MECHEL ANNOUNCES ITS METALLURGICAL SEGMENT PLANTS' CAPACITY UTILIZATION LEVEL IN MAY 2009

Moscow, Russia - June 16, 2009 - Mechel OAO (NYSE: MTL), one of the leading Russian mining and metals companies, announces its metallurgical segment plants' capacity utilization level in May 2009.

In May 2009 high level of production capacity utilization was witnessed at Mechel's metallurgical plants as compared to the average level of capacity utilization in January - August 2008. Steel-making capacity utilization in May was more than 94%, metallurgical commodity products capacity utilization was more than 95%, including rolled products reached the level of about 99%, hardware - about 74%, forgings and stampings crossed the level of 58%. Blast furnace production capacity utilization level at Chelyabinsk Metallurgical Plant OAO in May 2009 was above 112%, steel-making capacity was loaded for more than 105%, metallurgical commodity products capacity utilization was about 104%.

Metallurgical commodity products capacity utilization at BMK OAO in May was about 93%, Izhstal OAO's metallurgical commodity products capacity utilization was above 72%, at Vyartsilya Metallurgical Plant OAO it reached the level of about 103%.

Mechel's plants in Romania steelmaking capacity utilization in May 2009 was about 76%, hardware production capacity load was about 83%.

"Our plant's capacity utilization growth became possible due to the measures we took to optimize our production as well as to Mechel's efficient sales policy. We managed to increase the quality of our sales network operation including performance of Mechel-Service - the only Russian large retail sales company which is a part of a group producing finished steel products. Our own sales networks provide control over products shifting from the plants to the end consumers. They also enable us to make prompt responses to the world steel market recovery evidences. Additionally, we redistributed streams of our wholesale sales on the world steel market. Now semi-finished goods are mainly sold to the Asia-Pacific region and Middle-East countries. High margin downstream steel products are supplied to the Western Europe counties. Steel segment production volume revival provides for internal consumption for raw materials growth. Thus, we see increase in demand for coking coal, ferroalloys, iron ore and coke inside the group", Mechel OAO Senior Vice President Vladimir Polin commented, "Currently Mechel is the only Russian company commissioning coke ovens after the period of suspension and production volume drop," he added.
