Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

Petrobras signs four contracts for production sharing in Angola

(Rio de Janeiro, November 3, 2006). PETRÓLEO BRASILEIRO S/A - PETROBRAS, [Bovespa: PETR3/PETR4, NYSE: PBR/PBRA, Latibex: XPBR/XPBRA, BCBA: APBR/APBRA], a Brazilian international energy company, announces that today, in Luanda, it signed four contracts for production sharing with Sociedade Nacional de Combustíveis de Angola (Sonangol), in Blocks 6/06, 15/06, 18/06 and 26.

Block 6/06 is located in the shallow waters of the Kwanza Basin and has a total area of 4,930 km². The program for the initial phase of the contract provides for the obtaining of 3D seismic data and the drilling of two exploration wells. Under the terms of the deal, Petrobras is the operator and retains 40% of the rights.

Block 18/06 has an area of 4,611 km² and is located in the deep waters of the Lower Congo Basin, one of the Angolan oil industry's richest regions, and to the south of important oil producing areas. Petrobras is the operator and has a 30% stake. For the initial phase, the contract provides for the obtaining of 3D seismic data and the drilling of seven exploration wells.

Block 26, covering an area of 4,838 km², is off the southern part of Angola, in deep waters within the Benguela Basin. This area is at the exploration limit and Petrobras' interest is based on integrated geological and geophysical data for the block, along with similarities to oil-bearing areas off the coast of West Africa and the east of Brazil. Petrobras will be the operator and will have 80% of the rights. The contract provides for the obtaining of seismic data and the drilling of two pioneer wells.

Block 15/06 is also located in the Lower Congo Basin and is in alignment with rich deep-water production fields off the coast of Angola. The area of the block is 3,025 km². Petrobras will be a non-operating partner, with 5% of the rights.

Angola, where Petrobras has been active since 1979, represents one of the company's investment priorities. With the signing of the contracts for these four exploratory blocks, Petrobras has consolidated a position that is strongly aligned with the company's Strategic Plan and has initiated a new phase in Angola, where, for the first time, it will be the operating company. The company's Angolan portfolio is summarized below:

Block	Stake (%)	Description
2/85	27.5	Production
34	30	Exploratory
6/06	40	Exploratory. Operator
26	80	Exploratory. Operator
18/06	30	Exploratory. Operator
15/06	5	Exploratory

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
