PETRÓLEO BRASILEIRO S.A. - PETROBRAS
(Exact name of registrant as specified in its charter)

Brazilian Petroleum Corporation - PETROBRAS
(Translation of Registrant's name into English)

Avenida República do Chile, 65
20031-912 - Rio de Janeiro, RJ
Federative Republic of Brazil
(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F Form 40-F

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes No

PETROBRAS ANNOUNCES RESULTS FOR THE FOURTH QUARTER OF 2007

(Rio de Janeiro March 03, 2008) PETRÓLEO BRASILEIRO S.A. Petrobras announces today its consolidated results expressed in millions of Brazilian Reais, in accordance with generally accepted accounting practices in Brazil (BR GAAP).

The Company's market value increased by 87% in 2007, generating total returns of 131.4% for ADR-holders (PBR) and 83.9% for preferred shareholders whose shares are traded in Brazil, outperforming the Ibovespa by 37 percentage point. The discovery of excellent oil and gas finds in new exploratory frontiers (pre-salt layers) in the Espírito Santo and Santos Basins, coupled with potential production growth due to the start-up of five major platforms in 2007, plus three more scheduled for 2008, have underlined Petrobras' position as an outstanding company in its sector.

Operating cash flow, as measured by EBITDA, remained flat versus 2006. Oil production and the average sales price for products sold in Brazil remained stable when calculated in Reais. Increases in operating costs and expenses (including higher costs for imported products and crude oil), combined with the costs of amending the employee pension plan and expanding the workforce to accommodate the Company's growth plans, were offset by the lower incidence of the Special Participation tax and improved distribution and trading margins.

EBITDA in the 4Q07 fell by 8% over the previous quarter due primarily to the increase in international exploration costs (dry holes and seismic acquisition expense), increasing general and administrative expenses, and international losses arising from regulatory changes in Ecuador.

Consolidated net income in 2007 was 17% less than in 2006, primarily due to monetary exchange corrections caused by the strong appreciation of the Real which requires adjustments to foreign dollar-denominated assets of Petrobras when translated into Reais, as well as the costs of agreeing with employees to alter the Company's pension plan.

Consolidated net income in the final quarter fell by 9% over the 3Q-2007, corresponding to the reduction in the operating result (EBITDA).

Average oil and gas production remained very close to 2006 levels, since four of the five new production projects installed in 2007 only commenced operations in the final quarter. In December, however, the Company set a record for a day's oil output in Brazil of 2,000,238 barrels. The projects that began operating at the end of 2007 are expected to contribute to a major growth of production during 2008.

**This document is divided into
five topics:**

PETROBRAS SYSTEM	Page	PETROBRAS	Page
Financial Performance	05	Financial Statements	37
Operating Performance	10		
Financial Statements	24		
Appendices	33		

PETROBRAS SYSTEM

The Reserve Replacement Ratio (RRR) stood at 98.4% according to SPE criteria and 131.1% according to SEC methodology (reserves/production ratio of 18.9 and 14.8 years, respectively). In Brazil, the RRR stood at 123.6% and 134.6%, respectively, according to the SPE and SEC criteria. These proven reserves do not include the recently announced oil and gas discoveries in the pre-salt layer.

The Petrobras System's investments in 2007 were the highest in its history and were allocated as follows:

Oil product output increased 8% over 2006, reaching 90% of installed capacity in Brazil and 85% abroad, mainly due to the acquisition of a refinery in the USA.

The Petrobras System's added value remained flat over 2006.

PETROBRAS SYSTEM

Statement by the CEO, Mr. José Sergio Gabrielli de Azevedo.

Dear shareholders and investors, our 2007 results reflected yet another year of achievements and challenges successfully overcome. We recorded strong growth with a clearly-defined strategic focus and an outstanding operating performance.

We invested R\$ 45,285 million in capital expenditures and acquisitions, 34% more than in 2006 and an all-time record. These investments will allow us not only to maintain production at high levels, thereby ensuring self-sufficiency in oil for Brazil, but they will also lay the groundwork for sustained growth.

We posted a net income of R\$ 21,512 million in 2007 and R\$ 5,053 million in the final quarter, reflecting the impact of the appreciation of the Real against the dollar on our assets abroad, higher expenditure on imported products, the adjustment to the Petros pension plan, and increased costs associated with the goods, services and human resources supply chain in the oil industry.

Thanks to the increase in international oil prices and the Company's own performance, our market cap closed 2007 at R\$ 429,923 million, 87% higher when expressed in Reais, and 131% in U.S. Dollars versus 2006.

We recorded a series of important achievements throughout the year. One of the most important, whose repercussions are enormous and which undoubtedly constitutes one of our major challenges in the coming years, was the discovery of ultra-deep-water oil fields below a two-kilometer-thick salt layer in the Campos and Santos basins, which may well transform Brazil into one of the world's leading oil producers. In this context, the so-called Tupi area is particularly vital, given that preliminary assessments indicate total recoverable oil of between five and eight billion barrels. It is also worth noting that oil at such a depth has never been commercially exploited before, underlining our tradition of technological excellence and posing yet another challenge for the Company.

Average oil, NGL and natural gas production in Brazil remained steady in relation to 2006 (2.065 million bpd). However, given the start-up of the new platforms in 2007 and increased output from those units that began operations in 2006, we achieved a new daily production record of more than two million barrels in December. In addition, three more major systems (P-53, P-51 and FPSO Cidade de Niterói) will be starting up in 2008, raising installed capacity by a further 460,000 boe/day.

In Brazil, the Reserve Replacement Ratio (RRR) stood at 134.6% according to SEC criteria and 123.6% according to SPE methodology (reserves/production ratio of 15.3 and 19.6 years, respectively). It is worth emphasizing that proven reserves do not include the new oil and gas discoveries in the pre-salt layer.

Our investments in the downstream area are mainly directed towards improving the quality of our oil products, applying more stringent environmental specifications and expanding the capacity of our refineries to process heavier oils.

We are fully aware of the environmental importance of biofuels and are proud to be in the forefront in this area, committed to developing technologies that will permit the production of such fuels on a greater scale, both nationally and internationally. By the end of the year, we will be selling biodiesel in almost 6,000 gas stations throughout Brazil and our first pilot bioethanol plant will be operating in our research center (CENPES).

PETROBRAS SYSTEM

We also implemented a series of initiatives in the sense of reorganizing, consolidating and strengthening the petrochemical sector. The acquisitions of Ipiranga Petroquímica and Suzano Petroquímica and the transfer of assets to Braskem were fundamental steps in restructuring our investment portfolio in this sector, in line with our strategy of consolidating our petrochemical assets in companies that are fully able to compete in the international markets.

We maintained our commitment to excellence in the social and environmental responsibility areas, underlined by our reinclusion in such important sustainability indices as the Dow Jones Sustainability World Index (DJSI World) and the Bovespa's Corporate Sustainability Index (ISE). In accordance with our corporate guidelines, we also invested in various projects in the safety, environmental and health area, designed to protect our employees and neighboring communities and reduce to an absolute minimum any risks that may jeopardize our operations and results.

In conclusion, we believe our 2007 results reflect Petrobras' entrepreneurial spirit and capacity to transform challenges into achievements. We are currently among the world's leading integrated oil companies and set as our strategic goal to be among the top five. This challenge will give us the needed momentum to continue our growth, breaking down barriers and building a new concept of what an energy company should be.

PETROBRAS SYSTEM

PETROBRAS SYSTEM

Financial Performance

The behavior of the main components of consolidated net income, in relation to 2006, was as follows:

A R\$ 2,875 million increase in gross profit:

Main Items	R\$ million		
	Changes 2007 X 2006		
	Net Revenues	Cost of Sales	Gross Profit
. Domestic Market: - effect of volumes sold	3,085	(1,747)	1,338
- effect of prices	1,083	-	1,083
. Intl. Market: - effect of export volumes	3,046	(1,283)	1,763
- effect of export price	390	-	390
. Increase in expenses: (*)	-	(2,915)	(2,915)
. Extraordinary items: - supplementary costs with special participations ⁽¹⁾	-	426	426
- expenses with re-injected gas ⁽²⁾	-	406	406
. Increase in profitability of Distribution Segment	518	(28)	490
. Increase in profitability of trading operations	1,934	(1,473)	461
. Increase in international sales	7,715	(7,500)	215
. FX effect on subsidiaries abroad	(4,614)	3,983	(631)
. Other	(818)	667	(151)
	12,339	(9,464)	2,875

(*) Expenses Variation Composition:	Value
- import of gas, crude oil and oil products ⁽³⁾	(2,484)
- non-oil products, including alcohol, biodiesel and other	(515)
- materials, services and depreciation	(1,136)
- salaries, benefits and charges	(600)
- transportation: maritime and pipelines ⁽⁴⁾	(315)
- third-party services	211
- domestic government take	1,924
	(2,915)

(1) New ANP interpretation of the deductibility of projects financing expenses related to the Marlim field when calculating 2006 special participations.

(2) Adjustment, in 2006, of expenses from gas produced and reinjected in reservoirs in the Solimões, Campos and Espírito Santo Basins.

(3) CIF values.

(4) Expenditures on cabotage, terminals and pipelines.

PETROBRAS SYSTEM

Financial Performance

An increase of R\$ 4,521 million in the following operating expenses:

Selling expenses (R\$ 269 million), reflecting the increase in export volume (R\$ 79 million) and off-shore operations (R\$ 166 million);

General and administrative expenses (R\$ 999 million), due to the growing complexity and volume of the Company's operations, reflected in higher expenses from personnel in Brazil (R\$ 379 million) as a result of the collective bargaining agreement and the increase in the workforce, and from third-party services (R\$ 355 million), especially those related to IT and consulting;

Exploration costs (R\$ 533 million), related to the intensification of exploratory activities in Brazil (R\$ 228 million) and abroad (R\$ 440 million), especially in Turkey, Angola and Iran, offset by the reduction in provisions for well abandonment (R\$ 121 million);

Losses from the recovery of exploration and production assets (R\$ 401 million) in Ecuador (R\$ 309 million) due to the increase in the royalty rate (99%).

R&D (R\$ 126 million), from research into increasing production from current reserves and expansion into new exploratory frontiers, plus the training of technical staff;

The Pension and Health Plan (R\$ 554 million), due to the amendments to the Petros Plan regulations;

Other operating expenses (R\$ 1,646 million), especially from the amendments to the Petros Plan (R\$ 1,051 million), the collective bargaining agreements (R\$ 482 million) and fines and contractual charges related to natural gas and electricity supply (R\$ 449 million), offset by the recovery of ICMS tax credits following the agreement with the Ceará State Finance Department (R\$ 101 million).

A negative impact of R\$ 2,600 million on the net financial result, due to:

The impact of the increase in the appreciation of the Real from 8% to 17% on funds invested abroad via subsidiaries in the International segment, in E&P equipment for use in Brazil and in commercial activities (R\$ 1.972 million);

Exchange regularization in 2006 (R\$ 321 million, non-recurring).

Financial result from the increase in net debt (R\$ 323 million);

Losses from hedge operations linked to commercial and financial activities (R\$ 288 million);

Offset by the reduction in expenses from the prepayment of financing (R\$ 230 million).

A reduction in relevant interests (R\$ 448 million), primarily due to the increase in exchange losses from the conversion of foreign subsidiaries' shareholders equity.

A lower non-operating result (R\$ 371 million), primarily from expenses from damage to third-party equipment installed in wells in the Campos Basin (R\$ 139 million) and the write-off of E&P-related sunk costs (R\$ 103 million).

PETROBRAS SYSTEM

Financial Performance

Net income for the 4Q-2007 totaled R\$ 5,053 million, 9% down on the R\$ 5,528 million declared in the 3Q-2007, due to the factors listed below:

R\$ 742 million reduction in gross profit:

Main Items	R\$ million		
	Changes		
	4Q 2007 X 3Q 2007		
	Net Revenues	Cost of Goods Sold	Gross Profit
. Domestic Market: - effect of volumes sold	505	(287)	218
- effect of prices	388	-	388
. Intl. Market: - effect of export volumes	(645)	285	(360)
- effect of export price	1,066	-	1,066
. Increase in expenses: (*)	-	(2,034)	(2,034)
. Increase in profitability of Distribution Segment	(46)	87	41
. Increase in profitability of trading operations	(64)	146	82
. Increase in international sales	879	(782)	97
. FX effect on controlled companies abroad	(374)	326	(48)
. Other	(761)	569	(192)
	948	(1,690)	(742)

(*) Expenses Composition:	Value
- domestic government take	(580)
- import of gas, crude oil and oil products ⁽¹⁾	(509)
- materials, services and depreciation	(392)
- salaries, benefits and charges	(343)
- third-party services	(217)
- non-oil products, including alcohol, biodiesel and other	(9)
- transportation: maritime and pipelines ⁽²⁾	16
	(2,034)

(1) Expenditures on cabotage, terminals and pipelines.

(2) CIF value.

Growth of R\$ 579 million in operating expenses:

General and administrative expenses (R\$ 275 million), reflected in higher expenses from personnel in Brazil (R\$ 102 million) as a result of the collective bargaining agreement, and from third-party services (R\$ 121 million), especially those related to IT and consulting;

Exploration costs (R\$ 617 million) due to the intensification of exploratory activities which culminated in the write-off of dry wells in the United States and Colombia (R\$ 473 million) and Brazil (R\$ 305 million), and the

increase in expenses related to geology and geophysics abroad (R\$ 106 million), offset by the reduction in provisions for well abandonment (R\$ 271 million).

Losses from the recovery of exploration and production assets (R\$ 446 million) in Ecuador (R\$ 309 million) due to the increase in the royalty rate to 99%.

These effects were offset by the reduction in expenses from the Pension and Health Plan (R\$ 705 million), due to the recognition, in the 3Q-2007, of the commitments associated with the Petros Plan (R\$ 697 million).

PETROBRAS SYSTEM

Financial Performance

A positive impact of R\$ 228 million on the net financial result, as a result of:

An increase in financial expenses (R\$ 273 million) from the monetary restatement of recoverable taxes (R\$ 161 million) and revenue from investments in marketable securities (R\$ 59 million);

Gains from monetary and exchange variations (R\$ 154 million), due the lower appreciation of the Real in the 4Q-2007.

These effects were partially offset by higher financial expenses (R\$ 199 million) due to losses from hedge operations linked to commercial activities related to PifCo, Pasadena and PAI (R\$ 169 million).

PETROBRAS SYSTEM

Operational Performance

Exploration and Production - Thousand Barrels/day

The operational start-up of the platforms P-50 (Albacora Leste), FPSO-Capixaba (Golfinho), Cidade do Rio de Janeiro (Espadarte), Piranema (Piranema), Cidade de Vitória (Golfinho), P-34 (Jubarte), P-52 and P-54 (Roncador), offset the natural decline in production.

The increase in production capacity triggered by the start-up of the FPSO-Piranema (Piranema), Cidade de Vitória (Golfinho), P-52 (Roncador) and P-54 (Roncador) platforms was offset by P-25 stoppage in Albacora for operational safety procedures (now solved) and the natural slide in output.

International oil production fell due to the exclusion of Venezuelan output as of April/06 and the decline in the mature fields in Argentina and Angola, partially offset by higher output in the US due to the resumption of normal production, which had been jeopardized in 2006 by hurricanes, and the start-up of production in the Cottonwood field in February/07. Consolidated gas output moved up by 10%, thanks to stepped up production in the USA and Brazil's higher gas imports from Bolivia, pushed by increased industrial and vehicular consumption in the Center-South and Southeast regions.

Fourth-quarter consolidated international oil output remained flat over the previous three months. International gas production fell by 12% due to the beginning of YPFB's share of Bolivian output as of August 31, 2007, the decline in flows from the Cottonwood wells caused by reduced pressure in the reservoirs, and the oil workers' strike that affected the Santa Cruz I e II wells in Argentina.

PETROBRAS SYSTEM

Operational Performance

Refining, Transportation and Supply **thousand barrels/day**

The new Refap converters, which started up in the 3Q-2006, and the improved operational reliability of the refineries led to an increase in processed crude.

Domestic processed crude recorded a decline due to the increased number of scheduled maintenance stoppages.

Processed crude in the overseas refineries (primary processing) jumped by 48%, due to the inclusion of the Pasadena refinery (USA) as of October/06 and the upturn in Argentinean refining capacity, offset by the sale of the Bolivian refineries in June/07. In relation to the previous quarter, total processed throughput in the overseas refineries recorded no change.

Costs

Lifting Cost (US\$/barrel)

Excluding the impact of the appreciation of the Real, the annual unit lifting cost in Brazil climbed by 9% over 2006, due to the higher price of goods and service in the oil industry, increased expenditure on vessels and drills, the wage increase, the expansion of the workforce and the higher initial unit costs of FPSO-Cidade de Vitória, FPSO-Cidade do Rio de Janeiro, FPSO-Piranema and the P-52 and P-54 platforms, which will gradually come down as production moves up.

Also excluding the impact of the appreciation of the Real, the 4Q-2007 unit lifting cost increased by 8% over the previous quarter due to the wage hike and the higher consumption of materials due to the startup of four new production systems in the final quarter, whose higher unit costs will tend to come down as production moves up.

PETROBRAS SYSTEM

Operational Performance

The annual lifting cost moved up due to higher extraction costs and the impact of the increase in international oil prices on government participations, offset by the effect of the natural decline in production in certain fields on these participations.

The domestic unit lifting cost in the fourth quarter increased due to the upturn in the average Brazilian oil price used to calculate the government participations, based on the international price, as well as the already-mentioned rise in extraction costs.

The international lifting cost recorded an annual upturn due to the decline in output and the increase in the price of third-party services and materials in Argentina, and higher expenses in the USA, thanks to the return of normal production, which had been partially shut down in 2006, and the operational startup of the deep-water Cottonwood field, and in Angola, due to the recovery of mature wells and installation maintenance.

The international lifting cost also moved up in the fourth quarter due to the higher price of third-party services in Argentina, partially offset by lower maintenance and repairs expenses in Angola and a decline in expenses from Cottonwood, thanks to cheaper chemicals and a reduction in logistics expenses.

PETROBRAS SYSTEM

Operational Performance

Refining Costs (US\$/barrel)

Excluding the impact of the appreciation of the Real, the domestic unit refining cost moved up by 10% in 2007, due to increased operating expenses, reflecting the investments to adapt the refineries to higher quality products, plus environmental and market demands, as well as the increased number of scheduled maintenance stoppages.

Excluding the impact of the appreciation of the Real, the fourth-quarter refining cost climbed by 34%, reflecting the increased number of scheduled maintenance stoppages, especially the one in REDUC, the country's biggest lubricant producer, following 5 years of uninterrupted operations, the wage increase and non-recurring expenses from the Leadership program in SMA and non-programmed stoppages in the RLAM units.

Average international unit refining costs increased in 2007 due to the inclusion of the Pasadena Refinery in the USA.

Average international unit refining costs recorded a reduction in the 4Q-2007 due to scheduled and unscheduled stoppages in the USA in the previous quarter.

PETROBRAS SYSTEM

Operational Performance

Corporate Overhead Parent Company (US\$ million)

Annual corporate overhead moved up due to the increase in the complexity and volume of the Company's operations, reflected in higher personnel costs due to the expanded workforce, as well as expenses from third-party services. If we exclude the impact of the appreciation of the Real, overhead rose by 19%.

The fourth-quarter upturn was fueled by higher expenses from personnel and data-processing, maintenance and infrastructure services.

Sales Volume thousand barrels/day

Annual domestic sales volume moved up 4%, led by diesel, LPG, aviation fuel and fuel oil. The diesel increase was due to the improved harvest and heightened industrial activity, while LPG sales were pushed by higher earnings among the less favored income groups. GDP growth and the expansion of tourism, in turn leveraged by the appreciation of the Real, helped boost aviation fuel sales.

Export volume rose by 6% thanks to increased production and the reduced share of domestic oil in total processed throughput.

International sales volume climbed by 17% due to the inclusion of the Pasadena Refinery as of October/06, increased production in the U.S. and offshore operations, that is designed to capture commercial opportunities off-shore. This

was partially offset by the elimination of operations in Venezuela and the sale of the Bolivian refinery.

(1) Comments on the results by business area begin on page 18 and their respective financial statements on page 28.

(2) In the international business segment, given that all operations are executed abroad, comparisons between the periods are influenced by foreign exchange variations in dollars or in the currency of those countries in which the companies in question are headquartered. As a result, there may be substantial variations in Reais, primarily arising from and reflecting changes in the exchange rate.

(3) Expenses from the creation of new jobs by Petrobras are now allocated in accordance with each employee's area of activity and are no longer allocated in their entirety to corporate administrative expenses. In order to facilitate comparisons between the periods, we have adapted the previous financial statements to the new criteria.

PETROBRAS SYSTEM

Operational Performance

RESULTS BY BUSINESS AREA

Petrobras is a company that operates in an integrated manner, with the greater part of oil and gas production in the Exploration and Production area being sold or transferred to other Company areas.

The main criteria used to report results per business area are as follows:

- a) Net operating revenues: revenues from sales to external clients, plus intra-Company sales and transfers, using internal transfer prices established between the areas as a benchmark, with assessment methodologies based on market parameters;
- b) Operating income: net operating revenues, plus the cost of goods and services sold, which are reported per business area considering the internal transfer price and other operating costs for each area, plus the operating expenses effectively incurred by each area;
- c) The entire financial result is allocated to the corporate group;
- d) Assets: refers to the assets as identified by each area. Equity accounts of a financial nature are allocated to the corporate group.

Annual net income from Exploration and Production increased by 8% over 2006 due to the increase in average domestic oil prices, the 1% upturn in daily oil and NGL production, the reduction in government participations and higher average transfer prices for natural gas.

Part of these effects were offset by expenses from the amendments to the Petros Plan regulations and the collective bargaining agreements.

The spread between the average domestic oil sale/transfer price and the average Brent price widened from US\$ 10.43/bbl in 2006 to US\$ 10.95/bbl in 2007.

In comparison with the previous quarter, 4Q-2007 net income moved up 11% due to higher average domestic oil prices, partially offset by the 1% increase in daily oil and NGL production and the increase in government participations.

The spread between the average domestic oil sale/transfer price and the average Brent price climbed from US\$ 10.45/bbl in the 3Q-2007 to US\$ 11.94/bbl in the 4Q-2007.

Annual net income from the Supply segment fell 3% over 2006 as a result of the following factors:

- Higher oil prices;

- Increased oil product import volume;

- More scheduled maintenance stoppages;

- Increased expenses from personnel and third-party services; the amendments to the Petros Plan regulations; and safety, environmental and health. Selling expenses also moved up due to higher offshore oil sales volume and oil exports.

PETROBRAS SYSTEM

Operational Performance

These effects were partially offset by the upturn in oil product sales volume and higher average oil product prices in Brazil and abroad.

In comparison with the 3Q-2007, final-quarter net income from the Supply segment dropped by 78% due to:

Increased oil prices;

Reduced oil product export volume;

Higher refining costs.

These effects were partially offset by the increase in the average oil product sale price, and the sale, in the 4Q-2007, of inventories acquired at a lower cost in the previous quarter.

The annual Gas and Energy result was jeopardized by the increase in the average domestic natural gas transfer cost and the payment of fines and contractual charges related to gas and electricity supply (R\$ 449 million).

These effects were partially offset by the upturn in electricity sales volume, especially energy exports to Argentina, and the increase in natural gas sales volume.

The 4Q-2007 Gas and Energy result was adversely affected by lower electricity sales margins due to the increase in the energy acquisition cost and energy exports to Argentina in the 3Q-2007.

This was partially offset by the reduction in fines and contractual charges related to gas and electricity supply.

Annual net income from Distribution climbed 36% over 2006, primarily due to the 13% upturn in sales volume.

The segment recorded a 34.3% share of the national fuel distribution market (in line with the new criteria which reviewed the volume of the alcohol market) versus 32.3% in 2006 (33.6% according to the previous criteria).

PETROBRAS SYSTEM

Operational Performance

In the final quarter, the healthy sales performance was reflected in a 4% increase in sales volume over the 3Q-2007, in line with the distribution market, ensuring the period maintenance of market share, The recognition of higher operating expenses, chiefly due to a review of the amounts involved in judicial proceedings, and the impact of the new jobs and salaries plan following the collective bargaining agreement, meant that net income fell by 55% over the previous three months.

The intensification of exploration and production activities abroad and the oil and gas regulatory changes in Ecuador, which raised production royalties, were mostly responsible for the downturn in the annual International result.

These factors resulted in a R\$ 440 million increase in exploration expenses, including seismic and data-collection, especially in Turkey, Angola, Iran and Argentina, and a R\$ 399 million decline in the recoverable value of assets in Ecuador, the USA and Angola.

In the 4Q-2007, exploration expenses increased by R\$ 607 million, led by the write-off of dry wells in the USA and Colombia (R\$ 495 million) and the recognition of R\$ 401 million from the reduction in the recoverable value of assets in Ecuador (R\$ 309 million) and the USA.

These effects were partially offset by the improvement in petrochemical margins in Argentina, thanks to higher fertilizer prices and sales volume.

The reduction in the result from Corporate activities in 2007 was due to:

The R\$ 2,600 million increase in net financial expenses, as detailed on page 7;

The R\$ 1,196 million upturn in expenses from the pension and health plan due to the amendments to the Petros Plan regulations;

The R\$ 631 million increase in G&A expenses resulting from higher third-party services and personnel expenses, the latter due to the expansion of the workforce in 2006 and the collective bargaining agreement.

The 4Q-2007 improvement over the previous quarter was fueled by expenses from the amendments to the Petros Plan regulations incurred in the 3Q-2007 (R\$ 697 million) and the R\$ 207 million reduction in expenses with minority shareholders due to the lower financial results posted by those Special Purpose Companies and controlled companies which are not wholly owned by Petrobras and its subsidiaries.

(1) Includes debt from leasing contracts (R\$ 1,433 million on December 31, 2007 and R\$ 2,540 million on December 31, 2006).

(2) Total debt less cash and cash equivalents.

(3) Total liabilities net of cash/financial investments.

The net debt of the Petrobras System on December 31, 2007, was 42% higher than the amount recorded on December 31, 2006, primarily due to the reduction in cash invested in the investment program, in long-term securities, in the acquisition of interests in companies and in the amendments to the Petros Plan. These effects were partially offset by a reduction in indebtedness due to the appreciation of the Real against the U.S. dollar.

The level of indebtedness, measured by the net debt/EBITDA ratio increased from 0.37, on December 31, 2006, to 0.53 on December 31, 2007. The portion of the capital structure represented by third parties was 48%, 1 percentage point up on December 31, 2006.

PETROBRAS SYSTEM

Operating Performance

Consolidated Investments

In compliance with the goals outlined in its strategic plan, Petrobras continues to prioritize investments in the expansion of its oil and natural gas production capacity by investing its own funds and by structuring ventures with strategic partners. On December 31, 2007, total investments amounted to R\$ 45,285 million, 34% up on the total on December 31, 2006.

Part of the expenses associated with idle thermoelectric plants were allocated to COGS, given that such expenses are linked to energy sales which are in turn tied to the capacity available for sale, independently of the volume effectively generated.

In order to unify the criterion for the allocation of safety, health and environment expenses, we opted to allocate these expenses in their entirety to other operating expenses.

Expenditure related to the training of new Petrobras employees is now allocated in line with the area of each employee and is no longer wholly allocated to corporate administrative expenses.

In order to maintain comparability between the periods, we are presenting the previous statements in accordance with the new criteria above.

Net Income (Loss)	24,728	6,091	(1,190)	585	350	(4,128)	(517)	25,919

Part of the expenses associated with idle thermoelectric plants were allocated to COGS, given that such expenses are linked to energy sales which are in turn tied to the capacity available for sale, independently of the volume effectively generated.

In order to unify the criterion for the allocation of safety, health and environmental expenses, we opted to allocate these expenses in their entirety to other operating income (expenses).

Expenditure related to the training of new Petrobras employees is now allocated in line with the area of each employee and is no longer wholly allocated to corporate administrative expenses.

In order to maintain comparability between the periods, we are presenting the previous statements in accordance with the new criteria above.

(1) Expenditure related to the training of new Petrobras employees is now allocated in line with the area of each employee and is no longer wholly allocated to corporate administrative expenses. In order to maintain comparability between the periods, we are presenting the previous statements in accordance with the new criteria above.

PETROBRAS SYSTEM

Appendices

1. Petroleum and Alcohol Accounts National Treasury

In order to settle the accounts with the federal government, in accordance with Provisional Measure No. 2181 of August 24, 2001, Petrobras, after having submitted all the information required by the National Treasury (STN), is seeking to reconcile the differences between the parties which comprise alleged debts arising from credit operations involving the extinct INTERBRAS.

In November 2007, as part of the ongoing negotiations with the STN, Petrobras once again officially stated its understanding that these debts were never owed by INTERBRAS, requested the issue of securities to settle the balance of the Petroleum and Alcohol Accounts and their possible use to pay Petrobras' actuarial debts with PETROS, and reaffirmed its agreement with the setting up of an informal working group between Petrobras and the STN to analyze the operations that gave rise to the alleged INTERBRAS debts with the federal government.

The account balance of R\$ 798 million on December 31, 2007 (R\$ 786 million in 2006) may be paid by the federal government through the issuance of National Treasury bonds, in an amount equal to the final settlement amount or with other amounts that Petrobras may owe to the federal government, including those related to taxes, or through a combination of these options.

2. Consolidated Taxes and Contributions

The economic contribution of Petrobras to the country, measured through the generation of current taxes, duties and social contributions, totaled R\$ 51,347 million.

R\$ million

3. Government Participations

R\$ million							
Fourth Quarter				Year End			
3Q-2007	2007	2006	Δ %		2007	2006	Δ %
				Country			
1,985	2,182	1,842	18	<i>Royalties</i>	7,574	7,626	(1)
1,955	2,150	2,008	7	Special Participation	7,261	8,375	(13)
28	33	26	27	Surface Rental Fees	119	108	10
3,968	4,365	3,876	13	Subtotal Country	14,954	16,109	(7)
117	197	312	(37)	Foreign	800	1,202	(33)
4,085	4,562	4,188	9	Total	15,754	17,311	(9)

Government participations in the country fell by 7% over 2006, reflecting the 10% appreciation of the Real and the reduction in the Special Participation tax rate due to the natural decline in production from the leading productive fields: Marlim, Marlim Sul, Barracuda and Caratinga.

In the country in the 4Q-2007 Government participations increased by 10% over the previous quarter due to the 12% increase in the reference price for local oil, which averaged R\$ 133.84 (US\$ 74.84) in the 4Q-2007, versus R\$ 118.96 (US\$ 62.15) in the 3Q-2007, reflecting the average Brent price on the international market.

PETROBRAS SYSTEM

Appendices

4. Reconciliation of Consolidated Shareholders' Equity and Net Income

	R\$ million	
	Shareholders' Equity	Net Income
. According to PETROBRAS information as of 12.31.2007	116,012	22,029
. Profit in the sales of products in affiliated inventories	(667)	(667)
. Reversal of profits on inventory in previous years	-	362
. Capitalized interest	(860)	(183)
. Absorption of negative shareholders equity in affiliated companies *	(73)	(61)
. Other eliminations	(558)	32
. According to consolidated information as of 12.31.2007	113,854	21,512

* Pursuant to CVM Instruction 247/96, losses considered temporary on investments evaluated by the equity method, where the investee shows no signs of stoppage or the need for financial support from the investor, must be limited to the amount of the controlling company's investment. Thus losses generated by unfunded liabilities (negative shareholders' equity) of the affiliated companies did not affect the results or shareholders' equity of Petrobras on September 30, 2007, generating a conciliatory item between the Financial Statements of Petrobras and the Consolidated Financial Statements.

5. Performance of Petrobras Shares and ADRs

Dividends - Proposed by the Board of Directors on 02.28.2008. The payment date will be determined at the General Ordinary Meeting to be held 04.04.2008, on the shareholder position of the same date.	0.15	658
	0.05	220
TOTAL DIVIDENDS	1.50	6,581

7. Capital Increase

Petrobras management is proposing to the Extraordinary General Meeting to be held in conjunction with the Ordinary General Meeting of April 4, 2008, a capital increase from R\$ 52,644 million to R\$ 78,967 million by the capitalization of the capital reserve in the amount of R\$ 1,020 million, R\$ 851 million of which from the fiscal incentive reserve and R\$ 169 million from the Merchant Marine Fund (AFRMM) subsidy, and R\$ 25,302 million from income retained from previous fiscal years, without the issue of new shares, pursuant to paragraph 1 of article 169 of Law 6404/76.

8. Acquisition of Suzano Petroquímica

The acquisition of 99.9% of the common shares of Suzano Petroquímica S.A., equivalent to 76.58% of the latter's total capital, was concluded on November 30, 2007.

Petrobras paid a total of R\$ 2.1 billion to the selling shareholders, equivalent to R\$ 13.27 per common share and R\$ 10.61 per preferred share.

Petrobras will hold, through DAPEAN PARTICIPAÇÕES S.A., a company that retains indirect control of Suzano Petroquímica, a public tender offer for the acquisition of Suzano Petroquímica's common and preferred shares retained by the remaining shareholders at R\$ 13.27 per common share and R\$ 10.61 per preferred share.

PETROBRAS SYSTEM

Part of the expenses associated with idle thermoelectric plants were allocated to COGS, given that such expenses are linked to energy sales which are in turn tied to the capacity available for sale, independently of the volume effectively generated.

In order to unify the criterion for the allocation of safety, health and environment expenses, we opted to allocate these expenses in their entirety to other operating expenses.

Expenditure related to the training of new Petrobras employees is now allocated in line with the area of each employee and is no longer wholly allocated to corporate administrative expenses.

In order to maintain comparability between the periods, we are presenting the previous statements in accordance with the new criteria above.

This document may contain forecasts that merely reflect the expectations of the Company's management. Such terms as anticipate, believe, expect, forecast, intend, plan, project, seek, should, along with similar or analogous terms are used to identify such forecasts. These predictions evidently involve risks and uncertainties, whether foreseen or not by the Company. Therefore, the future results of operations may differ from current expectations, and readers must not base their expectations exclusively on the information presented herein.

SIGNATURE

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned, thereunto duly authorized.

Date: March 7, 2008

PETRÓLEO BRASILEIRO S.A--PETROBRAS

FORWARD-LOOKING STATEMENTS

This press release may contain forward-looking statements. These statements are statements that are not historical facts, and are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.
