Net Proceeds to the Bank after Underwriting Commission and Before Expenses:	US\$748,125,000
Coupon:	For each Interest Period, the then-applicable Three-Month LIBOR rate for U.S. dollars, determined on the Interest Determination Date for that Interest Period, plus 0.460% (46 basis points). In no event will the interest on the Floating Rate Notes be less than zero.
Interest Payment Dates:	January 13, April 13, July 13 and October 13 of each year, beginning on July 13, 2018 (each, a Floating Rate Interest Payment Date). Interest will accrue from April 13, 2018.

Interest Reset Date:	Each Floating Rate Interest Payment Date.
Interest Period:	The period commencing on any Floating Rate Interest Payment Date (or, with respect to the initial Interest Period only, commencing on April 13, 2018) to, but excluding, the next succeeding Floating Rate Interest Payment Date, and in the case of the last such period, from and including the Floating Rate Interest Payment Date immediately preceding the Maturity Date to but not including such Maturity Date.

Day Count:	Actual/360.
Day Count Convention:	If any Floating Rate Interest Payment Date falls on a day that is not a business day for the Floating Rate Notes, the Bank will postpone the making of such interest payment to the next succeeding business day (and interest thereon will continue to accrue to but excluding such succeeding business day) unless the next succeeding business day is in the next succeeding calendar month, in which case such Floating Rate Interest Payment Date shall be the immediately preceding business day and interest shall accrue to but excluding such preceding business day. If the Maturity Date or a redemption date for the Floating Rate Notes would fall on a day that is not a business day, the payment of interest and principal will be made on the next succeeding business day, but no additional interest shall accrue and be paid unless the Bank fails to make payment on such next succeeding business day.
Calculation Agent:	BMO Capital Markets Corp. For each Interest Period, the Calculation Agent will calculate the amount of accrued interest by multiplying the principal amount of the Floating Rate Note by an accrued interest factor for the Interest Period. This factor will equal the sum of the interest factors calculated for each day during the Interest Period. The interest factor for each day will be expressed as a decimal and will be calculated by dividing the interest rate, also expressed as a decimal, applicable to that day by 360.

Under Rule 15c6-1 of the Securities Exchange Act of 1934, as amended (the Exchange Act), trades in the secondary market generally are required to settle in two business days, unless the parties to any such trade expressly agree otherwise. Accordingly, purchasers who wish to trade their Fixed Rate Notes or Floating Rate Notes (collectively, the Notes) more than two business days prior to the settlement date will be required, by virtue of the fact that the Notes initially will settle in three business days (T+3), to specify an alternate settlement cycle at the time of any such trade to prevent a failed settlement.

Because Desjardins Securities Inc. is not registered with the U.S. Securities and Exchange Commission (the SEC) as a U.S. registered broker-dealer, it will effect offers and sales of the Notes solely outside of the United States or within the United States to the extent permitted by Rules 15a-6 under the Exchange Act through one or more U.S. registered broker-dealers and as permitted by the rules and regulations of the Financial Industry Regulatory Authority Inc.
