PART I - FINANCIAL INFORMATION

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

Board of Directors
Nighthawk Systems, Inc.

We have reviewed the accompanying condensed consolidated balance sheet of Nighthawk Systems, Inc. and subsidiary as of March 31, 2005, the related condensed consolidated statements of operations for the three-month periods ended March 31, 2005 and 2004, the condensed consolidated statement of stockholders' deficit for the three-month period ended March 31, 2005, and the condensed consolidated statements of cash flows for the three-month periods ended March 31, 2005 and 2004. These interim condensed consolidated financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying condensed consolidated financial statements referred to above for them to be in conformity with accounting principles generally

NIGHTHAWK SYSTEMS, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
THREE MONTHS ENDED MARCH 31, 2005 AND 2004
(unaudited)

1. Organization, going concern, results of operations and management's plans

Organization

Nighthawk Systems, Inc. ("the Company") designs and manufactures intelligent remote power control products that are easy to use, inexpensive and can remotely control virtually any device from any location. The Company's proprietary, wireless products are ready to use upon purchase, so they are easily installed by anyone, regardless of technical ability, and are also easily integrated into third-party products, systems and processes. They allow for intelligent control by interpreting instructions sent via paging and satellite media, and executing the instructions by 'switching' the electrical current that powers the device, system or process. Nighthawk's intelligent products can be activated individually, in pre-defined groups, or en masse, and for specified time periods with a simple click of a mouse or by dialing a telephone number.

Edgar Filing: NIGHTHAWK SYSTEMS INC - Form 10QSB

Going concern, results of operations and management's plans

The Company incurred a net loss of approximately \$1.38 million during the year ended December 31, 2004 and a net loss of approximately \$626,000 during the quarter ended March 31, 2005. The Company had a stockholders' deficit and working capital deficiency of approximately \$1.24 million and \$1.04 million, respectively, as of December 31, 2004 and \$1.29 million and \$1.14 million respectively, as of March 31, 2005. These conditions raise substantial doubt about the Company's ability to continue as a going concern. Although no assurance can be given that such plans will be successfully implemented, management's plans to address these concerns include:

1. Raising working capital through additional borrowings.
2. Raising equity funding through sales of the Company's common stock.
3. Implementation of a sales and marketing plan.

In August 2004, the Company signed a financing arrangement with Dutchess Private Equities, II, L.P. ("Dutchess") which was amended on August 26, 2004 and on September 24, 2004. Under the terms of the amended arrangement, the Company received \$100,000 under a convertible debenture on August 11, 2004, \$25,000 on August 26, 2004, and \$125,000 under the debenture on September 27, 2004. Interest accrues on the debenture at an annual rate of 8%. The debenture can be converted into common shares anytime prior to its maturity on August 10, 2007 at the lesser of (i) 73% of the lowest closing bid price on the date of conversion, or (ii) twelve and a half cents (\$0.125). Any portion of the debenture that remains outstanding at August 10, 2007 will automatically convert into common shares. The number of shares converted at any time is limited so as not to exceed 4.99% of the outstanding shares of Nighthawk common stock outstanding. In addition, Dutchess was issued a warrant to purchase up to 250,000 shares of common stock at a price of twelve and a half cents (\$0.125) for a period of up to five years. Dutchess also required the Company to hire Edgarization, LLC for consulting services and Nighthawk issued the consulting company 500,000 shares of common stock. The Company recorded the fair value of these shares as prepaid consulting and will expense their value over the term of the agreement. The Company also signed an investment agreement under which Dutchess agreed to purchase up to \$10.0 million in common stock from the Company, at the Company's discretion, over the next three years, subject to certain limitations including the Company's then current trading volume.

Although the amount and timing of specific cash infusions available under the entire financing arrangement cannot be predicted with certainty, the arrangement represents a contractual commitment by Dutchess to provide funds to the Company.

On December 3, 2004 Dutchess loaned the Company an additional \$250,000. The note had no stated interest rate but had a face amount of \$300,000 and matured April 3, 2005. Under the terms of the note, Dutchess was issued 250,000 incentive shares of common stock. The Company recorded the fair value of these incentive shares as prepaid interest, and will expense their value over the term of the note. Dutchess also required the Company to hire Edgarization, LLC for consulting services and Nighthawk issued the consulting company 500,000 shares of common stock. The Company recorded the fair value of these shares as prepaid consulting and will expense their value over the term of the agreement. The implied annual rate of interest is 119.7%. The note was intended to be repaid via puts exercised under the investment agreement with the Company making payments of the greater of \$75,000 every 30 days or 50% of each put until the note is paid in full. The note was repaid on April 7, 2005 with a partial use of the proceeds of a new note.

On January 18, 2005, Dutchess loaned the Company an additional \$225,000. The note has no stated interest rate but has a face amount of \$270,000 and matures on May 18, 2005. Under the terms of the note, Dutchess was issued 250,000 incentive shares of common stock. The Company recorded the fair value of these

Edgar Filing: NIGHTHAWK SYSTEMS INC - Form 10QSB

incentive shares as prepaid interest, and will expense their value over the term of the note. Dutchess also required the Company to hire Edgarization, LLC for consulting services and Nighthawk issued the consulting company 500,000 shares of common stock. The Company recorded the fair value of these shares as prepaid consulting and will expense their value over the term of the agreement. The implied annual rate of interest is 194.5%.

On April 7, 2005, Dutchess loaned the Company an additional \$488,500. The note has no stated interest rate but has a face amount of \$586,200 and matures on June 7, 2005. A portion of the proceeds of this loan was used to repay the note dated December 3, 2004 with a face amount of \$300,000, which matured on April 3, 2005. Under the terms of the note, Dutchess was issued 250,000 incentive shares of common stock. The Company recorded the fair value of these incentive shares as prepaid interest, and will expense their value over the term of the note. Dutchess also required the Company to hire Edgarization, LLC for consulting services and Nighthawk issued the consulting company 300,000 shares of common stock. The Company recorded the fair value of these shares as prepaid consulting and will expense their value over the term of the agreement.

During the period from January 1, 2005 through March 31, 2005, the Company exercised five (5) puts to Dutchess totaling 1,071,310 shares for net proceeds of \$183,797. Of the total proceeds, \$125,633 was used to repay portions of previously issued notes to Dutchess and \$58,164 went to the Company.

On March 9, 2005, Dutchess exercised 250,000 warrants at \$0.125 each, for total proceeds of \$31,250, \$15,000 of which was applied to outstanding notes.

Also during the period from January 1, 2005 through March 31, 2005, Dutchess elected to convert a total of \$31,250 of the 36-month convertible note for 250,000 shares of the Company's common stock.

During the period from April 1, 2005 through May 5, 2005, the Company exercised one (1) put to Dutchess totaling 205,300 shares for proceeds of \$29,255.

During the period from April 1, 2005 through May 5, 2005, Dutchess elected to convert a total of \$76,250 of the 36-month convertible note for 625,000 shares of the Company's common stock.

Although no assurance may be given that it will be able to do so, the Company expects to be able to continue to access funds under this arrangement to help it fund near-term and long-term sales and marketing efforts, and to cover cash flow deficiencies.

The sales and marketing plan for 2005 includes the following:

- Hiring sales and marketing personnel. The Company increased its sales force in the first quarter of 2005 with experienced salespeople with the goal of effectively targeting existing and new markets.
- Product marketing including print media and attendance at trade shows. This method has proved the most effective for the Company to date, and it plans to increase its presence in these areas to attract new customers.
- An improved Internet presence. The Company launched a new website in May 2005 to improve content and to make the site more friendly to search engines. The Company has plans to add e-commerce functionality at a future date.
- Leveraging existing customer relationships by up-selling new products or fully integrating systems with the Company's products.

Edgar Filing: NIGHTHAWK SYSTEMS INC - Form 10QSB

- The establishment of distribution and dealer networks. Through an effective dealer network, the Company can increase awareness in its products and utilize a dealer's sales force to actively promote its products.
- New applications in irrigation control, civil defense and emergency management. The current product design can be altered with little cost to the Company to be effectively implemented into a wide array of fields. Through the commitment of funding, the Company can now research all possible applications and begin to market directly to new customers.
- The development and launch of a product designed to be used for multiple purposes by consumers.

In addition to the marketing and sales objectives, the Company has identified the following strategic goals for 2005:

- Joint ventures with wireless service providers and equipment manufacturers.
- The identification of complementary products and companies for potential acquisition.

The accompanying financial statements do not include any adjustments relating to the recoverability and classification of assets or the amounts of liabilities that might be necessary should the Company be unsuccessful in implementing these plans, or otherwise be unable to continue as a going concern.

2. Basis of presentation

The accompanying unaudited condensed consolidated financial statements, which include the accounts of Nighthawk Systems, Inc. and its subsidiary PCT (collectively referred to herein as "the Company"), have been prepared in accordance with accounting principles generally accepted in the U.S. for interim financial information. In the opinion of management, all adjustments (consisting of only normal recurring items), which are necessary for a fair presentation have been included. The results for interim periods are not necessarily indicative of results that may be expected for any other interim period or for the full year. These condensed consolidated financial statements should be read in conjunction with the financial statements and notes thereto included in the Company's Annual Report on Form 10-KSB for 2004 filed with the Securities and Exchange Commission (the "SEC").

3. Significant accounting policies

Revenue recognition

Revenue from product sales is recognized when all significant obligations of the Company have been satisfied. Revenues from equipment sales are recognized either on the completion of the manufacturing process, or upon shipment of the equipment to the customer, depending on the Company's contractual obligations. The Company occasionally contracts to manufacture items, bill for those items and then hold them for later shipment to customer-specified locations. The Company had no bill and hold sales at December 31, 2004 or March 31, 2005. Revenue related to airtime billing is recognized when the service is performed. Some customers pre-pay airtime on a quarterly or annual basis and the pre-paid portion is recorded as deferred revenue. Deferred revenue, included in accrued expenses on the balance sheet at March 31, 2005, is approximately \$15,800.

Provision for doubtful accounts

Edgar Filing: NIGHTHAWK SYSTEMS INC - Form 10QSB

The Company reviews accounts receivable periodically for collectibility and establishes an allowance for doubtful accounts and records bad debt expense when deemed necessary.

Concentrations

Financial instruments that potentially subject the Company to concentrations of credit risk consist primarily of trade accounts receivable. Receivables arising from sales to customers are not collateralized and, as a result, management continually monitors the financial condition of its customers to reduce the risk of loss. At March 31, 2005, the Company had approximately \$81,500 in accounts receivable, net of the allowance for doubtful accounts. Approximately \$37,655 of this balance was from one customer, which was collected subsequent to March 31, 2005.

During the three months ended March 31, 2005, one customer accounted for approximately 46% of total revenue. During the three months ended March 31, 2004, one customer accounted for approximately 53% of total revenue.

During the three months ended March 31, 2005, the Company's largest supplier accounted for approximately 68% of the Company's purchases of pre-manufactured component materials.

Inventories

Inventories consist of parts and pre-manufactured component materials and finished goods. Inventories are valued at the lower of cost or market using the first-in, first-out (FIFO) method.

Income taxes

Deferred tax assets and liabilities are recorded for the estimated future tax effects of temporary differences between the tax basis of assets and liabilities and amounts reported in the accompanying balance sheets, and for operating loss and tax credit carry forwards. The change in deferred tax assets and liabilities for the period measures the deferred tax provision or benefit for the period. Effects of changes in enacted tax laws on deferred tax assets and liabilities are reflected as adjustments to the tax provision or benefit in the period of enactment. The Company's deferred tax assets have been completely reduced by a valuation allowance because management does not believe realization of the deferred tax assets is sufficiently assured at the balance sheet date.

Net loss per share

Basic net loss per share is computed by dividing the net loss applicable to common stockholders by the weighted-average number of shares of common stock outstanding for the year. Diluted net loss per share reflects the potential dilution that could occur if dilutive securities were exercised or converted into common stock or resulted in the issuance of common stock that then shared in the earnings of the Company, unless the effect of such inclusion would reduce a loss or increase earnings per share. For the quarter ended March 31, 2005 and the year ended December 31, 2004, the effect of the inclusion of dilutive shares would have resulted in a decrease in loss per share. Accordingly, the weighted average shares outstanding have not been adjusted for dilutive shares.

Use of estimates

The preparation of the financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses

Edgar Filing: NIGHTHAWK SYSTEMS INC - Form 10QSB

during the reporting period. Actual results could differ from those estimates.

Reclassifications

Certain amounts reported in the consolidated financial statements for the three months ended March 31, 2004 have been reclassified to conform to the March 31, 2005 presentation.

Stock-based compensation

The Company has adopted Statement of Financial Accounting Standards No. 123, "Accounting for Stock-Based Compensation" ("SFAS 123"). The provisions of SFAS 123 allow companies to either expense the estimated fair value of stock options or to continue to follow the intrinsic value method set forth in Accounting Principles Bulletin Opinion No. 25, "Accounting for Stock Issued to Employees" ("APB 25") but disclose the pro forma effects on net income (loss) had the fair value of the options been expensed. The Company has elected to continue to apply APB 25 in accounting for its employee stock option incentive plans.

Under APB 25, where the exercise price of the Company's employee stock options equals the market price of the underlying stock on the date of grant, no compensation is recognized. As all employee options were issued at or above market during 2004 and the first quarter of 2005, no compensation expense was recognized in either of the periods. If compensation expense for the Company's stock-based compensation plans had been determined consistent with SFAS 123, the Company's net loss and net loss per share including pro forma results would have been the amounts indicated below:

	Three months ended March 31,	
	2005	2004
Net loss applicable to common stockholders:		
As reported	\$(626,499)	\$(267,199)
Total stock-based employee compensation expense determined under fair value based method for all employee awards, net.	(6,148)	(3,454)
Pro forma net loss.	\$(632,647)	\$(270,653)
 Net loss per share:		
As reported:		
Basic and diluted	\$ (0.02)	\$ (0.01)
Pro forma:		
Basic and diluted	\$ (0.02)	\$ (0.01)

The pro forma effect on net loss may not be representative of the pro forma effect on net income or loss of future years due to, among other things: (i) the vesting period of the stock options and the (ii) fair value of additional stock options in future years.

For the purpose of the above table, the fair value of each option grant is estimated as of the date of grant using the Black-Scholes option-pricing model

Edgar Filing: NIGHTHAWK SYSTEMS INC - Form 10QSB

with the following assumptions:

Three months ended March 31,

Black-Scholes Assumptions

	2005	2004
	-----	-----
Dividend yield	0.00%	0.00%
Expected volatility . . .	1.31	1.122
Risk-free interest rate .	4.50%	4.50%
Expected life in years . .	2 years	3 years

The weighted average fair value at date of grant for options granted during the first quarter of 2005 was \$0.132 per share using the above assumptions. There were no options granted to employees during the first quarter of 2004.

Recently issued accounting pronouncements

In December 2004, the Financial Accounting Standards Board ("FASB") issued SFAS No. 123R "Share-Based Payment", which addresses the accounting for share-based payment transactions. SFAS 123R eliminates the ability to account for share-based compensation transactions using APB 25, and instead, generally requires that such transactions be accounted and recognized in the statement of operations based on their fair value. SFAS No. 123R will be effective for small business issuers as of the beginning of the first interim or annual reporting period that begins after December 15, 2005. SFAS No. 123R offers the Company alternative methods of adopting this standard. The Company has not yet determined which alternative method it will use. Depending upon the number and terms of options that may be granted in future periods, the implementation of this standard could have a material impact on the Company's financial position and results of operations.

3. Related party transactions

During the year ended December 31, 2004, a business partner of the Company's Chairman billed the Company \$20,000 for consulting services. The liability was settled for 175,000 shares of the Company's common stock in the first quarter of 2005.

4. Notes payable
