UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 10-Q

(Mark One)

**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE
ACT OF 1934**

For the quarterly period ended June 30, 2018

or

**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT
OF 1934**

For the transition period to

Commission File Number 814-00098

EQUUS TOTAL RETURN, INC.

(Exact name of registrant as specified in its charter)

Delaware	76-0345915
(State or other jurisdiction of	(I.R.S. Employer
incorporation or organization)	Identification No.)

700 Louisiana St., 48th Floor

Houston, Texas	77002
(Address of principal executive offices)	(Zip Code)

(Former Name, Former Address and Former Fiscal Year, if Changed Since Last Report)

Registrant's telephone number, including area code: (713) 529-0900

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, or a non-accelerated filer. See definition of "accelerated filer and large accelerated filer" in Rule 12b-2 of the Exchange Act.

Large accelerated filer	Accelerated filer	Non-accelerated filer	Smaller Reporting Company	Emerging Growth Company
-------------------------	-------------------	-----------------------	---------------------------	-------------------------

If an emerging growth company, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section 13(a) of the Exchange Act.

Indicate by check mark whether the registrant is a shell company. Yes No

There were 13,518,146 shares of the registrant's common stock, \$.001 par value, outstanding, as of August 13, 2018

(3) Majority owned investments are generally defined under the 1940 Act as companies in which we own more than 50% of the voting securities of the company.

(4) Affiliate investments are generally defined under the 1940 Act as companies in which we own at least 5% but not more than 25% voting securities of the company.

The accompanying notes are an integral part of these financial statements.

Table of Contents**EQUUS TOTAL RETURN, INC.****SCHEDULE OF INVESTMENTS – (Continued)****JUNE 30, 2018****(Unaudited)**

Except for our holding of shares of MVC Capital, Inc. (“MVC”), all of our portfolio securities are restricted from public sale without prior registration under the Securities Act of 1933 (hereafter, the “Securities Act”) or other relevant regulatory authority. We negotiate certain aspects of the method and timing of the disposition of our investment in each portfolio company, including registration rights and related costs.

As a business development company (“BDC”) regulated pursuant to the Investment Company Act of 1940 (“1940 Act”), we may invest up to 30% of our assets in non-qualifying portfolio investments, as permitted by the 1940 Act. Specifically, we may invest up to 30% of our assets in entities that are not considered “eligible portfolio companies” (as defined in the 1940 Act), including companies located outside of the United States, entities that are operating pursuant to certain exceptions under the 1940 Act, and publicly-traded entities with a market capitalization exceeding \$250 million. As of June 30, 2018, we had invested 85.7% of our assets in securities of portfolio companies that constituted qualifying investments under the 1940 Act. As of June 30, 2018, except for our shares of MVC, all of our investments are in enterprises that are considered eligible portfolio companies under the 1940 Act. We provide significant managerial assistance to portfolio companies that comprise 82.9% of the total value of the investments in portfolio securities as of June 30, 2018.

We are classified as a “non-diversified” investment company under the 1940 Act, which means we are not limited in the proportion of our assets that may be invested in the securities of a single user. The value of one segment called “Shipping products and services” includes one portfolio company and was 43.1% of our net asset value, 33.6% of our total assets and 55.8% of our investments in portfolio company securities (at fair value) as of June 30, 2018. The value of one segment called “Energy” includes one portfolio company and was 20.4% of our net asset value, 15.9% of our total assets and 26.4% of our investments in portfolio company securities (at fair value) as of June 30, 2018. Changes in business or industry trends or in the financial condition, results of operations, or the market’s assessment of any single portfolio company will affect the net asset value and the market price of our common stock to a greater extent than would be the case if we were a “diversified” company holding numerous investments.

Our investments in portfolio securities consist of the following types of securities as of June 30, 2018 (in thousands):

Type of Securities	Cost	Fair Value	Fair Value as
--------------------	------	------------	---------------

Edgar Filing: EQUUS TOTAL RETURN, INC. - Form 10-Q

			Percentage of <u>Net</u> <u>Assets</u>	
Common stock	\$6,775	\$23,850	54.0	%

EQUUS TOTAL RETURN, INC.

NOTES TO FINANCIAL STATEMENTS

JUNE 30, 2018

(Unaudited)

(1) Description of Business and Basis of Presentation

Description of Business—Equus Total Return, Inc. (“we,” “us,” “our,” “Equus” and the “Fund”), a Delaware corporation, was formed by Equus Investments II, L.P. (the “Partnership”) on August 16, 1991. On July 1, 1992, the Partnership was reorganized and all of the assets and liabilities of the Partnership were transferred to the Fund in exchange for shares of common stock of the Fund. Our shares trade on the New York Stock Exchange under the symbol EQS. On August 11, 2006, our shareholders approved the change of the Fund’s investment strategy to a total return investment objective. This strategy seeks to provide the highest total return, consisting of capital appreciation and current income. In connection with this strategic investment change, the shareholders also approved the change of name from Equus II Incorporated to Equus Total Return, Inc.

So long as we remain an investment company and not an operating company as contemplated in our *Plan of Reorganization* described in Note 6 below, we will attempt to maximize the return to stockholders in the form of current investment income and long-term capital gains by investing in the debt and equity securities of companies with a total enterprise value of between \$5.0 million and \$75.0 million, although we may engage in transactions with smaller or larger investee companies from time to time. We seek to invest primarily in companies pursuing growth either through acquisition or organically, leveraged buyouts, management buyouts and recapitalizations of existing businesses or special situations. Our income-producing investments consist principally of debt securities including subordinate debt, debt convertible into common or preferred stock, or debt combined with warrants and common and preferred stock. Debt and preferred equity financing may also be used to create long-term capital appreciation through the exercise and sale of warrants received in connection with the financing. We seek to achieve capital appreciation by making investments in equity and equity-oriented securities issued by privately-owned companies (or smaller public companies) in transactions negotiated directly with such companies. Given market conditions over the past several years and the performance of our portfolio, our Management and Board of Directors believe it prudent to continue to review alternatives to refine and further clarify the current strategies.

We elected to be treated as a BDC under the 1940 Act. We currently qualify as a regulated investment company (“RIC”) for federal income tax purposes and, therefore, are not required to pay corporate income taxes on any income or gains that we distribute to our stockholders. We have certain wholly owned taxable subsidiaries (“Taxable Subsidiaries”) each of which holds one or more portfolio investments listed on our Schedules of Investments. The purpose of these Taxable Subsidiaries is to permit us to hold certain income-producing investments or portfolio companies organized as limited liability companies, or LLCs, (or other forms of pass-through entities) and still satisfy the RIC tax requirement that at least 90% of our gross revenue for income tax purposes must consist of investment income. Absent

the Taxable Subsidiaries, a portion of the gross income of these income-producing investments or of any LLC (or other pass-through entity) portfolio investment, as the case may be, would flow through directly to us for the 90% test. To the extent that such income did not consist of investment income, it could jeopardize our ability to qualify as a RIC and, therefore, cause us to incur significant federal income taxes. The income of the LLCs (or other pass-through entities) owned by Taxable Subsidiaries is taxed to the Taxable Subsidiaries and does not flow through to us, thereby helping us preserve our RIC status and resultant tax advantages. We do not consolidate the Taxable Subsidiaries for income tax purposes and they may generate income tax expense because of the Taxable Subsidiaries' ownership of the portfolio companies. We reflect any such income tax expense on our Statements of Operations.

Basis of Presentation—In accordance with Article 6 of Regulation S-X under the Securities Act and the Securities Exchange Act of 1934, as amended ("Exchange Act"), we do not consolidate portfolio company investments, including those in which we have a controlling interest. Our interim unaudited financial statements were prepared in accordance with accounting principles generally accepted in the United States of America ("GAAP"), for interim financial information and in accordance with the requirements of reporting on Form 10-Q and Article 10 of Regulation S-X, under the Exchange Act. Accordingly, they are unaudited and exclude some disclosures required for annual financial statements. We believe that we have made all adjustments, consisting solely of normal recurring accruals, necessary for the fair presentation of these interim financial statements.

The results of operations for the three months ended June 30, 2018 are not necessarily indicative of results that ultimately may be achieved for the remainder of the year. The interim unaudited financial statements and notes thereto should be read in conjunction with the financial statements and notes thereto included in the Fund's Annual Report on Form 10-K for the fiscal year ended December 31, 2017, as filed with the Securities and Exchange Commission ("SEC").

Table of Contents

(2)Liquidity and Financing Arrangements

Liquidity—There are several factors that may materially affect our liquidity during the reasonably foreseeable future. We view this period as the twelve-month period from the date of the financial statements in this Form 10-Q, *i.e.*, the period through June 30, 2019. We are evaluating the impact of current market conditions on our portfolio company valuations and their ability to provide current income. We have followed valuation techniques in a consistent manner; however, we are cognizant of current market conditions that might affect future valuations of portfolio securities. We believe that our operating cash flow and cash on hand will be sufficient to meet operating requirements and, to the extent we remain a BDC, to finance routine follow-on investments, if any, through the next twelve months.

Cash and Cash Equivalents—As of June 30, 2018, we had cash and cash equivalents of \$9.4 million. We had \$34.0 million of our net assets of \$44.1 million invested in portfolio securities. We also had \$12.1 million of restricted cash and temporary cash investments, including primarily the proceeds of a quarter-end margin loan that we incurred to maintain the diversification requirements applicable to a RIC to maintain our pass-through tax treatment. Of this amount, \$12.0 million was invested in U.S. Treasury bills and \$0.1 million represented a required 1% brokerage margin deposit. These securities were held by a securities brokerage firm and pledged along with other assets to secure repayment of the margin loan. The U.S. Treasury bills matured on July 5, 2018 and we subsequently repaid this margin loan, plus interest. The margin interest was paid on August 3, 2018.

As of December 31, 2017, we had cash and cash equivalents of \$10.8 million. We had \$31.1 million of our net assets of \$43.0 million invested in portfolio securities. We also had \$18.2 million of temporary cash investments and restricted cash, including primarily the proceeds of a quarter-end margin loan that we incurred to maintain the diversification requirements applicable to a RIC. Of this amount, \$18.0 million was invested in U.S. Treasury bills and \$0.2 million represented a required 1% brokerage margin deposit. These securities were held by a securities brokerage firm and pledged along with other assets to secure repayment of the margin loan. The U.S. Treasury bills matured January 4, 2018 and we subsequently repaid this margin loan. The margin interest was paid on February 5, 2018.

Dividends—So long as we remain a BDC, we will pay out net investment income and/or realized capital gains, if any, on an annual basis as required under the 1940 Act.

Investment Commitments—Under certain circumstances, we may be called on to make follow-on investments in certain portfolio companies. If we do not have sufficient funds to make follow-on investments, the portfolio company in need of the investment may be negatively impacted. Also, our equity interest in the estimated fair value of the portfolio company could be reduced.

As of June 30, 2018, we had no outstanding commitments to our portfolio company investments.

RIC Borrowings, Restricted Cash and Temporary Cash Investments—We may periodically borrow sufficient funds to maintain the Fund’s RIC status by utilizing a margin account with a securities brokerage firm. We cannot assure you that any such arrangement will be available in the future. If we are unable to borrow funds to make qualifying investments, we may no longer qualify as a RIC. We would then be subject to corporate income tax on the Fund’s net investment income and realized capital gains, and distributions to stockholders would be subject to income tax as ordinary dividends. If we remain a BDC and do not consummate our Consolidation and, therefore, do not become an operating company as described in Note 6 – *Plan of Reorganization* below, our failure to continue to qualify as a RIC could be materially adverse to us and our stockholders.

As of June 30, 2018, we borrowed \$12.0 million to maintain our RIC status by utilizing a margin account with a securities brokerage firm. We collateralized such borrowings with restricted cash and temporary cash investments in U.S. Treasury bills of \$12.1 million.

As of December 31, 2017, we borrowed \$18.0 million to maintain our RIC status by utilizing a margin account with a securities brokerage firm. We collateralized such borrowings with restricted cash and temporary cash investments in U.S. Treasury bills of \$18.2 million.

Table of Contents

Certain Risks and Uncertainties—Market and economic volatility which has become endemic in the past few years has resulted in a relatively limited amount of available debt financing for small and medium-sized companies such as Equus and its portfolio companies. Such debt financing generally has shorter maturities, higher interest rates and fees, and more restrictive terms than debt facilities available in the past. In addition, during these years and continuing into the first six months of 2018, the price of our common stock remained well below our net asset value, thereby making it undesirable to issue additional shares of our common stock below net asset value. Because of these challenges, our near-term strategies shifted from originating debt and equity investments to preserving liquidity necessary to meet our operational needs. Key initiatives that we have previously undertaken to provide necessary liquidity include monetizations, the suspension of dividends and the internalization of management. We are also evaluating potential opportunities that could enable us to effect a Consolidation and become an operating company as described in Note 6 – *Plan of Reorganization* below. Although we cannot assure you that such initiatives will be sufficient, we believe we have sufficient liquidity to meet our operating requirements for the remainder of 2018 and the first six months of 2019.

(3) Significant Accounting Policies

The following is a summary of significant accounting policies followed by the Fund in the preparation of its financial statements:

Use of Estimates—The preparation of financial statements in accordance with GAAP requires us to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Although we believe the estimates and assumptions used in preparing these financial statements and related notes are reasonable in light of known facts and circumstances, actual results could differ from those estimates.

Valuation of Investments—For most of our investments, market quotations are not available. With respect to investments for which market quotations are not readily available or when such market quotations are deemed not to represent fair value, our Board has approved a multi-step valuation process each quarter, as described below:

Each portfolio company or investment is reviewed by our investment professionals;

- 1.

With respect to investments with a fair value exceeding \$2.5 million that have been held for more than one year, we engage independent valuation firms to assist our investment professionals. These independent valuation firms

2. conduct independent valuations and make their own independent assessments;

3. Our Management produces a report that summarized each of our portfolio investments and recommends a fair value of each such investment as of the date of the report;

- The Audit Committee of our Board reviews and discusses the preliminary valuation of our portfolio investments as recommended by Management in their report and any reports or recommendations of the independent valuation firms, and then approves and recommends the fair values of our investments so determined to our Board for final approval; and
5. The Board discusses valuations and determines the fair value of each portfolio investment in good faith based on the input of our Management, the respective independent valuation firm, as applicable, and the Audit Committee.

During the first twelve months after an investment is made, we rely on the original investment amount to determine the fair value unless significant developments have occurred during this twelve-month period which would indicate a material effect on the portfolio company (such as results of operations or changes in general market conditions).

Investments are valued utilizing a yield analysis, enterprise value (“EV”) analysis, net asset value analysis, liquidation analysis, discounted cash flow analysis, or a combination of methods, as appropriate. The yield analysis uses loan spreads and other relevant information implied by market data involving identical or comparable assets or liabilities. Under the EV analysis, the EV of a portfolio company is first determined and allocated over the portfolio company’s securities in order of their preference relative to one another (i.e., “waterfall” allocation). To determine the EV, we typically use a market multiples approach that considers relevant and applicable market trading data of guideline public companies, transaction metrics from precedent M&A transactions and/or a discounted cash flow analysis. The net asset value analysis is used to derive a value of an underlying investment (such as real estate property) by dividing a relevant earnings stream by an appropriate capitalization rate. For this purpose, we consider capitalization rates for similar properties as may be obtained from guideline public companies and/or relevant transactions. The liquidation analysis is intended to approximate the net recovery value of an investment based on, among other things, assumptions regarding liquidation proceeds based on a hypothetical liquidation of a

Table of Contents

portfolio company's assets. The discounted cash flow analysis uses valuation techniques to convert future cash flows or earnings to a range of fair values from which a single estimate may be derived utilizing an appropriate discount rate. The measurement is based on the net present value indicated by current market expectations about those future amounts.

In applying these methodologies, additional factors that we consider in fair value pricing our investments may include, as we deem relevant: security covenants, call protection provisions, and information rights; the nature and realizable value of any collateral; the portfolio company's ability to make payments; the principal markets in which the portfolio company does business; publicly available financial ratios of peer companies; the principal market; and enterprise values, among other factors. Also, any failure by a portfolio company to achieve its business plan or obtain and maintain its financing arrangements could result in increased volatility and result in a significant and rapid change in its value.

Our general intent is to hold our loans to maturity when appraising our privately held debt investments. As such, we believe that the fair value will not exceed the cost of the investment. However, in addition to the previously described analysis involving allocation of value to the debt instrument, we perform a yield analysis assuming a hypothetical current sale of the security to determine if a debt security has been impaired. The yield analysis considers changes in interest rates and changes in leverage levels of the portfolio company as compared to the market interest rates and leverage levels. Assuming the credit quality of the portfolio company remains stable, the Fund will use the value determined by the yield analysis as the fair value for that security if less than the cost of the investment.

We record unrealized depreciation on investments when we determine that the fair value of a security is less than its cost basis, and will record unrealized appreciation when we determine that the fair value is greater than its cost basis.

Fair Value Measurement—Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date and sets out a fair value hierarchy. The fair value hierarchy gives the highest priority to quoted prices in active markets for identical assets or liabilities (Level 1) and the lowest priority to unobservable inputs (Level 3). Inputs are broadly defined as assumptions market participants would use in pricing an asset or liability. The three levels of the fair value hierarchy are described below:

Level 1—Unadjusted quoted prices in active markets for identical assets or liabilities that the reporting entity has the ability to access at the measurement date.

Level 2—Inputs other than quoted prices within Level 1 that are observable for the asset or liability, either directly or indirectly; and fair value is determined through the use of models or other valuation methodologies.

Level 3—Inputs are unobservable for the asset or liability and include situations where there is little, if any, market activity for the asset or liability. The inputs into the determination of fair value are based upon the best information under the circumstances and may require significant management judgment or estimation.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, an investment's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement. Our assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment, and considers factors specific to the investment.

Investments for which prices are not observable are generally private investments in the debt and equity securities of operating companies. The primary valuation method used to estimate the fair value of these Level 3 investments is the discounted cash flow method (although a liquidation analysis, option theoretical, or other methodology may be used when more appropriate). The discounted cash flow approach to determine fair value (or a range of fair values) involves applying an appropriate discount rate(s) to the estimated future cash flows using various relevant factors depending on investment type, including comparing the latest arm's length or market transactions involving the subject security to the selected benchmark credit spread, assumed growth rate (in cash flows), and capitalization rates/multiples (for determining terminal values of underlying portfolio companies). The valuation based on the inputs determined to be the most reasonable and probable is used as the fair value of the investment. The determination of fair value using these methodologies may take into consideration a range of factors including, but not limited to, the price at which the investment was acquired, the nature of the investment, local market conditions, trading values on public exchanges for comparable securities, current and projected operating performance, financing transactions subsequent to the acquisition of the investment and anticipated financing transactions after the valuation date.

Table of Contents

To assess the reasonableness of the discounted cash flow approach, the fair value of equity securities, including warrants, in portfolio companies may also consider the market approach—that is, through analyzing and applying to the underlying portfolio companies, market valuation multiples of publicly-traded firms engaged in businesses similar to those of the portfolio companies. The market approach to determining the fair value of a portfolio company's equity security (or securities) will typically involve: (1) applying to the portfolio company's trailing twelve months (or current year projected) EBITDA a low to high range of enterprise value to EBITDA multiples that are derived from an analysis of publicly-traded comparable companies, in order to arrive at a range of enterprise values for the portfolio company; (2) subtracting from the range of calculated enterprise values the outstanding balances of any debt or equity securities that would be senior in right of payment to the equity securities we hold; and (3) multiplying the range of equity values derived therefrom by our ownership share of such equity tranche in order to arrive at a range of fair values for our equity security (or securities). Application of these valuation methodologies involves a significant degree of judgment by Management.

Due to the inherent uncertainty of determining the fair value of Level 3 investments that do not have a readily available market value, the fair value of the investments may differ significantly from the values that would have been used had a ready market existed for such investments and may differ materially from the values that may ultimately be received or settled. Further, such investments are generally subject to legal and other restrictions or otherwise are less liquid than publicly traded instruments. If we were required to liquidate a portfolio investment in a forced or liquidation sale, we might realize significantly less than the value at which such investment had previously been recorded. With respect to Level 3 investments, where sufficient market quotations are not readily available or for which no or an insufficient number of indicative prices from pricing services or brokers or dealers have been received, we undertake, on a quarterly basis, our valuation process as described above.

We assess the levels of the investments at each measurement date, and transfers between levels are recognized on the subsequent measurement date closest in time to the actual date of the event or change in circumstances that caused the transfer. There were no transfers among Level 1, 2 and 3 for the three months ended June 30, 2018 and the year ended December 31, 2017.

As of June 30, 2018, investments measured at fair value on a recurring basis are categorized in the tables below based on the lowest level of significant input to the valuations:

(in thousands)	Total	Fair Value Measurements as of June 30, 2018		
		Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)

Edgar Filing: EQUUS TOTAL RETURN, INC. - Form 10-Q

Temporary cash investments	17,998	17,998	—	—
Total investments and temporary cash investments	\$49,113	\$23,238	\$ —	\$ 25,875

The following table provides a reconciliation of fair value changes during the three months ended June 30, 2018 for all investments for which we determine fair value using unobservable (Level 3) factors:

		Fair value measurements using significant unobservable inputs (Level 3)		
		Control Investments	Affiliate Investments	Non-affiliate Investments
(in thousands)				Total
Fair value as of December 31, 2017	\$8,212	\$ 16,686	\$ 977	\$25,875
Change in unrealized appreciation	1,000	2,314	—	3,314
Fair value as of June 30, 2018	\$9,212	\$ 19,000	\$ 977	\$29,189

Edgar Filing: EQUUS TOTAL RETURN, INC. - Form 10-Q

The following table provides a reconciliation of fair value changes during the three months ended June 30, 2017 for all investments for which we determine fair value using unobservable (Level 3) factors:

(in thousands)	Fair value measurements using significant unobservable inputs (Level 3)			
	Control Investments	Affiliate Investments	Non-affiliate Investments	Total
Fair value as of December 31, 2016	\$6,462	\$ 16,200	\$ 2,978	\$25,640
Change in unrealized appreciation (depreciation)	1	486	—	487
Proceeds from sales/dispositions	—	—	(2,013)	(2,013)
Fair value as of June 30, 2017	\$6,463	\$ 16,686	\$ 965	\$24,114

Our investment portfolio is not composed of homogeneous debt and equity securities that can be valued with a small number of inputs. Instead, the majority of our investment portfolio is composed of complex debt and equity securities with distinct contract terms and conditions. As such, our valuation of each investment in our portfolio is unique and complex, often factoring in numerous different inputs, including historical and forecasted financial and operational performance of the portfolio company, project cash flows, market multiples comparable market transactions, the priority of our securities compared with those of other investors, credit risk, interest rates, independent valuations and reviews and other inputs.

Table of Contents

The following table summarizes the significant non-observable inputs in the fair value measurements of our Level 3 investments by category of investment and valuation technique as of June 30, 2018:

(in thousands)	Fair Value	Valuation Techniques	Unobservable Inputs	Range	
				Minimum	Maximum
Secured and subordinated debt	\$977	Yield analysis	Discount for lack of marketability	0 %	0 %
Common stock	19,000	Income/Market approach Asset approach	EBITDA Multiple/Discount for lack of marketability/Control premium	10 %	32.5 %
Limited liability company investments	9,212	Discounted cash flow; Guideline transaction method	Recovery rate Reserve adjustment factors	75 %	100 %
	\$29,189				

Because of the inherent uncertainty of the valuation of portfolio securities which do not have readily ascertainable market values, amounting to \$29.2 million and \$25.9 million as of June 30, 2018 and December 31, 2017, respectively, our fair value determinations may materially differ from the values that would have been used had a ready market existed for these securities. As of June 30, 2018 and December 31, 2017, one of our portfolio investments consisting of 510,545 and 496,208 common shares of MVC, respectively, was publicly listed on the NYSE.

We adjust our net asset value for the changes in the value of our publicly held securities, if applicable, and material changes in the value of private securities, generally determined on a quarterly basis or as announced in a press release, and report those amounts to Lipper Analytical Services, Inc. Our net asset value appears in various publications, including *Barron's* and *The Wall Street Journal*.

Foreign Exchange—We record temporary changes in foreign exchange rates of portfolio securities denominated in foreign currencies as changes in fair value. These changes are therefore reflected as unrealized gains or losses until realized.

Investment Transactions—Investment transactions are recorded on the accrual method. Realized gains and losses on investments sold are computed on a specific identification basis.

We classify our investments in accordance with the requirements of the 1940 Act. Under the 1940 Act, “Control Investments” are defined as investments in companies in which the Fund owns more than 25% of the voting securities or maintains greater than 50% of the board representation. Under the 1940 Act, “Affiliate Investments” are defined as those non-control investments in companies in which we own between 5% and 25% of the voting securities. Under the 1940 Act, “Non-affiliate Investments” are defined as investments that are neither Control Investments nor Affiliate Investments. *See also Note 4 for discussion of related party investment transactions.*

As of June 30, 2018, we had no outstanding commitments to our portfolio company investments; however, under certain circumstances, we may be called on to make follow-on investments in certain portfolio companies. If we do not have sufficient funds to make follow-on investments, the portfolio company in need of the investment may be negatively impacted. Also, our equity interest in the estimated fair value of the portfolio company could be reduced. Follow-on investments may include capital infusions which are expenditures made directly to the portfolio company to ensure that operations are completed, thereby allowing the portfolio company to generate cash flows to service their debt.

Interest Income Recognition—We record interest income, adjusted for amortization of premium and accretion of discount, on an accrual basis to the extent that we expect to collect such amounts. We accrete or amortize discounts and premiums on securities purchased over the life of the respective security using the effective yield method. The amortized cost of investments represents the original cost adjusted for the accretion of discount and/or amortization of premium on debt securities. We stop accruing interest on investments when we determine that interest is no longer collectible. We may also impair the accrued interest when we determine that all or a portion of the current accrual is uncollectible. If we receive any cash after determining that interest is no longer collectible, we treat such cash as payment on the principal balance until the entire principal balance has been repaid, before we recognize any additional interest income. We will write off uncollectible interest upon the occurrence of a definitive event such as a sale, bankruptcy, or reorganization of the relevant portfolio interest.

Table of Contents

Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation—Realized gains or losses are measured by the difference between the net proceeds from the sale or redemption of an investment or a financial instrument and the cost basis of the investment or financial instrument, without regard to unrealized appreciation or depreciation previously recognized, and includes investments written-off during the period net of recoveries and realized gains or losses from in-kind redemptions. Net change in unrealized appreciation or depreciation reflects the net change in the fair value of the portfolio company investments and financial instruments and the reclassification of any prior period unrealized appreciation or depreciation on exited investments and financial instruments to realized gains or losses.

Payment in Kind Interest (PIK)—We have loans in our portfolio that may pay PIK interest. We add PIK interest, if any, computed at the contractual rate specified in each loan agreement, to the principal balance of the loan and recorded as interest income. To maintain our status as a RIC, we must pay out to stockholders this non-cash source of income in the form of dividends even if we have not yet collected any cash in respect of such investments. To the extent we remain BDC and a RIC, we will continue to pay out net investment income and/or realized capital gains, if any, on an annual basis as required under the 1940 Act.

Share-Based Compensation—We account for our share-based compensation using the fair value method, as prescribed by ASC718, Compensation—Stock Compensation. Accordingly, for restricted stock awards, we measure the grant date fair value based upon the market price of our common stock on the date of the grant and amortize the fair value of the awards as share-based compensation expense over the requisite service period, which is generally the vesting term. Effective January 1, 2016, we elected the early adoption of Accounting Standards Update (“ASU”) 2016-09, Compensation—Stock Compensation. Improvements to Employee Share-Based Payment Accounting (“ASU 2016-09),” and, accordingly, we have elected to account for forfeitures as they occur and this change had no impact on its consolidated financial statements. The additional amendments (cash flows classification, minimum statutory tax withholding requirements and classification of awards as either a liability or equity) did not have an effect on our consolidated financial statements.

Earnings Per Share—Basic and diluted per share calculations are computed utilizing the weighted-average number of shares of common stock outstanding for the period. In accordance with ASC 260, Earnings Per Share, the unvested shares of restricted stock awarded pursuant to our equity compensation plans are participating securities and, therefore, are included in the basic earnings per share calculation. As a result, for all periods presented, there is no difference between diluted earnings per share and basic earnings per share amounts.

Cash Flows—For purposes of the Statements of Cash Flows, we consider all highly liquid temporary cash investments purchased with an original maturity of three months or less to be cash equivalents. We include our investing activities within cash flows from operations. We exclude “Restricted Cash and Temporary Cash Investments” used for purposes of complying with RIC requirements from cash equivalents.

Taxes—So long as we remain a BDC, we intend to comply with the requirements of the Internal Revenue Code necessary to qualify as a regulated investment company and, as such, will not be subject to federal income taxes on otherwise taxable income (including net realized capital gains) which is distributed to stockholders. Therefore, no provision for federal income taxes is recorded in the financial statements. We borrow money from time to time to maintain our tax status under the Internal Revenue Code as a RIC. See Note 1 for discussion of Taxable Subsidiaries and see Note 2 for further discussion of the Fund's RIC borrowings.

All corporations organized in the State of Delaware are required to file an Annual Report and to pay a franchise tax. As a result, we paid Delaware Franchise tax in the amount of \$0.02 million for the year ended December 31, 2017.

Texas margin tax applies to legal entities conducting business in Texas. The margin tax is based on our Texas sourced taxable margin. The tax is calculated by applying a tax rate to a base that considers both revenue and expenses and therefore has the characteristics of an income tax. As a result, we have no provision for margin tax expense for the six months ended June, 2018, respectively, and we paid \$3 thousand in state income tax for the year ended December 31, 2017.

Accounting Standards Recently Adopted—In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230) — Restricted Cash*. This standard provides guidance on the presentation of restricted cash and restricted cash equivalents in the statement of cash flows. Restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the statements of cash flows. The amendments of this ASU should be applied using a retrospective transition method and are effective for reporting periods beginning after December 15, 2017, with early adoption permitted. We adopted ASU 2016-18 in the fourth quarter of 2017 and applied the guidance retrospectively to our prior period consolidated statement of cash flows.

Table of Contents

In December 2016, the FASB issued ASU 2016-19, *Technical Corrections and Improvements*, which makes minor corrections and clarifications that affect a wide variety of topics in the Accounting Standards Codification, including an amendment to ASC Topic 820, Fair Value Measurement, which clarifies the difference between a valuation approach and a valuation technique when applying the guidance of that Topic. The amendment also requires an entity to disclose when there has been a change in either or both a valuation approach and/or a valuation technique. The transition guidance for the ASC Topic 820 amendment must be applied prospectively because it could potentially involve the use of hindsight that includes fair value measurements. The new guidance is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those years. Early application is permitted for any fiscal year or interim period for which the entity's financial statements have not yet been issued. Our adoption of this ASU did not have an impact on the financial position or financial statement disclosures.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)*, which addresses the diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows under ASC 230, Statement of Cash Flows, and other topics. ASU 2016-15 provides guidance on eight specific cash flow issues including the statement of cash flows treatment of beneficial interests in securitized financial transactions as well as the treatment of debt prepayment and extinguishment costs. ASU 2016-15 also provides guidance on the predominance principle to clarify when cash receipts and cash payments should be separated into more than one class of cash flows. ASU 2016-15 is effective for public business entities for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. Our adoption of ASU 2016-15 did not have a material impact on our statements of cash flows.

In January 2016, the FASB issued ASU 2016-01, *Recognition and Measurement of Financial Assets and Financial Liabilities*. Among other things, this ASU requires that public business entities use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. ASU 2016-01 is effective for public entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Our adoption of ASU 2016-01 did not have a material effect on our financial statements.

Accounting Standards Related to Revenue from Contracts with Customers (Topic 606)—In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*. ASU 2014-09 supersedes the revenue recognition requirements under ASC 605, *Revenue Recognition*, and most industry-specific guidance throughout the Industry Topics of the ASC. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services. Under the new guidance, an entity is required to perform the following five steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue when (or as) the entity satisfies a performance obligation. The new guidance will significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. Additionally, the guidance requires improved disclosures as to the nature, amount, timing and uncertainty of revenue that is recognized.

In March 2016, the FASB issued ASU 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)*, which clarified the implementation guidance on principal versus agent considerations. In April 2016, the FASB issued ASU 2016-10, *Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing*, which clarified the implementation guidance regarding performance obligations and licensing arrangements.

In May 2016, the FASB issued ASU No. 2016-12, *Revenue from Contracts with Customers (Topic 606)—Narrow-Scope Improvements and Practical Expedients*, which clarified guidance on assessing collectability, presenting sales tax, measuring noncash consideration, and certain transition matters.

In December 2016, the FASB issued ASU No. 2016-20, *Revenue from Contracts with Customers (Topic 606)—Technical Corrections and Improvements*, which provided disclosure relief, and clarified the scope and application of the new revenue standard and related cost guidance. The new guidance for Topic 606 will be effective for the annual reporting period beginning after December 15, 2017, including interim periods within that reporting period. Early adoption would be permitted for annual reporting periods beginning after December 15, 2016.

The impact of the adoption of this new accounting standard on our consolidated financial statements was not material as Topic 606 provides for exceptions related to the Fund's portfolio investments.

Table of Contents

Accounting Standards Not Yet Adopted—In June 2016, the FASB issued ASU 2016-13, *Financial Instruments-Credit Losses (Topic 326) —Measurement of Credit Losses on Financial Instruments*, which amends the financial instruments impairment guidance so that an entity is required to measure expected credit losses for financial assets based on historical experience, current conditions and reasonable and supportable forecasts. As such, an entity will use forward-looking information to estimate credit losses. ASU 2016-13 also amends the guidance in FASB ASC Subtopic 325-40, Investments -Other, Beneficial Interests in Securitized Financial Assets, related to the subsequent measurement of accretible yield recognized as interest income over the life of a beneficial interest in securitized financial assets under the effective yield method. ASU 2016-13 effective for public business entities that meet the U.S. GAAP definition of an SEC filer, for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. We are currently evaluating the impact of ASU 2016-13 on our financial statements.

In February 2016, the FASB issued ASU 2016-02, *Leases*, which requires lessees to recognize on the balance sheet a right of use asset, representing its right to use the underlying asset for the lease term, and a lease liability for all leases with terms greater than 12 months. The guidance also requires qualitative and quantitative disclosures designed to assess the amount, timing, and uncertainty of cash flows arising from leases. The standard requires the use of a modified retrospective transition approach, which includes a number of optional practical expedients that entities may elect to apply. The new guidance is effective for annual periods beginning after December 15, 2018, and interim periods therein. Early application is permitted. The adoption of ASU 2016-02 will not have an impact of our financial statements as we currently have no operating leases and our principal offices are under a month-to-month lease arrangement.

(4) Related Party Transactions and Agreements

Share Exchange with MVC Capital, Inc.—On May 14, 2014, we announced that the Fund intended to effect a reorganization pursuant to Section 2(a)(33) of the 1940 Act (“Plan of Reorganization”). As a first step to consummating the Plan of Reorganization, we sold to MVC 2,112,000 newly-issued shares of the Fund’s common stock in exchange for 395,839 shares of MVC (such transaction is hereinafter referred to as the “Share Exchange”). MVC is a BDC traded on the New York Stock Exchange that provides long-term debt and equity investment capital to fund growth, acquisitions and recapitalizations of companies in a variety of industries. The Share Exchange was calculated based on the Fund’s and MVC’s respective net asset value per share. At the time of the Share Exchange, the number of MVC shares received by Equus represented approximately 1.73% of MVC’s total outstanding shares of common stock. During the first quarter of 2018, we received 6,864 additional MVC shares in the form of dividend payments. As of June 30, 2018, we valued our 510,545 MVC shares at \$4.8 million, a decrease from \$5.2 million at December 31, 2017. The value of our MVC shares was based on MVC’s closing trading price on the NYSE as of such dates. Due to the ownership relationship between the Company and MVC, the investment and amounts due to and from MVC have been identified and disclosed as “related party(ies)” in our Consolidated Financial Statements.

Agreement to Acquire Portfolio Company of MVC—On April 24, 2017, we entered into a Stock Purchase Agreement and Plan of Merger (“Merger Agreement”) with ETR Merger Sub, Inc., a newly-formed wholly-owned subsidiary of

Equus, certain shareholders of USG&E, and MVC as a selling shareholder of U.S. Gas & Electric, Inc. (“USG&E”) and as representative of the selling USG&E shareholders. On May 30, 2017, USG&E and MVC notified us that they had accepted a proposal from Crius Energy Trust, that was considered by the respective boards of directors of USG&E and MVC to constitute a “Superior Proposal” (as such term is defined in the Merger Agreement) to the terms and conditions of the Merger Agreement, and, accordingly, provided us with a notice of termination pursuant to the Merger Agreement. Further, pursuant to the Merger Agreement, USG&E paid us a termination fee of \$2.5 million.

Except as noted below, as compensation for services to the Fund, each Independent Director receives an annual fee of \$40,000 paid quarterly in arrears, a fee of \$2,000 for each meeting of the Board of Directors or committee thereof attended in person, a fee of \$1,000 for participation in each telephonic meeting of the Board or committee thereof, and reimbursement of all out-of-pocket expenses relating to attendance at such meetings. The chair of each of our standing committees (audit, compensation, and nominating and governance) also receives an annual fee of \$50,000, payable quarterly in arrears. We may also pay other one-time or recurring fees to members of our Board of Directors in special circumstances. None of our interested directors receive annual fees for their service on the Board of Directors. We may also pay other one-time or recurring fees to members of our Board of Directors in special circumstances. None of our interested directors receive annual fees for their service on the Board of Directors.

In November 2011, Equus Energy, LLC (“Equus Energy”), a wholly-owned subsidiary of the Fund, entered into a consulting agreement with Global Energy Associates, LLC (“Global Energy”) to provide consulting services for energy related investments. Henry W. Hankinson, a director of the Fund, is a managing partner and co-founder of Global Energy. The agreement was terminated effective June 28, 2017. For the six months ended June 30, 2017, payments to Global Energy totaled \$37,500.

Table of Contents

In respect of services provided to the Fund by members of the Board not in connection with their roles and duties as directors, the Fund pays a rate of \$300 per hour for services. During the six months ended June 30, 2018 and June 30, 2017, we paid Kenneth I. Denos, P.C., a professional corporation owned by Kenneth I. Denos, a director of the Fund, \$0.2 million and \$0.3 million, respectively, for services provided to the Fund.

(5) Portfolio Securities

During the six months ended June 30, 2018, we received dividends in the form of additional shares of \$0.1 million relating to our shareholding in MVC.

During the six months ended June 30, 2018, we recorded a net change in unrealized appreciation of \$2.9 million, to a net unrealized appreciation of \$16.2 million. Such change in unrealized appreciation resulted primarily from the following changes:

- (i) Decrease in the fair value of our shareholding in MVC of \$0.4 million due to a decrease in the share price of MVC, offset by the receipt of dividend payments in the form of additional shares of MVC during the quarter;
- (ii) Increase in fair value of our shareholding in PalletOne, Inc. of \$2.3 million due to increases in revenue and EBITDA, as well as promising acquisition and growth prospects; and
- (iii) Increase in the fair value of our holdings in Equus Energy, LLC of \$1.0 million, principally due to increases in mineral acreage prices proximate to the company's leasehold interests and a moderate increase in the short- and long-term prices for crude oil and natural gas.

During the six months ended June 30, 2018, our note issued by 5th Element Tracking, LLC became due. On August 13, 2018, we issued a demand for payment of all outstanding principal and accrued and outstanding interest. We have assessed the fair value of our holdings and determined that the event of default has not indicated a decrease in fair value below the carrying cost of the investment, based on the security interests we hold and the relative timing of collection.

During the six months ended June 30, 2017, we received full payment of our senior secured promissory note issued by Biogenic Reagents, LLC, in the amount of \$2.4 million in cash, consisting of the original principal amount of the Note, together with approximately \$0.4 million in interest accrued thereon.

During the six months ended June 30, 2017, we received dividends in the form of additional shares of \$0.1 million relating to our shareholding in MVC.

During the six months ended June 30, 2017, we recorded a net change in unrealized appreciation of \$1.1 million, to a net unrealized appreciation of \$11.4 million. Such change in unrealized appreciation resulted primarily from the following changes:

- (i) Increase in the fair value of our shareholding in MVC of \$0.7 million due to the receipt of dividend payments in the form of additional shares of MVC, along with an increase in the share price of MVC during the first half of 2017; and
- (ii) Increase in fair value of our shareholding in PalletOne, Inc. of \$0.5 million due to an overall improvement in comparable industry sectors, as well as continued revenue increases and continue growth prospects.

(6) Plan of Reorganization

Plan of Reorganization and Share Exchange with MVC Capital —On May 14, 2014, we announced that the Fund intended to effect a reorganization pursuant to Section 2(a)(33) of the 1940 Act (hereinafter, the “Plan of Reorganization”). As a first step to consummating the Plan of Reorganization, we sold to MVC Capital, Inc. (“MVC”) 2,112,000 newly-issued shares of the Fund’s common stock in exchange for 395,839 shares of MVC (such transaction is hereinafter referred to as the “Share Exchange”). MVC is a business development company traded on the NYSE that provides long-term debt and equity investment capital to fund growth, acquisitions and recapitalizations of companies in a variety of industries. The Share Exchange was calculated based on the Fund’s and MVC’s respective net asset value per share. At the time of the Share Exchange, the number of MVC shares received by Equus represented approximately 1.73% of MVC’s total outstanding shares of common stock.

Table of Contents

Pursuant to the terms of a Share Exchange Agreement, dated May 12, 2014, entered into by Equus and MVC which memorialized the Share Exchange, we intend to finalize the Plan of Reorganization by pursuing a merger or consolidation with MVC, a subsidiary of MVC, or one or more of MVC's portfolio companies (the "Consolidation"). Absent Equus merging or consolidating with/into MVC or a subsidiary thereof, our current intention is for Equus to (i) consummate the Consolidation with a portfolio company of MVC, (ii) terminate its election to be classified as a BDC under the 1940 Act, and (iii) be restructured as a publicly-traded operating company focused on the energy and/or financial services sector.

Agreement to Acquire Portfolio Company of MVC—On April 24, 2017, we entered into a Stock Purchase Agreement and Plan of Merger ("Merger Agreement") with ETR Merger Sub, Inc., a newly-formed wholly-owned subsidiary of Equus, certain shareholders of USG&E, and MVC as a selling shareholder of U.S. Gas & Electric, Inc. ("USG&E") and as representative of the selling USG&E shareholders. On May 30, 2017, USG&E and MVC notified us that they had accepted a proposal from Crius Energy Trust, that was considered by the respective boards of directors of USG&E and MVC to constitute a "Superior Proposal" (as such term is defined in the Merger Agreement) to the terms and conditions of the Merger Agreement, and, accordingly, provided us with a notice of termination pursuant to the Merger Agreement. Further, pursuant to the Merger Agreement, USG&E paid us a termination fee of \$2.5 million (see Note 4 – *Related Party Transactions and Agreements* below).

Intention to Continue to Pursue Consolidation—Notwithstanding the termination of the Merger Agreement with USG&E described above, we intend to pursue a Consolidation and the completion of our Plan of Reorganization with another operating company and withdraw our BDC election if so authorized by our stockholders. While we are presently evaluating various opportunities that could enable us to accomplish a Consolidation, we cannot assure you that we will be able to do so within any particular time period or at all. Moreover, we cannot assure you that the terms of any such transaction that would embody a Consolidation would be acceptable to us.

Authorization to Withdraw BDC Election—On January 6, 2017, August 25, 2017, and May 21, 2018, holders of a majority of the outstanding common stock of the Fund approved our cessation as a BDC under the 1940 Act and authorized our Board to cause the Fund's withdrawal of its election to be classified as a BDC, each effective as of a date designated by the Board and our Chief Executive Officer. These separate authorizations were given as a consequence of the Plan of Reorganization described above. The two authorizations given in 2017 have since expired and the present authorization given on May 21, 2018 expires on August 31, 2018. As our intention is to continue to seek a transformative transaction that would result in a Consolidation under our Plan of Reorganization, we anticipate that we will again receive another such authorization later in 2018. Notwithstanding any such authorization to withdraw our BDC election, we will not submit any such withdrawal unless and until Equus has entered into a definitive agreement to effect a Consolidation. Further, even if we are again authorized to withdraw our election as a BDC, we will require a subsequent affirmative vote from holders of a majority of our outstanding voting shares to enter into any such definitive agreement or change the nature of our business.

(7) 2016 Equity Incentive Plan

Share-Based Incentive Compensation—On June 13, 2016, our shareholders approved the adoption of our 2016 Equity Incentive Plan (“Incentive Plan”). On January 10, 2017, the SEC issued an order approving the Incentive Plan and certain awards intended to be made thereunder. The Incentive Plan is intended to promote the interests of the Fund by encouraging officers, employees, and directors of the Fund and its affiliates to acquire or increase their equity interest in the Fund and to provide a means whereby they may develop a proprietary interest in the development and financial success of the Fund, to encourage them to remain with and devote their best efforts to the business of the Fund, thereby advancing the interests of the Fund and its stockholders. The Incentive Plan is also intended to enhance the ability of the Fund and its affiliates to attract and retain the services of individuals who are essential for the growth and profitability of the Fund. The Incentive Plan permits the award of restricted stock as well as common stock purchase options. The maximum number of shares of common stock that are subject to awards granted under the Incentive Plan is 2,434,728 shares. The term of the Incentive Plan will expire on June 13, 2026. On March 17, 2017, we granted awards of restricted stock under the Incentive Plan to certain of our directors and executive officers in the aggregate amount of 844,500 shares. The awards are each subject to a vesting requirement over a 3-year period unless the recipient thereof is terminated or removed from their position as a director or executive officer without “cause”, or as a result of constructive termination, as such terms are defined in the respective award agreements entered into by each of the recipients and the Fund. As of June 30, 2018, 280,000 shares of restricted stock which were granted pursuant to the Incentive Plan, remained unvested. We account for share-based compensation using the fair value method, as prescribed by ASC 718, *Compensation—Stock Compensation*. Accordingly, for restricted stock awards, we measure the grant date fair value based upon the market price of our common stock on the date of the grant and amortize the fair value of the awards as share-based compensation expense over the requisite service period, which is generally the vesting term. For the six months ended June 30, 2018 and 2017, we recorded compensation expense of \$0.3 million and \$1.0 million, respectively, in connection with these awards.

Table of Contents

(8) Equus Energy, LLC

Equus Energy was formed in November 2011 as a wholly-owned subsidiary of the Fund to make investments in companies in the energy sector, with particular emphasis on income-producing oil & gas properties. In December 2011, we contributed \$250,000 to the capital of Equus Energy. On December 27, 2012, we invested an additional \$6.8 million in Equus Energy for the purpose of additional working capital and to fund the purchase of \$6.6 million in working interests, which presently comprise 144 producing and non-producing oil and gas wells. The working interests include associated development rights of approximately 22,360 acres situated on 12 separate properties in Texas and Oklahoma. The working interests range from a *de minimus* amount to 50% of the leasehold that includes these wells.

The wells are operated by a number of experienced operators, including Chevron USA, Inc., which has operating responsibility for all of Equus Energy's 40 well interests located in the Conger Field, a productive oil and gas field on the edge of the Permian Basin that has experienced successful gas and hydrocarbon extraction in multiple formations. Equus Energy, which holds a 50% working interest in each of these Conger Field wells, is working with Chevron in a recompletion program of existing Conger Field wells to the Wolfcamp formation, a zone containing oil as well as gas and natural gas liquids. Part of Equus Energy's acreage rights described above also includes a 50% working interest in possible new drilling to the base of the Canyon formation (approximately 8,500 feet) on 2,400 acres in the Conger Field. Also included in the interests acquired by Equus Energy are working interests of 7.5% and 2.5% in the Burnell and North Pettus Units, respectively, which collectively comprise approximately 13,000 acres located in the area known as the "Eagle Ford Shale" play.

Revenue and Income—During the three months ended June 30, 2018, Equus Energy's revenue, operating revenue less direct operating expenses, and net loss were \$0.3 million, \$0.05 million, and (\$0.1) million, respectively, as compared to revenue, operating revenue less direct operating expenses, and net loss which were \$0.2 million, \$0.08 million, and (\$0.1) million, respectively, for the three months ended June 30, 2017.

Capital Expenditures—During the three months ended June 30, 2018 and June 30, 2017, Equus Energy's investment, respectively, in capital expenditures for small repairs and improvements was not significant. The operators of the various working interest communicated their intent to wait until 2019, commensurate with an anticipated gradual rise in the price of crude oil, to commence new drilling and recompletion projects.

We do not consolidate Equus Energy or its wholly-owned subsidiaries and accordingly only the value of our investment in Equus Energy is included on our balance sheets. Our investment in Equus Energy is valued in accordance with our normal valuation procedures and is based in part on using a discounted cash flow analysis based on a reserve report prepared for Equus Energy by Lee Keeling & Associates, Inc., an independent petroleum engineering firm, the transactions and values of comparable companies in this sector, and the estimated value of

leasehold mineral interests associated with the acreage held by Equus Energy. A valuation of Equus Energy was performed by a third-party valuation firm, who recommended a value range of Equus Energy consistent with the fair value determined by our Management (See *Schedule of Investments*).

Below is summarized consolidated financial information for Equus Energy as of June 30, 2018 and December 31, 2017 and for the six months June 30, 2018 and 2017, respectively, (in thousands):

Table of ContentsEQUUS ENERGY, LLCUnaudited Condensed Consolidated Balance Sheets

Total liabilities and member's equity	\$901	\$ 1,071

Revenue and direct operating expenses for the various oil and gas assets included in the accompanying statements represent the net collective working and revenue interests acquired by Equus Energy. The revenue and direct operating expenses presented herein relate only to the interests in the producing oil and natural gas properties and do not represent all of the oil and natural gas operations of all of these properties. Direct operating expenses include lease operating expenses and production and other related taxes. General and administrative expenses, depletion, depreciation and amortization (“DD&A”) of oil and gas properties and federal and state taxes have been excluded from direct operating expenses in the accompanying statements of operations because the allocation of certain expenses would be arbitrary and would not be indicative of what such costs would have been had Equus Energy been operated as a stand-alone entity. The statements of operations presented are not indicative of the financial condition or results of operations of Equus Energy on a go forward basis due to changes in the business and the omission of various operating expenses.

Critical Accounting Policies for Equus Energy—Equus Energy and its wholly-owned subsidiary EQS Energy Holdings, Inc. (collectively, “the Company”) follow the *Full Cost Method of Accounting* for oil and gas properties. Under the full cost method, all costs associated with property acquisition, exploration, and development activities are capitalized. Capitalized costs include lease acquisitions, geological and geophysical work, delay rentals, costs of drilling, completing and equipping successful and unsuccessful oil and gas wells and related costs. Gains or losses are normally not recognized on the sale or other disposition of oil and gas properties. Gains or losses are normally reflected as an adjustment to the full cost pool.

Table of Contents

The capitalized costs of oil and gas properties, plus estimated future development costs relating to proved reserves and estimated cost of dismantlement and abandonment, net of salvage value, are amortized on a unit-of-production method over the estimated productive life of the proved oil and gas reserves. Unevaluated oil and gas properties are excluded from this calculation. Depletion, depreciation, amortization and accretion expense for the Company's oil and gas properties totaled \$0.1 million and \$0.1 million for the three months ended June 30, 2018 and June 30, 2017, respectively and \$0.2 million and \$0.2 million for the six months ended June 30, 2018 and June 30, 2017, respectively.

Capitalized oil and gas property costs are limited to an amount (the ceiling limitation) equal to the sum of the following:

- (a) As of June 30, 2018, the present value of estimated future net revenue from the projected production of proved oil and gas reserves, calculated at the simple arithmetic average, first-day-of-the-month prices during the twelve-month period before the balance sheet date (with consideration of price changes only to the extent provided by contractual arrangements) and a discount factor of 10%;
- (b) The cost of investments in unproved and unevaluated properties excluded from the costs being amortized; and
- (c) The lower of cost or estimated fair value of unproved properties included in the costs being amortized.

When it is determined that oil and gas property costs exceed the ceiling limitation, an impairment charge is recorded to reduce its carrying value to the ceiling limitation. The Company did not recognize an impairment loss on its oil and gas properties during the six months ended June 30, 2018 and June 30, 2017, respectively.

The costs of certain unevaluated leasehold acreage and certain wells being drilled are not amortized. The Company excludes all costs until proved reserves are found or until it is determined that the costs are impaired. Costs not amortized are periodically assessed for possible impairment or reduction in value. If a reduction in value has occurred, costs being amortized are increased accordingly.

Revenue Recognition—Revenue recognized for oil and natural gas sales under the sales method of accounting. Under this method, revenue is recognized on production as it is taken and delivered to its purchasers. The volumes sold may be more or less than the volumes entitled to, based on the owner's net leasehold interest. These differences result from production imbalances, which are not significant, and are reflected as adjustments to proven reserves and future cash flows in the unaudited consolidated financial information included herein.

Accounting Policy on DD&A—The Company employs the "Units of Production" method in calculating depletion of its proved oil and gas properties, wherein capitalized costs, as adjusted for future development costs and asset retirement obligations, are amortized over the total estimated proved reserves.

Income Taxes—A limited liability company is not subject to the payment of federal income taxes as components of its income and expenses flow through directly to the members. However, the Company is subject to certain state income taxes. Texas margin tax applies to legal entities conducting business in Texas. The margin tax is based on our Texas sourced taxable margin. The tax is calculated by applying a tax rate to a base that considers both revenue and expenses and therefore has the characteristics of an income tax. Taxable Subsidiaries may generate income tax expense because of the Taxable Subsidiaries' ownership of the portfolio companies. We reflect any such income tax expense on our Statements of Operations. As of June 30, 2018 and June 30, 2017, the Company had no federal income tax expense.

Asset Retirement Obligations—The fair value of asset retirement obligations are recorded in the period in which they are incurred if a reasonable estimate of fair value can be made, and the corresponding cost is capitalized as part of the carrying amount of the related long-lived asset. The fair value of the asset retirement obligation is measured using expected future cash outflows discounted at the Company's credit-adjusted risk-free interest rate. Fair value, to the extent possible, should include a market risk premium for unforeseeable circumstances. No market risk premium was included in the Company's asset retirement obligation fair value estimate since a reasonable estimate could not be made. The liability is accreted to its then present value each period, and the capitalized cost is depleted or amortized over the estimated recoverable reserves using the units-of-production method.

(9) Subsequent Events

Management performed an evaluation of the Fund's activity through the date the financial statements were issued, noting the following subsequent events:

Table of Contents

On July 5, 2018, the U.S. Treasury Bills in the amount of \$12.0 million matured and repaid our margin loan.

On August 13, 2018, we issued a demand for payment to 5th Element Tracking, LLC and its guarantor concerning a \$1.0 million promissory note that matured on May 14, 2018. (See note 5)

Table of Contents

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Equus Total Return, Inc. (“we,” “us,” “our,” “Equus,” and the “Fund”), a Delaware corporation, was formed on August 16, 1991. Our shares trade on the New York Stock Exchange under the symbol ‘EQS’. Our investment strategy seeks to provide the highest total return, consisting of capital appreciation and current income.

The information contained in this section should be read in conjunction with our financial statements and notes thereto appearing elsewhere in this Quarterly Report and in conjunction with the financial statements and notes thereto in the Fund’s Form 10-K for the year ended December 31, 2017, as filed with the SEC. In addition, some of the statements in this report constitute forward-looking statements. The matters discussed in this Quarterly Report, as well as in future oral and written statements by management of Equus, that are forward-looking statements are based on current management expectations that involve substantial risks and uncertainties which could cause actual results to differ materially from the results expressed in, or implied by, these forward-looking statements. Forward-looking statements relate to future events or our future financial performance. We generally identify forward-looking statements by terminology such as “may,” “will,” “should,” “expects,” “plans,” “anticipates,” “could,” “intends,” “target,” “projects,” “believes,” “predicts,” “potential” or “continue” or the negative of these terms or other similar words. Important assumptions include our ability to originate new investments, achieve certain margins and levels of profitability, and the availability of additional capital. In light of these and other uncertainties, the inclusion of a forward-looking statement in this Quarterly Report should not be regarded as a representation by us that our plans or objectives will be achieved. The forward-looking statements contained in this Quarterly Report include statements as to:

- our future operating results;
- our business prospects and the prospects of our existing and prospective portfolio companies;
- the return or impact of current and future investments;
- our contractual arrangements and other relationships with third parties;
- the dependence of our future success on the general economy and its impact on the industries in which we invest;
- the financial condition and ability of our existing and prospective portfolio companies to achieve their objectives;
- our expected financings and investments;
- our regulatory structure and tax treatment;
- our ability to qualify and operate as a BDC and a RIC, including the impact of changes in laws or regulations governing our operations, or the operations of our portfolio companies;
- the adequacy of our cash resources and working capital;
- the timing of cash flows, if any, from the operations of our portfolio companies;
- the impact of fluctuations in interest rates on our business;
- the valuation of our investments in portfolio companies, particularly those having no liquid trading market;
- our ability to recover unrealized losses; and
- market conditions and our ability to access additional capital, if deemed necessary.

There are a number of important risks and uncertainties that could cause our actual results to differ materially from those indicated by such forward-looking statements. For a discussion of factors that could cause our actual results to differ from forward-looking statements contained in this Quarterly Report, please see the discussion in Part II, “Item 1A. Risk Factors”, and in Part I, “Item 1A. Risk Factors” in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017. You should not place undue reliance on these forward-looking statements. The forward-looking statements made in this Quarterly Report relate only to events as of the date on which the statements are made. We undertake no obligation to update any forward-looking statement to reflect events or circumstances occurring after the date this Quarterly Report is filed with the SEC.

Table of Contents

We attempt to maximize the return to stockholders in the form of current investment income and long-term capital gains by investing in the debt and equity securities of companies with a total enterprise value of between \$5.0 million and \$75.0 million, although we may engage in transactions with smaller or larger investee companies from time to time. We seek to invest primarily in companies pursuing growth either through acquisition or organically, leveraged buyouts, management buyouts and recapitalizations of existing businesses or special situations. Our income-producing investments consist principally of debt securities including subordinate debt, debt convertible into common or preferred stock, or debt combined with warrants and common and preferred stock. Debt and preferred equity financing may also be used to create long-term capital appreciation through the exercise and sale of warrants received in connection with the financing. We seek to achieve capital appreciation by making investments in equity and equity-oriented securities issued by privately-owned companies (and smaller public companies) in transactions negotiated directly with such companies. Given market conditions over the past several years and the performance of our portfolio, our management and Board of Directors believe it is prudent to continue to review alternatives to refine and further clarify the current strategies.

We elected to be treated as a BDC under the 1940 Act. We currently qualify as a RIC for federal income tax purposes and, therefore, are not required to pay corporate income taxes on any income or gains that we distribute to our stockholders. We have certain wholly owned Taxable Subsidiaries each of which holds one or more portfolio investments listed on our Schedules of Investments. The purpose of these Taxable Subsidiaries is to permit us to hold certain income-producing investments or portfolio companies organized as limited liability companies, or LLCs, (or other forms of pass-through entities) and still satisfy the RIC tax requirement that at least 90% of our gross revenue for income tax purposes must consist of investment income. Absent the Taxable Subsidiaries, a portion of the gross income of these income-producing investments or of any LLC (or other pass-through entity) portfolio investment, as the case may be, would flow through directly to us for the 90% test. To the extent that such income did not consist of investment income, it could jeopardize our ability to qualify as a RIC and, therefore, cause us to incur significant federal income taxes. The income of the LLCs (or other pass-through entities) owned by Taxable Subsidiaries is taxed to the Taxable Subsidiaries and does not flow through to us, thereby helping us preserve our RIC status and resultant tax advantages. We do not consolidate the Taxable Subsidiaries for income tax purposes and they may generate income tax expense because of the Taxable Subsidiaries' ownership of the portfolio investments. We reflect any such income tax expense on our Statements of Operations.

Plan of Reorganization

Plan of Reorganization and Share Exchange with MVC Capital —On May 14, 2014, we announced that the Fund intended to effect a reorganization pursuant to Section 2(a)(33) of the 1940 Act (hereinafter, the “Plan of Reorganization”). As a first step to consummating the Plan of Reorganization, we sold to MVC Capital, Inc. (“MVC”) 2,112,000 newly-issued shares of the Fund’s common stock in exchange for 395,839 shares of MVC (such transaction is hereinafter referred to as the “Share Exchange”). MVC is a business development company traded on the NYSE that provides long-term debt and equity investment capital to fund growth, acquisitions and recapitalizations of companies in a variety of industries. The Share Exchange was calculated based on the Fund’s and MVC’s respective net asset value per share. At the time of the Share Exchange, the number of MVC shares received by Equus represented approximately 1.73% of MVC’s total outstanding shares of common stock.

Pursuant to the terms of a Share Exchange Agreement, dated May 12, 2014, entered into by Equus and MVC which memorialized the Share Exchange, we intend to finalize the Plan of Reorganization by pursuing a merger or consolidation with MVC, a subsidiary of MVC, or one or more of MVC's portfolio companies (the "Consolidation"). Absent Equus merging or consolidating with/into MVC or a subsidiary thereof, our current intention is for Equus to (i) terminate its election to be classified as a BDC under the 1940 Act, and (ii) be restructured as a publicly-traded operating company focused on the energy and/or financial services sector.

Agreement to Acquire Portfolio Company of MVC—On April 24, 2017, we entered into a Stock Purchase Agreement and Plan of Merger ("Merger Agreement") with ETR Merger Sub, Inc., a newly-formed wholly-owned subsidiary of Equus, certain shareholders of USG&E, and MVC as a selling shareholder of U.S. Gas & Electric, Inc. ("USG&E") and as representative of the selling USG&E shareholders. On May 30, 2017, USG&E and MVC notified us that they had accepted a proposal from Crius Energy Trust, that was considered by the respective boards of directors of USG&E and MVC to constitute a "Superior Proposal" (as such term is defined in the Merger Agreement) to the terms and conditions of the Merger Agreement, and, accordingly, provided us with a notice of termination pursuant to the Merger Agreement. Further, pursuant to the Merger Agreement, USG&E paid us a termination fee of \$2.5 million (see Note 4 – *Related Party Transactions and Agreements* above).

Table of Contents

Intention to Continue to Pursue Consolidation—Notwithstanding the termination of the Merger Agreement with USG&E described above, we intend to pursue a Consolidation and the completion of our Plan of Reorganization with another operating company and withdraw our BDC election if so authorized by our stockholders. While we are presently evaluating various opportunities that could enable us to accomplish a Consolidation, we cannot assure you that we will be able to do so within any particular time period or at all. Moreover, we cannot assure you that the terms of any such transaction that would embody a Consolidation would be acceptable to us.

Authorization to Withdraw BDC Election—On January 6, 2017, August 25, 2017, and May 21, 2018, holders of a majority of the outstanding common stock of the Fund approved our cessation as a BDC under the 1940 Act and authorized our Board to cause the Fund’s withdrawal of its election to be classified as a BDC, each effective as of a date designated by the Board and our Chief Executive Officer. These separate authorizations were given as a consequence of the Plan of Reorganization described above. The two authorizations given in 2017 have since expired and the present authorization given on May 21, 2018 expires on August 31, 2018. As our intention is to continue to seek a transformative transaction that would result in a Consolidation under our Plan of Reorganization, we anticipate that we will again receive another such authorization later in 2018. Notwithstanding any such authorization to withdraw our BDC election, we will not submit any such withdrawal unless and until Equus has entered into a definitive agreement to effect a Consolidation. Further, even if we are again authorized to withdraw our election as a BDC, we will require a subsequent affirmative vote from holders of a majority of our outstanding voting shares to enter into any such definitive agreement or change the nature of our business.

2016 Equity Incentive Plan

On June 13, 2016, our shareholders approved the adoption of our 2016 Equity Incentive Plan (“Incentive Plan”). On January 10, 2017, the SEC issued an order approving the Incentive Plan and certain awards intended to be made thereunder. The Incentive Plan is intended to promote the interests of the Fund by encouraging officers, employees, and directors of the Fund and its affiliates to acquire or increase their equity interest in the Fund and to provide a means whereby they may develop a proprietary interest in the development and financial success of the Fund, to encourage them to remain with and devote their best efforts to the business of the Fund, thereby advancing the interests of the Fund and its stockholders. The Incentive Plan is also intended to enhance the ability of the Fund and its affiliates to attract and retain the services of individuals who are essential for the growth and profitability of the Fund. The Incentive Plan permits the award of restricted stock as well as common stock purchase options. The maximum number of shares of common stock that are subject to awards granted under the Incentive Plan is 2,434,728 shares. The term of the Incentive Plan will expire on June 13, 2026. On March 17, 2017, we granted awards of restricted stock under the Plan to certain of our directors and executive officers in the aggregate amount of 844,500 shares. The awards are each subject to a vesting requirement over a 3-year period unless the recipient thereof is terminated or removed from their position as a director or executive officer without “cause”, or as a result of constructive termination, as such terms are defined in the respective award agreements entered into by each of the recipients and the Fund. For the six months ended June 30, 2018 and 2017, we recorded compensation expense of \$0.3 million and \$1.0 million, respectively, in connection with these awards.

Critical Accounting Policies

See the Fund's Critical Accounting Policies from the disclosure set forth in the Fund's Annual Report on Form 10-K for the year ended December 31, 2017.

Accounting Standards Recently Adopted—In November 2016, the FASB issued ASU No. 2016-18, *Statement of Cash Flows (Topic 230) — Restricted Cash*. This standard provides guidance on the presentation of restricted cash and restricted cash equivalents in the statement of cash flows. Restricted cash and restricted cash equivalents should be included with cash and cash equivalents when reconciling the beginning-of-period and end-of-period amounts shown on the statements of cash flows. The amendments of this ASU should be applied using a retrospective transition method and are effective for reporting periods beginning after December 15, 2017, with early adoption permitted. We adopted ASU 2016-18 in the fourth quarter of 2017 and applied the guidance retrospectively to our prior period consolidated statement of cash flows.

In December 2016, the FASB issued ASU 2016-19, *Technical Corrections and Improvements*, which makes minor corrections and clarifications that affect a wide variety of topics in the Accounting Standards Codification, including an amendment to ASC Topic 820, Fair Value Measurement, which clarifies the difference between a valuation approach and a valuation technique when applying the guidance of that Topic. The amendment also requires an entity to disclose when there has been a change in either or both a valuation approach and/or a valuation technique. The transition guidance for the ASC Topic 820 amendment must be applied prospectively because it could potentially involve the use of hindsight that includes fair value measurements. The new guidance is effective for annual reporting periods beginning after December 15, 2017, including interim periods within those years. Early application is permitted for any fiscal year or interim period for which the entity's financial statements have not yet been issued. Our adoption of this ASU did not have an impact on the financial position or financial statement disclosures.

Table of Contents

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments (a consensus of the Emerging Issues Task Force)*, which addresses the diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows under ASC 230, *Statement of Cash Flows*, and other topics. ASU 2016-15 provides guidance on eight specific cash flow issues including the statement of cash flows treatment of beneficial interests in securitized financial transactions as well as the treatment of debt prepayment and extinguishment costs. ASU 2016-15 also provides guidance on the predominance principle to clarify when cash receipts and cash payments should be separated into more than one class of cash flows. ASU 2016-15 is effective for public business entities for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. Early adoption is permitted, including adoption in an interim period. Our adoption of ASU 2016-15 did not have a material impact on our statements of cash flows.

In January 2016, the FASB issued ASU 2016-01, *Recognition and Measurement of Financial Assets and Financial Liabilities*. Among other things, this ASU requires that public business entities use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. ASU 2016-01 is effective for public entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2017. Our adoption of ASU 2016-01 did not have a material effect on our financial statements.

Accounting Standards Related to Revenue from Contracts with Customers (Topic 606)—In May 2014, the FASB issued ASU 2014-09, *Revenue from Contracts with Customers (Topic 606)*. ASU 2014-09 supersedes the revenue recognition requirements under ASC 605, *Revenue Recognition*, and most industry-specific guidance throughout the Industry Topics of the ASC. The core principle of the guidance is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which an entity expects to be entitled in exchange for those goods or services. Under the new guidance, an entity is required to perform the following five steps: (1) identify the contract(s) with a customer; (2) identify the performance obligations in the contract; (3) determine the transaction price; (4) allocate the transaction price to the performance obligations in the contract, and (5) recognize revenue when (or as) the entity satisfies a performance obligation. The new guidance will significantly enhance comparability of revenue recognition practices across entities, industries, jurisdictions and capital markets. Additionally, the guidance requires improved disclosures as to the nature, amount, timing and uncertainty of revenue that is recognized.

In March 2016, the FASB issued ASU 2016-08, *Revenue from Contracts with Customers (Topic 606): Principal versus Agent Considerations (Reporting Revenue Gross versus Net)*, which clarified the implementation guidance on principal versus agent considerations. In April 2016, the FASB issued ASU 2016-10, *Revenue from Contracts with Customers (Topic 606): Identifying Performance Obligations and Licensing*, which clarified the implementation guidance regarding performance obligations and licensing arrangements.

In May 2016, the FASB issued ASU No. 2016-12, *Revenue from Contracts with Customers (Topic 606)—Narrow-Scope Improvements and Practical Expedients*, which clarified guidance on assessing collectability, presenting sales tax, measuring noncash consideration, and certain transition matters.

In December 2016, the FASB issued ASU No. 2016-20, *Revenue from Contracts with Customers (Topic 606)—Technical Corrections and Improvements*, which provided disclosure relief, and clarified the scope and application of the new revenue standard and related cost guidance. The new guidance for Topic 606 will be effective for the annual reporting period beginning after December 15, 2017, including interim periods within that reporting period. Early adoption would be permitted for annual reporting periods beginning after December 15, 2016.

The impact of the adoption of this new accounting standard on our consolidated financial statements was not material as Topic 606 provides for exceptions related to the Fund's portfolio investments.

Accounting Standards Not Yet Adopted—In June 2016, the FASB issued ASU 2016-13, *Financial Instruments-Credit Losses (Topic 326) —Measurement of Credit Losses on Financial Instruments*, which amends the financial instruments impairment guidance so that an entity is required to measure expected credit losses for financial assets based on historical experience, current conditions and reasonable and supportable forecasts. As such, an entity will use forward-looking information to estimate credit losses. ASU 2016-13 also amends the guidance in FASB ASC Subtopic 325-40, Investments -Other, Beneficial Interests in Securitized Financial Assets, related to the subsequent measurement of accretable yield recognized as interest income over the life of a beneficial interest in securitized financial assets under the effective yield method. ASU 2016-13 effective for public business entities that meet the U.S. GAAP definition of an SEC filer, for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. Early adoption is permitted as of the fiscal years beginning after December 15, 2018, including interim periods within those fiscal years. We are currently evaluating the impact of ASU 2016-13 on our financial statements.

Table of Contents

In February 2016, the FASB issued ASU 2016-02, *Leases*, which requires lessees to recognize on the balance sheet a right of use asset, representing its right to use the underlying asset for the lease term, and a lease liability for all leases with terms greater than 12 months. The guidance also requires qualitative and quantitative disclosures designed to assess the amount, timing, and uncertainty of cash flows arising from leases. The standard requires the use of a modified retrospective transition approach, which includes a number of optional practical expedients that entities may elect to apply. The new guidance is effective for annual periods beginning after December 15, 2018, and interim periods therein. Early application is permitted. The adoption of ASU 2016-02 will not have an impact of our financial statements as we currently have no operating leases and our principal offices are under a month-to-month lease arrangement.

Current Market Conditions

The U.S. economy expanded at an annualized rate of 4.1% during the second quarter of 2018, following an annualized increase of 2.2% during the first quarter of 2018. The increase during the second quarter was reflective of increased consumer spending, exports, business investment, and government spending. Despite rising trade tensions, the Conference Board Economic Forecast projects overall GDP growth in the third and fourth quarters of 2018 to be 3.6% and 3.5%, respectively, with an expectation of 3.1% GDP growth for all of 2019. The labor market remained strong and at nearly full employment throughout the first half of 2018. Meanwhile, housing starts and building permits fell in June 2018 to nine-month lows, indicating a slowing of new housing construction that began in November 2017. Sales of existing homes also continued to decline during the second quarter. Business investment remained largely stable during the second quarter of 2018 after slowing during the first quarter. (Sources: *U.S. Dept. of Commerce Bureau of Economic Analysis, Bureau of Labor Statistics, NBC, Conference Board Leading Economic Index*).

Merger and acquisition activity continued to strengthen during the second quarter of 2018, with \$2.5 trillion in transactions announced during the first six months of 2018, an increase of 61% compared to the first six months of 2017. Should the present pace continue through the rest of 2018, it would top 2015 as the largest yearly total on record. While the energy sector had the largest deal volume, technology-based enterprises constituted the majority of larger business combinations, as large tech companies have sought to increase market share and push into new industries. Spurred by U.S. tax code changes, market conditions for business transactions during 2018 have continued to steadily improve, continuing a multi-year trend, as larger corporations have had increased access to credit markets and are still holding significant amounts of cash and have focused on acquisitions as part of future growth plans. Private equity funds raised almost \$69 billion during the first half of 2018, substantially less than 2017's record pace of \$453 billion for the entire year, but such funds also executed approximately \$126 billion in transactions during the first half of 2018, with an average deal size of \$46 million. With assets under management exceeding \$1 trillion, the abundance of capital has put upward pressure on asset prices and has constrained expected yields. (Source: *Thompson Reuters, The New York Times, PitchBook*).

During the six months ended June 30, 2018, our net asset value increased from \$3.18 per share to \$3.26 per share, an increase of 2.5%. As of June 30, 2018, our common stock is trading at a 27.7% discount to our net asset value as compared to 24.6% as of December 31, 2017.

Over the past several years, we have executed certain initiatives to enhance liquidity, achieve a lower operational cost structure, provide more assistance to portfolio companies and realize certain of our portfolio investments. Specifically, we changed the composition of our Board of Directors and Management, terminated certain of our follow-on investments, internalized the management of the Fund, suspended our managed distribution policy, modified our investment strategy to pursue shorter term liquidation opportunities, pursued non-cash investment opportunities, and sold certain of our legacy and underperforming investment holdings. We believe these actions continue to be necessary to protect capital and liquidity in order to preserve and enhance shareholder value. Because our Management is internalized, certain of our expenses should not increase commensurate with an increase in the size of the Fund and, therefore, to the extent we remain a BDC, we expect to achieve efficiencies in our cost structure if we are able to grow the Fund.

Liquidity and Capital Resources

We generate cash primarily from maturities, sales of securities and borrowings, as well as capital gains realized upon the sale of portfolio investments. We use cash primarily to make additional investments, either in new companies or as follow-on investments in the existing portfolio companies and to pay the dividends to our stockholders.

Because of the nature and size of the portfolio investments, we may periodically borrow funds to make qualifying investments to maintain our tax status as a RIC. We often borrow such funds by utilizing a margin account with a securities brokerage firm. There is no assurance that such arrangement will be available in the future. If the Fund is unable to borrow funds to make qualifying investments, it may no longer qualify as a RIC. The Fund would then be subject to corporate income tax on its net investment income and realized capital gains, and distributions to stockholders would be subject to income tax as ordinary dividends.

Table of Contents

The Fund has the ability to borrow funds and issue forms of senior securities representing indebtedness or stock, such as preferred stock, subject to certain restrictions. Net taxable investment income and net taxable realized gains from the sales of portfolio investments are intended to be distributed at least annually, to the extent such amounts are not reserved for payment of expenses and contingencies or to make follow-on or new investments.

The Fund reserves the right to retain net long-term capital gains in excess of net short-term capital losses for reinvestment or to pay contingencies and expenses. Such retained amounts, if any, will be taxable to the Fund as long-term capital gains and stockholders will be able to claim their proportionate share of the federal income taxes paid on such gains as a credit against their own federal income tax liabilities. Stockholders will also be entitled to increase the adjusted tax basis of their Fund shares by the difference between their undistributed capital gains and their tax credit.

We are evaluating the impact of current market conditions on our portfolio company valuations and their ability to provide current income. We have followed valuation techniques in a consistent manner; however, we are cognizant of current market conditions that might affect future valuations of portfolio securities. In view of our present status as a BDC and our anticipated transformation into an operating company, we believe that our operating cash flow and cash on hand will be sufficient to meet operating requirements and to finance routine capital expenditures through the next twelve months.

Results of Operations

Investment Income and Expense

Net investment loss was \$.9 million for the three months ended June 30, 2018 and \$0.3 million for the three months ended June 30, 2017, respectively, and \$1.9 million and \$2.8 million for the six months ended June 30, 2018 and June 30, 2017, respectively. The decrease in net investment loss generated at June 30, 2018 compared to June 30, 2017 is due primarily to (i) transaction costs of \$2.7 million incurred during the first six months of 2017 related to the Fund's agreement to acquire U.S. Gas & Electric, Inc., (ii) a decrease in compensation expense of \$0.7 million, and a decrease in director fees and expenses of \$0.2 million, offset by an increase in professional fees of \$0.1 million, during the first half of 2018 as compared to the first half of 2017.

Investment income was unchanged at \$0.1 million for the three months ended June 30, 2018 and June 30, 2017, respectively and \$0.2 million and \$0.3 million for the six months ended June 30, 2018 and June 30, 2017, respectively. The decrease is due to the decline of interest-bearing investments.

Realized Gains and Losses on Sales of Portfolio Securities

During the six months ended June 30, 2018, we realized a gain of \$1.0 thousand from the sale of temporary cash investments.

During the six months ended June 30, 2017, we realized a loss of \$4.0 thousand from the sale of temporary cash investments.

Changes in Unrealized Appreciation/Depreciation of Portfolio Securities

During the six months ended June 30, 2018, we recorded a net change in unrealized appreciation of \$2.9 million, to a net unrealized appreciation of \$16.2 million. Such change in unrealized appreciation resulted primarily from the following changes:

- (i) Decrease in the fair value of our shareholding in MVC of \$0.4 million due to a decrease in the share price of MVC, offset by the receipt of dividend payments in the form of additional shares of MVC during the quarter;
- (ii) Increase in fair value of our shareholding in PalletOne, Inc. of \$2.3 million due to increases in revenue and EBITDA, as well as promising acquisition and growth prospects; and

(iii) Increase in the fair value of our holdings in Equus Energy, LLC of \$1.0 million, principally due to increases in mineral acreage prices proximate to the company's leasehold interests and a moderate increase in the short- and long-term prices for crude oil and natural gas.

Table of Contents

During the six months ended June 30, 2017, we recorded a net change in unrealized appreciation of \$1.1 million, to a net unrealized appreciation of \$11.4 million. Such change in unrealized appreciation resulted primarily from the following changes:

- Increase in the fair value of our shareholding in MVC of \$0.7 million due to the receipt of dividend payments in (i) the form of additional shares of MVC, along with an increase in the share price of MVC during the first half of 2017; and
- (ii) Increase in fair value of our shareholding in PalletOne, Inc. of \$0.5 million due to an overall improvement in comparable industry sectors, as well as continued revenue increases and continue growth prospects.

Dividends

We will pay out net investment income and/or realized capital gains, if any, on an annual basis as required under the Investment Company Act of 1940.

Portfolio Securities

During the six months ended June 30, 2018, in connection with our shareholding in MVC, we received dividends in the form of additional MVC shares of \$0.1 million.

During the six months ended June 30, 2018, our note issued by 5th Element Tracking, LLC became due. On August 13, 2018, we issued a demand for payment of all outstanding principal and accrued and outstanding interest. We have assessed the fair value of our holdings and determined that the event of default has not indicated a decrease in fair value below the carrying cost of the investment, based on the security interests we hold and the relative timing of collection.

During the six months ended June 30, 2017, we received full payment of our senior secured promissory note issued by Biogenic Reagents, LLC, in the amount of \$2.4 million in cash, consisting of the original principal amount of the Note, together with approximately \$0.4 million in interest accrued thereon.

During the six months ended June 30, 2017, we received dividends in the form of additional shares of \$0.1 million relating to our shareholding in MVC.

Subsequent Events

We performed an evaluation of the Fund's activity through the date the financial statements were issued, noting the following subsequent events:

On July 5, 2018, the U.S. Treasury Bills in the amount of \$12.0 million matured and repaid our margin loan.

On August 13, 2018, we issued a demand for payment to 5th Element Tracking, LLC and its guarantor concerning a \$1.0 million promissory note that matured on May 14, 2018.

Item 3. Quantitative and Qualitative Disclosure about Market Risk

We are subject to financial market risks, including changes in interest rates with respect to investments in debt securities and outstanding debt payable, as well as changes in marketable equity security prices. In the future, we may invest in companies outside the United States, including in Europe and Asia, which would give rise to exposure to foreign currency value fluctuations. We do not use derivative financial instruments to mitigate any of these risks. The return on investments is generally not affected by foreign currency fluctuations.

Our investments in portfolio securities consist of some fixed-rate debt securities. Since the debt securities are generally priced at a fixed rate, changes in interest rates do not directly affect interest income. In addition, changes in market interest rates are not typically a significant factor in the determination of fair value of these debt securities, since the securities are generally held to maturity. We determine their fair values based on the terms of the relevant debt security and the financial condition of the issuer.

Table of Contents

A major portion of our investment portfolio consists of debt and equity investments in private companies. Modest changes in public market equity prices generally do not significantly impact the estimated fair value of these investments. However, significant changes in market equity prices can have a longer-term effect on valuations of private companies, which could affect the carrying value and the amount and timing of gains or losses realized on these investments. A small portion of the investment portfolio could also consist of common stock in publicly traded companies. These investments are directly exposed to equity price risk, in that a hypothetical ten percent change in these equity prices would result in a similar percentage change in the fair value of these securities.

Item 4. Controls and Procedures

We maintain disclosure controls and other procedures that are designed to ensure that information required to be disclosed by the Fund in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure.

Our management, with the participation of our Fund's Chief Executive Officer and Chief Financial Officer, have evaluated the effectiveness of the design and operations of the Fund's "disclosure controls and procedures" (as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934) as of June 30, 2018. Based on their evaluation, our Chief Executive Officer and Chief Financial Officer concluded that the Fund's disclosure controls and procedures were effective at a reasonable assurance level. There has been no change in our internal control over financial reporting during the quarter ended June 30, 2018, that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

Part II. Other Information

Item 1. Legal Proceedings

Shareholder Complaint—On November 16, 2016, Samuel Zalmanoff filed a lawsuit against the Fund and members of the Board of Directors in the Court of Chancery in the State of Delaware. The lawsuit was filed in connection with the Fund's 2016 Equity Incentive Plan ("Incentive Plan") which was adopted by the Board of Directors on April 15, 2016, approved by the Equus shareholders on June 13, 2016, and approved, with certain standard exceptions, by the Securities and Exchange Commission on January 10, 2017. Mr. Zalmanoff's complaint, which purports to be on behalf of all non-affiliate Equus shareholders entitled to vote for the Incentive Plan, purports to allege a breach by the Board

of Directors of its fiduciary duties of disclosure in connection with the Incentive Plan, and seeks an order from the court: (i) enjoining implementation of the Incentive Plan, (ii) requiring the Fund to revise its disclosures relating to the Incentive Plan, and (iii) for an award of costs, attorneys' fees, and expenses. We believe that this lawsuit, and the allegations included therein, are without merit and intend to continue a vigorous defense against the same. On September 22, 2017, we filed a motion for summary judgment regarding this action. Oral argument concerning the motion is scheduled for October 22, 2018.

From time to time, the Fund is also a party to certain proceedings incidental to the normal course of our business including the enforcement of our rights under contracts with our portfolio companies. While the outcome of these legal proceedings cannot at this time be predicted with certainty, we do not expect that these proceedings will have a material effect upon the Fund's financial condition or results of operations.

Item 1A. Risk Factors

In connection with our efforts to convert Equus into an operating company in furtherance of our Plan of Reorganization, we may be subject to a number of risks associated with this process, the transactions that would embody a Consolidation of Equus with another company, as well as specific risks associated with the commercial enterprise with which Equus would seek to combine itself. We intend to identify, as will be reasonably possible, such risks and include the same in our subsequent filings and reports with the Commission.

Readers should carefully consider these risks and all other information contained in our annual report on Form 10-K for the year ended December 31, 2017, including the Fund's financial statements and the related notes thereto. The risks and uncertainties described therein are not the only ones facing the Fund.

Additional risks and uncertainties not presently known to the Fund, or not presently deemed material by the Fund, may also impair its operations and performance.
