**Petrobras confirms light oil find in the Santos Basin**

---

(Rio de Janeiro, October 4, 2006). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces the existence of a significant volume of 30° API light oil has been confirmed in a new exploratory frontier of the Santos Basin. Tests carried out through a vertical well indicated a daily flow of 4,900 barrels of oil and 150,000 cubic meters of natural gas (5/8 inch choke with stabilized pressure).

Conformation is the result of the conclusion of test drilling by the 1-RJS-628A vertical well responsible for discovering a highly productive reservoir beneath a 2,000 meter thick salt base ( pre-salt ).

The development of 1-RJS-628 A well in the BM-S-11 block has already been the subject of an announcement to the market on July 11 2006. This block is operated by Petrobras (65%) in consortium with BG (25%) and Petrogal (10%). The confirmed find has been notified to the Brazilian National Agency of Petroleum, Natural Gas and Biofuels in accordance with the current legislation.

Further investments will be required, initially for drilling the first extension well for a full evaluation of the oil volume in the discovered reserve.

## FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
