UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

Form 10 - KSB

(Mark One)

ANNUAL REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the Fiscal Period year ended June 30th, 2012

TRANSITION REPORT UNDER SECTION 13 OR 15 (d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number: **000-51974**

Toro Ventures Inc.

(Exact name of small business issuer as specified in its charter)

Nevada

(State or other jurisdiction of incorporation or organization)

N/A

(IRS Employer Number)

Suite 632, 22837 Pacific Coast Highway, Malibu, California, 90265

(Address of principal executive office)

310-887-6391

(Issuer's telephone number)

n/a

(Former name, former address and former fiscal year, if changed since last report)

Securities registered under Section 12(b) of the Exchange Act: **None**

Securities registered under Section 12(g) of the Exchange Act: **Common Stock, \$0.001**

Check whether the issuer (1) filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes [No
x] []

Check if there is no disclosure of delinquent filers in response to Item 405 Regulation S-B is not containing in this form, and no disclosure will be contained, to the best of the registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-KSB or any amendments to this Form 10-KSB

Indicate by check mark whether the company is a shell company (as defined in Rule 12b-2 of the Exchange Act) Yes No

State issuer's revenues for its most recent fiscal year - **\$0**

State the aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was sold, or the average bid and asked price of such common equity, as of a specified date within the past 60 days. (See definition of affiliate in Rule 12b-2 of the Exchange Act.)

Aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference as of June 10, 2013 is \$128,760.

State the number of shares outstanding of each of the issuer's classes of common equity, as of the latest practicable date.

As of June 10, 2013 there are 16,095,000 common shares outstanding.

Transitional Small Business Disclosure Format (Check One): Yes No

PART I

Item 1. Description of Business

Toro Ventures Inc. is in the acquisition and exploration of oil and gas properties. Toro Ventures Inc. was incorporated in the state of Nevada on April 11, 2005. Our principal office is located at Suite 632, 22837 Pacific Coast Highway, Malibu, California, 90265. Our telephone number is 310-887-6391

Business

Our business strategy is to acquire interest in the properties of, and working interests in the production owned by, established oil and gas production companies, whether public or private, in the United States oil producing areas. We believe such opportunities exist in the United States. We also believe that these opportunities have considerable future potential for the development of additional oil reserves. Such new reserves might come from the development of existing but as yet undeveloped reserves as well as from future success in exploration.

When and if funding becomes available, we plan to acquire high-quality oil and gas properties, primarily properties which have "proven producing and proven undeveloped reserves." We will also explore low-risk development drilling and work-over opportunities with experienced, well-established operators.

Competition

Toro Ventures Inc. operates in a highly competitive environment. We compete with major and independent oil and natural gas companies, many of whom have financial and other resources substantially in excess of those available to us. These competitors may be better positioned to take advantage of industry opportunities and to withstand changes affecting the industry, such as fluctuations in oil and natural gas prices and production, the availability of alternative energy sources and the application of government regulation.

Compliance with Government Regulation

The availability of a market for future oil and gas production from possible U.S. assets will depend upon numerous factors beyond our control. These factors may include, amongst others, regulation of oil and natural gas production, regulations governing environmental quality and pollution control, and the effects of regulation on the amount of oil and natural gas available for sale, the availability of adequate pipeline and other transportation and processing facilities and the marketing of competitive fuels. These regulations generally are intended to prevent waste of oil and natural gas and control contamination of the environment.

We expect that our sales of crude oil and other hydrocarbon liquids from our future U.S.-based production will not be regulated and will be made at market prices. However, the price we would receive from the sale of these products may be affected by the cost of transporting the products to market via pipeline and marine transport.

Environmental Regulations

Our U.S. assets could be subject to numerous laws and regulations governing the discharge of materials into the environment or otherwise relating to environmental protection. These laws and regulations may require the acquisition of a permit before drilling commences, restrict the types, quantities and concentration of various substances that can be released into the environment in connection with drilling and production activities, limit or prohibit drilling activities on certain lands within wilderness, wetlands and other protected areas, require remedial measures to mitigate pollution from former operations, such as pit closure and plugging abandoned wells, and impose substantial liabilities for pollution resulting from production and drilling operations. Public interest in the protection of the environment has increased dramatically in recent years. The worldwide trend of more expansive and stricter environmental legislation and regulations applied to the oil and natural gas industry could continue, resulting in increased costs of doing business and consequently affecting profitability. To the extent laws are enacted

or other governmental action is taken that restricts drilling or imposes more stringent and costly waste handling, disposal and cleanup requirements, our business and prospects could be adversely affected.

Operating Hazards and Insurance

The oil and natural gas business involves a variety of operating hazards and risks such as well blowouts, craterings, pipe failures, casing collapse, explosions, uncontrollable flows of oil, natural gas or well fluids, fires, formations with abnormal pressures, pipeline ruptures or spills, pollution, releases of toxic gas and other environmental hazards and risks. These hazards and risks could result in substantial losses to us from, among other things, injury or loss of life, severe damage to or destruction of property, natural resources and equipment, pollution or other environmental damage, clean-up responsibilities, regulatory investigation and penalties and suspension of operations.

In accordance with customary industry practices, we expect to maintain insurance against some, but not all, of such risks and losses. There can be no assurance that any insurance we obtain would be adequate to cover any losses or liabilities. We cannot predict the continued availability of insurance or the availability of insurance at premium levels that justify its purchase. The occurrence of a significant event not fully insured or indemnified against could materially and adversely affect our financial condition and operations.

Pollution and environmental risks generally are not fully insurable. The occurrence of an event not fully covered by insurance could have a material adverse effect on our future financial condition. If we were unable to obtain adequate insurance, we could be forced to participate in all of our activities on a non-operated basis, which would limit our ability to control the risks associated with oil and natural gas operations.

Employees

We currently do not have any other employees other than the Toro's sole officer and director.

Item 1A. Risk Factors

We are in the oil business and we expect to incur operating losses for the foreseeable future.

We were incorporated on April 11, 2005 and to date have recently been involved in the organizational activities, and acquisition of our claims. We have no way to evaluate the likelihood that our business will be successful. We have earned minimal revenues as of the date of this annual report. Potential investors should be aware of the difficulties normally encountered by exploration companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration and development of the properties that we plan to undertake. These potential problems include, but are not limited to, unanticipated problems relating to exploration, and additional costs and

expenses that may exceed current estimates. Prior to completion of our exploration stage, we anticipate that we will incur increased operating expenses without greatly increasing our revenues. We expect to incur significant losses into the foreseeable future. We recognize that if production is not forthcoming, we will not be able to continue business operations. There is no history upon which to base any assumption as to the likelihood that we will prove successful, and it is doubtful that we will generate significant revenues to achieve profitable operations. If we are unsuccessful in addressing these risks, our business will most likely fail.

We have yet to earn significant revenue to achieve profitability and our ability to sustain our operations is dependent on our ability to raise additional financing to complete our program if warranted. As a result, our accountant believes there is substantial doubt about our ability to continue as a going concern.

We have accrued accumulated net losses of \$748,287 for the period from inception (April 11, 2005) to June 30, 2012 and have revenues of \$Nil to date. Our future is dependent upon our ability to obtain financing and upon future profitable operations from the development of our business. These factors raise substantial doubt that we will be able to continue as a going concern. Our independent auditors, has expressed substantial doubt about our ability to continue as a going concern. This opinion could materially limit our ability to raise additional funds by issuing new debt or equity securities or otherwise. If we fail to raise sufficient capital when needed, we will not be able to complete our business plan. As a result we may have to liquidate our business and you may lose your investment. You should consider our auditor's comments when determining if an investment in our company is suitable.

Because of the unique difficulties and uncertainties inherent in oil and gas ventures, we face a high risk of business failure.

You should be aware of the difficulties normally encountered by exploration companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration and development of the properties that we plan to undertake. These potential problems include, but are not limited to, unanticipated problems relating to exploration, and additional costs and expenses that may exceed current estimates. If the results of our development program do not reveal viable commercialization options, we may decide to abandon our claim and acquire new claims. Our ability to acquire additional claims will be dependent upon our possessing adequate capital resources when needed. If no funding is available, we may be forced to abandon our operations.

Because of the inherent dangers involved in oil and gas operations, there is a risk that we may incur liability or damages as we conduct our business.

The extracting of oil and gas involves numerous hazards. As a result, we may become subject to liability for such hazards, including pollution, cave-ins and other hazards against which we cannot insure or against which we may elect not to insure. At the present time we have no insurance to cover against these hazards. The payment of such liabilities may result in our inability to complete our planned program and/or obtain additional financing to fund our program.

As we undertake development of our properties, we will be subject to compliance with government regulation that may increase the anticipated cost of our program.

There are several governmental regulations that materially restrict oil extraction. We will be subject to regulations and laws as we carry out our program. We may be required to obtain work permits, post bonds and perform remediation work for any physical disturbance to the area in order to comply with these laws. The cost of complying with permit and regulatory environment laws will be greater because the impact on the project area is greater. Permits and regulations will control all aspects of the production program if the project continues to that stage. Examples of regulatory requirements can include:

- (a) Water discharge will have to meet drinking water standards;
- (b) Dust generation will have to be minimal or otherwise re-mediated;
- (c) Dumping of material on the surface will have to be re-contoured and re-vegetated with natural vegetation;
- (d) An assessment of all material to be left on the surface will need to be environmentally benign;
- (e) Ground water will have to be monitored for any potential contaminants;
- (f) The socio-economic impact of the project will have to be evaluated and if deemed negative, will have to be remediated; and

There is a risk that new regulations could increase our costs of doing business and prevent us from carrying out our exploration program. We will also have to sustain the cost of reclamation and environmental remediation for all exploration work undertaken. Both reclamation and environmental remediation refer to putting disturbed ground back as close to its original state as possible. Other potential pollution or damage must be cleaned-up and renewed along standard guidelines outlined in the usual permits. Reclamation is the process of bringing the land back to its natural state after completion of exploration activities. Environmental remediation refers to the physical activity of taking steps to remediate, or remedy, any environmental damage caused. The amount of these costs is not known at this time as we do not know the extent of the exploration program that will be undertaken beyond completion of the

recommended work program. If remediation costs exceed our cash reserves we may be unable to complete our exploration program and have to abandon our operations.

If access to our properties is restricted by inclement weather, we may be delayed in any future drilling efforts.

It is possible that adverse weather could cause accessibility to our properties difficult and this would delay in our timetables.

Based on consumer demand, the growth and demand for any oil or gas we may recover from our claims may be slowed, resulting in reduced revenues to the company.

Our success will be dependent on the growth of demand for petroleum products. If consumer demand slows our revenues may be significantly affected. This could limit our ability to generate revenues and our financial condition and operating results may be harmed.

Because our current officers and directors have other business interests, they may not be able or willing to devote a sufficient amount of time to our business operations, causing our business to fail.

Our current officers and directors currently devotes up to 10 hours per week providing services to the company. While they presently possesses adequate time to attend to our interest, it is possible that the demands on them from other obligations could increase, with the result that they would no longer be able to devote sufficient time to the management of our business. This could negatively impact our business development.

WE MAY BE UNABLE TO OBTAIN ADDITIONAL CAPITAL THAT WE MAY REQUIRE TO IMPLEMENT OUR BUSINESS PLAN. THIS WOULD RESTRICT OUR ABILITY TO GROW.

The proceeds from our private offerings completed in 2007 and funds borrowed since this private offering, provide us with a limited amount of working capital and is not sufficient to fund our proposed operations. We will require additional capital to continue to operate our business and our proposed operations. We may be unable to obtain additional capital as and when required.

Future acquisitions and future development, production and marketing activities, as well as our administrative requirements (such as salaries, insurance expenses and general overhead expenses, as well as legal compliance costs and accounting expenses) will require a substantial amount of additional capital and cash flow.

We may not be successful in locating suitable financing transactions in the time period required or at all, and we may not obtain the capital we require by other means. If we do not succeed in raising additional capital, the capital we have received to date may not be sufficient to fund our operations going forward without obtaining additional capital financing.

Any additional capital raised through the sale of equity may dilute your ownership percentage. This could also result in a decrease in the fair market value of our equity securities because our assets would be owned by a larger pool of outstanding equity. The terms of securities we issue in future capital transactions may be more favorable to our new investors, and may include preferences, superior voting rights and the issuance of warrants or other derivative securities, and issuances of incentive awards under equity employee incentive plans, which may have a further dilutive effect.

Our ability to obtain needed financing may be impaired by such factors as the capital markets (both generally and in the resource industry in particular), our status as a new enterprise without a demonstrated operating history, the location of our properties and the price of oil and gas on the commodities markets (which will impact the amount of

asset-based financing available to us) or the retention or loss of key management. Further, if oil and gas prices on the commodities markets decrease, then our revenues will likely decrease, and such decreased revenues may

7

increase our requirements for capital. If the amount of capital we are able to raise from financing activities is not sufficient to satisfy our capital needs, we may be required to cease our operations.

We may incur substantial costs in pursuing future capital financing, including investment banking fees, legal fees, accounting fees, securities law compliance fees, printing and distribution expenses and other costs. We may also be required to recognize non-cash expenses in connection with certain securities we may issue, such as convertible notes and warrants, which may adversely impact our financial condition.

AMENDMENTS TO CURRENT LAWS AND REGULATIONS GOVERNING OUR PROPOSED OPERATIONS COULD HAVE A MATERIAL ADVERSE IMPACT ON OUR PROPOSED BUSINESS.

Our business will be subject to substantial regulation under state and federal laws relating to the exploration for, and the development, upgrading, marketing, pricing, taxation, and transportation of oil and other matters. Amendments to current laws and regulations governing operations and activities of resource operations could have a material adverse impact on our proposed business. In addition, there can be no assurance that income tax laws, royalty regulations and government incentive programs related to the resource industry generally, will not be changed in a manner which may adversely affect us and cause delays, inability to complete or abandonment of properties.

Permits, leases, licenses, and approvals are required from a variety of regulatory authorities at various stages of mining and extraction. There can be no assurance that the various government permits, leases, licenses and approvals sought will be granted to us or, if granted, will not be cancelled or will be renewed upon expiration.

ESTIMATES OF OIL RESERVES THAT WE MAKE MAY BE INACCURATE WHICH COULD HAVE A MATERIAL ADVERSE EFFECT ON US

There are numerous uncertainties inherent in estimating quantities of oil resources, including many factors beyond our control, and no assurance can be given that expected levels of resources or recovery of oil will be realized. In general, estimates of recoverable oil resources are based upon a number of factors and assumptions made as of the date on which resource estimates are determined, such as geological and engineering estimates which have inherent uncertainties and the assumed effects of regulation by governmental agencies and estimates of future commodity prices and operating costs, all of which may vary considerably from actual results. All such estimates are, to some degree, uncertain and classifications of resources are only attempts to define the degree of uncertainty involved. For these reasons, estimates of the recoverable oil, the classification of such resources based on risk of recovery, prepared by different engineers or by the same engineers at different times, may vary substantially.

ABANDONMENT AND RECLAMATION COSTS ARE UNKNOWN AND MAY BE SUBSTANTIAL.

We will be responsible for compliance with terms and conditions of environmental and regulatory approvals and all laws and regulations regarding the abandonment of our properties and reclamation of lands at the end of their economic life, which abandonment and reclamation costs may be substantial. A breach of such legislation and/or regulations may result in the issuance of remedial orders, the suspension of approvals, or the imposition of fines and penalties, including an order for cessation of operations at the site until satisfactory remedies are made. It is not possible to estimate with certainty the abandonment and reclamation costs since they will be a function of regulatory requirements at the time.

INCREASES IN OUR OPERATING EXPENSES WILL IMPACT OUR OPERATING RESULTS AND FINANCIAL CONDITION.

Extraction, development, production, marketing (including distribution costs) and regulatory compliance costs (including taxes) will substantially impact the net revenues we derive from oil that we produce. These costs are

subject to fluctuations and variation in different locales in which we will operate, and we may not be able to predict or control these costs. If these costs exceed our expectations, this may adversely affect our results of operations. In addition, we may not be able to earn net revenue at our predicted levels, which may impact our ability to satisfy our obligations.

PENALTIES WE MAY INCUR COULD IMPAIR OUR BUSINESS.

Failure to comply with government regulations could subject us to civil and criminal penalties, could require us to forfeit property rights, and may affect the value of our assets. We may also be required to take corrective actions, such as installing additional equipment or taking other actions, each of which could require us to make substantial capital expenditures. We could also be required to indemnify our employees in connection with any expenses or liabilities that they may incur individually in connection with regulatory action against them. As a result, our future business prospects could deteriorate due to regulatory constraints, and our profitability could be impaired by our obligation to provide such indemnification to our employees.

ENVIRONMENTAL RISKS MAY ADVERSELY AFFECT OUR BUSINESS.

Oil extraction operations present environmental risks and hazards and are subject to environmental regulation pursuant to a variety of federal, state, and local laws and regulations. Environmental legislation provides for, among other things, restrictions and prohibitions on spills, releases or emissions of various substances produced in association with resource operations. The legislation also requires that facility sites be operated, maintained, abandoned and reclaimed to the satisfaction of applicable regulatory authorities. Compliance with such legislation can require significant expenditures and a breach may result in the imposition of fines and penalties, some of which may be material. Environmental legislation is evolving in a manner we expect may result in stricter standards and enforcement, larger fines and liability and potentially increased capital expenditures and operating costs.

The discharge of pollutants into the air, soil or water may give rise to liabilities to governments and third parties and may require us to incur costs to remedy such discharges. The application of environmental laws to our business may cause us to curtail our production or increase the costs of our production, development or exploration activities.

CHALLENGES TO TITLE TO OUR PROPERTIES MAY IMPACT OUR FINANCIAL CONDITION.

Title to oil interests is often not capable of conclusive determination without incurring substantial expense. While we intend to make appropriate inquiries into the title of properties and other development rights we acquire, title defects may exist. In addition, we may be unable to obtain adequate insurance for title defects, on a commercially reasonable basis or at all. If title defects do exist, it is possible that we may lose all or a portion of our right, title and interests in and to the properties to which the title defects relate.

THE LIMITED TRADING OF OUR COMMON STOCK ON THE OTC BULLETIN BOARD MAY IMPAIR YOUR ABILITY TO SELL YOUR SHARES.

There have been thin volumes of trading of our common stock. The lack of trading of our common stock and the low volume of any future trading may impair your ability to sell your shares at the time you wish to sell them or at a price that you consider reasonable. Such factors may also impair our ability to raise capital by selling shares of capital stock and may impair our ability to acquire other companies or technologies by using common stock as consideration.

THE MARKET PRICE OF OUR COMMON STOCK IS LIKELY TO BE HIGHLY VOLATILE AND SUBJECT TO WIDE FLUCTUATIONS.

Assuming we are able to establish an active trading market for our common stock, the market price of our common stock is likely to be highly volatile and could be subject to wide fluctuations in response to a number of factors that are beyond our control, including:

- * dilution caused by our issuance of additional shares of common stock and other forms of equity securities, which we expect to make in connection with future capital financings to fund our operations and growth, to attract and retain valuable personnel and in connection with future strategic partnerships with other companies;
- * announcements of acquisitions, reserve discoveries or other business initiatives by our competitors;
- * fluctuations in revenue from our business as new reserves come to market;
- * changes in the market for commodities or in the capital markets generally;
- * quarterly variations in our revenues and operating expenses;
- * changes in the valuation of similarly situated companies, both in our industry and in other industries;
- * changes in analysts' estimates affecting us, our competitors or our industry;
- * changes in the accounting methods used in or otherwise affecting our industry;
- * additions and departures of key personnel;
- * fluctuations in interest rates and the availability of capital in the capital markets; and

These and other factors are largely beyond our control, and the impact of these risks, singly or in the aggregate, may result in material adverse changes to the market price of our common stock and our results of operations and financial condition.

OUR OPERATING RESULTS MAY FLUCTUATE SIGNIFICANTLY, AND THESE FLUCTUATIONS MAY CAUSE OUR STOCK PRICE TO DECLINE.

Our operating results will likely vary in the future primarily as the result of fluctuations in our revenues and operating expenses, expenses that we incur, the price of oil and gas in the commodities markets and other factors. If our results of operations do not meet the expectations of current or potential investors, the price of our common stock may decline.

WE DO NOT EXPECT TO PAY DIVIDENDS IN THE FORESEEABLE FUTURE.

We do not intend to declare dividends for the foreseeable future, as we anticipate that we will reinvest any future earnings in the development and growth of our business. Therefore, investors will not receive any funds unless they sell their common stock, and stockholders may be unable to sell their shares on favorable terms or at all. Investors cannot be assured of a positive return on investment or that they will not lose the entire amount of their investment in the common stock.

APPLICABLE SEC RULES GOVERNING THE TRADING OF "PENNY STOCKS" WILL LIMIT THE TRADING AND LIQUIDITY OF OUR COMMON STOCK, WHICH MAY AFFECT THE TRADING PRICE OF OUR COMMON STOCK.

Our common stock is presently considered to be a "penny stock" and is subject to SEC rules and regulations which impose limitations upon the manner in which such shares may be publicly traded and regulate broker-dealer practices

in connection with transactions in "penny stocks." Penny stocks generally are equity securities with a price of less than \$5.00 (other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or system). The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document that provides information about penny stocks and the risks in the penny stock market. The broker-dealer must also provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction, and monthly account statements showing the market value of each penny stock held in the customer's account. In addition, the penny stock rules generally require that prior to a transaction in a penny

stock, the broker-dealer make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for a stock that becomes subject to the penny stock rules which may increase the difficulty investors may experience in attempting to liquidate such securities.

FORWARD-LOOKING STATEMENTS

This Form 10-K contains forward-looking statements that involve risks and uncertainties. We use words such as anticipate, believe, plan, expect, future, intend and similar expressions to identify such forward-looking statements. You should not place too much reliance on these forward-looking statements. Our actual results are likely to differ materially from those anticipated in these forward-looking statements for many reasons.

Item 2: Description of Property

Corporate Office

The Company's headquarters and executive offices are located at Suite 632, 22837 Pacific Coast Highway, Malibu, California, 90265. Our telephone number is 310-887-6391. Our office space is currently rented on a month to month basis.

Oil and Gas Interests

By a letter of intent dated March 26, 2011, the Company acquired a 15% working interest in the Quinlan #3 Oil and Gas lease in Pottowatomie County, Oklahoma in consideration for the payments totaling \$67,500. The funding for this acquisition was derived from a private placement of 33,750 shares of our common stock.

By a turnkey agreement effectively dated March 29, 2011, the Company acquired a 60% working interest in an oil and gas leases known as the Crown Oil and Gas Lease in Pottowatomie County, Oklahoma for \$250,000. The funding for this acquisition was derived from a private placement of 250,000 shares of our common stock.

Bankruptcy or similar procedure

We have not been the subject of a bankruptcy, receivership or similar proceedings.

Competition and Markets

We face competition from other oil and natural gas companies in all aspects of our business, including acquisition of producing properties and oil and natural gas leases, marketing of oil and natural gas, and obtaining goods, services and labor. Many of our competitors have substantially larger financial and other resources than we have. Factors that affect our ability to acquire producing properties include available funds, available information about prospective properties and our limited number of employees.

The availability of a ready market for and the price of any hydrocarbons produced will depend on many factors beyond our control including, but not limited to, the amount of domestic production and imports of foreign oil and liquefied natural gas, the marketing of competitive fuels, the proximity and capacity of natural gas pipelines, the availability of transportation and other market facilities, the demand for hydrocarbons, the effect of federal and state regulation of allowable rates of production, taxation, the conduct of drilling operations and federal regulation of natural gas. All of these factors, together with economic factors in the marketing arena, generally affect the supply of and/or demand for oil and natural gas and thus the prices available for sales of oil and natural gas.

Regulatory Considerations

11

Proposals and proceedings that might affect the oil and gas industry are periodically presented to Congress, the Federal Energy Regulatory Commission (“FERC”), the Minerals Management Service (“MMS”), state legislatures and commissions and the courts. We cannot predict when or whether any such proposals may become effective. This industry is heavily regulated. There is no assurance that the regulatory approach currently pursued by various agencies will continue indefinitely. Notwithstanding the foregoing, except for the water quality issue described below, we currently do not anticipate that compliance with existing federal, state and local laws, rules and regulations, will have a material or significantly adverse effect upon our capital expenditures, earnings or competitive position. No material portion of our business is subject to renegotiation of profits or termination of contracts or subcontracts at the election of the federal government.

Our operations are subject to various types of regulation at the federal, state and local levels. This regulation includes requiring permits for drilling wells, maintaining bonding requirements in order to drill or operate wells and regulating the location of wells, the method of drilling and casing wells, the surface use and restoration of properties upon which wells are drilled, the plugging and abandoning of wells and the disposal of fluids used or generated in connection with operations. Our operations are also subject to various conservation laws and regulations. These include the regulation of the size of drilling and spacing units or proration units and the density of wells which may be drilled and the unitization or pooling of oil and natural gas properties. In addition, state conservation laws sometimes establish maximum rates of production from oil and natural gas wells, generally prohibit the venting or flaring of natural gas and impose certain requirements regarding the ratability of production. The effect of these regulations may limit the amount of oil and natural gas we can produce from our wells in a given state and may limit the number of wells or the locations at which we can drill.

Currently, there are no federal, state or local laws that regulate the price for our sales of natural gas, natural gas liquids, crude oil or condensate. However, the rates charged and terms and conditions for the movement of gas in interstate commerce through certain intrastate pipelines and production area hubs are subject to regulation under the Natural Gas Policy Act of 1978, as amended. Pipeline and hub construction activities are, to a limited extent, also subject to regulations under the Natural Gas Act of 1938, as amended. While these controls do not apply directly to us, their effect on natural gas markets can be significant in terms of competition and cost of transportation services, which in turn can have a substantial impact on our profitability and costs of doing business. Additional proposals and proceedings that might affect the natural gas and crude oil extraction industry are considered from time to time by Congress, FERC, state regulatory bodies and the courts. We cannot predict when or if any such proposals might become effective and their effect, if any, on our operations. We do not believe that we will be affected by any action taken in any materially different respect from other crude oil and natural gas producers, gatherers and marketers with whom we compete.

State regulation of gathering facilities generally includes various safety, environmental and in some circumstances, nondiscriminatory take requirements. This regulation has not generally been applied against producers and gatherers of natural gas to the same extent as processors, although natural gas gathering may receive greater regulatory scrutiny in the future.

Various federal, state and local laws regulating the discharge of materials into the environment, or otherwise relating to the protection of the environment, directly impact oil and natural gas exploration, development and production operations, and consequently may impact our operations and costs. These regulations include, among others, (i) regulations by the Environmental Protection Agency (“EPA”), and various state agencies regarding approved methods of disposal for certain hazardous and non-hazardous wastes; (ii) the Comprehensive Environmental Response, Compensation and Liability Act, and analogous state laws, which regulate the removal or remediation of previously disposed wastes (including wastes disposed of or released by prior owners or operators), property contamination (including groundwater contamination), and remedial plugging operations to prevent future contamination; (iii) the Clean Air Act and comparable state and local requirements, which may require certain pollution controls with respect to air emissions from our operations; (iv) the Oil Pollution Act of 1990, which contains numerous requirements

relating to the prevention of and response to oil spills into waters of the United States; (v) the Resource Conservation and Recovery Act, which is the principal federal statute governing the treatment, storage and disposal of hazardous wastes.

12

To date, compliance with environmental laws and regulations has not required the expenditure of any material amount of money. Since environmental laws and regulations are periodically amended, we are unable to predict the ultimate cost of compliance. To our knowledge, other than the potential water quality issue described above, there are currently no material adverse environmental conditions that exist on any of our properties and there are no current or threatened actions or claims by any local, state or federal agency, or by any private landowner against us pertaining to such a condition. Further, we are not aware of any currently existing condition or circumstance that may give rise to such actions or claims in the future.

Employees

The Company has no full time employees and one part time employee..

Research and Development Expenditures

We have not incurred any research or development expenditures since our incorporation.

Patents and Trademarks

We do not own, either legally or beneficially, any patents or trademarks.

Reports to Securities Holders

We provide an annual report that includes audited financial information to our shareholders. We will make our financial information equally available to any interested parties or investors through compliance with the disclosure rules of Regulation S-K for a small business issuer under the Securities Exchange Act of 1934. We are subject to disclosure filing requirements including filing Form 10K annually and Form 10Q quarterly. In addition, we will file Form 8K and other proxy and information statements from time to time as required. We do not intend to voluntarily file the above reports in the event that our obligation to file such reports is suspended under the Exchange Act. The public may read and copy any materials that we file with the Securities and Exchange Commission, ("SEC"), at the SEC's Public Reference Room at 100 F Street NE, Washington, DC 20549. The public may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. The SEC maintains an Internet site (<http://www.sec.gov>) that contains reports, proxy and information statements, and other information regarding issuers that file electronically with the SEC.

Item 3: Legal Proceedings

There are no existing, pending or threatened legal proceedings involving Toro Ventures Inc., or against any of our officers or directors as a result of their involvement with the Company.

Item 4: Submission of Matters to a Vote of Security Holders

There were no matters submitted to a vote of security holders during the year ended June 30, 2012.

PART II

Item 5: Market for Common Equity, Related Stockholder Matters and Small Business Issuer Purchases of Equity Securities

Market for the Common Stock

13

Our common stock is traded on the OTC Bulletin Board and is quoted under the symbol "TORO.OB."

No Public Market for Common Stock

As of the date of this report we have approximately 90 shareholders of record. We have paid no cash dividends and have no outstanding options. We have no securities authorized for issuance under equity compensation plans.

The SEC has adopted rules that regulate broker-dealer practices in connection with transactions in penny stocks. Penny stocks are generally equity securities with a price of less than \$5.00, other than securities registered on certain national securities exchanges or quoted on the NASDAQ system, provided that current price and volume information with respect to transactions in such securities is provided by the exchange or quotation system. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock, to deliver a standardized risk disclosure document prepared by the SEC, that: (a) contains a description of the nature and level of risk in the market for penny stocks in both public offerings and secondary trading; (b) contains a description of the broker's or dealer's duties to the customer and of the rights and remedies available to the customer with respect to a violation to such duties or other requirements of Securities' laws; (c) contains a brief, clear, narrative description of a dealer market, including bid and ask prices for penny stocks and the significance of the spread between the bid and ask price; (d) contains a toll-free telephone number for inquiries on disciplinary actions; (e) defines significant terms in the disclosure document or in the conduct of trading in penny stocks; and (f) contains such other information and is in such form, including language, type, size and format, as the SEC shall require by rule or regulation. The broker-dealer also must provide, prior to effecting any transaction in a penny stock, the customer with: (a) bid and offer quotations for the penny stock; (b) the compensation of the broker-dealer and its salesperson in the transaction; (c) the number of shares to which such bid and ask prices apply, or other comparable information relating to the depth and liquidity of the market for such stock; and (d) monthly account statements showing the market value of each penny stock held in the customer's account. In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from those rules; the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written acknowledgment of the receipt of a risk disclosure statement, a written agreement to transactions involving penny stocks, and a signed and dated copy of a suitably written statement.

These disclosure requirements may have the effect of reducing the trading activity in the secondary market for our stock if it becomes subject to these penny stock rules. Therefore, if our common stock becomes subject to the penny stock rules, stockholders may have difficulty selling those securities.

Dividends

Our dividend policy for holders of common stock is to retain earnings to support the expansion of operations through organic growth or by strategic acquisitions. We have not previously paid any cash dividends, and we do not intend to pay cash dividends in the near future. Any future cash dividends will depend on our future earnings, capital requirements, financial condition and other factors deemed relevant by the Board of Directors.

Recent Issuances of Unregistered Securities

From February through March 2011 pursuant to a \$500,000 equity private placement, the Company issued a total of 250,000 shares to a group of accredited investors of restricted Common Stock at an average value of \$2.00 per share. The funds raised were used to acquire Toro's 60% interest of the Crown Oil & Gas Lease in Pottowatomie County, Oklahoma. The Company is relying on exemption from registration pursuant to Regulation S of the Securities Act of 1933. Of these shares 33,750 were cancelled and the Subscription Receivable of \$50,000 was not received.

In May 2011 pursuant to a \$67,500 equity private placement, the Company issued a total of 33,750 shares to a group of accredited investors of restricted Common Stock at an average value of \$2.00 per share. The funds raised were

used to acquire Toro's 15% interest of the Quinlan #3 Oil & Gas Lease in Pottowatomie County, Oklahoma. The Company is relying on exemption from registration pursuant to Regulation S of the Securities Act of 1933.

The common stock issued by the Company was not registered under the Securities Act of 1933, and cannot be resold or distributed absent registration unless an exemption from the registration requirement is applicable, such as Rule 144. Under Rule 144, the restricted stock may be sold in the public market if the requirements of the Rule are satisfied.

Item 6: Management's Discussion and Analysis or Plan of Operation

Forward-Looking Statements

This quarterly report contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These statements relate to future events or our future financial performance. In some cases, you can identify forward-looking statements by terminology such as "may", "should", "expects", "plans", "anticipates", "believes", "estimates", "predicts", "potential" or "continue" or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks in the section entitled "Risk Factors", that may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity, performance or achievements. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

Our unaudited financial statements prepared in accordance with United States Generally Accepted Accounting Principles. The following discussion should be read in conjunction with our financial statements and the related notes that appear elsewhere in this quarterly report. The following discussion contains forward-looking statements that reflect our plans, estimates and beliefs. Our actual results could differ materially from those discussed in the forward looking statements. Factors that could cause or contribute to such differences include, but are not limited to, those discussed below and elsewhere in this quarterly report, particularly in the section entitled "Risk Factors" of this quarterly report.

In this quarterly report, unless otherwise specified, all dollar amounts are expressed in United States dollars. All references to "common shares" refer to the common shares in our capital stock.

As used in this quarterly report, the terms "we", "us", "our" and "Toro" mean Toro Ventures Inc., unless otherwise indicated.

General Overview

We were incorporated pursuant to the laws of the State of Nevada on April 11, 2005 under the name Toro Ventures Inc. We were initially in the fast food services industry.

The address of our principal executive office is Suite 632, 22837 Pacific Coast Highway, Malibu, CA 90265. Our telephone number is 310-887-6391.

Our common shares became listed on the OTC Bulletin Board on July 12, 2011, under the symbol "TORO". Prior to this date, there was no public market for our common shares.

We were not successful in implementing our business plan as fast food services business. As management of our company investigated opportunities and challenges in the business of being a fast food services company, management realized that the business did not present the best opportunity for our company to realize value for our

15

shareholders. As a result, we investigated several other business opportunities to enhance shareholder value, and focused on the oil and gas industry.

On March 26, 2011, we acquired a 15% working interest in the Quinlan #3 Oil and Gas lease in Pottowatomie County, Oklahoma in consideration for the payments totaling \$67,500.

By a turnkey agreement dated March 29, 2011, we acquired a 60% working interest in an oil and gas lease known as the Crown Oil and Gas Lease in Pottowatomie County, Oklahoma for \$250,000.

We are an exploration stage oil and gas company engaged in the exploration for oil and gas in Oklahoma.

We intend to continue to acquire high quality oil and gas properties, primarily "proved producing and proved undeveloped reserves" in the United States. We see significant opportunities in acquiring properties with proven producing reserves and undeveloped acreage in fields that have a long history of production. We will also explore low-risk development drilling and work-over opportunities with experienced, strong operators. We will attempt to finance oil and gas operations through a combination of privately placed debt and/or equity. There can be no assurance that we will be successful in finding financing, or even if financing is found, that we will be successful in acquiring oil and/or gas assets that result in profitable operations.

We are continuing our efforts to identify and assess investment opportunities in oil and natural gas properties, utilizing the labor of our directors and stockholders until such time as funding is sourced from the capital markets. It is anticipated that we will require funding over the next twelve months to continue our operation. Attempts are ongoing to raise funds through private placements and said attempts will continue throughout 2012.

Our operating expenses will increase as we undertake our plan of operations. The increase will be attributable to the continuing geological exploration and acquisition programs and continued professional fees that will be incurred.

Purchase of Significant Equipment

We do not intend to purchase any significant equipment (excluding oil and gas activities) over the twelve months ending June 30, 2012.

Employees

Currently our only employees are our directors and officers. We do not expect any material changes in the number of employees over the next 12 month period. We do and will continue to outsource contract employment as needed. However, with project advancement and if we are successful in our initial and any subsequent drilling programs we may retain additional employees.

Results of Operations

The following summary of our results of operations should be read in conjunction with our financial statements for the year ended June 30 2012, which are included herein.

| | 30-Jun-12 | 30-Jun-11 | Difference |
|---------------------------------|------------------|------------------|--------------------|
| OPERATING EXPENSES | | | |
| Management Fees | 22,000 | 12,000 | 10,000 |
| Rent | 4,000 | 4,000 | - |
| Total Operating Expenses | \$ 16,000 | \$ 16,000 | \$ (10,000) |

10,000,000 shares of common stock were issued at par value of \$0.001 to pay for services to Joseph Arcaro for services rendered.

We are currently, using all of our resources to find requisite funding to exploit the oil and gas assets acquired. The costs for providing this services is \$4,000 per quarter..

There were no oil and gas revenues recorded during the year

Liquidity and Financial Condition

At June 30, 2012 and 2011, we had a working capital deficit of \$Nil..

At June 30, 2012, our total assets were \$Nil.

At June 30, 2012, our total liabilities were \$Nil.

Equity Compensation

We currently do not have any stock option or equity compensation plans or arrangements.

Contractual Obligations

As a “smaller reporting company”, we are not required to provide tabular disclosure obligations.

Off-Balance Sheet Arrangements

We have no significant off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that are material to stockholders.

Going Concern

We have suffered recurring losses from operations. The continuation of our company as a going concern is dependent upon our company attaining and maintaining profitable operations and/or raising additional capital. The financial statements do not include any adjustment relating to the recovery and classification of recorded asset amounts or the amount and classification of liabilities that might be necessary should our company discontinue operations.

The continuation of our business is dependent upon us raising additional financial support and/or attaining and maintaining profitable levels of internally generated revenue. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of our current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments.

Item 7: Financial Statements

Our unaudited interim financial statements for the year ended June 30, 2012 form part of this annual report. They are stated in United States Dollars (US\$) and are prepared in accordance with United States generally accepted accounting principles.

Toro Ventures Inc.

**Notes to Unaudited Financial Statements
For the Year Ended June 30, 2012
(Expressed in U.S. Dollars)**

1. INCORPORATION AND OPERATING ACTIVITIES

Toro Ventures Inc. was incorporated on 11 April 2005, under the laws of the State of Nevada,

The Company is in the development stage and through joint ventures is in the process of exploring its oil and gas properties located in the U.S.A. The recoverability of amounts shown for oil and gas properties are dependent upon the discovery of economically recoverable reserves, confirmation of the Company's interest in the properties, the ability of the Company to obtain necessary finances to complete the development and upon future profitable production or proceeds from the disposition thereof.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Resource Properties - Company follows the successful efforts method of accounting for its oil and gas properties. Unproved oil and gas properties are periodically assessed and any impairment in value is charged to exploration expense. The costs of unproved properties, which are determined to be productive are transferred to proved resource properties and amortized on an equivalent unit-of-production basis. Exploratory expenses, including geological and geophysical expenses and delay rentals for unevaluated resource properties, are charged to expense as incurred. Exploratory drilling costs are charged as expenses until it is determined that the company has proven oil and gas reserves.

Basis of Presentation -These financial statements and related notes are presented in accordance with accounting principles generally accepted in the United States, and are expressed in U.S. dollars. The Company's fiscal year-end is June 30.

Use of Estimates - The preparation of financial statements in accordance with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of net revenue and expenses in the reporting period. We regularly evaluate our estimates and assumptions related to the useful life and recoverability of long-lived assets, stock-based compensation and deferred income tax asset valuation allowances. We base our estimates and assumptions on current facts, historical experience and various other factors that we believe to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities and the accrual of costs and expenses that are not readily apparent from other sources. The actual results experienced by us may differ materially and adversely from our estimates. To the extent there are material differences between our estimates and the actual results, our future results of operations will be affected.

Cash and Cash Equivalents - The Company considers all highly liquid instruments with original maturities of three months or less when acquired, to be cash equivalents. We had no cash equivalents at June 30, 2012 or June 30, 2011, respectively.

Asset Retirement Obligation (ARO) - The estimated costs of restoration and removal of facilities are accrued. The fair value of a liability for an asset's retirement obligation is recorded in the period in which it is incurred and the corresponding cost capitalized by increasing the carrying amount of the related long-lived asset. The liability is accreted to its then present value each period, if the liability is settled for an amount other than the recorded amount, a gain or loss is recognized. The ARO at June 30, 2012 - \$Nil and June 30, 2011 - \$Nil.

Toro Ventures Inc.

**Notes to Unaudited Financial Statements
For the Year Ended June 30, 2012
(Expressed in U.S. Dollars)**

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Income Taxes - Potential benefits of income tax losses are not recognized in the accounts until realization is more likely than not. The Company has adopted ASC 740, *Income Taxes*, as of its inception. Pursuant to ASC 740, the Company is required to compute tax asset benefits for net operating losses carried forward. The potential benefits of net operating losses have not been recognized in these financial statements because the Company cannot be assured it is more likely than not it will utilize the net operating losses carried forward in future years.

Comprehensive Loss- ASC 220, *Comprehensive Income*, establishes standards for the reporting and display of comprehensive loss and its components in the financial statements. As of June 30, 2012 and 2011, the Company has no items that represent comprehensive loss and, therefore, has not included a schedule of comprehensive loss in the financial statements.

Stock Based Compensation- ASC 718, *Stock-based compensation*, establishes standards for the reporting and display of stock based compensation in the financial statements. During the year ended June 30, 2012, there was no stock based compensation.

Loss per Common Share- The Company computes net loss per share in accordance with ASC 260, *Earnings Per Share*, which requires presentation of both basic and diluted earnings per share (EPS) on the face of the income statement. Basic EPS is computed by dividing net loss available to common shareholders (numerator) by the weighted average number of shares outstanding (denominator) during the period. Diluted EPS gives effect to all dilutive potential common shares outstanding during the period using the treasury stock method and convertible preferred stock using the if-converted method. In computing Diluted EPS, the average stock price for the period is used in determining the number of shares assumed to be purchased from the exercise of stock options or warrants. Diluted EPS excludes all dilutive potential shares if their effect is anti-dilutive.

Fair Value of Financial Instruments- ASC 820, "*Fair Value Measurements*" and ASC 825, *Financial Instruments*, requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. It establishes a fair value hierarchy based on the level of independent, objective evidence surrounding the inputs used to measure fair value. A financial instrument's categorization within the fair value hierarchy is based upon the lowest level of input that is significant to the fair value measurement. It prioritizes the inputs into three levels that may be used to measure fair value:

Level 1

Level 1 applies to assets or liabilities for which there are quoted prices in active markets for identical assets or liabilities.

Level 2

Level 2 applies to assets or liabilities for which there are inputs other than quoted prices that are observable for the asset or liability such as quoted prices for similar assets or liabilities in active markets; quoted prices for identical assets or liabilities in markets with insufficient volume or infrequent transactions (less active markets); or model-derived valuations in which significant inputs are observable or can be derived principally from, or corroborated by, observable market data.

Level 3

Level 3 applies to assets or liabilities for which there are unobservable inputs to the valuation methodology that are significant to the measurement of the fair value of the assets or liabilities.

The following schedule summarizes the valuation of financial instruments at fair value on a recurring basis in the balance sheets as of June 30, 2012 and June 30, 2011

Toro Ventures Inc.

There were no transfers of financial assets or liabilities between Level 1 and Level 2 inputs for the year ended June 30, 2012 and 2007

Recently Adopted Accounting Pronouncements

In July 2012, the FASB issued ASU 2012-02, "Intangibles – Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment" in Accounting Standards Update No. 2012-02. This update amends ASU 2012-08, Intangibles – Goodwill and Other (Topic 350): Testing Indefinite-Lived Intangible Assets for Impairment and permits an entity first to assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with Subtopic 350-30, Intangibles - Goodwill and Other - General Intangibles Other than Goodwill. The amendments are effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted, including for annual and interim impairment tests performed as of a

date before July 27, 2012, if a public entity's financial statements for the most recent annual or interim period have not yet been issued or, for nonpublic entities, have not yet been made available for issuance. The adoption of ASU 2012-02 is not expected to have a material impact on our financial position or results of operations.

In August 2012, the FASB issued ASU 2012-03, "Technical Amendments and Corrections to SEC Sections: Amendments to SEC Paragraphs Pursuant to SEC Staff Accounting Bulletin (SAB) No. 114, Technical Amendments Pursuant to SEC Release No. 33-9250, and Corrections Related to FASB Accounting Standards Update 2012-22 (SEC Update)" in Accounting Standards Update No. 2012-03. This update amends various SEC paragraphs pursuant to the issuance of SAB No. 114. The adoption of ASU 2012-03 is not expected to have a material impact on our financial position or results of operations.

Toro Ventures Inc.

**Notes to Unaudited Financial Statements

(Expressed in U.S. Dollars)**

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

In October 2012, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2012-04, "Technical Corrections and Improvements" in Accounting Standards Update No. 2012-04. The amendments in this update cover a wide range of Topics in the Accounting Standards Codification. These amendments include technical corrections and improvements to the Accounting Standards Codification and conforming amendments related to fair value measurements. The amendments in this update will be effective for fiscal periods beginning after December 15, 2012. The adoption of ASU 2012-04 is not expected to have a material impact on our financial position or results of operations.

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income. . The guidance in ASU 2013-02 is intended to provide guidance in the reclassification of Accumulated Other Comprehensive Income to net income. The amendments in this ASU are effective for fiscal years beginning after December 15, 2012. Early adoption is permitted if an entity's financial statements for the most recent annual or interim period have yet been issued.

3. GOING CONCERN

The Company's financial statements are prepared using the generally accepted accounting principles applicable to a going concern, which contemplates the realization of assets and liquidation of liabilities in the normal course of business. However, the Company has not commenced its planned principal operations and has generated no revenues. In order to obtain the necessary capital, the Company is in the process of raising funds from private placement subscriptions. The Company is dependent upon its ability to secure equity and/or debt financing and there are no assurances that the Company will be successful, without sufficient financing it would be unlikely for the Company to continue as a going concern.

4. INTEREST IN OIL AND GAS PROPERTIES

By a letter of intent dated March 26, 2011, the Company acquired a 15% working interest in the Quinlan #3 Oil and Gas lease in Pottowatomie County, Oklahoma in consideration for the payments totaling \$67,500. By a turnkey agreement effectively dated March 29, 2011, the Company acquired a 60% working interest in an oil and gas lease known as the Crown Oil and Gas Lease in Pottowatomie County, Oklahoma for \$250,000.

The oil and gas properties that the company has have had all costs related to the properties expensed in accordance with Generally Accepted Accounting Principles for the industry. Currently the Company does not have proven reserves confirmed with a geological study and will only be able to capitalize properties once reserves have been

proven. The company performed an impairment analysis at the end of 2012 and determined that the properties were not economically viable; at that point the company impaired the properties.

(Expressed in U.S. Dollars)**

5. CAPITAL STOCK

During 2009, the Company did not receive the \$50,000 subscription receivable and cancelled or reversed the issuance of 33,750 shares.

During the year, the accounts payable for \$15,396 and the note payable to a related party for \$85,391 were charged to contributed surplus.

6. INCOME TAXES

The Company has tax losses of \$748,287 which may be applied against future taxable income. The Company has not recorded a corresponding future tax asset.

Item 8: Changes In Disagreements With Accountants on Accounting and Financial Disclosure

The company had no independent accountant review the financials for this period, in accordance with Rule 3-11 of Regulation S-X.

Item 8A: Controls and Procedures

Disclosure Controls and Procedures

We maintain disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934 (the "Exchange Act"), that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

We carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures as of June 30, 2012. Based on the evaluation of these disclosure controls and procedures, and in light of the material weaknesses found in our internal controls over financial reporting, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures were not effective.

Management's Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting, as defined in Exchange Act Rule 13a-15(f). The Company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Under the supervision and with the participation of management, including the Chief Executive Officer /Chief Financial Officer, the Company conducted an evaluation of the effectiveness of the Company's internal control over financial reporting as of June 30, 2012 using the criteria established in "*Internal Control - Integrated Framework*" issued by the Committee of Sponsoring Organizations of the Treadway Commission ("COSO").

A material weakness is a deficiency, or combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of the Company's annual or interim financial statements will not be prevented or detected on a timely basis. In its assessment of the effectiveness of internal control over financial reporting as of June 30, 2012, the Company determined that there were control deficiencies that constituted material weaknesses, as described below.

1) *We do not have an Audit Committee* – While not being legally obligated to have an audit committee, it is the management's view that such a committee, including a financial expert member, is an utmost important entity level control over the Company's financial statement. Currently the Board of Directors acts in the capacity of the Audit Committee, and does not include a member that is considered to be independent of management to provide the necessary oversight over management's activities.

2) *We did not maintain appropriate cash controls* – As of June 30, 2012, the Company has not maintained sufficient internal controls over financial reporting for the cash process, including failure to segregate cash handling and accounting functions, and did not require dual signature on the Company’s bank accounts. Alternatively, the effects of poor cash controls were mitigated by the fact that the Company had limited transactions in their bank accounts.

3) *We did not implement appropriate information technology controls* – As of June 30, 2012, the Company retains copies of all financial data and material agreements; however there is no formal procedure or evidence of normal backup of the Company’s data or off-site storage of the data in the event of theft, misplacement, or loss due to unmitigated factors.

Accordingly, the Company concluded that these control deficiencies resulted in a reasonable possibility that a material misstatement of the annual or interim financial statements will not be prevented or detected on a timely basis by the company’s internal controls.

As a result of the material weaknesses described above, management has concluded that the Company did not maintain effective internal control over financial reporting as of June 30, 2012 based on criteria established in Internal Control—Integrated Framework issued by COSO.

Changes in Internal Control over Financial Reporting

There has been no change in our internal control over financial reporting identified in connection with our evaluation we conducted of the effectiveness of our internal control over financial reporting as of June 30, 2012, that occurred during our fourth fiscal quarter that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

This annual report does not include an attestation report of the Company’s registered public accounting firm regarding internal control over financial reporting. Managements report was not subject to attestation by the Company’s registered public accounting firm pursuant to temporary rules of the SEC that permit the Company to provide only management’s report in this annual report.

Item 8B: Other Information

None

Item 9: Directors, Executive Officers, Promoters and Control Persons; Compliance with Section 16(a) of the Exchange Act

Officers and Directors

Edgar Filing: Toro Ventures Inc. - Form 10-K

Our directors serves until his or her successor is elected and qualified. Each of our officers is elected by the board of directors to a term of one (1) year and serves until his or her successor is duly elected and qualified, or until he or she is removed from office. The board of directors has no nominating, auditing or compensation committees.

The name, age, and position of our present officers and directors are set forth below:

| Name | Age | Position Held |
|---------------|------------|---|
| Joseph Arcaro | 53 | President, Principal Executive Officer, Principal Financial Officer, Secretary Treasurer, Secretary, and Director |
| | 29 | |

Background of officers and directors

Mr. Arcaro has been in the brokerage and venture capital business for the last 15 years.

Audit Committee Financial Expert

We do not have an audit committee financial expert. We do not have an audit committee financial expert because we believe the cost related to retaining a financial expert at this time is prohibitive. Further, because we are only beginning our commercial operations, at the present time, we believe the services of a financial expert are not warranted.

Conflicts of Interest

The only conflict that we foresee is that our officers and directors devote time to projects that do not involve us.

SECTION 16(A) BENEFICIAL OWNER REPORTING COMPLIANCE

Section 16(a) of the Securities and Exchange Act of 1934 requires that the Company's directors, executive officers, and persons who own more than 10% of registered class of the Company's equity securities, or file with the Securities and Exchange Commission (SEC), initial reports of ownership and report of changes in ownership of common stock and other equity securities of the Company. Officers, directors, and greater than 10% beneficial owners are required by SEC regulation to furnish the Company with copies of all Section 16(a) reports they file. As of the fiscal year ending June 30, 2012, Form 3 reports were not timely filed by Mr. Yan Liu, a 10% beneficial owner.

Code of Ethics

The Company has adopted code of ethics for all of the employees, directors and officers which is attached to this Annual Report as Exhibit 14.1.

Item 10: Executive Compensation

The following table sets forth information with respect to compensation paid by us to our officers and directors during the four most recent fiscal years. This information includes the dollar value of base salaries, bonus awards and number of stock options granted, and certain other compensation, if any.

Summary Compensation Table

| (a) Name and Principal Position (1) | Annual Compensation | | | | Long Term Compensation Awards | | Payouts | |
|--|---------------------|-------------------|----------------------|---|--|---|--------------------------------|--|
| | (b) Year | (c) Salary(\$) | (d) Bonus (\$) | (e) Other Annual Compensation (\$) | (f) Restricted Stock Award(s) | (g) Securities Underlying Options/SARs (#) | (h) LTIP Payouts (\$) | (i) All Other Compensation (\$) |
| Joseph Arcaro | | | | | | | | |
| President, Treasurer, Secretary and Director | 2012 | 10,000 | 0 | 0 | 0 | 0 | 0 | 0 |
| Gregory Rotelli | 2012 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| President, Treasurer, Secretary, and Director | 2011 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| | 2010 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |
| | 2009 | 0 | 0 | 0 | 0 | 0 | 0 | 0 |

[1] All compensation received by the officers and directors has been disclosed.

Option/SAR Grants

There are no stock option, retirement, pension, or profit sharing plans for the benefit of our officers and directors.

Long-Term Incentive Plan Awards

We do not have any long-term incentive plans.

Compensation of Directors

We do not have any plans to pay our directors any money.

Indemnification

Under our Articles of Incorporation and Bylaws of the corporation, we may indemnify an officer or director who is made a party to any proceeding, including a law suit, because of his position, if he acted in good faith and in a manner he reasonably believed to be in our best interest. We may advance expenses incurred in defending a proceeding. To the extent that the officer or director is successful on the merits in a proceeding as to which he is to be indemnified,

we must indemnify him against all expenses incurred, including attorney's fees. With respect to a derivative action, indemnity may be made only for expenses actually and reasonably incurred in defending the proceeding, and if the officer or director is judged liable, only by a court order. The indemnification is intended to be to the fullest extent permitted by the laws of the State of Nevada.

Regarding indemnification for liabilities arising under the Securities Act of 1933, which may be permitted to directors or officers under Nevada law, we are informed that, in the opinion of the Securities and Exchange Commission, indemnification is against public policy, as expressed in the Act and is, therefore, unenforceable.

Item 11: Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

The following table sets forth certain information known to us with respect to the beneficial ownership of our Common Stock as of June 30, 2012, by (1) all persons who are beneficial owners of 5% or more of our voting securities, (2) each director, (3) each executive officer, and (4) all directors and executive officers as a group. The information regarding beneficial ownership of our common stock has been presented in accordance with the rules of the Securities and Exchange Commission. Under these rules, a person may be deemed to beneficially own any shares of capital stock as to which such person, directly or indirectly, has or shares voting power or investment power, and to beneficially own any shares of our capital stock as to which such person has the right to acquire voting or investment power within 60 days through the exercise of any stock option or other right. The percentage of beneficial ownership as to any person as of a particular date is calculated by dividing (a) (i) the number of shares beneficially owned by such person plus (ii) the number of shares as to which such person has the right to acquire voting or investment power within 60 days by (b) the total number of shares outstanding as of such date, plus any shares that such person has the right to acquire from us within 60 days. Including those shares in the tables does not, however, constitute an admission that the named stockholder is a direct or indirect beneficial owner of those shares. Unless otherwise indicated, each person or entity named in the table has sole voting power and investment power (or shares that power with that person's spouse) with respect to all shares of capital stock listed as owned by that person or entity.

Except as otherwise indicated, all Shares are owned directly and the percentage shown is based on 6,128,750 Shares of Common Stock issued and outstanding as of June 30, 2012. Addresses for all of the individuals listed in the table below are c/o Toro Ventures, Inc., Suite 632, 228377 Pacific Coast Highway, Malibu, California 90265.

| Name of Beneficial Owner | Title of Class | Direct Amount of Beneficial Owner | Percent of Class |
|---------------------------------|-----------------------|--|-------------------------|
| Yan Liu | Common Stock | 3,000,000 | 18.6% |
| Joseph Arcaro | Common Stock | 10,000,000 | 62.1% |

As of June 30, 2012, none of our other directors or named executive officers owned any shares of our common stock.

Securities authorized for issuance under equity compensation plans.

We have no equity compensation plans

Item 12: Certain Relationships and Related Transactions

Joe Arcaro, director and CEO, issued to himself 10,000,000 shares of the Company in exchange for services valued at \$10,000.

None of our directors, or officers, any proposed nominee for election as a director, any person who beneficially owns, directly or indirectly, shares carrying more than 10% of the voting rights attached to all of our outstanding shares, any promoter, or any relative or spouse of any of the foregoing persons has any material interest, direct or indirect, in any transaction since our incorporation or in any presently proposed transaction which, in either case, has or will materially affect us.

Item 13: Exhibits

**Exhibit Description
Number**

(3) (i) Articles of Incorporation; and (ii) Bylaws

3.1 Articles of Incorporation (incorporated by reference from our Registration Statement on Form SB-2, filed on August 15, 2005).

3.2 Bylaws (incorporated by reference from our Registration Statement on Form SB-2, filed on August 15, 2005).

(10) Material Contracts

10.1 Master Franchise Agreement (incorporated by reference from our Registration Statement on Form SB-2, filed on August 15, 2005).

10.2 Turnkey Agreement between our company and Nitro Petroleum, Inc. (incorporated by reference from our Current Report on Form 8-K filed on April 4, 2008).

(14) Code of Ethics

14.1 Code of Ethics (incorporated by reference from our Annual Report on Form 10-KSB filed on September 26, 2008).

(31) Rule 13a-14(a)/15d-14(a) Certifications

31.1* Section 302 Certification under Sarbanes-Oxley Act of 2002

(32) Section 1350 Certifications

32.1* Section 906 Certification under Sarbanes-Oxley Act of 2002

Item 14: Principal Accountant Fees and Services

The company had no independent accountant review the financials for this period, in accordance with Rule 3-11 of Regulation S-X , therefore no fees or services were provided.

We do not have an audit committee and as a result our entire board of directors performs the duties of an audit committee. Our board of directors will approve in advance the scope and cost of the engagement of an auditor before the auditor renders audit and non-audit services. Accordingly, we do not rely on pre-approval policies and procedures.

SIGNATURES

Pursuant to the requirements of Section 13 or 15(d) of the Securities Exchange Act of 1934, the Registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized on this 10th day of June 2013
