I. GENERAL INFORMATION

Tenaris S.A. (the "Company") was established as a public limited liability company (Société Anonyme) under the laws of the Grand-Duchy of Luxembourg on December 17, 2001. The Company holds, either directly or indirectly, controlling interests in various subsidiaries in the steel pipe manufacturing and distribution businesses. References in these Consolidated Financial Statements to "Tenaris" refer to Tenaris S.A. and its consolidated subsidiaries. A list of the principal Company's subsidiaries is included in Note 30 to these Consolidated Financial Statements.

The Company's shares trade on the Buenos Aires Stock Exchange, the Italian Stock Exchange and the Mexican Stock Exchange; the Company's American Depositary Securities ("ADS") trade on the New York Stock Exchange.

These Consolidated Financial Statements were approved for issuance by the Company's board of directors on February 20, 2014.

II. ACCOUNTING POLICIES

The principal accounting policies applied in the preparation of these Consolidated Financial Statements are set out below. These policies have been consistently applied to all the years presented, unless otherwise stated.

A Basis of presentation

The Consolidated Financial Statements of Tenaris have been prepared in accordance with International Financial Reporting Standards ("IFRS"), as issued by the International Accounting Standards Board ("IASB") and adopted by the European Union, under the historical cost convention, as modified by the revaluation of available for sale financial assets and financial assets and liabilities (including derivative instruments) at fair value through profit or loss. The Consolidated Financial Statements are, unless otherwise noted, presented in thousands of U.S. dollars ("\$").

Whenever necessary, certain comparative amounts have been reclassified to conform to changes in presentation in the current year.

As further described below, as from January 1, 2013, the Company adopted IAS 19 (amended 2011). The effect of these changes in the recognition and measurement of pension obligations and other post-employment obligations was \$60.7 million (\$77.0 million in other long term liabilities net of a deferred income tax of \$22.3 million and \$6.0 million related to the adoption of IAS 19 in associated companies) and \$50.2 million (\$63.6 million in other long term liabilities net of a deferred income tax of \$18.6 million and \$5.2 million related to the adoption of IAS 19 in associated companies) for 2012 and 2011, respectively. As of December 31, 2010, the effect of these changes was a decrease of total equity of \$30.6 million (\$36.1 million in other long term liabilities net of a deferred income tax of \$10.9 million and \$5.4 million related to the adoption of IAS 19 in associated companies).

The preparation of Consolidated Financial Statements in conformity with IFRS requires management to make certain accounting estimates and assumptions that might affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the reporting dates, and the reported amounts of revenues and expenses during the reporting years. Actual results may differ from these estimates.

(1) New and amended standards effective in 2013 and relevant for Tenaris
IAS 1, "Financial statement presentation"

In June 2011, the IASB issued IAS 1 (amended 2011), "Financial statement presentation". The amendment requires entities to separate items presented in Other comprehensive income into two groups, based on whether or not they may be recycled to profit or loss in the future. See impact of the application in the Consolidated Statement of Other Comprehensive Income.

A Basis of presentation (Cont.)

(1) New and amended standards effective in 2013 and relevant for Tenaris(Cont.)

IAS 19 (amended 2011), “Employee benefits”

In June 2011, the IASB issued IAS 19 (amended 2011), “Employee benefits”, which makes significant changes to the recognition and measurement of defined benefit pension expense and termination benefits and to the disclosures for all employee benefits. IAS 19 (amended 2011) was applied retrospectively, as indicated in the transitional provisions of such IFRS. These changes are related to recognizing in other comprehensive income of the period in which they arise the actuarial gains and losses arising from past experience adjustments and changes in actuarial assumptions. Past-service costs are recognized immediately in the income statement.

IFRS 10, “Consolidated financial statements”, IFRS 11, “Joint arrangements” and IFRS 12, “Disclosure of interests in other entities”.

The application of these standards did not materially affect the Company’s financial condition or results of operations. Until December 31, 2012, Tenaris’ investment in Exiros B.V.(“Exiros”) was presented as an investment in associated companies. Starting on January 1, 2013, and in connection with an amendment in the shareholders’ agreement, the Company applied the provisions of IFRS 11 and began to recognize Exiros’s assets, liabilities, revenue and expenses in relation to its interest in the joint operation.

IFRS 13, “Fair value measurement”

In May 2011, the IASB issued IFRS 13, “Fair value measurement”. This standard explains how to measure fair value and aims to enhance fair value disclosures. See section IIIC and D.

B Group accounting

(1) Subsidiaries and transactions with non-controlling interests

Subsidiaries are all entities over which Tenaris has control. Tenaris controls an entity when it is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power over the entity. Subsidiaries are fully consolidated from the date on which control is exercised by the Company and are no longer consolidated from the date control ceases.

The purchase method of accounting is used to account for the acquisition of subsidiaries by Tenaris. The cost of an acquisition is measured as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange. Acquisition-related costs are expensed as incurred. Identifiable assets acquired, liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date. Any non-controlling interest in the acquiree is measured either at fair value or at the non-controlling interest’s proportionate share of the acquiree’s net assets. The excess of the aggregate of the consideration transferred and the amount of any non-controlling interest in the acquiree over the fair value of the identifiable net assets acquired is recorded as goodwill. If this is less than the fair value of the net assets of the subsidiary acquired, the difference is recognized directly in the Consolidated Income Statement.

Transactions with non-controlling interests that do not result in a loss of control are accounted as transactions with equity owners of the Company. For purchases from non-controlling interests, the difference between any

consideration paid and the relevant share acquired of the carrying value of net assets of the subsidiary is recorded in equity. Gains or losses on disposals to non-controlling interests are also recorded in equity.

Material inter-company transactions, balances and unrealized gains (losses) on transactions between Tenaris subsidiaries have been eliminated in consolidation. However, since the functional currency of some subsidiaries is its respective local currency, some financial gains (losses) arising from inter-company transactions are generated. These are included in the Consolidated Income Statement under Other financial results.

B Group accounting (Cont.)

(2) Associates

Associates are all entities in which Tenaris has significant influence but not control, generally accompanying a shareholding of between 20% and 50% of the voting rights. Investments in associates are accounted for by the equity method of accounting and are initially recognized at cost. The Company's investment in associates includes goodwill identified in acquisition, net of any accumulated impairment loss.

Unrealized results on transactions between Tenaris and its associated companies are eliminated to the extent of Tenaris's interest in the associated companies. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment indicator of the asset transferred. Financial statements of associated companies have been adjusted where necessary to ensure consistency with IFRS.

The Company's pro-rata share of earnings in associates is recorded in the Consolidated Income Statement under Equity in earnings of associated companies. The Company's pro-rata share of changes in other reserves is recognized in the Consolidated Statement of Changes in Equity under Other Reserves.

At December 31, 2013, Tenaris holds 11.46% of Ternium's common stock. The following factors and circumstances evidence that Tenaris has significant influence (as defined by IAS 28, "Investments in Associates") over Ternium, and as a result the Company's investment in Ternium has been accounted for under the equity method:

- § Both the Company and Ternium are under the indirect common control of San Faustin S.A.;
- § Four out of the nine members of Ternium's board of directors (including Ternium's chairman) are also members of the Company's board of directors;
- § Under the shareholders agreement by and between the Company and Techint Holdings S.à r.l, a wholly owned subsidiary of San Faustin S.A. and Ternium's main shareholder, dated January 9, 2006, Techint Holdings S.à r.l, is required to take actions within its power to cause (a) one of the members of Ternium's board of directors to be nominated by the Company and (b) any director nominated by the Company to be only removed from Ternium's board of directors pursuant to previous written instructions of the Company.

The Company's investment in Ternium is carried at incorporation cost plus proportional ownership of Ternium's earnings and other shareholders' equity accounts. Because the exchange of its holdings in Amazonia and Ylopa for shares in Ternium was considered to be a transaction between companies under common control of San Faustin S.A. (formerly San Faustin N.V.), Tenaris recorded its initial ownership interest in Ternium at \$229.7 million, the carrying value of the investments exchanged. This value was \$22.6 million less than Tenaris's proportional ownership of Ternium's shareholders' equity at the transaction date. As a result of this treatment, Tenaris's investment in Ternium will not reflect its proportional ownership of Ternium's net equity position. Ternium carried out an initial public offering ("IPO") of its shares on February 1, 2006, listing its ADS on the New York Stock Exchange.

At December 31, 2013, Tenaris holds through its Brazilian subsidiary Confab Industrial S.A. ("Confab"), 5.0% of the shares with voting rights and 2.5% of Usiminas's total share capital. For the factors and circumstances that evidence that Tenaris has significant influence over Usiminas to account it for under the equity method (as defined by IAS 28, "Investments in Associates"), see Note 27.

Tenaris reviews investments in associated companies for impairment whenever events or changes in circumstances indicate that the asset's carrying amount may not be recoverable, such as a significant or prolonged decline in fair value below the carrying value.

Tenaris carries its investment in Ternium at its proportional equity value, with no additional goodwill or intangible assets recognized. At December 31, 2013, 2012 and 2011, no impairment provisions were recorded on Tenaris' investment in Ternium.

Tenaris carries its investment in Usiminas at its proportional equity value, plus goodwill and intangible assets recognized. At December 31, 2013 no impairment provision was recorded. At December 31, 2012, an impairment charge was recorded on Tenaris' investment in Usiminas. See Note 27.

C Segment information

The Company is organized in one major business segment, Tubes, which is also the reportable operating segment.

The Tubes segment includes the production and sale of both seamless and welded steel tubular products and related services mainly for the oil and gas industry, particularly oil country tubular goods (OCTG) used in drilling operations, and for other industrial applications with production processes that consist in the transformation of steel into tubular products. Business activities included in this segment are mainly dependent on the oil and gas industry worldwide, as this industry is a major consumer of steel pipe products, particularly OCTG used in drilling activities. Demand for steel pipe products from the oil and gas industry has historically been volatile and depends primarily upon the number of oil and natural gas wells being drilled, completed and reworked, and the depth and drilling conditions of these wells. Sales are generally made to end users, with exports being done through a centrally managed global distribution network and domestic sales made through local subsidiaries. Corporate general and administrative expenses have been allocated to the Tubes segment.

Others include all other business activities and operating segments that are not required to be separately reported, including the production and selling of sucker rods, welded steel pipes for electric conduits, industrial equipment, coiled tubing, energy and raw materials that exceed internal requirements.

Tenaris's Chief Operating Decision Maker (CEO) holds monthly meetings with senior management, in which operating and financial performance information is reviewed, including financial information that differs from IFRS principally as follows:

§ The use of direct cost methodology to calculate the inventories, while under IFRS it is at full cost, including absorption of production overheads and depreciations;

§ The use of costs based on previously internally defined cost estimates, while, under IFRS, costs are calculated at historical cost;

§ The sales of energy and surplus raw materials are considered as lower cost of goods sold, while under IFRS are considered as revenues.

§ Other timing and no significant differences.

Tenaris groups its geographical information in five areas: North America, South America, Europe, Middle East and Africa, and Far East and Oceania. For purposes of reporting geographical information, net sales are allocated to geographical areas based on the customer's location; allocation of assets, capital expenditures and associated depreciations and amortizations are based on the geographic location of the assets.

D Foreign currency translation

(1) Functional and presentation currency

IAS 21 (revised) defines the functional currency as the currency of the primary economic environment in which an entity operates.

The functional and presentation currency of the Company is the U.S. dollar. The U.S. dollar is the currency that best reflects the economic substance of the underlying events and circumstances relevant to Tenaris global operations.

Starting January 1, 2012, the Company changed the functional currency of its Mexican, Canadian and Japanese subsidiaries from their respective local currencies to the U.S. dollar.

Except from the Brazilian and Italian subsidiaries whose functional currencies are their local currencies, Tenaris determined that the functional currency of its other subsidiaries is the U.S. dollar, based on the following principal considerations:

§ Sales are mainly negotiated, denominated and settled in U.S. dollars. If priced in a currency other than the U.S. dollar, the sales price considers exposure to fluctuation in the exchange rate versus the U.S. dollar;

§ Prices of their critical raw materials and inputs are priced and settled in U.S. dollars;

§ Transaction and operational environment and the cash flow of these operations have the U.S. dollars as reference currency.

§ Significant level of integration of the local operations within Tenaris's international global distribution network.

§ Net financial assets and liabilities are mainly received and maintained in U.S. dollars;

§ The exchange rate of certain legal currencies has long-been affected by recurring and severe economic crises.

(2) Transactions in currencies other than the functional currency

Transactions in currencies other than the functional currency are translated into the functional currency using the exchange rates prevailing at the date of the transactions or valuation where items are re-measured.

At the end of each reporting period: (i) monetary items denominated in currencies other than the functional currency are translated using the closing rates; (ii) non-monetary items that are measured in terms of historical cost in a currency other than the functional currency are translated using the exchange rates prevailing at the date of the transactions; and (iii) non-monetary items that are measured at fair value in a currency other than the functional currency are translated using the exchange rates prevailing at the date when the fair value was determined.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in currencies other than the functional currency are recorded as gains and losses from foreign exchange and included in "Other financial results" in the Consolidated Income Statement, except when deferred in equity as qualifying cash flow hedges and qualifying net investment hedges. Translation differences on non-monetary financial assets and liabilities such as equities held at fair value through profit or loss are recognized in profit or loss as part of the "fair value gain or loss," while translation differences on non-monetary financial assets such as equities classified as available for sale are included in the "available for sale reserve" in equity. Tenaris had no such assets or liabilities for any of the periods presented.

(3) Translation of financial information in currencies other than the functional currency

Results of operations for subsidiaries whose functional currencies are not the U.S. dollar are translated into U.S. dollars at the average exchange rates for each quarter of the year. Financial Statement positions are translated at the end-of-year exchange rates. Translation differences are recognized in a separate component of equity as currency translation adjustments. In the case of a sale or other disposal of any of such subsidiaries, any accumulated translation difference would be recognized in income as a gain or loss from the sale.

E Property, plant and equipment

Property, plant and equipment are recognized at historical acquisition or construction cost less accumulated depreciation and impairment losses; historical cost includes expenditure that is directly attributable to the acquisition of the items. Property, plant and equipment acquired through acquisitions accounted for as business combinations have been valued initially at the fair market value of the assets acquired.

Major overhaul and rebuilding expenditures are capitalized as property, plant and equipment only when it is probable that future economic benefits associated with the item will flow to the group and the investment enhances the condition of assets beyond its original condition. The carrying amount of the replaced part is derecognized. Ordinary maintenance expenses on manufacturing properties are recorded as cost of products sold in the year in which they are incurred.

Borrowing costs that are attributable to the acquisition or construction of certain capital assets are capitalized as part of the cost of the asset, in accordance with IAS 23(R) ("Borrowing Costs"). Assets for which borrowing costs are

capitalized are those that require a substantial period of time to prepare for their intended use.

Depreciation method is reviewed at each year end. Depreciation is calculated using the straight-line method to depreciate the cost of each asset to its residual value over its estimated useful life, as follows:

| | |
|---|-----------------|
| Land | No Depreciation |
| Buildings and improvements | 30-50 years |
| Plant and production equipment | 10-40 years |
| Vehicles, furniture and fixtures, and other equipment | 4-10 years |

The asset's residual values and useful lives of significant plant and production equipment are reviewed and adjusted, if appropriate, at each year-end date.

Management's re-estimation of assets useful lives, performed in accordance with IAS 16 ("Property plant and equipment"), did not materially affect depreciation expenses for 2013.

Tenaris depreciates each significant part of an item of property, plant and equipment for its different production facilities that (i) can be properly identified as an independent component with a cost that is significant in relation to the total cost of the item, and (ii) has a useful operating life that is different from another significant part of that same item of property, plant and equipment.

Gains and losses on disposals are determined by comparing the proceeds with the carrying amount of assets and are recognized under Other operating income or Other operating expenses in the Consolidated Income Statement.

F Intangible assets

(1) Goodwill

Goodwill represents the excess of the acquisition cost over the fair value of Tenaris's share of net identifiable assets acquired as part of business combinations determined mainly by independent valuations. Goodwill is tested annually for impairment and carried at cost less accumulated impairment losses. Impairment losses on goodwill are not reversed. Goodwill is included on the Consolidated Statement of Financial Position under Intangible assets, net.

For the purpose of impairment testing, goodwill is allocated to a subsidiary or group of subsidiaries that are expected to benefit from the business combination which generated the goodwill being tested.

(2) Information systems projects

Costs associated with maintaining computer software programs are generally recognized as an expense as incurred. However, costs directly related to the development, acquisition and implementation of information systems are recognized as intangible assets if it is probable they have economic benefits exceeding one year.

Information systems projects recognized as assets are amortized using the straight-line method over their useful lives, not exceeding a period of 3 years. Amortization charges are mainly classified as Selling, general and administrative expenses in the Consolidated Income Statement.

(3) Licenses, patents, trademarks and proprietary technology

Licenses, patents, trademarks, and proprietary technology acquired in a business combination are initially recognized at fair value at the acquisition date. Licenses, patents, proprietary technology and those trademarks that have a finite useful life are carried at cost less accumulated amortization. Amortization is calculated using the straight-line method to allocate the cost over their estimated useful lives, and does not exceed a period of 10 years.

The balance of acquired trademarks that have indefinite useful lives according to external appraisal amounts to \$86.7 million at December 31, 2013 and 2012. Main factors considered in the determination of the indefinite useful lives, include the years that they have been in service and their recognition among customers in the industry.

(4) Research and development

Research expenditures as well as development costs that do not fulfill the criteria for capitalization are recorded as Cost of sales in the Consolidated Income Statement as incurred. Research and development expenditures included in

Cost of sales for the years 2013, 2012 and 2011 totaled \$105.6 million, \$83.0 million and \$83.1 million, respectively.

(5) Customer relationships

In accordance with IFRS 3 and IAS 38, Tenaris has recognized the value of customer relationships separately from goodwill attributable to the acquisition of Maverick and Hydril.

Customer relationships acquired in a business combination are recognized at fair value at the acquisition date, have a finite useful life and are carried at cost less accumulated amortization. Amortization is calculated using the straight line method over the expected life of approximately 14 years for Maverick and 10 years for Hydril.

G Impairment of non financial assets

Long-lived assets including identifiable intangible assets are reviewed for impairment at the lowest level for which there are separately identifiable cash flows (cash generating units, or CGU). Most of the Company's principal subsidiaries that constitute a CGU have a single main production facility and, accordingly, each of such subsidiary represents the lowest level of asset aggregation that generates largely independent cash inflows.

Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. Intangible assets with indefinite useful life, including goodwill, are subject to at least an annual impairment test.

In assessing whether there is any indication that a CGU may be impaired, external and internal sources of information are analyzed. Material facts and circumstances specifically considered in the analysis usually include the discount rate used in Tenaris's cash flow projections and the business condition in terms of competitive and economic factors, such as the cost of raw materials, oil and gas prices, competitive environment, capital expenditure programs for Tenaris's customers and the evolution of the rig count.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is the higher of the asset's value in use and fair value less costs to sell. Any impairment loss is allocated to reduce the carrying amount of the assets of the CGU in the following order:

- (a) first, to reduce the carrying amount of any goodwill allocated to the CGU; and
- (b) then, to the other assets of the unit (group of units) pro rata on the basis of the carrying amount of each asset in the unit (group of units), considering not to reduce the carrying amount of the asset below the highest of its fair value less cost to sell, its value in use or zero.

The value in use of each CGU is determined on the basis of the present value of net future cash flows which would be generated by such CGU. Tenaris uses cash flow projections for a five year period with a terminal value calculated based on perpetuity and appropriate discount rates.

For purposes of calculating the fair value less costs to sell Tenaris uses the estimated value of future cash flows that a market participant could generate from the corresponding CGU. Tenaris uses cash flow projections for a five year period with a terminal value calculated based on perpetuity and appropriate discount rates.

Management judgment is required to estimate discounted future cash flows. Actual cash flows and values could vary significantly from the forecasted future cash flows and related values derived using discounting techniques.

Non-financial assets other than goodwill that suffered an impairment are reviewed for possible reversal at each reporting date.

In 2013 and 2012, none of the Company's CGUs including long-lived assets with finite useful lives, were tested for impairment as no impairment indicators were identified.

H Other investments

Other investments consist primarily of investments in financial instruments and time deposits with a maturity of more than three months at the date of purchase.

Certain fixed income financial instruments purchased by the Company since October 1, 2013 have been categorized as available for sale if designated in this category or not classified in any of the other categories. The results of these financial investments are recognized in Financial Results in the Consolidated Income Statement using the effective interest method. Unrealized gains and losses other than impairment and foreign exchange results are recognized in Other comprehensive income. On maturity or disposal, net gain and losses previously deferred in Other comprehensive income are recognized in Financial Results in the Consolidated Income Statement.

All other investments in financial instruments and time deposits are categorized as financial assets “at fair value through profit or loss” and their results are recognized in Financial Results in the Consolidated Income Statement.

Purchases and sales of financial investments are recognized as of their settlement date.

The fair values of quoted investments are generally based on current bid prices. If the market for a financial investment is not active or the securities are not listed, Tenaris estimates the fair value by using standard valuation techniques (see Section III Financial Risk Management).

I Inventories

Inventories are stated at the lower of cost and net realizable value. The cost of finished goods and goods in process is comprised of raw materials, direct labor and utilities (based on FIFO method) and other direct costs and related production overhead costs. It excludes borrowing costs. Tenaris estimates net realizable value of inventories by grouping, where applicable, similar or related items. Net realizable value is the estimated selling price in the ordinary course of business, less any estimated costs of completion and selling expenses. Goods in transit at year end are valued based on supplier's invoice cost.

Tenaris establishes an allowance for obsolete or slow-moving inventory related to finished goods, supplies and spare parts. For slow moving or obsolete finished products, an allowance is established based on management's analysis of product aging. An allowance for obsolete and slow-moving inventory of supplies and spare parts is established based on management's analysis of such items to be used as intended and the consideration of potential obsolescence due to technological changes.

J Trade and other receivables

Trade and other receivables are recognized initially at fair value, generally the original invoice amount. Tenaris analyzes its trade receivables on a regular basis and, when aware of a specific counterparty's difficulty or inability to meet its obligations, impairs any amounts due by means of a charge to an allowance for doubtful accounts. Additionally, this allowance is adjusted periodically based on the aging of receivables.

K Cash and cash equivalents

Cash and cash equivalents are comprised of cash in banks, liquidity funds and short-term investments with a maturity of less than three months at the date of purchase which are readily convertible to known amounts of cash. Assets recorded in cash and cash equivalents are carried at fair market value or at historical cost which approximates fair market value.

In the Consolidated Statement of Financial Position, bank overdrafts are included in Borrowings in current liabilities.

For the purposes of the Consolidated Statement of Cash Flows, cash and cash equivalents includes overdrafts.

L Equity

(1) Equity components

The Consolidated Statement of Changes in Equity includes:

§ The value of share capital, legal reserve, share premium and other distributable reserves calculated in accordance with Luxembourg Law;

§ The currency translation adjustment, other reserves, retained earnings and non-controlling interest calculated in accordance with IFRS.

(2) Share capital

The Company has an authorized share capital of a single class of 2.5 billion shares having a nominal value of \$1.00 per share. Total ordinary shares issued and outstanding as of December 31, 2013, 2012 and 2011 are 1,180,536,830 with a par value of \$1.00 per share with one vote each. All issued shares are fully paid.

(3) Dividends distribution by the Company to shareholders

Dividends distributions are recorded in the Company's financial statements when Company's shareholders have the right to receive the payment, or when interim dividends are approved by the Board of Directors in accordance with the by-laws of the Company.

Dividends may be paid by the Company to the extent that it has distributable retained earnings, calculated in accordance with Luxembourg law (see Note 26).

M Borrowings

Borrowings are recognized initially at fair value net of transaction costs incurred and subsequently measured at amortized cost.

N Current and Deferred income tax

The tax expense for the period comprises current and deferred tax. Tax is recognized in the Consolidated Income Statement, except for tax items recognized in the Consolidated Statement of Other Comprehensive Income.

The current income tax charge is calculated on the basis of the tax laws enacted or substantively enacted at the reporting date in the countries where the Company's subsidiaries operate and generate taxable income. Management periodically evaluates positions taken in tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions when appropriate.

Deferred income tax is recognized applying the liability method on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. The principal temporary differences arise from fair value adjustments of assets acquired in business combinations, the effect of currency translation on fixed assets, depreciation on property, plant and equipment, valuation of inventories and provisions for pension plans. Deferred tax assets are also recognized for net operating loss carry-forwards. Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the time period when the asset is realized or the liability is settled, based on tax laws that have been enacted or substantively enacted at the reporting date.

Deferred tax assets are recognized to the extent it is probable that future taxable income will be available against which the temporary differences can be utilized. At the end of each reporting period, Tenaris reassesses unrecognized deferred tax assets. Tenaris recognizes a previously unrecognized deferred tax asset to the extent that it has become probable that future taxable income will allow the deferred tax asset to be recovered.

In September 2013, Argentina enacted a law that amends its Income tax law. The law includes a new 10% withholding tax on dividend distributions made by Argentine companies to foreign beneficiaries. Accordingly, as of December 31, 2013, the Company recorded an income tax provision of \$39.9 million, for the deferred tax liability on reserves for future dividends at Tenaris's Argentine subsidiaries.

O Employee benefits

(1) Post employment benefits

The Company has defined benefit and defined contribution plans. A defined benefit plan is a pension plan that defines an amount of pension benefit that an employee will receive on retirement, usually dependent on one or more factors such as age, years of service and compensation.

The Company applied IAS 19 (amended 2011), "Employee benefits", as from January 1, 2013. In accordance with the amended standard, post-employment benefits are accounted as follows:

The liability recognized in the statement of financial position in respect of defined benefit pension plans is the present value of the defined benefit obligation at the end of the reporting period less the fair value of plan assets, if any. The defined benefit obligation is calculated annually (at year end) by independent actuaries using the projected unit credit method. The present value of the defined benefit obligation is determined by discounting the estimated future cash outflows using interest rates of high-quality corporate bonds that are denominated in the currency in which the benefits will be paid, and that have terms to maturity approximating to the terms of the related pension obligation.

Actuarial gains and losses arising from experience adjustments and changes in actuarial assumptions are charged or credited to equity in other comprehensive income in the period in which they arise. Past-service costs are recognized

immediately in income.

For defined benefit plans, net interest income/expense is calculated based on the surplus or deficit derived by the difference between the defined benefit obligations less plan assets. For defined contribution plans, the Company pays contributions to publicly or privately administered pension insurance plans on a mandatory, contractual or voluntary basis. The Company has no further payment obligations once the contributions have been paid. The contributions are recognized as employee benefit expense when they are due. Prepaid contributions are recognized as an asset to the extent that a cash refund or a reduction in the future payments is available. As required by IAS 19, comparative figures have been adjusted to reflect the retrospective application.

- 15 -

O Employee benefits (Cont.)

(1) Post employment benefits (Cont.)

Tenaris sponsors funded and unfunded defined benefit pension plans in certain subsidiaries. The most significant are:

§ Employees' service rescission indemnity: the cost of this obligation is charged to the Consolidated Income Statement over the expected service lives of employees. This provision is primarily related to the liability accrued for employees at Tenaris's Italian subsidiary. As from January 1, 2007 as a consequence of a change in an Italian law, employees were entitled to make contributions to external funds, thus, Tenaris's Italian subsidiary pays every year the required contribution to the funds with no further obligation. As a result, the plan changed from a defined benefit plan to a defined contribution plan effective from that date, but only limited to the contributions of 2007 onwards.

§ Defined benefit employees' retirement plan for certain Tenaris's officers designed to provide post-retirement and other benefits. This unfunded plan provides defined benefits based on years of service and final average salary.

§ Funded retirement benefit plan held in the US to employees hired prior a certain date that considers the final average pay for retirement benefit calculation. Plan assets consist primarily of investments in equities and money market funds. Additionally, an unfunded postretirement health and life plan that offers limited medical and life insurance benefits to the retirees, hired before a certain date.

§ Funded retirement benefit plans held in Canada for salary and hourly employees hired prior a certain date based on years of service and, in the case of salaried employees, final average salary. Both plans were replaced for defined contribution plans.

(2) Other long term benefits

During 2007, Tenaris launched an employee retention and long term incentive program (the "Program") applicable to certain senior officers and employees of the Company, who will be granted a number of Units throughout the duration of the Program. The value of each of these Units is based on Tenaris' shareholders' equity (excluding non-controlling interest). Also, the beneficiaries of the Program are entitled to receive cash amounts based on (i) the amount of dividend payments made by Tenaris to its shareholders, and (ii) the number of Units held by each beneficiary to the Program. Units vest ratably over a period of four years and will be redeemed by the Company ten years after grant date, with the option of an early redemption at seven years after grant date. As the cash payment of the benefit is tied to the book value of the shares, and not to their market value, Tenaris valued this long-term incentive program as a long term benefit plan as classified in IAS 19.

As of December 31, 2013 and 2012, the outstanding liability corresponding to the Program amounts to \$82.4 million and \$68.8 million, respectively. The total value of the units granted to date under the program, considering the number of units and the book value per share as of December 31, 2013 and 2012, is \$88.6 million and \$71.9 million, respectively.

(3) Other compensation obligations

Employee entitlements to annual leave and long-service leave are accrued as earned.

Compensation to employees in the event of dismissal is charged to income in the year in which it becomes payable.

P Provisions

Tenaris is subject to various claims, lawsuits and other legal proceedings, including customer claims, in which a third party is seeking payment for alleged damages, reimbursement for losses or indemnity. Tenaris' potential liability with respect to such claims, lawsuits and other legal proceedings cannot be estimated with certainty. Management periodically reviews the status of each significant matter and assesses potential financial exposure. If, as a result of past events, a potential loss from a claim or proceeding is considered probable and the amount can be reasonably estimated, a provision is recorded. Accruals for loss contingencies reflect a reasonable estimate of the losses to be incurred based on information available to management as of the date of preparation of the financial statements, and take into consideration Tenaris' litigation and settlement strategies. These estimates are primarily constructed with the assistance of legal counsel. As the scope of liabilities become better defined, there may be changes in the estimates of future costs which could have a material adverse effect on its results of operations, financial condition and cash flows.

If Tenaris expects to be reimbursed for an accrued expense, as would be the case for an expense or loss covered under an insurance contract, and reimbursement is considered virtually certain, the expected reimbursement is recognized as a receivable.

Q Trade payables

Trade payables are recognized initially at fair value, generally the nominal invoice amount.

R Revenue recognition

Revenue comprises the fair value of the consideration received or receivable for the sale of goods and services in the ordinary course of Tenaris's activities. Revenue is shown net of value-added tax, returns, rebates and discounts and after eliminating sales within the group.

Tenaris' products and services are sold based upon purchase orders, contracts or upon other persuasive evidence of an arrangement with customers, including that the sales price is known or determinable. Sales are recognized as revenue upon delivery, when neither continuing managerial involvement nor effective control over the products is retained by Tenaris and when collection is reasonably assured. Delivery is defined by the transfer of risk and may include delivery to a storage facility located at one of the Company's subsidiaries. For bill and hold transactions revenue is recognized only to the extent (a) it is highly probable delivery will be made; (b) the products have been specifically identified and are ready for delivery; (c) the sales contract specifically acknowledges the deferred delivery instructions; (d) the usual payment terms apply.

The percentage of total sales that were generated from bill and hold arrangements for products located in Tenaris's storage facilities that have not been shipped to customers amounted to 1.3 %, 2.2% and 1.3% as of December 31, 2013, 2012 and 2011, respectively. The Company has not experienced any material claims requesting the cancellation of bill and hold transactions.

Other revenues earned by Tenaris are recognized on the following basis:

§ Construction contracts (mainly applicable to Tenaris Brazilian subsidiaries): The revenue recognition of the contracts follows the IAS 11 guidance, that means, when the outcome of a construction contract can be estimated reliably and it is probable that the contract will be profitable, contract revenue is recognized over the period of the contract by reference to the stage of completion (measured by reference to the contract costs incurred up to the end of the reporting period as a percentage of total estimated costs for each contract).

§ Interest income: on the effective yield basis.

§ Dividend income from investments in other companies: when Tenaris' right to receive payment is established.

S Cost of sales and sales expenses

Cost of sales and sales expenses are recognized in the Consolidated Income Statement on the accrual basis of accounting.

Commissions, freight and other selling expenses, including shipping and handling costs, are recorded in Selling, general and administrative expenses in the Consolidated Income Statement.

T Earnings per share

Earnings per share are calculated by dividing the income attributable to owners of the parent by the daily weighted average number of common shares outstanding during the year.

U Financial instruments

Non derivative financial instruments comprise investments in financial debt instruments and equity, time deposits, trade and other receivables, cash and cash equivalents, borrowings, and trade and other payables. Tenaris's non derivative financial instruments are classified into the following categories:

§ Financial instruments at fair value through profit and loss: comprise mainly cash and cash equivalents and investments in certain financial debt instruments and time deposits held for trading.

§ Loans and receivables: comprise trade receivables and other receivables and are measured at amortized cost using the effective interest rate method less any impairment.

§ Available for sale assets: comprise certain fixed income financial instruments purchased by the Company since October 1, 2013 that have been categorized as available for sale if designated in this category or not classified in any of the other categories. It also includes the Company's interest in the Venezuelan Companies (see Note 31).

§ Other financial liabilities: comprise borrowings, trade and other payables and are measured at amortized cost using the effective interest rate method.

The categorization depends on the nature and purpose of the financial instrument and is determined at the time of initial recognition.

Financial assets and liabilities are recognized and derecognized on their settlement date.

In accordance with IAS 39 ("Financial Instruments: Recognition and Measurement") embedded derivatives are accounted separately from their host contracts. The result has been recognized under "Foreign exchange derivatives contracts results".

Accounting for derivative financial instruments and hedging activities is included within the Section III, Financial Risk Management.

III. FINANCIAL RISK MANAGEMENT

The multinational nature of Tenaris's operations and customer base exposes the Company to a variety of risks, mainly related to market risks (including the effects of changes in foreign currency exchange rates and interest rates), credit risk and capital market risk. In order to manage the volatility related to these exposures, the management evaluates exposures on a consolidated basis, taking advantage of logical exposure netting. The Company or its subsidiaries may then enter into various derivative transactions in order to prevent potential adverse impacts on Tenaris' financial performance. Such derivative transactions are executed in accordance with internal policies and hedging practices. The Company's objectives, policies and processes for managing these risks remained unchanged during 2013.

A. Financial Risk Factors

(i) Capital Market Risk

Tenaris seeks to maintain a low debt to total equity ratio considering the industry and the markets where it operates. The year-end ratio of debt to total equity (where "debt" comprises financial borrowings and "total equity" is the sum of financial borrowings and equity) is 0.07 as of December 31, 2013, in comparison with 0.13 as of December 31, 2012. The Company does not have to comply with regulatory capital adequacy requirements as known in the financial services industry.

(ii) Foreign exchange risk

Tenaris manufactures and sells its products in a number of countries throughout the world and consequently is exposed to foreign exchange rate risk. Since the Company's functional currency is the U.S. dollar the purpose of Tenaris's foreign currency hedging program is mainly to reduce the risk caused by changes in the exchange rates of other currencies against the U.S. dollar.

Tenaris's exposure to currency fluctuations is reviewed on a periodic consolidated basis. A number of derivative transactions are performed in order to achieve an efficient coverage in the absence of operative or natural hedges. Almost all of these transactions are forward exchange rates contracts (see Note 25 Derivative financial instruments).

Tenaris does not enter into derivative financial instruments for trading or other speculative purposes, other than non-material investments in structured products.

Because certain subsidiaries have functional currencies other than the U.S. dollar, the results of hedging activities, reported in accordance with IFRS, may not reflect entirely the management's assessment of its foreign exchange risk hedging program. Inter-company balances between Tenaris's subsidiaries may generate financial gains (losses) to the extent that functional currencies differ.

The value of Tenaris's financial assets and liabilities is subject to changes arising out of the variation of foreign currency exchange rates. The following table provides a breakdown of Tenaris's main financial assets and liabilities (including foreign exchange derivative contracts) which impact the Company's profit and loss as of December 31, 2013 and 2012:

- 17 -

| All amounts Long / (Short) in thousands of U.S. dollars Currency Exposure / Functional currency | As of December 31, | |
|--|--------------------|------------|
| | 2013 | 2012 |
| Argentine Peso / U.S. Dollar | (368,985) | (168,816) |
| Euro / U.S. Dollar | (137,599) | (117,370) |
| U.S. Dollar / Brazilian Real | (51,321) | (27,269) |

The main relevant exposures correspond to:

§ Argentine Peso / U.S. dollar

As of December 31, 2013 and 2012 consisting primarily of Argentine Peso-denominated financial, trade, social and fiscal payables at certain Argentine subsidiaries which functional currency was the U.S. dollar. A change of 1% in the ARS/USD exchange rate would have generated a pre-tax gain / loss of \$3.7 million and \$1.7 million as of December 31, 2013 and 2012, respectively.

§ Euro / U.S. dollar

As of December 31, 2013 and 2012, consisting primarily of Euro-denominated liabilities at certain subsidiaries which functional currency was the U.S. dollar. A change of 1% in the EUR/USD exchange rate would have generated a pre-tax gain / loss of \$1.4 million and \$1.2 million as of December 31, 2013 and 2012, respectively, which would have been to a large extent offset by changes to Tenaris' net equity position.

Considering the balances held as of December 31, 2013 on financial assets and liabilities exposed to foreign exchange rate fluctuations, Tenaris estimates that the impact of a simultaneous 1% favorable / unfavorable movement in the levels of foreign currencies exchange rates relative to the U.S. dollar, would be a pre-tax gain / loss of \$6.7 million (including a gain / loss of \$0.3 million due to foreign exchange derivative contracts), which would be partially offset by changes to Tenaris's net equity position of \$0.8 million. For balances held as of December 31, 2012, a simultaneous 1% favorable/unfavorable movement in the foreign currencies exchange rates relative to the U.S. dollar, would have generated a pre-tax gain / loss of \$4.7 million (including a loss / gain of \$10.6 million due to foreign exchange derivative contracts), which would have been partially offset by changes to Tenaris' net equity position of \$0.9 million.

(iii) Interest rate risk

Tenaris is subject to interest rate risk on its investment portfolio and its debt. The Company uses a mix of variable and fixed rate debt in combination with its investment portfolio strategy. From time to time, the Company may choose to enter into foreign exchange derivative contracts and / or interest rate swaps to mitigate the exposure to changes in the interest rates.

The following table summarizes the proportions of variable-rate and fixed-rate debt as of each year end.

| | As of December 31, | | | | | |
|---------------|--|----|---|--|----|---|
| | 2013 | | | 2012 | | |
| | Amount in thousands of U.S. dollars | % | | Amount in thousands of U.S. dollars | % | |
| Fixed rate | 643,005 | 69 | % | 778,774 | 45 | % |
| Variable rate | 287,930 | 31 | % | 965,418 | 55 | % |

| | | |
|-----------|---------|-----------|
| Total (*) | 930,935 | 1,744,192 |
|-----------|---------|-----------|

(*)As of December 31, 2013 approximately 65% of the total debt balance corresponded to fixed-rate borrowings where the original period was nonetheless equal to or lesser than 360 days. This compares to approximately 30% of the total outstanding debt balance as of December 31, 2012.

The Company estimates that, if market interest rates applicable to Tenaris's borrowings had been 100 basis points higher, then the additional pre-tax loss would have been \$10.8 million in 2013 and \$10.9 million in 2012.

Tenaris's exposure to interest risk associated with its debt is also mitigated by its investment portfolio. Tenaris estimates that, if interest rates on the benchmark rates for Tenaris portfolio had been 100 basis points higher, then the additional pre-tax gain would have been \$3.7 million in 2013 and \$5.7 million in 2012, partially offsetting the net losses to Tenaris's borrowing costs.

A. Financial Risk Factors (Cont.)

(iv) Credit risk

Credit risk arises from cash and cash equivalents, deposits with banks and financial institutions, as well as credit exposures to customers, including outstanding receivables and committed transactions. The Company also actively monitors the creditworthiness of its treasury, derivative and insurance counterparties in order to minimize its credit risk.

There is no significant concentration of credit risk from customers. No single customer comprised more than 10% of Tenaris's net sales in 2013 and 2012.

Tenaris's credit policies related to sales of products and services are designed to identify customers with acceptable credit history, and to allow Tenaris to require the use of credit insurance, letters of credit and other instruments designed to minimize credit risks whenever deemed necessary. Tenaris maintains allowances for impairment for potential credit losses (See Section II J).

As of December 31, 2013 and 2012 trade receivables amount to \$1,983.0 million and \$2,070.8 million respectively. Trade receivables have guarantees under credit insurance of \$537.5 million and \$539.3 million, letter of credit and other bank guarantees of \$36.5 million and \$100.3 million, and other guarantees of \$55 million and \$11.8 million as of December 31, 2013 and 2012 respectively.

As of December 31, 2013 and 2012 past due trade receivables amounted to \$431.0 million and \$392.8 million, respectively. Out of those amounts \$147.9 million and \$103.4 million are guaranteed trade receivables while \$51.2 million and \$29.1 million are included in the allowance for doubtful accounts. Past due receivable not provisioned relate to a number of customers for whom there is no recent history of default. The allowance for doubtful accounts and the existing guarantees are sufficient to cover doubtful trade receivables.

(v) Counterparty risk

Tenaris has investment guidelines with specific parameters to limit issuer risk on marketable securities. Counterparties for derivatives and cash transactions are limited to high credit quality financial institutions, normally investment grade.

Approximately 98.1% of Tenaris's liquid financial assets correspond to Investment Grade-rated instruments as of December 31, 2013, in comparison with approximately 88.7% as of December 31, 2012.

(vi) Liquidity risk

Tenaris financing strategy aims to maintain adequate financial resources and access to additional liquidity. During 2013, Tenaris has counted on cash flows from operations as well as additional bank financing to fund its transactions.

Management maintains sufficient cash and marketable securities to finance normal operations and believes that Tenaris also has appropriate access to market for short-term working capital needs.

Liquid financial assets as a whole (comprising cash and cash equivalents and other current investments) were 11.6 % of total assets at the end of 2013 compared to 9.2% at the end of 2012.

Tenaris has a conservative approach to the management of its liquidity, which consists of cash in banks, liquidity funds and short-term investments mainly with a maturity of less than three months at the date of purchase.

Tenaris holds primarily investments in money market funds and variable or fixed-rate securities from investment grade issuers. As of December 31, 2013, Tenaris does not have direct exposure to financial instruments issued by European sovereign counterparties compared to 2.1 million at the end of 2012.

Tenaris holds its cash and cash equivalents primarily in U.S. dollars. As of December 31, 2013 and 2012, U.S. dollar denominated liquid assets represented approximately 76% and 79% of total liquid financial assets respectively.

B. Financial instruments by category

Accounting policies for financial instruments have been applied to the line items below:

| December 31, 2013 | Assets at fair value through profit and loss | Loans and receivables | Available for sale | Total |
|---|--|--------------------------|-----------------------|-----------|
| Assets as per statement of financial position | | | | |
| Derivative financial instruments | 9,273 | - | - | 9,273 |
| Trade receivables | - | 1,982,979 | - | 1,982,979 |
| Other receivables | - | 105,950 | - | 105,950 |
| Available for sale assets (See note 31) | - | - | 21,572 | 21,572 |
| Other investments | 1,184,448 | - | 45,380 | 1,229,828 |
| Cash and cash equivalents | 614,529 | - | - | 614,529 |
| Total | 1,808,250 | 2,088,929 | 66,952 | 3,964,131 |

| December 31, 2013 | Liabilities at fair value through profit and loss | Other financial liabilities | Total |
|--|--|-----------------------------------|-----------|
| Liabilities as per statement of financial position | | | |
| Borrowings | - | 930,935 | 930,935 |
| Derivative financial instruments | 8,268 | - | 8,268 |
| Trade and other payables (*) | - | 869,933 | 869,933 |
| Total | 8,268 | 1,800,868 | 1,809,136 |

| December 31, 2012 | Assets at fair value through profit and loss | Loans and receivables | Available for sale | Total |
|---|--|--------------------------|-----------------------|-----------|
| Assets as per statement of financial position | | | | |
| Derivative financial instruments | 17,852 | - | - | 17,852 |
| Trade receivables | - | 2,070,778 | - | 2,070,778 |
| Other receivables | - | 157,614 | - | 157,614 |
| Available for sale assets | - | - | 21,572 | 21,572 |
| Other investments | 647,012 | - | - | 647,012 |
| Cash and cash equivalents | 828,458 | - | - | 828,458 |
| Total | 1,493,322 | 2,228,392 | 21,572 | 3,743,286 |

| December 31, 2012 | Liabilities at fair value through profit and loss | Other financial liabilities | Total |
|--|--|-----------------------------------|-----------|
| Liabilities as per statement of financial position | | | |
| Borrowings | - | 1,744,192 | 1,744,192 |
| Derivative financial instruments | 14,031 | - | 14,031 |
| Trade and other payables (*) | - | 926,764 | 926,764 |
| Total | 14,031 | 2,670,956 | 2,684,987 |

(*) The maturity of most of trade payables is less than one year.

C. Fair value hierarchy

IFRS 7 requires for financial instruments that are measured in the statement of financial position at fair value, a disclosure of fair value measurements by level according to the following fair value measurement hierarchy:

Level 1- Quoted prices (unadjusted) in active markets for identical assets or liabilities.

Level 2- Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (that is, as prices) or indirectly (that is, derived from prices).

Level 3- Inputs for the asset or liability that are not based on observable market data (that is, unobservable inputs).

The following table presents the assets and liabilities that are measured at fair value as of December 31, 2013 and 2012.

| December 31, 2013 | Level 1 | Level 2 | Level 3 (*) | Total |
|-----------------------------------|------------------|----------------|---------------|------------------|
| Assets | | | | |
| Cash and cash equivalents | 614,529 | - | - | 614,529 |
| Other investments | 866,382 | 360,948 | 2,498 | 1,229,828 |
| Derivatives financial instruments | - | 9,273 | - | 9,273 |
| Available for sale assets (*) | - | - | 21,572 | 21,572 |
| Total | 1,480,911 | 370,221 | 24,070 | 1,875,202 |
| Liabilities | | | | |
| Derivatives financial instruments | - | 8,268 | - | 8,268 |
| Total | - | 8,268 | - | 8,268 |
| | | | | |
| December 31, 2012 | Level 1 | Level 2 | Level 3 (*) | Total |
| Assets | | | | |
| Cash and cash equivalents | 828,458 | - | - | 828,458 |
| Other investments | 451,152 | 193,257 | 2,603 | 647,012 |
| Derivatives financial instruments | - | 17,852 | - | 17,852 |
| Available for sale assets (*) | - | - | 21,572 | 21,572 |
| Total | 1,279,610 | 211,109 | 24,175 | 1,514,894 |
| Liabilities | | | | |
| Derivatives financial instruments | - | 14,031 | - | 14,031 |
| Total | - | 14,031 | - | 14,031 |

(*) For further detail regarding Available for sale assets, see Note 31.

The fair value of financial instruments traded in active markets is based on quoted market prices at the reporting date. A market is regarded as active if quoted prices are readily and regularly available from an exchange, dealer, broker, industry group, pricing service, or regulatory agency, and those prices represent actual and regularly occurring market transactions on an arm's length basis. The quoted market price used for financial assets held by Tenaris is the current bid price. These instruments are included in Level 1 and comprise primarily corporate and sovereign debt securities.

The fair value of financial instruments that are not traded in an active market (such as certain debt securities, certificates of deposits with original maturity of more than three months, forward and interest rate derivative instruments) is determined by using valuation techniques which maximize the use of observable market data where

available and rely as little as possible on entity specific estimates. If all significant inputs required to value an instrument are observable, the instrument is included in Level 2. Tenaris values its assets and liabilities included in this level using bid prices, interest rate curves, broker quotations, current exchange rates, forward rates and implied volatilities obtained from market contributors as of the valuation date.

C. Fair value hierarchy (Cont.)

If one or more of the significant inputs are not based on observable market data, the instruments are included in Level 3. Tenaris values its assets and liabilities in this level using observable market inputs and management assumptions which reflect the Company's best estimate on how market participants would price the asset or liability at measurement date. Main balances included in this level correspond to Available for sale assets related to Tenaris's interest in Venezuelan companies under process of nationalization (see Note 31).

The following table presents the changes in Level 3 assets and liabilities:

| | Year ended December 31, | |
|--|-------------------------|--------|
| | 2013 | 2012 |
| | Assets / Liabilities | |
| At the beginning of the period | 24,175 | 24,550 |
| Loss for the year | - | (435) |
| Currency translation adjustment and others | (105) | 60 |
| At the end of the year | 24,070 | 24,175 |

D. Fair value estimation

Financial assets or liabilities classified as assets at fair value through profit or loss are measured under the framework established by the IASB accounting guidance for fair value measurements and disclosures.

The fair values of quoted investments are generally based on current bid prices. If the market for a financial asset is not active or no market is available, fair values are established using standard valuation techniques.

For the purpose of estimating the fair value of Cash and cash equivalents and Other Investments expiring in less than ninety days from the measurement date, the Company usually chooses to use the historical cost because the carrying amount of financial assets and liabilities with maturities of less than ninety days approximates to their fair value.

The fair value of all outstanding derivatives is determined using specific pricing models that include inputs that are observable in the market or can be derived from or corroborated by observable data. The fair value of forward foreign exchange contracts is calculated as the net present value of the estimated future cash flows in each currency, based on observable yield curves, converted into U.S. dollars at the spot rate of the valuation date.

Borrowings are comprised primarily of fixed rate debt and variable rate debt with a short term portion where interest has already been fixed. They are classified under other financial liabilities and measured at their carrying amount. Tenaris estimates that the fair value of its main financial liabilities is approximately 100.2% of its carrying amount including interests accrued in 2013 as compared with 101.1% in 2012. Tenaris estimates that a change of 100 basis points in the reference interest rates would have an estimated impact of approximately 0.3% in the fair value of borrowings as of December 31, 2013 and 0.1% in 2012. Fair values were calculated using standard valuation techniques for floating rate instruments and comparable market rates for discounting flows.

E. Accounting for derivative financial instruments and hedging activities

Derivative financial instruments are initially recognized in the statement of financial position at fair value through profit and loss on each date a derivative contract is entered into and are subsequently remeasured at fair value.

Specific tools are used for calculation of each instrument's fair value and these tools are tested for consistency on a monthly basis. Market rates are used for all pricing operations. These include exchange rates, deposit rates and other discount rates matching the nature of each underlying risk.

As a general rule, Tenaris recognizes the full amount related to the change in fair value of derivative financial instruments in Financial results in the Consolidated Income Statement.

Tenaris designates certain derivatives as hedges of particular risks associated with recognized assets or liabilities or highly probable forecast transactions. These transactions (mainly currency forward contracts on highly probable forecast transactions) are classified as cash flow hedges. The effective portion of the fair value of derivatives that are designated and qualify as cash flow hedges is recognized in equity. Amounts accumulated in equity are then recognized in the income statement in the same period than the offsetting losses and gains on the hedged item. The gain or loss relating to the ineffective portion is recognized immediately in the income statement. The fair value of Tenaris's derivative financial instruments (assets or liabilities) continues to be reflected on the statement of financial position. The full fair value of a hedging derivative is classified as a current or non current asset or liability according to its expiry date.

For transactions designated and qualifying for hedge accounting, Tenaris documents at the inception of the transaction the relationship between hedging instruments and hedged items, as well as its risk management objectives and strategy for undertaking various hedge transactions. Tenaris also documents its assessment on an ongoing basis, of whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in the fair value or cash flow of hedged items. At December 31, 2013 and 2012, the effective portion of designated cash flow hedges which is included in Other Reserves in equity amounts to \$0.1 million credit and \$2.9 million debit (see Note 25 Derivative financial instruments).

The fair values of various derivative instruments used for hedging purposes are disclosed in Note 25. Movements in the hedging reserve included within Other Reserves in equity are also shown in Note 25.

IV. OTHER NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

(In the notes all amounts are shown in thousands of U.S. dollars, unless otherwise stated)

1 Segment information

As mentioned in section II. AP – C, the Segment Information is disclosed as follows:

Reportable operating segments

(all amounts in thousands of U.S. dollars)

| Year ended December 31, 2013 | Tubes | Other | Total |
|---|-----------|----------|------------|
| Management View - Net Sales | 9,812,295 | 752,796 | 10,565,091 |

Transactions between segments, which were eliminated in consolidation, mainly related to sales of scrap, energy, surplus raw materials and others from the Other segment to the Tubes segment for \$276,388, \$345,285 and \$266,806 in 2013, 2012 and 2011, respectively.

Net income under Management view amounted to \$ 1,495.5 million, while under IFRS amounted to \$ 1,574.4 million. In addition to the amounts reconciled above, the main differences arise from the impact of functional currencies on financial result, deferred income taxes as well as the result of investment in associated companies.

(*) In 2012, Confab Industrial S.A., a Tenaris subsidiary organized in Brazil (“Confab”) collected from the Brazilian government an amount, net of attorney fees and other related expenses, of approximately Brazilian reais (“BRL”) 99.8 million (approximately \$49.2 million), recorded in other operating income. The income tax effect on this gain amounted to approximately \$17.1 million. This payment was ordered by a final court judgment that represents Confab’s right to interest and monetary adjustment over a tax benefit that had been paid to Confab in 1991 and determined the amount of such right.

8 Income tax (Cont.)

The tax on Tenaris's income before tax differs from the theoretical amount that would arise using the tax rate in each country as follows:

| (all amounts in thousands of U.S. dollars) | Year ended December 31 | | |
|---|------------------------|-----------|-----------|
| | 2013 | 2012 | 2011 |
| Income before income tax | 2,202,249 | 2,243,297 | 1,896,574 |
| Tax calculated at the tax rate in each country | 465,029 | 456,530 | 418,358 |
| Non taxable income / Non deductible expenses | 72,768 | 80,527 | 43,265 |
| Changes in the tax rates | 8,287 | 4,707 | (7,736) |
| Effect of currency translation on tax base (*) | 92,695 | 5,214 | 25,000 |
| Utilization of previously unrecognized tax losses | (10,902) | (5,420) | (3,517) |
| Tax charge | 627,877 | 541,558 | 475,370 |

(*) Tenaris applies the liability method to recognize deferred income tax on temporary differences between the tax bases of assets and their carrying amounts in the financial statements. By application of this method, Tenaris recognizes gains and losses on deferred income tax due to the effect of the change in the value on the tax basis in subsidiaries, which have a functional currency different to their local currency. These gains and losses are required by IFRS even though the revalued / devalued tax basis of the relevant assets will not result in any deduction / obligation for tax purposes in future periods.

9 Dividends distribution

On November 6, 2013, the Company's board of directors approved the payment of an interim dividend of \$0.13 per share (\$0.26 per ADS), or approximately \$153.5 million, on November 21, 2013, with an ex-dividend date of November 18, 2013.

On May 2, 2013 the Company's Shareholders approved an annual dividend in the amount of \$0.43 per share (\$0.86 per ADS). The amount approved included the interim dividend previously paid in November 22, 2012 in the amount of \$0.13 per share (\$0.26 per ADS). The balance, amounting to \$0.30 per share (\$0.60 per ADS), was paid on May 23, 2013. In the aggregate, the interim dividend paid in November 2012 and the balance paid in May 2013 amounted to approximately \$507.6 million.

On May 2, 2012, the Company's shareholders approved an annual dividend in the amount of \$0.38 per share (\$0.76 per ADS). The amount approved included the interim dividend previously paid in November 2011, in the amount of \$0.13 per share (\$0.26 per ADS). The balance, amounting to \$0.25 per share (\$0.50 per ADS), was paid on May 24, 2012. In the aggregate, the interim dividend paid in November 2011 and the balance paid in May 2012 amounted to approximately \$449 million.

On June 1, 2011, the Company's shareholders approved an annual dividend in the amount of \$0.34 per share (\$0.68 per ADS). The amount approved included the interim dividend previously paid in November 2010, in the amount of \$0.13 per share (\$0.26 per ADS). The balance, amounting to \$0.21 per share (\$0.42 per ADS), was paid on June 23, 2011. In the aggregate, the interim dividend paid in November 2010 and the balance paid in June 2011 amounted to approximately \$401 million.

The geographical allocation of goodwill for the year ended December 31, 2013 was \$1,614.5 million for North America, \$189.4 million for South America \$2.2 million for Europe, and \$0.7 million for Middle East & Africa.

11 Intangible assets, net (Cont.)

The carrying amount of goodwill allocated by CGU, as of December 31, 2013, was as follows:

| As of December 31, 2013 | CGU | Tubes Segment | | | Other Segment | Total |
|-------------------------|----------------------------|----------------------|--------------------|-------|----------------------|---------|
| | | Maverick Acquisition | Hydril Acquisition | Other | Maverick Acquisition | |
| | OCTG (USA and Colombia) | 721.5 | - | - | - | 721.5 |
| | Tamsa (Hydril and other) | - | 345.9 | 19.4 | - | 365.3 |
| | Siderca (Hydril and other) | - | 265.0 | 93.3 | - | 358.3 |
| | Hydril | - | 309.0 | - | - | 309.0 |
| | Electric Conduits | 45.8 | - | - | - | 45.8 |
| | Coiled Tubing | - | - | - | 4.0 | 4.0 |
| | Other | - | - | 2.9 | - | 2.9 |
| | Total | 767.3 | 919.9 | 115.6 | 4.0 | 1,806.8 |

Impairment tests

In 2013 and 2012, the CGU's shown in the previous table were tested for impairment. No other CGU was tested for impairment in 2013 and 2012 as no impairment indicators were identified.

Tenaris determined that the CGUs with a significant amount of goodwill in comparison to the total amount of goodwill as of December 31, 2013, were: OCTG, Tamsa, Siderca and Hydril, which represented 97.1% of total goodwill.

The value-in-use was used to determine the recoverable amount for all the CGUs with a significant amount of goodwill in comparison to the total amount of goodwill.

Value-in-use is calculated by discounting the estimated cash flows over a five year period based on forecasts approved by management. For the subsequent years beyond the five-year period, a terminal value is calculated based on perpetuity considering a nominal growth rate of 2%. The growth rate considers the long-term average growth rate for the oil and gas industry, the higher demand to offset depletion of existing fields and the Company's expected market penetration.

Tenaris's main source of revenue is the sale of products and services to the oil and gas industry, and the level of such sales is sensitive to international oil and gas prices and their impact on drilling activities. The main key assumptions, shared by all four CGUs are oil and natural gas prices evolution and the level of drilling activity. Tenaris uses the average number of active oil and gas drilling rigs, or rig count, as published by Baker Hughes, as a general indicator of activity in the oil and gas sector. In the case of the OCTG CGU, these assumptions are mainly related to the U.S. market. In the case of Tamsa CGU and Siderca CGU, assumptions are mainly related to the countries where they are located, Mexico and Argentina respectively, and to the international markets as both facilities export a large amount of their production. Regarding Hydril CGU, assumptions are mainly related to the worldwide market.

In addition, key assumptions for OCTG CGU, Tamsa CGU and Siderca CGU also include raw materials costs as their production process consists on the transformation of steel into pipes. In the case of Tamsa CGU and Siderca CGU, steel comes from their own steel shops, therefore they consume steelmaking raw materials (e.g., iron ore and metal scrap). In the case of OCTG CGU, the main raw material is hot rolled steel coils. In the case of Hydril CGU, raw material costs are negligible.

For purposes of assessing key assumptions, Tenaris uses external sources of information and management judgment based on past experience.

The discount rates used are based on the respective weighted average cost of capital (WACC) which is considered to be a good indicator of capital cost. For each CGU where assets are allocated, a specific WACC was determined taking into account the industry, country and size of the business. In 2013, the discount rates used were in a range between 10% and 13%.

11 Intangible assets, net (Cont.)

From the CGUs with a significant amount of goodwill assigned in comparison to the total amount of goodwill, Tenaris has determined that the CGU for which a reasonable possible change in a key assumption would cause the CGUs' carrying amount to exceed its recoverable amount was OCTG CGU.

In OCTG CGU, the recoverable amount calculated based on value in use exceeded carrying value by \$106 million as of December 31, 2013. The main factors that could result in impairment charges in future periods would be an increase in the discount rate / decrease in growth rate used in the Company's cash flow projections and a deterioration of the business, competitive and economic factors, such as the cost of raw materials, oil and gas prices, competitive environment, capital expenditure program of Tenaris's clients and the evolution of the rig count in the U.S. market. As there is a significant interaction among the principal assumptions made in estimating its cash flow projections, the Company believes that a sensitivity analysis that considers changes in one assumption at a time could be potentially misleading. A reduction in cash flows of 5.2%, a fall in growth rate to 1.3% or a rise in discount rate of 40 basis points would remove the remaining headroom.

As of December 31, 2013, no cumulative amount of recognized impairment charges are subject to reversal.

20 Borrowings (Cont)

Significant borrowings include:

| Disbursement date | Borrower | Type | In million of USD | |
|-------------------|----------|------------|------------------------|------------------|
| | | | Original & Outstanding | Final maturity |
| 2013 | Tamsa | Bank loans | 420 | 2014 |
| Mainly 2013 | Siderca | Bank loans | 217 | Mainly 2014 |
| January 2012 | Confab | Syndicated | 193 | January 2017(**) |

(**) The main covenants on these loan agreements are limitations on liens and encumbrances, limitations on the sale of certain assets, restrictions on investments, compliance with financial ratios (i.e., leverage ratio and interest coverage ratio) and restrictions on amendments.

As of December 31, 2013, Tenaris was in compliance with all of its covenants.

The weighted average interest rates before tax shown below were calculated using the rates set for each instrument in its corresponding currency as of December 31, 2013 and 2012 (considering hedge accounting where applicable).

| | 2013 | (*) | 2012 | |
|------------------|------|-----|------|---|
| Total borrowings | 7.50 | % | 2.60 | % |

(*) The increase in weighted average interest rates is explained by an increase in the proportion of unhedged, ARS-denominated debt. This represented 25.9 % of total borrowings as of December 31, 2013 and 3.4% as of December 31, 2012. Tenaris estimates that the impact of ARS depreciation on the ARS-denominated debt balance during 2013 has been equivalent to a reduction of 7.05% to its weighted average interest rate before tax. This impact is posted under net foreign exchange results in Other Financial Results.

Breakdown of long-term borrowings by currency and rate is as follows:

Non current borrowings

| Currency | Interest rates | Year ended December 31, | |
|------------------------------|----------------|-------------------------|---------|
| | | 2013 | 2012 |
| USD | Variable | 218,134 | 510,892 |
| ARS | Fixed | 20,778 | 13,491 |
| Others | Variable | 1,347 | 1,206 |
| Others | Fixed | 5,959 | 6,818 |
| Total non current borrowings | | 246,218 | 532,407 |

Breakdown of short-term borrowings by currency and rate is as follows:

Current borrowings

| Currency | Interest rates | Year ended December 31, | |
|--------------------------|----------------|-------------------------|-----------|
| | | 2013 | 2012 |
| USD | Variable | 24,823 | 240,894 |
| USD | Fixed | 25,019 | 104,845 |
| EURO | Variable | 38,279 | 179,549 |
| EURO | Fixed | 8,432 | 65,107 |
| MXN | Fixed | 366,380 | 339,683 |
| ARS | Fixed | 215,429 | 239,446 |
| ARS | Variable | 4,394 | 32,650 |
| Others | Variable | 953 | 227 |
| Others | Fixed | 1,008 | 9,384 |
| Total current borrowings | | 684,717 | 1,211,785 |

21 Deferred income tax

Deferred income taxes are calculated in full on temporary differences under the liability method using the tax rate of each country.

The evolution of deferred tax assets and liabilities during the year are as follows:

Deferred tax liabilities

| | Fixed assets | Inventories | Intangible and Other (*) | Total |
|--|-----------------|-------------|--------------------------------|----------|
| At the beginning of the year | 335,484 | 15,269 | 530,437 | 881,190 |
| Translation differences | (1,703) | - | (223) | (1,926) |
| Charged directly to Other Comprehensive Income | - | - | 11,441 | 11,441 |
| Income statement charge | 26,427 | 6,257 | 6,564 | 39,248 |
| At December 31, 2013 | 360,208 | 21,526 | 548,219 | 929,953 |

| | Fixed assets | Inventories | Intangible and Other (*) | Total |
|--|-----------------|-------------|--------------------------------|-----------|
| At the beginning of the year | 354,053 | 25,739 | 578,307 | 958,099 |
| Translation differences | 541 | - | (239) | 302 |
| Increase due to business combinations | 636 | - | - | 636 |
| Charged directly to Other Comprehensive Income | - | - | (1,429) | (1,429) |
| Income statement credit | (19,746) | (10,470) | (46,202) | (76,418) |
| At December 31, 2012 | 335,484 | 15,269 | 530,437 | 881,190 |

(*) Includes the effect of currency translation on tax base explained in Note 8

Deferred tax assets

| | Provisions and allowances | Inventories | Tax losses | Other | Total |
|---|---------------------------------|-------------|------------|------------|------------|
| At the beginning of the year | (56,406) | (183,560) | (23,141) | (105,409) | (368,516) |
| Translation differences | 6,104 | 1,311 | - | (843) | 6,572 |
| Increase due to consolidation of joint operations | (17) | - | - | (1,442) | (1,459) |
| Charged directly to Other Comprehensive Income | 753 | - | - | (7,807) | (7,054) |
| Income statement charge / (credit) | (4,070) | 20,007 | (2,669) | (18,818) | (5,550) |
| At December 31, 2013 | (53,636) | (162,242) | (25,810) | (134,319) | (376,007) |

Edgar Filing: TENARIS SA - Form 6-K

| | Provisions and allowances | Inventories | Tax losses | Other | Total |
|---|---------------------------------|-------------|------------|------------|------------|
| At the beginning of the year | (70,388) | (171,465) | (35,196) | (105,912) | (382,961) |
| Translation differences | 2,301 | 647 | - | (199) | 2,749 |
| Increase due to business combinations | (45) | (189) | - | - | (234) |
| Charged directly to Other Comprehensive Income | - | - | - | (1,668) | (1,668) |
| Income statement charge / (credit) | 11,726 | (12,553) | 12,055 | 2,370 | 13,598 |

21 Deferred income tax (Cont)

Deferred tax liabilities (Cont)

The recovery analysis of deferred tax assets and deferred tax liabilities is as follows:

| | Year ended December 31, | |
|--|-------------------------|------------|
| | 2013 | 2012 |
| Deferred tax assets to be recovered after 12 months | (119,488) | (111,616) |
| Deferred tax liabilities to be recovered after 12 months | 877,524 | 867,181 |

Deferred income tax assets and liabilities are offset when (1) there is a legally enforceable right to set-off current tax assets against current tax liabilities and (2) when the deferred income taxes relate to the same fiscal authority on either the same taxable entity or different taxable entities where there is an intention to settle the balances on a net basis. The following amounts, determined after appropriate set-off, are shown in the Consolidated Statement of Financial Position:

| | Year ended December 31, | |
|--------------------------|-------------------------|------------|
| | 2013 | 2012 |
| Deferred tax assets | (197,159) | (215,867) |
| Deferred tax liabilities | 751,105 | 728,541 |
| | 553,946 | 512,674 |

The movement on the net deferred income tax liability account is as follows:

| | Year ended December 31, | |
|---|-------------------------|-----------|
| | 2013 | 2012 |
| At the beginning of the year | 512,674 | 575,138 |
| Translation differences | 4,646 | 3,051 |
| Charged directly to Other Comprehensive Income | 4,387 | (3,097) |
| Income statement credit | 33,698 | (62,820) |
| Increase due to business combinations | - | 402 |
| Increase due to consolidation of joint operations | (1,459) | - |
| At the end of the period | 553,946 | 512,674 |

22 Other liabilities

(i) Other liabilities – Non current

| | Year ended December 31 | |
|--------------------------|------------------------|---------|
| | 2013 | 2012 |
| Post-employment benefits | 169,215 | 184,323 |
| Other-long term benefits | 82,439 | 68,771 |
| Taxes Payable | - | 2,065 |
| Miscellaneous | 25,603 | 47,285 |

| | |
|---------|---------|
| 277,257 | 302,444 |
|---------|---------|

22 Other liabilities (Cont)

(i) Other liabilities – Non current

Post-employment benefits

| | Unfunded | |
|---------------------------------------|------------------------|----------|
| | Year ended December 31 | |
| | 2013 | 2012 |
| Values at the beginning of the period | 131,475 | 120,484 |
| Current service cost | 18,373 | 12,348 |
| Interest cost | 7,220 | 3,709 |
| Curtailments and settlements | 1,212 | - |
| Remeasurements (*) | (3,403) | 2,140 |
| Translation differences | (1,561) | (1,143) |
| Increase due to business combinations | - | 1,189 |
| Benefits paid from the plan | (15,299) | (9,342) |
| Other | (1,086) | 2,090 |
| At the end of the year | 136,931 | 131,475 |

(*) For 2013, loss of \$3.0 million attributable to demographic assumptions and a gain of \$6.4 million attributable to financial assumptions.

The principal actuarial assumptions used were as follows:

| | Year ended December 31, | | | |
|-------------------------------|-------------------------|---|--------|---|
| | 2013 | | 2012 | |
| Discount rate | 3% - 7 | % | 3% - 7 | % |
| Rate of compensation increase | 3% - 7 | % | 2% - 5 | % |

As of December 31, 2013, an increase / (decrease) of 1% in the discount rate assumption would have generated an impact on the defined benefit obligation of \$5.5 million and \$6.2 million and an increase / (decrease) of 1% in the rate of compensation assumption would have generated an impact on the defined benefit obligation of \$4.5 million and \$4.1 million. The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated.

§ Funded

The amounts recognized in the statement of financial position for the current annual period and the previous annual period are as follows:

| | Year ended December 31, | |
|-------------------------------------|-------------------------|------------|
| | 2103 | 2012 |
| Present value of funded obligations | 177,433 | 191,154 |
| Fair value of plan assets | (145,777) | (140,550) |
| (Assets) / Liability (*) | 31,656 | 50,604 |

(*) In 2013 and 2012, \$0.6 million and \$2.2 million corresponding to an overfunded plan were reclassified within other non-current assets, respectively.

- 39 -

22 Other liabilities (Cont.)

(i) Other liabilities – Non current (Cont)

The movement in the present value of funded obligations is as follows:

| | Year ended December 31, | |
|------------------------------|-------------------------|----------|
| | 2013 | 2012 |
| At the beginning of the year | 191,154 | 172,116 |
| Translation differences | (3,208) | (62) |
| Current service cost | 430 | 5,148 |
| Interest cost | 7,366 | 7,921 |
| Remeasurements (*) | (7,174) | 14,211 |
| Benefits paid | (11,135) | (9,636) |
| Other | - | 1,456 |
| At the end of the year | 177,433 | 191,154 |

(*) For 2013, loss of \$7.5 million attributable to demographic assumptions and a gain of \$14.7 million attributable to financial assumptions.

The movement in the fair value of plan assets is as follows:

| | Year ended December 31, | |
|--------------------------------|-------------------------|------------|
| | 2013 | 2012 |
| At the beginning of the year | (140,550) | (134,581) |
| Expected return on plan assets | (2,489) | (8,318) |
| Remeasurements | (7,737) | (2,908) |
| Translation differences | 1,632 | 1,588 |
| Contributions paid to the plan | (7,821) | (5,972) |
| Benefits paid from the plan | 11,135 | 9,636 |
| Other | 53 | 5 |
| At the end of the year | (145,777) | (140,550) |

The major categories of plan assets as a percentage of total plan assets are as follows:

| | At December, 31 | | | |
|--------------------|-----------------|---|------|---|
| | 2013 | | 2012 | |
| Equity instruments | 47.5 | % | 40.0 | % |
| Debt instruments | 52.5 | % | 43.0 | % |
| Others | - | | 17.0 | % |

The principal actuarial assumptions used were as follows:

| | Year ended December 31, | | | |
|-------------------------------|-------------------------|---|--------|---|
| | 2013 | | 2012 | |
| Discount rate | 4% - 5 | % | 4% - 5 | % |
| Rate of compensation increase | 3% - 4 | % | 3% - 4 | % |

22 Other liabilities (Cont.)

(i) Other liabilities – Non current (Cont)

The expected return on plan assets is determined by considering the expected returns available on the assets underlying the current investment policy. Expected return on plan assets is determined based on long-term, prospective rates of return as of the end of the reporting period.

As of December 31, 2013, an increase / (decrease) of 1% in the discount rate assumption would have generated an impact on the defined benefit obligation of \$21.1 million and \$24.7 million and an increase / (decrease) of 1% in the discount rate assumption would have generated an impact on the defined benefit obligation of \$2.0 million and \$1.9 million. The above sensitivity analyses are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur, and changes in some of the assumptions may be correlated

The employer contributions expected to be paid for the year 2014 amounts approximately to \$8.0 million.

(ii) Other liabilities –current

| | Year ended December 31, | |
|-------------------------------------|-------------------------|---------|
| | 2013 | 2012 |
| Payroll and social security payable | 207,425 | 261,223 |
| Liabilities with related parties | 22 | 4,023 |
| Derivative financial instruments | 8,268 | 14,031 |
| Miscellaneous | 35,282 | 39,551 |
| | 250,997 | 318,828 |

23 Non-current allowances and provisions

(i) Deducted from non current receivables

| | Year ended December 31 | |
|-------------------------------------|------------------------|----------|
| | 2013 | 2012 |
| Values at the beginning of the year | (2,995) | (3,445) |
| Translation differences | 740 | 450 |
| Additional provisions | (752) | - |
| Used | 28 | - |
| Values at the end of the year | (2,979) | (2,995) |

(ii) Liabilities

| | Year ended December 31 | |
|-------------------------------------|------------------------|-----------|
| | 2013 | 2012 |
| Values at the beginning of the year | 67,185 | 72,975 |
| Translation differences | (8,065) | (4,427) |
| Additional provisions | 20,852 | 10,871 |
| Reclassifications | (3,387) | - |
| Used | (9,840) | (12,234) |

| | | |
|---|--------|--------|
| Increase due to the consolidation of joint operations | 50 | - |
| Values at the end of the year | 66,795 | 67,185 |

24 Current allowances and provisions

(i) Deducted from assets

| Year ended December 31, 2013 | Allowance for doubtful accounts - Trade receivables | Allowance for other doubtful accounts - Other receivables | Allowance for inventory obsolescence |
|---|--|--|--|
| Values at the beginning of the year | (29,143) | (10,516) | (185,168) |
| Translation differences | (17) | 1,282 | 1,589 |
| Additional allowances | (23,236) | (956) | (70,970) |
| Increase due to the consolidation of joint operations | (7) | - | - |
| Used | 1,249 | 794 | 25,784 |
| At December 31, 2013 | (51,154) | (9,396) | (228,765) |

| Year ended December 31, 2012 | Allowance for doubtful accounts - Trade receivables | Allowance for other doubtful accounts - Other receivables | Allowance for inventory obsolescence |
|---------------------------------------|--|--|--|
| Values at the beginning of the year | (25,949) | (5,680) | (152,737) |
| Translation differences | (65) | 359 | 985 |
| Additional allowances | (3,840) | (5,936) | (49,907) |
| Increase due to business combinations | (269) | - | (604) |
| Used | 980 | 741 | 17,095 |
| At December 31, 2012 | (29,143) | (10,516) | (185,168) |

(ii) Liabilities

| Year ended December 31, 2013 | Sales risks | Other claims and contingencies | Total |
|---|-------------|--------------------------------------|-----------|
| Values at the beginning of the year | 14,112 | 12,846 | 26,958 |
| Translation differences | (335) | 490 | 155 |
| Additional allowances | 8,512 | 2,063 | 10,575 |
| Reclassifications | 366 | 3,021 | 3,387 |
| Used | (12,985) | (2,492) | (15,477) |
| Increase due to the consolidation of joint operations | - | 117 | 117 |
| At December 31, 2013 | 9,670 | 16,045 | 25,715 |
| Year ended December 31, 2012 | Sales risks | Other claims and | Total |

| | contingencies | | |
|-------------------------------------|---------------|----------|-----------|
| Values at the beginning of the year | 11,286 | 22,319 | 33,605 |
| Translation differences | (82) | 245 | 163 |
| Additional allowances / (reversals) | 16,619 | (6,995) | 9,624 |
| Reclassifications | 344 | (354) | (10) |
| Used | (14,055) | (2,369) | (16,424) |
| At December 31, 2012 | 14,112 | 12,846 | 26,958 |

25 Derivative financial instruments

Net fair values of derivative financial instruments

The net fair values of derivative financial instruments disclosed within Other Receivables and Other Liabilities at the reporting date, in accordance with IAS 39, are:

| | Year ended December 31, | |
|--|-------------------------|-----------|
| | 2013 | 2012 |
| Foreign exchange derivatives contracts | 9,273 | 17,852 |
| Contracts with positive fair values | 9,273 | 17,852 |
| Foreign exchange derivatives contracts | (8,268) | (14,031) |
| Contracts with negative fair values | (8,268) | (14,031) |
| Total | 1,005 | 3,821 |

Foreign exchange derivative contracts and hedge accounting

Tenaris applies hedge accounting to certain cash flow hedges of highly probable forecast transactions. The net fair values of exchange rate derivatives, including embedded derivatives and those derivatives that were designated for hedge accounting as of December 2013 and 2012, were as follows:

| Purchase currency | Sell currency | Term | Fair Value | | Hedge Accounting Reserve | |
|-------------------|---------------|------|------------|--------|--------------------------|----------|
| | | | 2013 | 2012 | 2013 | 2012 |
| ARS | USD | 2014 | - | 1,301 | - | (4,043) |
| USD | BRL | 2014 | 5,604 | 824 | - | (818) |
| EUR | BRL | 2014 | 411 | 1,272 | 244 | 2,913 |
| USD | EUR | 2014 | (456) | (223) | (21) | - |
| USD | CAD | 2014 | 72 | (105) | - | - |
| USD | MXN | 2014 | (510) | 148 | (2) | - |
| MXN | USD | 2014 | (3,285) | 1,324 | (101) | (563) |
| USD | COP | 2014 | (11) | (847) | - | - |
| JPY | USD | 2014 | (675) | (202) | - | - |
| Others | | | (145) | 329 | - | (349) |
| Total | | | 1,005 | 3,821 | 120 | (2,860) |

Following is a summary of the hedge reserve evolution:

| | Equity Reserve | Movements | Equity Reserve | Movements | Equity Reserve |
|-----------------------|----------------|-----------|----------------|-----------|----------------|
| | Dec-11 | 2012 | Dec-12 | 2013 | Dec-13 |
| Foreign Exchange | (8,211) | 5,351 | (2,860) | 2,980 | 120 |
| Total Cash flow Hedge | (8,211) | 5,351 | (2,860) | 2,980 | 120 |

Tenaris estimates that the cash flow hedge reserve at December 31, 2013 will be recycled to the Consolidated Income Statement during 2014.

26 Contingencies, commitments and restrictions on the distribution of profits

Contingencies

Tenaris is from time to time subject to various claims, lawsuits and other legal proceedings, including customer claims, in which third parties are seeking payment for alleged damages, reimbursement for losses or indemnity. Some of these claims, lawsuits and other legal proceedings involve highly complex issues, and often these issues are subject to substantial uncertainties. Accordingly, the potential liability with respect to a large portion of such claims, lawsuits and other legal proceedings cannot be estimated with certainty. Management with the assistance of legal counsel periodically reviews the status of each significant matter and assesses potential financial exposure. If a potential loss from a claim, lawsuit or proceeding is considered probable and the amount can be reasonably estimated, a provision is recorded. Accruals for loss contingencies reflect a reasonable estimate of the losses to be incurred based on information available to management as of the date of preparation of the financial statements, and take into consideration Tenaris' litigation and settlement strategies. The Company believes that the aggregate provisions recorded for potential losses in these financial statements (Notes 23 and 24) are adequate based upon currently available information. However, if management's estimates prove incorrect, current reserves could be inadequate and Tenaris could incur a charge to earnings which could have a material adverse effect on Tenaris' results of operations, financial condition, net worth and cash flows.

Tax assessment in Italy

A Tenaris Italian company received on December 24, 2012 a tax assessment from the Italian tax authorities related to allegedly omitted withholding tax on dividend payments made in 2007. On February 21, 2013, the company filed an appeal to this assessment with the tax court in Milan. The assessment is for an estimated amount of EUR281 million (approximately \$388 million), comprising EUR76million (approximately \$105 million) in principal and EUR205 million (approximately \$283 million) in interest and penalties, as of December 31, 2013. The hearing on this appeal was held on October 18, 2013, and the tax court's decision is currently pending. On December 24, 2013 the company received a new tax assessment from the Italian tax authorities related to allegedly omitted withholding tax on dividend payments made in 2008. On February 20, 2014, the company filed an appeal to the 2008 assessment with the tax court in Milan. This second assessment is for an estimated amount of EUR247 million (approximately \$341 million), comprising EUR67 million (approximately \$92 million) in principal and EUR180 million (approximately \$248 million) in interest and penalties, as of December 31, 2013. Tenaris believes, based and confirmed by tax expert's opinions, that it is not probable that the ultimate resolution of the matter will result in a material obligation.

Commitments

Set forth is a description of Tenaris's main outstanding commitments:

§ A Tenaris company is a party to a contract with Nucor Corporation under which it is committed to purchase on a monthly basis a minimum volume of hot-rolled steel coils at prices that are negotiated annually by reference to prices to comparable Nucor customers. The contract became effective in May 2013 and will be in force until December 2017; provided, however, that either party may terminate the contract at any time after January 1, 2015 with 12-month prior notice. As of December 31, 2013, the estimated aggregate contract amount through December 31, 2015, calculated at current prices, is approximately \$556 million.

§ A Tenaris company entered into a contract with Siderar, a subsidiary of the Company's affiliate Ternium S.A. ("Ternium") for the supply of steam generated at the power generation facility that Tenaris owns in the compound of the Ramallo facility of Siderar. Under this contract, Tenaris is required to provide to Siderar 250 tn/hour of steam

through to 2018, and Siderar has the obligation to take or pay this volume. The amount of this gas supply agreement totals approximately \$66 million.

§ A Tenaris company, entered into various contracts with suppliers for a current total amount of approximately \$236 million related to the investment plan to expand US operations with the installation of a state-of-the-art seamless pipe mill, heat treatment and premium threading facilities.

26 Contingencies, commitments and restrictions on the distribution of profits

Restrictions to the distribution of profits and payment of dividends

As of December 31, 2013, equity as defined under Luxembourg law and regulations consisted of:

(all amounts in thousands of U.S. dollars)

| | |
|---|------------|
| Share capital | 1,180,537 |
| Legal reserve | 118,054 |
| Share premium | 609,733 |
| Retained earnings including net income for the year ended December 31, 2013 | 21,899,189 |
| Total equity in accordance with Luxembourg law | 23,807,513 |

At least 5% of the Company's net income per year, as calculated in accordance with Luxembourg law and regulations, must be allocated to the creation of a legal reserve equivalent to 10% of the Company's share capital. As of December 31, 2013, this reserve is fully allocated and additional allocations to the reserve are not required under Luxembourg law. Dividends may not be paid out of the legal reserve.

The Company may pay dividends to the extent, among other conditions, that it has distributable retained earnings calculated in accordance with Luxembourg law and regulations.

At December 31, 2013, distributable amount under Luxembourg law totals \$22.5 billion, as detailed below.

(all amounts in thousands of U.S. dollars)

| | |
|--|------------|
| Retained earnings at December 31, 2012 under Luxembourg law | 22,411,870 |
| Other income and expenses for the year ended December 31, 2013 | (5,050) |

27 Business combinations, other acquisitions and investments

Mexican Power Plant Investment

Following the execution of an August 2013 memorandum of understanding for the construction and operation of a natural gas-fired combined cycle electric power plant in the Pesquería area of the State of Nuevo León, Mexico, as of February 2014, Tenaris, Ternium and Tecpetrol International S.A. (a wholly-owned subsidiary of San Faustin S.A., the controlling shareholder of both Tenaris and Ternium) have completed their initial investments in Techgen, S.A. de C.V., a Mexican project company owned 48% by Ternium, 30% by Tecpetrol and 22% by Tenaris. Tenaris and Ternium have also agreed to enter into power supply and transportation agreements with Techgen, pursuant to which Ternium and Tenaris will contract 78% and 22%, respectively, of Techgen's power capacity of between 850 and 900 megawatts.

Acquisition of participation in Usinas Siderúrgicas de Minas Gerais S.A. ("Usiminas")

On January 16, 2012, Tenaris's Brazilian subsidiary, Confab acquired 25 million ordinary shares of Usiminas, representing 5.0% of the shares with voting rights and 2.5% of the total share capital. The price paid for each ordinary

share was Brazilian reais (“BRL”) 36, representing a total cost to Confab of \$504.6 million. Confab financed the acquisition through an unsecured 5-year term loan in the principal amount of \$350 million and cash on hand.

27 Business combinations and other acquisitions (Cont.)

Acquisition of participation in Usinas Siderúrgicas de Minas Gerais S.A. (“Usiminas”) (Cont.)

This acquisition was part of a larger transaction pursuant to which Ternium, certain of its subsidiaries and Confab joined Usiminas’s existing control group through the acquisition of ordinary shares representing 27.7% of Usiminas’s total voting capital and 13.8% of Usiminas’s total share capital. In addition, Ternium, its subsidiaries and Confab entered into an amended and restated Usiminas shareholders’ agreement with Nippon Steel, Mitsubishi, Metal One and Previdência Usiminas, formerly known as Caixa dos Empregados da Usiminas, an Usiminas employee fund, governing the parties’ rights within the Usiminas control group. As a result of these transactions, the control group, which holds 329.4 million ordinary shares representing the majority of Usiminas’s voting rights, is now formed as follows: Nippon Group 47.2%, Ternium/Tenaris Group 42.4%, and Previdência Usiminas 10.4%. The rights of Ternium and its subsidiaries and Confab within the Ternium/Tenaris Group are governed under a separate shareholders agreement.

Upon completion of its purchase price allocation procedures, in 2012, the Company determined a goodwill included within the investment balance of \$142.7 million. An impairment test over the investment in Usiminas was performed as of December 31, 2012, and subsequently the goodwill of such investment was written down by \$73.7 million. The impairment was mainly due to expectations of a weaker industrial environment in Brazil, where industrial production and consequently steel demand have been suffering downward adjustments. In addition, a higher degree of uncertainty regarding future prices of iron ore led to a reduction in the forecast of long term iron ore prices that affected cash flow expectations.

To determine the recoverable value, the value in use was used, which was calculated as the present value of the expected cash flows, considering the expected prices for the years covered by the projection. As of December 31, 2012 the discount rate used to test the investment in Usiminas for impairment was 9.6%. As of December 31, 2012, following the impairment charges, the Company’s investment in Usiminas amounted to \$346.9 million.

On February 13, 2014, Usiminas published its annual accounts as of and for the year ended December 31, 2013, which state that revenues, post-tax losses from continuing operations and net assets amounted to \$5.971 million, \$75 million and \$7.134 million, respectively. As of December 31, 2013, the Company’s investment in Usiminas, amounted to \$298.5 million. This amount includes Goodwill and other tangible and intangible assets allocated in the purchase price for \$44 million and \$73.8 million, respectively.

In 2013, Confab was notified of a lawsuit filed in Brazil by Companhia Siderúrgica Nacional (CSN) and various entities affiliated with CSN against Confab and the other entities acquiring Usiminas shares in the January 2012 transaction.

The CSN lawsuit alleges that, under applicable Brazilian laws and rules, the acquirers were required to launch a tag-along tender offer to all minority holders of Usiminas ordinary shares for a price per share equal to 80% of the price per share paid in such acquisition, or BRL28.8, and seeks an order to compel the acquirers to launch an offer at that price plus interest. If so ordered, the offer would need to be made to 182,609,851 ordinary shares of Usiminas not belonging to Usiminas’s control group, and Confab would have a 17.9% share in the offer.

On September 23, 2013, the first instance court issued its decision finding in favour of Confab and the other defendants and dismissing the CSN lawsuit. Such decision is not final and is subject to appeal. Tenaris believes that CSN’s allegations are groundless and without merit, as confirmed by several opinions of Brazilian counsel and

previous decisions by Brazil's securities regulator Comissão de Valores Mobiliários, including a February 2012 decision determining that the above mentioned acquisition did not trigger any tender offer requirement and, more recently, the first instance court decision on this matter referred to above. Accordingly, no provision was recorded in these Consolidated Financial Statements.

Confab delisting

Following a proposal by shareholders representing 32.6% of the shares held by the public in its controlled Brazilian subsidiary Confab, on March 22, 2012, Tenaris launched a delisting tender offer to acquire all of the ordinary and preferred shares held by the public in Confab for a price in cash of BRL 5.85 per ordinary or preferred share, subject to adjustments as described in the offer documents. The shareholders parties to the proposal had agreed to the offer price and had committed to tender their shares into the offer.

27 Business combinations and other acquisitions (Cont.)

Confab delisting (Cont.)

On April 23, 2012, at the auction for the offer, a total of 216,269,261 Confab shares were tendered. As a result, Tenaris attained the requisite threshold to delist Confab from the São Paulo Stock Exchange. The final cash price paid in the auction was BRL 5.90 per ordinary or preferred share (or approximately \$3.14 per ordinary or preferred share). Subsequent to the auction, on April 23, 2012, Tenaris acquired 6,070,270 additional Confab shares in the market at the same price. Upon settlement of the offer and these subsequent purchases on April 26, 2012, Tenaris held in the aggregate approximately 95.9% of Confab.

Tenaris later acquired additional shares representing approximately 2.3% of Confab at the same price paid in the auction of the offer and on June 6, 2012, Confab exercised its right to redeem the remaining shares at the same price paid to the tendering shareholders (adjusted by Brazil's SELIC rate). Confab became a wholly-owned subsidiary of Tenaris.

Tenaris's total investment in Confab shares pursuant to these transactions amounted to approximately \$758.5 million.

Business combinations

In August 2012, Tenaris acquired 100% of the shares of Filettature attrezzature speciali tubolari S.R.L. ("Fast"), for a purchase price of \$21.4 million. Net equity acquired amounts to \$19.9 million (mainly cash and cash equivalents for \$14.9 million and fixed assets for \$6.3 million).

Had this transaction been consummated on January 1, 2012, then Tenaris's unaudited pro forma net sales and net income from continuing operations would not have changed materially.

(*) All percentages rounded.

(a) For 2011, Tenaris holds 99% of the voting shares of Confab Industrial S.A.

(b) Tenaris holds 100% of Hydril's subsidiaries shares except for Technical Drilling & Production Services Nigeria. Ltd where it holds 80% for 2013 and 60% for 2012 and 2011.

(c) For 2013, Tenaris holds 100% of Siderca's subsidiaries. For 2012 and 2011, Tenaris holds 100% of Siderca's subsidiaries except for Scrapservice S.A where it holds 75%.

(d) Tenaris holds 97.5% of Tenaris Supply Chain S.A, 95% of Tenaris Saudi Arabia Limited, 60% of Gepnaris S.A. and 40% of Tubular Technical Services and Pipe Coaters, and 49% of Amaja Tubular Services Limited.

31 Nationalization of Venezuelan Subsidiaries

In May 2009, within the framework of Decree Law 6058, Venezuela's President announced the nationalization of, among other companies, the Company's majority-owned subsidiaries TAVSA - Tubos de Acero de Venezuela S.A. ("Tavsa") and, Matesi Materiales Siderúrgicos S.A ("Matesi"), and Complejo Siderúrgico de Guayana, C.A ("Comsigua"), in which the Company has a non-controlling interest (collectively, the "Venezuelan Companies").

In August 2009, Venezuela, acting through the transition committee appointed by the Minister of Basic Industries and Mines of Venezuela, unilaterally assumed exclusive operational control over Matesi, and in November, 2009, Venezuela, acting through PDVSA Industrial S.A. (a subsidiary of Petróleos de Venezuela S.A.), formally assumed exclusive operational control over the assets of Tavsa. Venezuela did not pay any compensation for these assets.

Tenaris's investments in the Venezuelan companies are protected under applicable bilateral investment treaties, including the bilateral investment treaty between Venezuela and the Belgium-Luxembourg Economic Union, and Tenaris continues to reserve all of its rights under contracts, investment treaties and Venezuelan and international law. Tenaris has also consented to the jurisdiction of the International Centre for Settlement of Investment Disputes ("ICSID") in connection with the nationalization process.

In August 2011, Tenaris and its wholly-owned subsidiary Talta - Trading e Marketing Sociedad Unipessoal Lda (Talta), initiated arbitration proceedings against Venezuela before the ICSID in Washington D.C., pursuant to the bilateral investment treaties entered into by Venezuela with the Belgium-Luxembourg Economic Union and Portugal. In these proceedings, Tenaris and Talta seek adequate and effective compensation for the expropriation of their investment in Matesi. The parties to the arbitration have had several exchanges of written pleadings. The final hearing on jurisdiction and the merits was held from January 31, 2013 to February 7, 2014. Following the holding of a further hearing for the examination of certain legal experts provisionally scheduled for May 2014, and the submission of post-hearing briefs, the arbitral tribunal will deliberate and issue a decision.

In July 2012, Tenaris and Talta initiated separate arbitration proceedings against Venezuela before the ICSID, seeking adequate and effective compensation for the expropriation of their respective investments in Tavsa and Comsigua. The tribunal in these proceedings was constituted in July 2013. Tenaris and Talta submitted their memorial on jurisdiction and the merits in October 2013. The parties to the arbitration will exchange one round of jurisdictional submissions in early 2014 and the tribunal has reserved the right to hold a jurisdictional hearing after reviewing the parties' written submissions. This hearing has provisionally been scheduled for July 2014.

Based on the facts and circumstances described above and following the guidance set forth by IAS 27R, the Company ceased consolidating the results of operations and cash flows of the Venezuelan Companies as from June 30, 2009, and classified its investments in the Venezuelan Companies as financial assets based on the definitions contained in paragraphs 11(c)(i) and 13 of IAS 32.

The Company classified its interests in the Venezuelan Companies as available-for-sale investments since management believes they do not fulfill the requirements for classification within any of the remaining categories provided by IAS 39 and such classification is the most appropriate accounting treatment applicable to non-voluntary dispositions of assets.

Tenaris or its subsidiaries have net receivables with the Venezuelan Companies as of December 31, 2013 for a total amount of approximately \$25 million.

The Company records its interest in the Venezuelan Companies at its carrying amount at June 30, 2009, and not at fair value, following the guidance set forth by paragraphs 46(c), AG80 and AG81 of IAS 39.

33 Subsequent event

Annual Dividend Proposal

On February 20, 2014 the Company's board of directors proposed, for the approval of the Annual General Shareholders' meeting to be held on May 7, 2014, the payment of an annual dividend of \$0.43 per share (\$0.86 per ADS), or approximately \$508 million, which includes the interim dividend of \$0.13 per share (\$0.26 per ADS) or approximately \$153.5 million, paid on November 21, 2013. If the annual dividend is approved by the shareholders, a dividend of \$0.30 per share (\$0.60 per ADS), or approximately \$354 million will be paid on May 22, 2014, with an ex-dividend date of May 19, 2014. These Consolidated Financial Statements do not reflect this dividend payable.

Edgardo Carlos
Chief Financial Officer
