5 PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q

Notes to the Condensed Consolidated Financial Statements

For the Three and Nine Months Ended September 30, 2017

Unaudited

In millions of US dollars except as otherwise noted

1. Significant Accounting Policies

Basis of Presentation

With its subsidiaries, Potash Corporation of Saskatchewan Inc. (PCS) together known as PotashCorp or the company except to the extent the context otherwise requires forms a crop nutrient and related industrial and feed products company. These unaudited interim condensed consolidated financial statements (interim financial statements) are based on International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS), and have been prepared in accordance with International Accounting Standard (IAS) 34, Interim Financial Reporting. The accounting policies and methods of computation used in preparing these interim financial statements are consistent with those used in the preparation of the company s 2016 annual consolidated financial statements.

These interim financial statements include the accounts of PCS and its subsidiaries; however, they do not include all disclosures normally provided in annual consolidated financial statements and should be read in conjunction with the company s 2016 annual consolidated financial statements. In management s opinion, the interim financial statements include all adjustments necessary to fairly present such information. Interim results are not necessarily indicative of the results expected for any other interim period or the fiscal year.

These interim financial statements were authorized by the audit committee of the Board of Directors for issue on October 31, 2017.

Standards, Amendments and Interpretations Effective and Applied

The International Accounting Standards Board (IASB) and International Financial Reporting Interpretations Committee (IFRIC) have issued the following standards and amendments or interpretations to existing standards that were effective and applied by the company.

Standard	Description	Impact
Amendments to IAS 7, Statement of Cash Flows	Issued to require a reconciliation of the opening and closing liabilities that form part of an entity s financing activities, including both changes arising from cash flows and non-cash changes.	Adopted prospectively effective January 1, 2017, with required disclosures included in Note 5.

Amendments to IAS 12, Income Taxes	Issued to clarify the requirements on recognition of deferred tax assets for unrealized losses on debt instruments measured at fair value.	Adopted effective January 1, 2017, with no change to the company's interim financial statements. No changes are expected to the company's annual consolidated financial statements.
---	--	---

Standards, Amendments and Interpretations Not Yet Effective and Not Applied

The IASB and IFRIC have issued the following standards and amendments or interpretations to existing standards that were not yet effective and not applied as at September 30, 2017. The company does not anticipate early adoption of these standards at this time.

Standard	Description	Expected Impact	Effective Date ¹
IFRS 15, Revenue From Contracts With Customers	Issued to provide guidance on the recognition of revenue from contracts with customers, including multiple-element arrangements and transactions not previously addressed comprehensively and to enhance disclosures about revenue.	Based on the company's preliminary assessment, the impact of the standard on the amount of revenue recognized in a year is not expected to be significant. While the financial impact of the standard continues to be assessed, the company anticipates additional disclosures, including remaining performance obligations and anticipated timing of revenue recognition.	January 1, 2018, applied retrospectively with certain practical expedients available.
IFRS 9, Financial Instruments	Issued to replace IAS 39, providing guidance on the classification, measurement and disclosure of financial instruments and introducing a new hedge accounting model.	The company is reviewing the standard to determine the potential impact, if any.	January 1, 2018, applied retrospectively with certain exceptions.
Amendments to IFRS 2, Share-Based Payment	Issued to provide clarification on the classification and measurement of share-based transactions. Specifically, accounting for cash-settled share-based transactions, share-based payment transactions with a net settlement feature and modifications of share-based payment transactions that change classification from cash-settled to equity settled.	The company is reviewing the standard to determine the potential impact, if any.	January 1, 2018, with the option of retrospective or prospective application.
IFRS 16, Leases	Issued to supersede IAS 17, IFRIC 4, SIC-15 and SIC-27, providing the principles for the recognition, measurement, presentation and disclosure of leases. Lessees will be required to recognize assets and liabilities for the rights and obligations created by leases. Lessors will continue to classify leases using a similar approach to that of the superseded standards but with enhanced disclosure to improve information	The company is reviewing the standard to determine the potential impact.	January 1, 2019, applied retrospectively with certain practical expedients available.

about a lessor's risk exposure, particularly to residual value risk.

**IFRIC 23,
Uncertainty Over
Income Tax
Treatments**

Issued to provide guidance on recognition and measurement of uncertain income tax treatments.

The company is reviewing the standard to determine the potential impact, if any.

January 1, 2019, applied retrospectively with certain practical expedients available.

**IFRS 17, Insurance
Contracts**

Issued to replace IFRS 4, providing guidance for the recognition, measurement, presentation and disclosure of insurance contracts giving consideration to: substantive rights and obligations arising from a contract, law or regulation; enforceable rights and obligations in a contract; and whether contracts are written, oral or implied by customary business practices.

Although the company does not underwrite insurance contracts, all significant contracts will be reviewed under the scope of the standard to determine the potential impact, if any.

January 1, 2021, applied retrospectively with certain practical expedients available.

¹ Effective date for annual periods beginning on or after the stated date.

2. Segment Information

The company has three reportable operating segments: potash, nitrogen and phosphate. These segments are differentiated by the chemical nutrient contained in the products that each produces. The accounting policies of the segments are the same as those described in Note 1 and are measured in a manner consistent with that of the financial statements. Inter-segment sales are made under terms that approximate market value. The company's operating segments have been determined based on reports, used to make strategic decisions, that are reviewed by the Chief Executive Officer, assessed to be the company's chief operating decision-maker.

	Three Months Ended September 30, 2015

² Canpotex Limited (Canpotex).

3. Other (Expenses) Income

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
Foreign exchange (loss) gain	\$ (14)	\$ 5	\$ (22)	\$ (14)
Proposed Transaction costs (Note 13)	(10)		(33)	
Other (expenses) income	(6)		(1)	10
	\$ (30)	\$ 5	\$ (56)	\$ (4)

4. Income Tax (Expense) Recovery

A separate estimated average annual effective tax rate was determined for each taxing jurisdiction and applied individually to the interim period pre-tax income of each jurisdiction.

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
Income tax (expense) recovery	\$ (22)	\$ (2)	\$ 27	\$ (58)
Actual effective tax rate on ordinary earnings	17%	16%	10%	20%
Actual effective tax rate including discrete items	29%	2%	(7%)	17%
Discrete tax adjustments that impacted the tax rate	\$ (9)	\$ 11	\$ 67	\$ 11

Significant items to note include the following:

- The actual effective tax rate on ordinary earnings decreased for the nine months ended September 30, 2017 compared to the same period last year due to different weightings between jurisdictions, most notably a decline in the United States partially offset by an increase in Canada.
- In the second quarter of 2017, a discrete deferred tax recovery of \$68 was recorded as a result of a Saskatchewan income tax rate decrease. This decreased the actual effective tax rate including discrete items for the nine months ended September 30, 2017 by 18 percentage points.
- In the second quarter of 2016, a \$10 discrete non-tax deductible impairment of the company's available-for-sale investment in Sinofert was recorded. This increased the actual effective tax rate including discrete items for the nine months ended September 30, 2016 by one percentage point.

Income tax balances within the condensed consolidated statements of financial position were comprised of the following:

¹ Cash inflows and cash outflows arising from short-term debt transactions are presented on a net basis.

6. Inventories

	September 30, 2017	December 31, 2016
Finished products	\$ 217	\$ 269
Intermediate products	201	174
Raw materials	73	75
Materials and supplies	262	250
	\$ 753	\$ 768

The following items affected cost of goods sold during the period:

	Three Months Ended September 30		Nine Months Ended September 30	
	2017	2016	2017	2016
Expensed inventories before the following items	\$ 756	\$ 739	\$ 2,101	\$ 2,038
Reserves, reversals and writedowns of inventories	11	2	44	21
	\$ 767	\$ 741	\$ 2,145	\$ 2,059

The carrying amount of inventory recorded at net realizable value was \$79 as at September 30, 2017 (December 31, 2016 \$47), with the remaining inventory recorded at cost.

7. Share Capital

Authorized

The company is authorized to issue an unlimited number of common shares without par value and an unlimited number of first preferred shares. The common shares are not redeemable or convertible. The first preferred shares may be issued in one or more series with rights and conditions to be determined by the Board of Directors. No first preferred shares have been issued.

Issued

	Number of	
	Common Shares	Consideration
Balance December 31, 2016	839,790,379	\$ 1,798
Issued under option plans	114,900	2
Issued for dividend reinvestment plan	258,719	5
Balance September 30, 2017	840,163,998	\$ 1,805
Dividends Declared		

The company declared dividends per share of \$0.10 (2016 \$0.10) during the three months ended September 30, 2017 and \$0.30 (2016 \$0.60) during the nine months ended September 30, 2017.

Under the terms of the agreement governing the Proposed Transaction, as described in Note 13, the company is permitted to pay quarterly dividends up to but not in excess of levels existing at the time of signing such agreement.

8. Share-Based Compensation

During the three and nine months ended September 30, 2017, the company issued stock options and performance share units (PSUs) to eligible employees under the 2016 Long-Term Incentive Plan (LTIP). Information on stock options and PSUs is summarized below:

	LTIP		Expense for all employee share-based compensation plans			
	Units Granted	Units Outstanding as at	Three Months Ended		Nine Months Ended	
	in 2017	September 30, 2017	September 30 2017	2016	September 30 2017	2016
Stock options	1,482,829	4,503,104	\$ 1	\$ 2	\$ 6	\$ 8
Share-settled PSUs	555,918	935,570	2	1	4	3
Cash-settled PSUs	858,684	1,561,678	6	3	8	7
			\$ 9	\$ 6	\$ 18	\$ 18

Weighted average grant date fair value per unit for stock options and share-settled PSUs granted during 2017 was \$4.36 and \$19.93, respectively.

Stock Options

Under the LTIP, stock options generally vest and become exercisable on the third anniversary of the grant date, subject to continuous employment or retirement, and have a maximum term of 10 years. The weighted average fair value of stock options granted was estimated as of the date of grant using the Black-Scholes-Merton option-pricing model with the following weighted average assumptions:

Exercise price per option	\$ 18.71
Expected annual dividend per share	\$ 0.40
Expected volatility	29%
Risk-free interest rate	1.67%
Expected life of options	5.7 years

Performance Share Units

PSUs granted under the LTIP in 2017 vest based on the achievement of performance metrics, over three years, comprising 1) the relative ranking of the company's total shareholder return compared with a specified peer group using a Monte Carlo simulation and 2) the outcome of the company's cash flow return on investment compared with its weighted average cost of capital. Compensation cost is measured based on 1) the grant date fair value of the units, adjusted for the company's best estimate of the outcome of non-market vesting conditions¹ at the end of each period for share-settled PSUs and 2) period-end fair value of the awards for cash-settled PSUs. PSUs granted under the LTIP settle in shares for grantees who are subject to the company's share ownership guidelines and in cash for all other grantees.

¹ The company's cash flow return on investment compared with its weighted average cost of capital is a non-market vesting condition as performance is not tied to the company's share price or relative share price.

13 PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q

9. Financial Instruments

Fair Value

Estimated fair values for financial instruments are designed to approximate amounts for which the instruments could be exchanged in a current arms-length transaction between knowledgeable, willing parties. The valuation policies and procedures for financial reporting purposes are determined by the company's finance department.

Financial instruments included in the unaudited interim condensed consolidated statements of financial position are measured either at fair value or amortized cost. The tables below explain the valuation methods used to determine the fair value of each financial instrument and its associated level in the fair value hierarchy.

Financial Instruments Measured at Fair Value

Cash and cash equivalents

Available-for-sale investments

Foreign currency derivatives not traded in an active market

Natural gas swaps not traded in an active market

¹ Inputs included contractual cash flows based on prices for natural gas futures contracts, fixed prices and notional volumes specified by the swap contracts, the time value of money, liquidity risk, the company's own credit risk (related to instruments in a liability position) and counterparty credit risk (related to instruments in an asset position). Futures contract prices used as inputs in the model were supported by prices quoted in an active market and therefore categorized in Level 2.

Fair Value Method

Carrying amount (approximation to fair value assumed due to short-term nature).

Closing bid price of the common shares (Level 1) as at the statements of financial position dates.

Quoted forward exchange rates (Level 2) as at the statements of financial position dates.

A discounted cash flow model.¹

Financial Instruments Measured at Amortized Cost

Receivables, short-term debt and payables and accrued charges

Long-term debt senior notes

Other long-term debt instruments

Presented below is a comparison of the fair value of the company's senior notes to their carrying values.

Fair Value Method

Carrying amount (approximation to fair value assumed due to short-term nature).

Quoted market prices (Level 1 or 2 depending on the market liquidity of the debt).

Carrying amount.

	September 30, 2017		December 31, 2016	
	Carrying Amount of Liability ¹	Fair Value of Liability	Carrying Amount of Liability ¹	Fair Value of Liability
Long-term debt senior notes	\$ 4,205	\$ 4,530	\$ 4,202	\$ 4,384

¹Includes net unamortized debt issue costs.

The following table presents the company's fair value hierarchy for financial assets and financial liabilities carried at fair value on a recurring basis:

	Carrying Amount of Asset (Liability)	Fair Value Measurements at Reporting Dates Using:	
		Quoted Prices in Active Markets for Identical Assets (Level 1) 1	Significant Other Observable Inputs (Level 2) ^{1,2}
September 30, 2017			
Derivative instrument assets			
Natural gas derivatives	\$ 8	\$	\$ 8
Available-for-sale investments ³	1,068	1,068	
Derivative instrument liabilities			
Natural gas derivatives	(73)		(73)
December 31, 2016			
Derivative instrument assets			
Natural gas derivatives	\$ 6	\$	\$ 6
Available-for-sale investments ³	940	940	
Derivative instrument liabilities			
Natural gas derivatives	(97)		(97)

¹During the nine months ended September 30, 2017 and twelve months ended December 31, 2016, there were no transfers between Level 1 and Level 2. The company's policy is to recognize transfers at the end of the reporting period.

²During the nine months ended September 30, 2017 and twelve months ended December 31, 2016, there were no amounts categorized as Level 3.

³Available-for-sale investments are comprised of shares in ICL, Sinofert and other.

10. Seasonality

The company's sales of fertilizer can be seasonal. Typically, fertilizer sales are highest in the second quarter of the year, due to the Northern Hemisphere's spring planting season. However, planting conditions and the timing of customer purchases will vary each year, and fertilizer sales can be expected to shift from one quarter to another. Feed and industrial sales are more evenly distributed throughout the year.

11. Contingencies and Other Matters

Canpotex

PCS is a shareholder in Canpotex, which markets Canadian potash offshore. Should any operating losses or other liabilities be incurred by Canpotex, the shareholders have contractually agreed to reimburse it for such losses or liabilities in proportion to each shareholder's productive capacity. Through September 30, 2017, there were no such operating losses or other liabilities.

Mining Risk

The risk of underground water inflows, as with most other underground risks, is currently not insured.

Legal and Other Matters

The company is engaged in ongoing site assessment and/or remediation activities at a number of facilities and sites, and anticipated costs associated with these matters are added to accrued environmental costs in the manner previously described in Note 18 to the company's 2016 annual consolidated financial statements. This includes matters related to investigation of potential brine migration at certain of the potash sites. The following environmental site assessment and/or remediation matters have uncertainties that may not be fully reflected in the amounts accrued for those matters:

Nitrogen and Phosphate

- The US Environmental Protection Agency (USEPA) has identified PCS Nitrogen, Inc. (PCS Nitrogen) as a potentially responsible party at the Planters Property or Columbia Nitrogen site in Charleston, South Carolina (the Charleston Site). PCS Nitrogen is subject to a final judgment by the US District Court for the District of South Carolina allocating 30 percent of the liability for response costs at the Charleston Site to PCS Nitrogen, as well as a proportional share of any costs that cannot be recovered from another responsible party. In December 2013, the USEPA issued an order to PCS Nitrogen and four other respondents requiring them jointly and severally to conduct certain cleanup work at the Charleston Site and reimburse the USEPA's costs for overseeing that work. PCS Nitrogen is currently performing

the work required by the USEPA order. The USEPA also has requested reimbursement of approximately \$3 of previously incurred response costs. The ultimate amount of liability for PCS Nitrogen depends upon, among other factors, the final outcome of litigation to impose liability on additional parties, the amount needed for remedial activities, the ability of other parties to pay and the availability of insurance.

PCS Phosphate has been identified as a responsible party at the Ward Transformer Superfund Site in Raleigh, North Carolina (the Raleigh Site). In the past, PCS Phosphate worked with certain other responsible parties to address PCB soil contamination at the Raleigh Site pursuant to an agreement with the USEPA. The response actions are nearly complete at an estimated cost of \$80, including anticipated remaining work on the Raleigh Site. The USEPA also sought remediation in certain downstream areas that are referred to as Operable Unit 1. PCS Phosphate signed a Consent Decree with the USEPA for Operable Unit 1 in September 2016 that is not expected to require PCS Phosphate to incur any additional remediation costs. Litigation for the recovery of incurred cleanup costs was resolved through mediation and entry of the Consent Decree.

In 1996, PCS Nitrogen Fertilizer, L.P. (PCS Nitrogen Fertilizer), then known as Arcadian Fertilizer, L.P., entered into a Consent Order (the Order) with the Georgia Environmental Protection Division (GEPD) in conjunction with PCS Nitrogen Fertilizer's acquisition of real property in Augusta, Georgia. Under the Order, PCS Nitrogen Fertilizer is required to perform certain activities to investigate and, if necessary, implement corrective measures for substances in soil and groundwater. The investigation has proceeded and the results have been presented to the GEPD. Two interim corrective measures for substances in groundwater have been proposed by PCS Nitrogen Fertilizer and approved by the GEPD. PCS Nitrogen Fertilizer is implementing the approved interim corrective measures, which may be modified by PCS Nitrogen Fertilizer from time to time, but it is unable to estimate with reasonable certainty the total cost of its correction action obligations under the Order at this time.

Based on current information and except for the uncertainties described in the preceding paragraphs, the company does not believe that its future obligations with respect to these facilities and sites are reasonably likely to have a material adverse effect on its consolidated financial statements.

Other legal matters with significant uncertainties include the following:

Nitrogen and Phosphate

The USEPA has an ongoing initiative to evaluate implementation within the phosphate industry of a particular exemption for mineral processing wastes under the hazardous waste program. In connection with this industry-wide initiative, the USEPA conducted inspections at numerous phosphate operations and notified the company of alleged violations of the US Resource Conservation and Recovery Act (RCRA) at its plants in Aurora, North Carolina; Geismar, Louisiana; and White Springs, Florida. The company has entered into RCRA 3013 Administrative Orders on Consent and has performed certain site assessment activities at all of these plants. At this time, the company does not know the scope of action, if any, that may be required. As to the alleged RCRA violations, the company continues to participate in settlement discussions with the USEPA but is uncertain if any resolution will be possible without litigation, or, if litigation occurs, what the outcome would be. The company routinely monitors public information about the impacts of the initiative on other industry members, and it regularly considers this information in establishing the appropriate asset retirement obligations and accruals.

In August 2015, the USEPA finalized amendments to the hazardous air pollutant emission standards for phosphoric acid manufacturing and phosphate fertilizer production (Final Rule). The Final Rule includes certain

new requirements for monitoring and emissions that are infeasible for the company to satisfy in a timely manner. As a result, in October 2015, the company petitioned the USEPA to reconsider certain aspects of the Final Rule and separately asked the US Court of Appeals for the District of Columbia Circuit to review the Final Rule. Subsequent to these requests, required emissions testing at our Aurora facility in 2016 indicated alleged exceedances of the mercury emission limits that were established by the Final Rule. The company has communicated with the relevant agencies about this issue and supplemented its filings with the USEPA and the court to include reconsideration and review of the mercury emission limits. The facility also entered into an agreed order with the North Carolina Department of Environmental Quality in November 2016 to resolve the alleged mercury exceedances and provide a plan and schedule for evaluating alternative compliance strategies. In September 2017, the USEPA issued amendments to the Final Rule to address certain monitoring requirements raised in the company's request for reconsideration. The company is evaluating the amendments, which do not address the mercury emission limits, before determining whether to proceed with the court action, which is being held in abeyance pending the outcome of the USEPA reconsideration proceeding. Given the pending legal issues and the company's evaluation of alternative compliance strategies, the resulting cost of compliance with the various provisions of the Final Rule cannot be predicted with reasonable certainty at this time.

General

The countries where we operate are parties to the Paris Agreement adopted in December 2015 pursuant to the United Nations Framework Convention on Climate Change. Each country that is a party to the Paris Agreement submitted an Intended Nationally Determined Contribution (INDC) toward the control of greenhouse gas emissions. The impacts of these INDCs on the company's operations cannot be determined with any certainty at this time. In October 2016, the Canadian

government announced a national plan to put a price of \$10 per tonne on carbon emissions beginning in 2018 and increasing by \$10 per tonne each year through 2022, to be implemented either through a carbon tax or a cap and trade program at the election of each province. The Province of Saskatchewan is considering various alternative approaches to address the national plan. Other countries where the company operates have not at this time announced similar regulatory plans that would appear to have a significant impact on company operations. The company is monitoring these developments and their future effect on its operations cannot be determined with certainty at this time.

In addition, various other claims and lawsuits are pending against the company in the ordinary course of business. While it is not possible to determine the ultimate outcome of such actions at this time, and inherent uncertainties exist in predicting such outcomes, it is the company's belief that the ultimate resolution of such actions is not reasonably likely to have a material adverse effect on its consolidated financial statements.

The breadth of the company's operations and the global complexity of tax regulations require assessments of uncertainties and judgments in estimating the taxes it will ultimately pay. The final taxes paid are dependent upon many factors, including negotiations with taxing authorities in various jurisdictions, outcomes of tax litigation and resolution of disputes arising from federal, provincial, state and local tax audits. The resolution of these uncertainties and the associated final taxes may result in adjustments to the company's tax assets and tax liabilities.

The company owns facilities that have been either permanently or indefinitely shut down. It expects to incur nominal annual expenditures for site security and other maintenance costs at certain of these facilities. Should the facilities be dismantled, certain other shutdown-related costs may be incurred. Such costs are not expected to have a material adverse effect on the company's consolidated financial statements and would be recognized and recorded in the period in which they are incurred.

12. Related Party Transactions

The company sells potash from its Canadian mines for use outside Canada and the US exclusively to Canpotex. Sales are at prevailing market prices and are settled on normal trade terms. Sales to Canpotex for the three months ended September 30, 2017 were \$289 (2016 \$221) and the nine months ended September 30, 2017 were \$763 (2016 \$559). At September 30, 2017, \$150 (December 31, 2016 \$141) was owing from Canpotex.

13. Proposed Transaction with Agrium Inc.

On September 11, 2016, the company entered into an Arrangement Agreement with Agrium Inc. (Agrium) pursuant to which the company and Agrium have agreed to combine their businesses (the Proposed Transaction) in a merger of equals transaction to be implemented by way of a plan of arrangement under the Canada Business Corporations Act. On November 3, 2016, the Proposed Transaction was overwhelmingly approved by shareholders of both companies. On November 7, 2016, the Ontario Superior Court of Justice issued a final order approving the Proposed Transaction. The companies have since received unconditional regulatory clearance in Canada, Brazil and Russia and conditional approval from India requiring PotashCorp's commitment to divest its minority shareholdings in Arab Potash Company (APC), ICL and Sociedad Quimica y Minera de Chile S.A. (SQM) within a period of 18 months from October 18, 2017. The regulatory review and approval process continues in the U.S. and China. Upon the closing of the Proposed Transaction, the new parent company will be named Nutrien Ltd. (Nutrien). The Proposed Transaction is currently anticipated to be completed by the end of the fourth quarter of 2017 and is subject to customary closing conditions, including remaining regulatory approvals.

Upon the closing of the Proposed Transaction, the company and Agrium will become indirect, wholly owned subsidiaries of Nutrien. PotashCorp shareholders will own approximately 52 percent of Nutrien, and Agrium shareholders will own approximately 48 percent.

17 PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations (in US dollars)

The following discussion and analysis is the responsibility of management and is as at October 31, 2017. The Board of Directors (Board) carries out its responsibility for review of this disclosure principally through its audit committee, comprised exclusively of independent directors. The audit committee reviews and, prior to its publication, approves this disclosure, pursuant to the authority delegated to it by the Board. The term "PCS" refers to Potash Corporation of Saskatchewan Inc. and the terms "we," "us," "our," "PotashCorp" and "the company" refer to PCS and, as applicable, PCS and its direct and indirect subsidiaries as a group. Additional information relating to PotashCorp (which, except as otherwise noted, is not incorporated by reference herein), including our Annual Report on Form 10-K for the year ended December 31, 2016 (2016 Form 10-K), can be found on SEDAR at www.sedar.com and on EDGAR at www.sec.gov. The company is a foreign private issuer under the rules and regulations of the US Securities and Exchange Commission (the SEC); however, it currently files voluntarily on the SEC's domestic forms.

POTASHCORP AND OUR OPERATING ENVIRONMENT

PotashCorp is the world's largest crop nutrient company by capacity, producing the three primary crop nutrients: potash (K), nitrogen (N) and phosphate (P) for use in the production of fertilizer, industrial and animal feed products.

Our Canadian potash operations—the primary focus and namesake of our company—represent approximately one-fifth of global capacity. To enhance our global footprint, we also have investments in four potash-related businesses in Latin America, the Middle East and Asia. We complement our potash assets with focused positions in nitrogen and phosphate.

Detailed descriptions of our operating environments can be found on pages 18 and 19 (potash), 20 and 21 (nitrogen) and 22 and 23 (phosphate) in our 2016 Annual Integrated Report (2016 AIR).

GOVERNANCE

In fulfilling its oversight responsibilities, our Board's commitment to excellence in governance permeates our overall approach to business. Our Board fosters a culture that encourages us to uphold the highest ethical standards and strive for excellence in our business practices in order to build long-term value for all our stakeholders.

There have been no significant changes to how we approach governance from that described in our 2016 AIR (see pages 24 to 27).

STRATEGY AND PERFORMANCE

Creating superior shareholder value is essential to ensure we can make plentiful possible for all our stakeholders. Strong and sustainable earnings growth—coupled with a premium valuation multiple—rewards our shareholders and, at the same time, allows us to focus on our broader social and environmental responsibilities. Our seven strategic priorities determine where we focus our efforts to create long-term value for all those associated with our business. Our long-term objective is to create superior shareholder value by: growing earnings and cash flow while minimizing volatility; protecting and enhancing a premium valuation multiple; and maintaining the trust and support of our stakeholders.

Financially, we prioritize earnings growth and investment opportunities in potash, while complementing that business with other best-in-class assets. Our strategic priorities, depicted below and described in further detail along with key target metrics on pages 30 to 47 in our 2016 AIR, did not change through the third quarter of 2017.

PENDING MERGER OF EQUALS WITH AGRIMUM INC.

During the third quarter of 2016, PotashCorp entered into an Arrangement Agreement (the Arrangement Agreement) with Agrium Inc. (Agrium) to combine their businesses (the Proposed Transaction) in a merger of equals transaction to be implemented by way of a plan of arrangement under the Canada Business Corporations Act. During the third quarter of 2017, the Canadian Competition Bureau approved the Proposed Transaction. In October 2017, a conditional approval was obtained from India requiring the companies' commitment to divest three of PotashCorp's minority shareholdings. From a regulatory standpoint, we continue to cooperate with the various enforcement agencies in their reviews. We have received unconditional regulatory clearances in Canada, Brazil and Russia and a conditional approval from India. We continue to work on obtaining approval from China and the US.

The creation of Nutrien Ltd. (Nutrien) pursuant to the Proposed Transaction is designed to: 1) bring together world-class nutrient production assets and retail distribution, providing an integrated platform with multiple paths for growth; 2) create up to \$500 million of annual run-rate operating synergies within 24 months of closing; 3) enhance financial flexibility through the use of a strong balance sheet and improved cash flows, enabling the support of growth initiatives and shareholder returns; and 4) leverage best-in-class leadership and governance through the combination of two experienced teams that are focused on creating long-term value.

For further discussion of the Proposed Transaction, please refer to Note 13 of the financial statements in this Form 10-Q, our Current Reports on Form 8-K and the documents filed therewith, filed with the SEC on September 12, 2016 and on October 6, 2016 and the various filings with Canadian provincial securities commissions, including the joint information circular of PCS and Agrium dated October 3, 2016.

RISK

In our 2016 AIR, we provide an overview of our approach to risk (page 28), explain how we use a risk management-ranking methodology to assess the key risks specific to our company (page 49) and provide a description of, management approach to, and any significant developments for, each key risk (pages 50 to 55).

Our risk-ranking matrix, in terms of residual severity of consequence and likelihood, is displayed below.

Key risks with rankings unchanged from our 2016 AIR are as follows:

Risk	Ranking	Associated Strategies¹	Risk	Ranking	Associated Strategies¹
Extreme loss	B		International operations and non-operated investments	C	
Offshore potash sales and distribution	B		Safety, health and security	C	
Competitive supply	B		Stakeholder support for our business plans	C	
Global potash demand	B		Sustaining growth	C	
Cyber security	C		Trinidad natural gas supply	C	
Environment	C		Capital management	D	

Key risk with ranking that has changed since our 2016 AIR is as follows:

Risk	Ranking	Associated Strategies¹	Developments
Realization of asset values	C		The overall risk ranking has increased from D to C. We expect to perform an assessment of certain aspects of our operations in the fourth quarter of 2017, the outcome of which could result in us not being able to recover all or a portion of our investment in certain assets.

¹ Brighter sections indicate the strategic priority (described on page 18 of this Form 10-Q) impacted by the risk. Faded sections mean the strategic priority is not significantly affected by the risk.

KEY PERFORMANCE DRIVERS PERFORMANCE COMPARED TO TARGETS

Through our integrated value model, we set, evaluate and refine our targets to drive improvements that benefit all those impacted by our business. We demonstrate our accountability by tracking and reporting our performance against targets related to each strategic priority set out on pages 32 to 47 in our 2016 AIR. A summary of our progress against selected strategic priorities and representative annual targets is set out below.

Strategic Priority	Representative 2017 Annual Target	Performance to September 30, 2017
Portfolio & Return Optimization	Exceed total shareholder return (TSR) performance for our sector and the DAXglobal Agribusiness Index.	PotashCorp's TSR was 9 percent in the first nine months of 2017 compared to our sector's weighted average return based on market capitalization ¹ of 18 percent and the DAXglobal Agribusiness Index weighted average return (based on market capitalization) of 11 percent.
Operational Excellence	Achieve a 95 percent ammonia reliability rate for our nitrogen division.	Our ammonia reliability rate was 94 percent for the first nine months of 2017.
People Development	Maintain an annual employee turnover rate of 5 percent or less.	Employee turnover rate on an annualized basis for the first nine months of 2017 was 4 percent.
Safety & Health Excellence	Achieve zero life-altering injuries at our sites.	There were no life-altering injuries at our sites during the first nine months of 2017.
	Reduce total site recordable injury rate to 0.75 (or lower) and total lost-time injury rate to 0.07 (or lower).	During the first nine months of 2017, total site recordable injury rate was 0.85 and total lost-time injury rate was 0.12.
Environmental Excellence	By 2018, reduce environmental incidents (releases, permit excursions and spills) by 40 percent from 2014 levels.	Annualized total environmental incidents were down 67 percent through the first nine months of 2017 compared to 2014 annual levels. Compared to the first nine months of 2016, total reportable incidents were down 65 percent.

¹ TSRs are based on the currencies of the primary exchanges in which the relevant shares are traded.

PERFORMANCE OVERVIEW

This discussion and analysis are based on the company's unaudited interim condensed consolidated financial statements included in Part I of this Quarterly Report on Form 10-Q (financial statements in this Form 10-Q) based on International Financial Reporting Standards as issued by the International Accounting Standards Board (IFRS), unless otherwise stated. All references to per-share amounts pertain to diluted net income per share.

For an understanding of trends, events, uncertainties and the effect of critical accounting estimates on our results and financial condition, this Form 10-Q should be read carefully, together with our 2016 AIR.

REVISED ANNUAL EARNINGS GUIDANCE ¹ AND FIRST NINE MONTHS 2017 RESULTS

	Revised Annual		First Nine Months
	Guidance ¹		Actual Results
Earnings per share	\$ 0.48	\$ 0.54	\$ 0.48

¹ Revised on October 26, 2017.

21 PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q

OVERVIEW OF ACTUAL RESULTS

Dollars (millions), except per-share amounts	Three Months Ended September 30				Nine Months Ended September 30			
	2017	2016	Change	% Change	2017	2016	Change	% Change
Sales	\$ 1,234	\$ 1,136	\$ 98	9	\$ 3,466	\$ 3,398	\$ 68	2
Gross margin	230	190	40	21	753	667	86	13
Operating income	135	138	(3)	(2)	556	496	60	12
Net income	53	81	(28)	(35)	403	277	126	45
Net income per share diluted	0.06	0.10	(0.04)	(40)	0.48	0.33	0.15	45
Other comprehensive income (loss)	42	21	21	100	150	(152)	302	n/m

n/m = not meaningful

Earnings in the third quarter of 2017 were lower than the same period of 2016 due primarily to higher gross margin in potash being more than offset by lower gross margins in nitrogen and phosphate, higher income tax expense and other expenses (other income in 2016). Earnings in the first nine months of 2017 were higher than the same period of 2016 due primarily to higher gross margin in potash and income tax recovery in 2017, compared to income tax expenses in 2016, which more than offset lower gross margins in nitrogen and phosphate and higher other expenses relating to the Proposed Transaction.

Global potash prices improved for the fifth consecutive quarter as agronomic need and affordability led to strong demand in all major markets. Shipments to China and India accelerated following contract settlements early in the third quarter while deliveries to Latin America continued at a record pace. In North America, dealers worked to position product in anticipation of a strong fall application season, leading to elevated shipment levels.

In nitrogen, tighter market fundamentals late in the quarter supported a recovery in prices from multi-year lows. This was most evident in urea markets, where seasonally strong demand and lower Chinese exports led to higher prices. Ammonia and UAN

prices also strengthened, but remained volatile and well below 2016's third quarter levels, as new expansions began to ramp up, most notably in the US.

Phosphate fertilizer markets witnessed moderate appreciation during the quarter, supported by stronger engagement from India and weather-related supply outages that offset the impact of competition from increased Chinese exports. While prices for industrial products were relatively flat during the quarter, feed prices remained under pressure due to the impact of increased supply from offshore producers, keeping them well below prior-year levels.

Other comprehensive income for the third quarter of 2017 was primarily the result of an increase in the fair value of our investment in Sinofert Holdings Limited (Sinofert) more than offsetting a decrease in the fair value of our investment in Israel Chemicals Ltd. (ICL). Other comprehensive income for the first nine months of 2017 was

primarily the result of increases in the fair values of our investments in ICL and Sinofert. Other comprehensive income for the third quarter of 2016 was primarily the result of increases in the fair value of our investments in ICL and Sinofert. Other comprehensive loss for the first nine months of 2016 was primarily impacted by a net actuarial loss resulting from a remeasurement of our defined benefit plans and decreases in the fair value of our investments in ICL and Sinofert.

OPERATING SEGMENT REVIEW

We report our results (including gross margin) in three business segments: potash, nitrogen and phosphate as described in Note 2 to the financial statements in this Form 10-Q. Our reporting structure reflects how we manage our business and how we classify our operations for planning and measuring performance. We include net sales in segment disclosures in the financial statements in this Form 10-Q pursuant to IFRS, which require segmentation based upon our internal organization and reporting of revenue and profit measures. As a component of gross margin, net sales (and the related per-tonne amounts) are the primary revenue measures we use and review in making decisions about operating matters on a business segment basis. These decisions include assessments about potash, nitrogen and phosphate performance and the resources to be allocated to these segments. We also use net sales (and the related per-tonne amounts) for business planning and monthly forecasting. Net sales are calculated as sales revenues less freight, transportation and distribution expenses. Realized prices refer to net sales prices.

Our discussion of segment operating performance is set out below and includes nutrient product and/or market performance results, where applicable, to give further insight into these results.

Other markets	7	3	133	7	6	17
	100	100		100	100	

¹ Canpotex Limited (Canpotex).

² All Asian markets except China and India.

The most significant contributors to the change in total gross margin were as follows (direction of arrows refers to impact on gross margin while symbol is neutral):

	Sales Volumes	Net Sales Prices	Cost of Goods Sold
Quarter over Quarter	Record sales volumes were driven by an anticipated strong fall application season in North America and strong offshore shipments were led by increased demand in all key markets.	Our average realized price increased as prices in all markets continued to strengthen due to strong demand.	Costs were lower in 2017 due to improvements in our portfolio optimization effort, including a greater share of production coming from our lower-cost mines, particularly Rocanville.
Year over Year	Offshore volumes were higher as strong affordability and agronomic need supported stronger demand in all key markets.	Prices were higher due to strong demand supporting a continued recovery in most global markets.	Costs were also lower in 2017 due to annual maintenance at Allan being completed in the second quarter of 2017 compared to the third quarter in 2016 and due to a shorter shutdown at Rocanville than in 2016. Costs were lower in 2017 due to improvements in our portfolio optimization effort, including a greater share of production coming from our lower-cost mines, particularly Rocanville.
	North American volumes were flat as demand remained strong similar to 2016.	Offshore prices were also higher due to 2016 results reflecting the impact of our share of Canpotex's project exit costs following its decision not to proceed with development of an export terminal in Prince Rupert, British Columbia.	Costs were also lower in 2017 as the first quarter of 2016 included costs associated with the indefinite suspension of potash operations at Picadilly.
			Offshore cost of goods sold variance was less positive than North America as a relatively higher percentage of products sold was produced at higher-cost mines.

NON-FINANCIAL PERFORMANCE

The most significant contributors to the change in our non-financial performance highlights were as follows:

QUARTER OVER QUARTER

Production increased as a result of stronger demand, the completion of the Rocanville expansion and ramp up, and an increase in our Canpotex sales entitlement.

The eight recordable injuries in 2017, compared to 13 in 2016, resulted in a lower total recordable injury rate.

There were two lost-time injuries in 2017, compared to none in 2016.

There were no significant changes between 2016 and 2017.

In 2017, we experienced no environmental incidents. In 2016, we experienced one release of oil/grease into a containment pond and one wetland permit exceedance for topsoil.

Waste, as defined in our 2016 AIR, increased quarter over quarter due primarily to the increase in production.

YEAR OVER YEAR

Production increased as a result of stronger demand, the completion of the Rocanville expansion and ramp up, and an increase in our Canpotex sales entitlement.

There were no significant changes to the total recordable injury rate between 2016 and 2017.

There were four lost-time injuries in 2017, compared to two in 2016.

There were no significant changes between 2016 and 2017.

In 2017, we experienced two environmental incidents, consisting of two potash spills. In 2016, we experienced six environmental incidents: two potash spills, one brine spill, one water release with high suspended solids, one oil/grease spill and one wetland permit exceedance for topsoil.

Waste, as defined in our 2016 AIR, increased period over period due primarily to the increase in production.

	(thousands) 2017	2016	per Tonne 2017	2016	(thousands) 2017	2016	per Tonne 2017	2016
Fertilizer	605	542	\$ 176	\$ 187	1,897	1,755	\$ 215	\$ 229
Industrial and Feed	968	1,024	\$ 164	\$ 208	2,837	2,982	\$ 202	\$ 230
	1,573	1,566	\$ 168	\$ 200	4,734	4,737	\$ 207	\$ 230

The most significant contributors to the change in total gross margin were as follows (direction of arrows refers to impact on gross margin while symbol is neutral):

Quarter over Quarter	Sales Volumes	Net Sales Prices	Cost of Goods Sold
	There were no significant changes.	Our average realized price declined due to lower realizations for ammonia and nitrogen solutions. Prices for urea were up due to seasonally strong demand and lower Chinese exports.	Average costs, including our hedge position, for natural gas used as feedstock in production decreased 10 percent. Costs for natural gas used as feedstock in Trinidad production fell 20 percent (contract price indexed, in part, to Tampa ammonia prices) while our US spot costs for natural gas increased

5 percent. Including losses on our hedge position, our US gas prices were flat.

	Sales Volumes	Net Sales Prices	Cost of Goods Sold
Year over Year	There were no significant changes.	Our average realized price was impacted by lower benchmark pricing as a result of increased global supply. Pricing for urea did not fall as much as with other products mainly due to tighter supply and demand fundamentals relative to the other products.	<p>Average costs, including our hedge position, for natural gas used as feedstock in production increased 2 percent. Costs for natural gas used as feedstock in Trinidad production fell 10 percent (contract price indexed, in part, to Tampa ammonia prices) while our US spot costs for natural gas increased 34 percent. Including losses on our hedge position, our US gas prices increased 14 percent.</p> <p>Ammonia cost of goods sold variance was positive due to lower natural gas costs in Trinidad more than offsetting higher natural gas costs in the US.</p>

NON-FINANCIAL PERFORMANCE

The most significant contributors to the change in our non-financial performance highlights were as follows:

QUARTER OVER QUARTER

There were no significant changes between 2016 and 2017.

There were no significant changes to the total recordable injury rate between 2016 and 2017.

There was one lost-time injury in 2017, compared to none in 2016.

The annualized employee turnover rate increased as a result of 10 departures in 2017 compared to seven departures in 2016.

In 2017, we had one environmental incident, consisting of one ammonia release. In 2016, we had two environmental incidents, consisting of one ammonia release and one NOx/nitric acid release event.

YEAR OVER YEAR

There were no significant changes between 2016 and 2017.

There were no significant changes between 2016 and 2017.

The annualized employee turnover rate increased as a result of 24 departures in 2017 compared to 14 departures in 2016.

In 2017, we had four environmental incidents, consisting of three ammonia releases and one organic nitrogen permit exceedance. In 2016, we had six environmental incidents, consisting of three ammonia gas releases, one fluoride air permit exceedance, one urea solution spill and one NOx/nitric acid release event.

Total				\$ (60)				\$ (104)		

The most significant contributors to the change in total gross margin were as follows (direction of arrows refers to impact on gross margin while symbol is neutral):

Quarter over Quarter	Sales Volumes	Net Sales Prices	Cost of Goods Sold
	Higher volumes of solid phosphate fertilizer from increased availability, more than offset lower volumes of liquid fertilizer.	Our average realized price was down primarily due to lower prices for feed and industrial products which were impacted by increased supply from offshore producers.	Feed and industrial cost of goods sold variance was negative due to an impairment of property, plant and equipment related to a feed product that we will no longer produce. Fertilizer cost of goods sold variance was negative mainly due to increased rock costs. Favorable adjustments to our asset retirement obligations in 2016, primarily due to an increase in the relevant discount rates, did not recur in 2017.

	Sales Volumes	Net Sales Prices	Cost of Goods Sold
Year over Year	There were no significant changes.	Our average realized price was down due to increased competitive supply and lower input costs.	<p>Sulfur costs were down 9 percent, decreasing our cost of goods sold.</p> <p>Feed and industrial was positive as the increase in asset retirement obligations due to discount rate adjustments was lower than in 2016.</p> <p>Fertilizer cost of goods sold variance was negative mainly due to increased rock costs.</p> <p>Impairment of property, plant and equipment in 2017 (discussed on prior page) was slightly higher than the 2016 impairment of property, plant and equipment related to an industrial product we no longer produce.</p>

NON-FINANCIAL PERFORMANCE

The most significant contributors to the change in our non-financial performance highlights were as follows:

QUARTER OVER QUARTER

There were no significant changes between 2016 and 2017.

There were no significant changes in the total recordable injury rate between 2016 and 2017.

In 2017, there were two lost-time injuries, compared to no lost-time injuries in 2016.

The annualized employee turnover rate increased due to 13 departures in 2017 compared to 11 departures in 2016.

In 2017, we experienced no environmental incidents. In 2016 there was one incident involving a slightly low-pH water release.

In 2017 water consumption decreased due to increased rainfall at our White Springs facility compared to 2016 and a new water recycling project. Water consumption in 2016 was also higher as certain processes at our White Springs facility continued to need water even when product was not being manufactured.

YEAR OVER YEAR

There were no significant changes between 2016 and 2017.

In 2017, there were 15 recordable injuries, including three lost-time injuries, compared to 21 recordable injuries and two lost-time injuries in 2016.

The annualized employee turnover rate increased due to 39 departures in 2017 compared to 30 departures in 2016.

In 2017, we experienced no environmental incidents. In 2016, incidents were related to a release of higher suspended solids in waste water, a release of ammonia to air, one permit exceedance for mercury and one slightly low-pH water release.

There were no significant changes in water consumption between 2016 and 2017.

OTHER EXPENSES AND INCOME

Dollars (millions), except percentage amounts	Three Months Ended September 30				Nine Months Ended September 30			
	2017	2016	Change	% Change	2017	2016	Change	% Change
Selling and administrative expenses	\$ (56)	\$ (59)	\$ 3	(5)	\$ (154)	\$ (167)	\$ 13	(8)
Provincial mining and other taxes	(47)	(31)	(16)	52	(125)	(88)	(37)	42
Share of earnings of equity-accounted investees	33	25	8	32	121	74	47	64
Dividend income	5	8	(3)	(38)	17	24	(7)	(29)
Impairment of available-for-sale investment						(10)	10	(100)
Other (expenses) income	(30)	5	(35)	n/m	(56)	(4)	(52)	n/m
Finance costs	(60)	(55)	(5)	9	(180)	(161)	(19)	12
Income tax (expense) recovery	(22)	(2)	(20)	n/m	27	(58)	85	n/m

n/m = not meaningful

The most significant contributors to the change in other expenses and income were as follows:

	Quarter over Quarter	Year over Year
Provincial Mining and Other Taxes	Provincial mining and other taxes increased primarily due to stronger potash prices and a higher proportion of forecasted annual gross margin earned as compared to the same periods in 2016.	
Share of Earnings of Equity-Accounted Investees	The higher share of earnings of equity-accounted investees pertains primarily to SQM and APC.	Share of earnings of equity-accounted investees pertains primarily to SQM and APC. The increase was mainly due to higher earnings at SQM.
Other (Expenses) Income	Other expenses in 2017 were primarily due to a foreign exchange loss and costs related to the Proposed Transaction. Other income in 2016 related to a foreign exchange gain.	Other expenses increased primarily due to costs related to the Proposed Transaction.
Finance Costs	Interest rates on short-term debt have increased over the comparative periods due to increases in benchmark interest rates.	
Income Tax (Expense) Recovery	Income tax expense increased from the same period in 2016 primarily due to the change in discrete tax adjustments.	The change in income tax was primarily due to a discrete \$68 million deferred tax recovery recorded in the second quarter of 2017 as a result of a Saskatchewan income tax rate decrease. For the first nine months of 2017, 141 percent of the effective tax rate on the current year's ordinary earnings pertained to current income taxes (2016 89 percent) and (41) percent related to deferred income taxes (2016 11 percent). The decrease in the deferred portion is due to significantly lower forecasted annual earnings in the United States partially offset by higher earnings in Canada.

EFFECTIVE TAX RATES AND DISCRETE ITEMS

	Three Months Ended September 30		Nine Months Ended September 30	
Dollars (millions), except percentage amounts	2017	2016	2017	2016

The most significant contributors to the change in other non-financial information quarter over quarter and year over year were as follows:

Quarter over Quarter

Taxes and Royalties Taxes and royalties increased primarily due to higher current income tax expense caused by discrete current tax adjustments that resulted in an expense of \$13 million in the third quarter of 2017 compared to a recovery of \$15 million in the same period in 2016. In addition, provincial mining and other taxes increased as a result of stronger potash prices and a higher proportion of forecasted annual gross margin earned as compared to the same period in 2016.

Year over Year

Taxes and royalties increased primarily due to higher provincial mining and other taxes as a result of stronger potash prices and a higher proportion of forecasted annual gross margin earned as compared to the same period in 2016. In addition, current income tax expense increased as a result of discrete current tax adjustments that resulted in an expense of \$17 million in the first nine months of 2017 compared to a recovery of \$8 million in the same period in 2016.

FINANCIAL CONDITION REVIEW

STATEMENT OF FINANCIAL POSITION ANALYSIS

The most significant contributors to the changes in our statements of financial position were as follows (direction of arrows refers to increase or decrease):

Assets

Receivables increased primarily due to higher trade accounts receivable.

Property, plant and equipment decreased as impairment charges related to phosphate assets and depreciation exceeded additions.

Investments were impacted primarily by higher fair values of our available-for-sale investments in ICL and Sinofert.

Equity

Retained earnings were higher as a result of net income (discussed in more detail on page 22) exceeding dividends declared.

Accumulated other comprehensive loss changed to accumulated other comprehensive income primarily as a result of the net change in fair value of our available-for-sale investments noted above.

As at September 30, 2017, \$67 million (December 31, 2016 \$21 million) of our cash and cash equivalents was held in certain foreign subsidiaries. There are no current plans to repatriate the funds at September 30, 2017 in a manner that would result in tax consequences.

Liabilities

Short-term debt decreased due to a decrease in our outstanding commercial paper.

Deferred income tax liabilities have decreased primarily due to a discrete deferred tax recovery as a result of a Saskatchewan income tax rate decrease.

LIQUIDITY AND CAPITAL RESOURCES

CASH REQUIREMENTS

CONTRACTUAL OBLIGATIONS AND OTHER COMMITMENTS

Our contractual obligations and other commitments detailed on page 84 of our 2016 AIR summarize certain of our liquidity and capital resource requirements, excluding obligations that have original maturities of less than one year and planned (but not legally committed) capital expenditures. There have been no significant changes to these contractual obligations and other commitments or to our planned capital expenditures during the first nine months of 2017.

SOURCES AND USES OF CASH

The company's cash flows from operating, investing and financing activities are summarized in the following table:

Dollars (millions), except percentage amounts	Three Months Ended September 30				Nine Months Ended September 30			
	2017	2016	Change	% Change	2017	2016	Change	% Change
Cash provided by operating activities	\$ 293	\$ 295	\$ (2)	(1)	\$ 844	\$ 907	\$ (63)	(7)
Cash used in investing activities	(170)	(192)	22	(11)	(432)	(658)	226	(34)

Cash used in financing activities	(123)	(93)	(30)	32	(347)	(187)	(160)	86
Increase in Cash and Cash Equivalents	\$	\$ 10	\$ (10)	(100)	\$ 65	\$ 62	\$ 3	5

41 PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q

PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q **42**

The most significant contributors to the changes in cash flows were as follows:

	Quarter over Quarter	Year over Year
Cash Provided by Operating Activities	<p>Cash provided by operating activities was impacted by:</p> <p style="padding-left: 40px;">Lower net income in 2017;</p> <p style="padding-left: 40px;">Earnings from equity-accounted investees in 2017 compared to a loss in 2016;</p> <p style="padding-left: 40px;">A non-cash impairment charge to property, plant and equipment; and</p> <p style="padding-left: 40px;">Higher cash outflows from receivables in 2017.</p>	<p>Cash provided by operating activities was impacted by:</p> <p style="padding-left: 40px;">Higher net income in 2017;</p> <p style="padding-left: 40px;">A deferred income tax recovery in 2017 compared to a provision in 2016;</p> <p style="padding-left: 40px;">Cash outflows from receivables in 2017 compared to inflows in 2016; and</p> <p style="padding-left: 40px;">Lower cash outflows from payables and accrued charges in 2017.</p>
Cash Used in Investing Activities	Cash used in investing activities was primarily for additions to property, plant and equipment.	
Cash Used in Financing Activities	Cash used in financing activities in 2017 was largely the result of repayment of commercial paper and dividends paid. Cash used in financing activities in 2016 was largely the result of dividends paid more than offsetting proceeds from the issuance of commercial paper.	

We believe that internally generated cash flow, supplemented by available borrowings under our existing financing sources, if necessary, will be sufficient to meet our anticipated capital expenditures and other cash requirements for at least the next 12 months, inclusive of requirements relating to the Proposed Transaction and our working capital deficiency, but exclusive of any possible acquisitions. At this time, we do not reasonably expect any presently known trend or uncertainty to affect our ability to access our potential sources of liquidity.

CAPITAL STRUCTURE AND MANAGEMENT

PRINCIPAL DEBT INSTRUMENTS

¹The authorized aggregate amount under the company's commercial paper programs in Canada and the US is \$2,500 million. The amounts available under the commercial paper programs are limited to the availability of backup funds under the credit facility. Included in the amount outstanding and committed is \$290 million of commercial paper.

²Letters of credit committed. We also have an uncommitted \$100 million letter of credit facility against which \$43 million was issued at September 30, 2017.

We use a combination of cash generated from operations and short-term and long-term debt to finance our operations. We typically pay floating rates of interest on our short-term debt and credit facility and fixed rates on our senior notes.

During the third quarter of 2017, we extended the maturity on our \$75 million short-term line of credit to August 2018 (from August 2017). There were no other significant changes to the nature of our outstanding commercial paper, credit facility, short-term line of credit and uncommitted letter of credit facility described on page 87 in our 2016 AIR. As at September 30, 2017, interest rates on outstanding commercial paper ranged from 1.4 percent to 1.5 percent. (December 31, 2016 – 0.9 percent to 1.1 percent).

The credit facility and line of credit have financial tests and covenants, including consequences of non-compliance, referenced on page 87 of our 2016 AIR, with which we must comply at each quarter-end. We were in compliance with all covenants as at September 30, 2017 and at this time anticipate being in compliance with such covenants through 2017.

The accompanying table summarizes the limits and results of certain covenants:

Debt covenants at September 30

Dollars (millions), except ratio amounts		Limit	2017
Debt-to-capital ratio ¹	£	0.65	0.35
Debt of subsidiaries	< \$	1,000	\$
Net book value of disposed assets	< \$	4,314 ²	\$ 2

¹ Debt-to-capital ratio = debt (short-term debt and current portion of long-term debt + long-term debt) / (debt + shareholders' equity). This non-IFRS financial measure is a requirement of our debt covenants and should not be considered as a substitute for, nor superior to, measures of financial performance prepared in accordance with IFRS.

² Limit is 25 percent of the prior year's year-end total assets.

Our ability to access reasonably priced debt in the capital markets is dependent, in part, on the quality of our credit ratings. We continue to maintain investment-grade credit ratings for our long-term debt. A downgrade of the credit rating of our long-term debt would increase the interest rates applicable to borrowings under our credit facility and our line of credit.

Commercial paper markets are normally a source of same-day cash for the company. Our access to the US commercial paper market primarily depends on maintaining our current short-term credit ratings as well as general conditions in the money markets.

	Long-Term Debt Rating (Outlook)		Short-Term Debt Rating	
	September 30 2017	December 31 2016	September 30 2017	December 31 2016
Moody's	Baa1 (negative)	Baa1 (negative)	P-2	P-2
Standard & Poor's	BBB+ (negative)	BBB+ (stable)	A-2¹	A-2 ¹

¹ S&P assigned a global commercial paper rating of A-2 but rated our commercial paper A-1 (low) on a Canadian scale.

A security rating is not a recommendation to buy, sell or hold securities. Such rating may be subject to revision or withdrawal at any time by the respective credit rating agency and each rating should be evaluated independently of any other rating.

Our \$4,250 million of senior notes were issued under US shelf registration statements. If the Proposed Transaction is completed, a downgrade in the company's credit ratings below investment-grade would trigger a change in control offer under existing debt securities, except for the senior notes issued in 2016, and the company would be required to make an offer to purchase all, or any part, of the senior notes at 101 percent of the \$3,750 million outstanding principal amount of the senior notes to be repurchased, plus accrued and unpaid interest.

For the first nine months of 2017, our weighted average cost of capital was 6.7 percent (2016 7.4 percent), of which 75 percent represented the cost of equity (2016 75 percent).

OUTSTANDING SHARE DATA

	September 30 2017	December 31 2016
Common shares issued and outstanding	840,163,998	839,790,379
Options to purchase common shares outstanding	17,266,382	19,470,014
Share-settled performance share units	935,570	602,740
Number of share-settled compensation plans	9	10

OFF-BALANCE SHEET ARRANGEMENTS

Off-balance sheet arrangements are described on page 88 of our 2016 AIR. We do not reasonably expect any presently known trend or uncertainty to affect our ability to continue using these arrangements. Refer to Note 11 to the financial statements in this

Form 10-Q for a contingency related to Canpotex. Refer to page 88 of our 2016 AIR for information pertaining to our guarantees and derivative instruments. See cash requirements on page 41 of this Form 10-Q and our 2016 AIR for obligations related to operating leases and certain of our long-term raw materials agreements that contain fixed price and/or volume components.

¹ Net income per share for each quarter has been computed based on the weighted average number of shares issued and outstanding during the respective quarter, including the dilutive number of shares assumed for the diluted earnings per share computation; therefore, as the number of shares varies each period, quarterly amounts may not add to the

annual total.

Refer to Note 10 to the financial statements in this Form 10-Q for information pertaining to sales that can be seasonal.

In the first quarter of 2016, earnings were impacted by a \$27 million non-cash impairment charge to property, plant and equipment in the phosphate segment. In the second quarter of 2016, earnings were impacted by \$33 million in exit costs related to Canpotex's Prince Rupert terminal in the potash segment and a \$10 million non-cash impairment charge on our available-for-sale investment in Sinofert. In the fourth quarter of 2016, earnings were impacted by a \$20 million non-cash impairment charge to property, plant and equipment in the phosphate segment.

OTHER FINANCIAL INFORMATION

RELATED PARTY TRANSACTIONS

Refer to Note 12 to the financial statements in this Form 10-Q for information pertaining to transactions with related parties.

CRITICAL ACCOUNTING ESTIMATES

There have been no material changes to our critical accounting policies in the first nine months of 2017. Certain of these policies, such as long-lived asset impairment, derivative instruments, provisions and contingencies for asset retirement, environmental and other obligations, and capitalization and depreciation of property, plant and equipment, involve critical accounting estimates because they require us to make subjective or complex judgments about matters that are inherently uncertain and because of the likelihood that materially different amounts could be reported under different conditions or using different assumptions, particularly in the current market environment. We expect to perform an assessment of certain aspects of our operations in the fourth quarter of 2017, the outcome of which could result in us not being able to recover all or a portion of our investment in certain assets disclosed in Notes 13 and 19 of our 2016 AIR. See page 35 of this Form 10-Q for a discussion of an impairment of specialized phosphate assets. Impairment sensitivities relating to cash-generating units in our phosphate segment are described on page 89 of our 2016 AIR.

We have discussed the development, selection and application of our key accounting policies, and the critical accounting estimates and assumptions they involve, with the audit committee of the Board, and the committee reviewed the disclosures described in this Form 10-Q.

RECENT ACCOUNTING CHANGES

Refer to Note 1 to the financial statements in this Form 10-Q for information on issued accounting pronouncements that will be effective in future periods and were effective in 2017. Information on the implementation of IFRS 15, Revenue From Contracts With Customers and IFRS 16, Leases are described on page 89 of our 2016 AIR.

OUTLOOK

POTASH MARKET OUTLOOK

We continue to see strong customer engagement in all key potash markets and expect robust demand to continue into 2018. We have maintained our anticipated global shipment range for 2017 at 62-65 million tonnes and, with Canpotex now fully committed for the remainder of the year, we expect this year's demand to eclipse the previous record.

In North America, demand continues to be robust as growers address nutrient needs and capitalize on strong affordability. We expect total shipments to this market to approach the upper end of our 9.3-9.8 million tonnes range.

With its substantial agronomic need and favorable crop economics, we anticipate deliveries to Latin America will remain on pace to surpass those of 2016, with our full-year shipment total unchanged at 12.0-12.5 million tonnes.

In China, we expect nutrient affordability will continue to drive strong consumption. We maintain our 2017 shipment estimate in the range of 15.5-16.5 million tonnes, a potential record for this market.

We continue to see an improving demand environment in India, supported by significant agronomic need, higher minimum support prices and a favorable monsoon. We now expect deliveries for 2017 near the upper end of our

guidance range of 4.0-4.5 million tonnes, an increase from 2016 levels.

In Other Asian markets, we expect supportive palm oil prices and improved moisture conditions will support demand for the remainder of the year and are maintaining our estimated shipment range of 9.0-9.5 million tonnes for the full year, above the 2016 total.

FINANCIAL OUTLOOK

With greater clarity on potash markets through the balance of the year, we have narrowed our guidance range for potash sales volumes, to 9.1-9.3 million tonnes, and for gross margin, to \$750-\$800 million.

In nitrogen, we expect markets to remain volatile in the fourth quarter and anticipate full-year gross margin will be significantly weaker than in 2016. In phosphate, we expect challenging market fundamentals will continue to weigh on our realizations. With these factors in mind, and taking into consideration the third-quarter phosphate impairment charge, we have lowered our combined nitrogen and phosphate gross margin range and now estimate \$140-\$190 million in 2017, trailing last year's combined total.

We now anticipate our effective income tax rate to be in a negative range of 2-4 percent, primarily due to discrete tax adjustments.

We have lowered the upper end of our estimates for provincial mining and other taxes and now expect a range of 19-21 percent of potash gross margin for 2017. Further, we have lowered our range for selling and administrative expenses to \$215-\$225 million and increased our range for finance costs to \$230-\$240 million.

We have raised the bottom end of our range for income from equity investments and now expect \$180-\$190 million, primarily due to the strength of SQM earnings.

Due to the recent strength of the Canadian dollar, we have revised our full-year foreign exchange rate assumption to CDN \$1.30 per US dollar.

Based on these factors, we have narrowed our full-year 2017 earnings guidance and now estimate \$0.48-\$0.54 per share. Merger-related costs are now anticipated to be \$0.08 per share, with \$0.05 per share expected in the fourth quarter.

47 PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q

FORWARD-LOOKING STATEMENTS

Certain statements in this Quarterly Report on Form 10-Q, including, but not limited to, those in the Outlook section of Management's Discussion and Analysis of Financial Condition and Results of Operations, contain forward-looking statements (within the meaning of the US Private Securities Litigation Reform Act of 1995 and other US federal securities laws) or forward-looking information (within the meaning of applicable Canadian securities legislation) that relate to future events or our future financial performance. These statements can be identified by expressions of belief, expectation or intention, as well as those statements that are not historical fact. These statements often contain words such as should, could, expect, may, anticipate, forecast, believe, intend, estimates, plans and similar. These statements are based on certain factors and assumptions as set forth in this Quarterly Report on Form 10-Q, including with respect to: foreign exchange rates, expected growth, results of operations, performance, business prospects and opportunities, including the Proposed Transaction, and effective tax rates. While the company considers these factors and assumptions to be reasonable based on information currently available, they may prove to be incorrect. Forward-looking statements are subject to risks and uncertainties that are difficult to predict. The results or events set forth in forward-looking statements may differ materially from actual results or events. Several factors could cause our actual results or events to differ materially from those expressed in forward-looking statements including, but not limited to, the following: a number of risks and uncertainties relating to the Proposed Transaction, including the failure to satisfy all required conditions, including required regulatory approvals, or to satisfy or obtain waivers with respect to all other closing conditions in a timely manner and on favorable terms or at all; the occurrence of any event, change or other circumstances that could give rise to the termination of the Arrangement Agreement; certain costs that we may incur in connection with the Proposed Transaction; certain restrictions in the Arrangement Agreement on our ability to take action outside the ordinary course of business without the consent of Agrium; the effect of the pendency of the Proposed Transaction on our ability to retain customers, suppliers and personnel and on our operating future business and operations generally; risks related to diversion of management time from ongoing business operations due to the Proposed Transaction; failure to realize the anticipated benefits of the Proposed Transaction and to successfully integrate Agrium and PotashCorp; the risk that our credit ratings may be downgraded or there may be adverse conditions in the credit markets; any significant impairment of the carrying amount of certain of our assets; variations from our assumptions with respect to

foreign exchange rates, expected growth, results of operations, performance, business prospects and opportunities, and effective tax rates; fluctuations in supply and demand in the fertilizer, sulfur and petrochemical markets; changes in competitive pressures, including pricing pressures; risks and uncertainties related to any operating and workforce changes made in response to our industry and the markets we serve, including mine and inventory shutdowns; adverse or uncertain economic conditions and changes in credit and financial markets; economic and political uncertainty around the world; changes in capital markets; the results of sales contract negotiations within major markets; unexpected or adverse weather conditions; risks related to reputational loss; the occurrence of a major safety incident; inadequate insurance coverage for a significant liability; inability to obtain relevant permits for our operations; catastrophic events or malicious acts, including terrorism; certain complications that may arise in our mining process, including water inflows; risks and uncertainties related to our international operations and assets; our ownership of non-controlling equity interests in other companies; our prospects to reinvest capital in strategic opportunities and acquisitions; risks associated with natural gas and other hedging activities; security risks related to our information technology systems; imprecision in reserve estimates; costs and availability of transportation and distribution for our raw materials and products, including railcars and ocean freight; changes in, and the effects of, government policies and regulations; earnings and the decisions of taxing authorities which could affect our effective tax rates; increases in the price or reduced availability of the raw materials that we use; our ability to attract, develop, engage and retain skilled employees; strikes or other forms of work stoppage or slowdowns; rates of return on, and the risks associated with, our investments and capital expenditures; timing and impact of capital expenditures; the impact of further innovation; adverse developments in pending or future legal proceedings or government investigations; and violations of our governance and compliance policies. A discussion of these risks and uncertainties and additional risks and uncertainties can be found in our 2016 Form 10-K under the captions Forward-Looking Statements and Item 1A Risk

Factors, and in our filings with the US Securities and Exchange Commission and Canadian provincial securities commissions. As a result of these and other factors, there is no assurance that any of the events, circumstances or results anticipated by forward-looking statements included or incorporated by reference into this Quarterly Report on Form 10-Q will occur or, if they do, of what impact they will have on our business, our performance, the results of our operations and our financial condition. Forward-looking statements are given only as at the date of this report and the company disclaims any obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by law.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Market risk is the potential for loss from adverse changes in the market value of financial instruments. The level of market risk to which we are exposed varies depending on the composition of our derivative instrument portfolio, as well as current and expected market conditions. A discussion of enterprise-wide risk management can be found in our 2016 AIR, pages 48 to 55.

Price, foreign exchange and interest rate risks faced by the company and how we manage those risks are outlined in Notes 17 and 29 to the 2016 audited annual consolidated financial statements and there were no significant changes as at September 30, 2017.

PRICE RISK

The carrying amount of our investments in ICL and Sinofert was \$1,063 million at September 30, 2017 (December 31, 2016 \$937 million). A 10 percent increase in the prices of these investments would increase other comprehensive income by \$106 million, while a 10 percent decrease would reduce other comprehensive income by \$106 million. At September 30, 2017, this analysis assumed that price decreases would not represent an impairment.

There were no substantial changes to the price sensitivities related to our natural gas derivatives reported in Note 29 to the 2016 audited annual consolidated financial statements.

As at September 30, 2017, the company's net exposure to natural gas derivatives in the form of swaps was a notional amount of 31 million MMBtu (December 31, 2016 swaps was a notional amount of 46 million MMBtu) with maturities in 2017 through 2022.

FOREIGN EXCHANGE RISK

As at September 30, 2017, the company had entered into foreign currency forward contracts to sell US dollars and receive Canadian dollars in the notional amount of

\$25 million (December 31, 2016 \$21 million) at an average exchange rate of 1.2302 (December 31, 2016 1.3490) per US dollar with maturities in 2017. There were no substantial changes to the foreign exchange sensitivities reported in Note 29 to the 2016 audited annual consolidated financial statements.

INTEREST RATE RISK

As at September 30, 2017, the company had no significant exposure to interest rate risk.

Item 4. Controls and Procedures

As of September 30, 2017, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon that evaluation and as of September 30, 2017, the Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective to provide reasonable assurance that information required to be disclosed in the reports the company files and submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as and when required and that such information is accumulated and communicated to our management, including our Chief

Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

There has been no change in our internal control over financial reporting during the quarter ended September 30, 2017 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

49 PotashCorp 2017 Third Quarter Quarterly Report on Form 10-Q

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

For a description of certain legal and environmental proceedings, see Note 11 to the unaudited interim condensed consolidated financial statements included in Part I of this Quarterly Report on Form 10-Q.

Item 4. Other Information

MINE SAFETY DISCLOSURES

Safety is a fundamental core value and we are committed to providing a healthy and safe work environment for our employees, contractors and all others at our sites to help meet our company-wide goal of achieving no harm to people.

The operations at the company's Aurora, Weeping Water and White Springs facilities are subject to the *Federal Mine Safety and Health Act of 1977*, as amended by the

Mine Improvement and New Emergency Response Act of 2006, and the implementing regulations, which impose stringent health and safety standards on numerous aspects of mineral extraction and processing operations, including the training of personnel, operating procedures, operating equipment and other matters. Our senior management is responsible for managing compliance with applicable government regulations, as well as implementing and overseeing the elements of our safety program as outlined in our Safety, Health and Environment Manual.

Section 1503(a) of the *Dodd-Frank Wall Street Reform and Consumer Protection Act* (Section 1503(a)) requires us to include certain safety information in the periodic reports we file with the United States Securities and Exchange Commission. The information concerning mine safety violations and other regulatory matters required by Section 1503(a) and Item 104 of Regulation S-K is included in Exhibit 95 to this Quarterly Report on Form 10-Q.
