#### FORWARD-LOOKING STATEMENTS

Many statements made in this annual report are forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended (Securities Act), and Section 21E of the Securities Exchange Act of 1934, as amended (Exchange Act), that are not based on historical facts and are not assurances of future results. Many of the forward-looking statements contained in this annual report may be identified by the use of forward-looking words, such as believe, expect, anticipate, should, planned, estimate and potential, among others. We forward-looking statements that address, among other things, our:

regional marketing and expansion strategy;

drilling and other exploration activities;

import and export activities;

projected and targeted capital expenditures and other costs, commitments and revenues;

liquidity; and

development of additional revenue sources.

Because these forward-looking statements involve risks and uncertainties, there are important factors that could cause actual results to differ materially from those expressed or implied by these forward-looking statements. These factors include:

general economic and business conditions, including crude oil and other commodity prices, refining margins and prevailing exchange rates;

international and Brazilian political, economic and social developments;

our ability to find, acquire or gain access to additional reserves and to successfully develop our current ones;

uncertainties inherent in making estimates of our reserves;

our ability to obtain financing;

competition;

technical difficulties in the operation of our equipment and the provision of our services;

changes in, or failure to comply with, governmental regulations;

receipt of governmental approvals and licenses;

military operations, acts of sabotage, wars or embargoes;

the cost and availability of adequate insurance coverage; and

other factors discussed below under Risk Factors.

These statements are not guarantees of future performance and are subject to certain risks, uncertainties and assumptions that are difficult to predict. Therefore, our actual results could differ materially from those expressed or forecast in any forward-looking statements as a result of a variety of factors, including those in Risk Factors.

All forward-looking statements are expressly qualified in their entirety by this cautionary statement, and you should not place reliance on any forward-looking statement contained in this annual report.

The crude oil and natural gas reserve data presented or described in this annual report are only estimates and our actual production, revenues and expenditures with respect to our reserves may materially differ from these estimates. This is the annual report of both Petróleo Brasileiro S.A. Petrobras (Petrobras) and its direct wholly owned Cayman Islands subsidiary, Petrobras International Finance Company (PifCo). PifCo s operations, which consist principally of the purchase of crude oil and oil products from third parties and the resale of those products to Petrobras or to third parties, are described in further detail below.

Unless the context otherwise requires, the terms Petrobras, we, us, and our refer to Petróleo Brasileiro S.A. Petro and its consolidated subsidiaries and special purpose companies, including Petrobras International Finance Company. The term PifCo refers to Petrobras International Finance Company and its subsidiaries.

### **GLOSSARY OF PETROLEUM INDUSTRY TERMS**

Unless the context indicates otherwise, the following terms have the meanings shown below:

Barrels	Barrels of crude oil.
Catalytic cracking	A process by which hydrocarbon molecules are broken down (cracked) into lighter fractions by the action of a catalyst.
Coker	A vessel in which bitumen is cracked into its fractions.
Condensate	Light hydrocarbon substances produced with natural gas, which condense into liquid at normal temperatures and pressures.
Deep water	Between 300 and 1,500 meters (984 and 4,921 feet) deep.
Distillation	A process by which liquids are separated or refined by vaporization followed by condensation.
FPSO	Floating Production, Storage and Offloading Unit.
FPU	Floating Production Unit.
FSO	Floating Storage and Offloading Unit.
FSRU	Floating Storage and Regasification Unit, a vessel that receives liquefied natural gas and converts it into gas suitable for use or transmission by pipeline.
Heavy crude oil	Crude oil with API density less than or equal to 22°.
Intermediate crude oil	Crude oil with API density between 22° and 31°.
Light crude oil	Crude oil with API density higher than 31°.
LNG	Liquefied natural gas.
LPG	Liquefied petroleum gas, which is a mixture of saturated and unsaturated hydrocarbons, with up to five carbon atoms, used as domestic fuel.
National Petroleum Agency (ANP)	The Agência Nacional de Petróleo, Gás Natural e Biocombustíveis, or ANP, is the federal agency that regulates the oil, natural gas and renewable fuels industry in Brazil.
NGLs	Natural gas liquids, which are light hydrocarbon substances produced with natural gas, which condense into liquid at normal temperatures and pressures.
Oil	Crude oil, including NGLs and condensates.
Pre-salt section	A sequence of rocks in a sedimentary basin located beneath an evaporitic layer.

Proved reserves	and natural gas liquids that get reasonable certainty are recover existing economic and operating estimate is made. Prices inclu	Proved oil and gas reserves are the estimated quantities of crude oil, natural gas and natural gas liquids that geological and engineering data demonstrate with reasonable certainty are recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Prices include consideration of changes in existing prices provided only by contractual arrangements, but not escalations based upon future conditions.			
Proved developed reserves	through existing wells with exist oil and gas expected to be obtain other improved recovery technic mechanisms of primary recover after testing by a pilot project of	Proved developed reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. Additional oil and gas expected to be obtained through the application of fluid injection or other improved recovery techniques for supplementing the natural forces and mechanisms of primary recovery are included as proved developed reserves only after testing by a pilot project or after the operation of an installed program has confirmed through production response that increased recovery will be achieved.			
Proved undeveloped reserve	new wells on undrilled acreage expenditure is required for recon any acreage for which an applica technique is contemplated, unle actual tests in the area and in the limited to those undrilled units certain of production when dril	re reserves that are expected to be recovered from , or from existing wells where a relatively major npletion, but do not include reserves attributable to ation of fluid injection or other improved recovery ss such techniques have been proved effective by same reservoir. Reserves on undrilled acreage are s offsetting productive units that are reasonably led. Proved reserves for other undrilled units are nstrated with certainty that there is continuity of ductive formation.			
SS	Semi-submersible Unit.				
Ultra deep water	Over 1,500 meters (4,921 feet) d CONVERSION TAI	-			
1 acre	$= 0.004047 \text{ km}^2$				
1 barrel	= 42 U.S. gallons	= Approximately 0.13 t of oil			
1 boe	= 1 barrel of crude oil equivalent	= 6,000 cf of natural gas			
1 m <sup>3</sup> of natural gas	= 35.315 cf	= 0.0059 boe			
1 km	= 0.6214 miles				
1 km <sup>2</sup>	= 247 acres				
1 meter	= 3.2808 feet				
1 t of crude oil	= 1,000 kilograms of crude oil	= Approximately 7.5 barrels of crude oil (assuming an atmospheric pressure index			

gravity of 37° API)

#### PRESENTATION OF FINANCIAL INFORMATION

In this annual report, references to *real*, *reais* or R\$ are to Brazilian *reais* and references to U.S. dollars or U.S.\$ the United States dollars. Certain figures included in this annual report have been subject to rounding adjustments; accordingly, figures shown as totals in certain tables may not be an exact arithmetic aggregation of the figures that precede them.

#### Petrobras

The audited consolidated financial statements of Petrobras and our consolidated subsidiaries as of December 31, 2007 and 2006, and for each of the three years in the period ended December 31, 2007, and the accompanying notes, contained in this annual report have been presented in U.S. dollars and prepared in accordance with U.S. generally accepted accounting principles, or U.S. GAAP. See Item 5. Operating and Financial Review and Prospects and Note 2(a) to our audited consolidated financial statements. We also publish financial statements in Brazil in *reais* in accordance with the accounting principles required by Law No. 6404/76, as amended, or Brazilian Corporate Law and the regulations promulgated by the *Comissão de Valores Mobiliários* (Brazilian Securities Commission, or the CVM), or Brazilian GAAP, which differs in significant respects from U.S. GAAP.

Certain prior year amounts for 2006 and 2005 have been reclassified to conform to current year presentation standards. These reclassifications had no impact on our net income.

Our functional currency is the Brazilian *real*. As described more fully in Note 2(a) to our audited consolidated financial statements, the U.S. dollar amounts as of the dates and for the periods presented in our audited consolidated financial statements have been recalculated or translated from the *real* amounts in accordance with the criteria set forth in Statement of Financial Accounting Standards No. 52, or SFAS 52, of the U.S. Financial Accounting Standards Board, FASB. U.S. dollar amounts presented in this annual report have been translated from *reais* at the period-end exchange rate for balance sheet items and the average exchange rate prevailing during the period for income statement and cash flow items.

Unless the context otherwise indicates:

historical data contained in this annual report that were not derived from the audited consolidated financial statements have been translated from *reais* on a similar basis;

forward-looking amounts, including estimated future capital expenditures, have all been based on our Petrobras 2020 Strategic Plan, which covers the period from 2008 to 2020, and on our 2008-2012 Business Plan, and have been projected on a constant basis and have been translated from *reais* in 2008 at an estimated average exchange rate of R\$2.11 to U.S.\$1.00, and future calculations involving an assumed price of crude oil have been calculated using a Brent crude oil price of U.S.\$55 per barrel for 2008, U.S.\$50 per barrel for 2009, U.S.\$45 per barrel for 2010 and U.S.\$35 per barrel thereafter, adjusted for our quality and location differences, unless otherwise stated; and

estimated future capital expenditures are based on the most recently budgeted amounts, which may not have been adjusted to reflect all factors that could affect such amounts.

#### PifCo

PifCo s functional currency is the U.S. dollar. Substantially all of PifCo s sales are made in U.S. dollars and all of its debt is denominated in U.S. dollars. Accordingly, PifCo s audited consolidated financial statements as of December 31, 2007 and 2006, and for each of the three years in the period ended December 31, 2007, and the accompanying notes contained in this annual report have been presented in U.S. dollars and prepared in accordance with U.S. GAAP and include PifCo s wholly owned subsidiaries: Petrobras Europe Limited, Petrobras Finance Limited, Bear Insurance Company Limited (BEAR) and Petrobras Singapore Private Limited.

#### **RECENT DEVELOPMENTS**

#### Acquisition and Consolidation of Petrochemical Assets

We participated in a consolidation and restructuring of the Brazilian petrochemical industry during 2007. In April 2007, we purchased the petrochemical assets of the Ipiranga Group in partnership with Braskem S.A. (Braskem). In November 2007, we combined our petrochemical operations with those of several other companies to strengthen our position in the petrochemicals sector.

First, we acquired control of Suzano Petroquímica S.A. (Suzano), a leader in Latin American polypropylene resin production with interests in Rio Polímeros S.A. and Petroquímica União. Because Suzano is a publicly traded company in Brazil, Brazilian law requires that we conduct a tender offer for the acquisition of the minority shareholders shares in the company. We expect to conclude the tender offer in June 2008.

After that, we agreed to combine our interests in Suzano, including our interest in Rio Polímeros S.A. and Petroquímica União, with certain petrochemical assets of União de Indústrias Petroquímicas S.A. (Unipar) in a new company, Companhia Petroquímica do Sudeste (CPS). We will control 40% of the voting shares of CPS, and Unipar will control 60% of the voting shares. Both we and Unipar will increase production of polyolefins and basic petrochemicals as a result of this joint venture.

We reached a similar agreement with Odebrecht S.A. (Odebrecht), Nordeste Química S.A. (Norquisa) and Braskem in November 2007. We and our partners have agreed to combine our interests in certain petrochemical companies at Braskem. We will increase our participation in Braskem to 30% of the voting shares (25% of the total capital stock), while Odebrecht and Norquisa will jointly control 60% of the voting shares (37% of the total capital stock).

The consolidation will join the Brazilian petrochemical and plastic production chain, allow for increased investment in research and development capacity and strengthening the plastics industry overall.

### PRESENTATION OF INFORMATION CONCERNING RESERVES

The estimates of our proved reserves of crude oil and natural gas as of December 31, 2007, included in this annual report have been calculated according to the technical definitions required by the U.S. Securities and Exchange Commission, or the SEC. DeGolyer and MacNaughton provided estimates of most of our net domestic reserves as of December 31, 2007. All reserve estimates involve some degree of uncertainty. See Item 3. Key Information Risk Factors Risks Relating to Our Operations for a description of the risks relating to our reserves and our reserve estimates.

We also file oil and gas reserve estimates with governmental authorities in most of the countries in which we operate. On January 15, 2008, we filed reserve estimates for Brazil with the National Petroleum Agency, in accordance with Brazilian rules and regulations, totaling 11.8 billion barrels of crude oil and condensate and 12.7 trillion cubic feet of natural gas. The reserve estimates we filed with the ANP and those provided herein differ by approximately 29%. This difference is due to (1) the ANP requirement that we estimate proved reserves through the technical abandonment of production wells, as opposed to limiting reserve estimates to the life of our concession contracts as required by Rule 4-10 of Regulation S-X and (2) different technical criteria for booking proved reserves, including the use of 3-D seismic data to establish proved reserves in Brazil.

We also file reserve estimates from our international operations with various governmental agencies under the guidelines of the Society of Petroleum Engineers, or SPE. The aggregate reserve estimates from our international operations, under SPE guidelines, amounted to 0.57 billion barrels of crude oil and NGLs and 3,087 billion cubic feet of natural gas, which is approximately 23% higher than the reserve estimates calculated under Regulation S-X, as provided herein. This difference occurs because, unlike Regulation S-X, the SPE s technical guidelines allow for (1) the booking of our reserves in Bolivia beyond the life of certain gas sale contracts and (2) the booking of our reserves in Nigeria based on certain oil recovery techniques, such as fluid injection, based on analogous fields.

#### PART I

Item 1. Identity of Directors, Senior Management and Advisers Not applicable. Item 2. Offer Statistics and Expected Timetable Not applicable. Item 3. Kev Information **Selected Financial Data** 

### Petrobras

The following tables set forth our selected consolidated financial data, presented in U.S. dollars and prepared in accordance with U.S. GAAP. The data for each of the five years in the period ended December 31, 2007 has been derived from our audited consolidated financial statements, which were audited by KPMG Auditores Independentes for the years ended December 31, 2007 and 2006, and by Ernst & Young Auditores Independentes S/S for each of the years ended December 31, 2005, 2004 and 2003. The information below should be read in conjunction with, and is qualified in its entirety by reference to, our audited consolidated financial statements and the accompanying notes and Item 5. Operating and Financial Review and Prospects.

Certain prior year amounts for 2006, 2005 and 2004 have been reclassified to conform to current year presentation standards. These reclassifications had no impact on our net income.

- (1) Our net income equals our income from continuing operations.
- (2) We carried out a two-for-one stock split on April 25, 2008. Share and per share amounts for all periods give effect to the stock split.
- (3) We carried out a four-for-one reverse stock split in July 2007 that changed the ratio of underlying shares to American Depositary Shares from four shares for each ADS to two shares for

each ADS. Per share amounts for all periods give effect to the stock split.

 (4) Basic and diluted earnings per share for 2003 reflect our adoption of SFAS 143.

(5) Represents

dividends paid during the year.

For more information on the April 2008 stock split, see Note 26(b) to our audited consolidated financial statements as of December 31, 2007.

#### Table of Contents

#### PifCo

The following tables set forth PifCo s selected consolidated financial data, presented in U.S. dollars and prepared in accordance with U.S. GAAP. The data for each of the five years in the period ended December 31, 2007 have been derived from PifCo s audited consolidated financial statements, which were audited by KPMG Auditores Independentes for the years ended December 31, 2007 and 2006, and by Ernst & Young Auditores Independentes S/S for each of the years ended December 31, 2005, 2004 and 2003. The information below should be read in conjunction with, and is qualified in its entirety by reference to, PifCo s audited consolidated financial statements and the accompanying notes and Item 5. Operating and Financial Review and Prospects.

### BALANCE SHEET DATA PifCo

	For the Year Ended December 31,				
	2007	2006	2005	2004	2003
		(	U.S.\$ million)		
Assets:					
Total current assets	28,327.7	19,241.3	13,241.9	11,056.7	7,654.0
Total other assets	4,867.1	2,079.3	3,506.6	3,613.0	2,542.5

#### **Exchange Rates**

The commercial rate and floating rate exchange markets have been unified in a single exchange market in Brazil since March 2005. Subject to certain procedures and specific regulatory provisions, the Brazilian National Monetary Council (*Conselho Monetário Nacional* or CMN), allows the purchase and sale of foreign currency and the international transfer of *reais* by a foreign person or legal entity, without limitation. However, the underlying transaction must be valid. Foreign currencies may only be purchased through financial institutions domiciled in Brazil and authorized to operate in the exchange market. We cannot predict whether the Central Bank or the Brazilian government will continue to let the *real* float freely or will intervene in the exchange rate market through a currency band system or otherwise.

The *real* appreciated 18.2% in 2003 against the U.S. dollar and continued to appreciate 8.1% in 2004, 11.8% in 2005, 8.7% in 2006 and 17.2% in 2007. As of May 14, 2008, the *real* has appreciated to R\$1.664 per U.S.\$1.00, representing an appreciation of approximately 6.05% in 2008 year-to-date. The *real* may depreciate or appreciate substantially in the future. See Risk Factors Risks Relating to Brazil.

The following table provides information on the selling exchange rate, expressed in *reais* per U.S. dollar (R\$/U.S.\$), for the periods indicated. The table uses the commercial selling rate prior to March 14, 2005.

	( <b>R</b> \$ / <b>U</b> .S.\$)

(1) Year-end

figures stated for calendar years 2007, 2006, 2005, 2004 and 2003 represent the average of the month-end exchange rates during the relevant period. The figures provided for the months of calendar years 2007 and 2008, as well as for the month of May up to and including May 14, 2008, represent the average of the exchange rates at the close of trading on each business day during such period.

Brazilian law provides that, whenever there is a serious imbalance in Brazil s balance of payments or there are serious reasons to foresee a serious imbalance, temporary restrictions may be imposed on remittances of foreign capital abroad. See Risk Factors Risks Relating to Brazil.

#### **RISK FACTORS**

#### **Risks Relating to Our Operations**

# Substantial or extended declines in the international prices of crude oil and oil products may have a material adverse effect on our income.

The majority of our revenue is derived from sales of crude oil and oil products. We do not, and will not, have control over the factors affecting international prices for crude oil and oil products. The average prices of Brent crude, an international benchmark oil, were approximately U.S.\$72.52 per barrel for 2007, U.S.\$65.14 per barrel for 2006 and U.S.\$54.38 per barrel for 2005. Changes in crude oil prices typically result in changes in prices for oil products. Historically, international prices for crude oil and oil products have fluctuated widely as a result of many factors.

These factors include:

global and regional economic and geopolitical developments in crude oil producing regions, particularly in the Middle East;

the ability of the Organization of Petroleum Exporting Countries (OPEC) to set and maintain crude oil production levels and defend prices;

global and regional supply and demand for crude oil and oil products;

- competition from other energy sources;
- domestic and foreign government regulations; and
- weather conditions.

Volatility and uncertainty in international prices for crude oil and oil products may continue. Substantial or extended declines in international crude oil prices may have a material adverse effect on our business, results of operations and financial condition, and the value of our proved reserves. In addition, significant decreases in the price of crude oil may cause us to reduce or alter the timing of our capital expenditures, and this could adversely affect our production forecasts in the medium term and our reserve estimates in the future.

# Our ability to achieve our long-term growth objectives depends on our ability to discover additional reserves and successfully develop them, and failure to do so could prevent us from achieving our long-term goals for growth in production.

Our ability to achieve our long-term growth objectives is highly dependent upon our ability to obtain new concessions through new bidding rounds and discover additional reserves, as well as to successfully develop our current reserves. Our competitive advantage in bidding rounds for new concessions in Brazil has diminished over the years as a result of the increased competition in the oil and gas sector in Brazil. In addition, our exploration activities expose us to the inherent risks of drilling, including the risk that we will not discover commercially productive crude oil or natural gas reserves. The costs of drilling wells are often uncertain, and numerous factors beyond our control (such as unexpected drilling conditions, equipment failures or accidents, and shortages or delays in the availability of drilling rigs and the delivery of equipment) may cause drilling operations to be curtailed, delayed or cancelled. These risks are heightened when we drill in deep and ultra deep water. Deep and ultra deep water drilling represented approximately 25% of the exploratory wells we drilled in 2007.

Unless we conduct successful exploration and development activities or acquire properties containing proved reserves, or both, our proved reserves will decline as reserves are extracted. If we fail to gain access to additional reserves we may not achieve our long-term goals for production growth and our results of operations and financial condition may be adversely affected.

#### We do not own any of the crude oil and natural gas reserves in Brazil.

A guaranteed source of crude oil and natural gas reserves is essential to an oil and gas company s sustained production and generation of income. Under Brazilian law, the Brazilian government owns all crude oil and natural gas reserves in Brazil and the concessionaire owns the oil and gas it produces. We possess the exclusive right to develop our reserves pursuant to concession agreements awarded to us by the Brazilian government and we own the hydrocarbons we produce under the concession agreements, but if the Brazilian government were to restrict or prevent us from exploiting these crude oil and natural gas reserves, our ability to generate income would be adversely affected.

# Our crude oil and natural gas reserve estimates involve some degree of uncertainty, which could adversely affect our ability to generate income.

The proved crude oil and natural gas reserves set forth in this annual report are our estimated quantities of crude oil, natural gas and natural gas liquids that geological and engineering data demonstrate with reasonable certainty to be recoverable from known reservoirs under existing economic and operating conditions (i.e., prices and costs as of the date the estimate is made). Our proved developed crude oil and natural gas reserves are reserves that can be expected to be recovered through existing wells with existing equipment and operating methods. There are uncertainties in estimating quantities of proved reserves related to prevailing crude oil and natural gas prices applicable to our production, which may lead us to make revisions to our reserve estimates. Downward revisions in our reserve estimates could lead to lower future production, which could have an adverse effect on our results of operations and financial condition.

# We may not have a sufficient number of drilling rigs to support future exploration, production and development activities.

Exploiting our oil and gas discoveries in the pre-salt section will necessitate a larger drilling rig fleet than we currently have. The availability of existing rigs is limited, as is shipyard capacity to build new drilling units. We are continually forced to prioritize between development wells and exploration wells, and we may not be able to secure as many drilling rigs as we will require to meet our exploration, production and development goals.

# We are subject to numerous environmental and health regulations that have become more stringent in the recent past and may result in increased liabilities and increased capital expenditures.

Our activities are subject to a wide variety of federal, state and local laws, regulations and permit requirements relating to the protection of human health and the environment, both in Brazil and in other jurisdictions in which we operate. In Brazil, we could be exposed to administrative and criminal sanctions, including warnings, fines and closure orders for non-compliance with these environmental regulations, which, among other things, limit or prohibit emissions or spills of toxic substances produced in connection with our operations. We have experienced oil spills in the past that resulted in fines by various state and federal environmental agencies, and several civil and criminal proceedings and investigations. See Item 8. Financial Information Legal Proceedings. Waste disposal and emissions regulations may also require us to clean up or retrofit our facilities at substantial cost and could result in substantial liabilities. The *Instituto Brasileiro do Meio Ambiente e dos Recursos Naturais Renováveis* (Brazilian Institute of the Environment and Renewable Natural Resources, or IBAMA) routinely inspects our oil platforms in the Campos Basin, and may impose fines, restrictions on operations or other sanctions in connection with its inspections. In addition, we are subject to environmental laws that require us to incur significant costs to cover damage that a project may cause to the environment. These additional costs may have a negative impact on the profitability of the projects we intend to implement or may make such projects economically unfeasible.

As environmental regulations become more stringent, and as new laws and regulations relating to climate change become applicable to us, it is probable that our capital expenditures for compliance with environmental regulations and to effect improvements in our health, safety and environmental practices will increase substantially in the future. In addition, because our capital expenditures are subject to approval by the Brazilian government, increased expenditures to comply with environmental regulations could result in reductions in other strategic investments. Any substantial increase in expenditures for compliance with environmental regulations or reduction in strategic investments may have a material adverse effect on our results of operations or financial condition.

#### We may incur losses and spend time and money defending pending litigations and arbitrations.

We are currently a party to numerous legal proceedings relating to civil, administrative, environmental, labor and tax claims filed against us. These claims involve substantial amounts of money and other remedies. Several individual disputes account for a significant part of the total amount of claims against us. For example, on the grounds that drilling and production platforms may not be classified as sea-going vessels, the Brazilian Revenue Service asserted that overseas remittances for charter payments should be reclassified as lease payment and subject to a withholding tax of 25%. The Revenue Service has filed two tax assessments against us that in the aggregate, on December 31, 2007, amounted to R\$4,201 million (approximately U.S.\$2,372 million). See Item 8. Financial Information Legal Proceedings.

# We may also be subject to labor litigation in connection with recent changes in Brazilian laws relating to retirement benefits affecting our employees.

In the event that claims involving a material amount and for which we have no provisions were to be decided against us, or in the event that the losses estimated turn out to be significantly higher than the provisions made, the aggregate cost of unfavorable decisions could have a material adverse effect on our financial condition and results of operations. In addition, our management may be required to direct its time and attention to defending these claims, which could preclude them from focusing on our core business. Depending on the outcome, certain litigation could result in restrictions on our operations and have a material adverse effect on certain of our businesses.

#### Our participation in the domestic power market has generated losses and may not become profitable.

We have invested, alone or with other investors, in a number of gas-fired power plants in Brazil. Part of the energy produced by our gas-fired power plants is sold through energy auctions promoted by the Brazilian government at prices indexed to the U.S. Producer Price Index, or PPI, and to the U.S. dollar. We also sell gas directly to gas-fired power plants under bilateral contracts fixed to the same price indexes. More than half of our installed capacity is subject to this pricing mechanism. As a result, we may be unable to pass increases in the cost of producing or acquiring gas from third parties to our buyers, resulting in reduced margins or losses for us. When the price of natural gas rises in the international market, as it did in 2007, not only does the cost of acquiring gas increase, but we also lose the opportunity to sell our gas in the market for a higher price.

The mismatch between the price of energy sold by gas-fired power plants and the cost of natural gas generated losses in the past and may continue to generate losses in the future. However, because increased natural gas prices are related to international prices of other hydrocarbon products, the losses in our gas and energy segment may be compensated by gains in other segments of the Company.

We are also exposed to risk if we are unable to deliver the contracted amounts of energy and gas, as we may be subject to fines or lose our license to generate power from gas-fired plants. There are several factors that may affect our ability to deliver contracted amounts of energy and gas, including our inability to develop the required capacity or secure supply of natural gas, and problems affecting our natural gas infrastructure.

As a result of the foregoing, our participation in the domestic power market has generated losses in the past and may continue to do so in the future.

# Currency fluctuations could have a material adverse effect on our financial condition and results of operations, because most of our revenues are in reais and a large portion of our liabilities are in foreign currencies.

The impacts of fluctuations in exchange rates, especially the *real*/U.S. dollar rate, on our operations are varied and may be material. The principal market for our products is Brazil, as over the last three fiscal years over 74% of our revenues have been denominated in *reais*, while some of our operating expenses and capital expenditures and a substantial portion of our indebtedness are, and are expected to continue to be, denominated in or indexed to U.S. dollars and other foreign currencies. In addition, during 2007 we imported U.S.\$13.3 billion of crude oil and oil products, the prices of which were all denominated and paid in U.S. dollars. Conversely, a substantial share of our liquid assets are held in U.S. dollar denominated assets, or indexed to the U.S. dollar, but we do not use forwards, swaps and futures contracts to mitigate the impact of changes in currency values on our operations and financial statements because of their limited liquidity and cost.

Our recent financial statements reflect the appreciation of the *real* by 8.1%, 11.8%, 8.7% and 17.2% against the U.S. dollar in 2004, 2005, 2006 and 2007, respectively, as a result of improvement in macro-economic conditions and reduction in the markets perception of political risk in Brazil and global emerging market risk. The weakness of the dollar against other currencies in general has also affected our results. As of May 14, 2008, the exchange rate of the *real* to the U.S. dollar was R\$1.664 per U.S.\$1.00, representing an appreciation of approximately 6.05% in 2008 year-to-date. Any reversal of this trend could affect negatively the results of our operations.

# We are exposed to increases in prevailing market interest rates, which leaves us vulnerable to increased financing expenses.

In spite of marked improvements in our credit ratings, which have facilitated our access to fixed-interest long-term capital, a substantial portion of our total debt is represented by structured finance, export credits, trade financing and other similar financing methods the funding of which depends on floating rate instruments, and which for contractual, cost or other considerations cannot be prepaid. As of December 31, 2007, approximately 66% U.S.\$14,452 million of our total indebtedness consisted of floating rate debt. In light of cost considerations and market analysis, we decided not to enter into derivative contracts or make other arrangements to hedge against the risk of an increase in interest rates. Accordingly, if market interest rates (principally LIBOR) rise, our financing expenses will increase, which could have an adverse effect on our results of operations and financial condition.

# We are not insured against business interruption for our Brazilian operations and most of our assets are not insured against war or sabotage.

We do not maintain coverage for business interruptions of any nature for our Brazilian operations, including business interruptions caused by labor action. If, for instance, our workers were to strike, the resulting work stoppages could have an adverse effect on us. In addition, we do not insure most of our assets against war or sabotage. Therefore, an attack or an operational incident causing an interruption of our business could have a material adverse effect on our financial condition or results of operations.

# We are subject to substantial risks relating to our international operations, in particular in Latin America, West Africa and the Middle East.

We operate in a number of different countries, particularly in Latin America, West Africa and the Middle East that can be politically, economically and socially unstable. The results of operations and financial condition of our subsidiaries in these countries may be adversely affected by fluctuations in their local economies, political instability and governmental actions relating to the economy, including:

the imposition of exchange or price controls;

- the imposition of restrictions on hydrocarbon exports;
- the fluctuation of local currencies;
- the nationalization of oil and gas reserves;
- increases in export tax / income tax rates for crude oil and oil products; and

unilateral (governmental) institutional and contractual changes, including controls on investments and limitations on new projects.

If one or more of the risks described above were to materialize we may not achieve our strategic objectives in these countries or in our international operations as a whole, which may result in a material adverse effect on our results of operations and financial condition.

Of the countries outside of Brazil in which we operate, Argentina is the most significant, representing approximately 43.3% of our total international crude oil and natural gas production and 33.3% of our international proved crude oil and natural gas reserves at December 31, 2007. The Argentine government has established export tax rates for crude oil, natural gas and oil products that have negatively affected our results of operations and financial condition. We also have significant operations in Bolivia and Venezuela that represented, respectively, approximately 25.6% and 6.7% of our total international production in barrels of oil equivalent at December 31, 2007. Bolivia accounted for approximately 24.5% of our international proved crude oil and natural gas reserves at December 31, 2007. Since 2005, the Venezuelan and Bolivian governments have taken nationalization measures in the oil and gas sector that resulted in losses and reduction of our proved reserves in these countries. During 2007, the Ecuadorian government increased taxes, forced the renegotiation of contracts, and made other regulatory changes in the oil and gas sector. See Item 4.

Information on the Company<sup>3</sup>/<sub>4</sub>International. Deterioration of the situation in Argentina, Bolivia, Venezuela or Ecuador may have an adverse effect on our results of operations and financial condition.

#### **Risks Relating to PifCo**

#### PifCo s operations and debt servicing capabilities are dependent on us.

PifCo s financial position and results of operations are directly affected by our decisions. PifCo is a direct wholly owned subsidiary of Petrobras incorporated in the Cayman Islands as an exempted company with limited liability. PifCo has limited operations consisting principally of the purchase of crude oil and oil products from third parties and the resale of those products to us or to third parties. PifCo also buys crude oil and oil products from us, for sale to third parties and affiliates on a limited basis. PifCo s ability to service and repay its indebtedness is consequently dependent on our own operations.

Financing for PifCo s operations is provided by us, as well as third-party credit providers in favor of whom we provide credit support. Our support to PifCo s debt obligations is made through standby purchase agreements whereby we agree to repurchase from the holders of PifCo s notes their right to receive payment from PifCo in the event PifCo defaults on its payment obligations.

Our own financial condition and results of operations, as well as our financial support of PifCo, directly affect PifCo s operational results and debt servicing capabilities. For a more detailed description of certain risks that may have a material adverse impact on our financial condition or results of operations and therefore affect PifCo s ability to meet its debt obligations, see Risks Relating to Our Operations.

#### PifCo depends on its ability to pass on its financing costs to us.

PifCo is principally engaged in the purchase of crude oil and oil products for sale to us, as described above. PifCo regularly incurs indebtedness related to such purchases and/or in obtaining financing from us or third-party creditors. All such indebtedness has the benefit of our standby purchase obligation or other support, and PifCo has historically passed on its financing costs to us by selling crude oil and oil products to us at a premium to compensate for its financing costs. If for any reason we are not permitted to continue these practices, this would have a materially adverse effect on PifCo s business and on its ability to meet its debt obligations in the long term.

#### Risks Relating to Our Relationship with the Brazilian Government

# The Brazilian government, as our controlling shareholder, may cause us to pursue certain macroeconomic and social objectives that may have an adverse effect on our results of operations and financial condition.

The Brazilian government, as our controlling shareholder, has pursued, and may pursue in the future, certain of its macroeconomic and social objectives through us. Brazilian law requires the Brazilian government to own a majority of our voting stock, and so long as it does, the Brazilian government will have the power to elect a majority of the members of our board of directors and, through them, a majority of the executive officers who are responsible for our day-to-day management. As a result, we may engage in activities that give preference to the objectives of the Brazilian government rather than to our own economic and business objectives. In particular, we continue to assist the Brazilian government to ensure that the supply of crude oil and oil products in Brazil meets Brazilian consumption requirements. Accordingly, we may make investments, incur costs and engage in sales on terms that may have an adverse effect on our results of operations and financial condition.

# We may not be able to obtain financing for some of our planned investments, and failure to do so could adversely affect our operating results and financial condition.

The Brazilian government maintains control over our budget and establishes limits on our investments and long-term debt. As a state-controlled entity, we must submit our proposed annual budgets to the Ministry of Planning, Budget and Management, the Ministry of Mines and Energy, and the Brazilian Congress for approval. If we cannot obtain financing that does not require Brazilian government approval, we may not be free to make all the investments we envision, including those we have agreed to make to expand and develop our crude oil and natural gas fields. If we are unable to make these investments, our operating results and financial condition may be adversely affected.

# If the Brazilian government reinstates controls over the prices we can charge for crude oil and oil products, such price controls could affect our financial condition and results of operations.

Prices for crude oil and oil products were regulated by the Brazilian government until January 2002, occasionally below prices prevailing in the world oil markets. These prices involved elements of cross-subsidy among different oil products sold in various regions in Brazil. The cumulative impact of this price regulation system on us is recorded as an asset on our balance sheet under the line item Petroleum and Alcohol Account Receivable from the Brazilian government. The balance of the account at December 31, 2007 was U.S.\$450 million. All price controls for crude oil and oil products ended on January 2, 2002, however, the Brazilian government could decide to reinstate price controls in the future as a result of market instability or other conditions. If this were to occur, our financial condition and results of operations could be adversely affected.

#### **Risks Relating to Brazil**

# The Brazilian government has historically exercised, and continues to exercise, significant influence over the Brazilian economy. Brazilian political and economic conditions have a direct impact on our business and may have a material adverse effect on our results of operations and financial condition.

The Brazilian government s economic policies may have important effects on Brazilian companies, including us, and on market conditions and prices of Brazilian securities. Our financial condition and results of operations may be adversely affected by the following factors and the Brazilian government s response to these factors:

devaluations and other exchange rate movements; inflation; exchange control policies; social instability; price instability; energy shortages; interest rates; liquidity of domestic capital and lending markets; tax policy; and

other political, diplomatic, social and economic developments in or affecting Brazil.

We may specifically be affected by certain initiatives to increase taxation on our upstream activities. In June 2003, the State of Rio de Janeiro enacted a new tax law that imposed a Domestic State Tax (ICMS) on our upstream activities. The State of Rio de Janeiro has never enforced this law, and its constitutionality is being challenged in the Brazilian Supreme Court (*Supremo Tribunal Federal*, or STF). In the event that the state government attempts to enforce this law and the courts uphold that enforcement, we estimate that the amount of ICMS that we would be required to pay to the State of Rio de Janeiro could increase approximately R\$9.1 billion (U.S.\$4.7 billion) per year. In addition, there have been recent initiatives in the Brazilian congress to reform the Brazilian tax laws and there is a risk that the proposed reforms would increase taxation on our upstream activities. Due to the uncertainties related to these initiatives, we cannot quantify what our tax burden would be if the new laws or reforms were approved.

Uncertainty over whether the Brazilian government will implement these or other changes in policy or regulations that may affect any of the factors mentioned above or other factors in the future may lead to economic uncertainty in Brazil and increase the volatility of the Brazilian securities market and securities issued abroad by Brazilian companies. Such changes in policies and regulations may have a material adverse effect on our results of operations and financial condition.

# Inflation and government measures to curb inflation may contribute significantly to economic uncertainty in Brazil and to heightened volatility in the Brazilian securities markets and, consequently, may adversely affect the market value of our securities and financial condition.

Our principal market is Brazil, which has, in the past, periodically experienced extremely high rates of inflation. Inflation, along with governmental measures to combat inflation and public speculation about possible future measures, has had significant negative effects on the Brazilian economy. The annual rates of inflation, as measured by the National Consumer Price Index (*Índice Nacional de Preços ao Consumidor Amplo*, or IPCA), decreased from 2,477.15% in 1993 to 916.46% in 1994 and to 5.97% in 2000. The same index increased to 9.30% in 2003, before decreasing to 3.14% in 2006 and increasing to 4.46% in 2007. Considering the historically high rates of inflation, Brazil may experience higher levels of inflation in the future. The lower levels of inflation experienced since 1995 may not continue. Future governmental actions, including actions to adjust the value of the *real*, could trigger increases in inflation, which may adversely affect our financial condition.

### Access to international capital markets for Brazilian companies is influenced by the perception of risk in Brazil and other emerging economies, which may hurt our ability to finance our operations and the trading values of our securities.

International investors generally consider Brazil to be an emerging market. As a result, economic and market conditions in other emerging market countries, especially those in Latin America, influence the market for securities issued by Brazilian companies. As a result of economic problems in various emerging market countries in recent years (such as the Asian financial crisis of 1997, the Russian financial crisis in 1998 and the Argentine financial crisis that began in 2001), investors have viewed investments in emerging markets with heightened caution. These crises produced a significant outflow of U.S. dollars from Brazil, causing Brazilian companies to face higher costs for raising funds, both domestically and abroad, and impeding access to international capital markets. Increased volatility in securities markets in Latin American and in other emerging market countries may have a negative impact on the trading value of our securities. We cannot assure you that international capital markets will remain open to Brazilian companies or that prevailing interest rates in these markets will be advantageous to us.

#### **Risks Relating to Our Equity and Debt Securities**

# The size, volatility, liquidity and/or regulation of the Brazilian securities markets may curb your ability to sell the common or preferred shares underlying our ADSs.

Petrobras shares are some of the most liquid in the São Paulo Stock Exchange (Bovespa), but overall, the Brazilian securities markets are smaller, more volatile and less liquid than the major securities markets in the United States and other jurisdictions, and may be regulated differently from the way in which U.S. investors are accustomed. Factors that may specifically affect the Brazilian equity markets may limit your ability to sell the common or preferred shares underlying our ADSs at the price and time you desire.

### The market for PifCo s notes may not be liquid.

Some of PifCo s notes are not listed on any securities exchange and are not quoted through an automated quotation system. We can make no assurance as to the liquidity of or trading markets for PifCo s notes. We cannot guarantee that the holders of PifCo s notes will be able to sell their notes in the future. If a market for PifCo s notes does not develop, holders of PifCo s notes may not be able to resell the notes for an extended period of time, if at all.

# You may be unable to exercise preemptive rights with respect to the common or preferred shares underlying the ADSs.

Holders of ADSs who are residents of the United States may not be able to exercise the preemptive rights relating to the common or preferred shares underlying our ADSs unless a registration statement under the U.S. Securities Act is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. We are not obligated to file a registration statement with respect to the common or preferred shares relating to these preemptive rights, and therefore we may not file any such registration statement. If a registration statement is not filed and an exemption from registration does not exist, JPMorgan Chase Bank, N.A., as depositary, will attempt to sell the preemptive rights, and you will be entitled to receive the proceeds of the sale. However, the preemptive rights will expire if the depositary cannot sell them. For a more complete description of preemptive rights with respect to the common or preferred shares, see Item 10. Additional Information Memorandum and Articles of Association of Petrobras Preemptive Rights.

# You may not be able to sell your ADSs at the time or the price you desire because an active or liquid market for our ADSs may not be sustained.

Our preferred ADSs have been listed on the New York Stock Exchange since February 21, 2001, while our common ADSs have been listed on the New York Stock Exchange since August 7, 2000. We cannot predict whether an active liquid public trading market for our ADSs will be sustained on the New York Stock Exchange, where they are currently traded. Active, liquid trading markets generally result in lower price volatility and more efficient execution of buy and sell orders for investors. Liquidity of a securities market is often a function of the volume of the underlying shares that are publicly held by unrelated parties. We do not anticipate that a public market for our common or preferred shares will develop in the United States.

### Restrictions on the movement of capital out of Brazil may impair your ability to receive dividends and distributions on, and the proceeds of any sale of, the common or preferred shares underlying the ADSs and may impact our ability to service certain debt obligations, including standby purchase agreements we have entered into in support of PifCo s notes.

The Brazilian government may impose temporary restrictions on the conversion of Brazilian currency into foreign currencies and on the remittance to foreign investors of proceeds from their investments in Brazil. Brazilian law permits the Brazilian government to impose these restrictions whenever there is a serious imbalance in Brazil s balance of payments or there are reasons to foresee a serious imbalance.

The Brazilian government imposed remittance restrictions for approximately six months in 1990. Similar restrictions, if imposed, could impair or prevent the conversion of dividends, distributions, or the proceeds from any sale of common or preferred shares from *reais* into U.S. dollars and the remittance of the U.S. dollars abroad. The Brazilian government could decide to take similar measures in the future. In such a case, the depositary for the ADSs will hold the *reais* it cannot convert for the account of the ADS holders who have not been paid. The depositary will not invest the *reais* and will not be liable for the interest.

In addition, if the Brazilian government were to impose restrictions on our ability to convert *reais* into U.S. dollars, we would not be able to make payment on our dollar-denominated debt obligations. For example, any such restrictions could prevent us from making funds available to PifCo, for payment of its debt obligations, certain of which are supported by us through standby purchase agreements.

# If you exchange your ADSs for common or preferred shares, you risk losing the ability to remit foreign currency abroad and forfeiting Brazilian tax advantages.

The Brazilian custodian for our common or preferred shares underlying our ADSs must obtain a certificate of registration from the Central Bank of Brazil to be entitled to remit U.S. dollars abroad for payments of dividends and other distributions relating to our preferred and common shares or upon the disposition of the common or preferred shares. If you decide to exchange your ADSs for the underlying common or preferred shares, you will be entitled to continue to rely, for five Brazilian business days from the date of exchange, on the custodian s certificate of registration. After that period, you may not be able to obtain and remit U.S. dollars abroad upon the disposition of the common or preferred shares, or distributions relating to the common or preferred shares, unless you obtain your own certificate of registration or register under Resolution No. 2,689, of January 26, 2000, of the *Conselho Monetário* 

*Nacional* (National Monetary Council), which entitles registered foreign investors to buy and sell on the São Paulo Stock Exchange. In addition, if you do not obtain a certificate of registration or register under Resolution No. 2,689, you may be subject to less favorable tax treatment on gains with respect to the common or preferred shares.

If you attempt to obtain your own certificate of registration, you may incur expenses or suffer delays in the application process, which could delay your ability to receive dividends or distributions relating to the common or preferred shares or the return of your capital in a timely manner. The custodian s certificate of registration or any foreign capital registration obtained by you may be affected by future legislative or regulatory changes and we cannot assure you that additional restrictions applicable to you, the disposition of the underlying common or preferred shares, or the repatriation of the proceeds from the process will not be imposed in the future.

#### Holders of ADSs may face difficulties in protecting their interests.

Our corporate affairs are governed by our bylaws and Brazilian Corporate Law, which differ from the legal principles that would apply if we were incorporated in a jurisdiction in the United States or elsewhere outside Brazil. In addition, your rights as an ADS holder, which are derivative of the rights of holders of our common or preferred shares, as the case may be, to protect your interests against actions by our board of directors are different under Brazilian Corporate Law than under the laws of other jurisdictions. Rules against insider trading and self-dealing and the preservation of shareholder interests may also be less developed and enforced in Brazil than in the United States. In addition, shareholders in Brazilian companies ordinarily do not have standing to bring a class action.

We are a state-controlled company organized under the laws of Brazil and all of our directors and officers reside in Brazil. Substantially all of our assets and those of our directors and officers are located in Brazil. As a result, it may not be possible for you to effect service of process upon us or our directors and officers within the United States or other jurisdictions outside Brazil or to enforce against us or our directors and officers judgments obtained in the United States or other jurisdictions outside Brazil. Because judgments of U.S. courts for civil liabilities based upon the U.S. federal securities laws may only be enforced in Brazil if certain requirements are met, you may face greater difficulties in protecting your interest in actions against us or our directors and officers than would shareholders of a corporation incorporated in a state or other jurisdiction of the United States.

## Holders of our ADSs may encounter difficulties in the exercise of voting rights and preferred shares and the ADSs representing preferred shares generally do not give you voting rights.

You may encounter difficulties in the exercise of some of your rights as a shareholder if you hold our ADS rather than the underlying shares. For example, if we fail to provide the depositary with voting materials on a timely basis, you may not be able to vote by giving instructions to the depositary on how to vote for you.

In addition, a portion of our ADSs represent our preferred shares. Under Brazilian law and our bylaws, holders of preferred shares generally do not have the right to vote in meetings of our stockholders. This means, among other things, that holders of ADSs representing preferred shares are not entitled to vote on important corporate transactions or decisions. See Item 10. Additional Information Memorandum and Articles of Incorporation of Petrobras Voting Rights for a discussion of the limited voting rights of our preferred shares.

#### Enforcement of our obligations under the standby purchase agreement might take longer than expected.

We have entered into a standby purchase agreement in support of PifCo s obligations under its notes and indentures. Our obligation to purchase from the PifCo noteholders any unpaid amounts of principal, interest and other amounts due under the PifCo notes and the indenture applies, subject to certain limitations, irrespective of whether any such amounts are due at the maturity of the PifCo notes or otherwise.

We have been advised by our counsel that the enforcement of the standby purchase agreement in Brazil against us, if necessary, will occur under a form of judicial process that, while similar, has certain procedural differences from those applicable to enforcement of a guarantee and, as a result, the enforcement of the standby purchase agreement may take longer than would otherwise be the case with a guarantee.

# If Brazilian law restricts us from paying PifCo in U.S. dollars, PifCo may have insufficient U.S. dollar funds to make payments on its debt obligations and we may not be able to pay our obligations under the standby purchase agreement in U.S. Dollars.

Currently, payments by us to PifCo for the import of oil, the expected source of PifCo s cash resources to pay its obligations under the PifCo notes, will not require approval by or registration with the Central Bank of Brazil. There may be other regulatory requirements that we will need to comply with in order to make funds available to PifCo. Nonetheless, Central Bank of Brazil may impose prior approval requirements on the remittance of U.S. dollars abroad. If Brazilian law were to impose restrictions, limitations or prohibitions on our ability to convert *reais* into U.S. dollars, PifCo may not have sufficient U.S. dollar funds available to make payment on its debt obligations.

In the case that the PifCo noteholders receive payments in *reais* corresponding to the equivalent U.S. Dollar amounts due under PifCo s notes, it may not be possible to convert these amounts into U.S. Dollars. We will not need any prior or subsequent approval from the Central Bank of Brazil to use funds we hold abroad to comply with our obligations under the standby purchase agreement.

### We would be required to pay judgments of Brazilian courts enforcing our obligations under the standby purchase agreement only in reais.

If proceedings were brought in Brazil seeking to enforce our obligations in respect of the standby purchase agreement, we would be required to discharge our obligations only in *reais*. Under the Brazilian exchange control limitations, an obligation to pay amounts denominated in a currency other than *reais*, which is payable in Brazil pursuant to a decision of a Brazilian court, may be satisfied in *reais* at the rate of exchange, as determined by the Central Bank of Brazil, in effect on the date of payment.

### A finding that we are subject to U.S. bankruptcy laws and that the standby purchase agreement executed by us was a fraudulent conveyance could result in PifCo noteholders losing their legal claim against us.

PifCo s obligation to make payments on the PifCo notes is supported by our obligation under the standby purchase agreement to make payments on PifCo s behalf. We have been advised by our external U.S. counsel that the standby purchase agreement is valid and enforceable in accordance with the laws of the State of New York and the United States. In addition, we have been advised by our general counsel that the laws of Brazil do not prevent the standby purchase agreement from being valid, binding and enforceable against us in accordance with its terms. In the event that U.S. federal fraudulent conveyance or similar laws are applied to the standby purchase agreement, and we, at the time we entered into the standby purchase agreement:

- were or are insolvent or rendered insolvent by reason of our entry into the standby purchase agreement; were or are engaged in business or transactions for which the assets remaining with us constituted unreasonably small capital; or
- intended to incur or incurred, or believed or believe that we would incur, debts beyond our ability to pay such debts as they mature; and
- in each case, intended to receive or received less than reasonably equivalent value or fair consideration therefore,

then our obligations under the standby purchase agreement could be avoided, or claims with respect to the standby purchase agreement could be subordinated to the claims of other creditors. Among other things, a legal challenge to the standby purchase agreement on fraudulent conveyance grounds may focus on the benefits, if any, realized by us as a result of PifCo s issuance of these notes. To the extent that the standby purchase agreement is held to be a fraudulent conveyance or unenforceable for any other reason, the holders of the PifCo notes would not have a claim against us under the standby purchase agreement and will solely have a claim against PifCo. We cannot assure you that, after providing for all prior claims, there will be sufficient assets to satisfy the claims of the PifCo noteholders relating to any avoided portion of the standby purchase agreement.

### Item 4. Information on the Company

#### **History and Development**

Petróleo Brasileiro S.A. Petrobras was incorporated in 1953 to implement the Brazilian government s hydrocarbon activities. We began operations in 1954 and for approximately forty years carried out crude oil and natural gas production and refining activities in Brazil in the name of the government.

In the 1990s, in a series of legislative actions, the Brazilian state relinquished its monopoly on oil and gas activities. On November 9, 1995, the Brazilian constitution was amended to authorize the Brazilian government to contract with any state or privately owned company to carry out upstream and downstream oil and gas activities in Brazil. On August 6, 1997, Brazil enacted the Oil Law (Law No. 9,478), which established competition in Brazilian markets for crude oil, oil products and natural gas. Effective January 2, 2002, Brazil deregulated prices for crude oil, oil products and natural gas. See Regulation of the Oil and Gas Industry in Brazil Price Regulation.

Our common and preferred shares have been traded on the São Paulo Stock Exchange since 1968. Petrobras was incorporated as a state-controlled company under Law No. 2,004 (effective October 3, 1953), and a majority of our voting capital must be owned by the Brazilian federal government, a state or a municipality. As of December 31, 2007, the Brazilian government owned 32.2% of our outstanding capital stock and 55.7% of our voting shares. We operate through subsidiaries, joint ventures, and associated companies established in Brazil and many other countries. Our principal executive office is located at Avenida Republica do Chile 65, 20031-912 Rio de Janeiro, RJ, Brazil and our telephone number is (55-21) 3224-4477.

#### **Overview of the Group**

We are an integrated oil and gas company that is the largest corporation in Brazil and one of the largest companies in Latin America in terms of oil and gas production and reserves. Because of our legacy as Brazil s former sole supplier of crude oil and oil products and our ongoing commitment to development and growth, we operate most of Brazil s producing oil and gas fields and hold a large base of proved reserves and a fully developed operational infrastructure. In 2007, our average domestic daily hydrocarbons production was 2,065 mboe/d, an estimated 98.5% of Brazil s total. Over 81% of our proved reserves are in large, contiguous and highly productive fields in the offshore Campos Basin, which allows us to concentrate our operational infrastructure and limit our costs of exploration, development and production. In 39 years of developing Brazil s offshore basins we have developed special expertise in deepwater exploration and production, which we exploit both in Brazil and in other offshore oil provinces.

We operate substantially all the refining capacity in Brazil. Most of our refineries are located in Southeastern Brazil, within the country s most populated and industrialized markets and adjacent to the Campos Basin that provides most of our crude oil. Our domestic refining capacity of 1,986 mbbl/d is well balanced with our domestic crude oil production of 1,792 mbbl/d and sales of oil products to domestic markets of 1,725 mbbl/d. We are also involved in the production of petrochemicals and fertilizers. We distribute oil products through our own BR network of retailers and to wholesalers.

We participate in most aspects of the Brazilian natural gas market. This market has been constrained by the level of domestic gas production and our transportation and distribution infrastructure. In the future, we expect substantial growth in our natural gas activities as we expand our production of both associated and non-associated gas, mainly from offshore fields in the Campos, Espírito Santo and Santos Basins, and extend Brazil s gas infrastructure.

Internationally, we are active in 23 countries. In Latin America, our operations extend from exploration and production to refining, marketing, retail services and natural gas pipelines. In North America, we produce oil and gas and have refining operations in the United States. In Africa, we produce oil in Angola, and in Asia, we have refining operations in Japan. In other countries, we are engaged only in oil and gas exploration.

Our activities comprise five business segments:

Exploration and Production: oil and gas exploration, development and production in Brazil;

Supply: refining, oil products and crude oil exports and imports, petrochemicals and fertilizers in Brazil; Distribution: distribution of oil products to wholesalers and through our BR retail network in Brazil;

Gas and Energy: gas transmission and distribution, electric power generation using natural gas and renewable energy sources and biofuels operations in Brazil; and

International: exploration and production, supply (refining, petrochemicals and fertilizers), distribution and natural gas and energy operations outside of Brazil.

The following table sets forth key information for each business segment in 2007:

	Exploration &			Gas and				Group

(1) Companies in which Petrobras has a minority

interest.

We calculate reserves based on forecasts of field production, which depend on a number of technical parameters, such as seismic interpretation, geological maps, well tests and economic data. All reserve estimates involve some degree of uncertainty. The uncertainty depends mainly on the amount of reliable geological and engineering data available at the time of the estimate and the interpretation of this data. Our estimates are thus made using the most reliable data at the time of the estimate, in accordance with the best practices in the oil and gas industry. DeGolyer and MacNaughton (D&M) reviewed and certified 89% of our domestic proved crude oil, condensate and natural gas reserve estimates as of December 31, 2007. The estimates for the certification were performed in accordance with Rule 4-10 of Regulation S-X of the SEC. See Supplementary Information on Oil and Gas Producing Activities beginning on page F-140 for further details on our proved reserves.

The statements contained in this Item 4 regarding exploration and development projects and production estimates are forward-looking and subject to significant risks and uncertainties. Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee that our actual levels of activity, production or performance will meet these expectations. See Item 3. Key Information Risk Factors.

As a foreign private issuer, we are exempt from many of the corporate governance standards the New York Stock Exchange (NYSE) applies to U.S. domestic issuers listed on the NYSE. In accordance with Section 303A.11 of the NYSE Listed Company Manual, we have posted a summary of significant differences between the NYSE standards and our corporate governance practice on our website, www.petrobras.com.

#### **Exploration and Production**

Oil and gas exploration and production activities in Brazil are the largest component of our company portfolio. In 1970, we produced 164 mbbl/d of crude oil, condensate and natural gas liquids in Brazil. We increased production to 181 mbbl/d in 1980, 654 mbbl/d in 1990, 1,271 mbbl/d in 2000 and 1,792 mbbl/d in 2007. In 1974 we made our first discovery in the Campos Basin offshore Brazil, which now accounts for over 81% of our proved reserves. We aim to grow oil and gas reserves and production sustainably and be recognized for excellence in Exploration and Production operations. Our primary goals are to:

explore and develop oil resources in increasingly deep waters in the Campos Basin;

- explore and develop Brazil s two other most promising offshore basins: Espírito Santo (light oil, heavy oil and gas) and Santos (gas and light oil);
- develop gas resources in the Santos Basin and elsewhere to meet Brazil s growing demand for gas and increase the contribution of domestic gas production to meeting that demand;
- explore and develop the potentially substantial pre-salt reservoirs that lie below the Espírito Santo, Campos and Santos Basins; and
- sustain and increase production from onshore fields through drilling and enhanced recovery operations.

In new areas, our activities typically begin with geological research and seismic activities, followed by exploratory drilling. When this yields encouraging results, we proceed with extended well tests, development drilling and pilot production, which typically involve substantial investments. It usually takes several years for successful exploration activity to be reflected in increased reserves and production.

During 2007, our oil and gas production from Brazil averaged 2,065 mboe/d, of which 87% was oil and 13% was natural gas. On December 31, 2007, our estimated net proved crude oil and natural gas reserves in Brazil were approximately 10.82 billion boe, of which 84% was crude oil and 16% was natural gas. Brazil provided 90% of our worldwide production in 2007 and accounted for 92% of our worldwide reserves at December 31, 2007 on a barrels of oil-equivalent basis. Historically, approximately 85% of our total Brazilian production has been oil; in the future, we plan to increase the share of natural gas to meet increasing domestic demand.

Brazil s richest oil fields are located offshore, most of them in deep waters. Since 1971, when we started exploration in the Campos Basin, we have been active in these waters and we have become globally recognized as innovators in the technology required to explore for and produce hydrocarbons in deep and ultra deep water. We operate more production (on a boe basis) from fields in deep and ultra deep water than any other company.<sup>1</sup> In 2007, offshore production accounted for 87% of our production and deepwater production accounted for 75% of our production in Brazil. At December 31, 2007, we operated 136 wells in water deeper than 1,000 meters (3,281 feet). By December 31, 2007, we had drilled around 300 exploratory wells in water deeper than 1,000 meters (3,281 feet), the deepest being the 1-RJS-567 exploration well in the BC-100 Block in a water depth of 2,853 meters (9,360 feet). We continue to upgrade our deepwater technologies. See Item 5.

Operating and Financial Review and Prospects Research and Development.

<sup>1</sup> Source: PFC Energy

On a per-well basis, offshore exploration, development and production costs are generally higher than those onshore, but we are able to offset these higher costs by higher drilling success ratios, larger discoveries and greater production volumes. We have historically been successful in finding and developing significant oil reservoirs offshore, which has allowed us to achieve economies of scale by spreading the total costs of exploration, development and production over a large base. By focusing on opportunities that are close to existing production infrastructure, we limit the incremental capital requirements of new field development. Our exploration and production activities outside Brazil are included in our International business segment. See International.

Exploration and Production Key Statistics

Solimões	Leste do Urucu	100%	Onshore	Light Oil/Natural Gas
	Rio Urucu	100%	Onshore	Light Oil/Natural Gas

- Heavy oil = up to 22° API; Intermediate oil = 22° API to 31° API; Light oil = greater than 31° API
- (2) Petrobras is not the operator in this field.

We conduct exploration, development and production activities in Brazil through concession contracts, which we obtain through participation in bid rounds conducted by the ANP. Some of our existing concessions were granted by the ANP without an auction in 1998, as provided by the Oil Law. These are known as the Round Zero concession contracts. Since such time, we have participated in all of the auction rounds and in the 9th round of November 2007, we acquired 27 of the 271 blocks offered, for a total of 10,476 km<sup>2</sup> (2.6 million acres).

#### Table of Contents

Our domestic oil and gas exploration and production efforts are primarily focused on three major basins offshore southeastern Brazil: Campos, Espírito Santo and Santos.

The following map shows our concession areas in Brazil as of December 2007.

#### Campos Basin

The Campos Basin, which covers approximately  $115,000 \text{ km}^2$  (28.4 million acres), is the most prolific oil and gas basin in Brazil as measured by proved hydrocarbon reserves and annual production. Since we began exploring this area in 1971, over 60 hydrocarbon accumulations have been discovered, including eight large oil fields in deep water and ultra deep water. The Campos Basin is our largest oil- and gas-producing region, producing an average 1,475.3 mbbl/d of oil and 19.9 mmm<sup>3</sup>/d (750 mmcf/d) of associated natural gas during 2007, 78% of our total production from Brazil. At December 31, 2007, we were producing from 34 fields at an average rate of 1,493.7 mbbl/d of oil and held proved crude oil reserves representing 88% of our total proved crude oil reserves in Brazil. At December 31, 2007, we held proved natural gas reserves in the Campos Basin representing 43% of our total proved natural gas reserves in Brazil. We operated 29 floating production systems, 14 fixed platforms and 4,969 km (3,088 miles) of pipeline and flexible pipes in water depths from 80 to 1,886 meters (262 to 6,188 feet), producing oil with an average API gravity of 22.7° and an average water cut of 1%.

We expect that future new-source production from Campos will be predominantly from deepwater oil fields. We are currently developing seven major projects in the Campos Basin: Marlim Sul Modules 2 and 3, Marlim Leste, Marlim Leste Module 2, Espadarte Phase III, Roncador Module 3 and Jubarte Phase II.

At December 31, 2007, we held exploration rights to 30 blocks in the Campos Basin, comprising 8,517 km<sup>2</sup> (2.1 million acres).

#### Espírito Santo Basin

We have made several discoveries of light oil and natural gas in the Espírito Santo Basin, which covers approximately 75,000 km<sup>2</sup> (18.5 million acres) offshore and 14,000 km<sup>2</sup> (3.5 million acres) onshore. At December 31, 2007, we were producing from 43 fields at an average rate of 72.6 mbbl/d and held proved crude oil reserves, representing 2% of our total proved crude oil reserves in Brazil. At December 31, 2007, we were producing natural gas at an average rate of 1.8 mmm<sup>3</sup>/d (67.9 mmcf/d) and held proved natural gas reserves representing 6% of our total proved natural gas reserves in Brazil.

We have begun executing a plan designed to increase gas production from the basin by 18.7 mmm<sup>3</sup>/d (660.4 mmcf/d) by 2010. As part of this plan, we started up the Golfinho field in 2007 (*Cidade de Vitória* FPSO) with a capacity of 100 mbbl/d of oil and 3.5 mmm<sup>3</sup>/d (124 mmcf/d) of gas and are developing the Camarupim deepwater field, which is expected to come on stream in late 2008.

On December 31, 2007, we held exploration rights to 46 blocks, 29 onshore and 17 offshore, comprising 9,678 km<sup>2</sup> (2.4 million acres).

#### Santos Basin

The Santos Basin, which covers approximately 352,000 km<sup>2</sup> (87 million acres) off the city of Santos, in the state of São Paulo, is one of the most promising exploration areas offshore Brazil and the focus of our plans to develop domestic natural gas. At December 31, 2007, we were producing from two fields at an average rate of 2.4 mbbl/d and held proved crude oil reserves representing 1% of our total proved crude oil reserves in Brazil. At December 31, 2007, we were producing natural gas at an average rate of 0.9 mmm<sup>3</sup>/d (34.8 mmcf/d). At December 31, 2007, we held proved natural gas reserves in the Santos Basin representing 22% of our total proved natural gas reserves in Brazil. In January 2006, we approved the U.S.\$18 billion ten-year Master Plan for Development of Natural Gas and Oil Production in the Santos Basin, which will substantially increase our gas production to meet increasing domestic gas demand. We subsequently established a second plan, known as Plangas, to accelerate gas production and build supporting infrastructure in the Santos and Espírito Santo basins. We expect these investment plans to increase our gas production from the Santos Basin from 0.03 bncf/d in 2007 to 0.35 bncf/d in 2010.

Gas development plans for the Santos Basin include:

Mexilhão, located in shallow water on Santos Basin Block BS-400, is scheduled to come on stream in 2010 with initial production of approximately 6.5 mmm<sup>3</sup>/d (229.5 mmcf/d), potentially increasing to 8.0 mmm<sup>3</sup>/d (282.5 mmcf/d) in 2012; and

Urugua-Tambau to produce at an initial rate of 3.5 mmm<sup>3</sup>/d (123.6 mmcf/d) in 2010, potentially increasing to 7.0 mmm<sup>3</sup>/d (247.2 mmcf/d) of gas and 30 mbbl/d of light oil in 2012.

On December 31, 2007, we held exploration rights to 58 blocks in the Santos Basin, comprising 36,669 km<sup>2</sup> (9.0 million acres).

#### Other Basins

We produce hydrocarbons and hold exploration acreage in a further eight basins in Brazil. Of these, the most significant are the shallow offshore Camamu Basin and the onshore Potiguar, Reconcavo, Rio Grande do Norte, Sergipe, Alagoas and Solimões Basins. While our onshore production is primarily in mature fields, we plan to sustain and slightly increase production from these fields in the future by using enhanced recovery methods.

During 2007, we completed the following developments in the Sergipe and Camamu-Almada Basins:

Piranema field in the Sergipe Basin (FPSO-SSSP 300) with a capacity of 30 mbbl/d; and

Manati field in the Camamu Basin with a capacity of 8 mmm<sup>3</sup>/d (282.5 mmcf/d) of natural gas.

We had a total of 312 production agreements as of December 31, 2007, and were the 100% owner in 288 of them. We are operators under 13 of our 24 partnership agreements.

The following table describes our principal development projects in the various basins and their production capacity:

			Nominal	Nominal			
					Water	Start	
	Unit	Production	Capacity	Capacity	Depth	Up	
Field	Туре	Unit	(bbl/d)	(mcf/d)	(meters)	(year)	Notes
Espadarte Module 2	FPSO	Cidade do Rio de Janeiro	100,000	88,285	1,350	2007	Chartered from Modec

(2) Petrobras 35%,

Shell (operator) 50%, Oil and Natural Gas Company (ONGC) 15%.

#### Exploration

As of December 31, 2007, we had 166 exploration agreements that aggregate 330 blocks and 312 production agreements. We are exclusively responsible for conducting the exploration activities in 68 of the 166 exploration agreements. As of December 31, 2007, we had partnerships in exploration with 28 foreign and domestic companies, for a total of 98 agreements. We conduct exploration activities under 66 of our 98 partnership agreements.

We focus much of our exploration effort on deepwater drilling, where the discoveries are substantially larger and our technology and expertise create a competitive advantage. In 2007, we invested a total of U.S.\$1.72 billion in exploration activities in Brazil. We drilled a total of 109 gross exploratory wells in 2007, of which 32 were offshore and 77 onshore. Sixty-four of the wells were successful, a success ratio of 59%.

In accordance with our strategy, we have been exploring the pre-salt section that extends approximately 800 km by 200 km beneath the Espírito Santo, Campos and Santos Basins. We have drilled 17 wells in this region, all of which have found hydrocarbon resources. We are the operator in all these exploration areas, except BM-S-22, and hold interests of between 20% and 100%. In the southern part of the region, where the salt layer is thick and the hydrocarbons have been more perfectly trapped, we have made particularly promising discoveries, including Block BM-S-11 (Tupi) in 2007 and Block BM-S-24 (Jupiter) in early 2008. We have initiated a program of additional drilling and pilot production to learn more about these finds and quantify the size of the reserves, which we do not expect to classify as proved before 2010.

Because offshore Brazil is geographically isolated from other offshore drilling areas, and because we often drill in unusually deep waters, we plan carefully for our future drilling rig needs. By using a combination of our own rigs and units that we contract for periods of five years or longer, we have historically ensured the availability of drilling units to meet our needs, and paid lower average day rates than if we had contracted the units on a spot basis. We continually evaluate our need for rigs, renew our drilling contracts, contract ahead for rigs as needed, and stimulate new rig construction by signing long-term operating leases with drilling contractors for rigs that are not yet built.

#### **On December 31** Leased Owned Owned Owned Leased Leased Onshore Offshore, by Water Depth (WD) Jack-up Rigs Floating Rigs: 500 to 1000 meter WD 1000 to 1500 meters WD 1500 to 2000 meters WD 2000 to 2500 meters WD 2500 to 3000 meters WD

#### DRILLING UNITS IN USE BY EXPLORATION AND PRODUCTION

We have entered into five- to seven-year contracts beginning in 2009 and 2010 for seven new drilling rigs. Two of the units will operate in water depths of up to 2,000 meters (6,560 feet), four of the units will operate in water depths of up to 2,400 meters (7,830 feet), and the last unit will drill in up to 3,000 meters (9,840 feet) of water.

Higher oil prices have created a tight market for oil and gas production equipment. We have taken measures to minimize costs and risks by standardizing our equipment wherever possible. This allows us to purchase equipment prior to formalizing development plans since we have the option of using the equipment on other developments if the original project is changed or postponed.

Reserves

On December 31, 2007, our estimated reserves of crude oil and natural gas in Brazil totaled 10.82 billion barrels of oil equivalent, including: 9.14 billion barrels of crude oil and natural gas liquids and 267.05 bnm<sup>3</sup> (10.08 tcf) of natural gas. As of December 31, 2007, our domestic proved developed crude oil reserves represented 57% of our total domestic proved developed and undeveloped crude oil reserves. Our domestic proved developed natural gas reserves represented 46% of our total domestic proved developed and undeveloped and undeveloped natural gas reserves. Total domestic proved crude oil reserves increased at an average annual rate of 1% in the last five years. Natural gas proved reserves increased at an average annual rate of 7% over the same period.

We are in discussions with ANP about the possible extension of the production concessions we hold for our major producing fields. In 2007, we received a positive response from ANP about extending the concession for the Marlim Field, which resulted in an increase in our proved reserves in that field. We are discussing with ANP similar amendments to other production concessions.

See Overview of the Group, and Supplementary Information on Oil and Gas Producing Activities in our audited consolidated financial statements for further details on our proved reserves.

#### Supply

We are an integrated company with a dominant market share in our home market. Our domestic refining capacity constitutes 98.4% of Brazil s total refining capacity and we supply almost all of the refined product needs of third-party wholesalers, exporters and petrochemical companies in addition to the needs of our Distribution segment. We own and operate eleven refineries in Brazil, with a total net distillation capacity of 1,986 mbbl/d, making us the world s eighth largest refiner among publicly traded companies.

We operate a large and complex infrastructure of pipelines and terminals and a shipping fleet to transport oil products and crude oil to domestic and export markets. Most of our refineries are located near our crude oil pipelines, storage facilities, refined product pipelines and major petrochemical facilities, facilitating access to crude oil supplies and end-users.

We also import and export crude oil and oil products. We import certain oil products, particularly diesel, for which Brazilian demand exceeds refining capacity. We expect the need for imports to decline in the future as we build additional refining capacity and upgrade our refineries to facilitate the conversion of heavier crudes.

Our Supply segment also includes petrochemical and fertilizer operations that add value to the hydrocarbons we produce and provide beneficial inputs to the growing Brazilian economy.

Supply Key Statistics

	2007	2006 U.S.\$ million)	2005
Supply:			
Net operating revenues	69,549	57,959	45,515
Income before minority interest and income tax	4,171	3,850	3,429
Total assets at December 31	31,218	20,820	17,432
Capital expenditures	4,488	1,936	1,749
Refining			

Our refining capacity in Brazil as of December 31, 2007, was 1,986 mbbl/d and our average throughput during 2007 was 1,779 mbbl/d.

The following table shows the installed capacity of our Brazilian refineries as of December 31, 2007, and the average daily throughputs of our refineries in Brazil and production volumes of principal oil products in 2007, 2006 and 2005.

		Crude Distillation Capacity at			
Name (Alternative name)(1)	Location	Year End 2007 (mbbl/d)	Avei 2007	rage Through <sub>l</sub> 2006 (mbbl/d)	2005 2005
LUBNOR	Fortaleza (CE)	7	6	7	5
RECAP (Capuava)	Capuava (SP)	53	42	40	35
REDUC (Duque de Caxias)	Rio de Janeiro (RJ)	242	243	254	242
REFAP (Alberto Pasqualini)	Canoas (RS)	189	148	114	116

REMAN (Isaac Sabbá)	Manaus (AM)	46	41	36	35
REPAR (Presidente Getúlio	Araucária (PR)				
Vargas)		189	169	183	186
REPLAN (Paulínia)	Paulinia (SP)	365	348	341	320
REVAP (Henrique Lage)	São Jose dos Campos (SP)	251	236	211	254
RLAM (Landulpho Alves)	Mataripe (BA)	323	261	261	249
RPBC (Presidente Bernardes)	Cubatão (SP)	170	153	163	157
Total		1,986	1,779	1,746	1,730

<sup>(1)</sup> We have a

100% interest in each of these refineries, with the exception of REFAP, in which we have a 70% share.

The crude oil we currently produce in Brazil is relatively heavy, while our refineries were originally designed to run on lighter imported crude. We import some lighter crude to balance the slate for our refineries and are investing in our refinery system to maximize our ability to process domestic crude. These investments will give us the flexibility to adjust our mix between heavy and light crudes to take advantage of market prices and match our refinery outputs to product demand. We are also in the early stages of building a new 200 mbbl/d refinery at Abreu e Lima in Northeastern Brazil. This refinery is designed to handle 16° API crude and will produce 140 mbbl/d of diesel as well as LPG, naphtha, bunker fuel and petroleum coke. In general, we plan to invest in refinery projects designed to:

enhance the value of Brazilian crude oil by increasing our capacity to refine greater quantities of the heavier crude oil that is produced domestically;

increase production of oil products that the Brazilian market demands but that we must currently import, such as diesel;

improve gasoline and diesel quality to comply with stricter environmental regulations currently being implemented; and

reduce emissions and pollutant streams.

The following table shows our most significant planned investments in our refineries for 2008 to 2012:

Planned investments 2008-2012	(U.S.\$ million)
Quality (diesel and gasoline)	8,064
Cokers	2,668
Expansion and metallurgic adaptation	4,089
Total	14,821

#### Table of Contents

#### Major Refinery Projects

Our Strategic Plan includes investments in several key refineries, primarily for hydro-treating units to reduce sulfur and meet international standards and coking units capable of converting heavy oil into lighter products. From 2009, we believe these investments will allow us to begin offering diesel fuel in metropolitan areas containing a maximum sulfur content of 50 parts per million, significantly lower than current levels. Of our total U.S.\$14.8 billion in planned refinery investments for 2008 to 2012, U.S.\$8.0 billion will be used for improving diesel and gasoline quality and U.S.\$2.7 billion for delayed coking units to convert fuel oil into lighter fractions. The principal planned investments are:

Refinery (Alternative name)	Objective
LUBNOR (Lubrificantes e Derivados de Petróleo do Nordeste )	Improve quality and production of lube oil
RECAP (Capuava)	Upgrade diesel and gasoline quality
REDUC (Duque de Caxias)	Increase heavy oil processing, upgrade diesel and gasoline quality and install lube oil unit and coker
REFAP (Alberto Pasqualini)	Upgrade diesel and gasoline quality
REGAP (Gabriel Passos)	Upgrade diesel and gasoline quality
REMAN (Isaac Sabbá)	Install mild thermal cracking units to upgrade the quality of diesel and gasoline
REPAR (Presidente Getúlio Vargas)	Expand refinery, increase heavy oil processing, upgrade diesel and gasoline quality, new propylene unit
REPLAN (Paulínia)	Expand refinery, increase heavy oil processing, upgrade diesel and gasoline quality, new propylene unit
REVAP (Henrique Lage)	Increase heavy oil processing, upgrade diesel and gasoline quality, new propylene unit
RLAM (Landulpho Alves)	Upgrade diesel and gasoline quality
RPBC (Presidente Bernardes) Imports and Exports	Upgrade diesel and gasoline quality

We use exports and imports of crude oil and oil products to balance our domestic production and refinery capacity with market needs and optimize our refining margins, importing light crude for our refineries and exporting heavier crude that is surplus to our needs. We import diesel due to insufficient production in our Brazilian refineries and export gasoline, largely because ethanol and vehicular natural gas provide a substantial share of Brazil s light vehicle transportation fuels. We also export fuel oil and approximately 74% of our bunker fuel production.

The table below shows our exports and imports of crude oil and oil products in 2007, 2006 and 2005:

	2007	2006 (mbbl/d)	2005
Exports(1)			
Crude Oil	353	335	263
Fuel Oil (including bunker fuel)	160	168	174
Gasoline	59	44	47
Other	43	34	39
Total Exports	615	581	523
Imports			
Crude Oil	390	370	352
Diesel and Other Distillates	83	56	47
LPG	29	27	17
Naphtha	17	20	22
Other	19	15	8
Total Imports	538	488	446

- (1) Includes sales made by PifCo to unaffiliated
  - third parties, including sales of oil and oil products purchased internationally.

Logistics and Infrastructure

We own and operate an extensive network of crude oil and oil products pipelines in Brazil that connect our terminals, refineries and other primary distribution points. On December 31, 2007, our onshore and offshore crude oil and oil products pipelines extended 13,120 km (8,154 miles). We operate 26 marine storage terminals and 20 other tank farms with nominal aggregate storage capacity of 65 million barrels. Our marine terminals handle an average 5,000 vessels annually.

We operate a fleet of owned and chartered vessels. These provide shuttle services between our producing basins offshore Brazil and the Brazilian mainland and also international shipping to other parts of South America, the Caribbean Sea and Gulf of Mexico, Europe, West Africa and the Middle East. The fleet includes double-hulled vessels, which operate internationally where required by law, and single-hulled vessels, which operate in South America and Africa only. According to our Business Plan, we will contract with Brazilian shipyards to construct 42 new vessels by 2013. The new ships are needed to upgrade our fleet and handle increased production volumes. Upgrades will include replacing single-hulled tankers with double-hulled vessels and replacing vessels nearing the end of their 25-year useful life.

We have signed contracts with three shipyards for 23 of these vessels for delivery between 2010 and 2013, including: ten Suezmax ships to be constructed by *Atlantico Sul*, in Suape, Pernambuco;

five Aframax and four Panamax ships to be constructed by Rio Naval in Rio de Janeiro; and

four tankers to be constructed by the *Mauá* shipyard in Niterói. We expect that we will continue to charter additional vessels as needed in the future.

The table below shows our operating fleet and vessels under construction.

	In Ope Number	eration 000 Tons Deadweight Capacity	Under Co Number	onstruction 000 Tons Deadweight Capacity
Owned Fleet:				
Tankers	46	2,721,149	23	2,620,450
LPG Tankers	6	40,146	0	0
Anchor Handling Tug Supply (AHTS)	1	1,920	0	0
Floating, Storage and Offloading (FSO)	1	28,903	0	0
Layed up vessel	1	143,929	0	0
Total	55	2,936,047	23	2,620,450
Chartered Vessels:				
Tankers	87	8,700,000	0	0
LPG Tankers	12	300,000	0	0
Anchor Handling Tug Supply (AHTS)	0	0	0	0
Floating, Storage and Offloading (FSO)	0	0	0	0
Total	99	9,000,000	0	0

Prior to the 1997 Oil Law, we held a monopoly on Brazilian pipelines and shipping oil products to and from Brazil. The Oil Law provided for open competition in the construction and operation of pipeline facilities and gave the ANP the power to authorize other entities to transport crude oil, natural gas and oil products. We subsequently transferred our transportation and storage network and fleet to a separate 100% subsidiary, Petrobras Transporte S.A. Transpetro. We enjoy preferred access to the Transpetro network based on our historical usage levels, while excess capacity is made available to third parties on a non-discriminatory basis. In practice, third parties make very limited use of this network.

We have distributed ethanol to the domestic market through our pipelines for 30 years. As the global demand for ethanol has increased, we are investing to expand our ethanol pipeline and logistics capacity, including:

converting the existing oil products pipeline between Guararema and Guanabara Bay to transport 2.88 mmm<sup>3</sup>/y of ethanol by January of 2009, with a plan to expand to 4 mmm<sup>3</sup>/y by December of 2010; building a new ethanol pipeline from Paulínia to São Sebastião to transport 12.9 mmm<sup>3</sup>/y of ethanol,

primarily for export; and

conducting feasibility studies for an additional ethanol pipeline a Southern corridor with capacity to transport 4 mmm<sup>3</sup>/y.

#### Petrochemicals and Fertilizers

Our petrochemicals operations provide a growing market for the crude oil and other hydrocarbons we produce, increase our value added and provide domestic sources for products that would otherwise be imported. We aim to expand our petrochemicals operations in Brazil and elsewhere in South America and to integrate these into our overall business. We have two primary goals:

expand first and second generation petrochemicals activities and capture synergies that add value to our refining operations; and

develop new petrochemicals technologies based on fluid catalytic cracking (FCC) and biodegradable polymers and biopolymers.

In the past, the Brazilian petrochemicals industry was fragmented into a large number of small companies, many of which were not internationally competitive and were therefore poor customers for our petrochemical feedstocks. During 2007, we participated in a consolidation and restructuring of the Brazilian petrochemicals industry. We purchased two companies: Ipiranga Química in April 2007 (in partnership with Braskem), and Suzano Petroquímica in November 2007, and combined these and our other previously held petrochemicals operations with those of several other companies.

Following the restructuring, we will hold minority stakes in the two principal companies in the Brazilian petrochemical industry, Companhia Petroquímica do Sudeste-CPS (37.3% of total capital, 40% of voting stock) and Braskem (25% of total capital, 30% of voting stock). These companies together operate 27 petrochemical plants producing basic petrochemicals and plastics, and related distribution and waste processing operations. The table below shows the primary production capacities of each of CPS and Braskem.

Petrochemical Materials	Average Annual Production (mmt/y)
Companhia Petroquímica do Sudeste CPS	
Ethylene	1.02
Propylene	0.32
Cumene	0.21
Polyethylene	0.81
Polypropylene	0.69
Braskem	
Ethylene	2.48
Propylene	1.13
Polyethylene	1.98
Polypropylene	1.04
The consolidation will improve the competitiveness of the Brazilia	n petrochemical industry by increasing integration

The consolidation will improve the competitiveness of the Brazilian petrochemical industry by increasing integration and economies of scale and improving its access to capital for expansion. Through our minority holdings in Brazil s two new major petrochemicals companies, we can better participate in planning the industry s future needs. We have five new petrochemicals projects under construction or in various stages of engineering or design:

Complexo Petroquímico do Rio de Janeiro Comperj: a 150 mbbl/d petrochemical facility that will use our innovative proprietary Petrochemical FCC technology to convert Brazilian heavy crude into basic and intermediate petrochemicals, plastic resins, aromatics, coke, diesel oil and naphtha. We are in the process of selecting strategic partners and planning this project with a goal of starting up in 2012;

Petroquímica Paulínia S.A.: a 300,000 t/y polypropylene plant to start up in the first half of 2008. PPSA is a joint venture with Braskem, which holds 60% share of its share capital;

Companhia Petroquímica Pernambuco-PetroquímicaSuape: a 640,000 t/y purified terephthalic acid plant to start up in 2009. PetroquímicaSuape is a joint venture with Companhia Integrada Têxtil do Nordeste Citene, which holds 50% of its share capital.

Companhia Integrada Textil de Pernambuco Citepe: a 240,000 t/y of polyester yarn facility expected to start up 2009. Petroquisa will hold a 40% share in this plant; and

Companhia de Coque Calcinado de Petróleo Coquepar: three calcined petroleum coke plants, two in Rio de Janeiro and one in Paraná, with a combined capacity of 750,000 t/y. The first of the three plants is expect to start up in 2011. Coquepar is a joint venture between Petroquisa (40%), Unimetal (30%) and Brazil Energy (30%).

Our fertilizer plants in Bahia and Sergipe produce ammonia and urea for the Brazilian market. In 2007, these plants sold a combined 235,000 metric tons of ammonia and 824,000 metric tons of urea. We are the market leader in both products in Brazil. In 2007, we opened a new 198,000 t/y urea granulation unit at Sergipe. We are currently conducting feasibility studies for two additional fertilizer facilities:

Bahia: 120,000 t/y nitric acid plant to supply Pólo Petroquímico de Camaçari; and

South-Central Brazil: facility (UFN-3) to produce 1 million t/y of urea and 760,000 t/y of ammonia from natural gas.

#### Distribution

Our Distribution segment sells oil products that are primarily produced by our Supply operations and works to expand the domestic market for these and other liquid and transportation fuels. Our primary goals are to:

create value by meeting growing customer needs for fuels, including both traditional hydrocarbons and biofuels; and

sustain and expand our market share by providing superior quality, service and leadership in the growing biofuels sector.

We supply and operate Brazil s leading service station network, Petrobras Distribuidora S.A. BR, which accounts for about 34% of the total Brazilian distribution market.<sup>3</sup> BR distributes oil products, ethanol and biodiesel, and vehicular natural gas to retail, commercial and industrial customers. In 2007, BR sold the equivalent of 630 mbbl/d of oil products to wholesale and retail customers, of which the largest portion (39%) was diesel.

Distribution Key Statistics

	2007	2006 (U.S.\$ million)	2005
Distribution:			
Net operating revenues	23,320	18,681	15,867
Income before minority interest and income tax	676	451	471
Total assets at December 31	5,652	3,675	3,568
Capital expenditures	327	351	207

At December 31, 2007, our BR network included 5,973 service stations, or 17% of the stations in Brazil. We also owned 782 stations in northern, northeastern and northwestern Brazil that we acquired as part of the Ipiranga acquisition in 2007. See Supply Petrochemicals and Fertilizers. The integration of Ipiranga and its service stations into our network is subject to the approval of the *Conselho Administrativo de Defesa Econômica*, or CADE (Brazilian Antitrust Authority).

BR ranked first in service station market share in 2007, with BR-owned and franchised stations making 26% of Brazil s retail diesel, gasoline, ethanol, vehicular natural gas and lubricant sales. Most BR stations are owned by franchisees that use the BR brand name under license and purchase exclusively from us; we also provide technical support, training and advertising. We own 672 of the BR stations and are required by law to subcontract the operation of these owned stations to third parties.

As in other countries, the retail fuel market in Brazil is highly competitive and we expect that prices will be subject to continued pressure. We seek to enhance profitability and customer loyalty by building on our strong brand image and providing superior quality and service. We believe that our market share position is supported by a strong BR brand image, the remodeling of service stations and the addition of lubrication centers and convenience stores.

The primary fuel used in Brazil is diesel, which accounts for approximately 705 mbbl/d (35%) of the total Brazilian fuels market. By law, all diesel sold in Brazil from January 2008, is required to be at least 2% biodiesel; this proportion will be increased to 3% in July 2008. In advance of this date, we acted as a catalyst for developing the new market by securing and blending biodiesel supplies and furnishing these to smaller distributors as well as our own service stations. Brazil is a global leader in the use of ethanol as a fuel for light vehicles. Today, about 89% of new gasoline vehicles sold in Brazil have flexfuel capability, and service stations offer a choice of 100% ethanol as well as a blend of 25% ethanol and gasoline, as required by the government. Although we do not produce ethanol, we have supported the development of that market by distributing and wholesaling ethanol, stimulating improvements in product quality and legitimizing what was previously a somewhat informal industry.

 <sup>3</sup> Source: Sindicato Nacional das Empresas Distribuidoras de Combustíveis Líquidos e Lubrificantes Sindicom.

<sup>4</sup> Source: Sindicato Nacional das Empresas Distribuidoras de Combustíveis Líquidos e Lubrificantes Sindicom.

Some service stations in our network also sell vehicular natural gas. The number of stations offering this product increased to 409 in December 2007, up from 355 in December 2006 and total gas sales in 2007 were 21,381 mmcf. We also distribute oil products and biofuels under the BR brand to commercial and industrial customers. Our customers include aviation, transportation and industrial companies, as well as utilities and government entities, all of which generate relatively stable demand.

We also sell oil products produced by our Supply operations to other retailers and to wholesalers.

Our LPG distribution business, Liquigas Distribuidora, held a 22% market share and ranked third in LPG sales in Brazil.<sup>5</sup>

The table below shows our total distribution volumes by product and customer type for 2007, 2006 and 2005.

	2007	2006 (mboe/d)	2005
By Product:			
Diesel, including Biodiesel	670	633	625
Gasoline(1)	330	329	313
Ethanol	2	2	1
Fuel Oil	268	258	212
Naphtha and Jet Fuel	223	225	217
Other, including LPG	1,051	989	940
Total	2,544	2,436	2,308
By Customer:			
BR Retail Distributors	480	437	432
Other Retail Distributors	1,523	1,501	1,400
Wholesalers	541	498	476
Total	2,544	2,436	2,308

(1) Includes

Gasoline C, which may be up to 25% ethanol.

We participate in the retail sector in other Latin American countries through our International business segment. See International.

Gas and Energy

For many years, we have been simultaneously developing Brazil s natural gas infrastructure and its natural gas markets. As part of this process, we developed gas sources in Bolivia, the Bolivia-Brazil gas pipeline, a domestic transportation system and gas-fired electric power generation capacity. We believe these initiatives contributed to the growth of natural gas use in Brazil from approximately 3.7% of Brazil s primary energy use in 1998 to 10% today and a projected 13.4% by 2010, according to the 2030 National Energy Guidelines published by the Ministry of Mines and Energy.

The development plans of our Exploration and Production operations are expected to result in substantial increases in gas production from the Espírito Santo and Santos Basins off the Brazilian coast. We are investing in transportation infrastructure to deliver these new volumes to markets in Northeastern and Southeastern

Brazil and improve the flexibility of our distribution system. We are also improving our commercial operations by creating a new suite of natural gas sales contracts that better allow us to match supply and demand for gas and electric power.

<sup>5</sup> Source: Sindicato Nacional das Empresas Distribuidoras de Gás Liquefeito de Petróleo Sindigás.

Our primary goals for our gas and energy segment are to:

develop and consolidate the natural gas business in the Brazilian market, ensuring flexibility and reliability of supply;

create an integrated LNG business focused on meeting the demands of the Southern Cone market; consolidate and optimize our thermoelectric power plant portfolio; and

capitalize on opportunities to generate electricity from natural gas, oil products and biomass. Gas and Energy Key Statistics

2007 2006 2005 (U.S.\$ million) **Gas and Energy:** 4,912 Net operating revenues 4,090 3,164 Income before minority interest and income tax (947)(512)(414)Total assets at December 31 9.597 15.536 8.167 Capital expenditures 3,223 1,664 694

Natural Gas

Our natural gas business comprises three activities: commercialization (purchase and resale); transportation (building and operating the Brazilian natural gas pipeline network); and equity participation in distribution companies that sell natural gas to end-users.

In 2007, our Exploration and Production segment supplied 47.8% of our total gas needs and we imported the balance of 52.2% from Bolivia. We expect the proportion of domestic gas in our total supply mix to increase in future years as our Exploration and Production segment brings new gas fields on stream.

We also began construction of two LNG terminals in 2007, one in Rio de Janeiro with a send-out capacity of 20 mmm<sup>3</sup>/d (706 mmcf/d) and the other in Pecém in Northeastern Brazil with a send-out capacity of 7 mmm<sup>3</sup>/d (247 mmcf/d). The terminals will be supported by two large LNG regasification ships with a capacity of 14 mmm<sup>3</sup>/d (494 mmcf/d) and 7 mmm<sup>3</sup>/d (247 mmcf/d), respectively. The smaller regasification ship is expected to be delivered in 2008, and the larger ship in 2009. The new terminals and regasification ships give us the flexibility to import gas from other sources to supplement domestic natural gas supplies. We have negotiated LNG supply for 2008 and 2009 and signed Master Sales Agreements with several companies that will be used to acquire spot cargoes as needed.

Our natural gas transportation system in Brazil comprises two main pipeline networks as well as Urucu-Coari pipeline. The 3,913 km (2,431 mile) Malha Sudeste (Southeast Network) connects our main offshore natural gas producing fields in the Campos and Espírito Santo basins to the growing markets of the Southeast Region, including Rio de Janeiro and São Paulo. This network includes the 2,593 km (1,612 mile) Brazilian portion of the Bolivia-Brazil natural gas pipeline. The 1,762 km (1,095 mile) Malha Nordeste (Northeast Network) transmits gas from onshore and offshore natural gas fields in the Northeast to consumers in that region. In the Northern region, the 279 km (173 mile) Urucu-Coari pipeline connects the Solimões basin to Coari.

In 2007, we invested U.S.\$1.80 billion to extend our natural gas transport system by a total of 633 km (393 miles) to 5,954 km (3,702 miles), including additions to the Southeast and Northeast Networks. In the Northeast, we completed the link from Bahia to Pernambuco.

In February 2008, we started up the gas pipeline linking Cabiúnas to Vitória. The pipeline will have the capacity to transport up to 20 mmm<sup>3</sup>/d (706 mmcf/d) of natural gas from the Espírito Santo Basin to Rio de Janeiro. Today, approximately 30% of this send-out capacity supplies an average 1000 MW of energy production at our Mário Lago, Governador Leonel Brizola and Barbosa Lima Sobrinho thermoelectric power plants.

#### Table of Contents

The map below shows our existing pipelines and our pipelines under construction.

We are engaged in a pipeline development program that will increase the capacity and flexibility of our natural gas network and allow us to make better use of growing gas supplies. The program includes:

constructing the 946 km (588 mile) final section of the Southeast Northeast Interconnection Gas Pipeline (GASENE), completing the link between Malha Sudeste and Malha Nordeste. We expect to complete this pipeline, which will transport up to 20 mmm<sup>3</sup>/d (707 mmcf/d) from Cabiunas, the site of the gas processing facility that handles gas produced from the Campos and other offshore basins, to the city of Catu in Bahia in 2010 at an estimated cost of U.S.\$3.0 billion;

adding 1,065 km (662 miles) to the Malha Sudeste system;

adding 416 km (259 miles) to the Malha Nordeste system;

completing the Urucu Manaus project with the 383 km (238 mile) Coari Manaus pipeline. When the Urucu Manaus project becomes operational in the second half of 2009, it will supply up to 5.5 mmm<sup>3</sup>/d (194 mmcf/d) of natural gas from the Solimões basin to the city of Manaus.

#### Table of Contents

Our Gas and Energy segment supplied an average 48.6 mmm<sup>3</sup>/d (1,716 mmcf/d) of natural gas in 2007. Of the 2007 total, 14% was used in our refineries and natural gas processing units, 11% was used for thermoelectric power generation and the remaining 75% was consumed by industrial, commercial and retail natural gas users.

Under Brazilian law, each state has a monopoly over local gas distribution. Most states have formed companies to act as local gas distributors and we hold interests that vary from 24% to 100% in 20 of these 27 distribution companies. In companies where we hold a minority stake, we appoint the majority of the technical and commercial directors. The state of Espírito Santo has assigned us exclusive rights to distribute natural gas through our BR subsidiary. In 2007, Brazil s distribution companies sold a combined 41 mm<sup>A</sup>/d (1,448 mmcf/d) of natural gas, of which our market-weighted equity share was 21%.

The map below shows the name and location of each local gas distributor and our equity shares in 20 of these companies.

Our most significant distribution holdings are:

		Average Gas Sales in			
		<b>Group Share</b>			
Name	State	%	2007 (mmm <sup>3</sup> /d)	Customers	
CEG RIO	Rio de Janeiro	37.40	4.33	19,555	
BAHIAGAS	Bahia	41.50	3.36	252	
GASMIG	Minas Gerais	40.00	1.78	254	
BR	Espirito Santo	100.00	1.22	451	

Our two most significant holdings, CEG Rio and Bahiagás, sold 10.5% and 8.2% of Brazil s national gas volumes in 2007, respectively. CEG Rio and Bahiagás are Brazil s third and fourth largest gas distributors. These companies, together with independent distributors Comgás (33.7% of Brazil s 2007 national gas volumes) and CEG (14.6% of the same), supply 67% of the Brazilian market.

## Gas Sales Contracts and Pricing

In 2007 we introduced a new suite of gas contracts that offer customers four different supply options: Firm Inflexible, Firm Flexible, Interruptible and Preferential. The new structure gives us the flexibility to match our gas sales more closely to the volumes we have available. The principal characteristics of these contracts are:

Firm Inflexible: the distributor assures payment for and we guarantee delivery of the contracted volume. Firm Flexible: we may interrupt supplies in accordance with negotiated conditions, in which case we agree to supply a substitute fuel and compensate the end user for additional costs.

Interruptible: we have the right to interrupt supplies in accordance with negotiated conditions and the distributor is responsible for finding alternative fuels. The distributor pays a lower price for gas under this type of contract.

Preferential: we are obligated to provide natural gas as demanded, but the consumer has the right to interrupt purchases at any time. We expect this type of contract to be used predominantly by thermoelectric customers using LNG.

Type of Contract

The first three contracts include a fixed component, which is reviewed annually, and a variable component, which is reviewed quarterly based on a fuel oil basket; preferential contracts are priced based on imported LNG.

During 2007, we converted three customers to the new contracts, as shown in the table below:

			Type of Contract	L	
Local Distributor	Bolivian Imports (1)	Firm-Inflexible		Interruptible m <sup>3</sup> /d)	Total
Comgás	8.75	3.50	1.00	1.50	14.75
Bahiagás		3.50	0.50	1.10	5.10
PBgás		0.37	0.25		0.62
Total	8.75	7.37	1.75	2.60	20.47

## (1) Contract signed

in 1999.

We expect to convert all our distributors to the new pricing structure by the end of 2008.

Commitments and Sales Contracts

When we invested in the Bolivia-Brazil pipeline, we entered into a series of long-term contracts with three companies: Gas Supply Agreement (GSA) with the Bolivian state-owned company Yacimientos

Petrolíferos Fiscales Bolivianos (YPFB) to purchase certain minimum volumes of natural gas

at prices linked to the international fuel oil price. We expect to continue to import the maximum 30 mmm<sup>3</sup>/d of natural gas from Bolivia until 2019. In February 2007, we agreed to make additional payments to YPFB for liquids contained in the natural gas purchased through the GSA, in the amount of between U.S.\$100 million and U.S.\$180 million per year. The amendment to the GSA is still under negotiation, and payment will be retroactive from May 2007;

Ship-or-Pay agreement with Gás Transboliviano (GTB), owner and operator of the Bolivian portion of the pipeline to transport certain minimum volumes of natural gas. This agreement will run until 2019;

Ship-or-Pay agreement with Transportadora Brasileira Gasoduto Bolivia-Brasil (TBG), owner and operator of the Brazilian portion of the pipeline to transport certain minimum volumes of natural gas. This agreement will run until 2019.

Our volume obligations under the ship-or-pay arrangements were generally designed to match our gas purchase obligations under the GSA. The tables below show our contractual commitments under these agreements for the five-year period from 2008 through 2012.

## COMMITMENTS TO PURCHASE AND TRANSPORT NATURAL GAS

	2008	2009	2010	2011	2012
Purchase commitments to YPFB					
Volume Obligation $(mmm^3/d)$ (1)	24.00	24.00	24.00	24.00	24.00
Volume Obligation (mmcf/d) (1)	850.00	850.00	850.00	850.00	850.00
Brent Crude Oil Projection (U.S.\$) (2)	55.00	50.00	45.00	35.00	35.00
Estimated Payments (U.S.\$ million) (3)	1,409.00	1,094.00	995.00	860.00	784.00
Ship-or-Pay contract with GTB					
Volume Commitment (mmm <sup>3</sup> /d)	30.00	30.00	30.00	30.00	30.00
Volume Commitment (mmcf/d)	1,059.00	1,059.00	1,059.00	1,059.00	1,059.00
Estimated Payments (U.S.\$ million) (4)	58.79	59.08	59.37	59.67	59.67
Ship-or-Pay contract with TBG					
Volume Commitment (mmm <sup>3</sup> /d)	30.00	30.00	30.00	30.00	30.00
Volume Commitment (mmcf/d)	1,059.00	1,059.00	1,059.00	1,059.00	1,059.00
Estimated Payments (U.S.\$ million) (4)	393.57	398.21	401.96	404.11	418.00

- (1) 25.3% of contracted volume supplied by Petrobras Bolívia.
- (2) Brent price forecast based on our 2008-2012 Business Plan.
- (3) Current prices. Gas prices may be adjusted in the future based on contract clauses and actual amounts may vary.

 (4) Amounts calculated based on current prices defined in natural gas transport contracts.

In 2007, we sold about 81% of our gas (38.5 mmm<sup>3</sup>/d (1,359 mmcf/d)) on contracts totaling U.S.3.4 billion. The table below shows our future commitments from 2008 to 2012.

## NATURAL GAS SALES CONTRACTS

	2008	2009	2010 (mmm <sup>3</sup> /d)	2011	2012
To Local Gas Distribution Companies:					
Related parties(1)	16.36	17.96	18.59	19.14	19.66
Third parties	20.76	21.57	22.68	21.26	20.58
To Gas-Fired Power Plants:					
Related parties(1)	6.99	3.72	3.72	3.72	3.72
Third parties	2.59	2.59	6.99	6.99	7.79
Total	46.69	45.84	51.98	51.11	51.76
Estimated Contract Revenues (U.S.\$ billion)(2)(3)	4.50	4.40	4.90	4.70	4.70

(1) For purposes of

this table, related parties include all local gas distribution companies and power generation plants in which we have an equity interest and third parties refer to those in which we do not have an equity interest.

(2) Figures show revenues net of taxes. Estimates are based on outside sales and do not include internal consumption or transfers.

Estimated volumes are based on take or pay agreements in our contracts, expected volumes and contracts under negotiation, not maximum sales.

(3) Prices may be adjusted in the future and actual amounts may vary.

## Power

Brazil has a total of 96,300 MW of installed electric power capacity, of which around 80% is in low-cost hydroelectric stations that supply around 90% of the country s electric power needs. While hydroelectric power facilities have many advantages, and are particularly suited to meeting base electric power needs, they cannot be readily expanded, have limited ability to meet surges in demand and are vulnerable to periods of prolonged drought. Brazil has accordingly been developing thermoelectric power generation capacity to augment the base hydroelectric system. Thermoelectric generation is expected to play an increasing role in meeting Brazil s power needs as the country s economic growth fuels the demand for energy.

As part of this national trend, we have been a leader in developing and operating gas-fired thermoelectric power generation plants. We currently own stakes in 15 thermoelectric power plants, and we control 13 of them. Our gas-fired power plants have 4,631 gross MW of installed capacity, equal to about 5% of Brazil s total power grid. At year-end 2007, however, we had only 846.5 MW of commercial capacity due to gas supply constraints.

# Electricity Sales

## Standby Availability

Non-base-load thermoelectric plants like ours are used to supplement hydroelectric generation when needed. Historically, Brazil s power pricing regime made it difficult for such plants, which operate at low average utilization rates, to cover their operating costs and provide a return on capital. In 2004, Brazil enacted the New Industry Model Law, under which public utilities are required to secure their expected energy needs under long-term contracts through auctions coordinated by the Ministry of Mines and Energy. Thermoelectric power generators bid in these auctions to supply standby availability up to their certified commercial capacity, although they will not necessarily be called upon to generate this power. Only that portion of our thermoelectric capacity defined as New Energy under the New Industry Model Law is eligible to be sold through the auction system.

In the 2005 and 2006 auctions, we sold standby availability of 1,391 and 200 MW, respectively, on 15-year contracts beginning in 2008 to 2011. Under the terms of these contracts, we will be compensated a fixed amount whether or not we generate any power, and paid an additional amount for the energy we actually generate according to a formula that is based on U.S. dollar/PPI indexing. In the 2007 auction, we did not sell all our eligible available capacity because gas-fired plants were less competitive than coal-fired plants.

## Bilateral Contracts

We sell most of the commercial capacity that is not defined as New Energy under long-term bilateral contracts, primarily with power distribution companies. Such contracts are subject to the regulations that governed the power sector in Brazil before the enactment of the New Industry Model Law. Under these agreements, we are compensated for our thermoelectric capacity based on a combination of factors, including whether or not we actually generate energy, the certified power generation capacity of each power plant, and conditions of supply and demand in Brazil s power market. Each of these factors are determined by the appropriate regulatory bodies in Brazil, including the Ministry of Mines and Energy, the *Operador Nacional do Sistema Elétrico ONS* (National Electricity System Operator), and the *Câmara de Comercialização de Energia Elétrica CCEE* (Electricity Trading Board).

Our revenues under these contracts have been reduced by the limited supply of natural gas, which affects the certified power generation capacity of our gas-fired plants. Even as we increase the available supply of natural gas, our earnings under these contracts are difficult to predict because the net margins are subject to adjustments coordinated by the CCEE. Additionally, the contracts do not permit us to directly pass on changes in the cost of acquiring natural gas to our customers. In general, our earnings under these contracts will increase if we are called upon to generate electricity, and the demand for power in Brazil increases relative to available supply. In 2008, 1,189 MW of our generating capacity was subject to the terms of these bilateral contracts, with 897 MW committed in 2009, 1,231 MW in 2010 and 1,171 MW in each of 2011 and 2012. The agreements will run off gradually, with the last contract expiring in 2019.

During 2007, we generated an average 571 MW, of which 45% was generated in the Southeast region of the country, 40% in the South, and 15% in the Northeast. We sold an average 1,535 MW in 2007, compared to an average of 1,303 MW in 2006. The difference between our generation and our sales was primarily related to contractual sales commitments, and the power to meet our commitments was acquired from third parties. About 5% of our total power sales were exports to Uruguay and Argentina.

#### Increasing Our Commercial Capacity

As of December 31, 2007, the Brazilian regulator had certified our commercial capacity for the purpose of trading at 846.5 MW. At the request of the ONS, the gas-fired power plants in the south and southeast of Brazil conducted a test of power generation capacity in which the agency requested 4,700 MW of power. Because of limited gas supplies, we were able to supply only 1,948 MW, of which 705 MW was generated by our gas-fired plants and 1,243 MW was generated by third parties using natural gas supplied by us. Following that test, in May 2007, we entered into an agreement with the *Agência Nacional de Energia Elétrica ANEEL* (National Electricity Regulatory Agency) under which we are required to increase our ability to supply power to the grid from our own plants to 4,335 MW by 2011. We will accomplish this by increasing natural gas supplies, including LNG, converting some existing power plants to dual-fuel operation and leasing backup oil-fired power plants. Exclusive of our own power requirements, we expect to have an average 3,553.5 MW commercial capacity available for sale by 2011, of which approximately 45% has already been sold in the 2005 and 2006 auctions and 33% is subject to bilateral contracts.

The following table shows our thermoelectric power plants, their installed capacity, their commercial capacity, average available capacity as of the second half of 2007, and the availability commitments we have made to ANEEL for the second half of 2011.

				Available	Committed (ANEEL	Commercial
		Installed	Petrobras	Capacity 2H	agreement)	Capacity 2H
<b>Gas-Fired Thermoelectric Plants</b> (1)	Region	capacity (MW)	share (%)	2007 (MW)	2H 2011 (MW)	<b>2011</b> (7) (MW)

(1)	Table does not include our 10% stake in the Nortefluminense plant, or our 20% stake in the leased Araucária plant. We do not control sales decisions at these plants.
(2)	50.0% share held by Edison SpA.
(3)	Acquired in December 2007.
(4)	20.0% share held by Empresa Metropolitana de Águas e Energia S.A. EMAE.
(5)	1.15% share held by Petros Fundação Petrobras de Seguridade Social.
(6)	20.5% share held by Grupo NeoEnergia.
(7)	Maximum that can be sold under contracts.

## Renewables

We aim to become a major producer of biodiesel in Brazil and actively participate in Brazil s growing ethanol industry, particularly the transportation and exportation of ethanol to other countries. Brazil has highly favorable climate and soil conditions for growing sugarcane and vegetable oil crops and is an important player in the international biofuels market.

Ethanol from sugarcane is widely used as a substitute for gasoline in Brazil. We do not produce ethanol, but distribute it through our Distribution business segment. Our Gas and Energy segment plans to expand our participation in the ethanol business through partnerships with ethanol producers and international customers where our role would primarily be as a transporter and exporter of Brazilian ethanol. We are also studying the use of ethanol in electric power plants, where we believe it can be a cost-effective substitute for natural gas under certain circumstances.

In recent years, we provided leadership for the introduction of biodiesel into the Brazilian market. By law, all diesel sold in Brazil from January 2008 is required to be at least 2% biodiesel; this proportion will be increased to 3% in July 2008. In an effort to adhere to this mandate, we are securing and blending biodiesel supplies and furnishing these to smaller distributors as well as our own service stations.

We have signed contracts to secure oils from family farmers and in the second quarter of 2008 will start up three biodiesel plants with a combined capacity of 3,100 bbl/d. These plants are located in Northeastern Brazil at Candeias (BA), Quixada (CE) and, in Southeastern Brazil at Montes Claros (MG).

We have also developed a new refining technology (H-Bio) that allows us to introduce vegetable oils into our existing refineries to produce a cleaner form of diesel. Four of our refineries are already prepared to use H-Bio technology and we plan to adapt all of our refineries for this process, which will give us increased raw materials flexibility and access to markets seeking cleaner forms of diesel.

We have one wind energy plant in Macau in Northeastern Brazil with a capacity of 1.8 MW and are studying the feasibility of building other wind and small hydropower plants. Our Business Plan for 2008-2012 targets installed renewable energy capacity of 365 MW by 2012.

In 2007, as part of our 2020 Strategic Plan, we adopted a climate change strategy to reduce greenhouse gases (GHG) under the Clean Development Mechanism (CDM). Among our GHG reduction projects are the development of wind and other renewable energy sources, power generation using a turbo expander, reducing nitrous oxide emissions from our fertilizer operations and the use of waste heat for cogeneration.

## Energy Efficiency

Our Internal Energy Conservation Program works to improve energy efficiency in all our units. In 2007, we saved approximately 184 barrels of oil equivalent per day, thereby avoiding costs of approximately U.S.\$4 million and approximately 29 thousand tons of carbon dioxide emissions.

#### International

We have operations in 23 countries outside Brazil that encompass all phases of the energy business. Our primary goals for our international operations are to:

use our technical expertise in deepwater exploration and production to participate in high-potential and frontier offshore regions;

add value to our crude oil produced in Brazil;

assure natural gas supplies to the growing Brazilian market by developing reserves;

expand integrated operations in refining, sales, commercialization, logistics and distribution with a focus on the Atlantic basin; and

build our brand on an international scale.

International Key Statistics

	2007	2006	2005
	(U.S.\$ million)		
International:			
Net operating revenues	9,101	6,071	4,527
Income before minority interest and income tax	(237)	571	853
Total assets at December 31	11,717	10,274	7,347
Capital expenditures	2,864	2,637	1,175

The net operating revenues of our International segment represented 10.4% of our total net operating revenues in 2007, (8.4% in 2006 and 8.0% in 2005). The total assets of our International segment at December 31, 2007 represented 9.0% of our total assets (10.4% in 2006 and 9.3% in 2005).

International Upstream Activities

Our international strategy aims to integrate our operations by capturing synergies within Latin America and to diversify our upstream activities outside Latin America. We are active in areas such as the Gulf of Mexico and West Africa where there are opportunities to leverage the deepwater expertise we have developed in Brazil. We also have preliminary exploratory efforts underway in North Africa, Asia, Europe and Middle East.

During 2007, we conducted exploration and production activities in 19 countries outside Brazil (Argentina Bolivia, Colombia, Ecuador, Mexico, Peru, Venezuela, the U.S., Angola, Nigeria, Tanzania, Mozambique, Senegal, India, Portugal, Iran, Pakistan, Libya and Turkey). See Overview of the Group for information about production and reserves in individual countries.

During 2007, our capital expenditures for international exploration and production represented 21.3% of our total capital spending for exploration and production.

We have contracted three drilling units and one platform to support our ultra deep water exploration operations in West Africa and the U.S. Gulf of Mexico, among other regions. These rigs will go into operation between 2009 and 2011 under five- to ten-year contracts.

The table below shows our international exploration expenditures and how these were distributed geographically in 2007, 2006 and 2005.

	2007	2006	2005
Total Capex International Exploration (U.S.\$ billion) Of which:	1.17	1.26	0.42
Argentina	3.27%	6.40%	7.20%
Bolivia	0.01%	0.60%	4.40%
Colombia	6.67%	3.60%	4.60%
Peru, Ecuador, Venezuela	1.62%	1.10%	0.30%
Subtotal South America	11.57%	11.70%	16.50%
West Coast of Africa	5.76%	43.70%	47.80%
Gulf of Mexico	23.72%	31.50%	33.90%
Drilling rigs and other(1)	58.95%	13.10%	1.80%

<sup>(1)</sup> In 2007, 54.90% of the 58.95%

relates to investments in

In 2007, our net production outside Brazil averaged 126.2 mbbl/d of crude oil and NGLs and 18.6 mmm<sup>3</sup>/d (657 mmcf/d) of natural gas. The table below shows our international development capital expenditures and how these were distributed geographically in 2007, 2006 and 2005.

	2007	2006	2005
Total Capex International Development (U.S.\$ billion) Of which:	1.39	1.04	0.65
Argentina	21.48%	26.50%	36.20%
Bolivia	1.60%	1.30%	1.70%
Colombia	5.55%	2.80%	4.60%
Peru, Ecuador, Venezuela	11.92%	11.20%	40.90%
Subtotal South America	40.55%	41.80%	83.40%
West Coast of Africa	36.05%	41.00%	15.00%
Gulf of Mexico	23.40%	17.20%	1.60%
Latin America			

We are active in nearly all of the key hydrocarbon basins of Argentina, Bolivia, Colombia, Ecuador, Mexico, Peru and Venezuela. In 2007, our average net production from the region (excluding Brazil) was 220.5 mboe/d, or 93.6% of our international production. Reserves in the region represent 86.8% of our international reserves.

Our largest operating region outside Brazil is **Argentina**, which in 2007 represented 43.3% of our international production. We operate in the country primarily through our 67.2% interest in Petrobras Energia S.A. (PESA). Our production is concentrated in the Neuquen, Austral and San Jorge Basins with a smaller contribution from the Noroeste basin. During 2007, we increased our stake in the La Tapera-Puesto Quiroga and El Tordillo fields in the San Jorge basin, to 35.7%. We also acquired 25.7% and 52.4% interests in Sierra Chata and Parva Negra assets in the Neuquen basin for U.S.\$77.6 million, subject to regulatory approval. Our production in Argentina averaged 102 mboe/d in 2007. At December 31, 2007, our proved reserves were approximately 295 mmboe, representing a decline of 5% from 2006.

drilling rigs.

In **Bolivia**, we produced an average 307.27 mmcf/d of natural gas in 2007, 21.7% of our total international production, principally from the San Alberto and San Antonio fields. Following the Bolivian government s May 1, 2006 decree on the nationalization of hydrocarbons, we entered into new agreements under which we continue to operate the fields, but are required to make all sales of the hydrocarbons through YPFB with the right to recover our costs and participate in profits. As a result of the new contracts, we have informed the Bolivian government of our intention to invest approximately U.S.\$400.0 million in exploration and development. At December 31, 2007, our proved reserves were approximately 217 mmboe in Bolivia.

In **Colombia**, we hold interests in seven production contracts and 16 exploration contracts and are operator for 16 of these contracts. Our production averaged 16.6 mboe/d in 2007, and was located in the Guando, Río Ceibas, the Yaguará fields and the Espinal Block in the Upper Magdalena Basin and the Santiago field and Trinidad field in the Llanos Basin. We drilled the first deepwater well in Colombia in 2007, and we also drilled three onshore wells as operator. We signed seven exploration contracts with the National Hydrocarbons Agency in 2007, four offshore blocks in the Caribbean Sea (RC-4, RC-6, RC-7 and RC-8) and three onshore blocks (Cerrero, Cebucan and El Guadual). At December 31, 2007 our proved reserves in Colombia were approximately 30.5 mmboe.

In the Oriente basin of **Ecuador**, we operate Block 18, which has significant reserves of light crude oil, and Block 31, where we are waiting for a license to begin operations. We also have a 15% stake in the 500 km (311 mile) Oleoducto de Crudos Pesados (OCP) crude oil pipeline with capacity of 450 mbbl/d. Our production averaged 10.4 mboe/d in 2007. At December 31, 2007, our proved reserves were approximately 44.5 mmboe, representing a 17% decline from 2006 due to production and reserve reclassifications. In 2007, we took an impairment of U.S.\$174 million relating to Block 18 due to changes in local taxes and laws. We signed a letter of intent with Teikoku Oil to sell 40% of our interest in Blocks 18 and 31, and a portion of the OCP. The sale is awaiting final government approvals.

We have held service contracts for the Cuervito and Fronterizo blocks in the Burgos basin of **Mexico** since 2003. Under these service contracts, we receive fees for our services, but any producing wells are transferred to the Mexican national oil company Pemex. We have other agreements to share deepwater expertise with Pemex.

We hold interests in six blocks in **Peru**. In Block X, in the Talara basin, we are engaged in development and secondary recovery activities. Our production averaged 15.1 mboe/d in 2007. At December 31, 2007, our proved reserves were approximately 111 mmboe. We conduct exploration activities at our remaining five blocks. In January 2008, we reported a major gas discovery in Block 57, in which we currently hold a 46.2% stake. In 2007, our subsidiary PESA sold us 40% of Petrobras de Valores Internacional de España S.L. for U.S.\$423.3 million, plus contingent compensation in the event of a commercially viable discovery in Block 57.

Our net production from **Venezuela** in 2007 averaged 15.9 mboe/d from joint ventures in the Oritupano-Leona, Acema, La Concepción and Mata fields, where the Venezuelan government is the majority holder and operator. We received a credit from the Venezuelan government in the amount of U.S.\$88.5 million, which we have fully written down. In August 2007, we received U.S.\$47.0 million in dividends from Venezuelan operations conducted in 2006. *North America* 

The Gulf of Mexico, where we have been active since acquiring eight blocks from Texaco in 1987, is an important region for us where we focus primarily on deepwater plays that leverage our experience in Brazil. We are currently planning a development that will incorporate technology we have developed for use offshore Brazil, and that has not previously been used in the GOM.

As of December 31, 2007, we held interests in 331 offshore blocks in the **United States** GOM, 187 of which we operate, and one onshore block. We have identified several core areas for exploration and development, including the ultra deep water Lower Tertiary play, the Deep Shelf gas play and the deep water Garden Banks area. Our production averaged 11.5 mboe/d in 2007. At December 31, 2007, our proved reserves were approximately 50.3 mmboe, representing a 17% decline due to production and reevaluation of the fields. In February 2007, Cottonwood, our first operated international deepwater field, came on stream at initial rates of 1.1 mmm<sup>3</sup>/d (39 mmcf/d) of gas and 4 mbbl/d of light oil (condensate).

In December 2006, the U.S. Minerals Management Service approved the Conceptual Plan for the development of the Cascade and Chinook fields, which includes the first deployment of an FPSO facility in the GOM. FPSOs may protect lives, the environment and capital assets during hurricanes by allowing for rapid evacuation and faster reconnection of wells. The plan also incorporates six technologies that are tested in Brazilian offshore waters, but new to the GOM, including a disconnectable turret buoy, crude transportation by shuttle tanker, free-standing hybrid risers, underwater electric submersible pumps, torpedo pile vertical loaded anchors and polyester mooring systems. In addition to Cascade and Chinook, which we operate and which will begin production in 2010, other discoveries in the GOM include St. Malo (2003) and Coloumb (2004).

Continuing our active participation in GOM Lease Sales, we secured 34 blocks in Lease Sale 204 in August 2007, 26 blocks in Sale 205 in October 2007 and 22 blocks in Sale 206 in March 2008. The new blocks are located primarily in deep water areas of Keathley Canyon, Green Canyon, Mississippi Canyon and Walker Ridge.

#### Europe

We exited Europe in 2001 and re-entered the region in 2006, when Petrobras International Braspetro BV signed a joint study agreement with Galp and Partex to study seismic data related to the Peniche Basin offshore **Portugal**. We hold a 50% interest in this consortium, and we signed four concession contracts in May 2007 in this Basin (Camarão, Amêijoa, Ostra and Mexilhão). We jointly committed to invest approximately U.S.\$30.0 million for exploration in the Peniche Basin.

We have also expanded our operations by acquiring exploration opportunities in **Turkey** in 2006. In 2006, we formed a partnership with the national oil company of Turkey to explore two deep-water blocks in the Black Sea, Kirklarelli and Sinop. We believe that the relatively unexplored Black Sea has significant geological potential and could become an attractive producing region because of its close proximity to oil and gas pipelines supplying Europe. *Middle East* 

After a 20-year hiatus from the region, we re-entered the Middle East in 2004 by signing an exploration contract with the National Iranian Oil Company (NIOC). In **Iran** we are exploring the Tusan block in the shallow waters of the Gulf. We drilled one well at a cost of U.S.\$80.0 million and are in the process of drilling a second well. *Africa* 

Our operations in Africa date back to 1979 and include production in Angola, development activities in Nigeria and exploration in these and other countries. Our production from the region has been declining, but this trend will reverse with the planned startup of two new fields in Nigeria in 2008. During 2007, we participated in these developments and expanded our exploration operations in Africa, most recently adding Senegal to the list of countries where we are active.

**Angola** was our sole source of production in the region in 2007, with an average of 3.6 mboe/d from the mature Block 2. Our combined crude oil and natural gas reserves in Angola were 3.8 mmboe. In 2006, we acquired interests in four offshore blocks, and we have the operatorship in three of them. In December 2007, we realized an impairment of U.S.\$13.0 million due to reduced estimates of future cash flow.

In **Nigeria**, we hold a non-operating interest in blocks OML 127 and OML 130 where the Agbami and Akpo fields are scheduled to come on stream in 2008. Operator Chevron is developing the Agbami field on blocks OML 127 and OML 128 as a unitized development where we hold a 13% non-operating interest. We expect peak production to reach 250 mbbl/d in 2009. We expect the TOTAL-operated Akpo field on Block OML 130, where we hold a 20% interest, to reach peak production of 185 mbbl/d in 2009. Our share of the total development cost of the Agbami and Akpo fields is estimated at U.S.\$2.2 billion, of which we had invested U.S.\$1.0 billion as of December 31, 2007. Block OML 130 also contains the Egina field, discovered in 2003, for which development options are currently being considered, including the possible use of a 200 mbbl/d capacity FPSO. We are the operator for blocks OPL 315 and OPL 324, where exploration activities are underway.

We have been active in **Libya** since March 2005, when we acquired exploratory and shared production rights for Area 18, consisting of four blocks offshore northeastern Libya. We are the operator of the consortium exploring the block, holding a 70% share. The production sharing agreement mandates a five-year exploration stage and 25 years of production rights shared with the Libyan National Oil Company.

In 2006, we acquired a 17% working interest in the offshore Zambezi Delta Block in **Mozambique**. The partners spudded exploration well ZD-E-1 on this Block in May 2007, which was dry. The license was recently extended for one year, and the partners committed to acquire 2-D seismic over the block and drill a second well.

#### Table of Contents

In February 2007, we acquired a 40% participation in the Rufisque Profond exploration block in **Senegal**, in waters ranging from 150 to 3,000 meters (approximately 500 to 10,000 feet). We purchased this interest from Edison SpA, formerly 95% operator of the block. Petrosen (Senegal s national oil company) holds the remaining 5%. Under the agreement, we will reimburse 42.1% of the past costs to Edison and participate in 1,500 square km of seismic data that is already in the acquisition phase.

Our interests in **Tanzania** consist of three deep to ultra deep exploration blocks located in the Mafia Basin, for which we acquired 100% operating interests in 2004 and 2006. If our seismic studies show that the blocks hold hydrocarbon potential, we intend to spud our first exploration well by mid 2010.

In **Equatorial Guinea**, we held an interest in deepwater Block L in the Rio Muni Basin. We returned the Block in July 2007, after drilling two dry wells.

Asia

During 2007, we began our first exploration activities in Asia, another region where offshore and deep offshore regions hold substantial potential.

In June 2007, under a swap agreement with the Oil and Natural Gas Company (ONGC) we exchanged interests in three blocks in Brazil for interests in three exploration blocks in the Krishna Godavarai, Mahanadi and Cauvery Basins offshore eastern **India**. We will drill one well in each of these blocks, all of which are in deep water.

We have been in **Pakistan** since February 2007, when we signed an agreement with Oil and Gas Development Company Limited (OGDCL) to explore offshore block G in that country. The offshore block is located in the Indus basin and remains largely unexplored, with a mere 11 wells having been drilled there. We have committed to undertake geological and geophysical studies that will allow us to develop a full model of the region s oil system. We have the option to terminate our agreements before drilling any wells.

**Other International Activities** 

Most of our international activities are focused on exploration and production. Our other international activities are summarized in the tables below and described in the text that follows.

## PETROBRAS INTERNATIONAL REFINING ASSETS AT DECEMBER 31, 2007

Region	<b>Refinery</b> (Group Share %)	Supplied by:	Crude distillation capacity
Latin America			
Argentina (1)	Bahia Blanca (100%)	Oxy, Petroleum, Apco	31 mbbl/d
	Refinor/Campo Duran (28.5%)	Palmar Largo (AR), Bolivia	26.4 mbbl/d
	San Lorenzo (100%)	Total, Chevron	50 mbbl/d
North America			
United States	Pasadena, TX (50%)	Campos Basin, Brazil	100 mbbl/d

 All Argentine refining operations are held through our 67.2% share in PESA.

#### PETROBRAS INTERNATIONAL PETROCHEMICAL ASSETS AT DECEMBER 31, 2007

Region	Plant(1)	Products
Latin America Argentina	Campana	Ammonia, Urea, UAN

Puerto General San Martin Zarate INNOVA Styrene and SBR Polystyrene and Bops Ethylbenzene, styrene, polystyrene

Brazil

 All international petrochemical operations held through our 67.2% share in PESA.

We have integrated operations in Latin America, particularly in **Argentina**, where we participate across the energy value chain. In Argentina, we own the Pichi Picún Leufú hydroelectric plant, the gas-fired thermal plant Genelba, an interest in natural gas transportation company TGS (Transportadora Gas del Sur), and interests in energy marketer Edesur, and Mega Company, a natural gas separation facility. We also own four petrochemical plants (three in Argentina and one in Brazil), two refineries providing 81 mbbl/d of net capacity, and an interest in the Refinor/Campo Duran Refinery. We own 679 retail service stations operating under the brand names Petrobras, Eg3 and San Lorenzo. On July 19, 2007, PESA agreed to sell its interest in Transener, an electricity transmission company, to Energía Argentina S.A. (Enarsa) and Electroingeniería S.A. for U.S.\$54.0 million. We also sold our 40% interest in Petroquimica Cuyo, for U.S.\$32.0 million.

In **Bolivia**, we operate gas fields and pipelines that supply gas to Brazil. We hold an 11% stake in Gas Transboliviano S.A. (GTB), owner of the Bolivian section of the Bolivia-to-Brazil (BTB) pipeline that transports natural gas we produce in Bolivia to the Brazilian market. We also hold a 44.5% stake in Transierra S.A., which owns the Yacuiba-Rio Grande gas pipeline (Gasyrg) linking the San Alberto and San Antonio fields to the BTB pipeline. In May 2007, we sold our two Bolivian refineries (Cochabamba and Santa Cruz) for U.S.\$112.0 million to the state oil company YPFB, which is now the sole distributor for refined oil and gas products in Bolivia.

In **Colombia**, we operate 62 service stations under the Petrobras logo, a storage facility, a lubricants blending plant in Puente Aranda and a lubricant terminal in Santa Marta.

We have a marketing and representative office in Chile.

We acquired fuel and lubricant retailing and commercial businesses in **Paraguay** in 2006 and rebranded our 160 service stations with the Petrobras logo in 2007. We also operate 54 convenience stores, aviation fueling installations, and an LPG refueling plant.

In 2006, we acquired fuel and lubricant retailing and commercial businesses in **Uruguay**. We operate 89 service stations, installations for commercialization of marine and aviation products, petrochemicals and asphalt. We also hold stakes in the country s two gas distribution companies.

In 2006, we entered the **United States** refining market by acquiring 50% of the Pasadena Refining System (PRSI), formerly the Crown Refinery in Pasadena, Texas. Together with our 50% partner, Astra Oil Company, we are studying the feasibility of expanding and upgrading its capacity to process our heavy Brazilian crudes and deliver high-quality products to the U.S. market.

In November 2007, we agreed to purchase 87.5% of Nansei Sekiyu Kabushiki Kaisha (NSS), a refinery in Okinawa, **Japan**. As a result of this acquisition, which was finalized in April 2008, we will start refining operations in Asia for the first time with a capacity of 100 mbbl/d.

#### PifCo

PifCo was incorporated in order to facilitate and finance the import of crude oil and oil products by us into Brazil, and has been our wholly owned subsidiary since 2000. PifCo acts as an intermediary between third-party oil suppliers and us by engaging in crude oil and oil product purchases from international suppliers, and reselling crude oil and oil products in U.S. dollars to us on a deferred payment basis, at a price which includes a premium to compensate PifCo for its financing costs. PifCo is generally able to obtain credit to finance purchases on the same terms granted to us, and PifCo buys crude oil and oil products at the same price that suppliers would charge us directly.

As part of our strategy to expand our international operations and facilitate our access to international capital markets, PifCo engages in borrowings in international capital markets supported by us, primarily through standby purchase agreements of the related securities. There are certain risks associated with the standby purchase agreement, see Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities. However, PifCo may use the cash flows generated by the import of oil products to pay amounts due under its debt securities.

## PifCo s Corporate Structure

PifCo was established on September 24, 1997 as Brasoil Finance Company, a wholly owned subsidiary of Braspetro Oil Services Company, or Brasoil, a wholly owned subsidiary of Petrobras Internacional S.A. (Braspetro), which has since been absorbed by us. PifCo s voting shares were transferred from Brasoil to us in 2000, since which time it has been our wholly owned subsidiary. Petrobras International Finance Company is an exempted company incorporated with limited liability under the laws of the Cayman Islands. PifCo s registered office is located at Harbour Place, 103 South Church Street, 4th floor, George Town, Grand Cayman, Cayman Islands, and PifCo s telephone number is 55-21-3487-2375.

## PifCo s four subsidiaries are:

**Petrobras Europe Limited (PEL):** In May 2001, PifCo established PEL, a wholly owned subsidiary incorporated and based in the United Kingdom, to consolidate our trade activities in Europe, the Middle East, the Far East and North Africa. These activities consist of advising on, and negotiating the terms and conditions for, crude oil and oil products supplied to PifCo and us, as well as marketing Brazilian crude oil and crude oil products exported to the geographic areas in which PEL operates. PEL plays an advisory role in connection with these activities and undertakes no direct or additional commercial or financial risk. PEL provides these advisory and marketing services as an independent contractor, pursuant to a services agreement between PEL and us. In exchange, we compensate PEL for all costs incurred in connection with these activities, plus a margin.

**Petrobras Finance Limited (PFL):** In December 2001, PifCo established PFL, a wholly owned subsidiary incorporated and registered in the Cayman Islands. PFL primarily purchases fuel oil from us and sells the products in the international market in order to generate export receivables to cover its obligations to transfer these receivables to a trust under an exports prepayment program. Until June 1, 2006, PFL also purchased bunker fuel from us. The exports prepayment program helps provide PFL with the funding necessary to purchase oil products from us, as described below.

**Bear Insurance Company Limited (BEAR):** In January 2003, BEAR was transferred to PifCo from Brasoil. This transaction took place as part of the restructuring of our international business segment. BEAR currently serves as an intermediary for us, advising on and negotiating the terms and conditions of, certain of our insurance policies.

**Petrobras Singapore Private Limited (PSPL):** In April 2006, PifCo created PSPL, a company incorporated in Singapore to trade oil and derivatives in connection with our trading activities in Asia. This company initiated operations on July 1, 2006.

## PifCo s Principal Commercial Activities

PifCo s principal activity is the purchase of crude oil and oil products for resale to us and, to a limited extent, third parties. PifCo acquires substantially all of its crude oil and oil products either through purchases on the spot market or short-term supply contracts. PifCo also acquires a small portion of its crude oil and oil products through long-term supply contracts. PifCo s crude oil and oil product purchase obligations are, in most instances, guaranteed by us. PifCo then resells the products it purchases to us at the purchase price it paid, plus a premium, determined in accordance with a formula designed to pass on PifCo s average costs of capital to us.

In addition, PifCo finances its oil trading activities principally from commercial banks, including lines of credit, as well as through inter-company loans from us and the issuance of notes in the international capital markets.

The following chart illustrates how PifCo acts as the intermediary between international crude oil suppliers and us: PifCo purchases crude oil and oil products from international oil suppliers on a free-on-board (F.O.B.) basis under standard terms that traditionally require payment within 30 days from the bill of lading. We would typically be unable to meet the 30-day payment term imposed by international suppliers because of the complexity of Brazilian customs and importing regulations. For example, if a shipment to which a bill of lading relates must be delivered to different parts of Brazil, different sets of documents must be delivered to each delivery point. Depending on the unloading ports locations, this process may be completed up to 120 days from the vessel s departure. Because PifCo is not subject to the Brazilian regulations applicable to us, PifCo can pay the international supplier on time without having to produce these different sets of documents. To cover its financing costs, PifCo includes a premium when it sells crude oil and oil products to us. We are then able to buy crude oil and oil products from PifCo under terms that allow for payment up to 330 days from the date of the bill of lading, to ensure sufficient time to meet customs and importing regulations. *Exports Prepayment Program* 

In 2001, we created an export prepayment program to finance our fuel oil exports through the securitization of our fuel oil exports receivables. A Cayman Islands trust, the PF Export Receivables Master Trust (the Trust ), raises funds by issuing certificates to investors and providing this funding to PFL to purchase fuel oil from us. PFL purchases fuel oil from us under a Master Export Contract and a Prepayment Agreement, which establishes quarterly minimum purchase commitments. PFL assigns all receivables from the sale of such exports to the Trust, and the receivables serve as collateral for the payment obligations due under the certificates. The certificates represent senior undivided beneficial interests in the property of the Trust.

The value of receivables to be designated for sale in any quarterly period represents a portion, but not all, of the receivables expected to result from the sale of fuel oil by PFL in such period. The balance of the receivables is the property of PFL.

Since the creation of the program, the Trust has issued a total of U.S.\$1,500 million in Senior Trust Certificates. We have prepaid or amortized a portion of the Senior Trust Certificates. Currently, there are U.S.\$464 million in Senior Certificates outstanding.

We have used the capital markets to meet our financing needs since 2002, when we filed a shelf registration statement with the SEC on Form F-3.

As the support for the exports prepayment program, we sell fuel oil to utilities, refineries and traders. The following table sets forth our fuel oil export sales for the period from 2003 to 2007:

	2007	2006	2005	2004	2003
Millions of U.S.\$	2,205.9	1,500.1	1,077.6	1,306.1	967.3
Millions of Barrels	39.6	67.3	25.5	47.5	38.4

#### **Organizational Structure**

All of our 22 direct subsidiaries listed below are incorporated under the laws of Brazil, except PifCo, Petrobras International Braspetro B.V. (PIB BV), Braspetro Oil Company (BOC), Braspetro Oil Services Company (Brasoil) and Petrobras Netherlands B.V. (PNBV), which are incorporated abroad. See Exhibit 8.1 for a complete list of our subsidiaries, including their full names, jurisdictions of incorporation and our percentage equity interest.

The following diagram sets forth our significant consolidated subsidiaries as of December 31, 2007:

## **Property, Plants and Equipment**

Petrobras

Our most important tangible assets are wells, platforms, refining facilities, pipelines, vessels and other transportation assets, and power plants. Most of these are located in Brazil. We own and lease our facilities and some owned facilities are subject to liens, although the value of encumbered assets is not material.

We have the right to exploit crude oil and gas reserves in Brazil under concession agreements, but the reserves themselves are the property of the government under Brazilian law. Item 4. Information on the Company includes a description of our reserves and sources of crude oil and natural gas, key tangible assets, and material plans to expand and improve our facilities.

PifCo

PifCo does not itself own or lease any material property, plant or equipment.

## **Regulation of the Oil and Gas Industry in Brazil**

Regulatory Framework

Under Brazilian law, the Brazilian government owns all crude oil and natural gas reserves in Brazil. Between 1953 and 1997, the Brazilian government held a monopoly over the research, exploration, production, refining and transportation of crude oil and oil products in Brazil and its continental shelf, with the exception that companies that were engaged in refining and distribution in 1953 were permitted to continue those activities. We were the Brazilian government s exclusive agent for exploiting its monopoly, including the importation and exportation of crude oil and oil products.

In 1995, as part of a comprehensive reform of the oil and gas regulatory system, the Brazilian Congress amended the Brazilian Constitution to authorize the Brazilian government to contract with any state or privately-owned company to carry out activities related to the upstream and downstream segments of the oil and gas sector. This amendment led to the enactment of the Oil Law, which provided for the establishment of a new regulatory framework, ended our exclusive agency and allowed competition in all aspects of the oil and gas industry in Brazil. Since that time, we have been operating in an environment of gradual deregulation and increasing competition.

The Oil Law also created an independent regulatory agency, the National Petroleum Agency. The ANP s function is to regulate the oil, natural gas and renewable fuels industry in Brazil, and its mission is to create a competitive environment that will lead to the lowest price and best services for consumers. Its principal responsibilities include regulating concession terms for upstream development and awarding new exploration concessions.

The Oil Law granted us the exclusive right to exploit crude oil reserves in each of our producing fields for 27 years from the date when they were declared commercially profitable. The Oil Law also established a procedural framework for us to claim exclusive exploratory rights for a period of up to three years, later extended to five years, to areas where we could demonstrate that we had established prospects prior to the enactment of the Oil Law. In order to perfect our claim to explore and develop these areas, we had to demonstrate that we had the financial capacity to carry out these activities, either alone or through other cooperative arrangements.

See Item 5. Operating and Financial Review and Prospects Liquidity and Capital Resources Petrobras for a discussion of the regulations governing our budget and strategic planning process.

Since Brazil is not a member of OPEC, neither Brazil nor we are bound by OPEC guidelines. However, to the extent that OPEC influences international crude oil prices, our prices are affected, as our prices are linked to international crude oil prices. We have been invited to attend OPEC meetings as an observer.

Price Regulation

Until the passage of the Oil Law in 1997, the Brazilian government had the power to regulate all aspects of the pricing of crude oil, oil products, ethanol, natural gas, electric power and other energy sources. In 2002, the government eliminated price controls for crude oil and oil products, although they retained regulation over certain natural gas sales contracts and electricity. Also in 2002, the Brazilian government established an excise tax on the sale and import of crude oil, oil products and natural gas products (*Contribuição de Intervenção no Domínio Econômico*, Contribution for Intervention in the Economic Sector, or CIDE).

#### Exploration and Development Regulation

According to the Oil Law and under our concession agreements with ANP, we are required to pay the government the following:

signature bonuses paid upon the execution of the concession agreement, which are based on the amount of the winning bid, subject to the minimum signature bonuses published in the relevant bidding guidelines (*edital de licitação*);

annual retention bonuses for the occupation or retention of areas available for exploration and production, at a rate established by the ANP in the relevant bidding guidelines based on the size, location and geological characteristics of the concession block;

special participation charges at a rate ranging from 0 to 40% of the net operating revenues derived from the production of the field. In 2007, we paid this tax on 20 of our fields, including Marlim, Albacora, Roncador, Leste do Urucu, Rio Urucu, Canto do Amaro, Marimbá, Marlim Sul, Namorado, Carapeba, Pampo, Albacora Leste, Barracuda, Caratinga, Cherne, Fazenda Alegre, Miranga, Carmópolis, Espadarte and Jubarte. Net revenues are gross revenues less royalties paid, investments in exploration, operational costs and depreciation adjustments and applicable taxes. The Special Participation Tax uses as a reference international oil prices converted to *reais* at the current exchange rate; and royalties, typically at 5% and 10% of the value of production, are based on reference prices for crude oil or

natural gas established in the relevant bidding guidelines and concession contract. In calculating royalty rates, the ANP also takes into account the geological risks and expected productivity levels for each concession. Virtually all our crude oil production is currently taxed at the maximum royalty rate.

The Oil Law also requires concessionaires of onshore fields to pay to the owner of the land a special participation fee that varies between 0.5% and 1.0% of the net operating revenues derived from the production of the field. *Environmental Regulations* 

All phases of the crude oil and natural gas business present environmental risks and hazards. Our facilities in Brazil are subject to a wide range of federal, state and local laws, regulations and permit requirements relating to the protection of human health and the environment. At the federal level, our offshore activities and those that involve more than one Brazilian state are subject to the regulatory authority of the *Conselho Nacional do Meio Ambiente* (National Council for the Environment, or CONAMA) and to the administrative authority of IBAMA, which issues operating and drilling licenses. We are required to submit reports, including safety and pollution monitoring reports (IOPP) to IBAMA in order to maintain our licenses. Onshore environmental, health and safety conditions are controlled at the state rather than federal level, and there is strict liability for environmental damage, mechanisms for enforcement of environmental standards and licensing requirements for polluting activities.

Individuals or entities whose conduct or activities cause harm to the environment are subject to criminal and administrative sanctions. Government environmental protection agencies may also impose administrative sanctions for noncompliance with environmental laws and regulations, including:

fines;

partial or total suspension of activities;

requirements to fund reclamation and environmental projects;

forfeit or restriction of tax incentives or benefits;

closing of the establishments or undertakings; and

forfeiture or suspension of participation in credit lines with official credit establishments.

We are subject to a number of administrative proceedings and civil and criminal claims relating to environmental matters. See Item 8. Financial Information Legal Proceedings Environmental Claims.

In 2007, we invested approximately U.S.\$1,015 million in environmental projects, compared to approximately U.S.\$645 million in 2006 and U.S.\$521 million in 2005. These investments were primarily directed at reducing emissions and wastes resulting from industrial processes, managing water use and effluents, remedying impacted areas, implementing new environmental technologies, upgrading our pipelines and improving our ability to respond to emergency situations.

## Health, Safety and Environmental Initiatives

The protection of human health and the environment is one of our primary concerns, and is essential to our success as an integrated energy company. We have created a Health, Safety and Environment (HSE) Management Committee composed of executive managers of our business units and directors of our subsidiaries BR Distribuidora and Transpetro. The Committee s work is supported by three permanent subcommittees and one commission as well as by temporary commissions and work groups, each responsible for a specific HSE issue, such as licensing and environmental compensation, emissions and climate change, operational risk assessment, management of change, new projects and health management.

We have also created an Environmental Committee composed of three members of our board of directors. This committee s responsibilities include: (i) overseeing and managing environmental and work safety issues affecting us; (ii) establishing measurable environmental targets and ensuring compliance; and (iii) recommending changes in environmental, health and safety policy, if necessary, to our board of directors. The Environmental Committee charter is awaiting approval by our board of directors.

Our actions to address health, safety and environmental concerns and ensure compliance with environmental regulations include:

PEGASO program to upgrade pipelines and other equipment, implement new technologies, improve our emergency response readiness, reduce emissions and residues and prevent environmental accidents. From April 2000 to December 2007, we spent approximately U.S.\$4,648 million under this program, including the *Programa de Integridade de Dutos* (Pipeline Integrity Program) through which we conduct inspections of, and improvements to, our pipelines. In 2007, we spent approximately U.S.\$567 million in connection with the PEGASO program;

new HSE policy and corporate guidelines, which focus on principles of sustainable development, compliance with legislation and environmental performance indicators;

ten environmental protection centers and thirteen advanced bases for oil spill prevention, control and response, local and regional, onshore and offshore oil spill contingency plans involving public services and communities, three dedicated oil spill recovery vessels (OSRVs) fully equipped for oil spill control and fire fighting;

ISO 14001 (environment) and OHSAS 18001 (health and safety) certification of our operating units. As of December 2007, Petrobras held 40 certificates for its operating units in Brazil and units abroad. Because some of those certificates cover more than one site, the total number of certified sites is 182 in Brazil and 20 abroad. The *Frota Nacional de Petroleiros* (National Fleet of Vessels) has been fully certified by the IMO International Management Code for Safe Operation of Ships and for Pollution Prevention (ISM Code) since December 1997;

regular and active engagement with the Brazilian Ministry of Mines and Energy and IBAMA, including negotiating new environmental compensation regulations and discussing environmental issues connected with new gas pipelines, oil and gas production projects and other aspects of our operations.

a new Climate Change strategic program, which aims to implement the highest standards in the energy industry regarding greenhouse gas management. By reducing the environmental impact of our operations, we will contribute to our sustainability and mitigate global climate change.

In addition, we conduct environmental studies for all new projects as required by Brazilian environmental legislation, and our HSE department evaluates every project with a total budget exceeding U.S.\$25 million to confirm its compliance with all HSE requirements and adoption of the best HSE practices throughout the project s life cycle. In the past, we have experienced oil spills that resulted in fines from various state and federal environmental agencies,

and several civil and criminal proceedings and investigations. In 2007, we experienced oil spills totaling 101,970 gallons of crude oil, compared to 77,402 gallons of crude oil in 2006 and 71,141 gallons in 2005.

We continue to evaluate and develop initiatives to address HSE concerns and to reduce our exposure to HSE risks. **Insurance** 

Our insurance programs focus principally on the concentration of risks and the importance and replacement value of assets, which we believe is customary for our industry. Under our risk management policy, risks associated with our principal assets, such as refineries, tankers, our fleet and offshore production and drilling platforms, are insured for their replacement value with third-party Brazilian insurers. Although the policies are issued in Brazil, most of our policies are reinsured abroad with reinsurers rated A- or higher by Standard & Poor s rating agency or B+ or higher by A.M. Best. Part of our international operations are insured or reinsured by our Bermudian subsidiary Bear Insurance Company Limited following exactly the same rating criteria.

Less valuable assets, such as small auxiliary boats, certain storage facilities, and some administrative installations, are self-insured. We do not maintain coverage for business interruption, except for a minority of our international operations and a few specific assets in Brazil. We also do not maintain coverage for our wells for substantially all of our Brazilian operations. We maintain coverage for operational third-party liability with respect to our onshore and offshore activities, including environmental risks such as oil spills. Although we do not insure most of our pipelines, we have insurance against damage or loss to third parties resulting from specific incidents, as well as oil pollution. We also maintain coverage for risks associated with cargo, hull and machinery risk. All projects and installations under construction that have an estimated maximum loss above U.S.\$50 million are covered by a construction policy.

The premium for renewing our domestic property risk insurance policy for a 12-month period commencing June 2007 was U.S.\$26.2 million. This represented a decrease of 24.1% over the preceding 12-month period. The decrease was primarily due to the softening conditions of the insurance market. We had an increase in the insured value of our assets, which in the same period, increased by 10.4%, from U.S.\$43.2 billion to U.S\$47.7 billion. Since 2001, our risk retention has increased and our deductibles may reach U.S.\$50 million in certain cases.

## Item 4A. Unresolved Staff Comments

Not applicable.

#### Item 5. Operating and Financial Review and Prospects

## Management s Discussion and Analysis of Petrobras Financial Condition and Results of Operations

You should read the following discussion of our financial condition and results of operations together with our audited consolidated financial statements and the accompanying notes beginning on page F-2 of this annual report.

## Overview

We earn income from:

domestic sales, which consist of sales of oil products (such as diesel oil, gasoline, jet fuel, naphtha, fuel oil and liquefied petroleum gas), natural gas, ethanol, electricity and petrochemical products;

#### Table of Contents

export sales, which consist primarily of sales of crude oil and oil products;

international sales (excluding export sales), which consist of sales of crude oil, natural gas and oil products that are purchased, produced and refined abroad; and

other sources, including services, investment income and foreign exchange gains.

## Our expenses include:

costs of sales (which are composed of labor expenses, operating costs and purchases of crude oil and oil products); maintaining and repairing property, plant and equipment; depreciation and amortization of fixed assets; depletion of oil fields; and exploration costs;

selling (which include expenses for transportation and distribution of our products), general and administrative expenses; and

interest expense, monetary and foreign exchange losses.

Fluctuations in our financial condition and results of operations are driven by a combination of factors, including: the volume of crude oil, oil products and natural gas we produce and sell;

changes in international prices of crude oil and oil products, which are denominated in U.S. dollars; related changes in the domestic prices of crude oil and oil products, which are denominated in *reais*; fluctuations in the product of the produ

fluctuations in the real/U.S. dollar and Argentine peso/U.S. dollar exchange rates; and

the amount of production taxes that we are required to pay with respect to our operations.

## **Sales Volumes and Prices**

The profitability of our operations in any particular accounting period is related to the sales volume of, and prices for, the crude oil, oil products and natural gas that we sell. Our consolidated net sales in 2007 totaled approximately 1,182,235 thousand barrels of crude oil equivalent, representing U.S.\$87,735 million in net operating revenues, compared to 1,104,723 thousand barrels of crude oil equivalent, representing U.S.\$72,347 million in net operating revenues in 2006 and approximately 1,025,033 thousand barrels of crude oil equivalent, representing U.S.\$56,324 million in net operating revenues in 2005.

As a vertically integrated company, we process most of our crude oil production in our refineries and sell the refined oil products primarily in the Brazilian domestic market. Therefore, it is oil product prices, rather than crude oil prices, that most directly affect our financial results. Nonetheless, as crude oil production increases, and as exports increase, the increase in crude oil production will have a greater relative importance.

Oil product prices vary over time as the result of many factors, including the price of crude oil. The average prices of Brent crude, an international benchmark oil, were approximately U.S.\$72.52 per barrel in 2007, U.S.\$65.14 per barrel in 2006 and U.S.\$54.38 per barrel in 2005. For December 2007, Brent crude oil prices averaged U.S.\$90.97 per barrel. Crude oil prices have been showing volatility in the first quarter of 2008, averaging U.S.\$ 96.56 per barrel. During 2007, we did not announce any increases in our prices for gasoline and diesel in the domestic market.

During 2007, approximately 69.2% of our net operating revenues were derived from sales of crude oil and oil products in Brazil, compared to 69.7% in 2006 and 72.4% in 2005. As export volumes of crude oil and oil products have increased, domestic sales as a percentage of net operating revenues have declined.

Our revenues are principally derived from sales in Brazil. The following table sets forth our domestic sales by volume of oil products, natural gas and ethanol for each of 2007, 2006 and 2005:

	<b>X</b> 7 <b>1</b>	0	Net Operating	or the Year	2006 Net Average	Net Operating		0	Net Operating
Energy products:	Volume (mbbl, except as otherwise noted)	Price (U.S.\$) (1)	Revenues (U.S.\$ million)	Volume (mbbl, except as otherwise noted)	Price (U.S.\$) (1)	Revenues (U.S.\$ million)	Volume (mbbl, except as otherwise noted)	(U.S.\$) (1)	Revenues (U.S.\$ million)
Automotive gasoline Diesel Ethanol Fuel oil	109,654 257,304 62	83.73 96.42 80.65	9,181 24,809 5	112,541 245,159 59	73.86 83.65 67.80	8,312 20,507 4	104,901 242,831 126	60.08 68.20 23.79	6,302 16,561 3

(1) Net average price calculated by dividing net sales by the volume for the year.

## **Effect of Taxes on Our Income**

In addition to taxes paid on behalf of consumers to federal, state and municipal governments, such as the *Imposto sobre Circulação de Mercadorias e Serviços*, or ICMS, we are required to pay three principal charges on our oil production activities in Brazil: royalties, special participation and retention bonuses. See Item 4. Information on the Company Regulation of the Oil and Gas Industry in Brazil Exploration and Development Regulation and Item 3. Key Information Risk Factors Risks Relating to Brazil.

These charges imposed by the Brazilian government are included in our cost of goods sold. In addition, we are subject to tax on our income at an effective rate of 25% and a social contribution tax at an effective rate of 9%, the standard corporate tax rate in Brazil. See Note 3 to our audited consolidated financial statements.

## **Inflation and Exchange Rate Variation**

#### Inflation

Since the introduction of the *real* as the Brazilian currency in July 1994, inflation in Brazil has remained relatively stable, although it increased markedly in 2002. Inflation was 4.46% in 2007, 3.14% in 2006 and 5.69% in 2005, as measured by IPCA, the National Consumer Price Index. Inflation has had, and may continue to have, effects on our financial condition and results of operations.

#### **Table of Contents**

#### Exchange Rate Variation

Since we adopted the *real* as our functional currency in 1998, fluctuations in the value of the *real* against the U.S. dollar have had multiple effects on our results of operations.

Our reporting currency for all periods is the U.S. dollar. We maintain our financial records in *reais*, and translate our statements of operations into U.S. dollars at the average rate for the period. Although substantially all of our revenues are in *reais*, they have been, and continue to be, linked to U.S. dollar-based international prices, since virtually all of our sales are of crude oil or oil products. When the *real* strengthens relative to the U.S. dollar as it has done since 2003, the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. When the *real* strengthens, prices for our products when expressed in *reais* may remain constant, while in dollar terms they increase. In 2007, there was a 10.5% appreciation of the *real* against the U.S. dollar, compared to an appreciation of 10.7% in 2006 and 16.8% in 2005.

If the *real* were to depreciate against the U.S. dollar, our prices when expressed in dollars would decline, unless we raised prices.

Foreign currency translation adjustments have a significant impact on the balance sheet of a company such as ours, whose assets are primarily denominated in *reais*, but whose liabilities are primarily denominated in foreign currencies. Asset values increase when the real appreciates. The changes in our asset values are charged to shareholders equity, but do not necessarily affect our cash flows, since our revenues and cash earnings are to a large degree linked to the U.S. dollar, and a portion of our operating expenses are linked to the *real*. See Note 2 of our audited consolidated financial statements for the year ended December 31, 2007, for more information about the translation of Brazilian *real* amounts into U.S. dollars.

The exchange rate variation also affects the amount of retained earnings available for distribution by us when measured in U.S. dollars. Amounts reported as available for distribution in our statutory accounting records prepared in accordance with Brazilian accounting principles increase or decrease when measured in U.S. dollars as the *real* appreciates or depreciates against the U.S. dollar. In addition, the exchange rate variation creates foreign exchange gains and losses that are included in our results of operations determined in accordance with Brazilian accounting principles and that affect the amount of our unretained earnings available for distribution.

#### **Results of Operations**

The differences in our operating results from year to year occur as a result of a combination of factors, including primarily: the volume of crude oil, oil products and natural gas we produce and sell, the price at which we sell our crude oil, oil products and natural gas and the differential between the Brazilian inflation rate and the depreciation or appreciation of the *real* against the U.S. dollar. The table below shows the amount by which each of these variables has changed during the last three years:

	2007	2006	2005
Crude Oil and NGL Production (mbbl/d):			
Brazil	1,792	1,778	1,684
International	112	130	163
Non-consolidated international production(1)	14	12

**Results of Operations 2007 compared to 2006** 

Virtually all of our revenues and expenses for our Brazilian activities are denominated and payable in *reais*. When the *real* strengthens relative to the U.S. dollar as it did in 2007 (10.5%) and 2006 (10.7%), the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. However, the appreciation of the *real* against the U.S. dollar affects the line items discussed below in different ways. The following comparison between our results of operations in 2007 and 2006 is also impacted by the increase in the value of the *real* against the U.S. dollar during that period. See Note 2 of our audited consolidated financial statements for the year ended December 31, 2007, for more information about the translation of Brazilian *real* amounts into U.S. dollars.

Certain prior year amounts have been reclassified to conform to current year presentation standards. These reclassifications had no impact on the Company s net income.

Revenues

Net operating revenues increased 21.3% to U.S.\$87,735 million for 2007, compared to U.S.\$72,347 million for 2006. This increase was primarily attributable to higher sales volumes and prices for our products in domestic and international markets.

Consolidated sales of products and services increased 19.7% to U.S.\$112,425 million for 2007, compared to U.S.\$93,893 million for 2006, primarily due to the increases mentioned above.

Included in sales of products and services are the following amounts that we collected on behalf of federal or state governments:

Value-added taxes, social security contributions payable on sales and financial revenues

called PASEP and COFINS, and other taxes on sales and services and social security

contributions. These taxes increased 15.4% to U.S.\$20,668 million for 2007, compared to

U.S.\$17,906 million for 2006, primarily due to higher prices and sales volumes; and

CIDE, the per-transaction fee due to the Brazilian government, increased 10.5% to U.S.\$4,022 million for

2007, compared to U.S.\$3,640 million for 2006, primarily due to higher prices and sales volumes.

## Cost of Sales (Excluding Depreciation, Depletion and Amortization)

Cost of sales for 2007 increased 23.9% to U.S.\$49,789 million, compared to U.S.\$40,184 million for 2006. This increase was principally a result of:

a U.S.\$2,472 million increase in the cost of imports due to higher volumes and prices;

a U.S.\$2,443 million increase in costs associated with a 10.7% increase in our international market prices, including costs related to Pasadena Refinery;

a U.S.\$1,567 million increase in costs associated with a 10.7% increase in our international market sales volumes, including costs related to Pasadena Refinery;

a U.S.\$505 million increase in costs for our international trading activities, due to increases in volume from offshore operations conducted by PifCo; and

a U.S.\$249 million increase in production taxes and charges imposed by the Brazilian government totaling U.S.\$7,692 million for 2007, compared to U.S.\$7,443 million for 2006. This increase in production taxes and charges includes a special participation charge (an extraordinary charge payable in the event of high production and/or profitability from our fields) of U.S.\$3,933 million for 2007, compared to U.S.\$3,885 million for 2006.

## Depreciation, Depletion and Amortization

We calculate depreciation, depletion and amortization of most of our exploration and production assets using the units of production method. Depreciation, depletion and amortization expenses increased 50.9% to U.S.\$5,544 million for 2007, compared to U.S.\$3,673 million for 2006. This increase resulted from higher capital spending and increased depletion and amortization charges relating to increased oil and gas production.

### Exploration (Including Exploratory Dry Holes)

Exploration costs, including costs for exploratory dry holes, increased 52.4% to U.S.\$1,423 million for 2007, compared to U.S.\$934 million for 2006. This increase was primarily attributable to a U.S.\$243 million increase in expenses for international seismic activities, and a U.S.\$99 million increase in expenses related to dry holes in international operations.

#### Impairment of Oil and Gas Properties

For 2007, we recorded an impairment charge of U.S.\$271 million, compared to U.S.\$21 million for 2006. The impairment charge was related primarily to international investments, principally in Ecuador (U.S.\$174 million) due to tax and legal changes implemented by the government; the United States (U.S.\$39 million) and Angola (U.S.\$13 million). The impairment charge in 2006 was related primarily to our Córrego de Pedras on-shore field in Brazil. See Note 9(b) and 9(d) to our audited consolidated financial statements for the year ended December 31, 2007. *Selling, General and Administrative Expenses* 

Selling, general and administrative expenses increased 29.6% to U.S.\$6,250 million for 2007, compared to U.S.\$4,824 million for 2006.

Selling expenses increased 23.5% to U.S.\$2,956 million for 2007 from U.S.\$2,394 million for 2006. This increase was primarily attributable to:

approximately U.S.\$182 million in higher transportation costs due mainly to increased exports; and approximately U.S.\$75 million in higher personnel expenses.

General and administrative expenses increased 35.6% to U.S.\$3,294 million for 2007 from U.S.\$2,430 million for 2006. This increase was primarily attributable to:

approximately U.S.\$309 million in increased personnel expenses; and

approximately U.S.\$229 million in additional technical consulting services due to increased outsourcing of selected non-core general activities.

#### Research and Development Expenses

Research and development expenses increased 20.7% to U.S.\$881 million for 2007 from U.S.\$730 million for 2006. This increase was primarily due to higher costs for training the technical workforce and research and development for production from current reserves and new exploratory frontiers.

Other Operating Expenses

Other operating expenses increased to a total of U.S.\$2,136 million for 2007, from U.S.\$1,120 million for 2006. The most significant charges for 2007 were:

U.S.\$498 million expense related to changes in Petros Pension Plan regulations;

U.S.\$235 million expense related to the implementation of our new salary plan;

U.S.\$211 million expense for losses resulting from legal proceedings and contingencies related to pending lawsuits;

U.S.\$244 million expense for health, safety and environment (HSE);

U.S.\$649 million expense for institutional relations and cultural projects;

U.S.\$65 million expense for unscheduled stoppages of plant and equipment; and

U.S.\$176 million expense for idle capacity from thermoelectric power plants.

The most significant charges for 2006 were:

U.S.\$568 million expense for institutional relations and cultural projects;

U.S.\$238 million expense for idle capacity from thermoelectric power plants;

U.S.\$133 million expense for HSE;

U.S.\$75 million expense for losses resulting from legal proceedings and contingencies related to pending lawsuits;

U.S.\$64 million expense for unscheduled stoppages of plant and equipment; and

U.S.\$32 million gain related to recovery of exploration expenses in Nigeria.

Equity in Results of Non-Consolidated Companies

Equity in results of non-consolidated companies increased to U.S.\$235 million for 2007, compared to U.S.\$28 million in 2006, primarily as a result of the increase in gains in investments in affiliated companies of Petrobras Gás S.A. Gaspetro (U.S.\$71 million), Petrobras Química S.A. Petroquisa (U.S.\$62 million) and Petrobras International Braspetro B.V PIB (U.S.\$37 million).

## Financial Income

We derive financial income from several sources, including interest on cash and cash equivalents. The majority of our cash equivalents are short-term Brazilian government securities, including securities indexed to the U.S. dollar. We also hold U.S. dollar deposits.

Financial income increased 22.5% to U.S.\$1,427 million for 2007 compared to U.S.\$1,165 million for 2006. This increase was primarily attributable to the increase in financial interest income from investments in the amount of U.S.\$258 million in, 2007 compared to 2006. A breakdown of financial income and expenses is set forth in Note 13 of our audited consolidated financial statements for the year ended December 31, 2007.

## Financial Expenses

Financial expenses decreased 58.7% to U.S.\$554 million for 2007, compared to U.S.\$1,340 million for 2006. This decrease was primarily attributable to a decrease of U.S.\$414 million in losses on derivative instruments and U.S.\$122 million in losses on repurchased securities in 2007 compared to 2006. A breakdown of financial income and expenses is set forth in Note 13 of our audited consolidated financial statements for the year ended December 31, 2007.

## Monetary and Exchange Variation on Monetary Assets and Liabilities, Net

Monetary and exchange variation on monetary assets and liabilities, net generated a loss of U.S.\$1,455 million for 2007, compared to a gain of U.S.\$75 million for 2006. The increase in monetary and exchange variation on monetary assets and liabilities, net is primarily attributable to the increase in the appreciation of the real from 8.7% to 17.2% on dollar-denominated investments both in Brazil (via our Exploration and Production segment) and abroad (via our International segment and financial investments).

## Employee Benefit Expense for Non-Active Participants

The employee benefit expense for non-active participants consists of financial costs associated with our expected pension and health care costs. Our employee benefit expense for non-active participants decreased 2.7% to U.S.\$990 million for 2007, compared to U.S.\$1,017 million for 2006. This decrease was primarily attributable to a decrease in employee benefit expense for non-active participants of U.S.\$146 million, primarily due to higher expected market return on plan assets during 2007.

## Other Taxes

Other taxes, consisting of miscellaneous value-added, transaction and sales taxes, increased 11.4% to U.S.\$662 million for 2007, compared to U.S.\$594 million for 2006.

## Other Expenses, Net

Other expenses, net are primarily gains and losses recorded on sales of fixed assets and certain other non-recurring charges. Other expenses, net decreased to a loss of U.S.\$143 million for 2007, compared to a loss of U.S.\$17 million for 2006, primarily due to expenses from damage to third-party equipment installed in wells in the Campos Basin (U.S.\$71 million) and the write-off of Exploration and Production-related sunk costs (U.S.\$53 million).

## Income Tax (Expense) Benefit

Income before income taxes and minority interest increased 0.7% to U.S.\$19,299 million for 2007, compared to U.S.\$19,161 million for 2006. Income tax expense increased 3.5% to U.S.\$5,888 million for 2007, compared to U.S.\$5,691 million for 2006. The reconciliation between the tax calculated based upon statutory tax rates to income tax expense and effective rates is set forth in Note 3 of our audited consolidated financial statements for the year ended December 31, 2007.

## Net Income by Business Segment

We measure performance at the segment level on the basis of net income. Following is a discussion of the net income of our six business segments at December 31, 2007, compared to December 31, 2006.

	Year ended December 31,	
	2007	2006
	(U.S.\$ mi	llion)
Exploration and Production	14,072	11,942
Supply	2,785	2,533
Distribution	446	298
Gas and Energy	(834)	(505)
International	(815)	123
Corporate	(1,796)	(1,436)
Eliminations	(720)	(129)
Net income	13,138	12,826

# Exploration and Production

Our Exploration and Production segment includes our exploration, development and production activities in Brazil, sales and transfers of crude oil in domestic and foreign markets, transfers of natural gas to our Gas and Energy segment and sales of oil products produced at natural gas processing plants.

Consolidated net income for our Exploration and Production segment increased 17.8% to U.S.\$14,072 million for 2007, compared to U.S.\$11,942 million for 2006.

This result was primarily attributable to an increase of U.S.\$6,253 million in net operating revenues, primarily related to: (1) higher sales prices for oil in Brazil; (2) a 0.8% increase in crude oil and NGL production; and (3) higher transfer prices to our other segments for natural gas due to new methodology that takes into consideration natural gas substitutes such as fuel oil as well as international natural gas prices.

These effects were partially offset by:

an increase of U.S.\$1,492 million in cost of sales as a result of higher lifting costs and production taxes when expressed in U.S. dollars, as well as slightly increased production;

an increase of U.S.\$1,169 million in depreciation, depletion and amortization primarily as result of increased capital expenditures, depletion expenses associated with our increased crude oil and natural gas production; and

an increase of U.S.\$214 million in other operating expenses, mainly attributable to a one-time charge of

U.S.\$104 million related to amendments in Petros Plan regulations.

### Supply

Our Supply segment includes refining, transportation, export and purchase of crude oil, as well as the purchase and sale of oil products and fuel alcohol. Additionally, this segment includes the petrochemical and fertilizers division, which includes investments in domestic petrochemical companies and our domestic fertilizer plants.

Consolidated net income for our Supply segment increased 9.9% to U.S.\$2,785 million for 2007, compared to U.S.\$2,533 million for 2006.

This increase was primarily a result of an increase of U.S.\$11,590 million in net operating revenues, mainly attributable to: (1) higher sales volumes; (2) higher average prices for our products sold in Brazil, despite constant prices in *reais* for diesel, gasoline and LPG as the appreciation of the *real* yielded higher revenues when expressed in U.S. dollars; and (3) higher international prices for oil products exports.

These effects were partially offset by:

an increase of U.S.\$10,069 million in the cost of sales, mainly attributable to a rise in the cost and volume of domestic and imported crude oil and an increase in the cost and volume of imported oil products, primarily diesel. Higher refining costs also contributed to the increased cost of sales;

a 47.1% increase of U.S.\$640 million in selling, general and administrative expenses as a result of higher selling expenses, due to increased sales volumes and increased personnel expenses;

a 61.0% increase of U.S.\$408 million in depreciation, depletion and amortization primarily as result of higher capital expenditures to upgrade and modernize our refineries; and

an increase of U.S.\$179 million in other operating expenses, mainly attributable to a one-time charge of

U.S.\$61 million related to amendments in Petros Plan regulations and a U.S.\$69 million expense related to HSE.

# Distribution

Our Distribution segment comprises oil product and ethanol distribution activities conducted by our majority owned subsidiary, Petrobras Distribuidora S.A. BR, in Brazil.

Consolidated net income for our Distribution segment increased 49.7% to U.S.\$446 million for 2007, compared to U.S.\$298 million for 2006. This result reflected an increase of U.S.\$4,639 million in net operating revenues, primarily resulting from higher sales volumes.

These effects were partially offset by an increase of U.S.\$4,157 million in cost of sales, mainly due to higher sales volumes.

Gas and Energy

Our Gas and Energy segment consists principally of the purchase, sale, transportation and distribution of natural gas produced in or imported into Brazil. Additionally, this segment includes our participation in domestic natural gas transportation, natural gas distribution and thermoelectric power generation.

Our Gas and Energy segment registered a net loss of U.S.\$834 million for 2007, compared to a net loss of U.S.\$505 million for 2006. This increase in our net loss was primarily attributable to:

a U.S.\$890 million increase in cost of sales, primarily due to higher natural gas costs; and

an increase of U.S.\$257 million in other operating expenses, mainly attributable to a U.S.\$240 million expense related to the payment of contractual fines related to gas and electricity supply.

These effects were partially offset by an increase of U.S.\$822 million in net operating revenues as a result of: (1) higher sales price for natural gas; and (2) a 2.1% increase in natural gas sales volume. *International* 

The International segment comprises our activities in other countries, which include Exploration and Production, Supply, Distribution and Gas and Energy. Our International segment generated a net loss of U.S.\$815 million in 2007, compared to net income of U.S.\$123 million in 2006. This decrease was primarily attributable to:

higher cost of sales in the amount of U.S.\$2,954 million, primarily as a result of: (1) the consolidation of the Pasadena refinery acquired in 2006; and (2) increased lifting cost, primarily in Argentina;

an increase of U.S.\$342 million in exploration and drilling expenses, mainly in Turkey, Angola, Iran, Argentina, Libya, and Venezuela;

an increase of U.S.\$225 million in impairment expenses, mainly in Ecuador, the United States and Angola; an increase of U.S.\$151 million in selling, general and administrative expenses, due to increased operations by our foreign subsidiaries, corporate acquisitions and the formation of new companies; and

an increase of U.S.\$150 million in depreciation, depletion and amortization primarily as result of an increase in capital expenditures related to property, plant and equipment associated with our crude oil and natural gas production.

These increases were partially offset by:

an increase of U.S.\$3,030 million in net operating revenues as a result of the consolidation of the Pasadena refinery and an increase in petrochemical business revenues in Argentina, partially offset by the exclusion of revenues from Venezuelan operations from our consolidated results.

## Corporate

Our Corporate segment includes our financing activities not attributable to other segments, including corporate financial management, central administrative overhead and actuarial expenses related to our pension and health care plans for inactive participants.

Consolidated net loss for our Corporate segment increased to U.S.\$1,796 million in 2007, compared to a net loss of U.S.\$1,436 million in 2006. This larger net loss was primarily affected by the following items:

a 38.2% increase in selling, general and administrative expenses, in the amount of U.S.\$436 million, mainly due to personnel expenses due to staffing for our planned growth as well as increased activity in 2007, a new salary plan to make our salaries more competitive with the Brazilian labor market and the renewal of a collective bargaining agreement; and

a one-time charge of U.S.\$305 million included in other operating expenses related to the amendments in Petros Pension Plan regulations.

These effects were partially offset by a decrease in income tax expense in the amount of U.S.\$601 million due to the additional tax incentives in relating to operations in the region covered by the Northeast Development Agency (ADENE).

# **Results of Operations 2006 compared to 2005**

The following comparison is also impacted by the increase in the value of the *real* against the U.S. dollar during 2006 (10.7%) and 2005 (16.8%). See Note 2 of our audited consolidated financial statements for the year ended December 31, 2006, for more information about the translation of Brazilian *real* amounts into U.S. dollars.

The exchange variation resulting from monetary assets and liabilities related to operations of consolidated subsidiaries whose functional currency is not *reais* are not eliminated in the consolidation process and such results are accounted for as cumulative translation adjustments.

Certain prior year amounts have been reclassified to conform to current year presentation standards. These reclassifications had no impact on the Company s net income.

Revenues

Net operating revenues increased 28.4% to U.S.\$72,347 million for 2006, compared to U.S.\$56,324 million for 2005. This increase was primarily attributable to higher prices for our products in the domestic and international markets and higher sales volumes.

Consolidated sales of products and services increased 26.8% to U.S.\$93,893 million for 2006, compared to U.S.\$74,065 million for 2005, primarily due to the increases mentioned above.

Included in sales of products and services are the following amounts that we collected from customers on behalf of federal or state governments:

Value-added, PASEP, COFINS and other taxes on sales and services and social security contributions. These taxes increased 21.9% to U.S.\$17,906 million for 2006, compared to U.S.\$14,694 million for 2005,

primarily due to higher prices and sales volumes; and

CIDE, the per-transaction fee, increased 19.5% to U.S.3,640 million for 2006, compared to

U.S.\$3,047 million for 2005, primarily due to higher sales volumes.

### Table of Contents

Cost of Sales (Excluding Depreciation, Depletion and Amortization)

Cost of sales for 2006 increased 34.7% to U.S.\$40,184 million, compared to U.S.\$29,828 million for 2005. This increase was principally a result of:

a U.S.\$3,376 million increase in the cost of imports due to higher prices and volumes;

a U.S.\$2,588 million increase in costs associated with a 19.4% increase in our international market sales volumes;

a U.S.\$2,033 million increase in production taxes and charges imposed by the Brazilian government totaling U.S.\$7,443 million for 2006, compared to U.S.\$5,410 million for 2005. This increase was due to higher international oil prices, a new interpretation by the ANP prohibiting the deductibility of charges associated with project financing for the Marlim field, and an increase in the special participation charge (an extraordinary charge payable in the event of high production and/or profitability from our fields) of U.S.\$3,885 million for 2006, compared to U.S.\$3,016 million for 2005, as a result of higher international oil prices and an increase of U.S.\$249 million due to the new interpretation by the ANP mentioned above; a U.S.\$187 million expense related to gas produced and re-injected in reserves in the Solimões, Campos and Espírito Santo basins; and

a U.S.\$156 million increase in PifCo s international trading costs due to higher volumes and prices from offshore operations.

### Depreciation, Depletion and Amortization

We calculate depreciation, depletion and amortization of most of our exploration and production assets using the units of production method. Depreciation, depletion and amortization expenses increased 25.5% to U.S.\$3,673 million for 2006, compared to U.S.\$2,926 million for 2005. This increase resulted from higher capital spending.

Exploration (Including Exploratory Dry Holes)

Exploration costs, including for exploratory dry holes, decreased 7.4% to U.S.\$934 million for 2006, compared to U.S.\$1,009 million for 2005. This decrease was primarily attributable to the U.S.\$71 million of gains resulting from the revision of estimated costs related to the abandonment of wells, and to the decrease of U.S.\$109 million in expenses related to dry holes.

### Impairment of Oil and Gas Properties

For 2006, we recorded an impairment charge of U.S.\$21 million, compared to an impairment charge of U.S.\$156 million for 2005. The impairment charge in 2006 related primarily to our Três Marias, Trilha and Córrego de Pedras fields in Brazil. The impairment charge in 2005 related primarily to a U.S.\$134 million loss in our Venezuelan investments caused by tax and legal changes associated with nationalization measures. See note 9(c) and 9(e) to our audited consolidated financial statements for the year ended December 31, 2006.

Selling, General and Administrative Expenses

Selling, general and administrative expenses increased 7.8% to U.S.\$4,824 million for 2006, compared to U.S.\$4,474 million for 2005.

Selling expenses increased 11.8% to U.S.\$2,394 million for 2006 from U.S.\$2,141 million in 2005. This increase was primarily attributable to the following:

approximately U.S.\$43 million in higher material consumption costs;

approximately U.S.\$23 million in higher personnel expenses; and

approximately U.S.\$13 million in higher transportation costs.

### Table of Contents

General and administrative expenses increased 4.2% to U.S.\$2,430 million for 2006 from U.S.\$2,333 million in 2005. *Research and Development Expenses* 

Research and development expenses increased 83.0% to U.S.\$730 million for 2006, compared to U.S.\$399 million for 2005. This increase was primarily due to:

a provision for investments in the amount of approximately U.S.\$249 million related to ANP regulations; and

U.S.\$31 million in environmental safety investments, including deepwater and refining technologies.

## Other Operating Expenses

Other operating expenses decreased 22.9% to a total of U.S.\$1,120 million for 2006 from U.S.\$1,453 million in 2005. The most significant charges for 2006 were:

U.S.\$568 million expense for institutional relations and cultural projects;

U.S.\$133 million expense for HSE;

U.S.\$238 million expense for idle capacity from thermoelectric power plants;

U.S.\$75 million expense for losses resulting from legal proceedings and contingencies related to pending lawsuits;

U.S.\$64 million expense for unscheduled stoppages of plant and equipment; and

U.S.\$32 million gain related to recovery of exploratory expenses in Nigeria.

The most significant charges for 2005 were:

U.S.\$457 million expense for idle capacity, penalties and contingencies related to thermoelectric power plants;

U.S.\$397 million expense for institutional relations and cultural projects;

U.S.\$255 million loss related to the exchange of assets between us and Repsol that occurred in 2001. See Note 10(b) to our audited consolidated financial statements for the year ended December 31, 2006;

U.S.\$139 million expense for losses resulting from legal proceedings and contingencies related to pending lawsuits;

U.S.\$64 million expense for unscheduled stoppages of plant and equipment; and

U.S.\$61 million expense related to contractual losses from compliance with our ship or pay

commitments with respect to our investments in the OCP pipeline in Ecuador.

Equity in Results of Non-Consolidated Companies

Equity in results of non-consolidated companies decreased 79.9% for a gain of U.S.\$28 million for 2006, compared to a gain of U.S.\$139 million in 2005, primarily as a result of losses in investments in certain affiliated companies of Petrobras Distribuidora S.A. BR, in the amount of U.S.\$52 million and in certain affiliated companies of Petrobras S.A., in the amount of U.S.\$43 million.

## Financial Income

We derive financial income from several sources, including interest on cash and cash equivalents. The majority of our cash equivalents are short-term Brazilian government securities, including securities indexed to the U.S. dollar. We also hold U.S. dollar deposits.

Financial income increased 64.1% to a gain of U.S.\$1,165 million for 2006 compared to U.S.\$710 million for 2005. This increase was primarily attributable to a U.S.\$229 million increase in financial interest income from investments and a U.S.\$147 million increase in financial income from customers. A breakdown of financial income and expenses is disclosed in Note 13 to our audited consolidated financial statements for the year ended December 31, 2006. *Financial Expenses* 

Financial expenses increased 12.7% to U.S.\$1,340 million for 2006, compared to U.S.\$1,189 million for 2005. This increase was primarily attributable to a U.S.\$378 million increase in losses on derivatives instruments principally due to the cancellation of a gas hedge contract, and U.S.\$143 million in losses on repurchased securities. These increases were partially offset by a U.S.\$389 million increase in capitalized interest associated with crude oil and natural gas projects. A breakdown of financial income and expenses is disclosed in Note 13 to our audited consolidated financial statements for the year ended December 31, 2006.

## Monetary and Exchange Variation on Monetary Assets and Liabilities, Net

Monetary and exchange variation on monetary assets and liabilities, net generated a gain of U.S.\$75 million for 2006, compared to a gain of U.S.\$248 million for 2005. This decrease is primarily attributable to the effect of the 8.7% appreciation of the *real* against the U.S. dollar during 2006, compared to the 11.8% appreciation of the *real* against the U.S. dollar during 2005.

## Employee Benefit Expense for Non-Active Participants

The employee benefit expense for non-active participants consists of financial costs associated with expected pension and health care costs. Our employee benefit expense for non-active participants increased 2.3% to U.S.\$1,017 million for 2006, compared to U.S.\$994 million for 2005. This increase was partially offset by a U.S.\$96 million decrease in employee benefit expense for non-active participants due to an increase in expected return on plan assets in 2006. *Other Taxes* 

Other taxes, consisting of miscellaneous value-added, transaction and sales taxes, increased 59.2% to U.S.\$594 million for 2006, compared to U.S.\$373 million for 2005. This increase was primarily attributable to:

U.S.\$54 million in higher PASEP/COFINS tax related to the increase in financial income;

U.S.\$49 million in higher CPMF, a tax payable in connection with certain bank account transactions;

U.S.\$48 million in higher taxes related to the increase in operations with SPEs, mainly with Companhia Locadora de Equipamentos Petrolíferos CLEP, Nova Transportadora do Sudeste NTS and Nova Transportadora do Nordeste NTN; and

U.S.\$12 million in higher taxes in Colombia and Bolivia related to foreign remittance accounts and dividends.

# Other Expenses, Net

Other expenses, net are primarily composed of gains and losses recorded on sales of fixed assets and certain other non-recurring charges. Other expenses, net decreased 39.3% to U.S.\$17 million for 2006, compared to U.S.\$28 million for 2005, primarily due to the decrease in expenses related to non-producing platforms.

### Table of Contents

### Income Tax (Expense) Benefit

Income before income taxes, minority interest and extraordinary gain increased 31.3% to U.S.\$19,161 million for 2006, compared to U.S.\$14,592 million for 2005. The income tax expense increased 28.1% to U.S.\$5,691 million for 2006, compared to U.S.\$4,441 million for 2005, primarily due to the increase in income mentioned above. This increase was partially offset by the additional tax benefits related to the provisioning of interest on shareholders equity that amounted to U.S.\$994 million for 2006, compared to U.S.\$791 million in tax benefits related to the same for 2005. The reconciliation between the tax calculated based upon statutory tax rates to income tax expense and effective rates is disclosed in Note 3 to our audited consolidated financial statements for the year ended December 31, 2006. *Extraordinary Gain, Net of Taxes* 

We recorded an extraordinary gain, net of taxes, in the amount of U.S.\$158 million due to the Escalators Liquidation Agreement entered into on December 29, 2005, and effective as from January 1, 2006, related to a contingent purchase price adjustment on the exchange of assets between us and Repsol that occurred in 2001. See Note 10(b) to our audited consolidated financial statements for the year ended December 31, 2006.

#### Net Income by Business Segment

Following is a discussion of the net income of our six business segments at December 31, 2006, compared to December 31, 2005.

	Year ended December 31,		
	2006 2		
	(U.S.\$ mi	llion)	
Exploration and Production	11,942	9,469	
Supply	2,533	2,245	
Distribution	298	311	
Gas and Energy	(505)	(342)	
International	123	526	
Corporate	(1,436)	(1,390)	
Eliminations	(129)	(475)	
Net income	12,826	10,344	

### Exploration and Production

Consolidated net income for our exploration and production segment increased 26.1% to U.S.\$11,942 million for 2006, compared to U.S.\$9,469 million for 2005. This rise was primarily attributable to: (1) a U.S.\$6,914 million increase in net operating revenues, primarily related to the 5.6% increase in oil and NGL production; (2) a 27.4% increase in oil exports; and (3) the 20.5% increase in the average domestic price for sale/transfer (U.S.\$/b), despite the fact that the spread between the average price of sold/transferred domestic oil and the average Brent price rose from U.S.\$8.96/b in 2005, to U.S.\$10.43/b in 2006.

These effects were partially offset by the following items:

U.S.\$2,328 million in increased cost of sales as a result of higher production costs and higher production taxes due to increased special governmental participation;

a U.S.\$595 million increase in depreciation, depletion and amortization as result of higher capital expenditures; and

U.S.\$193 million in increased research and development expenses due primarily to ANP regulations.

Consolidated net income for our supply segment increased 12.8% to U.S.\$2,533 million for 2006, compared to net income of U.S.\$2,245 million for 2005. This increase was primarily a result of a U.S.\$12,444 million increase in net operating revenues, mainly attributable to higher average prices for our products sold in domestic and international markets, and a 1.7% increase in oil product production due to increased refinery utilization.

Supply

These effects were partially offset by:

U.S.\$11,779 million increase in the cost of sales, mainly attributable to a rise in the cost of the acquisition and transfer of oil and oil products caused by higher international prices and a 9.4% increase in imports of oil and oil products; and

U.S.\$164 million increase in selling, general and administrative expenses as a result of higher sales volumes and increased personnel expenses.

## Distribution

Consolidated net income for our distribution segment decreased 4.2% to U.S.\$298 million for 2006, compared to U.S.\$311 million for 2005. This result was affected by:

U.S.\$2,861 million increase in costs and expenses, primarily as result of a U.S.\$2,610 million increase in cost of sales, and higher commercial and distribution expenses.

These effects were partially offset by the following items:

U.S.\$2,814 million increase in net operating revenues, resulting primarily from higher average prices for oil products.

Gas and Energy

Our gas and energy segment registered a net loss of U.S.\$505 million for 2006, compared to a net loss of U.S.\$342 million for 2005.

This increased net loss was primarily attributable to the following items:

U.S.\$1,140 million increase in cost of sales, primarily due to higher natural gas costs and a 6.6% increase in natural gas sales volumes; and

U.S.\$56 million increase in research and development expenses due primarily to ANP regulations.

These effects were partially offset by a U.S.\$926 million increase in net operating revenues as a result of a 6.6% increase in natural gas sales volumes and higher average prices for natural gas sold.

## International

Consolidated net income for our international segment decreased to U.S.\$123 million in 2006 from U.S.\$526 million in 2005. This decrease was primarily attributable to:

U.S.\$1,663 million increase in cost of sales, primarily due to higher production costs in Bolivia, higher volumes of commercial electricity in Argentina, and an increase in the volumes of Bolivian gas sold to Brazil and Argentina;

U.S.\$284 million increase in prospecting and drilling expenses due to write-offs of exploratory costs due to dry holes identified during 2006 (U.S.\$145 million in the U.S. and U.S.\$29 million in Bolivia), and higher seismic expenses, primarily in the U.S.; and

U.S.\$117 million increase in selling, general and administrative expenses as a result of a collective agreement in Argentina and the inclusion of costs associated with corporate acquisitions in Uruguay,

Paraguay, Colombia and the U.S.

These increases were partially offset by: (1) a U.S.\$1,544 million increase in net operating revenues due to higher international oil prices; (2) higher volumes for commercial electricity in Argentina; (3) higher export prices for oil products in Bolivia; and (4) higher volumes of Bolivian gas sold to Brazil and Argentina.

## Corporate

Consolidated net loss for our corporate segment increased to U.S.\$1,436 million in 2006, compared to a net loss of U.S.\$1,390 million in 2005.

#### Table of Contents

This increase in net loss was primarily attributable to the following items:

U.S.\$378 million increase in expenses related to derivatives instruments;

U.S.\$115 million increase in selling, general and administrative expenses, mainly due to higher personnel expenses; and

an extraordinary gain, net of taxes in the amount of U.S.\$158 million due to the Escalators Liquidation Agreement entered into on December 29, 2005, and effective as from January 1, 2006, related to a contingent purchase price adjustment on the exchange of assets between us and Repsol that occurred in 2001.

These effects were partially offset by a U.S.\$439 million gain in income tax savings, primarily related to tax benefits derived from the provisioning of interest on capital and a U.S.\$389 million increase in capitalized interest.

# **Additional Business Segment Information**

Set forth below is additional selected financial data by business segment for 2007, 2006 and 2005:

	For the Year Ended Decemb 2007 2006		nber 31, 2005

(1) As a vertically

integrated company, not all of our segments have significant third-party revenues. For example, our exploration and production segment accounts for a large part of our economic activity and capital expenditures, but has little third party revenues.

- (2) Revenues from commercialization of oil to third parties are classified in accordance with the points of sale, which could be either the Exploration and Production or Supply segments.
- (3) In order to align the financial statements of each business segment with the best practices of companies in the oil and gas sector and to improve our management s understanding, since the first quarter of 2006 we have switched to allocating all financial results

and items of a financial nature to the corporate level, including prior years.

## Management s Discussion and Analysis of PifCo s Financial Condition and Results of Operations Overview

PifCo is our wholly owned subsidiary. Accordingly, PifCo s financial position and results of operations are significantly affected by our decisions. PifCo s ability to meet its outstanding debt obligations depends on a number of factors, including:

our financial condition and results of operations;

the extent to which we continue to use PifCo s services for market purchases of crude oil and oil products; our willingness to continue to make loans to PifCo and provide PifCo with other types of financial support; PifCo s ability to access financing sources, including the international capital markets and third-party credit facilities; and

PifCo s ability to transfer our financing costs to us.

PifCo earns income from:

sales of crude oil and oil products to us;

limited sales of crude oil and oil products to third parties; and

the financing of sales to us, inter-company loans to us and investments in marketable securities and other financial instruments.

PifCo s operating expenses include:

cost of sales, which is comprised mainly of purchases of crude oil and oil products;

selling, general and administrative expenses; and

financial expense, mainly from interest on its lines of credit and capital markets indebtedness, sales of future receivables and inter-company loans from us.

## Purchases and Sales of Crude Oil and Oil Products

PifCo typically purchases crude oil and oil products in transactions with payment terms of approximately 30 days. We typically pay for shipments of crude oil and oil products that PifCo sells to us over a period of up to 330 days, which allows us sufficient time to assemble the necessary documentation under Brazilian law to commence the payment process for our shipments. Before February 2005, PifCo sold crude oil and oil products to us under terms that allowed for payment up to 270 days from the date of the bill of lading. During this period, PifCo typically finances the purchase of crude oil and oil products through either funds previously provided by us or third-party trade finance arrangements. The difference between the amount PifCo pays for crude oil and oil products and the amount we pay for that same crude oil and oil products is deferred and recognized as part of PifCo s financial income on a straight-line basis over the period in which our payments to PifCo come due.

# Results of Operations 2007 compared to 2006

Net Income (Loss)

PifCo had a net income of U.S.\$29.0 million for 2007, compared to a loss of U.S.\$210.5 million for 2006. *Sales of Crude Oil and Oil Products and Services* 

PifCo s sales of crude oil and oil products and services increased 21.1% to U.S.\$26,732.0 million for 2007, compared to U.S.\$22,069.8 million for 2006.

This increase was primarily due to (1) a 25% increase in sales volume caused by (i) higher sales of crude oil and oil products purchased from third parties and affiliates and subsequently sold to Petrobras and (ii) higher sales associated with trading activities in Asia by PifCo s subsidiary PSPL; and (2) a 11.3% increase in the average price of Brent crude oil to U.S.\$72.52 per barrel for 2007, compared to U.S.\$65.14 per barrel for 2006.

## Cost of Sales

Cost of sales increased 20.1% to U.S.\$26,310.8 million for 2007, compared to U.S.\$21,900.5 for 2006. This increase was proportional to the increase in sales of crude oil and oil products and services and was primarily due to the same reasons.

## Selling, General and Administrative Expenses

PifCo s selling, general and administrative expenses consist primarily of shipping costs and fees for services, including accounting, legal and rating services. These expenses increased 42.1% to U.S.\$294.7 million for 2007, compared to U.S.\$207.4 million in 2006, U.S.\$136.4 million of which consisted of higher shipping expenses caused by increased offshore sales and higher average freight rates.

## Financial Income

PifCo s financial income consists of financing of sales to us, inter-company loans to us, investments in marketable securities and other financial instruments. PifCo s financial income increased 61.1% to U.S.\$2,069.9 million for 2007, compared to U.S.\$1,285.2 million for 2006, primarily due to (1) increased loans to related parties, and (2) higher sales volumes to us during 2006 compared to 2005. See Purchases and Sales of Crude Oil and Oil Products. *Financial Expense* 

PifCo s financial expense consists of interest paid and accrued on PifCo s outstanding indebtedness and other fees associated with PifCo s issuance of debt. PifCo s financial expense increased 48.7% to U.S.\$2,167.9 million for 2007, compared to U.S.\$1,457.8 million for 2006, primarily due to increased inter-company loans from us to meet short-term financing needs.

# **Results of Operations** 2006 compared to 2005

### Net Loss

PifCo had a loss of U.S.\$210.5 million for 2006, compared to a loss of U.S.\$27.8 million for 2005, primarily due to (1) notes repurchased in connection with a debt tender offer resulting in an expense of U.S.\$160.0 million, and (2) the payment of premium related to the PFL prepaid fixed rate Senior Trust Certificates (Series A1 and B) in the amount of U.S.\$13.7 million.

### Sales of Crude Oil and Oil Products and Services

PifCo s sales of crude oil and oil products and services increased 28.8% to U.S.\$22,069.8 million for 2006, compared to U.S.\$17,136.1 million for 2005. This increase was due primarily to a 19.8% increase in the average price of Brent crude oil to U.S.\$65.14 per barrel for 2006, compared to U.S.\$54.38 per barrel for 2005, and a 15.3% increase in the volume of trading sales of crude oil and oil products.

Cost of Sales

Cost of sales increased 29.0% to U.S.\$21,900.5 million for 2006, compared to U.S.\$16,983.3 million for 2005. This increase was primarily due to the increase in the average price of Brent crude oil and volume described above. *Selling, General and Administrative Expenses* 

PifCo s selling, general and administrative expenses consist primarily of shipping costs and fees for services, including accounting, legal and rating services. These expenses increased 25.1% to U.S.\$207.4 million for 2006, compared to U.S.\$165.7 million for 2005, of which U.S.\$171.0 million consisted of shipping expenses due to an increase in average freight rates in the period, as the result of changes in international market trends and shipping routes.

## Financial Income

PifCo s financial income consists of the financing of sales to us and inter-company loans to us, and investments in marketable securities and other financial instruments. PifCo s financial income increased 30.6% to U.S.\$1,285.2 million for 2006, compared to U.S.\$984.0 million for 2005, primarily due to (1) increased sales to us during 2005 compared to 2004, as well as the amount of sales during 2006, resulting in additional financial income due (see Purchases and Sales of Crude Oil and Oil Products ); (2) increased loans to related parties; and (3) higher interest income from short and long-term investments as a result of a higher returns.

# Financial Expense

PifCo s financial expense consists of interest paid and accrued on PifCo s outstanding indebtedness and other fees associated with PifCo s issuance of debt. PifCo s financial expense increased 45.9% to U.S.\$1,457.8 million for 2006, compared to U.S.\$998.9 million for 2005, primarily due to (1) notes repurchased in connection with a debt tender offer resulting an expense of U.S.\$160.0 million, (2) increased in inter-company loans from us, (3) higher interest expenses associated with lines of credit and (4) the payment of premium related to the PFL prepaid fixed rate Senior Trust Certificates (Series A1 and B) in the amount of U.S.\$13.7 million.

## Liquidity and Capital Resources

# Petrobras

Overview

Our principal uses of funds are for capital expenditures, dividend payments and repayment of debt. Historically we have met these requirements with internally generated funds, short-term debt, long-term debt, project financing and sale and lease-back transactions. We believe these sources of funds, together with our strong position of cash and cash equivalents, will continue to allow us to meet our currently anticipated capital requirements. In 2008, our major cash needs include planned capital expenditures of U.S.\$30,481 million, announced dividends of U.S.\$3,220 million and payments of U.S.\$3,192 million on our long-term debt, leasing and project financing obligations.

## Financing Strategy

The objective of our financing strategy is to help us achieve the targets set forth in our Business Plan released on August 14, 2007, which provides for capital expenditures of U.S.\$112.4 billion from 2008 through 2012. We will continue our policy of extending the term of our debt maturity profile. We also intend to reduce our cost of capital through a variety of medium and long-term financing arrangements, including the issuance of bonds in the international capital markets, supplier financing, project financing and bank financing.

## Government Regulation

We are required to submit our annual capital expenditures budget (*Plano de Dispêndio Global*, or PDG) to the Brazilian Ministry of Planning, Budget and Management, and the Ministry of Mines and Energy. Following review by these agencies, the Brazilian Congress must approve the budget. Although the total level of our annual capital expenditures is regulated, the specific application of funds is left to our discretion. Since mid-1991, we have obtained substantial amounts of our financing from the international capital markets, mainly through the issuance of commercial paper and short, medium and long-term notes, and have increasingly been able to raise long-term funds for large capital expenditure items such as rigs and platforms.

The Brazilian Ministry of Planning, Budget and Management controls the total amount of medium and long-term debt that we and our Brazilian subsidiaries can incur through the annual budget approval process. Before issuing medium and long-term debt, we and our Brazilian subsidiaries must also obtain the approval of the National Treasury Secretariat. Borrowings that exceed the approved budgeted amount for any year also require approval of the Brazilian Senate.

All of our foreign currency denominated debt, as well as the foreign currency denominated debt of our Brazilian subsidiaries, requires registration with the Central Bank. The issuance of debt by our international subsidiaries, however, is not subject to registration with the Central Bank or approval by the National Treasury Secretariat. *Sources of Funds* 

# Our Cash Flow

On December 31, 2007, we had cash and cash equivalents of U.S.\$6,987 million compared to U.S.\$12,688 million at December 31, 2006. The decrease in our cash and cash equivalents was primarily due to: dividend payments; the acquisition of long-term securities to guarantee liabilities of the Petros pension fund; payments resulting from the amendments to Petros Plan regulations, and the increase in our capital expenditures during 2007 compared to 2006.

Operating activities provided net cash flows of U.S.\$22,664 million for 2007, compared to U.S.\$21,077 million for 2006. Cash generated by operating activities was mainly affected by net operating revenues that increased U.S.\$15,388 million in 2007 compared to 2006.

Net cash used in investing activities increased to U.S.\$24,026 million for 2007, compared to U.S.\$14,681 million for 2006. This increase was due primarily to capital expenditures associated with our operating activities, which used U.S.\$20,978 million, including U.S.\$9,448 million related to our exploration and production projects in Brazil, mainly in the Campos Basin, and to acquire B Series National Treasury Notes in the amount of U.S.\$1,907 million in order to match future pension obligations to guarantee future long term agreements.

Net cash used in financing activities was U.S.\$5,988 million for 2007, compared to U.S.\$4,354 million for 2006. This increase was primarily due to an increase in the amount of dividends paid to shareholders in 2007 compared to 2006.

Our net debt increased to U.S.\$14,908 million as of December 31, 2007 compared to U.S.\$8,650 million as of December 31, 2006, primarily due to a decrease in our cash and cash equivalents. This decrease was largely a result of: dividend payments; the acquisition of long-term securities to more closely match our liabilities associated with the Petros pension fund; payments resulting from amendments to Petros Plan regulations, and the increase in our capital expenditures in 2007 compared to 2006.

# Short-Term Debt

Our outstanding short-term debt serves mainly to support our imports of crude oil and oil products, and is provided almost entirely by international banks. At December 31, 2007, our short-term debt (excluding current portions of long-term obligations) amounted to U.S.\$1,458 million compared to U.S.\$1,293 million at December 31, 2006.

### Long-Term Debt

Our outstanding long-term debt consists primarily of the issuance of securities in international capital markets, debentures in the domestic capital markets, amounts outstanding under facilities guaranteed by export credit agencies and multilateral agencies and loans from the BNDES and other financial institutions. Outstanding long-term debt, plus the current portion of our long-term debt amounted to U.S.\$ 13,421 million at December 31, 2007 compared to U.S.\$ 12,616 million at December 31, 2006.

Included in these figures at December 31, 2007 are the following international debt issues:

Notes	Princ	cipal amount
PifCo s 9.875% Notes due 2008	U.S.\$	450 million
PifCo s 9.750% Notes due 2011	U.S.\$	600 million
PifCo s 12.375% Global Step-up Notes due 2008	U.S.\$	400 million
PifCo s 9.125% Global Notes due 2013	U.S.\$	750 million
PifCo s 8.375% Global Notes due 2018	U.S.\$	750 million
PifCo s 3.748% Senior Trust Certificates due 2013 (1)	U.S.\$	200 million
PifCo s 6.436% Senior Trust Certificates due 2015 (1)	U.S.\$	550 million
PifCo s 7.75% Global Notes due 2014	U.S.\$	600 million
PifCo s 6.125% Global Notes due 2016	U.S.\$	899 million
PifCo s 2.15% Japanese Yen Bonds due 2016	U.S.\$	313 million
PEPSA s 9.00% Notes due 2009	U.S.\$	181 million
PEPSA s 8.13% Notes due 2010	U.S.\$	349 million
PEPSA s 5.93% Notes due 2011	U.S.\$	87 million
PEPSA s 9.38% Notes due 2013	U.S.\$	200 million
PEPSA s 6.66% Notes due 2017 (2)	U.S.\$	300 million
PifCo s 5.875% Global Notes due 2018 (3)	U.S.\$	1,000 million

Unless otherwise noted, all debt is issued by PifCo, with support from us through a standby purchase agreement.

 Issued in connection with our export prepayment program. Unless otherwise noted, all debt is issued by PifCo with support from us through a standby purchase agreement.

(2) Issued by PESA, with support from

us through a standby purchase agreement.

(3) Issued by PifCo, with support from us through a standby purchase agreement. Interest will be paid on March 1 and September 1 of each year, with the first payout due March 1, 2008. These notes were reopened in an amount of U.S.\$750 million in January 2008.

# Project Financing

Since 1997, we have utilized project financings to provide capital for our extensive exploration and production operations and related projects, including some natural gas processing and transportation systems. All of these projects and the related debt obligations of special purpose companies established for these financings are on-balance sheet and accounted for under the line item Project Financings. Under typical contractual arrangements, we are responsible for completing the development of the oil and gas fields, operating the fields, paying all operating expenses relating to the projects and remitting a portion of the net proceeds generated from the fields to fund the special purpose companies debt and return on equity payments. At the end of each financing project, we have the option to purchase the project assets from the special purpose company or, in some cases, acquire control over the special purpose company itself. Outstanding project financing, plus the current portion of our project financing, totaled U.S.\$6,278 million at December 31, 2007, compared to U.S.\$6,374 million at December 31, 2006. This decrease in outstanding project financing was primarily due to the fact that U.S. dollar disbursements were slightly less than regularly scheduled amortizations, as well as the conclusion of Espadarte/Voador/Marimbá EVM financing structure and the prepayment of obligations related to Nova Transportadora do Sudeste NTS and Nova Transportadora do Nordeste NTN projects by PifCo. See Note 14 of our audited consolidated financial statements for the year ended December 31, 2007. Of the U.S.\$1,274 million projected amount of expenditures for project financings in 2008, we expect that approximately U.S.\$242.7 million will be used by our exploration and production segment, U.S.\$237.0 million by our Supply segment and U.S.\$794.3 million by our Gas and Energy segment.

As of December 31, 2007, the long-term portion of our project financings becomes due in the following years:

	Amount Due (U.S.\$ million)
2009	2,236
2010	1,242
2011	101
2012	149
2013	448
2014 and thereafter	410
	4,586

# PifCo

## Overview

PifCo finances its oil trading activities principally through commercial banks, including lines of credit, as well as through inter-company loans from us and the issuance of notes in the international capital markets. As an offshore non-Brazilian company, PifCo is not legally obligated to receive prior approval from the Brazilian National Treasury before incurring debt or registering debt with the Central Bank. As a matter of policy, however, the issuance of any debt follows the recommendation by any of our Chief Financial Officer, executive board or board of directors, depending on the aggregate principal amount and the tenor of the debt to be issued.

# Sources of Funds

# PifCo s Cash Flow

At December 31, 2007, PifCo had cash and cash equivalents of U.S.\$674.9 million, compared to U.S.\$510.8 million at December 31, 2006. PifCo s operating activities used net cash of U.S.\$5,210.0 million in 2007, compared to using net cash of U.S.\$1,967.4 million in 2006, primarily as a result of increased sales of crude oil and oil products and services due primarily to higher sales volumes and higher average prices of Brent crude oil. PifCo s investing activities used net cash of U.S.\$5,945.0 million in 2007, compared to using net cash of U.S.\$1,891.0 million in 2006, primarily as a result of increased notes receivable issued to related parties and investments in marketable securities. PifCo s financing activities provided net cash of U.S.\$11,319.1 million in 2007, compared to net cash of U.S.\$4,138.5 million in 2006, primarily as a result of increased proceeds from loans from us due to PifCo s short-term financing needs. *PifCo s Accounts Receivable* 

Accounts receivable from related parties increased 41.9% from U.S.\$10,658.9 million at December 31, 2006, to U.S.\$15,211.9 million at December 31, 2007, primarily as a result of an increase in trading sales of crude oil and oil products.

# PifCo s Short-Term Borrowings

PifCo s short-term borrowings are denominated in U.S. dollars and consist of lines of credit and loans payable. PifCo s outstanding position at December 31, 2007, in irrevocable letters of credit was U.S.\$730.0 million, compared to U.S.\$552.1 million at December 31, 2006, supporting crude oil and oil products imports. At December 31, 2007, PifCo had accessed U.S.\$311.5 million in lines of credit and loans from financing institutions, including the current portion of long-term lines of credit, compared to U.S.\$329.2 million accessed at December 31, 2006. The weighted average annual interest rate on these short-term borrowings was 5.59% at December 31, 2007, compared to 6.76% at December 31, 2006. At December 31, 2007, PifCo utilized all the proceeds from lines of credit for the purchase of imports of crude oil and oil products.

The short-term portion of PifCo s notes payable to related parties consist of notes payable to us and increased from U.S.\$5,386.8 million at December 31, 2006, to U.S.\$23,977.7 million at December 31, 2007, primarily as a result of PifCo s short-term financing needs and investments conducted by our international subsidiaries.

PifCo s Long-Term Borrowings

PifCo had no outstanding long-term loans from Petrobras in 2007. At December 31, 2006 PifCo had long-term loans from Petrobras in the amount of U.S.\$7,441.7 million, which were prepaid during 2007.

At December 31, 2007, PifCo had outstanding in financing institutions (1) U.S.\$646.0 million in long-term lines of credit due between 2009 and 2017, compared to U.S.\$1,041.3 million at December 31, 2006 and (2) U.S.\$394.0 million as a result of a loan of the Nova Transportadora Nordeste-NTN and Nova Transportadora Sudeste-NTS Companies (two SPCs related to our Malhas Project), assumed by PifCo on June 15, 2007, under the loan agreement with Malha Gas Investment Co., Ltd. (M-GIC), which acts as a Facility Agent for JBIC (Japan Bank for International Cooperation). This loan bears interest at Libor plus 0.8% p.a., payable semi-annually. The principal amount will be paid semi-annually starting on December 15, 2009, up to December 15, 2014. As a consequence of this transfer, the NTN and NTS issued some Notes to PifCo with the same characteristics of the loan in terms of the principal amount, interest rate and amortization schedule.

As a result of the settlement of the Exchange Offer (the Exchange) that occurred on February 7, 2007, PifCo received and accepted a tender amount of U.S.\$399.1 million (face value of the Notes). All the Notes received were cancelled on the same day and, as a result, PifCo issued U.S.\$399.1 million of Global Notes due 2016 that bear interest at the rate of 6.125% per year, payable semi-annually. The new Notes constitute a single fungible series with the U.S.\$500.0 million Global Notes due 2016 issued in October 2006. In total, PifCo has U.S.\$899.1 million in outstanding bonds due 2016. PifCo also paid investors a cash amount equivalent to U.S.\$56 million as a result of the Exchange. The table below presents the result of the Exchange:

			Principal outstanding	
PifCo old Notes	Interest rate	Maturity	after Exchange	Total amount tendered
			(U.S.\$	million)
Global Step-Up Notes	12.375%	2008	126.9	7.8
Senior Notes	9.875%	2008	224.2	14.0
Senior Notes	9.750%	2011	235.4	51.0
Global Notes	9.125%	2013	374.2	124.1
Global Notes	7.750%	2014	397.9	202.2
			1,358.6	399.1

			Principal outstanding	
PifCo new Notes	Interest rate	Maturity	after Exchange	Total amount tendered
			(U.S.\$	million)
Global Notes	6.125%	2016	899.1	399.1
			899.1	399.1

On November 1, 2007, PifCo issued Global Notes of U.S.\$1 billion in the international capital market, due March 2018. The Notes bear interest at the rate of 5.875% per annum, payable semiannually, beginning on March 1, 2008. The purpose of this issuance was to access long-term debt capital markets, refinance prepayments of maturing

debt and reduce the cost of capital.

At December 31, 2007, PifCo also had outstanding:

U.S.\$224.2 million in Senior Notes due 2008 (current portion) and U.S.\$235.4 million in Senior Notes due 2011. The notes bear interest at the rate of 9.875% and 9.75%, respectively;

U.S.\$126.9 million (current portion) in Global Step-up Notes due April 2008 that bear interest at a rate of 12.375% per year from April 1, 2006, with interest payable semi-annually;

U.S.\$398.4 million (U.S.\$66.0 million current portion) in connection with our exports prepayment program and related to the following outstanding Series: U.S.\$550 million in 6.436% Senior Trust Certificates due 2015 and U.S.\$200 million in 3.748% Senior Trust Certificates due 2013;

U.S.\$3,200.2 million in Global Notes, consisting of U.S.\$374 million of Global Notes due July 2013 that bear interest at the rate of 9.125% per year; U.S.\$577 million of Global Notes due December 2018 that bear interest at the rate of 8.375% per year; U.S.\$398 million of Global Notes due 2014 that bear interest at the rate of 7.75% per year; U.S.\$899 million of Global Notes due October 2016 that bear interest at the rate of 6.125% per year; U.S.\$1 billion of Global Notes due March 2018 that bear interest at the rate of 5.875% per year. Interest on these notes is paid semi-annually and the proceeds were used for general corporate purposes, including the financing of the purchase of oil product imports and the repayment of existing trade-related debt and inter-company loans; and

U.S.\$312.8 million (¥35 billion) in Japanese Yen Bonds issued in September 2006 and due September 2016. The issue was a private placement in the Japanese market with a partial guarantee from the Japan Bank for International Cooperation (JBIC) and its main purposes were to tap the Japanese market, access a new investor base and achieve a competitive cost. The bonds bear interest at the rate of 2.15% per year, payable semi-annually. On the same date, PifCo entered into a swap agreement with Citibank, swapping the total amount of this debt to a U.S. dollar-denominated debt.

At December 31, 2007, PifCo had standby committed facilities available in the amount of U.S.\$327.0 million, which are not committed to any specific use. PifCo had no drawdown amounts related to these facilities, and, as of the date of this filing, PifCo has not scheduled a date for the drawdown.

The following table sets forth the sources of PifCo s current and long-term debt at December 31, 2007 and December 31, 2006:

	December 31, 2007		Decembe	r 31, 2006
	Current	Long-term	Current	Long-term
		(U.S.\$ m	nillion)	
Financing institutions	311.5	1,040.0	329.2	1,041.2
Senior notes	238.5	235.4	533.9	524.6
Global step-up notes	130.8		4.2	134.6
Sale of right to future receivables	69.0	548.4	68.4	614.4
Assets related to export prepayment to be offset				
against sales of rights to future receivables		(150.0)		(150.0)
Global notes	37.3	3,200.2	32.7	2,181.4
Japanese yen bonds	1.7	312.8	1.7	293.9
Senior exchangeable notes			333.7	
Total Debt	788.8	5,186.8	1,303.8	4,640.1

# Extinguished securities

On December 31, 2007 and December 31, 2006, we had amounts invested abroad in an exclusive investment fund that held debt securities of some of our group companies in the amount of U.S.\$856 million and U.S.\$982 million, respectively. Once these securities are purchased by the fund, the related amounts, together with applicable interest, are removed from the presentation of marketable securities and long-term debt. See Note 12 to our audited consolidated financial statements for the year ended December 31, 2007.

### **Off Balance Sheet Arrangements**

As noted above, all of our project financings are on-balance sheet. As of December 31, 2007, neither we nor PifCo had off-balance sheet arrangements that have, or are reasonably likely to have, a material effect on our financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources.

# Uses of Funds

# Capital Expenditures

We invested a total of U.S.\$20,978 million in 2007, a 43.3% increase compared to our investments of U.S.\$14,643 million in 2006. Our investments in 2007 were primarily directed towards increasing our production capabilities in the Campos Basin, modernizing our refineries and expanding our pipeline transportation and distribution systems. Of the total amount of capital expenditures in 2007, U.S.\$9,448 million (45.0%) was made in connection with exploration and development projects mainly in the Campos Basin, which includes investments financed through project financing structures. PifCo primarily utilizes funds to finance its oil trading activities. The following table sets forth our consolidated capital expenditures (including project financings and investments in gas-fired power plants) for each of our business segments for 2007, 2006 and 2005:

	For the Year Ended December 31			
	2007 2006		2005	
	(U.S.\$ million)			
Exploration and Production	9,448	7,329	6,127	
Supply	4,488	1,936	1,749	
Distribution	327	351	207	
Gas and Energy	3,223	1,664	694	
International				
Exploration and Production	2,555	2,304	1,067	
Supply	247	202	79	
Distribution	37	77	16	
Gas and Energy	25	54	13	
Corporate	628	726	413	
Total	20,978	14,643	10,365	

On August 14, 2007, we announced our Business Plan, which contemplates total budgeted capital expenditures of U.S.\$112.4 billion from 2008 to 2012, approximately U.S.\$97.4 billion of which will be directed towards our activities in Brazil, while U.S.\$15.0 billion will be directed to our activities abroad. We expect that the majority of our capital expenditures from 2008 to 2012, approximately U.S.\$65.1 billion, will be directed towards exploration and production, of which U.S.\$54.6 billion is slated for our activities in Brazil.

Our Business Plan through 2012 contemplates greater domestic expenditures in our construction activities and other projects. We estimate that of the U.S.\$97.4 billion in domestic capital expenditures through 2012, at least U.S.\$63.1 billion (65%) will be utilized to pay for equipment and services provided by Brazilian contractors, suppliers and other service providers.

Our capital expenditure budget for 2008, including our project financings, is U.S.26.0 billion, allocated between our business segments as follows: (i) Exploration and Production: U.S.\$12.2 billion; (ii) Supply: U.S.\$6.8 billion; (iii) International: U.S.\$3.2 billion; (iv) Gas and Energy: U.S.\$2.7 billion; (v) Distribution: U.S.\$0.4 billion; and (vi) Corporate: U.S.\$0.7 billion.

We plan to meet our budgeted capital expenditures primarily through internally generated cash, issuances in the international capital markets, project finance loans and commercial bank loans. Our actual capital expenditures may vary substantially from the projected numbers set forth above as a result of market conditions and the cost and availability of the necessary funds.

Dividends

By law, we are required to distribute a minimum of 25% of our annual net income, as adjusted under Brazilian Corporate Law, to our shareholders as dividends. In 2007 we paid dividends of approximately U.S.\$4,003 million (U.S.\$0.46 per share). Approximately 80.6% of this amount was paid in the form of interest on capital.

On April 4, 2008, our shareholders approved dividends for the year ended December 31, 2007, in the amount of U.S.\$3,715 million. This proposal includes interest on capital in the amount of U.S.\$3,591 million, U.S.\$1,238 million of which was made available to our shareholders on January 23, 2008, based on their shareholding position as of August 17, 2007, and in accordance with the SELIC rate (an interest rate applicable to certain Brazilian government securities) variation as of December 31, 2007. The dividends are restated according to the SELIC rate from December 31, 2007 to the date of each payment.

The remaining portion of interest on shareholders equity and dividends will be made available to shareholders until June 2008.

# **Contractual obligations**

### Petrobras

The following table summarizes our outstanding contractual obligations and commitments at December 31, 2007:

	<b>Payments Due by Period</b>				
	Total	≤1 year	1-3 years (U.S.\$ million)	3-5 years	$\geq$ 5 years
Contractual Obligations			· · /		
Balance Sheet Items:					
Long-Term Debt Obligations	13,421	1,273	3,452	2,898	5,798
Pension Fund Obligations (1)	23,591	1,135	2,605	3,114	16,737
Project Financings Obligations	6,278	1,692	3,478	250	858
Capital (Finance) Lease obligations	738	227	414	97	
Total Balance Sheet Items	44,028	4,327	9,949	6,359	23,393
Other Long-Term Contractual					
Commitments					
Natural Gas Ship-or-Pay	5,545	452	919	928	3,246
Contract Service	23,713	10,094	10,446	2,193	980
Natural Gas Supply Agreements	6,754	660	1,119	1,106	3,869
Operating Lease	15,063	4,271	6,589	3,081	1,122
Purchase Commitments	2,055	732	887	436	
International Purchase Commitments	4,021	704	933	783	1,601
Total Other Long-Term Commitments	57,151	16,913	20,893	8,527	10,818
Total	101,179	21,240	30,842	14,886	34,211

(1) There are plan assets in the amount of U.S.\$18,549 million that guarantee the pension plan obligations. These assets are presented as a reduction to the net actuarial liabilities. See Note 16 to our audited consolidated financial statements for the year ended December 31, 2007.

# PifCo

The following table sets forth PifCo s contractual obligations as of December 31, 2007, and the period in which the contractual obligations come due:

	Payments Due by Period				
	Total	≤1 year	1-3 years	3-5 years	$\geq$ 5 years
			(U.S.\$ million)		
Contractual Obligations					
Long-term debt	5,891.7	704.9	593.9	555.4	4,037.5
Purchase obligations Long-term	5,261.9	2,213.3	1,708.9	441.1	898.6
Total	11,153.6	2,918.2	2,302.8	996.5	4,936.1

## **Critical Accounting Policies and Estimates**

The following discussion describes those areas that require the most judgment or involve a higher degree of complexity in the application of the accounting policies that currently affect our financial condition and results of operations. The accounting estimates we make in these contexts require us to make assumptions about matters that are highly uncertain. In each case, if we had made other estimates, or if changes in the estimates occur from period to period, our financial condition and results of operations could be materially affected.

The discussion addresses only those estimates that we consider most important based on the degree of uncertainty and the likelihood of a material impact if we used a different estimate. There are many other areas in which we use estimates about uncertain matters, but the reasonably likely effect of changed or different estimates is not material to our financial presentation.

# Oil and Gas Reserves

Evaluations of oil and gas reserves are important for the effective management of upstream assets. They are used to make investment decisions about oil and gas properties. Oil and gas reserve quantities are also used as the basis for calculation of unit-of-production rates for depreciation and evaluation for impairment. Oil and gas reserves are divided between proved and unproved reserves. Proved reserves are estimated quantities of crude oil, natural gas and natural gas liquids that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions, i.e., prices and costs as of the date the estimate is made. Unproved reserves are those with less than reasonable certainty of recoverability and are classified as either probable or possible. Probable reserves are reserves that are more likely to be recovered than not and possible reserves are less likely to be recovered than not.

The estimation of proved reserves is an ongoing process that takes into account engineering and geological information such as well logs, pressure data and fluid sample core data. Proved reserves can also be divided in two categories: developed and undeveloped. Developed proved reserves are expected to be recovered from existing wells including line pack, or when the costs necessary to put them in production are relatively low. For undeveloped proved reserves, significant investments are necessary, including drilling new wells and installing production or transportation facilities.

We use the successful efforts method to account for our exploration and production activities. Under this method, costs are accumulated on a field-by-field basis with certain exploratory expenditures and exploratory dry holes being expensed as incurred. Exploratory wells that find oil and gas in an area requiring major capital expenditure before production can begin are evaluated annually to ensure that commercial quantities of reserves have been found or that additional exploration work is under way or planned in a timeframe reasonable for the Petrobras development cycle and with consideration to ANP timing requirements. Exploratory well costs not meeting either of these criteria are charged to expense. Costs of productive wells and development dry holes are capitalized and amortized on the unit-of-production method because it provides a more timely accounting of the success or failure of our exploration and production activities.

### Impact of Oil and Gas Reserves on Depreciation and Depletion

The calculation of unit-of-production depreciation and depletion is a critical accounting estimate that measures the depreciation and depletion of upstream assets. It is the ratio of (i) actual volumes produced to (ii) total proved developed reserves (those proved reserves recoverable through existing wells with existing equipment and operating methods) applied to (iii) asset cost. Proved undeveloped reserves are considered in the amortization of leasehold acquisition costs. The volumes produced and asset cost are known and while proved developed reserves have a high probability of recoverability they are based on estimates that are subject to some variability. This variability may result in net upward or downward revisions of proved reserves in existing fields, as more information becomes available through research and production. We revised our proved reserves in the last three years, increasing our proved reserves by 762.9 million barrels of oil equivalent in 2007, increasing our proved reserves by 425.5 million barrels of oil equivalent in 2006 and increasing our proved reserves by 258.4 million barrels of oil equivalent in 2005. *Impact of Oil and Gas Reserves and Prices on Testing for Impairment* 

At December 31, 2007, our property, plant, and equipment, net of accumulated depletion, amounted to U.S.\$85 billion. A substantial part of this amount consisted of oil and gas producing properties. These properties are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amounts may not be recoverable. We estimate the future and discounted cash flows of the affected properties to judge the recoverability of carrying amounts. In general, analyses are based on proved reserves, except in circumstances where it is probable that additional non-proved reserves will be developed and contribute to cash flows in the future; the percentage of probables that we include in cash flows does not exceed our past success ratios in developing probable reserves.

We perform asset valuation analyses on an ongoing basis as a part of our management program. These analyses monitor the performance of assets against corporate objectives. They also assist us in reviewing whether the carrying amounts of any of our assets may not be recoverable. In addition to estimating oil and gas reserve volumes in conducting these analyses, it is also necessary to estimate future oil and gas prices.

In general, we do not view temporarily low oil prices as a trigger event for conducting impairment tests. The markets for crude oil and natural gas have a history of significant price volatility. Although prices will occasionally drop precipitously, industry prices over the long term will continue to be driven by market supply and demand fundamentals. Accordingly, any impairment tests that we perform make use of our long-term price assumptions for the crude oil and natural gas markets. These are the same price assumptions that are used in our planning and budgeting processes and our capital investment decisions, and they are considered to be reasonable, conservative estimates given market indicators and past experience. Significantly lower future oil and gas prices could lead to impairments in the future, if such decreases were considered to be indicative of long-term trends. In addition, significant changes in production curve expectation, discount and/or required production and lifting costs, could affect impairment analysis. While such uncertainties are inherent to this estimation process, the amount of impairment charges in past years has been small relative to the total value of oil and gas producing properties: U.S.\$271 million in 2007, U.S.\$21 million in 2006 and U.S.\$156 million in 2005. Based on our experience, we believe that future variability in estimates will have a small impact on both assets and expense.

Pension and Other Post-Retirement Benefits

The determination of the expense and liability relating to our pension and other post-retirement benefits involves the use of judgment in the determination of actuarial assumptions. These include estimates of future mortality, withdrawal, changes in compensation and discount rate to reflect the time value of money as well as the rate of return on plan assets. These assumptions are reviewed at least annually and may differ materially from actual results due to changing market and economic conditions, regulatory events, judicial rulings, higher or lower withdrawal rates or longer or shorter life spans of participants.

We account for our Employees Postretirement Benefits and Other Benefits, according to FASB Statements No. 87, 88, 106, 132(R) and 158. These standards require that we recognize the over funded or under funded status of each of our defined benefit pension and other post-retirement benefit plans as an asset or liability and to reflect changes in the funded status through Accumulated other comprehensive income, as a separate component of stockholder s equity. According to the requirements of SFAS 87, and subsequent interpretations, the discount rate should be based on present value for settling the pension obligation. The use of the precepts of SFAS 87 in Brazil, which has been subject to inflation from time to time, creates certain issues to the extent that the ability for a company to settle a pension obligation at a future point in time may not exist because long-term financial instruments of suitable grade may not exist locally.

Although the Brazilian market has been demonstrating signs of stabilization as reflected in market interest rates, interest rates may be unstable.

We adopt a mortality table relating to actuarial assumptions of our pension and healthcare plans in Brazil, which reflects changes with respect to the profile of employees, retirees and pensioners, based on longevity, age of invalidity and invalid mortality tables.

The progressive increase in longevity has direct impact on the plan s estimated and provisioned volume of commitments and obligations and in our liabilities under the line Employees post-retirement benefits obligation Pension and our shareholders equity under the line Postretirement benefit reserves adjustments net of tax pension cost. The change of the mortality table has been affecting the results for the years subsequent to 2004 due to an increase of expenses related to the interest costs and amortization of Postretirement benefit reserves adjustments net of tax pension.

Postretirement benefit reserves adjustments net of tax pension cost are values calculated as the difference between the forecasted restatement of the net value of the obligations according to the actuarial assumptions and the variations effectively occurring over time. These amounts are to be amortized and posted to the results of subsequent fiscal years over the average life expectancy of the pension plan s members. See Note 16 to our audited consolidated financial statements for the year ended December 31, 2007.

## Litigation, Tax Assessments and Other Contingencies

Claims for substantial amounts have been made against us arising in the normal course of business. We are sometimes held liable for spills and releases of oil products and chemicals from our operating assets. In accordance with the guidance provided by U.S. GAAP, we accrued for these costs when it is probable that a liability has been incurred and reasonable estimates of the liability can be made. At December 31, 2007, we had accrued U.S.\$382 million for litigation contingencies. Significant management judgment is required to comply with this guidance and it includes management s discussion with our attorneys, taking into account all of the relevant facts and circumstances. We believe that payments required to settle the amounts related to these claims, in case of loss, will not vary significantly from our estimated costs, and thus will not have a material adverse effect on our operations or cash flows. In past periods, the difference between the actual payout and the amount of the provision liability, with respect to contingency estimation, has been insignificant, with no material income statement impact in the period of the payout. In the last five years, our annual cash payouts for contingencies relating to claims against us, the parent company, reached an average of U.S.\$85 million per year.

#### Asset Retirement Obligations and Environmental Remediation

Under various contracts, permits and regulations, we have material legal obligations to remove equipment and restore the land or seabed at the end of operations at production sites. Our most significant asset removal obligations involve removal and disposal of offshore oil and gas production facilities worldwide. We accrue the estimated discounted costs of dismantling and removing these facilities at the time of installation of the assets. We also estimate costs for future environmental clean-up and remediation activities based on current information on costs and expected plans for remediation provision at December 31, 2007 was U.S.\$3,462 million. Estimating asset retirement, removal and environmental remediation costs requires performing complex calculations that necessarily involve significant judgment because our obligations are many years in the future, the contracts and regulation have vague descriptions of what removal and remediation practices and criteria will have to be met when the removal and remediation events actually occur and asset removal technologies and costs are constantly changing, along with political, environmental, safety and public relations considerations. Consequently, the timing and amounts of future cash flows are subject to significant uncertainty. However, given the significant amount of time to the ultimate retirement date, any modifications in technological specifications, legal requirement, or other matters, would not have a materially adverse effect on any one reporting period.

In 2007, we reviewed and revised our estimated costs associated with well abandonment and the demobilization of oil and gas production areas, considering new information about date of expected abandonment and revised cost estimates to abandon. The changes to estimated asset retirement obligation were principally related to changing expectations about Brent prices, which led the correlated fields to have longer economic lives. This review resulted in a decrease in the related provision of U.S.\$401 million with a gain recognized in net income, and recorded in the line titled exploratory costs for oil and gas exploration. See Note 9(c) to our audited consolidated financial statements, as of December 31, 2007.

### Derivative transactions

SFAS 133 requires that we recognize all derivatives as either assets or liabilities in the balance sheet and measure those instruments at fair value. Accounting for derivative transactions requires us to employ judgment to arrive at assumptions to compute fair market values, which are used as the basis for recognition of the derivative instruments in the financial statements. Such measurement may depend on the use of estimates such as estimated future prices, long-term interest rates and inflation indexes, and becomes increasingly complex when the instrument being valued does not have counterparts with similar characteristics traded in an active market.

In the course of our business we have entered into contracts that meet the definition of derivatives under SFAS 133, certain of which have not qualified to receive hedge accounting. For the majority of these contracts, the estimates involved in the calculations for the fair value of such derivative instruments have not been considered likely to have a material impact in our financial position had we used different estimates, due to the majority of our derivative instruments being traditional over the counter instruments with short term maturities.

# Impact of New Accounting Standards

### Brazilian GAAP adopts IFRS principles

In December 2007, significant changes were made to the Brazilian Corporate Law to permit Brazilian GAAP to converge with International Financial Reporting Standards (IFRS). The changes will take effect for the fiscal year ended December 31, 2008. The impact on our Brazilian GAAP income statement would include: a change in the means of calculating and amortizing goodwill, the recognition of exchange variations by foreign subsidiaries, the accounting for joint ventures and affiliates, and related tax effects. These changes would have an impact not only on our net income but also on our shareholders equity, which are the basis for dividend and interest on equity payment. We are currently evaluating the potential impacts of this law on our Brazilian GAAP financials. *SFAS No. 157* 

In September 2006, the FASB issued FASB Statement No. 157, Fair Value Measurements (SFAS 157), which became effective for us on January 1, 2008. This standard defines fair value, establishes a framework for measuring fair value and expands disclosures about fair value measurements. SFAS 157 does not require any new fair value measurements but would apply to assets and liabilities that are required to be recorded at fair value under other accounting standards. We do not expect any significant impact to our audited consolidated financial statements, other than additional disclosures.

#### FSP 157-1

In February 2008, the FASB issued FASB Staff Position FAS No. 157-1, Application of SFAS 157 to FASB Statement No. 13 and Its Related Interpretive Accounting Pronouncements That Address Leasing Transactions (FSP 157-1), which became effective for us on January 1, 2008. This FSP excludes FASB Statement No. 13, Accounting for Leases, and its related interpretive accounting pronouncements from the provisions of SFAS 157, except for leasing transactions arising from business combinations. We do not expect any significant impact to our audited consolidated financial statements.

### FSP 157-2

In February 2008, the FASB issued FASB Staff Position FAS No. 157-2, Effective Date of SFAS 157 (FSP 157-2), which delays the company s January 1, 2008, effective date of SFAS 157 for all non financial assets and non financial liabilities, except those recognized or disclosed at fair value in the financial statements on a recurring basis (at least annually), until January 1, 2009. We do not expect any significant impact to our audited consolidated financial statements.

#### SFAS No. 159

In February 2007, the FASB issued SFAS 159 The Fair Value Option for Financial Assets and Financial Liabilities. (SFAS 159). SFAS 159 permits the measurement of certain financial instruments at fair value. Entities may choose to measure eligible items at fair value at specified election dates, reporting unrealized gains and losses on such items at each subsequent reporting period. SFAS 159 is effective for fiscal years beginning after November 15, 2007. We do not expect any significant impact to our audited consolidated financial statements.

## SFAS No. 141-R

In December 2007, the FASB issued FASB Statement No. 141 (revised 2007), Business Combinations (SFAS 141-R), which will become effective for business combination transactions having an acquisition date on or after January 1, 2009. This standard requires the acquiring entity in a business combination to recognize the assets acquired, the liabilities assumed, and any noncontrolling interest in the acquiree at the acquisition date to be measured at their respective fair values. SFAS 141-R changes the accounting treatment for the following items: acquisition-related costs and restructuring costs to be generally expensed when incurred; in-process research and development to be recorded at fair value as an indefinite-lived intangible asset at the acquisition date; changes in deferred tax asset valuation allowances and income tax uncertainties after the acquisition to be generally recognized in income tax expense; acquired contingent liabilities to be recorded at fair value at the acquisition date and subsequently measured at either the higher of such amount or the amount determined under existing guidance for non-acquired contingencies. SFAS 141-R also includes a substantial number of new disclosures requirements. The impact on the application of SFAS 141-R in the consolidated financial statements will depend on the business combinations arising during 2009 and thereafter.

### SFAS No. 160

In December 2007, the FASB issued FASB Statement No. 160, Noncontrolling Interests in Consolidated Financial Statements, an amendment of ARB No. 51 (SFAS 160), that establishes new accounting and reporting standards for the noncontrolling interest in a subsidiary and for the deconsolidation of a subsidiary. SFAS 160 requires the recognition of a noncontrolling interest (minority interest) as equity in the consolidated financial statements and separate from the parent s equity. The amount of net income attributable to the noncontrolling interest will be included in consolidated net income on the face of the income statement. Certain changes in a parent s ownership interest are to be accounted for as equity transactions and when a subsidiary is deconsolidated, any noncontrolling equity investment in the former subsidiary is to be initially measured at fair value. SFAS 160 also includes expanded disclosure requirements regarding the interests of the parent and its noncontrolling interest and is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2008. Our presentation of income statement and balance sheet will be significantly changed by the application of SFAS 160.

In July 2006, the FASB issued FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes, An Interpretation of FASB Statement 109 ("FIN 48"), that clarifies the accounting for uncertainty in income taxes recognized in an enterprise s financial statements and prescribes a threshold of more-likely-than-not for recognition of tax benefits of uncertain tax positions taken or expected to be taken in a tax return. FIN 48 also provides related guidance on measurement, derecognition, classification, interest and penalties, and disclosure. The provisions of FIN 48 became effective for us on January 1, 2007, with any cumulative effect of the change in accounting principle recorded as an adjustment to opening retained earnings. We adopted FIN 48 on January 1, 2007. The adoption did not have a material impact on our audited consolidated financial statements.

# **Research and Development**

We are deeply committed to research and development as a means to extend our reach to new production frontiers and achieve continuous improvement in operations. We have a history of successfully developing and implementing innovative technologies, including the means to drill, complete and produce wells in increasingly deep water. We are one of the largest investors in research and development among the world s major oil companies, and we spend a large percentage of revenues on research and development. In 2007, we spent \$881 million on research and development, equivalent to 1.0% of our net operating revenues. In 2006, we spent \$730 million on research and development, equivalent to 1.0% of our net operating revenues. In 2005, we spent \$399 million on research and development, equivalent to 0.7% of our net operating revenues. Our bylaws require us to place at least 0.5% of our paid-in corporate capital in a reserve for research and development expenses.

Our research and development activities focus on three strategic areas: (1) offshore deepwater exploration and production; (2) refining and conversion of heavy crude; and (3) renewable energy, as well as on improving hydrocarbon recovery levels, product quality, efficiency, reliability, and costs. Among the breakthroughs we have achieved have been semi-submersible production platforms capable of operating in water depths of up to 3,000 meters (9,843 feet) and the H-Bio process to convert vegetable oils to biodiesel in existing refineries. In the three-year period ended December 31, 2007, our research and development operations were awarded 43 patents in Brazil and 169 overseas.

We have operated a dedicated research and development facility in Rio de Janeiro, Brazil since 1966. As of December 31, 2007, we had 1,981 employees working at this facility. We also conduct research and development through joint research projects with universities and other research centers in Brazil and abroad and participate in technology exchange and assistance partnerships with other oil and gas and oilfield services companies.

PifCo does not itself conduct research and development.

# Trends

We plan to expand all segments of operations in our target markets. In support of this goal we plan total capital expenditures of \$112.4 billion over 2008-2012. Of this total, 58% is in the upstream segment, where constant investment in exploration and development is needed to exploit newly discovered resources and offset natural declines in production from existing fields as they mature. Based on our slate of development projects, we have set a target of increasing production by 7% annually over the period 2008 to 2012 while replacing our reserves through organic growth.

The price we realize for the oil we produce is determined by international oil prices, although we generally sell our oil at a slight discount to the Brent and West Texas Intermediate (WTI) benchmark prices because it is heavier and thus more expensive to refine. International oil prices reached record levels in 2007, driven largely by three factors: (1) continuing increases in global demand for oil products despite rising prices, (2) increasingly tight oil production and refining capacity, and (3) international geopolitical risks. The International Energy Agency (IEA) projects that global energy demand will continue to grow and that, in the absence of concomitant increases in supply-side investment or stronger policy action to curb demand growth in all countries the world would be faced with higher energy prices in the medium to long term.<sup>6</sup>

During 2008 to 2012, we plan to increase our refining throughput and our capacity to refine heavier crudes. During 2007, downstream gross margins varied between two and 16 percent due to fluctuations in oil prices. Future refining margins will depend on capacity utilization in the global and Brazilian refining industries and the relative prices and volumes of light and heavy crudes that are produced and can be processed.

Our net-debt-to-equity ratio is targeted to remain in the range of 20% from 2008 and 2012.

The dividends we pay to shareholders depend on our earnings and other factors. Under Brazilian law, shareholders are entitled to a mandatory dividend of 25% of annual adjusted net income.

# Item 6. Directors, Senior Management and Employees

### **Directors and Senior Management**

Directors of Petrobras

Our board of directors is composed of a minimum of five and a maximum of nine members and is responsible for, among other things, establishing our general business policies. The members of the board of directors are elected at the annual general meeting of shareholders.

Under Brazilian Corporate Law, shareholders representing at least 10% of the company s voting capital have the right to demand that a cumulative voting procedure be adopted to entitle each common share to as many votes as there are board members and to give each common share the right to vote cumulatively for only one candidate or to distribute its votes among several candidates.

<sup>6</sup> Source: IEA
 World Energy
 Outlook 2007

Furthermore, our bylaws enable (i) minority preferred shareholders that together hold at least 10% of the total capital stock (excluding the controlling shareholders) to elect and remove one member to our board of directors; and (ii) minority common shareholders to elect one member to our board of directors, if a greater number of directors is not elected by such minority shareholders by means of the cumulative voting procedure. Our bylaws provide that, regardless of the rights above granted to minority shareholders, the Brazilian federal government always has the right to elect the majority of our directors, independently of their number. In addition, under Law 10,683, dated May 28, 2003, one of the board members elected by the Brazilian federal government must be indicated by the Minister of Planning, Budget and Management. The maximum term for a director is one year, but re-election is permitted. In accordance with the Brazilian Corporate Law, the shareholders may remove any director from office at any time with or without cause at an extraordinary meeting of shareholders. Following an election of board members under the cumulative vote procedure, the removal of any board member by an extraordinary meeting of shareholders will result in the removal of all the other members, after which new elections must be held.

We currently have nine directors. The following table sets forth certain information with respect to these directors:

Name	Date of Birth	Position	Current Term Expires	<b>Business Address</b>
Dilma Vana Rousseff (1)	Dec. 14, 1947	Chair	April 2009	Casa Civil Praça dos Três Poderes Palácio do Planalto 4º andar sala 57 Brasília DF Cep 70.150-900
Silas Rondeau Cavalcanti Silva (1)	Dec. 15, 1952	Member	April 2009	Avenida República do Chile, no. 65 24º andar Rio de Janeiro RJ Cep 20.031-912
Guido Mantega (1)	Apr. 7, 1949	Member	April 2009	Ministério da Fazenda Esplanada dos Ministérios Bloco P 5º andar Brasília DF
J.S. Gabrielli de Azevedo (1)	Oct. 3, 1949	Member	April 2009	Cep 70.048-900 Avenida República do Chile, no. 65 23º andar Rio de Janeiro RJ Cep 20.031-912
Francisco Roberto de Albuquerque (1)	May 17, 1937	Member	April 2009	Alameda Carolina, 594 Itú São Paulo Cep 13.306-410
Arthur Antonio Sendas (1)	Jun. 16, 1935	Member	April 2009	Rodovia Presidente Dutra, 4.674 São João de Meriti RJ Cep 25.565-350
Fabio Colletti Barbosa (2)	Oct. 3, 1954	Member	April 2009	Av. Paulista, 1.374 3° andar Cerqueira César São Paulo SP Cep 01310-916
Jorge Gerdau Johannpeter (3)	Dec. 8, 1936	Member	April 2009	Av. Farrapos, 1.811 Porto Alegre RS Cep 90.220-005
Luciano Galvão Coutinho (1)	Sep. 29, 1946	Member	April 2009	Av. República do Chile, no. 100 19º andar Rio de Janeiro RJ Cep 20.031-917

- (1) Appointed by the controlling shareholder.
- (2) Appointed by the minority common shareholders.

(3) Appointed by the minority preferred shareholders.

*Dilma Vana Rousseff* Ms. Rousseff has been the Chair of the board of directors of Petrobras and Petrobras Distribuidora S.A. BR since January 3, 2003. She has been the Chief State Minister of the Civil Cabinet of the Presidency of the Republic of Brazil since June 14, 2005. She was Brazil s Minister of Mines and Energy from January 2003 to June 2005. Ms. Rousseff has a bachelor s degree in economics from the Universidade Federal do Rio Grande do Sul (1977), a master s degree in economic theory from the Universidade de Campinas (Unicamp) (1979) and is currently pursuing a doctorate degree in monetary and financial economics at Unicamp.

*Silas Rondeau Cavalcante Silva* Mr. Silva has been a member of our board of directors since April 3, 2006, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. Mr. Silva was the Minister of Mines and Energy from July 2005 to May 2007. He is currently a member of the board of directors of Itaipu Binacional. Mr. Silva has a degree in electrical engineering from the Universidade Federal de Pernambuco and a specialized degree in transmission lines engineering from the Universidade Federal do Rio de Janeiro.

*Guido Mantega* Mr. Mantega has been a member of our board of directors since April 3, 2006, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been a member of the Remuneration and Succession Committee of our board of directors since October 15, 2007. Mr. Mantega has been Brazil s Minister of Finance since March 28, 2006. He is a member of the *Conselho de Desenvolvimento Econômico e Social CDES* (Economic and Social Development Council), an advisory body to the Brazilian government. He received a bachelor s degree in economics from the School of Economics and Administration from the Universidade de São Paulo (USP) in 1971, and a Ph.D. in development sociology from the Philosophy, Sciences and Liberal Arts School at USP, and completed specialized studies at the Institute of Development Studies (IDS) at the University of Sussex, England in 1977.

*J.S. Gabrielli de Azevedo* Mr. Gabrielli was our CFO from January 2003 to July 2005, and he has been our President and CEO since July 22, 2005. He is a member of the board of directors of Petrobras Distribuidora S.A. BR and Chairman of the board of directors of other Petrobras subsidiaries in Brazil. Mr. Gabrielli holds a Ph.D. in economics from Boston University (1987). He is a full Professor of Economics on leave from the Universidade Federal da Bahia (UFBA).

*Francisco Roberto de Albuquerque* Mr. de Albuquerque has been a member of our board of directors since April 2, 2007, and he is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been a member of the Audit Committee and the Remuneration and Succession Committee of our board of directors since April 13, 2007, and October 15, 2007, respectively. He earned a bachelor s degree in military sciences from the Academia Militar das Agulhas Negras (AMAN) in Resende, Rio de Janeiro (1958) and in economics from the Universidade de São Paulo (1968), a master s in military sciences from the Escola de Aperfeiçoamento de Oficiais (1969), and a Ph.D. in military sciences from the Escola de Comando e Estado-Maior do Exército in Rio de Janeiro (1977).

*Arthur Antonio Sendas* Mr. Sendas has been a member of our board of directors since March 29, 2004, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been a member of the Audit Committee of our board of directors since June 30, 2006. Mr. Sendas is the President of Grupo Sendas (Sendas Empreendimentos e Participações Ltda., Sendas Agropecuária S.A. and Sendas Comércio Exterior e Armazéns Gerais S.A., Shopping Grande Rio, São João de Meriti, RJ, and Shopping Pampulha, Belo Horizonte, MG) and is a member of the board of directors of Casa Show S.A. and Sendas Distribuidora S.A. Mr. Sendas sits on the advisory councils of the Brazilian Supermarkets Association and the Brazilian Distribution Company Pão de Açúcar, and is a member of the Development Council of the Pontifíca Universidade Católica do Rio de Janeiro PUC-Rio.

*Fabio Colletti Barbosa* Mr. Barbosa has been a member of our board of directors since January 3, 2003, and is also a director of Petrobras Distribuidora S.A. BR. He has been the President of the Audit Committee of our board of directors since June 17, 2005. He is the Chief Executive Officer of ABN Amro Bank Latin America and of Banco ABN Amro Real S.A. Mr. Barbosa is also the Chairman of the board of directors and of the executive board of the *Federação Brasileira de Bancos FEBRABAN* (Brazilian Federation of Banks). Mr. Barbosa has a bachelor s degree in management from the Fundação Getúlio Vargas São Paulo (1976) and an MBA from the Institute for Management and Development in Lausanne, Switzerland (1979).

*Jorge Gerdau Johannpeter* Mr. Johannpeter has been a member of our board of directors since October 19, 2001, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been a member of the Remuneration and Succession Committee of our board of directors since October 15, 2007. Mr. Johannpeter is the President of the board of directors of Gerdau Group, and is a member of the board of directors of the Brazilian Steel Institute, the *Conselho de Desenvolvimento Econômico e Social CDES* (Economic and Social Development Council), and the International Iron and Steel Institute (IISI), where he is also a member of the executive committee. Mr. Johannpeter received a bachelor s degree in law and social sciences from the Universidade Federal do Rio Grande do Sul (UFRGS), Porto Alegre, in 1961.

*Luciano Coutinho* Mr. Coutinho has been a member of our board of directors since April 4, 2008, and is also a member of the board of directors of Petrobras Distribuidora S.A. BR. He has been the President of the Brazilian Development Bank (BNDES) since April 27, 2007. Mr. Coutinho has a Ph.D. in economics from Cornell University, a master s degree in economics from the Institute of Economic Research at the Universidade de São Paulo (USP), and a bachelor s degree in economics from USP.

### Directors of PifCo

PifCo is managed by a board of directors, consisting of three members, and by its executive officers. The board of directors is responsible for preparing PifCo s year-end accounts, convening shareholders meetings and reviewing and monitoring its financial performance and strategy. Although not required by PifCo s memorandum and articles of association, it is PifCo s policy that the Chairman and all of its executive officers be Petrobras employees.

PifCo s directors serve indefinite terms and can be removed with or without cause. The following table sets forth certain information about PifCo s board of directors:

Name	Date of Birth	Position	Year of Appointment	
Daniel Lima de Oliveira	December 29, 1951	Chairman	2005	
Marcos Antonio Silva Menezes	March 24, 1952	Director	2003	
Nilo Carvalho Vieira Filho	October 26, 1954	Director	2004	

*Daniel Lima de Oliveira* Mr. Lima de Oliveira has been PifCo s Chairman and Chief Executive Officer and Petrobras Executive Manager of Corporate Finance since September 1, 2005. Since January 2002, Mr. Lima has been a director of Petrobras International Braspetro BV (PIB BV) and Braspetro Oil Services Company Brasoil and since March 2004 he has been a member of the board of directors of REFAP S.A. Mr. Lima de Oliveira graduated in mechanical engineering from São José dos Campos s Industrial Engineering School in 1975.

*Marcos Antonio Silva Menezes* Mr. Menezes has been a PifCo director since 2003, and Chief Accounting Officer of Petrobras since 1998. Mr. Menezes currently serves as a member of the Fiscal Council and of the Audit Committee of Braskem S.A., and he has been the Chairman of the Fiscal Council of the *Instituto Brasileiro de Petróleo e Gás IBP*, and the *Organização Nacional das Indústras de Petróleo ONIP* since 1998 and 1999, respectively. He is also a director of the American Chamber of Commerce AMCHAM/RJ. Mr. Menezes holds bachelor s degrees in accounting and business management from the Colégio Moraes Júnior in Rio de Janeiro, a post-graduate degree in financial management from the Fundação Getúlio Vargas, and has completed an advanced management program (PGA) at the Fundação Dom Cabral/INSEAD France.

*Nilo Carvalho Vieira Filho* Mr. Vieira has been a PifCo director since 2003, and he has served as PifCo s Executive Manager of Marketing and Trading since 2004. Mr. Vieira graduated in mechanical engineering from the Universidade Federal Fluminense in Rio de Janeiro in 1978.

### Executive Officers of Petrobras

Our board of executive officers, composed of one president and up to six executive officers, is responsible for our day-to-day management. Under our bylaws, the board of directors elects the executive officers, including the president. The president is chosen from among the members of the board of directors. All of the executive officers are Brazilian nationals and reside in Brazil. According to our bylaws, in electing executive officers our board of directors must consider their personal qualification, knowledge and specialization in their respective areas. The maximum term for executive officers is three years, but re-election is permitted. The board of directors may remove any executive officer from office at any time with or without cause. Five of the current executive officers are experienced Petrobras career managers, engineers or technicians.

The following table sets forth certain information with respect to our executive officers:

Name	Date of Birth	Position	Current Term
J.S. Gabrielli de	October 3, 1949	President and Chief Executive Officer	
Azevedo Almir Guilherme	May 19, 1947	Chief Financial Officer and Investor Relations Officer	April 2011
Barbassa	•		April 2011
Renato de Souza Duque	September 29, 1955	Service Officer	April 2011
Guilherme de	April 18, 1942	Exploration and Production Officer	April 2011
Oliveira Estrella	_	-	April 2011
Paulo Roberto Costa	January 1, 1954	Downstream Officer	April 2011
María das Graças	August 26, 1953	Gas and Energy Officer	
Silva Foster			April 2011
Jorge Luiz Zelada	January 20, 1957	International Officer	April 2011

*J. S. Gabrielli de Azevedo* Mr. Gabrielli has been our President since July 2005 and a member of our board of directors since July 2005. For biographical information regarding Mr. Gabrielli, see Directors of Petrobras. *Almir Guilherme Barbassa* Mr. Barbassa has been our Chief Financial Officer and Investor Relations Officer since July 22, 2005. Mr. Barbassa holds a master s degree in economics from the Fundação Getúlio Vargas.

*Renato de Souza Duque* Mr. Duque has been our Executive Director of Services since January 31, 2003. Currently, Mr. Duque is a member of the board of directors of Petrobras Gás S.A. Gaspetro and Chief Executive Officer of Petrobras Negócios Eletrônicos S.A. Mr. Duque holds a degree in electrical engineering from the Universidade Federal Fluminense and an MBA from the Universidade Federal do Rio de Janeiro (UFRJ).

*Guilherme de Oliveira Estrella* Mr. Guilherme Estrella has been the Director of Exploration and Production since 2003. He has been Chairman of the board of the *Instituto Brasileiro de Petróleo e Gás* (Brazilian Oil and Gas Institute) since 2003. Mr. Estrella graduated in 1964 from the School of Geology of the Universidade Federal do Rio de Janeiro.

*Paulo Roberto Costa* Mr. Paulo Roberto has been our Downstream Director since May 14, 2004. Mr. Paulo Roberto graduated in mechanical engineering from the Universidade Federal do Paraná in 1976.

*Maria das Graças Silva Foster* Ms. Maria das Gracas Silva Foster has been our Director of Gas and Energy since September 21, 2007. She holds a degree in chemical engineering from the Universidade Federal Fluminense, a master s degree in nuclear engineering from the Universidade Federal do Rio de Janeiro and an MBA in economics from the Fundação Getúlio Vargas.

*Jorge Luiz Zelada* Mr. Zelada has been our Executive Director of International Business since March 3, 2008. Mr. Zelada received a degree in electrical engineering from the Universidade Federal do Rio de Janeiro in 1979. *Executive Officers of PifCo* 

All of the current executive officers are experienced managers from Petrobras, some of whom have served on the boards of directors of Petrobras subsidiaries and in representative offices abroad. The executive officers work as a board and are responsible for PifCo s day-to-day management. PifCo s executive officers serve indefinite terms and can be removed with or without cause.

The following table sets forth certain information about PifCo s executive officers:

Name	Date of Birth	Position	Year of Appointment
Daniel Lima de Oliveira	December 29, 1951	Chairman	2005
Guilherme Pontes Galvão França	January 18, 1959	Commercial Manager	2005
Sérvio Túlio da Rosa Tinoco	June 21, 1955	Financial Manager	2005
Mariângela Monteiro Tizatto	August 9, 1960	Accounting Manager	1998
Nilton Antônio de Almeida Maia	June 21, 1957	Legal Manager	2000
Gérson Luiz Gonçalves	September 29, 1953	Auditor Manager	2000
Ana Claudia Medeiros Borges	December 27, 1967	Secretary	2006

*Daniel Lima de Oliveira* Mr. Lima de Oliveira has been PifCo s Chairman and Chief Executive Officer and Petrobras Executive Manager of Corporate Finance since September 1, 2005. For biographical information regarding Mr. Lima de Oliveira, see Directors of PifCo.

*Guilherme Pontes Galvão França* Mr. França became an executive officer of PifCo on March 7, 2005, and he has served as General Manager of Petroleum and Industrial Products Supply and Trading since October 1, 2005. Mr. França graduated in chemical engineering from the Universidade Federal do Rio de Janeiro in 1981.

*Sérvio Túlio da Rosa Tinoco* Mr. Tinoco became an executive officer of PifCo on September 1, 2005. Mr. Tinoco is the financial manager of PifCo. Mr. Tinoco holds a bachelor s degree in economics from Universidade Oswaldo Cruz, São Paulo (1978), and had an MBA from the Fundação Getúlio Vargas, São Paulo (1983) partially completed with one year at the Institut Supérieur des Affaires ISA/HEC, France.

*Mariângela Monteiro Tizatto* Ms. Tizatto has served as PifCo s Accounting Manager since 1998, and has been Petrobras Corporate Accounting General Manager since 1999. Ms. Tizatto has a bachelor s degree in accounting from Universidade Cândido Mendes and an executive MBA from the Universidade Federal do Rio de Janeiro. She has been a member of the Fiscal Council of Petrobras Distribuidora S.A. BR since 2006, and she has been a member of the Auditing and Accounting Rules Commission of the *Associação Brasileira das Companhias Abertas ABRASCA* since 1995.

*Nilton Antônio de Almeida Maia* Mr. Maia has served as PifCo s Legal Manager since April 19, 2000. Mr. Maia also currently serves as General Counsel for Petrobras. He has completed post-graduate degrees in law, with specializations in energy and tax law, from the Universidade Cândido Mendes and the Universidade Estácio de Sá.

*Gerson Luiz Gonçalves* Mr. Gonçalves has served as PifCo s Auditor Manager since April 19, 2000. He is responsible for all of Petrobras internal accounting control activities. Mr. Gonçalves is a member of the Brazilian Institute of Internal Auditors (AUDIBRA) and of the United States Institute of Internal Auditors (IIA). He received a bachelor s degree in accounting from the Universidade de São Paulo in 1975.

*Ana Claudia Medeiros Borges* Ms. Borges holds a bachelor s degree in economics from Universidade Gama Filho and a post-graduate degree in strategic management from Universidade Cândido Mendes. She has been PifCo s Businesses Coordinator since April 2006. Since March 2006, she has also been a member of the Petrobras Química S.A. Petroquisa s Fiscal Council.

### Compensation

Petrobras

For 2007, the aggregate amount of compensation we paid to all members of the board of directors and executive officers was approximately U.S.\$4 million.

In addition, the members of the board and the executive officers receive certain additional benefits generally provided to our employees and their families, such as medical assistance, payment of educational expenses and supplementary social security benefits.

We have no service contracts with our directors providing for benefits upon termination of employment. We have a remuneration and succession committee in the form of an advisory committee. See Other Advisory Committees.

### PifCo

PifCo s directors and executive officers are paid by Petrobras in respect of their function as Petrobras employees, but they do not receive any additional compensation, pension or other benefits from PifCo or Petrobras in respect of their functions as PifCo s directors or officers, as the case may be.

### Share Ownership

### Petrobras

As of April 30, 2008, the members of our board of directors, our executive officers, the members of our Fiscal Council, and close members of their families, as a group, beneficially held a total of 19,802 common shares and 56,144 preferred shares of our company. Accordingly, on an individual basis, and as a group, our directors, executive officers, Fiscal Council members, and close members of their families beneficially owned less than one percent of any class of our shares. The shares held by our directors, executive officers, Fiscal Council members, and close members of the shares of the same voting rights as the shares of the same type and class that are held by our other shareholders. None of our directors, executive officers, Fiscal Council members, or close members of their families holds any options to purchase common shares or preferred shares. Petrobras does not have a stock option plan for its directors, officers or employees.

### PifCo

As of December 31, 2007, PifCo s share capital was composed of 300,050,000 shares at par value of U.S.\$1.00 per share. All of PifCo s issued and outstanding shares of common stock are owned by us.

### **Fiscal Council**

We have established a permanent Fiscal Council (*conselho fiscal*) in accordance with applicable provisions of the Brazilian Corporate Law, composed of up to five members. As required by the Brazilian Corporate Law our Fiscal Council is independent of our management and external auditors. The Fiscal Council s responsibilities include, among others: (i) monitoring management s activities and (ii) reviewing our annual report and financial statements. The members and their respective alternates are elected by the shareholders at the annual general shareholder s meeting. Holders of preferred shares without voting rights and minority common shareholders are each entitled, as a class, to elect one member and his respective alternate to the Fiscal Council. The Brazilian government has the right to appoint the majority of the members of the Fiscal Council and their alternates. One of these members and his respective alternate are appointed by the Minister of Finance representing the Brazilian Treasury. The members of the Fiscal Council are elected at our annual general shareholders meeting for a one-year term and re-election is permitted. The following table lists the current members of the Fiscal Council:

Name	Year of First Appointment
Marcus Pereira Aucélio	2005
César Acosta Rech	2008
Túlio Luiz Zamin	2003
Nelson Rocha Augusto	2003
Maria Lúcia de Oliveira Falcón	2003

The following table lists the alternate members of the Fiscal Council:

Name	Year of First Appointment
Eduardo Coutinho Guerra	2005
Ricardo de Paula Monteiro	2008
Edson Freitas de Oliveira	2002
Maria Auxiliadora Alves da Silva	2003
Celso Barreto Neto	2002
Detrobues Audit Committee	

### **Petrobras Audit Committee**

We have an Audit Committee that advises our board of directors, composed exclusively of members of our board of directors.

On June 17, 2005, our board of directors approved the appointment of our Audit Committee to satisfy the audit committee requirements of the Sarbanes-Oxley Act of 2002 and Rule 10A-3 under the Securities Exchange Act of 1934.

The Audit Committee is responsible for, among other things: (i) making recommendations to our board of directors with respect to the appointment, compensation and retention of our independent auditor; (ii) assisting in the resolution of conflicts between management and the independent auditor with respect to our financial statements; and (iii) establishing procedures for the receipt, retention and treatment of complaints regarding accounting, internal control and auditing matters, including procedures for the confidential, anonymous submission by employees of concerns regarding questionable accounting or auditing matters. On December 16, 2005, our Audit Committee s charter was amended to meet the audit committee requirements of the Sarbanes-Oxley Act of 2002 and Rule 10A-3 under the Securities Exchange Act of 1934, including the incorporation of the powers mentioned above.

The current members of our Audit Committee are Directors Fabio Colletti Barbosa, Francisco Roberto de Albuquerque and Arthur Antonio Sendas. All our Audit Committee members are independent as defined in 17 CRF 240.10A-3.

### **Other Advisory Committees**

We implemented two additional advisory committees in 2007: the *Comitê de Remuneração e Sucessão* (Remuneration and Succession Committee) and the *Comitê de Meio Ambiente* (Environmental Committee). Also in 2007, we formalized a relationship between the *Comissão de Governança Corporativa* (Corporate Governance Commission) and a *Comitê de Gestão da Petrobras* (Planning Committee), in order to study and refine our corporate governance practices.

### Petrobras Ombudsman

Created in May 2002 to advise the President s office, the Petrobras General Ombudsman s Office has been an official part of our corporate structure since October 2005, when it became directly linked to the board of directors. The General Ombudsman s Office is the official channel for receiving and responding to denunciations and information regarding possible irregularities in accounting, internal controls and auditing. The General Ombudsman s Office reports directly to the Audit Committee and guarantees the anonymity of informants. In December 2007, the board of directors approved the Policies and Directives of the Petrobras Ombudsmen, which was an important step in aligning the General Ombudsman s practices with those of the other ombudsmen in the system, contributing to better corporate governance.

### **PifCo Advisory Committees**

PifCo does not have any committees of its board of directors.

### **Employees and Labor Relations**

We attract and retain valuable employees by offering competitive compensation and benefits, merit-based promotions and a profit-sharing plan. In accordance with Brazilian law, total profit-sharing payments to employees are limited to 25% of the amount of proposed dividends for the year.

We increased our employee numbers in 2007 due to the growth of our business.

The table below shows our employee numbers for the last three years:

	As	of December 31	,
	2007	2006	2005
Petrobras Employees:			
Parent Company	50,207	47,955	40,541
Subsidiaries	11,941	7,454	7,197
Abroad	6,783	6,857	6,166
Total Petrobras Group	68,931	62,266	53,904
Parent Company by Level:	22.114	22.245	20.070
Mid-Level	33,114	32,265	28,070
Upper-Level	16,234	14,809	11,561
Maritime Employees	859	881	910
Total Parent Company	50,207	47,955	40,541
Parent Company by Region:			
Southeastern Brazil	34,910	33,057	27,493
Northeastern Brazil	12,243	11,978	10,610
Other locations	3,054	2,920	2,438
Total Parent Company	50,207	47,955	40,541

The table below sets forth the main expenses related to our employees for the last three years:

	2007	2006	2005
		(U.S.\$ million)	
Salaries	3,625.7	2,736.5	2,129.9
Employee training	198.4	151.1	128.1
Profit sharing distributions	519.7	550.3	413.0

We have had no major labor stoppages since 1995, and we consider our relations with our employees and the unions that represent our employees to be good. Forty-eight percent of our employees are members of the Oil Workers National Union, and 47% of our maritime employees belong to the Maritime Employees Union. We negotiate collective bargaining agreements annually with each union. Under the agreement in effect until August 31, 2008 with the Oil Workers National Union, employees received a 4.18% cost of living increase, which reflects an increase in inflation in that period, as measured by the *Índice Nacional de Preços ao Consumidor Amplo*, a 6.5% increase in the minimum pay scale, and a one-time payment of 80% of monthly salary an agreement comparable to those in prior years. The collective bargaining agreement with the Maritime Employees Union was signed on April 11, 2008. This agreement is retroactive to November 1, 2007, and is valid until October 31, 2008. *Pension and Health Care Plan* 

### Table of Contents

We sponsor a contributory defined benefit pension plan known as Petros, which covers approximately 96.5% of our employees. The principal objective of Petros has been to supplement the social security pension benefits of our employees. Employees that participate in the plan make mandatory monthly contributions. Our historical funding policy has been to make annual contributions to the plan in the amount determined by actuarial appraisals. Contributions are intended to provide not only for benefits attributed to service to date but also for those expected to be earned in the future.

The table below shows the benefits paid, contributions made, and outstanding Petros liabilities for 2007, 2006 and 2005:

	2007	2006	2005
	(	U.S.\$ million)	
Total benefits paid	835	713	570
Total contributions	282	187	155
Petros liabilities (1)	5,042	4,843	3,833

(1) The excess of the actuarial value of our obligation to provide future benefits over the fair value of the plan assets used to satisfy that obligation. See Note 16 to our audited consolidated financial statements for the year ended December 31, 2007.

On August 9, 2002, the Petros Plan stopped admitting new participants and since 2003 we have been engaged in complex negotiations with representatives of the Oil Worker s National Union to address the deficits of the plan and develop a supplementary pension plan. We have also been subject of material legal proceeding in connection with the Petros Plan. In August 2007, we approved new regulations for the Petros Plan and entered into an agreement with the Oil Worker s National Union and other parties involved which will extinguish the existing lawsuits in connection with the Petros Plan. The main changes introduced to the Petros Plan include: (1) salary increases of active employees will no longer be passed to retired employees, (2) the benefits of participants of the plan will be adjusted according to the IPCA inflation index, and (3) decreases in pensions provided by the government plan will not be supplemented by the Petros Plan. We agreed to pay R\$4.8 billion in the next 20 years to fund the plan. The changes to the regulations of the plan and the agreement referred to above are still subject to final approval by the Supplementary Pensions Office SPC. Effective July 1, 2007, we started to offer a new supplementary pension plan named the Petros 2 Plan for employees who had no pension plan. The Petros 2 Plan was formulated according to the variable contribution model, in which contributions are capitalized in the individual s account, and the pension benefits are established according to the account balances. According to FASB Statement No. 87, Employers Accounting for Pensions (SFAS 87) the new plan is considered a defined-benefit pension plan and the liability related to future benefits will be calculated on an annual basis by an independent actuary and will be recorded as component of the sponsor companies liabilities. We maintain a health care benefit plan (AMS), which offers health benefits and covers all employees (active and inactive) together with their dependents. We manage the plan, with the employees contributing fixed amounts to cover principal risks and a portion of the costs relating to other types of coverage in accordance with participation tables defined by certain parameters, including salary levels.

Our commitment related to future benefits to plan participants is calculated on an annual basis by an independent actuary, based on the Projected Unit Credit method. The health care plan is not funded or otherwise collateralized by assets. Instead, we make benefit payments based on annual costs incurred by plan participants.

On December 15, 2006, we implemented the Medicine Benefit, which provides special terms on the acquisition of certain medications by members of the AMS from participating drugstores, located throughout Brazil. See Item 5.

Operating and Financial Review and Prospects Critical Accounting Policies and Estimates Pension and Other Post-Retirement Benefits.

In addition, some of our consolidated subsidiaries have their own benefit plans.

### PifCo

With the exception of 34 employees of Petrobras Europe Limited, or PEL, and 17 employees of Petrobras Singapore Private Limited, or PSPL, PifCo s personnel consist solely of our employees, and PifCo relies on us to provide all administrative functions.

#### Item 7. Major Shareholders and Related Party Transactions Major Shareholders

#### Petrobras

Our capital stock is composed of common shares and preferred shares, all without par value. On April 30, 2008, there were 5,073,347,344 outstanding common shares and 3,700,729,396 outstanding preferred shares. These totals reflect the two-for-one split of our common and preferred shares, which became effective in Brazil as of April 28, 2008.

On May 11, 2007, our shareholders approved a four-for-two reverse capital stock split. As a result of the stock split, the ratio of our common and preferred shares to ADRs changed to two shares to one ADR. The stock split and change of ADR ratio became effective as of July 2, 2007.

Under the Brazilian Corporate Law, as amended, the number of non-voting shares of our company may not exceed two-thirds of the total number of shares. The Brazilian government is required by law to own at least a majority of our voting stock and currently owns 55.7% of our common shares, which are our only voting shares. The Brazilian government does not have any special voting rights, other than the right to always elect a majority of our directors, irrespective of the rights our minority shareholders may have to elect directors, set forth in our bylaws.

The following table sets forth information concerning the ownership of our common shares and preferred shares as of April 30, 2008, by the Brazilian government, certain public sector entities and our officers and directors as a group. We are not aware of any other shareholder owning more than 5% of our common shares.

Shareholder	Common Shares	%	Preferred Shares	%	Total Shares	%
Brazilian government	2,826,516,456	55.7			2,826,516,456	32.2
BNDES Participações						
S.A. BNDESPar	94,492,328	1.9	574,047,334	15.5	668,539,662	7.6
Other Brazilian public sector						
entities	3,446,968	0.1	1,513,488	0.04	4,960,456	0.1
All directors and executive						
officers as a Group (15 persons)	19,802		56,144		75,946	
Others	2,148,871,790	42.3	3,125,112,430	84.5	5,273,984,220	60.1
Total	5,073,347,344	100.0	3,700,729,396	100.0	8,774,076,740	100.0

As of April 30, 2008, approximately 34.936% of our preferred shares and approximately 27.419% of our common shares were held of record in the United States directly or in the form of American Depositary Shares. As of April 30, 2008, we had approximately 323,221,949 record holders of preferred shares, or American Depositary Shares representing preferred shares, and approximately 347,758,229 record holders of common shares, or American Depositary Shares representing common shares, in the United States. The ratio of our common and preferred share ADRs is two shares to one ADR. This ratio was changed by the reverse stock split effective July 2, 2007.

PifCo

As of December 31, 2007, PifCo s capital stock was composed of 300,050,000 shares at par value of U.S.\$1.00 per share. All of PifCo s issued and outstanding shares are owned by us.

### **Petrobras Related Party Transactions**

### Board of Directors

Direct transactions with interested members of our board of directors or our executive officers require the approval of our board of directors, and must follow the conditions of an arms-length transaction and market practices guiding transactions with third parties. None of the members of our board of directors, our executive officers or close members of their families has had any direct interest in any transaction we effected which is or was unusual in its nature or conditions or material to our business during the current or the three immediately preceding financial years or during any earlier financial year, which transaction remains in any way outstanding or unperformed. In addition, we have not

entered into any transaction with related parties which is or was unusual in its nature or conditions during the current or the three immediately preceding financial years, nor is any such transaction proposed, that is or would be material to our business.

We have no outstanding loans or guarantees to the members of our board of directors, our executive officers or any close member of their families.

For a description of the shares beneficially held by the members of our board of directors and close members of their families, see Item 6. Directors, Senior Management and Employees Share Ownership.

#### Brazilian government and Petros

We engage in numerous transactions in the ordinary course of business with our controlling shareholder, the Brazilian government, and with other companies controlled by it, including financings from BNDES and banking, asset management and other transactions with Banco do Brasil S.A. The above-mentioned transactions with Banco do Brasil had a net amount of U.S.\$1,693 million as of December 31, 2007. See Note 23 to our audited consolidated financial statements as of December 31, 2007.

As of December 31, 2007, we had a receivable (the Petroleum and Alcohol Account) from the Brazilian government, our controlling shareholder, of U.S.\$450 million secured by a U.S.\$53 million blocked deposit account. See Note 23 to our audited consolidated financial statements as of December 31, 2007.

We also have restricted deposits made by us, which serve as collateral for legal proceedings involving the Brazilian government. As of December 31, 2007, these deposits amounted to U.S.\$863 million. See Note 23 to our audited consolidated financial statements as of December 31, 2007.

In addition, according to Brazilian law, we are only permitted to invest in securities issued by the Brazilian government in Brazil. This restriction does not apply to investment outside of Brazil. As of December 31, 2007, the value of these government securities that has been directly acquired and held by us amounted to U.S.\$2,156 million. See Note 23 to our audited consolidated financial statements as of December 31, 2007.

We also have accounted for related party transactions with Petros, basically composed of government securities advanced by us to compose the plans assets. As of December 31, 2007, the value of these securities amounted to U.S.\$732 million. In addition, Petros also makes direct investments in government securities. See Note 23 to our audited consolidated financial statements as of December 31, 2007.

For additional information regarding our principal transactions with related parties, see Note 23 to our audited consolidated financial statements as of December 31, 2007.

#### **PifCo Related Party Transactions**

As a result of being our wholly owned subsidiary, PifCo has numerous transactions with us and other affiliated companies in the ordinary course of business. PifCo s primary business is to serve as an intermediary between third-party oil suppliers and us by engaging in crude oil and oil product purchases from international suppliers and reselling crude oil and oil products in U.S. dollars to us on a deferred payment basis, at a price which represents a premium to compensate PifCo for its financing costs. Substantially all of PifCo s revenues are generated by transactions with us.

Since PifCo s inception there have been no, and there are no proposed, material transactions with any of PifCo s officers and directors. PifCo does not extend any loans to its officers and directors.

PifCo s transactions with related parties resulted in the following balances in 2007 and 2006:

	December	: 31, 2007	December 31, 2006		
	Assets	Liabilities (U.S.\$ m	Assets illion)	Liabilities	
Assets			- /		
Current:

### Legal Proceedings

### Petrobras

We are currently subject to numerous proceedings relating to civil, criminal, administrative, environmental, labor and tax claims. Several individual disputes described in further detail below account for a significant part of the total amount of claims against us. Our audited consolidated financial statements only include provisions for probable and reasonably estimable losses and expenses we may incur in connection with pending proceedings. See Note 19 to our audited consolidated financial statements. The table below sets forth our recorded financial provisions by type of claim:<sup>(1)</sup>

	As of December 31,			
	2007	2006		
	(U.S.\$ million)			
Labor claims	58	38		
Tax claims	149	47		
Civil claims	155	97		
Commercial claims and other contingencies	20	51		
Total	382	233		

(1) Excludes

provisions for contractual contingencies and tax assessments by the *Instituto Nacional do Seguro Social*, or INSS.

The amount accrued related to claims against Petrobras, the parent company, as of December 31, 2007, corresponded to approximately 38.9% of the total amount accrued by us related to claims against us and the amounts paid by us in respect of legal claims against Petrobras in the last five years averaged U.S.\$85 million per year. As of December 31, 2007, we estimate that the total amount of claims against us, excluding disputes involving non-monetary claims or claims not easily evaluated in the current stage of the proceedings, was approximately U.S.\$19.3 billion. The most significant claims against us are summarized below:

Civil Claims

On November 23, 1992, Porto Seguro Imóveis Ltda., a minority shareholder of Petroquisa, filed a lawsuit on behalf of Petroquisa (a shareholder derivative suit) against us for alleged losses suffered as a result of the sale of Petroquisa s stake in various petrochemical companies included in the National Privatization Program (*Programa Nacional de Desestatização*). The plaintiff in the lawsuit requests that we, as controlling shareholder of Petroquisa, be compelled to reinstate the damages made to Petroquisa s equity, since we approved the minimum sales price for the privatized companies. An initial decision on January 14, 1997, held us liable to Petroquisa for damages in an amount equivalent to U.S.\$3,406 million. In addition, we were required to pay the plaintiff 5% of such amount as a premium, as well as attorney s fees of 20% of such amount. In 2006, we purchased all of the minority interests of Petroquisa, and we now own 100.0% of its share capital. We appealed and prevailed in canceling the judgment, but a subsequent appellate decision on March 30, 2004, required Petrobras to indemnify Petroquisa and Porto Seguro for U.S.\$2,359 million and

U.S.\$590 million, respectively (the latter representing 5% in premium and 20% in attorney s fees).

If this award is not reversed, the indemnity estimated to Petroquisa, including monetary corrections and interest, would be U.S.\$6,403 million. However, because Petrobras owns 100% of Petroquisa s share capital, our actual liability to Petroquisa would be approximately U.S.\$2,177 million. We will also be required to pay U.S.\$320 million to Porto Seguro and U.S.\$1,281 million in attorney s fees if the award is not reversed. For more information on this claim, see Note 19(a) to our audited consolidated financial statements as of December 31, 2007.

In 1981, Kallium Mineração S.A. brought an action against Companhia de Pesquisa de Recursos Minerais CPRM seeking an indemnification of approximately U.S.\$450 million for the early termination of a contract for the exploration of a very large potassium salt mine in Sergipe. CPRM terminated the contract when the Brazilian government, which had previously granted CPRM the right to develop an exploration project for the mine, cancelled the concession to CPRM and transferred it to Petromisa, our former subsidiary. As a result, CPRM brought us and the Brazilian government into the proceedings as co-defendants. In 1999, despite denying most of Kallium s claims, the court required us to indemnify Kallium for their research and exploration costs, which correspond to approximately U.S.\$1 million. We and Kallium have appealed the decision and are awaiting a judgment. The total damages amount that may be payable will be subject to monetary adjustment and to interest at 6% calculated as of the date of the filing of the lawsuit.

Several individuals have filed a collective lawsuit (an *ação popular*) against us, Repsol-YPF and the Brazilian government seeking to unwind the 2001 exchange of certain of our operating assets in Brazil for some of YPF s operating assets in Argentina. The plaintiffs maintain that the assets exchanged were not properly valued and that, therefore, the transaction was not in our best interests. In 2002, the court granted an injunction to the plaintiffs, which was then suspended by the Superior Court of Justice of Brazil. The lawsuit was subsequently judged on the merits in our favor and the other parties appealed. We are awaiting a final disposition on the merits.

On January 18, 2000, a pipeline connecting one of our terminals to a refinery in Guanabara Bay ruptured, causing a release of approximately 341,000 gallons of crude oil into the bay. We undertook action to control the spill in an effort to prevent the oil from threatening additional areas. As a result of this spill, several individual damage lawsuits were filed by fishermen of the State of Rio de Janeiro, in an aggregate amount of approximately R\$52 million. In addition, the Federation of Fishermen of the State of Rio de Janeiro filed a lawsuit against us claiming damages of approximately R\$537 million. In 2002, the judge hearing this matter found that damages were due, but not in the amount claimed. Both parties appealed this decision, and later in 2002, the Court of Appeals of the State of Rio de Janeiro denied the appeal filed by the plaintiff and dismissed numerous claims, including those of all fishermen who had already settled their claims against us, those who had already filed individual lawsuits against us, and certain others. Further appeals (agravos de instrumento) by both sides presented in 2003, to the Superior Tribunal de Justica (STJ) and the STF, respectively, were denied. On February 2, 2007, the judge who initially heard the case published a decision overturning the appellate court s decision and partially accepting the court expert report that defined the period over which Guanabara Bay s fish would be affected by the spill. Given that the amount of damages for each fisherman affected is the same, this decision resulted in an aggregate amount of damages equal to R\$1,102 million through December 2005 (without interest and monetary indexation after that date). We are appealing this decision. Tax Claims

We have been served with three tax assessments by the Brazilian Revenue Service relating to a withholding tax (IRRF) that they claim should have been paid by us. One assessment relates to payments we made to purchase oil we imported, and the other two relate to charter payments we made with respect to movable platform vessels. On December 31, 2007, the total amount of these three tax assessments corresponded to approximately R\$4,893 million (approximately U.S.\$2,763 million). We have contested all three of these assessments, and they are pending appeal at the administrative level. If necessary, we will bring suit at the federal judicial level.

We sold imported naphtha for the production of petrochemical raw materials, as opposed to the production of gasoline or diesel. In 2006, the Brazilian Revenue Service filed a tax assessment (*auto de infração*) against us for the payment of CIDE, an excise tax applied to the sale and import of crude oil, oil products and natural gas products, on the grounds that we did not prove that the naphtha was not used to produce gasoline or diesel. As we have provided evidence that the naphtha was used solely in petrochemical activities, we believe these imports are not taxable. The assessment is being reviewed, and we will continue to appeal at the federal administrative level and later at the federal judicial level, if necessary. As of December 31, 2007, Petrobras maximum exposure in this matter, including monetary restatement, was R\$1,354 million (U.S.\$765 million).

Petrobras was obligated to sell its products to fuel distributors free of CIDE (an excise tax) due to judicial decisions obtained by the distributors against the federal government of Brazil. The judicial decisions have been revoked, and in 2007, the Brazilian federal government commenced an administrative proceeding against us to recover R\$1,058 million (U.S.\$597 million) of unpaid CIDE. We will file an appeal in light of the first unfavorable administrative decision.

### Environmental Claims

In the period between 2003 to 2007, we experienced several accidents, some of which led to significant oil spills: 101,970 gallons in 2007, 77,402 gallons in 2006, 71,141 gallons in 2005, 140,000 gallons in 2004 and 73,000 gallons in 2003. In addition, in the years 2000 through 2002, we experienced accidents that resulted in several administrative, civil and criminal investigations and proceedings, some of which have not yet been concluded, and the most significant of which are specified below. We cannot predict whether additional litigation will result from those accidents or whether any such additional proceedings would have a material adverse effect on us. See Note 19 to our audited consolidated financial statements.

### January 2000 spill Guanabara Bay

On January 18, 2000, a pipeline connecting one of our terminals to a refinery in Guanabara Bay ruptured, causing a release of approximately 341,000 gallons of fuel oil into the bay. We undertook action to control the spill in an effort to prevent the oil from threatening additional areas. We have spent approximately R\$104 million in connection with the clean-up efforts and fines imposed by the federal environmental protection agency (IBAMA) in connection with this spill, and are subject to several legal proceedings that remain pending as a result of this spill.

### July 2000 spill Curitiba

On July 16, 2000, the Santa-Catarina/Paraná pipeline ruptured at our President Getúlio Vargas refinery, located approximately 15 miles (24 kilometers) from Curitiba, capital of the State of Paraná. Approximately 1.06 million gallons of crude oil spilled into the surrounding area. We spent approximately R\$74 million on the clean-up effort and fines imposed by the State of Paraná authorities. In addition, in relation to this spill:

IBAMA fined us R\$168 million, which we are contesting;

three public civil actions (*ações civis públicas*) have been filed against us, the most important of which was filed on January 1, 2001, by the Federal Public Ministry and the Paraná State Public Ministry seeking damages of approximately R\$2,300 million. We are in the process of settling these claims; and the Federal Public Ministry instituted a criminal action against us, our former president and our former superintendent of the REPAR refinery. This action has been suspended.

### February 2001 spill Rivers in the State of Paraná

On February 16, 2001, our Araucária-Paranaguá pipeline ruptured as a result of an unusual movement of the soil and spilled approximately 15,059 gallons of fuel oil into several rivers located in the State of Paraná. Within four days, we cleaned the river surfaces, recovering approximately 13,738 gallons of fuel oil. As a result of the accident:

the *Instituto Ambiental do Paraná*, or IAP, fined us approximately R\$150 million, which was subsequently reduced to R\$90 million, which we are contesting; and

the Federal Public Ministry and the Paraná State Public Ministry filed public civil actions against us seeking approximately R\$3.7 billion in damages. In addition, the IAP filed a class action against us seeking damages of approximately R\$150 million. Both legal proceedings have been suspended.

### March 2001 gas explosion and spill Roncador field

On March 15, 2001, a gas explosion inside one of the columns of the P-36 production platform, located in the Roncador field (75 miles off the Brazilian coast) led to the death of 11 employees and eventual sinking of the platform. The accident also caused 396,300 gallons of diesel fuel and oil to spill into the ocean. As a result of the accident:

the Federal Public Ministry filed a lawsuit in 2002 seeking the payment of R\$100 million as environmental damages, among other demands. We have presented our defense to these claims and are awaiting a decision; and

IBAMA fined us approximately R\$7 million. We are contesting these fines through administrative proceedings. One of these proceedings has ended and the fine (in the amount of R\$2 million) has been upheld by IBAMA. We obtained an injunction and are awaiting a final decision.

#### Table of Contents October 2002 FPSO acc

## October 2002 FPSO accident

On October 13, 2002, a power blackout in FPSO *P-34*, which is located in the Barracuda-Caratinga fields, affected the ship s water balance system and causing the FPSO to roll. Four days later, the stability of the ship had been restored, without casualties or spill of oil into the sea. As a result of the investigation of this accident, several measures to prevent similar accidents were incorporated into our *Programa de Excelência Operacional*, or PEO (Operational Excellence Program). In connection with the accident, we also executed a *Termo de Ajustamento de Conduta* (Agreement for Regularization of Conduct), or TAC, with IBAMA, agreeing to conduct certain actions in the Campos Basin to reduce the risk of environmental damage. The Federal Public Ministry challenged the validity of the TAC in 2003 and attempted to prevent us from obtaining new licenses from IBAMA for our platforms located in the Campos Basin. The matter was concluded in late 2007, when we obtained a final, non-appealable judgment in our favor.

## **Campos Basin Drilling Operations**

On February 3, 2006, IBAMA imposed a fine of R\$213.2 million on us for our alleged breach of the August 11, 2004 *Termo de Ajustamento de Conduta* (TAC) with IBAMA relating to drilling operations in the Campos Basin. We are contesting the fine through an administrative proceeding. We believe the drilling performed by us along the Brazilian coast, including the drilling performed in the Campos Basin, is legitimate based on IBAMA s previous drilling license, Federal Government Decree of December 9, 2002, and the August 11, 2004 TAC, which is still valid. **Pollution** 

On January 15, 1986, the Public Ministry of the State of São Paulo and the *União dos Defensores da Terra* (Union for Defense of the Earth), filed a public civil action against us and 23 other companies in the State Court of São Paulo for alleged damages caused by pollution. This lawsuit is entering the discovery phase. Although the plaintiffs alleged damages of U.S.\$89,500 in an initial pleading filed with the Court, the Public Ministry of the State of São Paulo has publicly stated that U.S.\$800 million ultimately will be required to remedy the alleged environmental damage. The Court refused to assert joint and several liability of the defendants, and we believe that it will be difficult to determine the environmental damage attributable to each defendant.

### PifCo

There is no litigation or governmental proceeding pending or, to PifCo s knowledge, threatened against PifCo s or any of its subsidiaries that, if adversely determined, would have a significant effect on its financial position or profitability.

### **Dividend Distribution**

### Petrobras

The tables below describe our dividend payments for the last five fiscal years, including amounts paid in the form of interest on shareholders equity.

	For the Year Ended December 31,					
	2007	2006	2005 (U.S.\$ million)	2004	2003	
Dividends paid to shareholders	3,860	3,144	2,104	1,785	941	
Dividends paid to minority	142	60	C	24	2	
interests	143	69	6	24	2	
	4,003	3,213	2,110	1,809	943	

For Brazilian Corporate Law s minimum dividend distribution requirements, see Item 10. Additional Information Memorandum and Articles of Incorporation of Petrobras Payment of Dividends and Interest on Shareholders Equity and Item 10. Additional Information Memorandum and Articles of Incorporation of Petrobras Mandatory Distribution. We may change our dividend policy at any time within the limits set forth by Brazilian law.

PifCo

For a description of PifCo s dividend distribution policy, see Item 10. Additional Information Memorandum and Articles of Association of PifCo Dividends.

### Petrobras

Trading Markets

Our shares and ADSs are listed or quoted on the following markets:

Common Shares	São Paulo Stock Exchange (Bovespa) São Paulo (ticker symbol PETR3); Mercado de Valores Latinoamericanos en Euros (Latibex) Madrid, Spain (ticker symbol XPBR)
Preferred Shares	São Paulo Stock Exchange (Bovespa) São Paulo (ticker symbol PETR4); Mercado de Valores Latinoamericanos en Euros (Latibex) Madrid, Spain (ticker symbol XPBRA)
Common ADSs	New York Stock Exchange (NYSE) New York (ticker symbol PBR)
Preferred ADSs	New York Stock Exchange (NYSE) New York (ticker symbol PBRA)
Common Shares	Bolsa de Comercio de Buenos Aires (BCBA) Buenos Aires, Argentina (ticker symbol APBR)

Preferred Shares Bolsa de Comercio de Buenos Aires (BCBA) Buenos Aires, Argentina (ticker symbol APBRA) Our common and preferred shares have been traded on the São Paulo Stock Exchange since 1968. Our ADSs representing two common shares and our ADSs representing two preferred shares have been traded on the New York Stock Exchange since 2000 and 2001, respectively. JPMorgan Chase Bank, N.A. serves as depositary for both the common and preferred ADSs. In March 2008, our shareholders approved a two-for-one split of our common and preferred shares trading on the São Paulo Stock Exchange, and our common and preferred ADSs trading on the New York Stock Exchange. The stock split became effective as of April 28, 2008 on the São Paulo Stock Exchange, and May 8, 2008, on the New York Stock Exchange. The two-for-one stock split did not affect the ratio of our ADSs to our underlying shares.

Our common and preferred shares have been traded on the LATIBEX since 2002. The LATIBEX is an electronic market created in 1999 by the Madrid Stock Exchange in order to enable trading of Latin American equity securities in euro denominations.

Our common and preferred shares have been traded on the *Bolsa de Comercio de Buenos Aires* (Buenos Aires Stock Exchange) since April 27, 2006.

Share Price History

The following table sets forth trading information for our common shares and preferred shares, as reported by the São Paulo Stock Exchange, and for our common and preferred American Depositary Shares, as reported by the New York Stock Exchange, for the periods indicated.

	<i>Reais</i> per common share		<i>Reais</i> per preferred share		U.S. dollars per common American Depositary Share		U.S. dollars per preferred American Depositary Share	
	High	Low	High	Low	High	Low	High	Low
2003	10.56	5.75	9.69	5.20	7.32	3.24	6.70	2.91

The São Paulo Stock Exchange								

#### The São Paulo Stock Exchange

The São Paulo Stock Exchange is less liquid than the New York Stock Exchange. At December 31, 2007, the aggregate market capitalization of the 404 companies listed on the São Paulo Stock Exchange was approximately U.S.\$1,399 billion and the ten largest companies represented approximately 54.7% of the total market capitalization of all listed companies. All the outstanding shares of an exchange-listed company may trade on the São Paulo Stock Exchange, but in most cases, less than half of the listed shares are actually available for trading by the public. The remainder is held by small groups of controlling persons, by governmental entities or by one principal shareholder.

Trading on the São Paulo Stock Exchange by a holder not deemed to be a resident of Brazil for Brazilian tax and regulatory purposes (a non-Brazilian holder) is subject to certain limitations under Brazilian foreign investment legislation. With limited exceptions, non-Brazilian holders may only trade on the São Paulo Stock Exchange in accordance with the requirements of Resolution No. 2,689 of the National Monetary Council. Resolution No. 2,689 requires that securities held by non-Brazilian holders be maintained in the custody of, or in deposit accounts with, financial institutions duly authorized by the Central Bank of Brazil and the CVM. In addition, Resolution No. 2,689

requires non-Brazilian holders to restrict their securities trading to transactions on Brazilian stock exchanges or qualified over-the-counter markets. With limited exceptions, non-Brazilian holders may not transfer the ownership of investments made under Resolution No. 2,689 to other non-Brazilian holders through a private transaction.

### PifCo

PifCo s common stock is not registered and there is no trading market for it. PifCo s Senior Notes are listed in the Luxembourg Stock Exchange. PifCo s Global Notes due 2016 and 2018 are registered on the New York Stock Exchange. PifCo s other debt securities have not been listed on any securities exchange.

#### Item 10. Additional Information

### Memorandum and Articles of Incorporation of Petrobras

#### General

We are a publicly traded company duly registered with the CVM under identification number 951-2. Article 3 of our bylaws establishes our corporate purposes as research, prospecting, extraction, processing, trade and transportation of crude oil from wells, shale and other rocks, of its derivatives, natural gas and other fluid hydrocarbons, as well as other related or similar activities, such as activities connected with energy, including research, development, production, transportation, distribution, sale and trade of all forms of energy, as well as other related or similar activities. We may conduct outside Brazil, directly or through our subsidiaries, any of the activities within our corporate purpose.

#### Qualification of Directors

Brazilian law provides that only shareholders of a company may be appointed to its board of directors, but there is no minimum share ownership or residency requirement for qualification as a director. Members of our board of executive officers must be Brazilian nationals and reside in Brazil. Our directors and executive officers are prevented from voting on any transaction involving companies in which they hold more than 10% of the total capital stock or of which they have held a management position in the period immediately prior to their taking office. Under our bylaws, shareholders set the aggregate compensation payable to directors and executive officers. The board of directors allocates the compensation among its members and the executive officers.

### Allocation of Net Income

At each annual general shareholders meeting, our board of directors is required to recommend how net profits for the preceding fiscal year are to be allocated. The Brazilian Corporate Law defines net profits as net income after income taxes and social contribution taxes for such fiscal year, net of any accumulated losses from prior fiscal years and any amounts allocated to employees and management s participation in our profits. In accordance with the Brazilian Corporate Law, the amounts available for dividend distribution or payment of interest on shareholders equity equals net profits less any amounts allocated from such net profits to the legal reserve.

We are required to maintain a legal reserve, to which we must allocate 5% of net profits for each fiscal year until the amount for such reserve equals 20% of our paid-in capital. However, we are not required to make any allocations to our legal reserve in a fiscal year in which the legal reserve, when added to our other established capital reserves, exceeds 30% of our capital. The legal reserve can only be used to offset losses or to increase our capital.

As long as we are able to make the minimum mandatory distribution described below, we must allocate an amount equivalent to 0.5% of subscribed and fully paid-in capital at year-end to a statutory reserve. The reserve is used to fund the costs of research and technological development programs. The accumulated balance of this reserve cannot exceed 5% of the subscribed and fully paid-in capital stock.

Brazilian law also provides for three discretionary allocations of net profits that are subject to approval by the shareholders at the annual general shareholders meeting, as follows:

first, a percentage of net profits may be allocated to a contingency reserve for anticipated losses that are deemed probable in future years. Any amount so allocated in a prior year must be either reversed in the fiscal year in which the reasons justifying the reserve cease to exist, or written off in the event that the anticipated loss occurs;

second, if the mandatory distributable amount exceeds the sum of realized net profits in a given year, this excess may be allocated to an unrealized revenue reserve. The Brazilian Corporate Law defines realized net profits as the amount of net profits that exceeds the sum of the net positive result of equity adjustments and profits or revenues from operations whose financial results take place after the end of the next succeeding fiscal year; and

third, a portion of our net profits that exceeds the minimum mandatory distribution may be allocated to fund working capital needs and investment projects, as long as such allocation is based on a capital budget previously approved by our shareholders. Capital budgets for more than one year must be reviewed at each annual shareholders meeting.

### Mandatory Distribution

Under Brazilian Corporate Law, the bylaws of a Brazilian corporation may specify a minimum percentage of the amounts available for distribution by such corporation for each fiscal year that must be distributed to shareholders as dividends or interest on shareholders equity, also known as the mandatory distributable amount, which cannot be lower than 25% of the adjusted net profit for the fiscal year. Under our bylaws, the mandatory distributable amount has been fixed at an amount equal to not less than 25% of our net profits, after the allocations to the legal reserve, contingency reserve and unrealized revenue reserve. Furthermore, the net profits that are not allocated to the reserves above to fund working capital needs and investment projects as described above or to the statutory reserve must be distributed to our shareholders as dividends or interest on shareholders equity.

The Brazilian Corporate Law, however, permits a publicly held company, such as ours, to suspend the mandatory distribution if the board of directors and the Fiscal Council report to the annual general shareholders meeting that the distribution would be inadvisable in view of the company s financial condition. The suspension is subject to approval of holders of common shares. In this case, the board of directors must file a justification for such suspension with the CVM. Profits not distributed by virtue of the suspension mentioned above shall be allocated to a special reserve and, if not absorbed by subsequent losses, shall be distributed as soon as the financial condition of the company permits such payments.

### Payment of Dividends and Interest on Shareholders Equity

We are required by the Brazilian Corporate Law and by our bylaws to hold an annual general shareholders meeting by the fourth month after the end of each fiscal year at which, among other things, the shareholders have to decide on the payment of an annual dividend. The payment of annual dividends is based on the financial statements prepared for the relevant fiscal year.

Law No. 9,249 of December 26, 1995, as amended, provides for distribution of interest attributed to shareholders equity to shareholders as an alternative form of distribution. Such interest is limited to the daily *pro rata* variation of the TJLP interest rate, the Brazilian government s long-term interest rate.

We may treat these payments as a deductible expense for corporate income tax and social contribution purposes, but the deduction cannot exceed the greater of:

50% of net income (before taking into account such distribution and any deductions for income taxes and after taking into account any deductions for social contributions on net profits) for the period in respect of which the payment is made; or

50% of retained earnings.

Any payment of interest on shareholders equity to holders of ADSs or common shares, whether or not they are Brazilian residents, is subject to Brazilian withholding tax at the rate of 15% or 25%. The 25% rate applies if the beneficiary is resident in a tax haven. See Taxation Relating to Our ADSs and Common and Preferred Shares Brazilian Tax Considerations. The amount paid to shareholders as interest attributed to shareholders equity, net of any

withholding tax, may be included as part of any mandatory distribution of dividends. Under the Brazilian Corporate Law, we are required to distribute to shareholders an amount sufficient to ensure that the net amount received, after payment by us of applicable Brazilian withholding taxes in respect of the distribution of interest on shareholders equity, is at least equal to the mandatory dividend.

Under the Brazilian Corporate Law and our bylaws, dividends generally are required to be paid within 60 days following the date the dividend was declared, unless a shareholders resolution sets forth another date of payment, which, in either case, must occur prior to the end of the fiscal year in which the dividend was declared. The amounts of dividends due to our shareholders are subject to financial charges at the SELIC rate from the end of each fiscal year through the date we actually pay such dividends. Shareholders have a three-year period from the dividend payment date to claim dividends or interest payments with respect to their shares, after which the amount of the unclaimed dividends reverts to us.

Holders of preferred shares are entitled to priority in the distribution equal to the greater of a 5% of their pro rata share of our paid-in capital, or 3% of their shares book value with a participation equal to the common shares in corporate capital increases obtained from the incorporation of reserves and profits.

Our board of directors may distribute dividends or pay interest based on the profits reported in interim financial statements. The amount of interim dividends distributed cannot exceed the amount of our capital reserves. *Shareholders Meetings* 

Our shareholders have the power to decide on any matters related to our corporate purposes and to pass any resolutions they deem necessary for our protection and development, through voting at a general shareholders meeting.

We convene our shareholders meetings by publishing a notice in the *Diário Oficial da União* (Official Gazette), *Jornal do Commercio, Gazeta Mercantil* and *Valor Econômico*. The notice must be published no fewer than three times, beginning at least 15 calendar days prior to the scheduled meeting date. The notice must contain the meeting s agenda and, in the case of a proposed amendment to the bylaws, an indication of the subject matter. For ADS holders, we are required to provide notice to the ADS depositary at least 30 calendar days prior to a shareholders meeting. The board of directors or, in some specific situations set forth in the Brazilian Corporate Law, the shareholders, call our general shareholders meetings. A shareholder may be represented at a general shareholders meeting by an attorney-in-fact, so long as the attorney-in-fact was appointed within a year of the meeting. The attorney-in-fact must be a shareholder, a member of our management, a lawyer or a financial institution. The attorney-in-fact s power of

attorney must comply with certain formalities set forth by Brazilian law.

In order for a valid action to be taken at a shareholders meeting, shareholders representing at least one quarter of our issued and outstanding common shares must be present at the meeting. However, in the case of a general meeting to amend our bylaws, shareholders representing at least two-thirds of our issued and outstanding common shares must be present. If no such quorum is present, the board may call a second meeting giving at least eight calendar days notice prior to the scheduled meeting in accordance with the rules of publication described above. The quorum requirements will not apply to the second meeting, subject to the voting requirements for certain matters described below. *Voting Rights* 

Pursuant to the Brazilian Corporate Law and our bylaws, each of our common shares carries the right to vote at a general meeting of shareholders. The Brazilian government is required by law to own at least a majority of our voting stock. Pursuant to our bylaws, our preferred shares generally do not confer voting rights.

Holders of common shares, voting at a general shareholders meeting, have the exclusive power to: amend our bylaws;

approve any capital increase beyond the amount of the authorized capital; approve any capital reduction;

#### **Table of Contents**

approve the appraisal of any assets used by a shareholder to subscribe for our shares;

elect or dismiss members of our board of directors and Fiscal Council, subject to the right of our preferred shareholders to elect or dismiss one member of our board of directors and to elect one member of our Fiscal Council;

receive the yearly financial statements prepared by our management and accept or reject management s financial statements, including the allocation of net profits for payment of the mandatory dividend and allocation to the various reserve accounts;

authorize the issuance of debentures, except for the issuance of non-convertible unsecured debentures, which may be approved by our board of directors;

suspend the rights of a shareholder who has not fulfilled the obligations imposed by law or by our bylaws;

accept or reject the valuation of assets contributed by a shareholder in consideration for issuance of capital stock;

pass resolutions to approve corporate restructurings, such as mergers, spin-offs and transformation into another type of company;

participate in a centralized group of companies;

approve the disposal of the control of our subsidiaries;

approve the disposal of convertible debentures issued by our subsidiaries and held by us;

establish the compensation of our senior management;

approve the cancellation of our registration as a publicly-traded company;

decide on our dissolution or liquidation;

waive the right to subscribe to shares or convertible debentures issued by our subsidiaries or affiliates; and

choose a specialized company to work out the appraisal of our shares by economic value, in cases of the canceling of our registry as a publicly-traded company or deviation from the standard rules of corporate governance defined by a stock exchange or an entity in charge of maintaining an organized over-the-counter market registered with the CVM, in order to comply with such corporate governance rules and with contracts that may be executed by us and such entities.

Except as otherwise provided by law, resolutions of a general shareholders meeting are passed by the majority of the outstanding common shares. Abstentions are not taken into account.

The approval of holders of at least one-half of the issued and outstanding common shares is required for the following actions involving our company:

reduction of the mandatory dividend distribution;

merger into another company or consolidation with another company, subject to the conditions set forth in the Brazilian Corporate Law;

participation in a group of companies subject to the conditions set forth in the Brazilian Corporate Law;

change of our corporate purpose, which must be preceded by an amendment in our bylaws by federal law as we are controlled by the government and our corporate purpose is established by law;

cessation of the state of liquidation;

spin-off of a portion of our company, subject to the conditions set forth in the Brazilian Corporate Law;

transfer of all our shares to another company or receipt of shares of another company in order to make the company whose shares are transferred a wholly owned subsidiary of such company, known as *incorporação de ações*; and

#### approval of our liquidation.

According to the Brazilian Corporate Law, the following actions shall be submitted for approval by the outstanding adversely affected preferred shares before they are submitted for approval of at least half of the issued and outstanding common shares:

creation of preferred shares or increase in the existing classes of preferred shares, without preserving the proportions to any other class of preferred shares, except as set forth in or authorized by the company s bylaws;

change in the preferences, privileges or redemption or amortization conditions of any class of preferred shares; and

creation of a new class of preferred shares entitled to more favorable conditions than the existing classes. Decisions on our transformation into another type of company require the unanimous approval of our shareholders, including the preferred shareholders, and an amendment of our bylaws by the federal law.

Our preferred shares will acquire voting rights if we fail to pay the minimum dividend to which such shares are entitled for three consecutive fiscal years. The voting right shall continue until payment has been made. Preferred shareholders also obtain the right to vote if we enter into a liquidation process.

Under Brazilian Corporate Law, shareholders representing at least 10% of the company s voting capital have the right to demand that a cumulative voting procedure be adopted to entitle each common share to as many votes as there are board members and to give each common share the right to vote cumulatively for only one candidate or to distribute its votes among several candidates. Furthermore, minority common shareholders holding at least 10% of our voting capital also have the right to appoint or dismiss one member to or from our Fiscal Council.

Preferred shareholders holding, individually or as a group, 10% of our total capital have the right to appoint and/or dismiss one member to or from our board of directors. Preferred shareholders have the right to separately appoint one member to our Fiscal Council.

Our bylaws provide that, independently from the exercise of the rights above granted to minority shareholders, through cumulative voting process, the Brazilian government always has the right to appoint the majority of our directors.

#### Preemptive Rights

Pursuant to the Brazilian Corporate Law, each of our shareholders has a general preemptive right to subscribe for shares or securities convertible into shares in any capital increase, in proportion to the number of shares held by them. In the event of a capital increase that would maintain or increase the proportion of capital represented by the preferred shares, holders of preferred shares would have preemptive rights to subscribe to newly issued preferred shares only. In the event of a capital increase that would reduce the proportion of capital represented by the preferred shares, holders of preferred shares would have preemptive rights to subscribe to any new preferred shares in proportion to the number of shares held by them, and to common shares only to the extent necessary to prevent dilution of their interests in our total capital.

A period of at least 30 days following the publication of notice of the issuance of new shares or securities convertible into shares is allowed for exercise of the right, and the right is negotiable. According to our bylaws, our board of directors may eliminate preemptive rights or reduce the exercise period in connection with a public exchange made to acquire control of another company or in connection with a public offering of shares or securities convertible into shares.

#### Table of Contents

In the event of a capital increase by means of the issuance of new shares, holders of ADSs, of common or preferred shares, would have, except under circumstances described above, preemptive rights to subscribe for any class of our newly issued shares. However, you may not be able to exercise the preemptive rights relating to the preferred shares underlying your ADSs unless a registration statement under the Securities Act is effective with respect to those rights or an exemption from the registration requirements of the Securities Act is available. See Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities.

Redemption and Rights of Withdrawal

Brazilian law provides that, under limited circumstances, a shareholder has the right to withdraw his or her equity interest from the company and to receive payment for the portion of shareholder s equity attributable to his or her equity interest.

This right of withdrawal may be exercised by the holders of the adversely affected common or preferred shares in the event that we decide:

to create preferred shares or to increase the existing classes of preferred shares, without preserving the proportions to any other class of preferred shares, except as set forth in or authorized by our bylaws; or

to change the preferences, privileges or redemption or amortization conditions of any class of preferred shares or to create a new class of preferred shares entitled to more favorable conditions than the existing classes.

Holders of our common shares may exercise their right of withdrawal in the event we decide:

to merge into another company or to consolidate with another company, subject to the conditions set forth in the Brazilian Corporate Law; or

to participate in a centralized group of companies as defined under the Brazilian Corporate Law and subject to the conditions set forth therein.

The right of withdrawal may also be exercised by our dissenting shareholders in the event we decide: to reduce the mandatory distribution of dividends;

to change our corporate purposes;

to spin-off a portion of our company, subject to the conditions set forth in the Brazilian Corporate Law;

to transfer all of our shares to another company or to receive shares of another company in order to make the company whose shares are transferred a wholly owned subsidiary of our company, known as *incorporação de ações*; or

to acquire control of another company at a price, which exceeds the limits set forth in the Brazilian Corporate Law, subject to, the conditions set forth in the Brazilian Corporate Law.

This right of withdrawal may also be exercised in the event that the entity resulting from a merger, *incorporação de ações*, as described above, or consolidation or spin-off of a listed company fails to become a listed company within 120 days of the shareholders meeting at which such decision was taken.

Any redemption of shares arising out of the exercise of such withdrawal rights would be made based on the book value per share, determined on the basis of the last balance sheet approved by our shareholders. However, if a shareholders meeting giving rise to redemption rights occurred more than 60 days after the date of the last approved balance sheet, a shareholder would be entitled to demand that his or her shares be valued on the basis of a new balance sheet dated within 60 days of such shareholders meeting. The right of withdrawal lapses 30 days after publication of the minutes of the shareholders meeting that approved the corporate actions described above. We would be entitled to reconsider any action giving rise to withdrawal rights within ten days following the expiration of such rights if the withdrawal of shares of dissenting shareholders would jeopardize our financial stability.

#### Other Shareholders Rights

According to the Brazilian Corporate Law, neither a company s bylaws nor actions taken at a general meeting of shareholders may deprive a shareholder of some specific rights, such as:

the right to participate in the distribution of profits;

the right to participate equally and ratably in any remaining residual assets in the event of liquidation of the company;

the right to supervise the management of the corporate business as specified in the Brazilian Corporate Law;

the right to preemptive rights in the event of a subscription of shares, debentures convertible into shares or subscription bonuses (other than with respect to a public offering of such securities, as may be set out in the bylaws); and

the right to withdraw from the company in the cases specified in the Brazilian Corporate Law.

#### Liquidation

In the event of a liquidation, holders of preferred shares are entitled to receive, prior to any distribution to holders of common shares, an amount equal to the paid-in capital with respect to the preferred shares.

#### Conversion Rights

According to our bylaws, our common shares are not convertible into preferred shares, nor are preferred shares convertible into common shares.

#### Liability of Our Shareholders for Further Capital Calls

Neither Brazilian law nor our bylaws provide for capital calls. Our shareholders liability for capital calls is limited to the payment of the issue price of the shares subscribed or acquired.

#### Form and Transfer

Our shares are registered in book-entry form and we have hired Banco do Brasil to perform all the services of safe-keeping and transfer of shares. To make the transfer, Banco do Brasil makes an entry in the register, debits the share account of the transferor and credits the share account of the transferee.

Our shareholders may choose, at their individual discretion, to hold their shares through the *Companhia Brasileira de Liquidação e Custódia* or CBLC. Shares are added to the CBLC system through Brazilian institutions, which have clearing accounts with the CBLC. Our shareholder registry indicates which shares are listed on the CBLC system. Each participating shareholder is in turn registered in a registry of beneficial shareholders maintained by the CBLC and is treated in the same manner as our registered shareholders.

#### Dispute Resolution

Our bylaws provide for mandatory dispute resolution through arbitration, in accordance with the rules of the *Câmara de Arbitragem do Mercado* (Market Arbitration Chamber), with respect to any dispute regarding us, our shareholders, the officers, directors and Fiscal Council members and involving the provisions of the Brazilian Corporate Law, our bylaws, the rules of the National Monetary Council, the Central Bank of Brazil and the CVM or any other capital markets legislation, including the provisions of any agreement entered into by us with any stock exchange or over-the-counter entity registered with the CVM, relating to adoption of differentiated corporate governance practices.

However, decisions of the Brazilian government, as exercised through voting in any general shareholders meeting, are not subject to this arbitration proceeding, in accordance with Article 238 of the Brazilian Corporate Law. *Self-dealing Restrictions* 

Our controlling shareholder, the Brazilian government, and the members of our board of directors, board of executive officers and Fiscal Council are required, in accordance with our bylaws, to:

refrain from dealing with our securities either in the one-month period prior to any fiscal year-end, up to the date when our financials are published, or in the period between any corporate decision to raise or reduce our stock capital, to distribute dividends or stock, and to issue any security, up to the date when the respective public releases are published; and

communicate to us and to the stock exchange their periodical dealing plans with respect to our securities, if any, including any change or default in these plans. If the communication is an investment or divestment plan, the frequency and planned quantities must be included.

#### **Restrictions on Non-Brazilian Holders**

Non-Brazilian holders face no legal restrictions on the ownership of our common or preferred shares or of ADSs based on our common or preferred shares, and are entitled to all the rights and preferences of such common or preferred shares, as the case may be.

However, the ability to convert dividend payments and proceeds from the sale of common or preferred shares or preemptive rights into foreign currency and to remit such amounts outside Brazil is subject to restrictions under foreign investment legislation which generally requires, among other things, the registration of the relevant investment with the Central Bank of Brazil. Nonetheless, any non-Brazilian holder who registers with the CVM in accordance with Resolution No. 2,689 may buy and sell securities on the São Paulo Stock Exchange without obtaining a separate certificate of registration for each transaction.

In addition, Annex III to Resolution No. 1,289 of the National Monetary Council, as amended, known as Annex III Regulations, allows Brazilian companies to issue depositary receipts in foreign exchange markets. We currently have an ADR program for our common and preferred shares duly registered with the CVM and the Central Bank of Brazil. The proceeds from the sale of ADSs by holders outside Brazil are free of Brazilian foreign investment controls.

#### **Transfer of Control**

According to Brazilian law and our bylaws, the Brazilian government is required to own at least the majority of our voting shares. Therefore, any change in our control would require a change in the applicable legislation.

#### **Disclosure of Shareholder Ownership**

Brazilian regulations require that any person or group of persons representing the same interest that has directly or indirectly acquired or sold an interest corresponding to 5% of the total number of shares of any type or class must disclose its share ownership or divestment to the CVM and the São Paulo Stock Exchange. In addition, a statement containing the required information must be published in the newspapers. Any subsequent increase or decrease by 5% or more in ownership of shares of any type or class must be similarly disclosed.

#### Memorandum and Articles of Association of PifCo

#### Register

PifCo is an exempted company incorporated with limited liability in the Cayman Islands under the Companies Law, as amended, with company registration number 76600. PifCo registered and filed its Memorandum and Articles of Association with the Registrar of Companies on September 24, 1997. The company adopted an Amended and Restated Memorandum and Articles of Association by sole shareholder special resolution on May 7, 2007, and adopted a further Amended and Restated Memorandum and Articles of Association by sole shareholder special resolution on February 23, 2008. PifCo was initially incorporated with the name Brasoil Finance Company, which name was changed by special resolution of PifCo s shareholders to Petrobras International Finance Company on September 25, 1997. The last amendment to PifCo s Memorandum & Articles of Association occurred on February 23, 2008, to amend the stated objects and purposes of PifCo.

#### **Objects and Purposes**

PifCo s Memorandum and Articles of Association grants PifCo full power and authority to:

- (i) conduct marketing, sales, financing, purchase, storage and transportation of petroleum, natural gas and all other hydrocarbons and by-products thereof, including ethanol and other biofuels, as well as the businesses of purchase, sale, leasing and rental of platforms, equipment and drilling units employed in the activities of exploration and production of petroleum and gas, and any business incidental thereto;
- (ii) to conduct and carry on in any and all parts of the world, through or by means of creating or subscribing for or otherwise acquiring securities in companies, associations, partnerships or trust estates and to exercise all voting and other rights arising in respect of such securities (including without limitation to effect the liquidation or dissolution of such entities) and to dispose of such securities, any of the objects noted above and any of the objects of communicating with investors (including discussions with analysts, securities firms and rating agencies) and to furnish information about PifCo in relation thereto, analyzing the capital market and identifying prospective investors, promoting PifCo s image in the market, coordinating with the SEC and assisting with the preparation of disclosure documents, engaging in other activities that relate to relations with third party investors and engaging in any other activities incidental thereto;
- (iii) to acquire, hold and dispose of securities for hedging, investment or speculative purposes and to exercise all voting and other rights arising in respect of such securities; and
- (iv) to borrow or raise money for any of the above referenced purposes of PifCo and, from time to time, to do or make, accept, endorse, execute and issue promissory notes, drafts, bills of exchange, warrants, bonds, debentures and to secure the payment of any thereof, and of the interest thereon, by the creation of security interests over of the property of PifCo, whether at the time owned or thereafter acquired and to sell, pledge or otherwise dispose of such bonds or other obligations of PifCo for its corporate purposes.

As a matter of Cayman Islands law, PifCo cannot trade in the Cayman Islands except in furtherance of the business carried on outside the Cayman Islands.

#### Directors

Directors may vote on a proposal, arrangement or contract in which they are interested. However, interested directors must declare the nature of their interest at a directors meeting. If the interested directors declare their interest, their votes are counted and they are counted in the quorum of such meeting.

The directors may, in PifCo s name, exercise their powers to borrow money, issue debt securities and to mortgage or charge any of the undertaking or property of PifCo and are generally responsible for its day-to-day management and administration.

Directors are not required to own shares.

Rights and Obligations of Shareholders

#### Dividends

Shareholders may declare dividends in a general meeting but the dividends cannot exceed the amount recommended by the directors. The directors may pay the shareholders interim dividends and may, before recommending any dividend, set aside reserves out of profits. The directors can invest these reserves in their discretion or employ them in PifCo s business.

Dividends may be paid in cash or in kind but may only be paid out of profits or, subject to certain restrictions of Cayman Islands law, a share premium account.

Voting Rights

Votes may be cast at a general meeting by a show of hands or by a poll. On a vote by a show of hands, each shareholder or shareholder represented by proxy has one vote. On a vote by a poll, each shareholder or shareholder represented by proxy has one vote for each share owned.

Directors are elected by ordinary resolution by the shareholders at general meetings or by a board resolution of the directors. Shareholders are not entitled to vote at a general meeting unless calls or other amounts payable on their shares have been paid. In lieu of voting on a matter at a general meeting, the shareholders entitled to vote on that matter may adopt the matter by signing a written resolution.

Redemption

PifCo may issue shares, which are redeemable by PifCo or by its shareholders, on such terms and in such manner as the directors may determine before the issuance of such shares. PifCo may repurchase its own shares on such terms and in such manner as the directors may determine and agree with the relevant shareholder.

Shareholder Rights Upon Liquidation

If PifCo is liquidated, the liquidator may (in accordance with an ordinary shareholder resolution):

set a fair value on PifCo s assets, divide all or part of PifCo s assets among the shareholders and determine how the assets will be divided among shareholders or classes of shareholders; and

vest all or part of PifCo s assets in trustees.

Shareholders will not be compelled to accept any securities on which there is a liability.

Calls on Shares

Directors may make calls on the shareholders to the extent any amounts remain unpaid on their shares. Each shareholder shall pay to the company the amounts called on such shares.

Change to Rights of Shareholders

Shareholders may change the rights of their class of shares by:

getting the written consent of two-thirds of the shareholders of that class; or

passing a special resolution at a meeting of the shareholders of that class.

There are no general limitations on the rights to own shares specified by the articles.

#### General Meetings

A general meeting may be convened:

by the directors at any time; or

by any two shareholders holding not less than 10% of the paid-up voting share capital of PifCo, by written request.

Notice of a general meeting is given to all shareholders.

All business carried out at a general meeting is considered special business except:

sanctioning a dividend;

consideration of the accounts, balance sheets, and ordinary report of the directors and auditors;

appointment and removal of directors; and

fixing of remuneration of the auditors.

Unanimous shareholder consent is required to carry out special business at a meeting unless notice of the special business is given in the notice of the meeting. A quorum of shareholders is required to be present at any meeting in order to carry out business. One or more shareholders holding at least a majority of the shares of PifCo that are present in person or represented by proxy is a quorum.

There is no requirement under Cayman Islands law to convene an annual meeting or to convene any general meeting of the shareholders. The directors are permitted to designate any general meeting of shareholders as an annual general meeting.

#### Liability of Shareholders

In normal circumstances, the liability of any shareholder to PifCo is limited to the amount, which such shareholder has agreed to pay in respect of the subscription of his shares.

#### Changes in Capital

PifCo may increase its authorized share capital by ordinary resolution. The new shares will be subject to all of the provisions to which the original shares are subject.

PifCo may also by ordinary resolution:

consolidate and divide all or any of its share capital into shares of a larger amount than its existing shares;

convert all or any part of its paid-up shares into stock and reconvert that stock into paid-up shares of any denomination;

split existing shares into shares of a smaller amount, subject to the provisions of Section 13 of the Companies Law; and

cancel any shares, which, at the date of the resolution, are not held or agreed to be held by any person and diminish the amount of its share capital by the amount of the shares so cancelled.

PifCo may reduce its share capital and any capital redemption reserve by special resolution in accordance with relevant provision of Cayman Islands law.

#### Indemnity

PifCo s directors and officers are indemnified out of its assets and funds against all actions, proceedings, costs, charges, expenses, losses, damages or liabilities which they incur or sustain in or regarding the conduct of PifCo s business or affairs in the execution or discharge of their respective duties, powers, authorities or discretions. Under PifCo s Memorandum of Association, directors and officers are excused from all liability to PifCo, except for any losses, which arise as a result of such party s own dishonesty.

#### Accounts

Accounts relating to PifCo s affairs are kept in such manner as may be determined from time to time by the directors and may be audited in such manner as may be determined from time to time by the directors. There is, however, no requirement as a matter of Cayman Islands law to have PifCo s accounts audited.

Amendment of the Articles

PifCo may, by special resolution of the shareholders, amend its memorandum and articles of association.

#### Transfer out of Jurisdiction

PifCo may, by special resolution of the shareholders, transfer out of the Cayman Islands into any jurisdiction permitting such transfer.

#### **Material Contracts**

#### Petrobras

For information concerning our material contracts, see Item 4. Information on the Company and Item 5. Operating and Financial Review and Prospects.

PifCo

For information concerning PifCo s material contracts, see Item 4. Information on the Company and Item 5. Operating and Financial Review and Prospects.

Statements contained in this annual report regarding the contents of any contract or other document are not necessarily complete, and, where the contract or other document is an exhibit to the annual report, each of these statements is qualified in all aspects by the provisions of the actual contract or other documents.

#### **Petrobras Exchange Controls**

There are no restrictions on ownership of the common or preferred shares by individuals or legal entities domiciled outside Brazil.

The right to convert dividend payments and proceeds from the sale of shares into foreign currency and to remit such amounts outside Brazil may be subject to restrictions under foreign investment legislation, which generally requires, among other things, that the relevant investments be registered with the Central Bank of Brazil. If any restrictions are imposed on the remittance of foreign capital abroad, they could hinder or prevent *Companhia Brasileira de liquidação e Custódia*, or CBLC, as custodian for the common and preferred shares represented by the American Depositary Shares, or registered holders who have exchanged American Depositary Shares for common shares or preferred shares, from converting dividends, distributions or the proceeds from any sale of such common shares or preferred shares, as the case may be, into U.S. dollars and remitting the U.S. dollars abroad.

Foreign investors may register their investment under Law No. 4,131 of September 3, 1962 or Resolution No. 2,689. Registration under Resolution No. 2,689 affords favorable tax treatment to foreign investors who are not resident in a tax haven, as defined by Brazilian tax laws. See Taxation Relating to Our ADSs and Common and Preferred Shares Brazilian Tax Considerations.

Under Resolution No. 2,689, foreign investors may invest in almost all financial assets and engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements are fulfilled. In accordance with Resolution No. 2,689, the definition of foreign investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered abroad.

Under Resolution No. 2,689, a foreign investor must:

appoint at least one representative in Brazil, with powers to perform actions relating to its investment;

appoint an authorized custodian in Brazil for its investments;

register as a foreign investor with the CVM; and

register its foreign investment with the Central Bank of Brazil.

Securities and other financial assets held by a Resolution No. 2,689 investor must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank of Brazil or the CVM. In addition, any transfer of securities held under Resolution No. 2,689 must be carried out in the stock exchanges or through organized over-the-counter markets licensed by the CVM, except for transfers resulting from a corporate reorganization or occurring upon the death of an investor by operation of law or will.

Holders of American Depositary Shares who have not registered their investment with the Central Bank of Brazil could be adversely affected by delays in, or refusals to grant, any required government approval for conversions of payments made in *reais* and remittances abroad of these converted amounts.

Annex III Regulations provide for the issuance of depositary receipts in foreign markets with respect to shares of Brazilian issuers. The depositary of the ADSs has obtained from the Central Bank of Brazil an electronic certificate of registration with respect to our existing ADR program. Pursuant to the registration, the custodian and the depositary will be able to convert dividends and other distributions with respect to the relevant shares represented by ADSs into foreign currency and to remit the proceeds outside Brazil. Following the closing of an international offering, the electronic certificate of registration will be amended by the depositary with respect to the ADSs sold in the international offering and will be maintained by the Brazilian custodian for the relevant shares on behalf of the depositary.

In the event that a holder of ADSs exchanges such ADSs for the underlying shares, the holder will be entitled to continue to rely on such electronic registration for five business days after the exchange. Thereafter, unless the relevant shares are held pursuant to Resolution No. 2,689 by a duly registered investor, or a holder of the relevant shares applies for and obtains a new certificate of registration from the Central Bank of Brazil, the holder may not be able to convert into foreign currency and to remit outside Brazil the proceeds from the disposition of, or distributions with respect to, the relevant shares, and the holder, if not registered under Resolution No. 2,689, will be subject to less favorable Brazilian tax treatment than a holder of ADSs. In addition, if the foreign investor resides in a tax haven jurisdiction, the investor will be also subject to less favorable tax treatment. See Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities and Taxation Relating to Our ADSs and Common and Preferred Shares Brazilian Tax Considerations.

#### PifCo

There are:

no governmental laws, decrees or regulations in Cayman Islands that restrict the export or import of capital, including dividend and other payments to holders of notes who are not residents of the Cayman Islands, provided that such holders are not resident in countries subject to certain sanctions by the United Nations or the European Union, and

no limitations on the right of nonresident or foreign owners imposed by Cayman Island law or PifCo s Memorandum of Association to hold or vote PifCo s shares.

#### **Taxation Relating to Our ADSs and Common and Preferred Shares**

The following summary contains a description of material Brazilian and U.S. federal income tax considerations that may be relevant to the purchase, ownership and disposition of preferred or common shares or ADSs by a holder. This summary does not describe any tax consequences arising under the laws of any state, locality or taxing jurisdiction other than Brazil and the United States.

This summary is based upon the tax laws of Brazil and the United States as in effect on the date of this annual report, which are subject to change (possibly with retroactive effect). This summary is also based upon the representations of the depositary and on the assumption that the obligations in the deposit agreement and any related documents will be performed in accordance with their respective terms.

This description is not a comprehensive description of all of the tax considerations that may be relevant to any particular investor, including tax considerations that arise from rules of general application to all taxpayers or to certain classes of investors or that are generally assumed to be known by investors. **Prospective purchasers of common or preferred shares or ADSs should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of common or preferred shares or ADSs.** 

There is no income tax treaty between the United States and Brazil. In recent years, the tax authorities of Brazil and the United States have held discussions that may culminate in such a treaty. We cannot predict, however, whether or when a treaty will enter into force or how it will affect the U.S. holders of common or preferred shares or ADSs.

#### Brazilian Tax Considerations

#### General

The following discussion summarizes the material Brazilian tax consequences of the acquisition, ownership and disposition of preferred or common shares or ADSs, as the case may be, by a holder that is not domiciled in Brazil, also called a non-Brazilian holder, for purposes of Brazilian taxation and, in the case of a holder of preferred or common shares, which has registered its investment in preferred or common shares at the Central Bank of Brazil as a U.S. dollar investment.

Under Brazilian law, investors may invest in the preferred or common shares under Resolution No. 2,689 or under Law No. 4,131 of September 3, 1962. Investments under Resolution No. 2,689 afford favorable tax treatment to foreign investors who are not resident in a tax haven jurisdiction. The rules of Resolution No. 2,689 allow foreign investors to invest in almost all instruments and to engage in almost all transactions available in the Brazilian financial and capital markets, provided that certain requirements are met. In accordance with Resolution No. 2,689, the definition of foreign investor includes individuals, legal entities, mutual funds and other collective investment entities, domiciled or headquartered abroad.

Pursuant to this rule, foreign investors must: (i) appoint at least one representative in Brazil with powers to perform actions relating to the foreign investment; (ii) complete the appropriate foreign investor registration form; (iii) register as a foreign investor with the CVM; and (iv) register the foreign investment with the Central Bank of Brazil.

Securities and other financial assets held by foreign investors pursuant to Resolution No. 2,689 must be registered or maintained in deposit accounts or under the custody of an entity duly licensed by the Central Bank of Brazil or the CVM. In addition, securities trading is restricted to transactions carried out in the stock exchanges or organized over-the-counter markets licensed by the CVM.

#### Taxation of Dividends

Dividends paid by us, including stock dividends and other dividends paid in property to the depositary in respect of the ADSs, or to a non-Brazilian holder in respect of the preferred or common shares, are currently not subject to withholding tax in Brazil.

We must pay to our shareholders (including holders of common or preferred shares or ADSs) interest on the amount of dividends payable to them, at the SELIC rate, from the end of each fiscal year through the date of effective payment of those dividends. These interest payments are considered as fixed-yield income and are subject to withholding income tax at varying rates depending on the length of period of interest accrual. The tax rate ranges from 15%, in case of interest accrued for a period greater than 720 days, to 22.5%, in case of interest accrued for a period up to 180 days. However, holders of ADSs and holders of common or preferred shares not resident or domiciled in tax haven jurisdictions investing under Resolution No. 2,689 are subject to such withholding tax at a reduced rate, currently at 15%. See Beneficiaries Residing or Domiciled in Tax Havens or Low Tax Jurisdictions.

#### Taxation on Interest on Shareholders Equity

Any payment of interest on shareholders equity to holders of ADSs or preferred or common shares, whether or not they are Brazilian residents, is subject to Brazilian withholding income tax at the rate of 15% at the time we record such liability, whether or not the effective payment is made at that time. See Memorandum and Articles of Incorporation of Petrobras Payment of Dividends and Interest on Shareholders Equity. In the case of non-Brazilian residents that are resident in a tax haven jurisdiction, the applicable withholding income tax rate is 25%. See

Beneficiaries Residing or Domiciled in Tax Havens or Low Tax Jurisdiction. The payment of interest at the SELIC rate that is applicable to payments of dividends applies equally to payments of interest on shareholders equity. The determination of whether or not we will make distributions in the form of interest on shareholders equity or in the form of dividends is made by our board of directors at the time distributions are to be made. We cannot determine how our board of directors will make these determinations in connection with future distributions.

#### Taxation of Gains

For purposes of Brazilian taxation, there are two types of non-Brazilian holders of ADSs or preferred or common shares: (i) non-Brazilian holders that are not resident or domiciled in a tax haven jurisdiction, and that, in the case of holders of preferred or common shares, are registered before the Central Bank of Brazil and the CVM to invest in Brazil in accordance with Resolution No. 2,689; and (ii) other non-Brazilian holders, which include any and all non-residents of Brazil who invest in equity securities of Brazilian companies through any other means (including under Law No. 4,131 of 1962) and all types of investors that are located in tax haven jurisdictions. The investors identified in clause (i) above are subject to favorable tax treatment in Brazil, as described below. See Beneficiaries Residing or Domiciled in Tax Havens or Low Tax Jurisdictions.

According to Law no. 10,833, dated December 29, 2003, capital gains realized on the disposition of tangible assets located in Brazil, by non-Brazilian residents, whether or not to other non-residents and whether made outside or within Brazil, are subject to taxation in Brazil at a rate of 15% (a rate of 25% is applicable if realized by investors resident in a tax haven jurisdiction, i.e. a country that does not impose any income tax or that imposes tax at a maximum rate of less than 20%). We understand the ADSs do not fall within the definition of tangible assets located in Brazil for the purposes of this law, but there is still no pronunciation from tax authorities nor judicial court rulings in this respect. Therefore, we are unable to predict whether such understanding will prevail in the courts of Brazil.

The deposit of preferred or common shares in exchange for ADSs may be subject to Brazilian capital gains at the rate of 15% if the amount previously registered with the Central Bank of Brazil as a foreign investment in the preferred or common shares is lower than:

(1) the average price per preferred or common share on a Brazilian stock exchange on which the greatest number of such shares were sold on the day of deposit; or

(2) if no preferred or common shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of preferred or common shares were sold in the 15 trading sessions immediately preceding such deposit. In such a case, the difference between the amount previously registered and the average price of the preferred or common shares calculated as above, will be considered a capital gain. Investors registered under Resolution No. 2,689 and not located in a tax haven jurisdiction are exempt from this type of taxation. The withdrawal of ADSs in exchange for preferred or common shares is not subject to Brazilian tax. On receipt of the underlying preferred or common shares, the non-Brazilian holder registered under Resolution No. 2,689 will be entitled to register the U.S. dollar value of such shares with the Central Bank of Brazil as described below in Registered Capital. Non-Brazilian holders are not subject to tax in Brazil on gains realized on sales of preferred or common shares that occur abroad to non-Brazilian holders.

Non-Brazilian holders which are not located in a tax haven jurisdiction are subject to income tax imposed at a rate of 15% on gains realized on sales or exchanges of the preferred or common shares that occur in Brazil or with a resident of Brazil, other than in connection with transactions on the Brazilian stock, future or commodities exchanges. With respect to proceeds of a redemption or of a liquidating distribution with respect to the preferred or common shares, the difference between the amount effectively received by the shareholder and the amount of foreign currency registered with the Central Bank of Brazil, accounted for in *reais* at the commercial market rate on the date of the redemption or liquidating distribution, will be also subject to income tax at a rate of 15% given that such transactions are treated as a sale or exchange not carried out on the Brazilian stock, future and commodities exchanges.

Gains realized arising from transactions on the Brazilian stock, future or commodities exchanges by an investor registered under Resolution No. 2,689 who is not located in a tax haven jurisdiction are exempt from Brazilian income tax. Otherwise, gains realized on transactions related to the Brazilian stock, future or commodities exchanges are subject to income tax at a rate of 20%.

Therefore, non-Brazilian holders are subject to income tax imposed at a rate of 20% on gains realized on sales or exchanges of preferred or common shares that occur on the stock exchange unless such a sale is made by a non-Brazilian holder who is not resident in a tax haven jurisdiction and:

(1) such sale is made within five business days of the withdrawal of such preferred or common shares in exchange for ADSs and the proceeds thereof are remitted abroad within such five-day period; or

(2) such sale is made under Resolution No. 2,689 by registered non-Brazilian holders who obtain registration with the CVM.

In these two cases, the transaction will not be subject to taxation in Brazil. The gain realized is for tax purposes the difference between the amount in *reais* realized on the sale or exchange and the acquisition cost measured in *reais*, without any adjustment to account for inflation of the shares sold. The gain realized as a result of a transaction that occurs other than on the stock exchange will be the positive difference between the amount realized on the sale or exchange and the acquisition cost of the preferred or common shares, both such values to be taken into account in *reais*. There are reasonable grounds, however, to hold that the gain realized should be calculated based on the foreign currency amount registered with the Central Bank of Brazil, such foreign currency amount to be translated into *reais* at the commercial market rate on the date of such sale or exchange.

Any exercise of preemptive rights relating to the preferred or common shares will not be subject to Brazilian taxation. Any gain on the sale or assignment of preemptive rights relating to the preferred or common shares by the depositary on behalf of holders of the ADSs will be subject to Brazilian income taxation according to the same rules applicable to the sale or disposition of preferred or common shares, unless such sale or assignment is performed on the stock exchange by an investor under Resolution No. 2,689 who is not resident in a tax haven jurisdiction, in which case the gains are exempt from income tax.

There is no assurance that the current preferential treatment for holders of the ADSs and some non-Brazilian holders of the preferred or common shares under Resolution No. 2,689 will continue in the future.

#### Taxation of Foreign Exchange Transactions (IOF/Câmbio)

Under Law No. 8,894 of June 21, 1994, and Decree No. 6,306 of December 14, 2007, the conversion into Brazilian currency of proceeds received by a Brazilian entity from a foreign investment in the Brazilian securities market (including those in connection with an investment in preferred or common shares or the ADSs and those under Resolution No. 2, 689) and the conversion into foreign currency of proceeds received by a non-Brazilian holder is subject to a tax on exchange transactions known as IOF/Câmbio, which is currently applicable at a zero percent rate in most transactions made abroad. However, according to Law No. 8,894, the IOF/Câmbio rate may be increased at any time to a maximum of 25% by a decision of the Minister of Finance, but only in relation to exchange transactions carried out after the increase of the applicable rate.

#### Taxation on Bonds and Securities Transactions (IOF/Títulos)

Law No. 8,894 of June 21, 1994, and Decree No. 6,306 of December 14, 2007, created the Tax on Bonds and Securities Transactions, or IOF/Títulos, which may be imposed on any transactions involving bonds and securities carried out in Brazil, even if these transactions are performed on the Brazilian stock, futures or commodities exchange. As a general rule, the rate of this tax is currently zero but the Brazilian government may increase such rate up to 1.5% per day, but only in relation to transactions carried out after the increase of the applicable rate.

#### Other Brazilian Taxes

There are no Brazilian inheritance, gift or succession taxes applicable to the ownership, transfer or disposition of preferred or common shares or ADSs by a non-Brazilian holder, except for gift and inheritance taxes which are levied by some states of Brazil on gifts made or inheritances bestowed by individuals or entities not resident or domiciled in Brazil to individuals or entities resident or domiciled within such states in Brazil. There are no Brazilian stamp, issue, registration, or similar taxes or duties payable by holders of preferred or common shares or ADSs.

#### Table of Contents

#### Beneficiaries Resident or Domiciled in Tax Havens or Low Tax Jurisdictions

Law No. 9,779 of January 1, 1999 states that, except for limited prescribed circumstances, income derived from transactions by a beneficiary, resident or domiciliary of a country considered a tax haven is subject to withholding income tax at the rate of 25%. Tax havens are considered to be countries which do not impose any income tax or which impose such tax at a maximum rate of less than 20%. Accordingly, if the distribution of interest attributed to shareholders equity is made to a beneficiary resident or domiciled in a tax haven jurisdiction, the applicable income tax rate will be 25% instead of 15%. Capital gains are not subject to this 25% tax, even if the beneficiary is resident in a tax haven jurisdiction. See Taxation of Gains.

#### Registered Capital

The amount of an investment in preferred or common shares held by a non-Brazilian holder who obtains registration under Resolution No. 2,689, or by the depositary representing such holder, is eligible for registration with the Central Bank of Brazil; such registration (the amount so registered being called registered capital) allows the remittance outside Brazil of foreign currency, converted at the commercial market rate, acquired with the proceeds of distributions on, and amounts realized with respect to dispositions of, such preferred or common shares. The registered capital for each preferred or common share purchased as part of the international offering or purchased in Brazil after the date hereof, and deposited with the depositary will be equal to its purchase price (in U.S. dollars). The registered capital for a preferred or common share that is withdrawn upon surrender of an ADS will be the U.S. dollar equivalent of:

the average price of a preferred or common share on the Brazilian stock exchange on which the greatest number of such shares were sold on the day of withdrawal; or

if no preferred or common shares were sold on that day, the average price on the Brazilian stock exchange on which the greatest number of preferred or common shares were sold in the 15 trading sessions immediately preceding such withdrawal.

The U.S. dollar value of the average price of preferred or common shares is determined on the basis of the average of the U.S. dollar/*real* commercial market rates quoted by the Central Bank of Brazil information system on that date (or, if the average price of preferred or common shares is determined under the second option above, the average of such average quoted rates on the same 15 dates used to determine the average price of preferred or common shares).

A non-Brazilian holder of preferred or common shares may experience delays in effecting such registration, which may delay remittances abroad. Such a delay may adversely affect the amount, in U.S. dollars, received by the non-Brazilian holder. See Item 3. Key Information Risk Factors Risks Relating to Our Equity and Debt Securities. *U.S. Federal Income Tax Considerations* 

The statements regarding U.S. tax law set forth below are based on U.S. law as in force on the date of this annual report, and changes to such law subsequent to the date of this annual report may affect the tax consequences described herein. This summary describes the principal tax consequences of the ownership and disposition of common or preferred shares or ADSs, but it does not purport to be a comprehensive description of all of the tax consequences that may be relevant to a decision to hold or dispose of common or preferred shares or ADSs. This summary applies only to purchasers of common or preferred shares or ADSs who will hold the common or preferred shares or ADSs as capital assets and does not apply to special classes of holders such as dealers in securities or currencies, holders whose functional currency is not the U.S. dollar, holders of 10% or more of our shares (taking into account shares held directly or through depositary arrangements), tax-exempt organizations, financial institutions, holders liable for the alternative minimum tax, securities traders who elect to account for their investment in common or preferred shares or ADSs on a mark-to-market basis, and persons holding common or preferred shares or ADSs in a hedging transaction or as part of a straddle or conversion transaction.

# EACH HOLDER SHOULD CONSULT SUCH HOLDER SOWN TAX ADVISOR CONCERNING THE OVERALL TAX CONSEQUENCES TO IT, INCLUDING THE CONSEQUENCES UNDER LAWS OTHER THAN U.S. FEDERAL INCOME TAX LAWS, OF AN INVESTMENT IN COMMON OR PREFERRED SHARES OR ADSs.

Shares of our preferred stock will be treated as equity for U.S. federal income tax purposes. In general, for purposes of the U.S. Internal Revenue Code of 1986 (the Code ), a holder of an ADS will be treated as the holder of the shares of common or preferred stock represented by those ADSs, and no gain or loss will be recognized if you exchange an ADS for the shares of common or preferred stock represented by that ADS.

In this discussion, references to ADSs refer to ADSs with respect to both common and preferred shares, and references to a U.S. holder are to a holder of an ADS that:

is a citizen or resident of the United States of America,

is a corporation organized under the laws of the United States of America or any state thereof; or

is otherwise subject to U.S. federal income taxation on a net basis with respect to the shares or the ADS. *Taxation of Distributions* 

A U.S. holder will recognize ordinary dividend income for U.S. federal income tax purposes in an amount equal to the amount of any cash and the value of any property we distribute as a dividend to the extent that such distribution is paid out of our current or accumulated earnings and profits, as determined for U.S. federal income tax purposes, when such distribution is received by the custodian, or by the U.S. holder in the case of a holder of common or preferred shares. The amount of any distribution will include the amount of Brazilian tax withheld on the amount distributed, and the amount of a distribution paid in *reais* will be measured by reference to the exchange rate for converting *reais* into U.S. dollars in effect on the date the distribution is received by the custodian, or U.S. holder in the case of a holder of common or preferred shares. If the custodian, or U.S. holder in the case of a holder of common or preferred shares. If the custodian, or U.S. holder in the case of a holder of common or preferred shares. If the custodian, or U.S. holder in the case of a holder of common or preferred shares. If the custodian, or U.S. holder in the case of a holder of common or preferred shares. If the custodian, or U.S. holder in the case of a holder of common or preferred shares. If or convert such *reais* into U.S. dollars on the date it receives them, it is possible that the U.S. holder will recognize foreign currency loss or gain, which would be ordinary loss or gain, when the *reais* are converted into U.S. dollars. Dividends paid by us will not be eligible for the dividends received deduction allowed to corporations under the Code.

Subject to certain exceptions for short-term and hedged positions, the U.S. dollar amount of dividends received by an individual prior to January 1, 2011, with respect to the ADSs will be subject to taxation at a maximum rate of 15% if the dividends are qualified dividends. Dividends paid on the ADSs will be treated as qualified dividends if (i) the ADSs are readily tradable on an established securities market in the United States and (ii) the Company was not, in the year prior to the year in which the dividend was paid, and is not, in the year in which the dividend is paid, a passive foreign investment company (PFIC). The ADSs are listed on the New York Stock Exchange, and will qualify as readily tradable on an established securities market in the United States so long as they are so listed. Based on the Company s audited financial statements and relevant market and shareholder data, the Company believes that it was not treated as a PFIC for U.S. federal income tax purposes with respect to its 2006 or 2007 taxable year. In addition, based on the Company s audited financial statements and its current expectations regarding the value and nature of its assets, the sources and nature of its income, and relevant market and shareholder data, the Company does not anticipate becoming a PFIC for its 2008 taxable year. Based on existing guidance, it is not clear whether dividends received with respect to the shares will be treated as qualified dividends, because the shares are not themselves listed on a U.S. exchange. In addition, the U.S. Treasury has announced its intention to promulgate rules pursuant to which holders of ADSs and intermediaries through whom such securities are held will be permitted to rely on certifications from issuers to treat dividends as qualified for tax reporting purposes. Because such procedures have not yet been issued, it is not clear whether the Company will be able to comply with the procedures.

Distributions out of earnings and profits with respect to the shares or ADSs generally will be treated as dividend income from sources outside of the United States and generally will be treated as passive category income for foreign tax credit purposes. Subject to certain limitations, Brazilian income tax withheld in connection with any distribution with respect to the shares or ADSs may be claimed as a credit against the U.S. federal income tax liability of a U.S.

holder if such U.S. holder elects for that year to credit all foreign income taxes. Alternatively, such Brazilian withholding tax may be taken as a deduction against taxable income. Foreign tax credits may not be allowed for withholding taxes imposed in respect of certain short-term or hedged positions in securities or in respect of arrangements in which a U.S. holder s expected economic profit is insubstantial. U.S. holders should consult their own tax advisors concerning the implications of these rules in light of their particular circumstances.

Holders of ADSs that are foreign corporations or nonresident alien individuals (non-U.S. holders) generally will not be subject to U.S. federal income tax or withholding tax on distributions with respect to shares or ADSs that are treated as dividend income for U.S. federal income tax purposes unless such dividends are effectively connected with the conduct by the holder of a trade or business in the United States.

Holders of shares and ADSs should consult their own tax advisers regarding the availability of the reduced dividend tax rate in the light of the considerations discussed above and their own particular circumstances.

#### Taxation of Capital Gains

Upon the sale or other disposition of a share or an ADS, a U.S. holder will generally recognize gain or loss for U.S. federal income tax purposes. The amount of the gain or loss will be equal to the difference between the amount realized in consideration for the disposition of the share or the ADS and the U.S. holder s tax basis in the share or the ADS. Such gain or loss generally will be subject to U.S. federal income tax and will be treated as capital gain or loss. The net amount of long-term capital gain recognized by an individual holder before January 1, 2011 generally is subject to taxation at a maximum rate of 15%. Capital losses may be deducted from taxable income, subject to certain limitations.

A non-U.S. holder will not be subject to U.S. federal income tax or withholding tax on gain realized on the sale or other disposition of a share or an ADS unless:

such gain is effectively connected with the conduct by the holder of a trade or business in the United States; or

such holder is an individual who is present in the United States of America for 183 days or more in the taxable year of the sale and certain other conditions are met.

#### Backup Withholding and Information Reporting

Dividends paid on, and proceeds from the sale or other disposition of, the ADSs or common or preferred shares to a U.S. holder generally may be subject to the information reporting requirements of the Code and may be subject to backup withholding unless the U.S. holder provides an accurate taxpayer identification number or otherwise establishes an exemption. The amount of any backup withholding collected from a payment to a U.S. holder will be allowed as a credit against the U.S. holder s U.S. federal income tax liability and may entitle the U.S. holder to a refund, provided that certain required information is furnished to the Internal Revenue Service.

A non-U.S. holder generally will be exempt from these information reporting requirements and backup withholding tax, but may be required to comply with certain certification and identification procedures in order to establish its eligibility for such exemption.

#### Taxation Relating to PifCo s Notes

The following summary contains a description of material Cayman Islands, Brazilian and U.S. federal income tax considerations that may be relevant to the purchase, ownership, and disposition of PifCo s debt securities. This summary does not describe any tax consequences arising under the laws of any state, locality or taxing jurisdiction other than the Cayman Islands, Brazil and the United States.

This summary is based on the tax laws of the Cayman Islands, Brazil and the United States as in effect on the date of this annual report, which are subject to change (possibly with retroactive effect). This description is not a comprehensive description of all of the tax considerations that may be relevant to any particular investor, including tax considerations that arise from rules of general application to all taxpayers or to certain classes of investors or that are generally assumed to be known by investors. **Prospective purchasers of notes should consult their own tax advisors as to the tax consequences of the acquisition, ownership and disposition of notes.** 

There is no tax treaty to avoid double taxation between the Cayman Islands and the United States, the Cayman Islands and Brazil or Brazil and the United States. In recent years, the tax authorities of Brazil and the United States have held discussions that may culminate in such a treaty. We cannot predict, however, whether or when a treaty will enter into force or how it will affect the U.S. holders of notes.

#### Cayman Islands Taxation

Under current law, PifCo is not subject to income, capital, transfer, sales or other taxes in the Cayman Islands.

PifCo was incorporated as an exempted company under the laws of the Cayman Islands on September 24, 1997. PifCo has received an Undertaking as to Tax Concessions pursuant to Section 6 of the Tax Concessions Law (1999 Revision) which provides that, for a period of twenty years from the date thereof no law hereafter enacted in the Cayman Islands imposing any tax or duty to be levied on income or on capital assets, gains or appreciation will apply to any of PifCo s income or property and which is deemed to provide that no tax is to be levied on profits, income, gains or appreciations or which is in the nature of estate duty or inheritance tax shall be payable or in respect of shares, debentures or other of PifCo s obligations, or by way of withholding of any part of a payment of principal due under a debenture or other of PifCo s obligations.

No Cayman Islands withholding tax applies to distributions by PifCo in respect of the notes. Noteholders are not subject to any income, capital, transfer, sales or other taxes in the Cayman Islands in respect of their purchase, holding or disposition of the notes.

Noteholders whose notes are brought into or issued in the Cayman Islands will be liable to pay stamp duty of up to C.I.\$250 on each note, unless stamp duty of C.I.\$500 has been paid in respect of the entire issue of notes (in which case no further stamp duty in respect of such notes is payable).

#### Brazilian Taxation

The following discussion is a summary of the Brazilian tax considerations relating to an investment in the notes by a non-resident of Brazil. The discussion is based on the tax laws of Brazil as in effect on the date hereof and is subject to any change in Brazilian law that may come into effect after such date. The information set forth below is intended to be a general discussion only and does not address all possible consequences relating to an investment in the notes.

#### INVESTORS SHOULD CONSULT THEIR OWN TAX ADVISERS AS TO THE CONSEQUENCES OF PURCHASING THE NOTES, INCLUDING, WITHOUT LIMITATION, THE CONSEQUENCES OF THE RECEIPT OF INTEREST AND THE SALE, REDEMPTION OR REPAYMENT OF THE NOTES OR COUPONS.

Generally, an individual, entity, trust or organization domiciled for tax purposes outside Brazil (a Non-resident ) is taxed in Brazil only when income is derived from Brazilian sources. Therefore, any gains or income paid by PifCo in respect of the notes issued by it in favor of Non-resident noteholders are not subject to Brazilian taxes.

Interest (including original issuer discount, or OID, fees, commissions, expenses and any other income payable by a Brazilian resident to a non-resident) is generally subject to income tax withheld at source. Currently, the rate of withholding tax is 15% or such other lower rate as provided for in an applicable tax treaty between Brazil and another country. If the recipient of the payment is domiciled in a tax haven jurisdiction, as defined by Brazilian tax regulations, the rate will be 25%.

If the payments with respect to the notes are made by a Brazilian source, the noteholders will be indemnified so that, after payment of all applicable Brazilian taxes collectable by withholding, deduction or otherwise, with respect to principal, interest (including the OID) and additional amounts payable with respect to the notes (plus any interest and penalties thereon), a noteholder will retain an amount equal to the amounts that such noteholder would have retained had no such Brazilian taxes (plus interest and penalties thereon) been payable. The Brazilian obligor will, subject to certain exceptions, pay additional amounts in respect of such withholding or deduction so that the holder receives the net amount due.

According to Law no. 10,833, dated December 29, 2003, capital gains realized on the disposition of tangible assets located in Brazil, by non-Brazilian residents, whether or not to other non-residents and whether made outside or within Brazil, are subject to taxation in Brazil at a rate of 15% (a rate of 25% is applicable if realized by investors resident in a tax haven jurisdiction, i.e. a country that does not impose any income tax or that imposes tax at a maximum rate of less than 20%). We understand the notes do not fall within the definition of tangible assets located in Brazil for the purposes of this law, but there is still no pronunciation from tax authorities nor judicial court rulings in this respect. Therefore, we are unable to predict whether such understanding will prevail in the courts of Brazil. Generally, there are no inheritance, gift, succession, stamp, or other similar taxes in Brazil with respect to the ownership, transfer, assignment or any other disposition of the notes by a Non-resident, except for gift and inheritance

taxes imposed by some Brazilian states on gifts or bequests by individuals or entities not domiciled or residing in

Brazil to individuals or entities not domiciled or residing within such states. *U.S. Federal Income Taxation* 

The following summary sets forth certain United States federal income tax considerations that may be relevant to a holder of a note that is, for U.S. federal income purposes, a citizen or resident of the United States or a domestic corporation or that otherwise is subject to the United States federal income tax on a net income basis in respect of the notes (a U.S. holder ). This summary is based upon the Code, its legislative history, existing and proposed U.S. Treasury regulations promulgated thereunder, published rulings by the U.S. Internal Revenue Service, or the IRS, and court decisions, all in effect as of the date hereof, all of which authorities are subject to change or differing interpretations could apply retroactively. This summary does not purport to discuss all aspects of the United States federal income taxation which may be relevant to particular investors, such as financial institutions, insurance companies, dealers or traders in securities or currencies, regulated investment companies, tax-exempt organizations, certain short-term holders of notes, persons that hedge their exposure in the notes or hold notes as part of a position in a straddle or as part of a hedging transaction or conversion transaction for U.S. federal tax purposes, persons that enter into a constructive sale transaction with respect to the notes or U.S. holder whose functional currency as defined in Section 985 of the code is not the U.S. dollar. U.S. holders should be aware that the U.S. federal income tax consequences of holding the notes may be materially different for investors described in the prior sentence.

In addition, this summary does not discuss any foreign, state or local tax considerations. This summary only applies to original purchasers of notes who purchase notes at the original issue price and hold the notes as capital assets (generally, property held for investment) within the meaning of Section 1221 of the Code.

## EACH HOLDER SHOULD CONSULT SUCH HOLDER SOWN TAX ADVISOR CONCERNING THE OVERALL TAX CONSEQUENCES TO IT, INCLUDING THE CONSEQUENCES UNDER LAWS OTHER THAN U.S. FEDERAL INCOME TAX LAWS, OF AN INVESTMENT IN THE NOTES.

#### Payments of Interest

Payments of qualified stated interest (as defined below) on a note (including additional amounts, if any) generally will be taxable to a U.S. holder as ordinary interest income when such interest is accrued or received, in accordance with the U.S. holder s regular method of tax accounting. In general, if the issue price of a note is less than the stated redemption price at maturity by more than a *de minimis* amount, such note will be considered to have OID. The issue price of a note is the first price at which a substantial amount of such notes are sold to investors. The stated redemption price at maturity of a note generally includes all payments other than payments of qualified stated interest (as defined below).

In general, each U.S. holder of a note, whether such holder uses the cash or the accrual method of tax accounting, will be required to include in gross income as ordinary interest income the sum of the daily portions of OID on the note for all days during the taxable year that the U.S. holder owns the note. The daily portions of OID on a note are determined by allocating to each day in any accrual period a ratable portion of the OID allocable to that accrual period. In general, in the case of an initial holder, the amount of OID on a note allocable to each accrual period is determined by (a) multiplying the adjusted issue price, as defined below, of the note at the beginning of the accrual period by the yield to maturity of the note, and (b) subtracting from that product the amount of qualified stated interest allocable to that accrual period. U.S. holders should be aware that they generally must include OID in gross income as ordinary

interest income for U.S. federal income tax purposes as it accrues, in advance of the receipt of cash attributable to that income. The adjusted issue price of a note at the beginning of any accrual period will generally be the sum of its issue price (generally including accrued interest, if any) and the amount of OID allocable to all prior accrual periods, reduced by the amount of all payments other than payments of qualified stated interest (if any) made with respect to such note in all prior accrual periods. The term qualified stated interest generally means stated interest that is unconditionally payable in cash or property (other than debt instruments of the issuer) at least annually during the entire term of a note at a single fixed rate of interest, or subject to certain conditions, based on one or more interest indices.

135

Interest income, including OID, in respect of the notes will constitute foreign source income for United sates federal income tax purposes and, with certain exceptions, will be treated separately, together with other items of passive category income, for purposes of computing the foreign tax credit allowable under the United states federal income tax laws. The calculation of foreign tax credits, involves the application complex of rules that depend on a U.S. holder s particular circumstances. U.S. holders should consult their own tax advisors regarding the availability of foreign tax credits and the treatment of additional amounts.

#### Sale or Disposition of Notes

A U.S. holder generally will recognize capital gain or loss upon the sale, exchange, retirement or other disposition of a note in an amount equal to the difference between the amount realized upon such sale, exchange, retirement or other disposition (other than amounts attributable to accrued qualified stated interest, which will be taxed as such) and such U.S. holder s adjusted tax basis in the note. A U.S. holder s adjusted tax basis in the note generally will equal the U.S. holder s cost for the note increased by any amounts included in gross income by such U.S. holder as OID and reduced by any payments other than payments of qualified stated interest on that note. Gain or loss realized by a U.S. Holder on the sale, exchange, retirement or other disposition of a note generally will be the United States source gain or loss for the United States federal income tax purposes unless it is attributable to an office or other fixed place of business outside the United States and certain other conditions are met. The gain or loss realized by a U.S. holder will be capital gain or loss, and will be long-term capital gain or loss if the notes were held for more than one year. The net amount of long-term capital gain recognized by an individual holder before January 1, 2011 generally is subject to taxation at a maximum rate of 15%.

#### Backup Withholding and Information Reporting

A U.S. holder may, under certain circumstances, be subject to backup withholding with respect to certain payments to that U.S. holder, unless the holder (i) is a corporation or comes within certain other exempt categories, and demonstrates this fact when so required, or (ii) provides a correct taxpayer identification number, certifies that it is not subject to backup withholding and otherwise complies with applicable requirements of the backup withholding rules. Any amount withheld under these rules generally will be creditable against the U.S. holder s U.S. federal income tax liability. While Non-U.S. holders generally are except from backup withholding, a Non-U.S. holder may, in certain circumstances, be required to comply with certain information and identification procedures in order to prove entitlement to this exemption.

#### Non-U.S. Holder

A holder or beneficial owner of a note that is not a U.S. holder (a non-U.S. holder ) generally will not be subject to U.S. federal income or withholding tax on interest received on the notes. In addition, a non-U.S. holder will not be subject to U.S. federal income or withholding tax on gain realized on the sale of notes unless, in the case of gain realized by an individual non-U.S. holder, the non-U.S. holder is present in the United States for 183 days or more in the taxable year of the sale and certain other conditions are met.

#### **Documents on Display**

We are subject to the information requirements of the Securities Exchange Act of 1934, as amended, and accordingly file reports and other information with the SEC. Reports and other information filed by us with the SEC may be inspected and copied at the public reference facilities maintained by the SEC at 100 F Street, N.E., Washington, D.C. 20549. You can obtain further information about the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. You may also inspect Petrobras reports and other information at the offices of the New York Stock Exchange, 11 Wall Street, New York, New York 10005, on which Petrobras American Depositary Shares are listed. Our SEC filings are also available to the public from the SEC s website at http://www.sec.gov. For further information on obtaining copies of Petrobras public filings at the New York Stock Exchange, you should call (212) 656-5060. We also file financial statements and other periodic reports with the CVM.

### Item 11. Qualitative and Quantitative Disclosures about Market Risk

#### Petrobras

#### Risk Management

We are exposed to a number of market and credit risks arising from our normal business activities. Market risk is the possibility that changes in interest rates, currency exchange rates or commodity prices will adversely affect the value of our financial assets, liabilities or expected future cash flows. Credit risk is the failure of a counterparty to perform a payment obligation under a commercial contract or a derivative contract.

We use derivative instruments to address market risks related to commodity prices and currency exchange rates. Such derivative instruments are used only to offset market exposures, and are not used for trading purposes. We do not use derivative instruments to manage our exposure to changes in interest rates. Our executive officers manage market risk. We address credit risk by following rigid rules, overseen by a Credit Committee, to evaluate counterparties and define proper guarantees.

We have a Risk Management Committee that evaluates our risk exposures and establishes guidelines that we use to measure, monitor, and manage risk related to our activities. The Risk Management Committee is comprised of members of all our business areas.

#### Commodity Price Risk

Our sales of crude oil and oil products are based on international prices, which exposes us to price fluctuations in international markets.

We enter into derivative transactions, primarily energy futures contracts, forwards, swaps, and options, in order to mitigate the impact of such fluctuations. Our derivatives contracts provide economic hedges for anticipated crude oil and byproducts purchases and sales in the international markets, generally forecast to occur within a 30- to 360-day period. Our exposure on these contracts is limited to the difference between contract value and market value on the volumes hedged.

The open positions on the futures market, compared to spot market value, resulted in recognized losses of U.S.\$24.7 million in 2007, U.S.\$1.6 million in 2006 and U.S.\$0.6 million in 2005. See Note 20 to our audited consolidated financial statements for more information about our commodity derivative transactions.

137

The following table sets forth a sensitivity analysis demonstrating the net change in fair value of a 10% adverse change in the price of the underlying commodity as of December 31, 2007, which is a 10% increase in the price of the underlying commodity for options, futures and swaps.

(1) Fair value

represents an estimate of gain or loss that would be realized if contracts were settled at the balance sheet date.

Interest Rate and Exchange Rate Risk

The interest rate risk to which we are exposed is a function of our long-term debt and, to a lesser extent, our short-term debt. Our long-term debt consists principally of notes and borrowings incurred primarily in connection with capital expenditures and investments in exploration and development projects and loans to affiliated companies. Our short-term debt consists principally of U.S. dollar denominated import and export financing and working capital borrowings from commercial banks. In general, our foreign currency floating rate debt is principally subject to fluctuations in LIBOR. Our floating rate debt denominated in *reais* is principally subject to fluctuations in the *Taxa de Juros de Longo Prazo* (Brazilian long-term interest rate, or TJLP), as fixed by the National Monetary Council.

We do not currently utilize derivative instruments to manage our exposure to interest rate fluctuation. We have been considering various forms of derivatives to reduce our exposure to interest rate fluctuations and may utilize these financial instruments in the future.

The exchange rate risk to which we are exposed is limited to the balance sheet and derives principally from the incidence of non-*real* denominated obligations in our debt portfolio. See Item 5. Operating and Financial Review and Prospects Inflation and Exchange Rate Variation.

138

The table below provides summary information regarding our exposure to interest rate and exchange rate risk in our total debt portfolio for 2007 and 2006. Total debt portfolio includes long-term debt, capital leases, project financings, and current portions thereof, and short-term debt.

#### Table of Contents

139

The table below provides information about our total debt obligations as of December 31, 2007, which are sensitive to changes in interest rates and exchange rates. This table presents, by expected maturity dates and currency, the principal cash flows and related average interest rates of these obligations. Variable interest rates are based on the applicable reference rate, LIBOR, TJLP, IGP-M or CDI (*Certificado de Depósito Interbancário*, or Interbank Deposit Certificate) as of December 31, 2007.

Our foreign currency risk management strategy includes the use of derivative instruments to protect against foreign exchange rate volatility, which may impact the value of certain of our obligations. The Company s zero cost foreign exchange collars were settled on November 5, 2007, with a cash receipt of U.S.\$38 million. PifCo

PifCo faces market risks in the normal course of business, including interest rate risk, risk related to changes in oil and oil products prices, and risk related to changes in foreign exchange rates. PifCo makes limited use of derivatives to manage its exposure to these market risks. PifCo does not hold derivative instruments for trading purposes. Commodity Price Risk

PifCo enters into derivative transactions in order to mitigate the impact of fluctuations in the price of crude oil and byproducts. PifCo uses futures contracts, swaps and options to protect its margins in anticipation of purchases and sales in the international markets, as shown in the sensitivity analysis above.

#### Interest Rate and Exchange Rate Risk

PifCo is not subject to material foreign exchange rate risk because 94% of its debt is dollar denominated. PifCo does not enter into derivative contracts or make other arrangements to hedge against interest rate risk.

#### 140

The table below sets forth the amounts and related weighted average annual interest rates by expected maturity dates for PifCo s long-term debt obligations at December 31, 2007:

								Fair Value at Year End

PifCo s short-term debt borrowings are derived mainly from commercial banks and include trade lines of credit and commercial paper, which are primarily intended for the purchase of crude oil and oil products. The weighted average annual interest rate for PifCo s short-term debt at December 31, 2007, was 5.59%, compared to 6.76% at December 31, 2006.

The table below sets forth the value of PifCo s cross currency swap, in which it swaps principal and interest payments on Yen-denominated funding into U.S. dollar amounts. The change in fair value indicates that the hedging instrument is highly effective.

#### **Item 14. Material Modifications to the Rights of Security Holders and Use of Proceeds** None.

#### Item 15. Controls and Procedures

#### **Evaluation of Disclosure Controls and Procedures**

Both PifCo and we have evaluated, with the participation of our Chief Executive Officer and Chief Financial Officer, the effectiveness of our disclosure controls and procedures as of December 31, 2007. There are inherent limitations to the effectiveness of any system of disclosure controls and procedures, including the possibility of human error and the circumvention or overriding of the controls and procedures. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives. Based upon our evaluation, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures as of December 31, 2007 were effective to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the applicable rules and forms, and that it is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

#### Management s Report on Internal Control Over Financial Reporting

The managements of Petróleo Brasileiro S.A. Petrobras and Petrobras International Finance Company PifCo (each, a Company ) are responsible for establishing and maintaining effective internal control over financial reporting and for their assessments of the effectiveness of internal control over financial reporting.

Each Company s internal control over financial reporting is a process designed by, or under the supervision of Petrobras Audit Committee and each of the Company s Chief Executive Officer, Chief Financial Officer and effected by each Company s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements for external purposes in accordance with accounting principles generally accepted in the United States. Each Company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company s assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to consolidated financial statements preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Each of the Company's management assessed the effectiveness of each Company's internal control over financial reporting as of December 31, 2007, based on the criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on that assessment, each of the Company's management has concluded that as of December 31, 2007, each Company's internal control over financial reporting is effective.

The effectiveness of each of the Company s internal control over financial reporting as of December 31, 2007 has been audited by KPMG Auditores Independentes, an independent registered public accounting firm, as stated in their report which appears herein.

#### **Changes in Internal Controls**

The management of each Company identified no change in its internal control over financial reporting during the fiscal year ended December 31, 2007 that has materially affected or is reasonably likely to materially affect its internal control over financial reporting.

#### Item 16A. Audit Committee Financial Expert

On June 17, 2005 our board of directors approved the appointment of an audit committee for purposes of the Sarbanes-Oxley Act of 2002. Our board of directors has determined that Fabio Colletti Barbosa is the audit committee financial expert, and he is independent, as defined in 17 CRF 240.10A-3. PifCo s board of directors currently serves as its audit committee for purposes of the Sarbanes-Oxley Act of 2002. PifCo s board of directors has determined that Marcos Antonio Silva Menezes is an audit committee financial expert within the meaning of this Item 16A. Mr. Menezes is not independent as defined in 17 CRF 240.10A-3.

#### Item 16B. Code of Ethics

We have adopted a Code of Ethics applicable to our employees and executive officers and a Code of Good Practices applicable to our directors and executive officers, both of which are also applicable to PifCo. In 2006, we revised and updated our Code of Ethics. No waivers of the provisions of the Code of Ethics or Code of Good Practices are permitted. Both documents are available on our website: www.petrobras.com.br/investor relations/corporate governance.

#### Item 16C. Principal Accountant Fees and Services

#### Audit and Non-Audit Fees

#### Petrobras

The following table sets forth the fees billed to us by our independent auditors, KPMG Auditores Independentes, during the fiscal year ended December 31, 2007 and 2006:

	Year ended De	Year ended December 31,		
	2007	2006		
	(thousand <i>reais</i> )			
Audit fees	23,328	17,254		
Audit-related fees	2,136	3,939		
Tax fees	603	1,467		

#### **Total fees**

26,067 22,660

Audit fees in the above table are the aggregate fees billed by KPMG Auditores Independentes in connection with the audit of our annual financial statements (U.S. GAAP and Brazilian GAAP), interim reviews (U.S. GAAP and Brazilian GAAP), subsidiary audits (U.S. GAAP and Brazilian GAAP, among others) and review of periodic documents filed with the SEC. In 2007, Audit fees include the aggregate fees billed by KPMG Auditores Independentes, in the amount of R\$2,820 thousand, related to the audit of the internal controls. Audit-related fees in the above table are the aggregate fees billed by KPMG Auditores Independentes for assurance and related services that are reasonably related to the performance of the audit or reviews of our financial statements and are not reported under Audit fees.

Tax fees in the above table are fees billed by KPMG Auditores Independentes for services related to tax compliance reviews of the annual federal tax return and procedures with respect to income and sales taxes.

#### PifCo

The following table sets forth the fees billed to PifCo by its independent auditors KPMG Auditores Independentes, during the fiscal years ended December 31, 2007 and 2006:

	Year ended De	ecember 31,
	2007	2006
	(thousand	l reais)
Audit fees	763.8	252.8
Audit-related fees	29.0	39.8
Total fees	792.8	292.6

#### **Total fees**

Audit Fees are the aggregate fees billed by KPMG Auditores Independentes in connection with the audit of our annual financial statements (U.S. GAAP and Brazilian GAAP), interim reviews (U.S. GAAP and Brazilian GAAP), subsidiary audits (U.S. GAAP and local GAAP) and review of periodic documents filed with the SEC. Fees disclosed under the category Audit-Related Fees relate to services provided in connection with the issuance of PifCo s notes in the international capital markets and its exports prepayment program, and assurance and related services that are reasonably related to the performance of the audit or reviews of PifCo financial statements and are not reported under Audit fees.

#### **Audit Committee Approval Policies and Procedures**

Our audit committee has the authority to recommend pre-approval policies and procedures to our board of directors for the engagement of our or PifCo s independent auditor for services. At present, our board of directors has not established such pre-approval policies and procedures. Our board of directors expressly approves on a case-by-case basis any engagement of our independent auditors for all services provided to our subsidiaries or to us. Our bylaws prohibit our independent auditor from providing any consulting services to our subsidiaries or to us during the term of such auditor s contract.

#### Item 16D. Exemptions from the Listing Standards for Audit Committees

Under the listed company audit committee rules of the NYSE and the SEC, we must comply with Exchange Act Rule 10A-3, which requires that we establish an audit committee composed of members of the board of directors that meets specified requirements. In reliance on the exemption in Rule 10A-3(b)(iv)(E), we have designated two members to our audit committee, Francisco Roberto de Albuquerque and Arthur Antônio Sendas, who are designees of the Brazilian government, which is one of our affiliates. In our assessment, each of these members acts independently in performing the responsibilities of an audit committee member under the Sarbanes-Oxley Act and satisfy the other requirements of Exchange Act Rule 10A-3.

#### Item 16E. Purchases of Equity Securities by the Issuer and Affiliated Purchasers Petrobras

During the fiscal year ended December 31, 2007, neither any affiliated purchaser, as defined in Rule 10b-18(a)(3) under the Securities Exchange Act, nor we have purchased any of our equity securities.

#### PART III

#### **Item 17. Financial Statements**

Not applicable. **Item 18. Financial Statements** See pages F-2 through F-177, incorporated herein by reference.

### Item 19. Exhibits

## No. Description

- 1.1 Amended Bylaws of Petróleo Brasileiro S.A.-Petrobras (together with an English version) (incorporated by reference to the Annual Report on Form 20-F of Petróleo Brasileiro S.A. Petrobras, filed with the Securities and Exchange Commission on June 30, 2004 (File No. 1-15106)).
- 1.2 Memorandum and Articles of Association of Petrobras International Finance Company (incorporated by reference to Exhibit 1 to the Annual Report on Form 20-F of Petrobras International Finance Company, filed with the Securities and Exchange Commission on July 1, 2002, and amendments to which were filed on December 13, 2002, March 20, 2003 (File No. 333-14168) and June 26, 2007 (File No. 001-331121). PifCo s Memorandum and Articles of Association were last amended on February 23, 2008.
- 2.1 Deposit Agreement dated as of July 14, 2000, among Petrobras and Citibank, N.A., as depositary, and registered holders and beneficial owners from time to time of the American Depositary Shares, representing the common shares of Petrobras (incorporated by reference to exhibit of Petrobras Registration Statement on Form F-6 filed with the Securities and Exchange Commission on July 17, 2000 (File No. 333-123000)).
- 2.2 Amended and Restated Deposit Agreement dated as of February 21, 2001, among Petrobras and Citibank, N.A., as depositary, and the registered holders and beneficial owners from time to time of the American Depositary Shares, representing the preferred shares of Petrobras (incorporated by reference to exhibit 4.1 of Amendment No. 1 to Petrobras Registration Statement on Form F-1 filed with the Securities and Exchange Commission on July 3, 2001 (File No. 333-13660)).
- 2.3 Amendment No. 1, dated as of March 23, 2001, to the Amended and Restated Deposit Agreement, dated as of February 21, 2001, among Petrobras, Citibank N.A., as depositary, and the registered holders and beneficial owners from time to time of the American Depositary Shares representing the preferred shares of Petrobras (incorporated by reference to Exhibit 4.2 of Amendment No. 1 to Petrobras Registration Statement on Form F-1 filed with the Securities and Exchange Commission on July 3, 2001 (File No. 333-13660)).
- 2.4 Indenture, dated as of July 19, 2002, between Petrobras and JPMorgan Chase Bank, as Trustee (incorporated by reference to exhibit 4.4 of the Registration Statement of Petrobras International Finance Company and Petrobras on Form F-3, filed with the Securities and Exchange Commission on July 5, 2002, and amendments to which were filed on July 19, 2002 and August 14, 2002 (File No. 333-92044-01)).
- 2.5 Indenture, dated as of July 19, 2002, between Petrobras International Finance Company and JPMorgan Chase Bank, as Trustee (incorporated by reference to exhibit 4.5 of the Registration Statement of Petrobras International Finance Company and Petrobras on Form F-3, filed with the Securities and Exchange Commission on July 5, 2002, and amendments to which were filed on July 19, 2002 and August 14, 2002 (File No. 333-92044-01)).

- 2.6 First Supplemental Indenture, dated as of March 31, 2003, between Petrobras International Finance Company (PifCo) and JPMorgan Chase Bank, as Trustee, relating to the 9.00% Global Step-Up Notes due 2008 (incorporated by reference to exhibit 2.6 of Petrobras annual report on Form 20-F for the fiscal year ended December 31, 2002, filed with the Securities and Exchange Commission on June 19, 2002 (File No. 1-15106)).
- 2.7 Second Supplemental Indenture, dated as of July 2, 2003, between Petrobras International Finance Company (PifCo) and JPMorgan Chase Bank, as Trustee, relating to the 9.125% Global Notes due 2013 (incorporated by reference to the Annual Report on Form 20-F of Petróleo Brasileiro S.A. Petrobras, filed with the Securities and Exchange Commission on June 30, 2004 (File No. 1-15106)).

### No. Description

- 2.8 Amended and Restated Second Supplemental Indenture, initially dated as of July 2, 2003, as amended and restated as of September 18, 2003, between Petrobras International Finance Company (PifCo) and JPMorgan Chase Bank, as Trustee, relating to the 9.125% Global Notes due 2013 (incorporated by reference to the Annual Report on Form 20-F of Petróleo Brasileiro S.A. Petrobras, filed with the Securities and Exchange Commission on June 30, 2004 (File No. 1-15106)).
- 2.9 Third Supplemental Indenture, dated as of December 10, 2003, between Petrobras International Finance Company (PifCo) and JPMorgan Chase Bank, as Trustee, relating to the 8.375% Global Notes due 2018 (incorporated by reference to the Annual Report on Form 20-F of Petróleo Brasileiro S.A. Petrobras, filed with the Securities and Exchange Commission on June 30, 2004 (File No. 1-15106)).
- 2.10 Indenture, dated as of May 9, 2001, between Petrobras International Finance Company and The Bank of New York, as Trustee, relating to the 9 7/8% Senior Notes due 2008 (incorporated by reference to Exhibit 4.1 to the Registration Statement of Petrobras International Finance Company and Petróleo Brasileiro S.A. Petrobras on Form F-4, filed with the Securities and Exchange Commission on December 6, 2001 (File No. 333-14168)).
- 2.11 Supplemental Indenture, dated as of November 26, 2001, between Petrobras International Finance Company and The Bank of New York, as Trustee, relating to the 9 7/8% Senior Notes due 2008 (incorporated by reference to Exhibit 4.2 to the Registration Statement of Petrobras International Finance Company and Petróleo Brasileiro S.A. Petrobras on Form F-4, filed with the Securities and Exchange Commission on December 6, 2001 (File No. 333-14168)).
- 2.12 Indenture, dated as of July 6, 2001, between Petrobras International Finance Company and The Bank of New York, as Trustee, relating to the 9 3/4% Senior Notes due 2011 (incorporated by reference to Exhibit 4.1 to the Registration Statement of Petrobras International Finance Company and Petróleo Brasileiro S.A. Petrobras on Form F-4, filed with the Securities and Exchange Commission on December 6, 2001 (File No. 333-14170)).
- 2.13 Supplemental Indenture, dated as of November 26, 2001, between Petrobras International Finance Company and The Bank of New York, as Trustee, relating to the 9 3/4% Senior Notes due 2011 (incorporated by reference to Exhibit 4.2 to the Registration Statement of Petrobras International Finance Company and Petróleo Brasileiro S.A. Petrobras on Form F-4, filed with the Securities and Exchange Commission on December 6, 2001 (File No. 333-14170)).
- 2.14 Indenture, initially dated as of February 4, 2002, as amended and restated as of February 28, 2002, between Petrobras International Finance Company and The Bank of New York, as Trustee, relating to the 9 1/8% Senior Notes due 2007 (incorporated by reference to Exhibit 2.19 to the amended Annual Report on Form 20-F of Petrobras International Finance Company, filed with the Securities and Exchange Commission on

December 13, 2002 (File No. 333-14168)).

- 2.15 Registration Rights Agreement, dated as of May 9, 2001, among Petrobras International Finance Company, Petróleo Brasileiro S.A. Petrobras, and USB Warburg LLC, Banc of America Securities LLC, J.P. Morgan Securities Inc., RBC Dominion Securities Corporation and Santander Central Hispano Investment Securities Inc. (incorporated by reference to Exhibit 4.4 to the Registration Statement of Petrobras International Finance Company and Petróleo Brasileiro S.A. ### MANAGEMENT S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

The management of Petróleo Brasileiro S.A. Petrobras and subsidiaries ( the Company ) is responsible for establishing and maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting.

The Company s internal control over financial reporting is a process designed by, or under the supervision of, the Company s Audit Committee, Chief Executive Officer, Chief Financial Officer and effected by the Company s board of directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with accounting principles generally accepted in the United States. The Company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with accounting principles generally accepted in the United States, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company s assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Therefore even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

Management assessed the effectiveness of the Company s internal control over financial reporting as of December 31, 2007, based on the criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Based on that assessment management has concluded that as of December 31, 2007 the Company s internal control over financial reporting is effective.

The Company s internal control over financial reporting as of December 31, 2007 has been audited by KPMG Auditores Independentes, the Company s independent registered public accounting firm, which opinion is stated in their report, dated March 14, 2008, included herein.

José Sergio Gabrielli de Azevedo Chief Executive Officer March 14, 2008 Almir Guilherme Barbassa Chief Financial Officer March 14, 2008

Report of Independent Registered Public Accounting Firm

To the Board of Directors and Shareholders of

Petróleo Brasileiro S.A. Petrobras

Rio de Janeiro, Brazil

We have audited the accompanying consolidated balance sheets of Petróleo Brasileiro S.A. - Petrobras (and subsidiaries) (The Company) as of December 31, 2007 and 2006, and the related consolidated statements of income, changes in shareholders equity and comprehensive income, and cash flows for the years then ended. We also have audited Petróleo Brasileiro S.A. Petrobras (and subsidiaries) internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Petróleo Brasileiro S.A. Petrobras management is responsible for these consolidated financial statements, for maintaining effective internal control over financial reporting included in the accompanying Management s Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on these consolidated financial statements, and an opinion on the effectiveness of the Company s internal control over financial reporting so the company s internal control over financial reporting included in the accompanying based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement and whether effective internal control over financial reporting was maintained in all material respects. Our audit of the consolidated financial statements included examining, on a test basis, evidence supporting the amounts and disclosures in the consolidated financial statements attements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall consolidated financial statements presentation. Our audit of internal control over financial reporting included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audits also included performing such other procedures as we considered necessary in the circumstances. We believe that our audits provide a reasonable basis for our opinions.

A Company s internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of the consolidated financial statements for external purposes in accordance with generally accepted accounting principles. A Company s internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the Company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of consolidated financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the Company are being made only in accordance with authorizations of management and directors of the Company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the Company s assets that could have a material effect on the consolidated financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Petróleo Brasileiro S.A. Petrobras (and subsidiaries) as of December 31, 2007 and 2006, and the results of its operations and its cash flows for the years then ended, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, Petróleo Brasileiro S.A. Petrobras (and subsidiaries) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2007, based on criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO).

As discussed in the Note 2(n) to the consolidated financial statements, the Company adopted the recognition and disclosure provisions of FASB interpretation No 48, accounting for uncertainty in income taxes, as of January 1, 2007. March 14, 2008, except as to Note 26 (b), which is as of April 30, 2008.

KPMG Auditores Independentes

### **Report of Independent Registered Public Accounting Firm**

To the Board of Directors and Shareholders of

Petróleo Brasileiro S.A. Petrobras

We have audited the accompanying consolidated statements of income, changes in shareholders equity and cash flows of Petróleo Brasileiro S.A. Petrobras and its subsidiaries for the year ended December 31, 2005. These financial statements are the responsibility of the Company s management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Company s internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company s internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated results of Petrobras and its subsidiaries operations and their consolidated cash flows for the year ended December 31, 2005, in conformity with U.S. generally accepted accounting principles.
