3Q15 Revenue Breakdown Middle East/Asia Pacific Quarterly revenue declined by 4%, with a similar decline in operating income of 3%. Lower activity levels across the Asia Pacific markets were partially offset by increased activity in the UAE and Iraq. Europe/Africa/CIS Third quarter revenue declined by 7% with a decrease in operating income of 9%. The reduction was primarily driven by lower activity in Angola and East Africa North America North America third quarter revenue declined 7% sequentially, with operating income at near breakeven levels. Activity took another step down during third quarter, accompanied by further price reductions across the business, especially in the pumping-related product lines. Latin America Revenue and operating income both declined by 4% sequentially, driven primarily by activity reductions in Mexico, partially offset by improved activity levels in Argentina.

Management analyzes operating income without the impact of these charges as an indicator of performance, to identify underlying trends in the business, and to establish operational goals. See slides 23 and 25 for further details on these adjustments, pre-tax. (b) Average capital employed is a statistical mean of the combined values of long-term debt and shareholders' equity for the beginning and end of the period. (c) As reported return on average capital employed (ROACE) is calculated as: "As reported operating profit, after-tax" divided by "Average capital employed." Adjusted ROACE is calculated as: "Adjusted operating profit, after-tax" divided by "Average capital employed."
