Attractiveness of the services strengthens leadership in the postpaid segment.

Increasing sale of accesses in 3G internet and strong adoption of the “Vivo Você postpaid plans produce mix improvement.

- Vivo recorded an increase of 18.2% in the total number of accesses in comparison to 3Q09 and closed the quarter with 57,714 thousand accesses.
- The market share of 30.14% represents an increase of 0.74 percentile points in relation to 3Q09. The market share of net additions recorded 35.3% in the year-to-date.
- The total net additions of 1,737 thousand accesses in 3Q10 shows a reduction in the volume of new accesses in relation to 2Q10 and 3Q09 due to seasonality and enhanced commercial focus on the postpaid segment. Out of the net additions, 41.5% were postpaid accesses, with 30.3% annual growth in the customer base in such segment, almost twice the growth recorded in the pre-paid segment, of 15.3%.
- The share of net additions of the postpaid segment was 49.8%. This result is due to the sales of the Vivo Você plan, which allows customized usage of data and voice, and to the increasing sales of access to 3G internet using smartphones and modems. The market share of postpaid accesses of Vivo recorded 35.3%.
- Such performance is explained by the strength of Vivo brand, consolidated by the unquestionable leadership in coverage and quality of the 3G network, the largest network of owned stores in Brazil and a portfolio of customized data and voice plans and promotions for each segment.

Efficiency in attracting new customers reduces acquisition cost.

ARPU records an increase in the quarter, maintaining the trend.

- **SAC** of R\$ 62 in 3Q10 is 20.5% lower than in 3Q09. Such decrease reflects the reduction in almost all components of this indicator, especially subsidy, mainly because of gross additions without acquisition of handsets. When compared to 2Q10, which has historically recorded higher cost due to the campaigns in the period, the reduction is of 12.7%. Such reduction is due to the segmentation work in the acquisition and increased efficiency of the distribution channels.
- **Churn** of 2.9% in the quarter is 0.4 percentile points up in the comparison with 3Q09. The variation is mainly explained by the adaptation of the disconnection policy to a higher volume of SIM Cards, especially in the pre-paid segment.
- The **ARPU** of R\$ 25.2 in the quarter records an increase of 0.8% in relation to 2Q10 as a result of increased activity in the customer base, with increased consumption of voice and data services. The growth in the recharge volume and the increasing adoption of 3G data services is an evidence of that. When compared to 3Q09, the ARPU recorded a reduction of 7.4% arising out of the dilution effect caused mainly by the presence of multiple SIM Cards on the market.
- The **Outgoing ARPU** in 3Q10 recorded an increase of 1.9% in relation to 2Q10, arising out of increased consumption of minutes and usage of data. In the year-to-year comparison, the reduction of 1.9% confirms the trend of reduction of drop in the **Outgoing ARPU** recorded in the last two quarters, as shown.

- The Incoming ARPU, on its turn, decreased by 15.5% in the comparison of 3Q10 with the same period of last year, mainly due to the stimulation of traffic among Vivo customers.
- Worthy of mention is the data ARPU growth, which increased by 36.1% in relation to 3Q09, mainly due to higher use of ‘Vivo Internet’, driven by the aggressive selling of modems and smartphones and higher penetration of SMS services.
- The **Blended MOU** of 115 minutes in 3Q10 increased by 29.2% in relation to 3Q09 and by 0.9% in relation to 2Q10. The increase posted in the Outgoing MOU in the annual comparison was 47.5%. The growth in relation to the same period of last year is a result of the actions for stimulating usage since the fourth quarter 2009, with campaigns such as “Recarregue e Ganhe” and the “Vivo Você” plans, which aim at increasing usage habits.
- In this aspect, the **total traffic** grew 53.1% in 3Q10 when compared to 3Q09 and 4.6% in relation to 2Q10, with increases of 74.8% and 4.2%, respectively, of the outgoing traffic, as a result of the continued dissemination of the community concept and increase in the customer base.

Campaigns to stimulate usage increased outgoing traffic by 74.8%.

Growth in the net service revenue maintained.

The total net **revenue** recorded a growth of 10.4% over 3Q09. Such variation was due to the growth in all the lines of service revenue due to increase in the customer base, higher activity in terms of consumption of minutes and, especially, increased use of Data and VAS services. Thus, the net service revenues in the quarter grew 10.1% in relation to the same period of last year, keeping the same growth rate obtained in 2Q10 over 2Q09.

Access and usage revenue grew 5.9% in relation to 3Q09 and 4.6% in relation to 2Q10 due to the high increase in the customer base in the last quarters, improvement in the customer mix and increased activity in the pre-paid segment, shown by the increase in recharges volume and, consequently, increase in voice services consumption.

Once again, due to the rationality of the campaigns, the increase in the consumption of voice services and the growth in the customer base, the profitability of the voice services revenue (voice service revenue excluding interconnection costs) recorded an increase of 5.1 percentile points in relation to the first quarter of the year.

Due to the growth of mobile-to-mobile incoming traffic, the **network usage revenue** (interconnection) increased by 3.1% in the quarter and recorded a slight growth of 0.4% in the year, thus reducing even more the dependence on interconnection revenues when considering the growth of the other revenues.

Annual growth of 61% in data revenues and of 92% in revenues from mobile internet services.

Data and VAS revenues grew 61.4% and 5.1% over 3Q09 and 2Q10, respectively, representing, in 3Q10, 19.6% of the Net Service Revenue. The main driver of this growth continues to be the significant increase in the number of customers of 3G plans (+112% year-to-year) as a result of Vivo's leadership in network coverage and quality.

Mobile Internet revenues grew 92.3% over 3Q09 and 7.6% over 2Q10, accounting for 54.2% of the data revenue in 3Q10, obtained as a result of the incentives for use of such service through smartphones and modems. The revenue obtained from SMS + MMS grew 47.4%, when compared to 3Q09.

Rational costs and offers contributed to increased profitability.

The total operating costs, excluding depreciation and amortization expenses, came to R\$ 3,070.3 million in 3Q10, recording an increase of 10.5% in the comparison with 3Q09. Such growth is due to the increased selling activity in the period, as evidenced by the 18.2% growth in the number of accesses, higher than the increase recorded in costs, as well as the increase in variable expenses arising out of higher service revenues. When compared to 2Q10, the operating costs recorded an increase of 0.4%.

The **personnel expenses** in 3Q10 recorded increases of 36.8% and of 5.7% in the comparison to 3Q09 and 2Q10, respectively. Such increase arises out of the incorporation, as from September 2009, of professionals who provide assistance in our own stores, thus reducing, on their turn, costs with outsourced labor and improving several operating indicators (lower turnover and more satisfaction of employees and customers).

The **cost of services rendered** in 3Q10 increased by 14.0% over 3Q09, as a result of the increase in the customer base and in the mobile usage. In this context, interconnection costs grew by 11.3%, expenses with third-party services grew 22.5% and costs of Fistel Fee and other taxes increased by 10.5%. When compared to 2Q10 there was a growth of 1.6%, due to the increase in some components, especially third-party services, partially offset by the reduction in the Fistel Fee and other taxes.

The **cost of goods sold** recorded a reduction of 4.5% in the comparison between 3Q10 and 3Q09, due to the increase in sales of SIM Cards and to a more restrictive policy for granting subsidies that links the expense to the expected usage profile of each customer. In relation to 2Q10, a growth of 9.5% was recorded, as a result of increased sales of terminals intended for retaining customers.

Reduction in expenses with commissions in relation to 2Q10.

In the 3Q10, the **selling expenses** increased by 5.7% in relation to 3Q09. The sales activity in the quarter increased the expenses with third-party services, especially commissions, due to the growth in accesses of the postpaid segment and data, in addition to the increase in advertising expenses. The reduction in outsourced labor costs in the own stores partially offsets such growth. In the comparison with 2Q10, the reduction of 6.1% is due to the drop in all expenses, especially third-party services, mainly because of lower expenses with commissions due to the adequacy of the commissions cost to the expected profitability of the customer.

The **Provision for Doubtful Accounts (PDD)** in 3Q10 increased 0.02 percentage point in relation to 3Q09. The amount of R\$36.0 million corresponds to 0.55% of the total gross revenue, a slight increase in relation to 3Q09 (0.53%), which is impacted by extraordinary recoveries related to big corporate customers. In comparison with 2Q10, it remained stable due to the continuous improvement of the credit granting model and strict control over collection actions in all segments, with impact, mainly, over the most recent recovery level. The **general and administrative expenses** grew by 15.1% in 3Q10 in relation to 3Q09 due to the increase in third-party services, especially collecting expenses due to a larger post-paid customer base and volume of recharge, besides the expenses with consultancy, auditing and legal services. In relation to the previous quarter, there was a variation of 6.0%, explained, mainly, by the increased expenses with third-party services.

Other Operating Revenues/Expenses, net, recorded revenues of R\$ 43.6 million. The comparison with 3Q09 shows a reduction in other net revenues, especially with the increase in expenses with taxes, charges and contributions, partially offset by the revenue arising out of reversal of the net provision for retirement of property, plant & equipment. In relation to 2Q10, it recorded an increase of 46.8%. Such variation also arises from the increase of revenue resulting from the reversal of the net provision for retirement of property, plant & equipment and other revenues.

EBITDA

EBITDA records increase of 10.1% YoY and margin records 33.4%

The **EBITDA** (earnings before interests, taxes, depreciation and amortization) in 3Q10 was R\$ 1,537.8 million, an increase of 10.1% in relation to 3Q09, with an EBITDA Margin of 33.4%. When compared to 2Q10, the EBITDA recorded an increase of 14.5%. The result in 3Q10 reflects the continued growth in the service revenue, especially data revenue, combined with an efficient subsidy and sales commissions control and continuous improvement of processes. The increase in the number of accesses also benefited growth.

Breakdown of the Annual Changes in the EBITDA

R\$ million

DEPRECIATION AND AMORTIZATION

Depreciation and amortization expenses decreased by 29.7% and 33.8% in the comparison of 3Q10 over 2Q10, respectively, due to the end, in June 2010, of the depreciation of the CDMA equipment.

Decrease of 35.2% in net financial expenses in comparison with 3Q09. Vivo's net financial expenses in 3Q10 decreased by R\$ 34.5 million in the comparison with 3Q09. This decrease is mainly due to a lower debt level (R\$ 4,284.5 in 3Q10 and R\$ 5,167.3 in 3Q09), especially due to the payment to Anatel of the 3G licenses (fully paid in Oct/09), and lower debt service cost, resulting from the current breakdown of the debt, which is supported, basically, on structured transactions with development banks. Additionally, we recorded an increase in the financial revenue of 59.5% in 3Q10, due to the higher average volume of cash invested.

Vivo's net financial expenses decreased by R\$ 37.6 million in the comparison of 3Q10 over 2Q10. This decrease is mainly due to the higher financial investment's interest revenue.

NET PROFIT

Net Profit of R\$ 601.8 million in 3Q10. The consolidated Net Profit of R\$ 601.8 million in 3Q10 represents an increase of 80.9% in relation to 3Q09 and of 155.0% over 2Q10, reflecting the better operational performance, in addition to lower depreciation expenses and better financial result. In the year-to-date, such growth is of 59.1%. The positive results recorded in the last quarters show the consistent management of all the factors making up the result.

81% of the debt is on long term.

The Company closed 3Q10 with a gross debt of R\$ 4,284.5 million, of which 21.9% is denominated in foreign currency. The exchange exposure of the debt is 100% covered by hedge transactions. The net debt recorded R\$2,411.8 million.

Reduction of the net debt by 28.1% in the quarter.

In relation to 3Q09, the decrease of 43.2% in the net debt is due to cash generation, repayment of the debt relating to the 3G licenses, allied to lower debt service cost. In 3Q10, Vivo completed the contracting of the credit facility with the BNDES, referring to the Investment Support Program (PSI). This credit facility is in the amount of R\$ 319.9 million, of which R\$ 99.7 have been already drawn. These funds are being used for the acquisition of domestic equipment in network capacity expansion projects

In relation to 2Q10, Vivo's net debt decreased by 28.1%, due to the consistent operating cash generation in the period.

Operating cash generation of R\$ 1,372.3 million in 3Q10.

In the comparison with 3Q09, an increase of R\$ 734.1 million was recorded in the cash flow generated after investment activities due to the increase of R\$ 581.7 million in operating cash generation, which resulted, mainly, from the higher volume of operating cash generated in the period.

In relation to 2Q10, cash after investments increased only R\$ 18.5 million. Despite the significant increase in cash generation, there was more cash consumption due to the higher volume of investments made in the period.

The cash flow after financing activities in 3Q10 increased by R\$ 1,529.9 million in comparison to the same period of last year, due to the reduction in the volume of payments of loans and hedges, especially the payment to Anatel of the 3G license in 3Q09. In relation to 2Q10, the cash flow after financing activities increased by R\$ 328.3 million due, mainly, to the payment, in April 2010, of dividends in the amount of R\$ 416.9 million.

The figures mentioned here are part of the “Statement of Indirect Cash Flow” presented on page 17.

CAPITAL MARKET

Closing of Telefónica’s tender offer for the 50% stake held by PT in Brasilcel .

At July 28, 2010, by a relevant fact disclosed by Telefónica, a final agreement was entered into for the acquisition of a 50% stake held by PT Móveis, Serviços de Telecomunicações, SGPA, S.A. (“Portugal Telecom”) and by Portugal Telecom, SGPA, S.A. (“Portugal Telecom”) in Brasilcel N.V., for the price of 7.5 billion Euros, subject to approval by Anatel, for subsequent financial closing of the transaction.

At September 23, 2010, Anatel announced the approval of the request for prior consent to the above described acquisition, made by Telefónica.

At September 27, 2010, a relevant fact was disclosed by Telefónica, informing that on that date it acquired 50% of the shares in Brasilcel N.V. previously held by Portugal Telecom, effecting a first payment of 4.5 billion Euros, as agreed. The remaining balance for completing the 7.5 billion Euros shall be paid as follows: 1.0 billion Euros at December 30, 2010 and 2.0 billion Euros at October 31, 2011. Portugal Telecom may request this last payment to be advanced to July 29, 2011. In this case, the price of the last installment shall be reduced by approximately 25 million Euros. Consequently, Telefónica started holding the share control of Vivo Participações.
