## New discovery of good quality oil in Transfer of Rights area

Rio de Janeiro, January 8th, 2013 – Petróleo Brasileiro S.A. - Petrobras, announces that the fifth well drilled following the execution of the Transfer of Rights Agreement discovered good quality oil in the area known as Sul de Tupi (Tupi South), in the pre-salt of Santos Basin.

Well 4-BRSA-1047-RJS (4-RJS-698), informally known as Sul de Tupi, is located south of Lula field, at a water depth of 2,188 meters and is 302 km off the coast of Rio de Janeiro state.

The well confirmed the presence of reservoirs of excellent quality in carbonate rocks below the salt layer.

Preliminary assessments indicate that there is communication between the Transfer of Rights reservoirs of Sul de Tupi and the Lula Field, where oil of approximately 28° API has been verified.

The well continues to be drilled and its depth currently stands at 5,220 meters. Drilling will proceed to the stratigraphic level of approximately 5,600 meters as set out in the Transfer of Rights Agreement.

According to the activities and investments laid out in the Mandatory Exploratory Program (PEO) of the Transfer of Rights Agreement, once drilling is complete, a formation test is scheduled to take place to assess the productivity of the reservoirs.

As laid out in the agreement, the exploratory phase is expected to end by September 2014, and Petrobras may declare commerciality within this period.

**FORWARD-LOOKING STATEMENTS**

This press release may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act) that are not based on historical facts and are not assurances of future results. These forward-looking statements are based on management's current view and estimates of future economic circumstances, industry conditions, company performance and financial results. The words "anticipates", "believes", "estimates", "expects", "plans" and similar expressions, as they relate to the company, are intended to identify forward-looking statements. Statements regarding the declaration or payment of dividends, the implementation of principal operating and financing strategies and capital expenditure plans, the direction of future operations and the factors or trends affecting financial condition, liquidity or results of operations are examples of forward-looking statements. Such statements reflect the current views of management and are subject to a number of risks and uncertainties. There is no guarantee that the expected events, trends or results will actually occur. The statements are based on many assumptions and factors, including general economic and market conditions, industry conditions, and operating factors. Any changes in such assumptions or factors could cause actual results to differ materially from current expectations.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this press release. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.
