Reconciliation of Non-GAAP Financial Measures

In addition to net income, we evaluate our financial performance based on other factors, one primary measure of which is earnings before net interest expense, taxes, depreciation, amortization and exploration expenses (adjusted EBITDAX). We calculate adjusted EBITDAX as earnings before net interest expense, taxes, depreciation and amortization, exploration expense. Further, we reduce adjusted EBITDAX for the minority interest in Cal Dive International, Inc. that we do not own. Adjusted EBITDAX margin is defined as adjusted EBITDAX divided by net revenues. These non-GAAP measures are useful to investors and other internal and external users of our financial statements in evaluating our operating performance because they are widely used by investors in our industry to measure a company's operating performance without regard to items which can vary substantially from company to company and help investors meaningfully compare our results from period to period. Adjusted EBITDAX should not be considered in isolation or as a substitute for, but instead is supplemental to, income from operations, net income or other income data prepared in accordance with GAAP. Non-GAAP financial measures should be viewed in addition to, and not as an alternative to income from operations, net income and other income data included in our reported results prepared in accordance with GAAP. Non-GAAP financial measures should be viewed in addition to, and not as an alternative to our reported results prepared in accordance with GAAP. Users of this financial information should consider the types of events and transactions which are excluded.

The Reconciliation of Non-GAAP Measures related to the presentation materials to be delivered to third parties are attached hereto as Exhibit 99.2 and incorporated by reference herein. The Reconciliation of Non-GAAP Measures will also be posted in the Investor Relations section of Helix's website, www.helixesg.com.
