## Edgar Filing: RESEARCH FRONTIERS INC - Form 8-K

### Item 7.01 Regulation FD Disclosure

**Dusseldorf, Germany, October 20, 2014** Research Frontiers (Nasdaq: REFR) President and CEO Joseph M. Harary will present the benefits and recent developments relating to Research Frontiers patented SPD-SmartGlass at the glass industry's largest trade show, Glasstec 2014, which is being held from October 21-24, 2014 in Dusseldorf, Germany.

Mr. Harary's presentation, titled "The Use and Benefits of Suspended Particle Device (SPD) SmartGlass Dynamic Window Tinting" will discuss the market, benefits and different types of smart glass technologies, and will highlight the distinctive performance characteristics of SPD-SmartGlass and how its use contributes to energy efficiency and user well-being. It will feature real-world uses of SPD-SmartGlass in the automotive, architectural, aerospace, marine and museum markets. The presentation is scheduled for October 21 at 3:00 PM local time in Dusseldorf and is part of the Engineered Transparency conference section of Glasstec.

SPD-Smart technology is a film-based light-control technology that allows users to instantly change nanoparticles inside the film to adjust the tint of glass or plastic from clear to dark or anything in between. This can be done automatically, at the touch of a button, or using building control systems, tablets or smart phones. SPD-Smart technology also blocks over 99% of harmful UV radiation and allows users to control the heat, light and glare entering vehicles, buildings, aircraft and boats, and protect light-sensitive documents and artwork.

Tens of thousands of Mercedes-Benz cars are currently on the road using SPD-SmartGlass technology, it has been selected as standard equipment on various aircraft and yachts, and used in various high-profile architectural applications around the world. It is also being used in museums such as the Smithsonian to protect priceless documents, artifacts and artwork.

Since Mr. Harary's last presentation at Glasstec 2012, SPD-SmartGlass technology has become the best-selling smart window technology in the world. Perhaps a reflection of this is the recognition by Glasstec as one of the major glass trends is "innovative and smart glass for architecture, interiors and vehicles." Mr. Harary's presentation will cover use of SPD-SmartGlass for all of these applications.

Glasstec, which is held every two years, is the international trade fair and conference for glass production and products. It is the world's largest trade fair for the glass industry and is expected to include 1,175 exhibitors from 54 countries and attract over 42,000 glass industry professionals. The Engineered Transparency conference of Glasstec this year focuses on development and innovations in structural glazing. More information about Glasstec is available from the event website at [www.glasstec-online.com](http://www.glasstec-online.com).

Details are noted in the press release attached as Exhibit 99.1 to this Current Report on Form 8-K and incorporated herein by reference. This press release is also available on the Company's website at [www.SmartGlass.com](http://www.SmartGlass.com) and at various other places on the internet.

This report and the press releases referred to herein may include statements that may constitute "forward-looking" statements as referenced in the Private Securities Litigation Reform Act of 1995. Those statements usually contain words such as "believe", "estimate", "project", "intend", "expect", or similar expressions. Any forward-looking statements are made by the Company in good faith, pursuant to the safe-harbor provisions of the Act. These forward-looking statements reflect management's current views and projections regarding economic conditions, industry environments and Company performance. Factors, which could significantly change results, include but are not limited to: sales performance, expense levels, competitive activity, interest rates, changes in the Company's financial condition and several business factors. Additional information regarding these and other factors may be included in the Company's quarterly 10-Q and 10K filings and other public documents, copies of which are available from the Company on request. By making these forward-looking statements, the Company undertakes no obligation to update these statements for revisions or changes after the date of this report.
