MuniYield New Jersey Fund, Inc.

The Benefits and Risks of Leveraging

MuniYield New Jersey Fund, Inc. utilizes leveraging to seek to enhance the yield and net asset value of its Common Stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Fund issues Preferred Stock, which pays dividends at prevailing short-term interest rates, and invests the proceeds in long-term municipal bonds. The interest earned on these investments, net of dividends to Preferred Stock, is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's Common Stock capitalization of \$100 million and the issuance of Preferred Stock for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays dividends on the \$50 million of Preferred Stock based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates. Of course, increases in short-term interest rates would reduce (and even eliminate) the dividends on the Common Stock.

In this case, the dividends paid to Preferred Stock shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Stock will be reduced or eliminated completely. At the same time, the market value of the fund's Common Stock (that is, its price as listed on the New York Stock Exchange) may, as a result, decline. Furthermore, if long-term interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the fund's Preferred Stock does not fluctuate. In addition to the decline in net asset value, the market value of the fund's Common Stock may also decline.

As a part of its investment strategy, the Fund may invest in certain securities whose potential income return is inversely related to changes in a floating interest rate ("inverse floaters"). In general, income on inverse floaters will decrease when short-term interest rates increase and increase when short-term interest rates decrease. Investments in inverse floaters may be characterized as derivative securities and may subject the Fund to the risks of reduced or eliminated interest payments and losses of invested principal. In addition, inverse floaters have the effect of providing investment leverage and, as a result, the market value of such securities will generally be more volatile than that of fixed-rate, tax-exempt securities. To the extent the Fund invests in inverse floaters, the market value of the Fund's portfolio and the net asset value of the Fund's shares may also be more volatile than if the Fund did not invest in these securities. As of May 31, 2004, the percentage of the Fund's total net assets invested in inverse floaters was 12.26% before the deduction of Preferred Stock.

### Swap Agreements

The Fund may also invest in swap agreements, which are over-the-counter contracts in which one party agrees to make periodic payments based on the change in market value of a specified bond, basket of bonds, or index in return for periodic payments based on a fixed or variable interest rate or the change in market value of a different bond, basket of bonds or index. Swap agreements may be used to obtain exposure to a bond or market without owning or taking physical custody of securities. Swap agreements involve the risk that the party with whom the Fund has entered into the swap will default on its obligation to pay the Fund and the risk that the Fund will not be able to meet its obligations to pay the other party to the agreement.

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

Dear Shareholder

For the six-month and 12-month periods ended May 31, 2004, the Lehman Brothers Municipal Bond Index posted respective returns of -.22% and -.03%. Its taxable counterpart, the Lehman Brothers Aggregate Bond Index, returned +.60% for the six-month period and -.44% for the 12-month period ended May 31, 2004. Amid considerable month-to-month volatility, tax-exempt bond yields rose over the past year, generally mimicking the movement of U.S. Treasury yields. Given their tax-exempt status, however, municipal bonds continued to be an attractive fixed income investment alternative.

By May month-end, the Federal Reserve Board appeared poised to raise the Federal Funds target rate from its 45-year low of 1%. This anticipated shift in monetary policy was largely prompted by better-than-expected employment reports for the months of March, April and May, as well as by rising producer prices. The good news on the employment front -- previously a dim spot in an otherwise bright economic picture -- helped cause the yield on the 10-year Treasury bond to spike 75 basis points (.75%), from 3.91% on April 1 to 4.66% on May 28.

Equity markets, in the meantime, gleaned support from the improving economic environment and provided attractive returns. Although we did experience a market correction toward the end of the period, for the six months and 12 months ended May 31, 2004, the Standard & Poor's 500 Index returned +6.79% and +18.33%, respectively. Significant fiscal and monetary stimulus in 2003, including low interest rates and tax cuts, opened the door to consumer spending, capital spending, increases in exports and long-awaited job growth. As expected, these developments led the way to improvements in corporate earnings -- a positive for stock markets.

The events and efforts of the past year leave us with a much stronger economy today. Of course, markets will always fluctuate, and there are many uncertainties -- including the possibility of geopolitical events -- that can translate into negative market movements. Keeping this in mind, however, we encourage you to revisit your portfolio and your asset allocation strategy to ensure you are well positioned to take advantage of the opportunities that lie ahead. Importantly, your financial advisor can help you develop a strategy most suitable for your circumstances through all types of market and economic cycles.

We thank you for trusting Merrill Lynch Investment Managers with your investment assets, and we look forward to serving you in the months and years ahead.

Sincerely,

/s/ Terry K. Glenn

A Discussion With Your Fund's Portfolio Manager

We maintained a defensive market posture throughout the period, but moderated that stance at period-end as interest rates inched higher.

Describe the recent market environment relative to municipal bonds.

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

Long-term bond yields rose over the past six months, as bond prices -- which move opposite yields -- declined. For much of the period, bond prices actually moved higher (yields declined) as it appeared the Federal Reserve Board, without evidence of meaningful employment growth, was content to maintain short-term interest rates at historic lows. In early April, however, a surprisingly strong monthly jobs report triggered fears that the long-accommodative Federal Reserve Board might raise interest rates sooner than many had expected. As a result, bond yields rose (prices fell) for the remainder of the period. At the end of May, long-term U.S. Treasury bond yields had climbed to 5.35%, representing an increase of more than 20 basis points (.20%) over the past six months. Yields on ten-year Treasury issues stood at 4.65% as of period-end, an increase of more than 20 basis points.

Tax-exempt bond yields generally mimicked the movement of their taxable counterparts. Long-term revenue bond yields, as measured by the Bond Buyer Revenue Bond Index, rose approximately 25 basis points over the past six months. For the same period, yields on AAA-rated issues maturing in 30 years rose approximately 25 basis points to 4.99% while yields on 10-year, AAA-rated issues increased more than 35 basis points to nearly 3.95%, according to Municipal Market Data. The slightly larger increase in 10-year bond yields may be attributed to the fact that recent issuance has been heavily concentrated in the 10-year - 20-year range. The resulting supply imbalance prompted higher intermediate bond yields (and lower prices). Longer-maturity and lower-rated issues continued to benefit from more favorable supply/demand factors and, therefore, have seen less price depreciation. Overall, municipal bond supply increased approximately 5% compared to the same six-month period a year ago, with the pace of underwriting accelerating in the last three months of the period.

Overall, demand for tax-exempt municipal bonds has remained positive. Federal Reserve Board statistics showed that U.S. household holdings of municipal securities increased by more than \$25 billion during the fourth quarter of 2003 to approximately \$680 billion.

Describe conditions in the State of New Jersey.

At period-end, New Jersey had credit ratings of AA from Standard & Poor's, Aa2 from Moody's and AA from Fitch. In early March, however, Moody's placed the state's credit rating under review for a possible downgrade.

Following two years of tax-revenue shortfalls, New Jersey's projected revenues for the fiscal year ended June 30, 2004, were more optimistic than forecasted, thanks primarily to better-than-expected income tax and sales tax receipts -- both signs of economic improvement. Underscoring the economy's recovery was a substantial decline in the state's unemployment rate. At 5.4% in February 2004, the state unemployment rate was below the national average of 5.6% and down from 6% the prior year.

The 2005 state budget, despite a modest general fund surplus, relies on the use of a number of one-time revenues. These include an expected \$1.5 billion in bonds backed by cigarette tax revenues and revenues from a proposed vehicle surcharge for "unsafe driving." Measured as a percentage of general fund revenues, New Jersey's projected 2005 budget deficit is one of the nation's largest. For the third straight year, the budget does not propose any increases in state income tax or sales tax rates. However, the state authorized higher corporate taxes, effective beginning in 2003, and a hotel occupancy tax that takes effect this year. The 2005 budget also proposes an increase in state cigarette taxes, already the highest in the United States, and raising \$199 million from various surcharges on pollution-related products and services. New Jersey recently authorized a significant amount of new debt issuance, including \$6.2 billion in school construction bonds and \$650 million annually for

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

transportation trust bonds.

How did the Fund perform during the period in light of the existing market conditions?

For the six-month period ended May 31, 2004, the Common Stock of MuniYield New Jersey Fund, Inc. had net annualized yields of 6.52% and 7.03%, based on a period-end per share net asset value of \$14.68 and a per share market price of \$13.62, respectively, and \$.480 per share income dividends. Over the same period, the total investment return on the Fund's Common Stock was -1.44%, based on a

4 MUNIYIELD NEW JERSEY FUND, INC. MAY 31, 2004

change in per share net asset value from \$15.39 to \$14.68, and assuming reinvestment of \$.480 per share ordinary income dividends.

For the six-month period ended May 31, 2004, the Fund's Auction Market Preferred Stock (AMPS) had an average yield of .88% for Series A and .88% for Series B.

The Fund's total return for the period, based on net asset value, modestly lagged the -1.25% average return of the Lipper category of New Jersey Municipal Debt Funds. (Funds in this Lipper category invest in securities exempt from taxation in New Jersey or a city in New Jersey.) The Fund's relative underperformance is primarily attributed to two factors. First was the portfolio's defensive positioning. Given our concerns about the market environment -- specifically, the negative price impact associated with rising interest rates -- we sought to shorten the Fund's duration relative to our peers in order to limit the Fund's sensitivity to interest rate moves. Persistent market strength through the first half of the period, characterized by relatively low rates, caused the lag in performance. However, as market conditions deteriorated during the remainder of the period, our defensive positioning helped enhance the Fund's returns. Second, unlike many of its Lipper peers, the Fund is precluded from investing in speculative grade bonds, reflecting the lower risk tolerance of an investment grade portfolio. These issues were among the market's best performers during the period.

For a description of the Fund's total investment return based on a change in the per share market value of the Fund's Common Stock (as measured by the trading price of the Fund's shares on the New York Stock Exchange), and assuming reinvestment of dividends, please refer to the Financial Highlights section included in this report. As a closed-end fund, the Fund's shares may trade in the secondary market at a premium or discount to the Fund's net asset value. As a result, total investment returns based on changes in the market value of the Fund's Common Stock can vary significantly from total investment returns based on changes in the Fund's net asset value.

What changes were made to the portfolio during the period?

Portfolio activity during the period was restricted in large part by the significant decline in New Jersey tax-exempt issuance. Over the past six months, approximately \$5.5 billion in bonds were issued by New Jersey municipalities, representing a decline of about 25% compared to the same period a year ago.

Cash reserves were kept at minimal levels throughout the period while sector concentrations continued to reflect above-market weightings in education and health care issues. In addition, our constructive outlook for credit spreads prompted an above-market concentration at the lower end of the investment grade spectrum, where we found what we believed to be a compelling balance of risk and reward. Nevertheless, the Fund continued to be disadvantaged by the conservative

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

investment parameters typical of investment grade portfolios, as speculative grade and non-rated credits remained one of the municipal bond market's top-performing sectors.

The Fund's borrowing costs remained below 1% through-out most of the period. These attractive funding levels, in combination with a steep yield curve, continued to generate significant income to the Fund's Common Stock shareholders. Currently, the Federal Reserve Board appears poised to begin raising short-term interest rates. The increase, however, is expected to be gradual and should not have a material impact on the positive advantage leverage has had on the Fund's Common Stock yield. However, should the spread between short-term and long-term interest rates narrow, the benefits of leveraging will decline and, as a result, reduce the yield on the Fund's Common Stock. At the end of the period, the Fund's leverage amount, due to AMPS, was 31.86% of total net assets. (For a more complete explanation of the benefits and risks of leveraging, see page 2 of this report to shareholders.)

How would you characterize the Fund's position at the close of the period?

Late in the period, as interest rates rose modestly, we elected to moderate the portfolio's defensive stance to achieve a more neutral market position. At the same time, the Fund remained fully invested in order to enhance investment income.

Amid ongoing geopolitical and economic uncertainty, we expect that the markets will be subjected to bouts of significant volatility in the months ahead. Under these circumstances, we believe a more conservative investment strategy is appropriate until a clearer picture emerges on both fronts.

Theodore R. Jaeckel Jr.

14 MUNIYIELD NEW JERSEY FUND, INC.

MAY 31, 2004

Notes to Financial Statements

1. Significant Accounting Policies:

MuniYield New Jersey Fund, Inc. (the "Fund") is registered under the Investment Company Act of 1940, as amended, as a non-diversified, closed-end management investment company. The Fund's financial statements are prepared in conformity with U.S. generally accepted accounting principles, which may require the use of management accruals and estimates. Actual results may differ from these estimates. These unaudited financial statements reflect all adjustments, which are, in the opinion of management, necessary to a fair statement of the results for the interim period presented. All such adjustments are of a normal, recurring nature. The Fund determines and makes available for publication the net asset value of its Common Stock on a daily basis. The Fund's Common Stock is listed on the New York Stock Exchange under the symbol MYJ. The following is a summary of significant accounting policies followed by the Fund.

(a) Valuation of investments -- Municipal bonds are traded primarily in the over-the-counter markets and are valued at the last available bid price in the over-the-counter market or on the basis of yield equivalents as obtained by the Fund's pricing service from one or more dealers that make markets in the securities. Financial futures contracts and options thereon, which are traded on

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

exchanges, are valued at their closing prices as of the close of such exchanges. Options written or purchased are valued at the last sale price in the case of exchange-traded options. In the case of options traded in the over-the-counter market, valuation is the last asked price (options written) or the last bid price (options purchased). Swap agreements are valued by quoted fair values received daily by the Fund from the counterparty. Short-term investments with a remaining maturity of sixty days or less are valued at amortized cost, which approximates market value. Securities and assets for which market quotations are not readily available are valued at fair value as determined in good faith by or under the direction of the Board of Directors of the Fund, including valuations furnished by a pricing service retained by the Fund, which may utilize a matrix system for valuations. The procedures of the pricing service and its valuations are reviewed by the officers of the Fund under the general supervision of the Board of Directors.

(b) Derivative financial instruments -- The Fund may engage in various portfolio investment strategies both to increase the return of the Fund and to hedge, or protect, its exposure to interest rate movements and movements in the securities markets. Losses may arise due to changes in the value of the contract or if the counterparty does not perform under the contract.

- o Financial futures contracts -- The Fund may purchase or sell financial futures contracts and options on such futures contracts. Futures contracts are contracts for delayed delivery of securities at a specific future date and at a specific price or yield. Upon entering into a contract, the Fund deposits and maintains as collateral such initial margin as required by the exchange on which the transaction is effected. Pursuant to the contract, the Fund agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in value of the contract. Such receipts or payments are known as variation margin and are recorded by the Fund as unrealized gains or losses. When the contract is closed, the Fund records a realized gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.
- o Options -- The Fund may write covered call options and purchase put options. When the Fund writes an option, an amount equal to the premium received by the Fund is reflected as an asset and an equivalent liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written. When a security is purchased or sold through an exercise of an option, the related premium paid (or received) is added to (or deducted from) the basis of the security acquired or deducted from (or added to) the proceeds of the security sold. When an option expires (or the Fund enters into a closing transaction), the Fund realizes a gain or loss on the option to the extent of the premiums received or paid (or gain or loss to the extent the cost of the closing transaction exceeds the premium paid or received).

Written and purchased options are non-income producing investments.

MUNIYIELD NEW JERSEY FUND, INC.

MAY 31, 2004

15

[LOGO] Merrill Lynch Investment Managers

Notes to Financial Statements (continued)

- o Forward interest rate swaps -- The Fund may enter into forward interest rate swaps. In a forward interest rate swap, the Fund and the counterparty agree to make periodic net payments on a specified notional contract amount, commencing on a specified future effective date, unless terminated

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

earlier. When the agreement is closed, the Fund records a realized gain or loss in an amount equal to the value of the agreement.

(c) Income taxes -- It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to its shareholders. Therefore, no Federal income tax provision is required.

(d) Security transactions and investment income -- Security transactions are recorded on the dates the transactions are entered into (the trade dates). Realized gains and losses on security transactions are determined on the identified cost basis. Dividend income is recorded on the ex-dividend date. Interest income is recognized on the accrual basis. The Fund amortizes all premiums and discounts on debt securities.

(e) Dividends and distributions -- Dividends from net investment income are declared and paid monthly. Distributions of capital gains are recorded on the ex-dividend dates.

### 2. Investment Advisory Agreement and Transactions with Affiliates:

The Fund has entered into an Investment Advisory Agreement with Fund Asset Management, L.P. ("FAM"). The general partner of FAM is Princeton Services, Inc. ("PSI"), an indirect, wholly-owned subsidiary of Merrill Lynch & Co., Inc. ("ML & Co."), which is the limited partner.

FAM is responsible for the management of the Fund's portfolio and provides the necessary personnel, facilities, equipment and certain other services necessary to the operations of the Fund. For such services, the Fund pays a monthly fee at an annual rate of .50% of the Fund's average weekly net assets, including proceeds from the issuance of Preferred Stock. For the six months ended May 31, 2004, FAM reimbursed the Fund in the amount of \$11,046.

For the six months ended May 31, 2004, the Fund reimbursed FAM \$3,271 for certain accounting services.

Certain officers and/or directors of the Fund are officers and/or directors of FAM, PSI, and/or ML & Co.

### 3. Investments:

Purchases and sales of investments, excluding short-term securities, for the six months ended May 31, 2004 were \$32,292,781 and \$14,354,610, respectively.

Net realized gains (losses) for the six months ended May 31, 2004 and net unrealized appreciation/depreciation as of May 31, 2004 were as follows:

	Realized Gains (Losses)	Unrealized Appreciation/ Depreciation
Long-term investments .....	\$ 631,599	\$ 11,041,968
Forward interest rate swaps .....	(834,066)	(98,661)
Total .....	\$ (202,467)	\$ 10,943,307
	=====	=====

As of May 31, 2004, net unrealized appreciation for Federal income tax purposes aggregated \$11,309,428, of which \$12,716,295 related to appreciated securities and \$1,406,867 related to depreciated securities. The aggregate cost of investments at May 31, 2004 for Federal income tax purposes was \$302,957,886.

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

### 4. Stock Transactions:

The Fund is authorized to issue 200,000,000 shares of stock, including Preferred Stock, par value \$.10 per share, all of which were initially classified as Common Stock. The Board of Directors is authorized, however, to reclassify any unissued shares of stock without approval of holders of Common Stock.

16                      MUNIYIELD NEW JERSEY FUND, INC.                      MAY 31, 2004

### Notes to Financial Statements (concluded)

#### Preferred Stock

Auction Market Preferred Stock are redeemable shares of Preferred Stock of the Fund, with a par value of \$.05 per share and a liquidation preference of \$25,000 per share plus accrued and unpaid dividends that entitle their holders to receive cash dividends at an annual rate that may vary for the successive dividend periods. The yields in effect at May 31, 2004 were as follows: Series A, .90% and Series B, .95%.

The Fund pays commissions to certain broker-dealers at the end of each auction at an annual rate ranging from .25% to .375%, calculated on the proceeds of each auction. For the six months ended May 31, 2004, Merrill Lynch, Pierce, Fenner & Smith Incorporated, an affiliate of FAM, earned \$58,420 as commissions.

### 5. Capital Loss Carryforward:

On November 30, 2003, the Fund had a net capital loss carryforward of \$7,948,348, of which \$1,092,188 expires in 2007 and \$6,856,160 expires in 2008. This amount will be available to offset like amounts of any future taxable gains.

### 6. Subsequent Event:

The Fund paid a tax-exempt income dividend to holders of Common Stock in the amount of \$.080000 per share on June 29, 2004 to shareholders of record on June 14, 2004.

#### Proxy Results

During the six-month period ended May 31, 2004, MuniYield New Jersey Fund, Inc.'s Common Stock shareholders voted on the following proposal. The proposal was approved at a shareholders' meeting on April 27, 2004. A description of the proposal and number of shares voted are as follows:

		Shares Voted For	Shares From
1. To elect the Fund's Directors:	James H. Bodurtha	13,337,121	459

### Quality Profile

The quality ratings of securities in the Fund as of May 31, 2004 were as follows:

S&P Rating/Moody's Rating	Percent of Total Investments
AAA/Aaa .....	67.9%
AA/Aa .....	5.5
A/A .....	8.8
BBB/Baa .....	15.6
BB/Ba .....	0.8
NR (Not Rated) .....	1.4

### Dividend Policy

The Fund's dividend policy is to distribute all or a portion of its net investment income to its shareholders on a monthly basis. In order to provide shareholders with a more stable level of dividend distributions, the Fund may at times pay out less than the entire amount of net investment income earned in any particular month and may at times in any month pay out such accumulated but undistributed income in addition to net investment income earned in that month. As a result, the dividends paid by the Fund for any particular month may be more or less than the amount of net investment income earned by the Fund during such month. The Fund's current accumulated but undistributed net investment income, if any, is disclosed in the Statement of Net Assets, which comprises part of the financial information included in this report.

MuniYield New Jersey Fund, Inc. seeks to provide shareholders with as high a level of current income exempt from Federal and New Jersey income taxes as is

## Edgar Filing: MUNIYIELD NEW JERSEY FUND INC - Form N-CSRS

consistent with its investment policies and prudent investment management by investing primarily in a portfolio of long-term, investment grade municipal obligations the interest on which, in the opinion of bond counsel to the issuer, is exempt from Federal income tax and New Jersey personal income taxes.

This report, including the financial information herein, is transmitted to shareholders of MuniYield New Jersey Fund, Inc. for their information. It is not a prospectus. Past performance results shown in this report should not be considered a representation of future performance. The Fund has leveraged its Common Stock and intends to remain leveraged by issuing Preferred Stock to provide the Common Stock shareholders with a potentially higher rate of return. Leverage creates risks for Common Stock shareholders, including the likelihood of greater volatility of net asset value and market price of shares of the Common Stock, and the risk that fluctuations in the short-term dividend rates of the Preferred Stock may affect the yield to Common Stock shareholders. Statements and other information herein are as dated and are subject to change.

A description of the policies and procedures that the Fund uses to determine how to vote proxies relating to portfolio securities is available (1) without charge, upon request, by calling toll-free 1-800-MER-FUND (1-800-637-3863); (2) at [www.mutualfunds.ml.com](http://www.mutualfunds.ml.com); and (3) on the Securities and Exchange Commission's Web site at <http://www.sec.gov>.
