Economic Scenario

Global economic activity points to a recovery, chiefly due to the developed economies. In the third quarter of 2013, the global manufacturing Purchasing Managers Index (PMI) reached 53.3 points, its highest level for 18 months, mainly fueled by the recovery of the Eurozone countries. September's Eurozone PMI reached 52.2 points, the highest figure since the second quarter of 2011, led by Germany. The IMF expects global GDP growth of 2.9% in 2013 and 3.6% in 2014.

USA

Indicators in the United States are also pointing to a recovery. The manufacturing PMI, published by the Institute for Supply Management (ISM), moved up for the fourth consecutive month, reaching 56.2 points in September, versus 55.7 in the previous month. Industrial production grew by 0.6% in September, with installed capacity use of 78.3%.

Also in September, unemployment rate fell to 7.2%, 0.4 p.p. down on June, but still above pre-global-crisis levels.

On the other hand, the impasse regarding the raising of the U.S. debt ceiling had a negative impact on economic activity in the quarter.

Given this scenario, the FED opted to maintain its economic stimuli, continuing with its asset purchase program. The institution expects 2013 GDP growth of between 2.0% and 2.3%.

Europe

September's economic activity figures in Europe also indicate a recovery, led by Germany, but with the peripheral nations also recording positive indicators. In this context, the highlight was Spain, which posted growth of 0.1% in 3Q13 over the previous three months, following nine consecutive quarters of decline.

Average unemployment rate, on the other hand, remained high in Euro zone, reaching 12.2% in September, one of the highest levels since 1995. The Greek and Spanish rates had the highest levels. The latest figures from Greece show a 26.6% rate in July, while Spain's rate remained flat at 26.6% in September.

As a result, the European Central Bank maintained a cautious approach, signaling that it may offer a new round of long-term loans to the banks.

In the United Kingdom, third-quarter GDP edged up by 0.8% over 2Q13, which in turn recorded growth of 0.7%, with services making an important contribution. Manufacturing PMI reached 56.7 points in September, slightly below the 57.1 recorded in August, exceeding 50 points for the sixth consecutive month. Likewise year-over-year industrial output increased 2.2% in September.

Asia

The Chinese government stimuli have proved successful, as shown by the latest economic indicators. Third-quarter GDP grew by 7.8% in the last 12 months and 2.2% over 2Q13. Compound PMI climbed from 48.2 points in June to 51.2 points in September, while industrial production moved up by 10.2% in the same month. Therefore, the government has reiterated its 2013 GDP growth target of 7.5%.

Japanese GDP grew by 3.8% in the second quarter, while manufacturing PMI reached 52.5 points in September, the highest figure since February 2011. Consumer confidence also moved up in September following three consecutive reductions, reaching 54.5 points. Retail sales grew by 3.1% in September, while industrial output moved up by 1.5%. Consequently, Japan's central bank (BoJ) raised its economic assessment of the country's nine regions for the second consecutive month.

Brazil

In 2Q13 GDP posted growth of 1.5%, reflecting the 3.9% increase in agriculture and the 3.6% upturn in gross fixed capital formation. In the 12 months through June, year-on-year growth came to 1.9%. The Central Bank’s FOCUS report expects annual GDP growth of 2.5% in 2013.

Industrial production in September 2013 grew 0,7% over August, and moved up by 1.6% in the first nine months over the same period last year.

Inflation measured by the IPCA consumer price index recorded 0.35% in September, giving 5.86% in the last 12 months, above the target ceiling defined by the Monetary Policy Committee (COPOM), which raised the Selic base rate for the fifth consecutive time at its last meeting in September, this time to 9.50% p.a.

The real remained highly volatile against the U.S. dollar throughout the third quarter, peaking at R\$2.45/US\$, given the uncertainties surrounding the FED’s reduction of the monetary stimuli. However, following the decision to maintain the stimuli, the dollar fell back, closing September at R\$2.23/US\$.

Foreign reserves remained virtually flat at around US\$376 billion.

Adoption of IFRS 10/11

As of January 1, 2013, the Company adopted IFRS 10 – Consolidated Financial Statements, corresponding to CPC 36 (R3) – *Demonstrações Financeiras Consolidadas*, approved by the CVM in December 2012, and IFRS 11 – Joint Arrangements, corresponding to CPC 19 (R2) - *Negócios em Conjunto*, approved by the CVM in November 2012. Given that the proportional consolidation method is no longer permitted, the Company has ceased to consolidate its jointly-owned subsidiaries, Namisa, MRS Logística and CBSI, and now recognizes them in accordance with the equity accounting method. The main impacts were on net revenue, cost of goods sold, gross profit, the financial result, equity income and net income. For comparability purposes, the consolidated financial statements for the third quarter of 2012 were reclassified to reflect this alteration.

Net Revenue

CSN posted record consolidated net revenue of R\$4,661 million in 3Q13, 15% up on 2Q13, mainly due to increased revenue from mining operations.

In the first nine months, net revenue totaled R\$12,364 million, 15% more than in 9M12, chiefly due to higher revenue from the steel segment, and also a new record.

Cost of Goods Sold (COGS)

In 3Q13, consolidated COGS reached R\$3,259 million, 8% up on the previous quarter, primarily due to higher volume sold in mining segment.

(CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE)

ITR — Quarterly Financial Information - September 30, 2013 – CIA SIDERURGICA NACIONAL **Version:**
1

The Gross Profit reached R\$1,402 million in the 3Q13, 35% up from 2Q13, for the same reasons afore mentioned.

Selling, General, Administrative and Other Operating Expenses

Consolidated SG&A expenses totaled R\$315 million in 3Q13, 17% down on the previous quarter, chiefly due to lower distribution costs.

CSN recorded a net expense of R\$133 million in the “Other Operating Expenses” line in 3Q13, 9% down on the previous quarter, basically due to the upturn in non-recurring revenue in 3Q13.

EBITDA

The Company uses Adjusted EBITDA to measure the performance of its various segments and operating cash flow generation capacity. It comprises net income before the net financial result, income and social contribution taxes, depreciation and amortization, equity income and other operating revenue (expenses).

Adjusted EBITDA considers the Company’s proportional interest in Namisa, MRS Logística and CBSI and is on a comparable basis with the amounts published in 2012.

Adjusted EBITDA totaled R\$1,652 million in 3Q13, 51% up on the R\$1,095 million posted in 2Q13, primarily due to the contribution of the mining and steel segments.

The consolidated adjusted EBITDA margin reached 31%, 7 p.p. more than in 2Q13.

Financial Result and Net Debt

The 3Q13 consolidated net financial result was negative by R\$597 million, chiefly due to the following factors:

- Interest on loans and financing totaling R\$588 million;
- Expenses of R\$30 million with the monetary restatement of tax payment installments;
- Other financial expenses totaling R\$43 million.

These negative effects were partially offset by consolidated financial revenue of R\$59 million and monetary and foreign exchange variations of R\$5 million.

Gross debt, net debt and the net debt/EBITDA ratio presented below reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

On September 30, 2013, consolidated net debt stood at R\$17.8 billion, R\$0.9 billion more than the R\$16.9 billion recorded on June 30, 2013, essentially due to the following factors:

- Dividend and interest on equity payments totaling R\$0.4 billion;
- Investments of R\$0.8 billion in fixed assets;
- A R\$0.7 billion disbursement effect related to the cost of debt;
- A R\$0.5 billion increase in working capital;
- Other effects of R\$0.2 billion.

(CONVENIENCE TRANSLATION INTO ENGLISH FROM THE ORIGINAL PREVIOUSLY ISSUED IN PORTUGUESE)

ITR — Quarterly Financial Information - September 30, 2013 – CIA SIDERURGICA NACIONAL **Version:**

These effects were partially offset by adjusted EBITDA of R\$1.7 billion.

The net debt/EBITDA ratio based on LTM adjusted EBITDA closed the third quarter at 3.65x, 0.27x down on the ratio recorded at the end of the previous quarter.

Equity Result

The consolidated equity result totaled R\$208 million in 3Q13, basically due to the result of the jointly-owned subsidiary Namisa.

Net Income

CSN posted consolidated third-quarter net income of R\$503 million, in line with the 2Q13 figure.

Capex

Investments reflect the Company's proportional interest in Namisa, MRS Logística and CBSI and are on a comparable basis with the amounts published in 2012.

CSN invested R\$838 million in 3Q13, R\$424 million of which in the parent company, allocated as follows:

- ü Casa de Pedra mine and Port of Itaguaí: R\$191 million;
- ü Long steel: R\$105 million.

The remaining R\$414 million went to subsidiaries or joint subsidiaries, mostly in the following projects:

ü Transnordestina Logística: R\$301 million;

ü MRS: R\$41 million;

ü Namisa: R\$11 million.

Working Capital

Working capital allocated to the Company's businesses closed 3Q13 at R\$2,455 million, R\$513 million up on the R\$1,942 million recorded at the end of 2Q13, chiefly due to the reduction in the suppliers line. The average supplier payment period narrowed by 17 days, partially offset by the four-day reduction in the inventory turnover period, raising the cash conversion cycle by 13 days.

1. DESCRIPTION OF BUSINESS

Companhia Siderúrgica Nacional “CSN”, also referred to as the Company or Parent Company, is a publicly-held company incorporated on April 9, 1941, under the laws of the Federative Republic of Brazil (Companhia Siderúrgica Nacional, its subsidiaries, associates and jointly controlled entities collectively referred to herein as the "Group"). The Company’s registered office is located in São Paulo, SP, Brazil.

CSN has shares listed on the São Paulo Stock Exchange (BM&F BOVESPA) and the New York Stock Exchange (NYSE). Accordingly, it reports its information to the Brazilian Securities Commission (CVM) and the U.S. Securities and Exchange Commission (SEC).

The Group's main operating activities are divided into five (5) operating segments as follows:

- **Steel:**

The Company’s main industrial facility is the Presidente Vargas Steel Mill (“UPV”), located in the city of Volta Redonda, State of Rio de Janeiro. This segment consolidates the operations related to the production, distribution and sale of flat steel, long steel, metallic containers and galvanized steel. In addition to the facilities in Brazil, CSN has operations in the United States, Portugal and Germany aimed at gaining markets and performing excellent services for final consumers. Its steels are used in the home appliances, civil construction and automobile industries.

- **Mining:**

The production of iron ore is developed in the city of Congonhas, in the State of Minas Gerais. It further mines tin in the State of Rondônia to supply the needs of UPV, with the excess of these raw materials being sold to subsidiaries and third parties. CSN holds the concession to operate TECAR, a solid bulk terminal, one of the 4 (four) terminals that comprise the Itaguaí Port, in Rio de Janeiro. Importations of coal and coke are carried out through this terminal.

- **Cement:**

CSN entered the cement market boosted by the synergy between this new activity and its already existing businesses. Next to the Presidente Vargas Steel Mill in Volta Redonda (RJ), it installed a new business unit: CSN Cimentos, which produces CP-III type cement by using slag produced by the UPV blast furnaces in Volta Redonda. It also explores limestone and dolomite at the Arches drive in the State of Minas Gerais, to supply the needs of UPV and of the cement plant.

- **Logistics**

Railroads:

CSN has equity interests in two railroad companies: MRS Logística, which manages the former Southeast Network of Rede Ferroviária Federal S.A. (RFFSA), and Transnordestina Logística, which operates the former Northeast Network of the RFFSA in the states of Maranhão, Piauí, Ceará, Rio Grande do Norte, Paraíba, Pernambuco and Alagoas.

Ports:

In the State of Rio de Janeiro, by means of its subsidiary Sepetiba Tecon, the Company operates the Container Terminal (Tecon) at the Itaguaí Port. Located in the Bay of Sepetiba, this port has privileged highway, railroad and maritime access.

Tecon handles the shipments of CSN steel products, movement of containers, as well as storage, consolidation and deconsolidation of cargo.

3. CHANGES IN ACCOUNTING POLICIES

The Company applied, beginning January 1, 2013, IFRS 10 *Consolidated Financial Statements*, equivalent to CPC 36 (R3) - "Demonstrações Consolidadas" approved by the CVM in December 2012, which establishes principles for the presentation and preparation of consolidated financial statements when an entity controls one or more entities, and IFRS 11 *Joint Arrangements*, equivalent to CPC 19(R2) - "Negócios em Conjunto" approved by the CVM in November 2012, which requires a new valuation of joint arrangements, focusing on the rights and obligations of the arrangement, instead of its form. IFRS 10 supersedes the consolidation requirements of SIC-12 *Consolidation of Special Purpose Entities* and IAS 27 *Separate and Consolidated Financial Statements*. IFRS 11 supersedes IAS 31 *Interests in Joint Ventures* and SIC-13 *Joint Ventures - Non-Monetary Contributions by Venturers*.

Accordingly, as the proportionate consolidation method for entities qualified as joint ventures is no longer allowed, the Company no longer consolidates its jointly controlled entities Nacional Minérios S.A., MRS Logística S.A., and CBSI - Companhia Brasileira de Serviços de Infraestrutura, and started to account for these entities by the equity method of accounting. In addition to the application of IFRS 10 and 11, management decided to adopt as accounting policy the elimination of the effect on profit or loss of transactions carried out with jointly controlled entities. As a result, part of the share of profits (losses) of jointly controlled entities was reclassified to finance costs, cost of sales and income tax and social contribution.

The Company also applied, beginning January 1, 2013, IFRS 12 – Disclosure of Interest in Other entities, equivalent to CPC 45 – “Disclosure of Interests in Other Entities” approved by the CVM in December 2012, which requires disclosures of the nature of, and risks associated with, the Company's interests in other entities and the effects of those interests on its financial position, financial performance and cash flows.

For purposes of comparison, the balances as of December 31, 2012 and September 30, 2012 have been adjusted taking into account said changes in accounting policy, and are being presented for comparative purposes in the notes to the financial statements, as shown below:

The breakdown of gross trade receivables from third parties is as follows:

	9/30/2013	12/31/2012	9/30/2013	12/31/2012

In order to meet the needs of some customers in the domestic market, related to the extension of the payment term for billing of steel, in common agreement with CSN's internal commercial policy and maintenance of its very short-term receipts (up to 7 days), at the request of the customer, transactions are carried out for assignment of receivables without co-obligation negotiated between the customer and banks

with common relationship, where CSN assigns the trade notes/bills that it issues to the banks with common relationship.

Due to the characteristics of the transactions for assignment of receivables without co-obligation, after assignment of the customer's trade notes/bills and receipt of the funds from the closing of each transaction, CSN settles the trade receivables and becomes entirely free of the credit risk on the transaction. This transaction totals R\$350,136 as of September 30, 2013 (R\$224,718 as of December 31, 2012), less the trade receivables.

The changes in the Company's allowance for doubtful debts are as follows:

Some Group companies recognized tax credits on income tax and social contribution loss carryforwards not subject to statute of limitations and based on the history of profitability and expected future taxable profits determined in technical studies approved by Management.

Since they are subject to significant factors that may change the projections for realization, the carrying amounts of deferred tax assets and projections are reviewed annually. These studies indicate the realization of these tax assets within the term stipulated by the mentioned instruction and the limit of 30% of the taxable profit.

Certain group companies have tax assets amounting to R\$823,846 and R\$257,935, related to income tax and social contribution loss carryforwards, for which no deferred taxes were set up, of which R\$12,059 expire in 2013, R\$863 in 2014, R\$34,687 in 2015, and R\$54,809 in 2025. The remaining tax assets refer to domestic companies and, therefore, are not subject to statute of limitations.

The undistributed profits of the Company's foreign subsidiaries have been invested and continue to be invested in their operations, therefore, the deferred income tax is not recognized. These undistributed profits of the Company's foreign subsidiaries amounted to R\$7,094,737 as of September 30, 2013 (R\$6,307,956 as of December 31, 2012).

II – investments in financial instruments classified as available for sale and measured at fair value through OCI

Potential impairment of financial assets classified as available for sale

The Company has investments in common (USIM3) and preferred (USIM5) shares (“Usiminas Shares”), designated as available-for-sale financial assets as they do not meet the criteria to be classified within any of the other categories of financial instruments (loans and receivables, held-to-maturity investments or financial assets at fair value through profit or loss). The asset is classified as a non-current asset under line item “investments” and is carried at fair value based on the quoted price on the stock exchange (BM&FBOVESPA).

Considering the volatility of the quotations of Usiminas shares, the Company evaluated whether, at the end of the reporting period, there was objective evidence of impairment of these financial assets, i.e., the Company’s management evaluated if the decline in the market value of Usiminas shares should be considered either significant or prolonged. In turn, this valuation requires judgment based on CSN’s policy, prepared according to practices used in the domestic and international markets, and consists of an instrument by instrument analysis based on quantitative and qualitative information available in the market, from the time an instrument shows a drop of 20% or more in its market value or from the time there is a significant drop in its market value as compared to its acquisition price during more than twelve months.

Based on the qualitative and quantitative elements, management concluded, in its best judgment, that there was evidence of a significant impairment of the investment in Usiminas shares as of June 30, 2012, and, consequently, reclassified the accumulated losses recorded in other comprehensive income amounting to R\$1,599,485, net of income tax and social contribution, to profit for the year, by recognizing R\$2,022,793 in other operating expenses and R\$423,308 in deferred taxes.

In December 2012 there was an additional recognition of R\$264,441 related to deferred taxes on accumulated losses due to the annual analysis of the effective income tax and social contribution rate that took into consideration the temporary differences generated by this investment in CSN subsidiaries

resulting from the reclassification of accumulated losses.

Beginning this date, pursuant to a Company's policy, gains and losses arising from the variation of the quotation of shares were recognized in other comprehensive income. However, as of June 30, 2013, there was an additional decline in the quotation of the common shares (USIM3) as compared with the quotation as of June 30, 2012 which, according to the Company's accounting policy, generated a loss of R\$5,002, recorded directly in other operating expenses.

The Company continues to evaluate strategic alternatives with respect to its investment in Usiminas. These initiatives can, for example, affect the way an investment is recorded in the Company's financial statements.

III – Fair values of assets and liabilities as compared to their carrying amounts

The estimated fair values of consolidated long-term borrowings and financing were calculated at prevailing market rates, taking into consideration the nature, terms and risks similar to those of the recorded contracts, as compared below:

		9/30/2013		12/31/2012

Interest rate swap transactions (Fixed rate to CDI)

Its purpose is to peg obligations subject to a fixed rate to the fluctuation of the average interest rate of the one-day interbank deposits (CDI), calculated and disclosed by CETIP. Basically, the Company carried out swaps of its obligations indexed to the fixed rate, in which it receives interest on the notional amount (long position) and pays 100% of the CDI on the notional amount in reais of the contract date (short position). The notional amount of this swap as of September 30, 2013 is R\$345,000. The gains and losses on this contract are directly related to CDI variation. In general, these are transactions conducted in the Brazilian over-the-counter market that have as counterparty a prime financial institution.

The Group is a defendant in other administrative and judicial proceedings (tax, social security, labor, civil, and environmental), in the approximate amount of R\$14,177,683, of which R\$1,107,108 related to labor and social security lawsuits, R\$553,409 to civil lawsuits, and R\$74,161 to environmental lawsuits. The assessments made by legal counsel define these administrative and judicial proceedings as entailing risk of possible loss and, therefore, no provision was recorded in conformity with Management's judgment and accounting practices adopted in Brazil.

As for the tax lawsuits these represent R\$12,443,005, broken down as follows:

a) R\$1,981,272 refers to the assessment notice issued against the Company for an alleged nonpayment of income tax (IRPJ) and social contribution on net income (CSLL) on profits recognized in the balance sheets of its foreign subsidiaries.

In October 2013, the Brazilian tax authorities introduced a tax debt refinancing program ("REFIS"), based on Law 12,865/13 and subsequent amendments brought by Provisional Measure 627 of November 11, 2013, related to the levy of income tax and social contribution on profits of foreign subsidiaries earned by Brazilian companies with a deadline for joining the program on November 29, 2013.

Under the conditions of such REFIS, debts past due up to December 31, 2012 can be paid as follows: (i) in cash with a 100% reduction in fines and other legal charges or (ii) in up to 180 monthly installments, with 20% settled on the program joining date, with a 80% reduction in fines, 50% in interest and 100% in legal charges. Under this program, the payment of late payment fine, voluntary fine or isolated fine and up to 30% of the amount of the principal of the tax can be paid with credits from income tax and social contribution tax loss carryforwards of the company and of parent companies and subsidiaries as of December 31, 2011.

Although the risk remains unaltered, the Company is assessing the benefits of joining the REFIS.

b) R\$6,406,691 refers to the tax assessment notice issued against the Company for an alleged sale of 40% of the shares of its subsidiary NAMISA to a Japanese-Korean consortium, thus failing to determine and pay taxes on the capital gain resulting from this transaction. In May 2013, as per judgment by the Regional Judgment Office of São Paulo – SP (1st administrative level), a favorable decision to the Company was issued, canceling the assessment notice. By this decision, a mandatory appeal was filed, which will be judged by the Administrative Board of Tax Appeals – CARF.

c) R\$4,055,042 refers to other tax lawsuits (federal, state, and municipal taxes).

20. DIVIDENDS AND INTEREST ON CAPITAL

On August 6, 2013, the Board of Directors approved the payment to the shareholders of interest on capital and/or interim dividends, amounting to R\$300,000, of which R\$210,000 refers to dividends and R\$90,000 to interest on capital. The dividends and interest on capital represent an advance of the mandatory minimum dividend for the year 2013 and, therefore, should be ratified in the next Annual General Meeting and, consequently, be included in the proposal for allocation of the result for 2013.

The Company also recorded interest on capital amounting to R\$100,026 as of September 30, 2013.

The calculation of interest on capital is based on the Long-Term Interest Rate (TJLP) fluctuation on shareholders' equity, limited to 50% of pretax profit for the period or, according to prevailing legislation, the higher of 50% of retained earnings and profit reserves.

In compliance with CVM Resolution 207 of December 31, 1996 and tax regulations, the Company elected to account for proposed interest on capital as a contra entry to finance costs and reverse it from the same line item. Therefore, interest on capital is not stated in the statement of income and does not affect profit, except for the tax effects recognized in income tax and social contribution line items. Management will propose that the amount of interest on capital be attributed to the mandatory minimum dividends.

(*) The ore sales volumes presented in this note take into consideration Company sales and the interest in its subsidiaries and jointly controlled entities (Namisa 60%).

Adjusted EBITDA is the tool based on which the chief operating decision maker measures segment performance and the capacity to generate recurring operating cash, and consists of profit for the year less net finance income (costs), income tax and social contribution, depreciation and amortization, share of profits of investments, and other operating income (expenses), plus the proportional EBITDA of jointly controlled entities. Even though it is an indicator used in segment performance measurements, EBITDA is not a measurement recognized by accounting practices adopted in Brazil or IFRS, does not have a standard definition, and may not be comparable with measurements using similar names provided by other entities. As required by IFRS 8, the table below shows the reconciliation of the measurement used by the chief operating decision maker with the results determined using the accounting practices.

Based on our review, nothing has come to our attention that causes us to believe that the accompanying individual interim financial information included in the ITR referred to above was not prepared, in all material respects, in accordance with technical pronouncement CPC 21 (R1), applicable to the preparation of the Interim Financial Information (ITR) and presented in accordance with the standards issued by the Brazilian Securities Commission.
