Please refer to Additional Information for a cumulative summary of the Section 19(a) notices for each Fund's current period. The actual amounts and sources of distributions for tax reporting purposes will depend upon the Fund's investment experience during the remainder of its fiscal year and may be subject to changes based on tax regulations. The estimates may not match the final tax characterization (for the full year's distributions) contained in the shareholder's Form 1099-DIV. Distribution payments are not guaranteed; distribution rates may vary.*

*MSCI World Index* A free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets. The index includes reinvestment of dividends, net of foreign withholding taxes.

*S&P 500® Index* Standard & Poor's composite index of 500 stocks, a widely recognized, unmanaged index of common stock prices.

*Shanghai Stock Exchange Composite-Index* A capitalization-weighted index. The index tracks the daily price performance of all A-shares and B-shares listed on the Shanghai Stock Exchange.

*30-year Treasuries* A U.S. Treasury debt obligation that has a maturity of 30 years. The 30-year Treasury used to be the bellwether U.S. bond but now most consider the 10-year Treasury to be the benchmark.

*A-rated US corporate bonds* A rating that indicates that a municipal or corporate bond has a relatively low risk of default. Bond rating firms, such as Standard & Poor's, use different designations consisting of upper- and lower-case letters A and B to identify a bond's credit quality rating. AAA and AA (high credit quality) and A and BBB (medium credit quality) are considered investment grade. Credit ratings for bonds below these designations (BB, B, CCC, etc.) are considered low credit quality, and are commonly referred to as junk bonds.

*It is not possible to invest directly in an index.*

(a) Pledged security; a portion or all of the security is pledged as collateral for written options, securities sold short or borrowings. As of September 30, 2014, the aggregate market value of those securities was \$177,616,348, representing 101.94% of net assets. (See Note 1 and Note 6)

(b) Loaned security; a portion or all of the security is on loan as of September 30, 2014.

(c) Non-income producing security.

(d) Security exempt from registration of the Securities Act of 1933. These securities may be resold in transactions exempt from registration under Rule 144A, normally to qualified institutional buyers. As of September 30, 2014, these securities had an aggregate market value of \$5,769,573 or 3.31% of net assets.

(e) Fair valued security; valued by management in accordance with procedures approved by the Fund's Board of Trustees. As of September 30, 2014, these securities had an aggregate market value of \$1,189,619 or 0.68% of total net assets.

(f) Floating or variable rate security - rate disclosed as of September 30, 2014.

(g)

*This security has no contractual maturity date, is not redeemable and contractually pays an indefinite stream of interest.*

- (h) Rate shown represents the bond equivalent yield to maturity at date of purchase.*
- (i) Includes cash which is being held as collateral for total return swap contracts.*

Clough Global Equity Fund

- (a) *Pledged security; a portion or all of the security is pledged as collateral for written options, securities sold short or borrowings. As of September 30, 2014, the aggregate market value of those securities was \$301,263,725, representing 103.80% of net assets. (See Note 1 and Note 6)*
- (b) *Loaned security; a portion or all of the security is on loan as of September 30, 2014.*
- (c) *Non-income producing security.*
- (d) *Security exempt from registration of the Securities Act of 1933. These securities may be resold in transactions exempt from registration under Rule 144A, normally to qualified institutional buyers. As of September 30, 2014, these securities had an aggregate market value of \$10,991,410 or 3.79% of net assets.*
- (e) *Fair valued security; valued by management in accordance with procedures approved by the Fund's Board of Trustees. As of September 30, 2014, these securities had an aggregate market value of \$772,334 or 0.27% of total net assets.*
- (f) *Floating or variable rate security - rate disclosed as of September 30, 2014.*
- (g) *This security has no contractual maturity date, is not redeemable and contractually pays an indefinite stream of interest.*
- (h) *Rate shown represents the bond equivalent yield to maturity at date of purchase.*
- (i) *Includes cash which is being held as collateral for total return swap contracts.*

(1) Total investment return is calculated assuming a purchase of a common share at the opening on the first day and a sale at the closing on the last day of each period reported. Dividends and distributions, if any, are assumed for purposes of this calculation to be reinvested at price obtained under the Fund's dividend reinvestment plan. Total investment returns do not reflect brokerage commissions on the purchase or sale of the Fund's common shares. Total investment returns for less than a full year are not annualized. Past performance is not a guarantee of future results.

(2) Annualized.

Clough Global Funds

**1. ORGANIZATION AND SIGNIFICANT ACCOUNTING AND OPERATING POLICIES**

Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund, are closed-end management investment companies registered under the Investment Company Act of 1940 (the "1940 Act"). The Funds were organized under the laws of the state of Delaware by an Amended Agreement and Declaration of Trust dated April 27, 2004 and January 25, 2005, respectively for Clough Global Allocation Fund and Clough Global Equity Fund, and an Agreement and Declaration of Trust dated January 12, 2006, for Clough Global Opportunities Fund. The Funds were previously registered as non-diversified investment companies. As a result of ongoing operations, each of the Funds became a diversified company. The Funds may not resume operating in a non-diversified manner without first obtaining shareholder approval. Each Fund's investment objective is to provide a high level of total return. Each Declaration of Trust provides that the Board of Trustees may authorize separate classes of shares of beneficial interest. The common shares of Clough Global Allocation Fund, Clough Global Equity Fund, and Clough Global Opportunities Fund are listed on the NYSE MKT and trade under the ticker symbols GLV, GLQ and GLO respectively.

The following is a summary of significant accounting policies followed by the Funds. These policies are in conformity with U.S. generally accepted accounting principles ("GAAP"). The preparation of financial statements in accordance with GAAP requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements during the reporting period. Management believes the estimates and security valuations are appropriate; however, actual results may differ from those estimates, and the security valuations reflected in the financial statements may differ from the value the Funds ultimately realize upon sale of the securities. Each Fund is considered an investment company for financial reporting purposes under GAAP. The financial statements have been prepared as of the close of the New York Stock Exchange ("NYSE" or the "Exchange") on September 30, 2014.

The net asset value per share of each Fund is determined no less frequently than daily, on each day that the Exchange is open for trading, as of the close of regular trading on the Exchange (normally 4:00 p.m. New York time). Trading may take place in foreign issues held by the Fund at times when a Fund is not open for business. As a result, each Fund's net asset value may change at times when it is not possible to purchase or sell shares of a Fund.

**Investment Valuation:** Securities held by each Fund for which exchange quotations are readily available are valued at the last sale price, or if no sale price or if traded on the over-the-counter market, at the mean of the bid and asked prices on such day. Most securities listed on a foreign exchange are valued at the last sale price at the close of the exchange on which the security is primarily traded. In certain countries market maker prices are used since they are the most representative of the daily trading activity. Market maker prices are usually the mean between the bid and ask prices. Certain markets are not closed at the time that the Funds price their portfolio securities. In these situations, snapshot prices are provided by the individual pricing services or other alternate sources at the close of the NYSE, as appropriate. Securities not traded on a particular day are valued at the mean between the last reported bid and the asked quotes, or the last sale price when appropriate; otherwise fair value will be determined by the board-appointed fair valuation committee. Debt securities for which the over-the-counter market is the primary market are normally valued on the basis of prices furnished by one or more pricing services or dealers at the mean between the latest

available bid and asked prices. As authorized by the Board of Trustees, debt securities (other than short-term obligations) may be valued on the basis of valuations furnished by a pricing service which determines valuations based upon market transactions for normal, institutional-size trading units of securities or a matrix method which considers yield or price of comparable bonds provided by a pricing service. Short-term obligations maturing within 60 days are valued at amortized cost, which approximates value, unless the Board of Trustees determine that under particular circumstances such method does not result in fair value. Over-the-counter options are valued at the mean between bid and asked prices provided by dealers. Financial futures contracts listed on commodity exchanges and exchange-traded options are valued at closing settlement prices. Total return swaps are priced based on valuations provided by a board approved independent third party pricing agent. If a total return swap price cannot be obtained from an independent third party pricing agent the Fund shall seek to obtain a bid price from at least one independent and/or executing broker.

If the price of a security is unavailable in accordance with the aforementioned pricing procedures, or the price of a security is unreliable, e.g., due to the occurrence of a significant event, the security may be valued at its fair value determined by management pursuant to procedures adopted by the Board of Trustees. For this purpose, fair value is the price that a Fund reasonably expects to receive on a current sale of the security. Due to the number of variables affecting the price of a security; however, it is possible that the fair value of a security may not accurately reflect the price that a Fund could actually receive on a sale of the security.

A three-tier hierarchy has been established to classify fair value measurements for disclosure purposes. Inputs refer broadly to the assumptions that market participants would use in pricing the asset or liability, including assumptions about risk. Inputs may be observable or unobservable. Observable inputs are inputs that reflect the assumptions market participants would use in pricing the asset or liability that are developed based on market data obtained from sources independent of the reporting entity. Unobservable inputs are inputs that reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability that are developed based on the best information available.

**Table of Contents**

Clough Global Funds

Notes to Financial Statements  
September 30, 2014 (Unaudited)

Various inputs are used in determining the value of each Fund's investments as of the reporting period end. These inputs are categorized in the following hierarchy under applicable financial accounting standards:

- Level 1 Unadjusted quoted prices in active markets for identical, unrestricted assets or liabilities that a Fund has the ability to access at the measurement date;
- Level 2 Quoted prices which are not active, quoted prices for similar assets or liabilities in active markets or inputs other than quoted prices that are observable (either directly or indirectly) for substantially the full term of the asset or liability; and
- Level 3 Significant unobservable prices or inputs (including the Fund's own assumptions in determining the fair value of investments) where there is little or no market activity for the asset or liability at the measurement date.

The following is a summary of the inputs used as of September 30, 2014, in valuing each Fund's investments carried at value. The Funds recognize transfers between the levels as of the end of the period in which the transfer occurred. There were no transfers between Levels 1 and 2 during the six months ended September 30, 2014.

\* *For detailed industry descriptions, see the accompanying Statement of Investments.*

\*\* *Swap contracts are reported at their unrealized appreciation/(depreciation) at measurement date, which represents the change in the contract's value from trade date.*

In the event a board approved independent pricing service is unable to provide an evaluated price for a security or Clough Capital Partners L.P. (the Adviser or Clough ) believes the price provided is not reliable, securities of each Fund may be valued at fair value as described above. In these instances the Adviser may seek to find an alternative independent source, such as a broker/dealer to provide a price quote, or by using evaluated pricing models similar to the techniques and models used by the independent pricing service. These fair value measurement techniques may utilize unobservable inputs (Level 3).

On a monthly basis, the Fair Value Committee of each Fund meets and discusses securities that have been fair valued during the preceding month in accordance with the Fund's Fair Value Procedures and reports quarterly to the Board of Trustees on the results of those meetings.

---

**Table of Contents**

Clough Global Funds

Notes to Financial Statements  
September 30, 2014 (Unaudited)

**Foreign Securities:** Each Fund may invest a portion of its assets in foreign securities. In the event that a Fund executes a foreign security transaction, the Fund will generally enter into a forward foreign currency contract to settle the foreign security transaction. Foreign securities may carry more risk than U.S. securities, such as political, market and currency risks.

The accounting records of each Fund are maintained in U.S. dollars. Prices of securities denominated in foreign currencies are translated into U.S. dollars at the closing rates of exchange at period end. Amounts related to the purchase and sale of foreign securities and investment income are translated at the rates of exchange prevailing on the respective dates of such transactions.

The effect of changes in foreign currency exchange rates on investments is reported with all other foreign currency realized and unrealized gains and losses in the Funds' Statements of Operations.

A foreign currency spot contract is a commitment to purchase or sell a foreign currency at a future date, at a negotiated rate. Each Fund may enter into foreign currency spot contracts to settle specific purchases or sales of securities denominated in a foreign currency and for protection from adverse exchange rate fluctuation. Risks to a Fund include the potential inability of the counterparty to meet the terms of the contract.

The net U.S. dollar value of foreign currency underlying all contractual commitments held by a Fund and the resulting unrealized appreciation or depreciation are determined using prevailing forward foreign currency exchange rates. Unrealized appreciation and depreciation on foreign currency spot contracts are reported in the Funds' Statements of Assets and Liabilities as a receivable or a payable and in the Funds' Statements of Operations with the change in unrealized appreciation or depreciation on translation of assets and liabilities denominated in foreign currencies. These spot contracts are used by the broker to settle investments denominated in foreign currencies.

A Fund may realize a gain or loss upon the closing or settlement of the foreign transaction. Such realized gains and losses are reported with all other foreign currency gains and losses in the Statements of Operations.

**Short Sales:** Each Fund may sell a security it does not own in anticipation of a decline in the fair value of that security. When a Fund sells a security short, it must borrow the security sold short and deliver it to the broker-dealer through which it made the short sale. A gain, limited to the price at which a Fund sold the security short, or a loss, unlimited in size, will be recognized upon the termination of the short sale.

Each Fund's obligation to replace the borrowed security will be secured by collateral deposited with the broker-dealer, usually cash, U.S. government securities or other liquid securities. Each Fund will also be required to designate on its books and records similar collateral with its custodian to the extent, if any, necessary so that the aggregate collateral value is at all times at least equal to the current market value of the security sold short. The cash amount is reported on the Statements of Assets and Liabilities as Deposit with broker for securities sold short. Each Fund is obligated to pay interest to the broker for any debit balance of the margin account relating to short sales. The interest incurred by the Funds for the six months ended September 30, 2014, is reported on the Statements of Operations as Interest expense margin account. Interest amounts payable by the Funds as of September 30, 2014, are reported on the Statements of Assets and Liabilities as Interest payable margin account.

Each Fund may also sell a security short if it owns at least an equal amount of the security sold short or another security convertible or exchangeable for an equal amount of the security sold short without payment of further compensation (a short sale against-the-box). In a short sale against-the-box, the short seller is exposed to the risk of being forced to deliver stock that it holds to close the position if the borrowed stock is called in by the lender, which would cause gain or loss to be recognized on the delivered stock. Each Fund expects normally to close its short sales against-the-box by delivering newly acquired stock.

**Derivatives Instruments and Hedging Activities:** The following discloses the Funds' use of derivative instruments and hedging activities.

The Funds' investment objectives not only permit the Funds to purchase investment securities, they also allow the Funds to enter into various types of derivative contracts, including, but not limited to, purchased and written options, swaps, futures and warrants. In doing so, the Funds will employ strategies in differing combinations to permit them to increase, decrease, or change the level or types of exposure to market factors. Central to those strategies are features inherent to derivatives that make them more attractive for this purpose than equity securities: they require little or no initial cash investment, they can focus exposure on only certain selected risk factors, and they may not require the ultimate receipt or delivery of the underlying security (or securities) to the contract. This may allow the Funds to pursue their objectives more quickly and efficiently than if they were to make direct purchases or sales of securities capable of affecting a similar response to market factors.

*Market Risk Factors:* In pursuit of their investment objectives, certain Funds may seek to use derivatives to increase or decrease their exposure to the following market risk factors:

**Equity Risk:** Equity risk relates to the change in value of equity securities as they relate to increases or decreases in the general market.

---

**Table of Contents**

Notes to Financial Statements  
September 30, 2014 (Unaudited)

Clough Global Funds

**Risk of Investing in Derivatives:** The Funds' use of derivatives can result in losses due to unanticipated changes in the market risk factors and the overall market. In instances where the Funds are using derivatives to decrease or hedge exposures to market risk factors for securities held by the Funds, there are also risks that those derivatives may not perform as expected, resulting in losses for the combined or hedged positions.

Derivatives may have little or no initial cash investment relative to their market value exposure and therefore can produce significant gains or losses in excess of their cost. This use of embedded leverage allows the Funds to increase their market value exposure relative to their net assets and can substantially increase the volatility of the Funds performance.

Additional associated risks from investing in derivatives also exist and potentially could have significant effects on the valuation of the derivative and the Funds. Typically, the associated risks are not the risks that the Funds are attempting to increase or decrease exposure to, per their investment objectives, but are the additional risks from investing in derivatives.

Examples of these associated risks are liquidity risk, which is the risk that the Funds will not be able to sell the derivative in the open market in a timely manner, and counterparty credit risk, which is the risk that the counterparty will not fulfill its obligation to the Funds. Associated risks can be different for each type of derivative and are discussed by each derivative type in the notes that follow.

Each Fund may acquire put and call options and options on stock indices and enter into stock index futures contracts, certain credit derivatives transactions and short sales in connection with its equity investments. In connection with a Fund's investments in debt securities, it may enter into related derivatives transactions such as interest rate futures, swaps and options thereon and certain credit derivatives transactions. Derivatives transactions of the types described above subject a Fund to increased risk of principal loss due to imperfect correlation or unexpected price or interest rate movements. Each Fund also will be subject to credit risk with respect to the counterparties to the derivatives contracts purchased by a Fund. If a counterparty becomes bankrupt or otherwise fails to perform its obligations under a derivatives contract due to financial difficulties, each Fund may experience significant delays in obtaining any recovery under the derivatives contract in a bankruptcy or other reorganization proceeding. Each Fund may obtain only a limited recovery or may obtain no recovery in such circumstances.

**Option Writing/Purchasing:** Each Fund may purchase or write (sell) put and call options. One of the risks associated with purchasing an option among others, is that a Fund pays a premium whether or not the option is exercised. Additionally, a Fund bears the risk of loss of premium and change in market value should the counterparty not perform under the contract. The cost of securities acquired through the exercise of call options is increased by premiums paid. The proceeds from securities sold through the exercise of put options are decreased by the premiums paid. Each Fund is obligated to pay interest to the broker for any debit balance of the margin account relating to options. The interest incurred on the Funds for the six months ended September 30, 2014 is reported on the Statements of Operations as Interest expense - margin account. Interest amounts payable by the Funds as of September 30, 2014 are reported on the Statements of Assets and Liabilities as Interest payable - margin account.

When a Fund writes an option, an amount equal to the premium received by a Fund is recorded as a liability and is subsequently adjusted to the current value of the option written. Premiums received from writing options that expire unexercised are treated by a Fund on the expiration date as realized gains. The difference between the premium received and the amount paid on effecting a closing purchase transaction, including brokerage commissions, is recorded as a realized gain or loss. If a call option is exercised, the premium is added to the proceeds from the sale of the underlying security or currency in determining whether a Fund has realized a gain or loss. If a put option is exercised, the premium reduces the cost basis of the securities purchased by a Fund. Each Fund, as writer of an option, bears the market risk of an unfavorable change in the price of the security underlying the written option.

Market Value, September 30, 2014		\$ (101,925)		\$ (83,296)

**Swaps:** During the period each Fund engaged in total return swaps. A swap is an agreement that obligates two parties to exchange a series of cash flows at specified intervals based upon or calculated by reference to changes in specified prices or rates for a specified amount of an underlying asset. Each Fund may utilize swap agreements as a means to gain exposure to certain assets and/or to hedge or protect the Fund from adverse movements in securities prices or interest rates. Each Fund is subject to equity risk and interest rate risk in the normal course of pursuing its investment objective through investments in swap contracts. Swap agreements entail the risk that a party will default on its payment obligation to a Fund. If the other party to a swap defaults, a Fund would risk the loss of the net amount of the payments that it contractually is entitled to receive. If each Fund utilizes a swap at the wrong time or judges market conditions incorrectly, the swap may result in a loss to the Fund and reduce the Fund's total return.

Total return swaps involve an exchange by two parties in which one party makes payments based on a set rate, either fixed or variable, while the other party makes payments based on the return of an underlying asset, which includes both the income it generates and any capital gains over the payment period. A Fund's maximum risk of loss from counterparty risk or credit risk is the discounted value of the payments to be received from/paid to the counterparty over the contract's remaining life, to the extent that the amount is positive. The risk is mitigated by having a netting arrangement between a Fund and the counterparty and by the posting of collateral to a Fund to cover the Fund's exposure to the counterparty.

International Swaps and Derivatives Association, Inc. Master Agreements ( ISDA Master Agreements ) govern OTC financial derivative transactions entered into by a Fund and those counterparties. The ISDA Master Agreements maintain provisions for general obligations, representations, agreements, collateral and events of default or termination. Events of termination include conditions that may entitle counterparties to elect to terminate early and cause settlement of all outstanding transactions under the applicable ISDA Master Agreement. Any election to early terminate could be material to the financial statements.

During the six months ended September 30, 2014, the Funds invested in swap agreements consistent with the Funds investment strategies to gain exposure to certain markets or indices.

**Table of Contents**Notes to Financial Statements  
September 30, 2014 (Unaudited)

Clough Global Funds

**Warrants/Rights:** Each Fund may purchase or otherwise receive warrants or rights. Warrants and rights generally give the holder the right to receive, upon exercise, a security of the issuer at a set price. Funds typically use warrants and rights in a manner similar to their use of purchased options on securities, as described in options above. Risks associated with the use of warrants and rights are generally similar to risks associated with the use of purchased options. However, warrants and rights often do not have standardized terms, and may have longer maturities and may be less liquid than exchange-traded options. In addition, the terms of warrants or rights may limit each Fund's ability to exercise the warrants or rights at such times and in such quantities as each Fund would otherwise wish. Each Fund held no rights at the end of the period.

The effect of derivatives instruments on each Fund's Statements of Assets and Liabilities as of September 30, 2014:

**Asset Derivatives**

<b>Fund</b>	<b>Average Warrant Shares Volume</b>
Clough Global Allocation Fund	140,875
Clough Global Equity Fund	234,948
Clough Global Opportunities Fund	590,405

Certain derivative contracts are executed under either standardized netting agreements or, for exchange-traded derivatives, the relevant contracts for a particular exchange which contain enforceable netting provisions. A derivative netting arrangement creates an enforceable right of set-off that becomes effective, and affects the realization of settlement on individual assets, liabilities and collateral amounts, only following a specified event of default or early termination. Default events may include the failure to make payments or deliver securities timely, material adverse changes in financial condition or insolvency, the breach of minimum regulatory capital requirements, or loss of license, charter or other legal authorization necessary to perform under the contract.

**Income Taxes:** Each Fund's policy is to comply with the provisions of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its taxable income to its shareholders. Therefore, no federal income tax provision is required. As of and during the six months ended September 30, 2014, the Funds did not have a liability for any unrecognized tax benefits. The Funds file U.S. federal, state, and local tax returns as required. The Funds' tax returns are subject to examination by the relevant tax authorities until expiration of the applicable statute of limitations, which is generally three years after the filing of the tax return but which can be extended to six years in certain circumstances. Tax returns for open years have incorporated no uncertain tax positions that require a provision for income taxes.

**Distributions to Shareholders:** Eac
