Information on the legal and economic effects derived from the statutory change, according to the terms of Article 11 of CVM Instruction #481, of December 17, 2009

In relation to the amendment of the "caput" of Article 6 of the Bylaws, due to the capital stock increase by means of capitalization of free existing reserves and issuance of shares to be allotted free of charge to shareholders, as bonus stock, at the ration of 2 new shares for each 10 shares of the same class they hold on the record date, Bradesco Management predicts that the mentioned statutory amendment will produce:

- **legal consequences** solely by virtue of the assignment of ownership of 2 new shares for each 10 shares of same class previously held, getting preserved the shareholding proportion of all shareholders, without distinction; and
- **economic effects**, deriving from the 10% increment in the total amount of interest on shareholders' equity paid monthly, benefiting proportionally all shareholders.

Regarding the other statutory amendments proposed, Bradesco Management **sees no legal or economic effects**, since:

- **Sole Paragraph of Article 1:** aims at adapting it to the Regulation for Issuers Listing and Admission to Trading of Securities of BM&FBOVESPA;
- **"caput" of Article 8:** the inclusion of a new member to integrate the Board of Directors will not result in an increase in the annual global amount compensation for the Management, since the amount to be perceived by the new member fits within the margin adopted by the Company to support any administrative changes that were necessary in the course of the fiscal year;
- **Paragraph Two of Article 8:** deals with the quorums of installation and resolution of the Board of Directors' meetings and derive from the need to allow flexibility in the form of participation of its members in the meetings of that Body;

- **“caput of Article 13:** derives from the improvement of its wording;
- **Article 20:** transforms the Fiscal Council in permanent body in order to meet the good corporate governance practices; and
- **Article 21:** regulates the functioning of the Audit Committee, adapting it to the provisions of Resolution # 4,329, of April 25,2014, of the National Monetary Council, which provides the reappointment of up to 1/3 of the members of that Body to the maximum of other five consecutive annual terms.

8. In case of allocation of profits to the legal reserve:

a. Identify the amount allocated to the legal reserve

The amount allocated to the legal reserve was R\$754,442 thousand.

b. Explain in detail the manner of calculation of the legal reserve

The allocation of a portion of net income to legal reserve is established in Article 193 of Law #6,404/76 and has the purpose of ensuring the integrity of the capital stock.

Out of the net income for the year, 5% (five percent) will be allocated to the recording of legal reserve, which will not exceed 20% (twenty percent) of the Company's capital stock. Pursuant Paragraph One of Article 193 of the Corporate Law, the legal reserve may not be recorded in the fiscal year when the balance of such reserve, added by the amount related to capital reserves addressed by Paragraph 1 of Article 182 (with amendments introduced by the Law # 11,638/07), exceeds 30% of the capital stock.

Any net losses may be debited to the legal reserve. The amounts of the legal reserve must be approved at the annual shareholders' meeting and may only be used to increase the Company's capital stock or compensate losses. Thus, the resources from the legal reserve are not available for the payment of dividends.

On December 31, 2014, the amount of the legal reserve was R\$5,193,467 thousand, which was equivalent to approximately 13.63% of the Company's paid up capital on the same date.

13. Management Compensation

13.1. Description of the policy or compensation practice, including the Board of Executive Officers

a) Objectives of the policy or practice of compensation

In 2012, Bradesco amended its compensation policy for managers, to reflect the objectives established by Resolution # 3,921, of the National Monetary Council (CMN), of November 25, 2010, which caused, from that year on, the payment of part of the amount approved in the Annual Shareholders' Meeting as variable compensation.

Its policy aims at:

- ensuring that the compensation practice is in accordance with the law, rules and regulations that govern the matter, based on the Manager's duties, which result from the positions they hold and functions they perform; time dedicated to their functions; in competence and professional reputation, in view of their experience and qualification; and in the value of their services in the market;

- providing alignment between compensation practices for the Management and the Organization's interests, so that the decisions made are the best as possible, seeking to create value for its shareholders and investors; and

- ensuring that the compensation practice is related to objectives that seek the valuation of the Organization, not encouraging behaviors that increase the risk exposure above levels considered prudent for the strategies adopted for the short, medium and long terms.

b) Composition of compensation, indicating:

i. description of the compensation elements and objectives of each one of them

a) Board of Directors and Board of Executive Officers

The compensation of the members of the Board of Directors and of the Board of Executive Officers consists of Fixed Compensation, represented by Monthly Compensations fixed for the duration of their term, and any Variable Compensation awarded according to the criteria of multiple Monthly Compensation, up to the limit authorized by the Shareholders' Meeting.

In addition, annually, a proposal is submitted to the approval of the Shareholders' Meeting to fund the Pension Plan for Managers, the amounts of which are shown in item 13.2, as post-employment benefits.

Pursuant to CVM Circular Letter CVM/SEP/No 001/2014, in item 13.2, for the years 2014, 2013 and 2012, we are indicating the amounts corresponding to social security contributions (INSS) paid by Bradesco and recognized in its results.

b) Fiscal Council

The Compensation of the Sitting Members of the Fiscal Council is fixed by the Shareholders' Meeting in which they are elected and they cannot be lower, for each member in office, to 10% (ten percent) of the monthly compensation that, on average, is attributed to each Officer, as fixed compensation, without, under current legislation, the payment of benefits, expense account and participation in the Company's profit sharing, or any other denomination.

c) Audit Committee

The composition of the compensation of the Members of the Audit Committee, with exception of one member that only receives compensation to participate in the Board of Directors, is 100% compensation and aims at rewarding the contribution of each member for acting on advising the Board of Directors in the performance of its attributions related to the follow up of the accounting practices adopted in the preparation of the Company's financial statements and of its subsidiaries, as well as in the process of appointing and evaluating the effectiveness of the independent audit.

Another important factor in the definition of the compensation is that the Committee's members must have high technical qualification so as to exercise their position and at least one of them must have proven knowledge in the areas of accounting and auditing of financial

institutions which qualify him to exercise his function, proving the high degree of expertise required from them, including by the regulatory bodies.

d) Compensation Committee

The Compensation Committee, defined in the Bylaws, will be composed by members chosen among the members of the Company's Board of Directors and also, as required by the Resolution #3,921, of November 25, 2010, of the National Monetary Council, by 1 (one) non-administrator member. The members of the Board of Directors and the non-administrator member, when an employee of the Bradesco Organization, will not be compensated due to the position of Member of the Remuneration Committee. While being a non-employee, when nominated, the Member will have his/her compensation set by the Board of Directors, according to the market parameters. No Manager of Bradesco Organization is remunerated for the performance of their duties in the Organization's Committees.

e) Other Committees

The members of the other committees are remunerated only for the duties they perform in the management bodies or executive areas in which they act at Bradesco Organization. No Manager of Bradesco Organization is remunerated for duties that they perform in the referred committees.

ii. the proportion of each component in the total compensation

The Managers' compensation is composed by Fixed Compensation, represented by Monthly Compensations fixed according to the duration of their term, and possible Variable Remuneration awarded according to the criteria of multiple Monthly Compensations, up to the limit authorized by the Shareholders' Meeting.

We highlight that the proportion/percentage of each element in the total compensation is not fixed, and it can be changed annually.

iii. methodology for calculating and adjusting each component of the compensation

Board of Directors and Board of Executive Officers

Bradesco Organization understands:

- Fixed Compensation or Monthly Compensation: monthly fixed compensations established for the period of the Administrator's term.

- Variable Compensation: eventual amount, attributed to the Managers, in addition to the Fixed Compensation. It is important to highlight that the total Variable Compensation will be paid on a date to be defined by the Board of Directors, and 50% of the net value of the Variable Compensation will be allocated for the purchase of preferred shares issued by Banco Bradesco S.A., which will be filed and unavailable ("Restricted Shares"). The Restricted Shares will become available in 3 (three) equal, annual and successive installments. The first installment will expire one year after the date of the acquisition of shares.

- Global Amount: includes the total compensation (Fixed Compensations and any possible Variable Compensation).

To determine the global amount for compensation, the Bradesco Organization observes the following aspects:

1. Bradesco Organization's Remuneration Committee: proposes to the Board of Directors the Global Amount for compensation (Monthly Compensation and possible Variable Compensation) and the payment of the Variable Compensation limited to Global Amount, to be distributed to the Managers of each subsidiary of the Organization.

To define the Global Amount for compensation (Monthly Compensations and possible Variable Compensation), the Remuneration Committee shall observe the following aspects:

- size and result of the company comparing to its competitors;
- domestic and international economic conditions, taking into consideration the past, present and future scenarios;
- internal and external factors that may affect the Organization's businesses (current and potential risks); and

Complementary Information
Attachment VII
Item 13 of Attachment 24 of CVM Instruction #480, of December 7, 2009

- Organization's global performance, involving the recurrent income realized and the capacity to produce cash flows.

The Remuneration Committee will use other indicators when deemed necessary and suitable. In addition, it will use studies, evaluations, surveys and other materials prepared by the technical areas, such as DEPEC (Department of Research and Economic Studies), DPOC (Department of Planning, Budget and Control), General Accounting and DCIR (Department of Integrated Risk Control), besides other areas it deems appropriate.

2. Board of Directors: Organization's highest management body. It must evaluate the Remuneration Committee proposals and approve them, fully or with amendments it deems necessary, or reprove them, observing the following.

3. Shareholder's Meeting: it is incumbent on the Shareholders Meeting to approve the Global Amount for the compensation of the Company.

After fulfilled all steps to determine and approve the Global Amount for compensation, it is incumbent on the Board of Directors of Bradesco to establish the compensation of each one of the Managers, comprised by Monthly Compensation and an possible Variable Compensation.

Audit Committee

The process to calculate and adjust the Audit Committee's compensation starts in the Remuneration Committee.

The Board of Directors, on its turn, evaluates the recommendations and proposals of this Committee and defines the amount of compensation for each Committee's member.

iv. reasons that justify the composition of compensation

Bradesco Organization adopts the system of "Closed Career", hiring new employees, preferably to the initial positions, developing and preparing these employees to hold higher positions, when available. So the executive positions are filled with trained professionals at own Organization and, therefore, reveal a consolidated personal career, focused on the Organization's goals, in medium and long terms.

At the same time the system of "Closed Career", and as a way to allow the utilization of its best professionals, Bradesco Organization promotes a constant and rotational motion, shifting employees/Managers, especially those in positions of command of areas. Bradesco Organization provides to the Manager, through the "Rotation of Duties", greater integration, experience, personal challenges and consolidation of career, being continuously monitored and evaluated for possible movements in the hierarchy.

Complementary Information
Attachment VII
Item 13 of Attachment 24 of CVM Instruction #480, of December 7, 2009

Within this context, the Organization aims to ensure that the compensation practice complies with the law, rules and regulations that govern the matter, based on (i) the Managers responsibilities, taking into consideration the different positions they hold and the functions they perform; (ii) the time devoted to their duties; (iii) the competence and professional reputation, considering their experience and qualification; and (iv) the value of its services in the market.

c) main performance indicators that are taken into consideration in determining each component of compensation

The uniformity in the treatment of work areas is one of the keys for the Organization's effectiveness, as a manner to inhibit the individualism, maintaining a good work environment favorable for teamwork.

The Organization maintains a collegiate management culture, in which all relevant decisions, business or administrative ones, are made by committees composed, primarily, by Managers.

Thus, even with the establishment of goals and objectives for all areas, individually, for purposes of compensation prevails the global performance of the Organization, making no segregation of area, if it is considered as area of business or support, technical or relationship.

The performance of Managers, considering the individual performances and the performance of their respective areas, is accompanied by their respective superiors.

For the formal evaluation process, specific indicators are defined for areas and for individual assessment, as the functions of the Manager, taking into account the areas for business, controls, and other support areas.

For areas assessment, the following groups of indicators are considered, as a minimum:

- a. main activity actions: are indicators that suggest the goals and objectives of the main activities of the area;
- b. actions focused on operational efficiency: are indicators that measure the operating efficiency, in order to maximize their results with minimum use of resources;
- c. actions directed to risks management: are corporate indicators that measure exposure to risk and the internal controls, properly monitored by the responsible Area (Integrated Risk Control Department - DCIR);

Complementary Information
Attachment VII
Item 13 of Attachment 24 of CVM Instruction #480, of December 7, 2009

d. actions directed to customer service: are indicators that assess the results/levels of satisfaction of internal and/or external customers; and

e. actions directed to environmental aspects: are indicators that assess the degree of compliance of the objectives of the area to environmental aspects.

For individual assessment, the following indicators are considered, as a minimum:

a. quality of the products/services: aims to evaluate the quality standards of products/services offered/rendered according to the area of the Manager evaluated;

b. commitment with strategy: aims to evaluate if its performance reflected positively with material contributions to the Strategic Planning in the period;

c. participation in collegiate decisions: aims to evaluate the active participation in meetings and committees convened, with opinions that contributed to the submitted decisions;

d. leadership team: evaluates the team management process;

e. planning: assesses the ability to plan the activities of their area in the medium and long term;

f. overview: evaluates, mainly, the Managers' vision about future trends to meet the demands of the market; and

g. applies to the Board of Directors and its respective members, if suitable, the indicators listed above.

The performance evaluations of Managers in the areas of internal control and risks management must be based on the achievement of the objectives of their own functions and not specifically in the overall performance of the Organization. The Integrated Risk Control Department-DCIR, and the General Inspectorate Department- IGL are considered areas of internal control and risk management in the context of the Bradesco organization, as well as the related areas of other companies of the Bradesco Organization.

d) how compensation is structured to reflect the evolution of performance indicators

It is up to the Board of Directors, after completion of all stages of definition and approval of the Global Amount, to set the value of the Fixed Compensation and, consequently, any Variable Compensation for each one of the Managers, in compliance with the following rules:

Complementary Information

Attachment VII

Item 13 of Attachment 24 of CVM Instruction #480, of December 7, 2009

- i. uniformity of compensation among members of the same hierarchy (office), or differentiation as a result of the time in that position, experience, academic background or other difference that the Board of Directors deems appropriate;

- ii. part of the Global Amount approved will be distributed in fixed equal monthly installments during the term of office of the Manager, subject to the provisions above, called Monthly Compensation;

- iii. the remaining part of the Global Amount may be distributed as Variable Compensation, upon proposal of the Remuneration Committee, which shall comply with, as a minimum, in addition to the scenarios set for the period, the (i) individual and unit performance of the business/area under responsibility of the Manager; (ii) the performance of the Organization as a whole; and (iii) the relationship among these performances and the risks assumed, recording the result of these analyses in the minutes of meeting of the Body itself, covering the distribution proposal.

Based on the assessment and proposal of the Remuneration Committee, the Board of Directors shall define, if applicable, the amount of the Variable Compensation that will be paid to Managers, which will correspond to multiple equal Monthly Compensation that each Manager is receiving at the date of the resolution for the payment of Variable Compensation.

e) how the compensation policy or practice is in line with the issuer's short, medium and long term interests

In addition to the current legislation, in Bradesco Organization, to fix the Managers' Compensation, it is taken into consideration the organizational culture, having as the main practices the "Rotation of Duties" in management positions, the adoption of the system of "Closed Career" for the ascension in functional and managing positions and the taking decisions, primarily by collegiate bodies.

It's a practice of Bradesco Organization to develop, continuously, its human resources, understanding that the personal and professional growth is the main motivation for its employees and managers. The system of "Closed Career" is the way to allow the use of its best professionals. The staff, in all levels, including the leadership, have absolute confidence in the possibility offered, to any employee, to ascend the Organization on its own merits, being possible for a bookkeeper to reach the position of Chief Executive Officer or Chairman of the Board of Directors.

Complementary Information
Attachment VII
Item 13 of Attachment 24 of CVM Instruction #480, of December 7, 2009

By force of this practice, consistently adopted over decades, is that the leadership positions, including in the Board of Directors, are held by people who began his career at Bradesco Organization.

In addition to this whole process of commitment of Managers, 50% of the net value of the Variable Compensation is for the acquisition of preferred shares issued by Banco Bradesco S.A., which will be recorded and unavailable ("Restricted Shares").

Restricted Shares will become available in 3 (three) equal, annual and successive installments, expiring the first installment 1 (one) year after the date of acquisition of shares, subject to any adjustments in the event of a significant reduction of Recurring Profit Made or occurrence of negative result of the Company during the Period of Deferral.

For the establishment of the deferral of 50% described previously, in order to meet the provisions of Article 7 of the CMN (National Monetary Council) Resolution #

3,921, the Organization takes into account the rotation of duties of the Managers mentioned, as well as the collegiate decision-making process through its various committees, with the consequent dilution of possible risks arising from its decisions. Thus, a single 50% of net amount of Variable Remuneration, therefore over 40% provided for in the Resolution, so as to balance the percentage of the deferred Variable Compensation at levels acceptable to all Managers.

f) existence of compensation supported by subsidiaries, controlled or direct or indirect parent companies

Not applicable.

g) existence of any compensation or benefit related to the occurrence of certain corporate event, such as the sale of the corporate control of the issuer

Bradesco does not practice this type of compensation.

The Company's management and oversight bodies are staffed with professionals affiliated to the Brazilian Institute of Financial Executives ("IBEF") of Rio de Janeiro. On March 2, 2010, the IBEF obtained from the 5th Federal Court of Rio de Janeiro Judicial District (lawsuit 20105101002888-5) an injunction worded as follows:

"Now, therefore, I GRANT the pleaded injunction, determining the suspension of the validity of sub-item 13.11 of attachment 24 of CVM Instruction #480, in relation to IBEF associates and, consequently, to the companies to which they are linked, prohibiting the application of any sanction in the affiliates or in the companies to which they are linked until the subsequent decision of this Court."

On May 17, 2013 a judgment on the merits of the referred lawsuit was handed down, through which the **aforementioned injunction was ratified and the request made by IBEF was upheld**, having been given to the defendant - CVM -, that: *"...abstain from implementing the requirement contained in subsection 13.11 of Attachment 24 of CVM Instruction #480, as well as apply any penalty related to the noncompliance to the referred request, to IBEF associates and to the companies to which they are linked..."*.

CVM filed an appeal, which was received only on devolution effect, and the case was sent to the Federal Regional Court of the 2nd Region, according to order made in first instance on 12/19/2013.

The reason for the suspension of the disclosure of minimum, medium and maximum compensation of the members of the companies' management and oversight bodies is based on the preservation of individual rights to privacy and safety of the individual members of said statutory bodies.

In respect to these individual rights and judicial decision referred to above, the Company will not disclose the information, unless judicial determination otherwise.

10.1 - General Financial and Equity Conditions

Directors should comment:

a) general financial and equity conditions

The directors understand that the Bank has all financial and asset conditions to ensure the compliance with obligations, guaranteeing the business expansion in the short- and long-terms.

The directors' analysis is based on information from the last three financial statements at the balance sheet date and the last financial information disclosed, as follows:

2014

In 2014, Brazil experienced yet another moment in its well-established democracy, promoting elections that generated great interest from the general public –who were involved by the strength of the campaigns and a fierce contest at the polls. Now, economic officials face the task of revisiting projections and strategies, setting the groundwork for changes that can lead the country towards a leap in development.

The Bradesco Organization believes there are reasons to feel optimistic about the future of Brazil. In this context, we hope that domestic economic policy and external factors, such as the recovery of the US economy and the recovery efforts of the economies pegged to the Euro, can create growth opportunities in the country.

At Bradesco, among the most significant events of this past year, we should emphasize our permanence in the select group of companies in the BM&FBovespa's ISE (Corporate Sustainability Index), and the Dow Jones Sustainability Index, of the New York Stock Exchange, which it comprises for the ninth consecutive year; the launch of the payment solutions company Stelo S.A., as well as that of LIVELO S.A., which will take care of business related to a coalition loyalty program -both in conjunction with Banco do Brasil. Also worth mentioning were the opening of the second Fluvial Service Station on the Solimões River, serving 11 riverside towns along a 1,600- km extension of the river, and the establishment of the first branch in Vila Kennedy, a community in the west side of Rio de Janeiro, aimed at the financial inclusion of approximately 130 thousand residents.

As it celebrates 71 years of existence, Bradesco boasts a strong balance sheet position that confirms the success of the strategies applied, which in turn are consistent with the choice of retail banking as our flagship product line for the goals democratization of credit and banking inclusion. Our market performance is the result of the instrumentality of an extensive and well-distributed Service Network and of our digital channels. This wide range of options is made possible by a constant and robust investment in infrastructure and especially in technology, which positions Bradesco at the forefront of banking technology.

the Reference Form of CVM Instruction # 480, as of December 7, 2009

The Bradesco Organization maintains its commitment to corporate sustainability, seeking to integrate its basic principles to its global strategic planning. Among its social initiatives, we should highlight the work developed by the Bradesco Foundation, which offers free and high-quality education. The foundation focuses its work on regions that face greater educational and healthcare shortages in the country, with a network of 40 schools that constitute one of the largest socio-educational programs promoted by the private sector on a global scale.

The strength of the Bradesco brand will remain a powerful ally in the continuous effort of earning and maintaining market positions, and it is boosted by the competent and loyal dedication of its directors and employees, to whom we express our gratitude. We also wish to thank our customers and shareholders for the trust which has allowed us to stand apart from the competition.

The following are some of the most noteworthy events involving the Bradesco Organization over the past year:

- **on April 17 Bradesco and Banco do Brasil launched Stelo S.A.**, a payment solutions company that manages, operates and explores the payment facilitator segment for e-commerce and digital portfolio business; **on May 14, they formed LIVELO S.A.**, whose purpose will be to explore businesses related to coalition loyalty program, allowing the client to accumulate and redeem points in various partners;

- **on May 27 the second Fluvial Service Station was inaugurated aboard the ship Voyager V, in the Solimões River in the Amazon.** The new ship serves approximately 50 communities and 11 cities, covering a stretch of around 1,600 kilometers between Manaus and Tabatinga and bringing banking services that make life easier at these riverside communities;

- **on July 7, Bradesco was issued the Quality Certificate issued by IIA -Institute of Internal Auditors, an entity present in more than 130 countries, empowered to assess and grant the Quality Certificate to internal audits.** The certificate is the recognition that Bradesco has an internal audit structure that is prepared to act independently in all its dimensions, with emphasis on best practices for Risk Assessment and for the effectiveness of Internal Controls;

- **on July 17, Bradesco and the major retail Banks in the country signed a new Shareholders' Agreement for TecBan -Banking Technology S.A.**, which provides that, in approximately 4 years, their external networks of Self-Service Terminals will be consolidated into Banco24Horas terminals;
- **on July 28 Bradesco formalized a strategic partnership with IBM Brasil Indústria Máquinas e Serviços Ltda.**, which will provide hardware and software support and maintenance activities, currently provided by Scopus Tecnologia Ltda. IBM will take over the operational structure from Scopus, and all support and maintenance contracts signed between Scopus and its other clients;
- **on August 4, the opening of the first branch in Vila Kennedy**, a community located in the west side of the city of Rio de Janeiro, allowing the financial inclusion of approximately 130 thousand residents;

Consolidated Shareholders' Equity amounted to R\$ 81.508 billion and total assets stood at R\$ 1.032 trillion.

Loan operations

The democratization of credit can be achieved by expanding and diversifying the credit available, and by more attractive interest rates. These key factors have increased the volume of financing operations conducted directly or in partnerships with market players, as well as in other lines aimed at individuals, such as payroll-deductible loans, through an extensive network of Branches, PAs (Service Branches) and Sales Promoters.

- R\$ 455.127 billion was the balance, at year-end, of the consolidated credit operations, in the expanded concept, including sureties and guarantees, letters of credit, advances of credit card receivables, debentures, promissory notes, co-obligation in receivables-backed investment funds, mortgage-backed receivables and rural loans, for a 6.5% increase for the year.

- R\$ 23.146 billion was the consolidated balance of the provision for doubtful accounts, considering an additional provision of R\$ 4.007 billion, which includes provision for guarantees provided, in the amount required by Resolution No. 2682/99 issued by the National Monetary Council.

Funding and Asset Management

At year-end, the funds obtained and managed totaled R\$ 1.426 trillion, 13.2% higher than the previous year. In all, the Bank manages 26.482 million checking account customers, 59.091 million savings accounts with balances of R\$ 92.155 billion, accounting for 17.6% of the SBPE – Brazilian Savings and Loan System.

2013

The year 2014 will be challenging comparing to the start of the reduction of monetary stimuli in the U.S., as well as the slight slowdown in China's growth. A scenario to be overcome by emerging countries, on the other hand, is a unique opportunity for those nations to improve their macroeconomic and institutional foundations.

Brazil is not immune to this external context, but is better poised to face the challenges. The resumption of economic activity in Brazil in the last few months of 2013 has been supported mainly by productive investments, which tend to become intensified with the current program of public concessions in infrastructure, as well as the major sporting events that will occur between 2014 and 2016.

Bradesco remains optimistic about Brazil, envisioning a favorable outlook in the segments in which it operates. The volume of credit tends to grow at sustainable rates compatible with the

risk, while gains in income and creation of jobs are still present. Given the intense and continuous process of social mobility in recent years, which is still under way, the scenario for the banking and insurance sectors in Brazil remains very promising.

At Organização Bradesco, among the major events of the fiscal year, it was recorded that on March 10, Bradesco completed 70 years in business, with an active presence in Brazilian life, permanent incentives for the democratization of financial products and services, and a renewed willingness to expand its business horizons. Guided by realistic strategies, it grew rapidly and soon became the Bank of the Brazilians. For such, it built an extensive Customer Service Network that today allows it to be present in all regions of the nation, promoting banking inclusion and social mobility.

It is also noteworthy that Organização Bradesco has once again been selected to be part of:

- **Dow Jones Sustainability World Index** -DJSI, a select list of the New York Stock Exchange that gathers companies with best practices for sustainable development, in addition to the **Dow Jones Sustainability Emerging Markets**, a portfolio created earlier this year, for which companies with DJSI performance ranked among the top 10% in their respective sector are eligible; and

- **Corporate Sustainability Index (ISE) of BM&FBOVESPA S.A. - Securities, Commodities and Futures Exchange**, which reflects the return of a portfolio comprised of shares of companies with the best performance in all dimensions that measure corporate sustainability.

Book net income was R\$ 12.011 billion for the year, corresponding to R\$2.86 per share and annualized return of 17.7% on average Shareholders' Equity. The return on average total assets was 1.3%. Consolidated Shareholders' Equity amounted to R\$ 70.940 billion and total assets stood at R\$ 908.139 billion.

Loan Operations

The democratization of credit is part of Bradesco's strategy. It is achieved through expansion and diversification of the offer and the more attractive interest rates, differentiating factors that have increasingly risen the volume of transactions in loans made directly or in partnerships with market agents and other lines aimed at individuals, such as payroll lending, through its extensive network of Branches, Service Stations and Sales Promoters.

- R\$ 427.273 billion was the year-end balance of consolidated loan operations, in the expanded concept, which includes Sureties and Guarantees, Letters of Credit, Prepaid Credit Card Receivables, Debentures, Promissory Notes, Co-obligation in Assignments for Investment Funds in Credit Rights, Real Estate and Rural Loans Receivables Certificates, with an increase of 10.8% in the period.

- R\$ 21.687 billion was the consolidated balance of the provision for doubtful accounts, considering an additional provision of R\$ 4.036 billion, which includes provision for guarantees provided, in the amount required by Resolution No. 2682/99 issued by the National Monetary Council.

Funding and Asset Management

Bradesco manages, on the whole, 26.400 million account holders, and 50.897 million savings account holders with a balance of R\$ 80.718 billion, which accounts for 17.2% of the Brazilian Savings and Loans System (SBPE). At the end of the year, the Organization's total funding and asset management reached R\$1.260 trillion, a 2.8% increase as compared to the previous year.

- R\$474.342 billion in demand deposits, time deposits, interbank deposits, Federal funds purchased and securities sold under agreements to repurchase and savings deposits, a 1.5% increase.
- R\$435.364 billion in managed funds, comprising Investment funds, managed portfolios and third-party fund units.

At the end of the 2013 fiscal year, Bradesco's market value, taking into account the closing quotations of ON and PN common and preferred shares, was R\$ 128.085 billion. Starting in May 2013, Bradesco's common shares became part of the Bovespa Index.

2012

The year of 2012 posed a rather challenging scenario. It is important to evaluate the changes observed in the financial system, in view of the period experienced by the sector in the last years. Institutions have accordingly redoubled the attention they pay to the flow of operations, whereas also expanding the range of general services offered to customers.

In mid-2012, the world's foremost central banks -atypically and sternly -renewed or extended the commitment to provide liquidity to the markets, which contributed decisively to reducing the risks of extreme events on the international scenario. On the other hand, the need for fiscal adjustment in the U.S. and Europe maintains a bias for sluggish global growth in 2013.

Brazil is not immune to this global scenario, in spite of the improved macroeconomic fundamentals observed in the last years. Brazil, however, starts to reap the benefits of the larger room for maneuver it enjoys in comparison to other countries. The several incentive measures adopted over the last months have started producing visible effects regarding the resume of the economic activity, whereas certain relevant steps have been taken to improve infrastructure, adjust tax distortions and enhance the efficiency of the production sector,

and these are significant topics for improving the economy growth.

In spite of Brazil's undeniable vocation to export, the main economic driving force has been and will continue to be the domestic demand, particularly the consumption by families and investments, which benefit from the upcoming great sports events to be held in the next three-year period. In this context and in view of the ongoing social mobility process and the readiness of Brazilian institutions in face of the new rules of capital limits and structure that should be implemented beginning 2013, the perspectives for the Brazilian banking system remain favorable.

For the Organização Bradesco, among the significant events highlighting the period, noteworthy were the following:

- **on March 5, start of activities of subsidiary Bradesco Securities Hong Kong Limited, in Hong Kong, China**, aimed at prospecting opportunities and distributing fixed- and non-fixed income products. Accordingly, Bradesco expands its international distribution channels, strengthening contacts with global investors present in that market, in addition to providing access to a new base of institutional investors;

The following are comments about our key indicators:

I) Capital Adequacy Ratio

Brazilian financial institutions are subject to methodology for capital metrics and levels based on a risk-weighted asset index. The parameters of this methodology resemble the international framework for minimum capital measurements adopted for the Basel Accord. Starting in October 2013, the implementation of the new capital structure began in Brazil. The Central Bank of Brazil (Bacen), through CMN Resolution nº 4192/13, set out the new methodology for calculating the Referential Equity, or "PR (Patrimônio de Referência), superseding CMN Resolution nº 3444/07.

(1) Since October 2013, capital is calculated as per CMN Resolution No. 4192/13, which establishes that calculation is based on the “Financial Consolidated” by December 2014 and “Prudential Consolidated” as of January 2015;

(2) The prudential adjustments are progressive deductions that are already being applied on the main capital and will follow the implementation schedule, as provided by CMN Resolution No. 4192/13. The impact of these adjustments in the Common Equity deduction was 0% in 2013, 20% in 2014, and will be 40% in 2015, 60% in 2016, 80% in 2017 and 100% in 2018;

(3) Furthermore, it is important to note that, from the total amount of subordinated debt, R\$ 21,406 million will be used to compose the Tier II of the Capital Adequacy Ratio, calculated as per the CMN Resolution No. 4.192/13 (and amendments thereof), effective as of October 2013; and

(4) Since October 2013, the Capital Adequacy Ratio calculation follows regulatory guidelines set forth in CMN Resolutions No. 4192/13 and 4193/13.

In December 2014, Capital stood at R\$ 98,605 million, against risk-weighted assets totaling R\$ 597,213 million. The Capital Adequacy Ratio recorded a slight drop of 0.1 when compared to the previous year, going from 16.6% in December 2013 to 16.5% in December 2014, which is basically a result of: (i) 20% applied over prudential adjustments, as per CMN Resolution No. 4192/13; (ii) increase in risk-weighted assets, caused by the expansion of the loan portfolio; and partially offset by (iii) an increase in Shareholders’ equity, due to the growth in income recorded in the year.

It is worth mentioning that in December 2014, only R\$ 21,406 million of the total subordinated debt were used in the calculation of the Basel Index, given the respective maturity.

In 2013, as a result of the implementation of the new capital requirements, it is not possible to compare the indexes with those of 2012.

(3) $\text{Operating Coverage Ratio} = (\text{Fee and Commission Income}) / (\text{Administrative Expenses} + \text{Personnel Expenses} + \text{Employee Profit Sharing})$.

Operating Efficiency Ratio (ER)

A 2014 to 2013 comparison shows an improvement of 2.9 p.p. in the ratio, reaching 39.2% in 2014, which represented the highest level in recent years. This result was basically due to: (i) investments in organic growth, which enabled an increase in income; and (ii) the continued efforts to control expenses, including our Efficiency Committee actions and investments in Information Technology, which have improved internal systems and processes.

A 2013 to 2012 comparison shows a 0.6 p.p. in the ratio. The increase was due in most part to a reduction in the financial margin of “non-interest” as well as the impact of the collective bargaining agreements of 2012 and 2013.

Operating Coverage

In the comparison between 2014 and 2013, and between 2013 and 2012, the index of operational coverage showed improvement, mainly reflecting the increase in revenue from services provided, coupled with ongoing efforts to control expenses, including actions by our Efficiency Committee in the period and measures applied to increase the offer of products and services to the entire customer base.

III) Main loan portfolio indicators

Delinquency Ratio > 90 days(1)

(1) Concept defined by the Central Bank of Brazil.

In December 2014, the delinquency ratio over 90 days amounted to 3.5% of the credit portfolio, remaining stable compared to December 2013, and recording a decrease compared to the last quarter.

In December 2013, the total delinquency ratio, comprising transactions overdue over 90 days, had a decrease in the quarter and in the last twelve months. Such decrease was mainly due to: (i) the investment in the ongoing improvement in loan assignment models; (ii) the growth of payroll- deductible loan and real estate financing products, which impacted the portfolio mix; and (iii) the improvement in internal models of loan risk monitoring. The higher delinquency ratio among Corporations was due to specific cases and does not represent a trend. The increase in delinquency ratios of Corporations is associated to individual cases and does not represent a trend.

In December 2012, the delinquency ratio for accounts over 90 days past due reached 4.1% of the credit portfolio, up 0.2 p.p. compared to December 2011, primarily due to increases of: (i) 0.3 p.p. in the delinquency ratio for SMEs; and (ii) 0.1 p.p. in the delinquency ratio for Individuals.

Deposits

Deposits are our most important source of funding. Our deposits balance over these years progressed in the following manner:

- In December 2014, the balance of our deposits was down by approximately 2.8% year-over-year, mostly due to new business opportunities offered to customers, basically due to interest rate fluctuations in the period; and
- In December 2013, the balance of our deposits was up by approximately 2.7% year-over-year, mainly due to increased funding volume in the form of demand and saving deposits.

Deposits accounted for 39.0% of all obligations in December 2014. Our deposits consist primarily of real-denominated, interest-bearing time and savings deposits and real-denominated, non- interest-bearing demand deposits. The decrease of R\$ 9,976 million in time deposits, between 2014 and 2013, was basically a result of the new investment alternatives offered to customers.

Savings deposits increased 14.2%, mainly as a result of: (i) greater funding volume; (ii) the yield of savings account reserve; and (iii) increase in voluntary deposits by customers.

Demand deposits were down R\$ 7,589 million between 2014 and 2013, mainly due to new business opportunities offered to customers.

In December 2014, we had 26.5 million account holders and 59.1 million savings accounts, compared to 26.4 million account holders and 50.9 million savings accounts in December 2013. In December 2012, we had 25.7 million account holders and 48.6 million savings accounts.

Debentures

The increases stated in the comparison between December 2014 and 2013 and between December 2013 and 2012 basically refer to the placement of these securities, used as a guarantee in repurchase agreements, which were impacted by the pace of the economic activity.

Borrowing and Onlending

In the comparison between 2014 and 2013, the balance of Borrowings and Onlendings was up 5.2% or R\$ 2,903 million, basically due to: (i) the increase of R\$ 1,621 million in the volume of funds raised by borrowings and onlendings in the country, particularly through Finame operations; and (ii) the increase of R\$ 1,282 million in borrowings and onlendings denominated and/or indexed in foreign currency, whose balance rose from R\$ 15,400 million in December 2013 to R\$ 16,682 million in December 2014, primarily due to the positive exchange rate variation of 13.4% in the period.

The increase of 27.0% (R\$ 11,909 million) in fiscal year 2013 compared to 2012 is due primarily to: (i) an increase of R\$ 7,231 million in loan obligations and onlendings denominated in and/or indexed to foreign currency, which increased from R\$ 8,169 billion in December 2012 to R\$ 15,400 million in December 2013, mainly brought on by: (a) the foreign exchange gain of 14.6% in the period, and (b) increase of the volume raised; and (ii) the increase of R\$ 4,678 million in the volume of funds raised through loans and transfers in Brazil, mainly through Finame operations. R\$ 4,678 million in the volume of funding raised by borrowings and onlending in the country, particularly through Finame operations.

Funds from securities issued

In the comparison between December 2014 and 2013, the increase of 47.1% or R\$ 27,171 million in Funds from securities issued was primarily due to: (i) increased inventory of Financial Bills, from R\$ 35,208 million in December 2013 to R\$ 54,961 million in December 2014, mainly due to new issuances in the period; (ii) higher volume of Mortgage Bonds, in the amount of R\$ 5,867 million; (iii) higher volume of Letters of Credit for Agribusiness operations, totaling R\$ 4,199 million; and partially offset by: (iv) a R\$ 2,709 million reduction in the volume of securities issued overseas.

The increase of 12.3% (R\$ 6,295 million) in 2013 compared to fiscal year 2012, was primarily due to: (i) the increase in the inventory of Financial Notes, the balance of which increased from R\$ 28,221 million in December 2012 to R\$ 35,208 million in December 2013, mainly due to new issues during the period; (ii) the increase in operations of Real Estate Financial Notes, in the amount of R\$ 1,766 million, partially offset: (iii) by the reduction of R\$ 2,713 million in the volume of operations of securities issued abroad.

e) financing sources for working capital and investments in non-current assets that it intends to use to cover liquidity deficits

The Directors report that as sources of financing for working capital and for investments in non-current assets used to cover liquidity shortfalls, the company may use the following resources: (i) Deposit Raising; (ii) Issuance of Debentures; (iii) Loans; (iv) Issuance of Securities; and (v) Injection of Capital by the controlling shareholders. It should be pointed out that Bradesco's Treasury Department acts as a support center for our business segments by managing the funding and liquidity positions and executing investment objectives in accordance with asset and liability management policies. It is also responsible for setting the rates for our different products, including interbank rates. The Treasury Department covers any funding shortfall through borrowing in the interbank market, investing any surpluses in liquid instruments in the interbank market.

In some limited circumstances, we may obtain emergency funds from the Central Bank of Brazil through a transaction referred to as "discount". A discount is a loan from the Central Bank of Brazil to a financial institution, that loan being guaranteed by Federal Government securities owned by the financial institution. The amount of Federal Government securities held by the financial institution as trading securities limits the amount of discount transactions. Bradesco did not enter into discount transactions for liquidity purposes.

f) indebtedness ratios and the characteristics of the debts, also describing: i) relevant loan and financing agreements; ii) other long-term relationships with financial institutions; iii) level of subordination between debts; iv) any restrictions imposed on the issuer, in particular in relation to limits for indebtedness and contracting new debts, to the distribution of dividends, disposal of assets, issue of new securities and disposal of shareholding control

There are no loan and financing agreements or long-term relationships with financial institutions that we believe are relevant for Bradesco.

Financial institutions are subject to operating limits defined by the National Monetary Council and the Central Bank of Brazil for operating, according to provisions of the regulations in force, particularly Law 4595/1964, which sets forth the National Financial System.

Among the limits defined, noteworthy are as follows (i) Reference Equity consistent with the risks of its activity, (ii) fixed assets, which limits to 50% of the Reference Equity the total funds invested in Permanent Assets, (iii) exposure by customer, which sets forth the maximum limit of 25% of the amount of Reference Equity of exposure by customer, (iv) exposure in gold, foreign currency and in operations subject to foreign exchange variation, limited to 30% of the Reference Equity amount, and (v) minimum limits of realized capital and shareholders' equity for operating.

the Reference Form of CVM Instruction # 480, as of December 7, 2009

Rules also bar financial institutions from carrying out certain operations, and noteworthy are as follows: (i) granting loans or advances to related companies, managers and relatives, and (ii) acquiring real estate not intended for own use.

the Reference Form of CVM Instruction # 480, as of December 7, 2009

Financial margin

Financial margin for 2014 reached R\$ 48,295 million, up 11.6% (R\$ 5,009 million) year-over-year, as a result of the following factors: (i) growth in income from operations that yield interest, totaling R\$ 5,120 million, due to the increase in business volume, particularly in "Loans" and "Funding", and partially offset by: (ii) lower income from the non-interest earning portion, totaling R\$ 111 million.

In 2013, the net interest income came to R\$ 43,286 million, down 1.2% (R\$ 507 million) compared to 2012, caused by the following factors: (i) the lower result of the "net non-interest income" in the amount of R\$ 1,172 million, due to lower gains from market arbitrage; and partially offset by: (ii) the increase in income from operations that yield interest in the amount of R\$ 665 million, resulting from the increase in business volume, particularly "Loans" and "Funding".

Allowance for Loan Losses (ALL)

In 2014, the Allowance for Loan Losses (ALL) totaled R\$ 12,657 million, up 5.1% (R\$ 612 million) year-over-year, basically due to the 7.3% increase in loan operations –Bacen concept; and partially offset by the stable delinquency ratio in the last 12 months.

In 2013, the expense on Allowance for Loan Losses (ALL) totaled R\$ 12,045 million, down 7,4% (R\$ 969 million) from the previous year, a result of reduced level of defaults in the last 12 months, even considering the 11,0% growth of loan operations –Bacen concept.

Income from Insurance, Pension Plan and Capitalization Operations

In 2014, the income from insurance, pension plan and capitalization bonds operations reached R\$ 5,047 million, up 12.9% (R\$ 576 million) year-over-year.

In the annual comparison, disregarding the DPVAT agreement, a 13.9% increase was recorded for written premiums, pension plan contribution and income from capitalization bonds. This increase was due to the performance of all segments, which recorded over a two-figure growth.

Adjusted net income for 2014 was R\$ 4,406 million, up 17.8% year-over-year. This change is a reflection of: (i) growth in billing; (ii) maintenance of claims and expense ratios; (iii) improvement in the administrative efficiency ratio; and (iv) improved financial and equity income.

In 2013, the income from insurance, pension plans and capitalization bonds reached R\$ 4,471 million, up 17.2% (R\$ 657 million) year-over-year.

In the comparison between 2013 and 2012, a 12.3% increase was recorded for written premiums, pension plan contribution and income from capitalization bonds. This change was due to the performance of all segments, primarily "Health" and Capitalization, both with double-digit growth rates.

It should be pointed out that the adjusted net income for 2013 was R\$ 3,740 million, with an increase of 4.3% as compared to the same period of the previous year. This change is a reflection of: (i) the 12.3% growth in billing; (ii) improved financial and equity result; and (iii) maintenance of loss ratios and administrative efficiency.

Fee and Commission Income

In 2014, the Fee and Commission Income totaled R\$ 22,089 million, up 11.6% (R\$ 2,303 million) year-over-year, mainly due to: (i) increase in the volume of operations, resulting from continuous investments in technology and service channels; and (ii) progress in the customer segmentation process, allowing a more adequate offer of products and services. It is worth highlighting that the incomes that have most contributed to this result derived from: (i) the good performance of the cards activity, result of (a) increased revenue; (b) increased credit and debit cards base; and (c) the greater volume of transactions performed; (ii) the growth of checking account incomes, primarily due to increase in business; (iii) greater loan operations income, resulting from an increase in the volume of operations and sureties and guarantees in the period; and increase in income from: (iv) consortium management; (iv) fund management; and (vi) collection.

In 2013, Revenues from Services reached R\$ 19,786 million – an increase of 13.0% (R\$ 2,274 million) in comparison with 2012, mainly provided by: (i) by the performance of the credit card segment credit, a result of increased billing and transactions made; (ii) growth of checking account revenue, due to the increase of business and checking account customer base, which showed a net increase of active 707,000 account holders in the period; (iii) the higher revenues from loan operations, resulting from the increased volume of contracted operations and operations of sureties and guarantees in the period; (iv) the increase of revenues from collections; (v) the increase in revenue from fund management whose average volume of funds raised and managed portfolios increased 8.3% in the period; and (vi) changes in revenue through management of consortia.

Personnel Expenses

In 2014, Personnel Expenses totaled R\$ 13,967 million, up 6.9% (R\$ 906 million) year-over-year, mainly due to the increase in the “structural” portion in relation to increased expenses on salaries, social charges and benefits, and offset by wage increases, as per the collective bargaining agreements of 2013 and 2014 (readjustments of 8.0% and 8.5%, respectively); and the non- structural portion, regarding (i) employee and administrator profit sharing (PLR); and (ii) cost of terminations and charges.

In 2013, Expenses on Personnel reached R\$ 13,061 million, an increase of 7.2% (R\$ 875 million) compared to 2012, primarily due to: (i) the amount of R\$ 570 million (or 5.8%), in the “structural” portion, mostly related to the increase in expenses on salaries, social charges and benefits, impacted by increases in salary level, as per the collective bargaining agreements of 2012 and 2013 (increases of 7.5% and 8.0%, respectively); and (ii) the “non-structural” portion of R\$ 305 million, due mainly to higher expenses on: (a) provision for labor-related lawsuits; and (b) profit sharing for managers and employees (PLR).

Administrative Expenses

In 2014, Administrative Expenses totaled R\$ 14,848 million, up 2.3%, primarily due to a consistent cost control, despite increasing expenses with: (i) growth in turnover and services in the period; (ii) contractual adjustments; and (iii) expansion of 2,440 Service Points in the period, totaling 75,176 Service Points on December 31, 2014. We should note the performance of inflation indexes over the past 12 months: the IPCA and IGP-M were up 6.4% and 3.7%, respectively.

Complementary Information
Attachment X - Management's Comments on the Company, according to Item 10 of
the Reference Form of CVM Instruction # 480, as of December 7, 2009

In 2013, administrative expenses totaled R\$ 14,512 million, an increase of 2,5% (or R\$ 350 million), due to strong cost control through the coordinated actions of our Efficiency Committee. Also noteworthy is the following: (i) the expansion of 3,819 Service Points in the period, for a current total of 72,736 Service Points on December 31, 2013; (ii) the increased volume of business and services in the period; (iii) contractual adjustments; and (iv) the behavior of inflation rates in the past 12 months, by the IPCA and IGP-M price indexes, which reached 5.9% and 5.5%, respectively.

Tax Expenses

Increases in Tax expenses for both the comparative period between 2014 and 2013 and the period between 2013 and 2012 are basically due to the higher expenses on service tax and taxes on income (ISS/PIS/COFINS), arising from the rise in tax revenues, particularly in the financial margin and banking services fees in such periods.

Other Operating Revenues and Expenses

In the comparison between 2014 and 2013, the 13.7% (R\$ 652 million) increase in other operating expenses, net of other operating income, basically reflects: (i) higher expenses with operating provisions, mainly contingent liabilities; and (ii) higher expenses with the "CreditCard" product sales.

In the comparison between 2013 and 2012, other operating expenses, net of other operating income, showed a variation of R\$ 529 million, mainly reflecting higher expenses on: (i) establishment of operating reserves, particularly for civil contingencies; and (ii) amortization of intangible assets.

(1) Including debenture and promissory note operations.

Loan operations for Corporate customers were up 5.8% in the comparison between the 2014 and 2013 balances. The main highlights of the quarter were the following lines: (i) real estate financing; and (ii) rural loans.

In the comparison between the 2013 and 2012 balances, loan operations for Corporate customers were up 10.6%, particularly regarding: (i) export financing; and (ii) real estate financing.

Income from Securities, Derivatives and Foreign Exchange Operations

In the comparison between the 2014, 2013 and 2012 balances, the variations recorded in income from securities refer to the higher volume of operations with fixed-income securities.

Financial Income from Insurance, Pension Plans and Capitalization Bonds

In 2014, the financial income from insurance, pension plans and capitalization bonds totaled R\$ 15,046 million, up 52.2% compared to 2013, basically due to higher income from investment funds.

In 2013, the financial income from insurance, pension plans and capitalization bonds totaled R\$ 9,888 million, down 15.4% compared to 2012, basically due to lower income from investment funds.

Result from Compulsory Deposits

In the comparison between the 2014 and 2013 balances, the 37.3% increase in income derives mainly due to the 14.2% increase in the balance of savings deposits.

In the comparison between the balances of 2013 and 2012, the 18.2% reduction in revenues resulted primarily from the 7.9% decrease in the balance of time deposits.

Income from Insurance retained Premiums, Pension Plans and Capitalization, and Banking Services Fees

Regarding the variations in income from insurance retained premiums, pension plans and capitalization and banking services fees, the related comments are included in item 10.1.h.

ii) factors that materially affected the operating results

Directors report that no factors have occurred that might significantly affect the company's operating results in the last three fiscal years other than those described in item 10.1 h and 10.2.a. i.

Complementary Information

the Reference Form of CVM Instruction # 480, as of December 7, 2009

b) variations in income from price changes, foreign exchange rates, inflation, changes in volumes and introduction of new products and services

Directors report that there were no significant variations in the issuer's financial income or revenues attributable to changing prices of our main inputs and products, exchange rates, inflation, altered volumes or the introduction of new products and services for the years ended December 31, 2014, 2013 and 2012.

c) impact of inflation, variation of prices of main inputs and products, and foreign exchange and interest rates on the issuer's operating income and financial income

During periods of high interest rates, our financial income increases because the interest rates on our interest-earning assets are higher too. At the same time, we incur higher financial expenses since interest rates on interest-bearing liabilities are also higher. Changes in volumes of our assets and liabilities that incur interest also affect our revenues and expenses. For example, an increase in our interest income attributable to higher interest rates may be offset by a reduction in the volume of our outstanding loans.

Moreover, when the Brazilian real depreciates, we incur: (i) losses on our liabilities denominated in or indexed to foreign currency, such as our long-term debt denominated in USD and foreign currency borrowings, in such a way that the cost in BRL of the relative financial expense increases; and (ii) gains in our assets denominated in and/or indexed to foreign currency, such as our securities and loan operations indexed to the USD, when the revenue from these assets measured in BRL increases. Conversely, when the Brazilian real appreciates, we incur: (i) losses on our assets denominated in and/or indexed to foreign currencies; and (ii) gains on our liabilities denominated in or indexed to foreign currency.

In 2014, the interest earning portion increased 12.0%, rising from R\$ 42,686 million in 2013 to R\$ 47,806 million in 2014. The R\$ 5,120 million increase in the interest earning portion income resulted mainly from the increased business volume, particularly in "Loans" and "Funding". It is important to note that the interest rate (CDI) increased from 8.06% in 2013 to 10.81% in 2014, generating higher gains in "Funding" margins.

In 2013, the interest earning portion increased 1.6%, from R\$ 42,021 million in 2012 to R\$ 42,686 million in 2013. The increase of R\$ 665 million in the income from interest transactions resulted mainly due to the increased business volume, and noteworthy were “Loans” and “Funding”. It is noteworthy that the interest rate (CDI) increased from 8.40% in 2012 to 8.06% in 2013.

Directors should comment:

a) significant changes in accounting practices

Directors report that no significant changes were made to the accounting practices we use in the fiscal years ended December 31, 2014, 2013 and 2012.

b) significant effects of changes in accounting practices

The Directors of Banco Bradesco highlight that, although there have been no significant changes in our accounting practices, it is noteworthy that, unlike the other publically-traded companies that are already using all of the "CPCs", financial institutions use eight of the technical accounting standards issued by Brazil's Accounting Standards Committee (CPC), which were approved by the National Monetary Council (CMN). The other CPC statements, interpretations and guidelines will only be applicable to financial institutions after approval by the National Monetary Council.

It is currently not possible to estimate when National Monetary Council will approve the other CPC accounting statements or if their adoption will be prospectively or retrospectively.

The eight CPC accounting statements approved by the National Monetary Council were as follows:

- Resolution 3566/08 –Asset impairment (CPC 01);
- Resolution 3604/08 –Statement of cash flows (CPC 03);
- Resolution 3750/09 –Related party disclosures (CPC 05);

10.5 - Critical Accounting Policies

Directors should indicate and comment on the critical accounting policies adopted by the issuer, in particular, accounting estimates made by management on uncertain and relevant issues for describing the financial position and results of operations that require subjective or complex judgment, such as: provisions, contingencies, revenue recognition, tax credits, long-lived assets, useful life of non-current assets, pension plans, foreign currency translation adjustments, environmental recovery costs, criteria for asset and financial instrument impairment tests.

Bradesco has disclosed critical risk factors and accounting policies, in conformity with the best international transparency and Corporate Governance practices, in relation to possible political and economic situations in the domestic and foreign markets, which may directly impact the day-to-day of operations and accordingly, the Bank's financial position.

Our Directors believe that the Banco Bradesco's results are subject to accounting policies, assumptions and estimates. It is Management's responsibility to adopt fair accounting practices, in addition to using judgment while carrying out reasonable and conservative estimates to be used in the preparation of financial statements.

Regarding materiality, the items below describe the accounting policies deemed as critical, as well as the areas demanding better judgment or involving a high complexity level, which may affect our financial position and the result of our operations. The accounting estimates we carry out in this context cause us to make assumptions on issues involving uncertainties. In each case, if our estimates are not confirmed, in the comparison with effective results, there may be significant impacts on our financial situation or the results of our operations.

Allowance for doubtful accounts

The allowance for doubtful accounts is calculated in an amount sufficient to cover possible losses and take into account the rules and instructions issued by National Monetary Council and

Central Bank of Brazil, together with the appraisals carried out by Management upon calculation of credit risks.

At the end of each period, the allowance for doubtful accounts is adjusted based on the analysis of our portfolio, including the estimate of losses in loan and leasing operations and other operations with credit characteristics.

In view of its nature, the definition of the allowance for doubtful accounts requires us to make judgments and assumptions related to our portfolios, both on individual and product-specific portfolio bases. Whenever we reassess the portfolio as a whole, a number of factors may affect the estimate of the probable losses, including which methodology we will adopt for measuring the historical delinquency rates and which historical period we will take into account to carry out such measurements. Other factors that may affect our judgment to set the amount regarding the allowance for doubtful accounts include as follows:

the Reference Form of CVM Instruction # 480, as of December 7, 2009

- Brazilian general economic conditions and relevant conditions in the sector;
- previous experience with the debtor or the relevant economy sector, including the recent experience of losses;
- credit quality trends;
- values loan securities;
- volume, composition and growth of our portfolio;
- the Brazilian government's monetary policy; and
- any delays in receiving information necessary to evaluate operations or confirm existing impairment.

We use models to help us analyze our portfolios and define the required amount of the provision for losses. We use statistical factors to show losses and other risk indicators for groups of loans with similar risk characteristics to achieve an estimate of losses incurred by the portfolio. Although our models are often reviewed and improved, by their nature, they depend on our judgments made in relation to information and/or forecasts we receive. In addition, the Brazilian economy's volatility may lead to greater uncertainty in our models than one would expect in more stable macroeconomic environments. Therefore, our provision for doubtful debt may not be indicative of actual future losses.

The process to calculate the level of provision for doubtful debt requires a high judgment level. It is possible that others, taking into account the same information, may at any time reach reasonably different conclusions.

Classification of Securities and Derivatives

Securities are classified into three categories: for trading, available for sale, and held to maturity. This classification is based on the Management's intent, on the date the securities are acquired, of keeping or selling such securities. The accounting treatment to the securities we hold is dependent on how we classify them upon their acquisition.

Changes in the economic environment may alter our strategy in relation to a particular security, which will require a transfer between categories.

Evaluation of Securities and Derivatives

Financial instruments and derivatives recorded at fair value in our financial statements basically include securities classified as: (i) for trading; (ii) available for sale; and (iii) other trading assets, including derivatives. Fair value is defined as the amount by which a position could be transacted by Bradesco with a party aware of the issue and willing to negotiate, with no favoritism.

the Reference Form of CVM Instruction # 480, as of December 7, 2009

We estimate the fair value by using the market prices, as available. We note that the price may be affected by the volume of shares transacted, and may also fail to reflect the "control premiums" under share agreements with shareholders, which holds significant investments. However, the Management believes that market prices are the best indicators of fair value.

At the determination of the fair value, when market prices are not available, the Management's judgment is made, as models depend on our judgment of weight assignable to different factors and the quality of information received. The factors used in these models include quotations by distributors, pricing models, prices of instruments with similar characteristics and discounted cash flows. Model-based pricing also uses information on interest rates, foreign exchange rates and volatility of options, whenever significant and available. Such as reliable market data while estimating the impact of keeping a large position is generally limited. We use likewise our judgment for estimating prices whenever there is no external parameter. If we make inaccurate assumptions or the model itself makes inaccurate correlations or assumptions, the amount of income or loss recorded for a specific asset or liability may be incorrect. Judgment should also determines whether a reduction in the fair value below the updated cost of a held-to-maturity or an available-for-sale security is not temporary, so that it would demand the possible recognition of impairment of the updated cost and that we may record this reduction as an expense. At that evaluation, if any devaluation is not temporary, the Management will decide which historic period should be considered and how severally a loss may be provisioned for.

These appraisal methods may lead Bradesco to have different results should the assumptions and estimates used fail to subsequently become real.

Tax Income and Social Contribution

The value determination of income tax and social contribution is complex, and therefore our evaluation is based on the analysis of our deferred fiscal assets and liabilities and income tax and social contribution payable. In general, our evaluation requires us to estimate the future amounts of deferred fiscal assets and income tax and social contribution payable. Evaluating the possibility of any deferred fiscal assets to be realized is subjective and involves evaluations and assumptions the origin of which is uncertain. Realization of deferred fiscal assets is subject to changes to future fiscal rates and the development of our tax planning strategies. Evaluations and assumptions may change over time as a result of unforeseen events or circumstances, thereby changing our initial judgment during the definition of our tax liabilities.

We continuously monitor and evaluate the impact of new tax laws on our liabilities, as well as new events likely to affect the evaluations and assumptions of our analysis of the possibility of deferred fiscal assets realization.

A significant judgment is required for the determination of the probability of a position on income tax and social contribution be sustained under examination, even after the result of any legal or administrative proceedings, on the basis of technical merits. An additional judgment is then required to determine the amount of benefit eligible to be recognized in our consolidated financial statements.

Impairment

The balances of securities classified as available-for-sale and held to maturity, in addition to non-financial assets (except for deferred tax credits), are reassessed at least on a yearly basis, to determine where there is any indication of impairment. When a loss is identified, we recognize an expense in income for the year. This occurs when the carrying amount of the asset exceeds its recoverable value.

We use a number of judgments to calculate the recoverable value, and accordingly we estimate the value of the most variable assets subject to impairment testing.

Technical provisions for insurance, pension plan and capitalization

Technical reserves are liabilities representing estimates of amounts to be due on a future date, in favor of our customers, stakeholders, insured parties or their beneficiaries. The actuarial assumptions are based on our experience, and are periodically reviewed in relation to sector standards to assure actuarial credibility. However, significant changes in the experiences or assumptions may compel us to establish a provision for expected future losses on a product, establishing provisions for insufficient premiums or contributions. These provisions are set forth in short- or long-term agreements to forecast expected future losses.

For insurance, future claims to be paid include provisions for group and individual life, health, contingency, liability and damage insurance. These benefits are computed using actuarial hypotheses for mortality rates, incapacity, expiry date, investment performance, inflation, expenses, and others. For long-term insurance agreements, when the actuarial hypotheses in a specific policy or group of policies are fulfilled, they will not be changed during the validity time of the policy. Liabilities recognized for claims include provisions for incurred but not reported claims and provisions for unsettled claims. We recognize claims as they occur. However, costs of claims occurred in a specific period will not be clearly recognized until we receive, process and pay such indemnities. We determine the liability amount through actuarial methods based on history of claim payments to estimate claim liabilities. Methods to determine such estimates and establish the values of the technical provisions are reviewed and updated on a regular basis. The resulting adjustments are recognized in income for the respective period.

For pension plans, future benefits to be paid to participants or their beneficiaries include provisions for retirement, pension and redemptions, with actuarial hypotheses that take into account factors such as survivorship, interest rates, and disability, among others.

For capitalization bonds operations, future payments to our customers include provisions for prize draws and redemptions. These are calculated over par security values and adjusted for inflation.

Accounting provisions and contingent liabilities

We established accounting provisions recorded based the opinion of legal counsel, the nature of the lawsuits, similarity with previous proceedings, complexity and positioning of the courts, whenever the loss is deemed probable, which would cause a potential outflow of funds to settle the obligation, and when amounts can be reliably measured.

Contingent liabilities classified as possible losses are not recorded as liabilities in the financial statements and must only be stated in notes, when individually relevant, whereas the liabilities classified as remote losses do not require provisions or statements.

We continuously monitor lawsuits in progress in order to evaluate, among other things: (i) the nature and complexity thereof; (ii) the development of the proceedings; (iii) the opinion of our legal advisors; and (iv) our experience with similar cases. Upon determining whether a loss is likely to occur and estimating its value, we also consider:

- a) the probability of loss derived from claims occurred on or before the date of financial statements, which were identified by us after the date of such statements but before their publication; and
- b) the need to disclose claims or events occurred after the date of financial statements, but before their publication.
