FOR IMMEDIATE RELEASE

LG Display Reports Fourth Quarter 2018 Results

SEOUL, Korea (Jan. 30, 2019) LG Display today reported unaudited earnings results based on consolidated K-IFRS (International Financial Reporting Standards) for the three-month period ending December 31, 2018.

Revenues in the fourth quarter of 2018 increased by 14% to KRW 6,948 billion from KRW 6,103 billion in the third quarter of 2018 and decreased by 3% from KRW 7,126 billion in the fourth quarter of 2017.

Operating profit in the fourth quarter of 2018 recorded KRW 279 billion. This compares with the operating profit of KRW 140 billion in the third quarter of 2018 and the operating profit of KRW 45 billion in the fourth quarter of 2017.

EBITDA in the fourth quarter of 2018 was KRW 1,134 billion, compared with EBITDA of KRW 1,020 billion in the third quarter of 2018 and with EBITDA of KRW 930 billion in the fourth quarter of 2017.

Net income in the fourth quarter of 2018 was KRW 152 billion, compared with the net income of KRW 18 billion in the third quarter of 2018 and with the net income of KRW 44 billion in the fourth quarter of 2017. LG Display recorded KRW 24,337 billion in annual revenues and KRW 92.9 billion in annual operating profit in 2018.

LG Display maintained its annual operating profit in 2018 thanks to expanding differentiated products such as OLED TV panels and high-end products including large-size and high-resolution panels, even though global competition is getting fiercer and panel prices have been showing decreasing trends.

It is especially notable that large-size OLED panels turned to profit in the latter half of 2018, five years after launching the products, driven by acquiring stable yield rates and productivity as well as expanding the customer base. Annual shipments of large-size OLED TV panels in 2018 increased to 2.9 million units, and the percentage of the annual revenues of large-size OLED TV panels increased to 20% of the total TV revenues.

LG Display registered KRW 6,948 billion in revenues in the fourth quarter of 2018, a quarter-on-quarter increase of 14%, thanks to increased shipments lead by the year-end seasonality. The company recorded KRW 279 billion in operating profit in the fourth quarter, an increase of 99% quarter-on-quarter and 528% year-on-year respectively despite the decreasing prices of large-size panels. This performance was driven by the company's constant focus on high-value-added products and by expanded shipments of new products in IT and small and medium-size panel segments, which have a higher average selling price per square meter.

Panels for TVs accounted for 36% of the revenue in the fourth quarter of 2018, mobile devices for 28%, tablets and notebook PCs for 22%, and desktop monitors for 14%.

LG Display recorded 123% in the liability-to-equity ratio, 88% in the current ratio, and 41% in the net debt-to-equity ratio as of December 31, 2018. The slightly increased ratios of liability-to-equity and net debt-to-equity compared with the previous quarter were mainly due to the company's mid- to long-term investment into its shift towards a more OLED-focused business structure.

Panel area shipments in the first quarter of 2019 are expected to decrease by a high-single-digit percentage due to reduced panel demand stemming from low seasonality, said Heeyeon Kim, Head of Investor Relations Division and Vice President of LG Display. Average selling price per square meter in the first quarter is anticipated to decline by a mid- to high-single-digit percentage due to the downward trends in panel prices, she added.

We will speed up our shift to an OLED-focused business structure and will maximize efficiency in all business areas in order to solidify our financial strengths, said Dong-hee Suh, the newly appointed CFO and Senior Vice President of LG Display. We will complete our preemptive investment to prepare for the future within this year. By doing this, we are committed to leading the display market with OLED technology and generating stable profits, he added.

###

Earnings Conference Call

LG Display will hold a bilingual conference call in English and Korean on January 30, 2019 starting at 10:00 a.m. Korea Standard Time to announce the fourth quarter of 2019 earnings results. About LG Display

LG Display Co., Ltd. [NYSE: LPL, KRX: 034220] is the world's leading innovator of display technologies, including thin-film transistor liquid crystal (TFT-LCD) and OLED displays, as well as the global pioneer in OLED lighting. The company manufactures display panels in a broad range of sizes and specifications primarily for use in TVs, notebook computers, desktop monitors, and various other applications, including tablets and mobile devices. It also produces a wide range of OLED light panels for the automotive and interior design sectors. LG Display currently operates manufacturing facilities in Korea and China, and back-end assembly facilities in Korea, China, Poland, and Vietnam. The company has approximately 54,000 employees operating worldwide. For more news and information about LG Display, please visit www.lgdisplay.com.
