## Forward-Looking Statements

In this Quarterly Report on Form 10-Q, the term “Bancorp” refers to Cathay General Bancorp and the term “Bank” refers to Cathay Bank. The terms “Company,” “we,” “us,” and “our” refer to Bancorp and the Bank collectively. The statements in this report include forward-looking statements within the meaning of the applicable provisions of the Private Securities Litigation Reform Act of 1995 regarding management’s beliefs, projections, and assumptions concerning future results and events. We intend such forward-looking statements to be covered by the safe harbor provision for forward-looking statements in these provisions. All statements other than statements of historical fact are “forward-looking statements” for purposes of federal and state securities laws, including statements about anticipated future operating and financial performance, financial position and liquidity, growth opportunities and growth rates, growth plans, acquisition and divestiture opportunities, business prospects, strategic alternatives, business strategies, financial expectations, regulatory and competitive outlook, investment and expenditure plans, financing needs and availability, and other similar forecasts and statements of expectation and statements of assumptions underlying any of the foregoing. Words such as “aims,” “anticipates,” “believes,” “can,” “continue,” “could,” “estimates,” “expects,” “hopes,” “is optimistic,” “plans,” “potential,” “possible,” “predicts,” “projects,” “seeks,” “shall,” “should,” “will,” and variations of these and similar expressions are intended to identify these forward-looking statements. Forward-looking statements by us are based on estimates, beliefs, projections, and assumptions of management and are not guarantees of future performance. These forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from our historical experience and our present expectations or projections. Such risks and uncertainties and other factors include, but are not limited to, adverse developments or conditions related to or arising from:

U.S. and international business and economic conditions;

credit risks of lending activities and deterioration in asset or credit quality;

potential supervisory action by bank supervisory authorities;

increased costs of compliance and other risks associated with changes in regulation and the current regulatory environment, including the requirements of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the “Dodd-Frank Act”), and the potential for substantial changes in the legal, regulatory, and enforcement framework and oversight applicable to financial institutions in reaction to recent adverse financial market events, including changes pursuant to the Dodd-Frank Act;

potential goodwill impairment;

liquidity risk;

fluctuations in interest rates;

inflation and deflation;

risks associated with acquisitions and the expansion of our business into new markets;

real estate market conditions and the value of real estate collateral;

environmental liabilities;

our ability to compete with larger competitors;

the possibility of higher capital requirements, including implementation of the Basel III capital standards of the Basel Committee;

our ability to retain key personnel;

successful management of reputational risk;

natural disasters and geopolitical events;

general economic or business conditions in California, Asia, and other regions where the Bank has operations;

restrictions on compensation paid to our executives as a result of our participation in the TARP Capital Purchase Program;

failures, interruptions, or security breaches of our information systems;

our ability to adapt our systems to technological changes, including successfully implementing our core system conversion;

adverse results in legal proceedings;

changes in accounting standards or tax laws and regulations;

market disruption and volatility;

restrictions on dividends and other distributions by laws and regulations and by our regulators and our capital structure;

successfully raising additional capital, if needed, and the resulting dilution of interests of holders of our common stock; and

the soundness of other financial institutions.

These and other factors are further described in Bancorp's Annual Report on Form 10-K for the year ended December 31, 2012 (Item 1A in particular), other reports and registration statements filed with the Securities and Exchange Commission ("SEC"), and other filings it makes with the SEC from time to time. Actual results in any future period may

also vary from the past results discussed in this report. Given these risks and uncertainties, readers are cautioned not to place undue reliance on any forward-looking statements, which speak to the date of this report. We have no intention and undertake no obligation to update any forward-looking statement or to publicly announce any revision of any forward-looking statement to reflect future developments or events, except as required by law.

Bancorp's filings with the SEC are available at the website maintained by the SEC at <http://www.sec.gov>, or by request directed to Cathay General Bancorp, 9650 Flair Drive, El Monte, California 91731, Attention: Investor Relations (626) 279-3286.

## **CATHAY GENERAL BANCORP AND SUBSIDIARIES**

### **NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited)**

#### **1. Business**

Cathay General Bancorp (“Bancorp”) is the holding company for Cathay Bank (the “Bank” and, together, the “Company”), six limited partnerships investing in affordable housing investments in which the Bank is the sole limited partner, and GBC Venture Capital, Inc. The Bancorp also owns 100% of the common stock of five statutory business trusts created for the purpose of issuing capital securities. The Bank was founded in 1962 and offers a wide range of financial services. As of June 30, 2013, the Bank operated twenty branches in Southern California, eleven branches in Northern California, eight branches in New York State, three branches in Illinois, three branches in Washington State, two branches in Texas, one branch in Massachusetts, one branch in New Jersey, one branch in Nevada, one branch in Hong Kong, and a representative office in Shanghai and in Taipei. Deposit accounts at the Hong Kong branch are not insured by the Federal Deposit Insurance Corporation (the “FDIC”).

#### **2. Basis of Presentation**

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the interim periods presented are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. For further information, refer to the audited consolidated financial statements and notes included in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

The preparation of the condensed consolidated financial statements in accordance with GAAP requires management of the Company to make a number of estimates and assumptions relating to the reported amount of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the consolidated financial statements and the reported amounts of revenues and expenses during the period. Actual results could differ from those estimates. The most significant estimates subject to change are the allowance for loan losses, goodwill impairment, and other-than-temporary impairment.

#### **3. Recent Accounting Pronouncements**

In January 2013, the Financial Accounting Standard Board (“FASB”) issued ASU 2013-01, “*Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities.*” ASU No. 2013-01 clarifies that the scope of Update 2011-11 applies to derivatives, repurchase agreements, and securities lending transactions to the extent that they are either offset in the financial statements or subject to an enforceable master netting arrangement or similar agreement. ASU 2013-01 became effective for interim and annual periods beginning on or after January 1, 2013. Adoption of ASU 2013-01 did not have a significant impact on the Company’s consolidated financial statements. See Note 15 to the Company’s consolidated financial statements for the disclosure of adoption of ASU 2013-01.

In February 2013, the FASB issued ASU 2013-02 “Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income.” ASU 2013-02 amends Topic 220, “Comprehensive Income,” to improve the reporting of reclassification out of accumulated other comprehensive income. The amendments do not change the current requirements for reporting net income or other comprehensive income in financial statements. However, the amendments require an entity to provide information about the amounts reclassified and to present significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income. ASU 2013-02 became effective prospectively for reporting periods beginning after December 15, 2012. Adoption of ASU 2013-02 did not have a significant impact on the Company’s consolidated financial statements. See Note 16 to the Company’s consolidated financial statements for the disclosure of adoption of ASU 2013-02.

#### 4. Earnings per Share

Basic earnings per share exclude dilution and is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding for the period. Diluted earnings per share reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock and resulted in the issuance of common stock that then shared in earnings. Potential dilution is excluded from computation of diluted per-share amounts when a net loss from operations exists.

Outstanding stock options with anti-dilutive effect were not included in the computation of diluted earnings per share. The following table sets forth earnings per common share calculations:

(Dollars in thousands, except share and per share data)	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012

**5. Stock-Based Compensation**

Under the Company's equity incentive plans, directors and eligible employees may be granted incentive or non-statutory stock options and/or restricted stock units, or awarded non-vested stock. As of June 30, 2013, the only options granted by the Company were non-statutory stock options to selected Bank officers and non-employee directors at exercise prices equal to the fair market value of a share of the Company's common stock on the date of grant. Such options have a maximum ten-year term and vest in 20% annual increments (subject to early termination in certain events) except certain options granted to the Chief Executive Officer of the Company in 2005 and 2008. If such options expire or terminate without having been exercised, any shares not purchased will again be available for future grants or awards. There were no options granted during the first six months of 2013 or during 2012.

Option compensation expense was zero for the three months ended June 30, 2013, and \$194,000 for the three months ended June 30, 2012. For the six months ended June 30, option compensation expense totaled \$129,000 for 2013 and \$387,000 for 2012. Stock-based compensation is recognized ratably over the requisite service period for all awards. All unrecognized stock-based compensation expense was fully recognized as of June 30, 2013.

No stock options were exercised in the first six months of 2013 compared to 39,784 shares issued on the exercise of stock options in the first six months 2012. Cash received totaled \$647,000 and the aggregate intrinsic value totaled \$34,000 from the exercise of stock options during the first six months ended June 30, 2012. The table below summarizes stock option activity for the periods indicated:

	<b>Shares</b>	<b>Weighted-average exercise price</b>	<b>Weighted-average remaining contractual life (in years)</b>	<b>Aggregate intrinsic value (in thousands)</b>
Balance, December 31, 2012	3,996,630	\$ 29.45	2.2	\$ -
Exercised	-	-		
Forfeited	(339,340 )	20.45		
Balance, March 31, 2013	3,657,290	\$ 30.28	2.2	\$ -
Exercised	-	-		
Forfeited	(2,980 )	30.79		
Balance, June 30, 2013	3,654,310	\$ 30.28	1.9	\$ -
Exercisable, June 30, 2013	3,654,310	\$ 30.28	1.9	\$ -

At June 30, 2013, 2,654,098 shares were available under the Company's 2005 Incentive Plan for future grants.

The Company granted restricted stock units for 125,133 shares at an average closing price of \$18.24 per share in 2012 and for 147,661 shares at an average closing price of \$14.78 in 2011. The Company granted restricted stock units for 14,416 shares on March 14, 2013, at the closing price of \$20.57 and for 6,729 shares on April 15, 2013, at the closing price of \$18.91. The restricted stock units granted in 2011, 2012, and 2013 are scheduled to vest two years from grant date.

The following table presents information relating to the restricted stock units as of June 30, 2013:

	<b>Units</b>
Balance at December 31, 2012	256,616
Granted	21,145
Forfeited	-
Vested	(66,539 )
Balance at June 30, 2013	211,222

The compensation expense related to the restricted stock units was \$492,000 for the three months ended June 30, 2013, compared to \$409,000 for the three months ended June 30, 2012. For the six months ended June 30, compensation expense recorded related to the restricted stock units was \$1.1 million in 2013 and \$762,000 in 2012. Unrecognized stock-based compensation expense related to restricted stock units was \$2.0 million at June 30, 2013, and is expected to be recognized over the next 1.3 years.

The following table summarizes the tax short-fall from share-based payment arrangements:

	Three months ended June 30,		Six months ended June 30,	
	2013	2012	2013	2012
(Dollars in thousands)				
Short-fall of tax deductions in excess of grant-date fair value	\$(11)	\$ -	\$(80 )	\$(565)
Benefit of tax deductions on grant-date fair value	11	-	607	663
Total benefit of tax deductions	\$-	\$ -	\$527	\$98

## **6. Investment Securities**

Investment securities were \$2.0 billion at June 30, 2013, compared to \$2.1 billion at December 31, 2012. During the first quarter of 2013, due to the ongoing discussions regarding corporate income tax rates which could have a negative impact on the after-tax yields and fair values of the Company's portfolio of municipal securities, the Company determined it may sell such securities in response to market conditions. As a result, the Company reclassified its municipal securities from securities held-to-maturity to securities available-for-sale. Concurrent with this reclassification, the Company also reclassified all other securities held-to-maturity, which together with the municipal

securities had an amortized cost on the date of transfer of \$722.5 million, to securities available-for-sale. At the reclassification date, a net unrealized gain was recorded in other comprehensive income for these securities totaling \$40.5 million.

The following table reflects the amortized cost, gross unrealized gains, gross unrealized losses, and fair values of investment securities as of June 30, 2013, and December 31, 2012:

	<b>June 30, 2013</b>

Due after five years through ten years	152,342	149,019
Due after ten years (1)	1,396,830	1,375,149
Total	\$2,044,312	\$2,018,305

(1) Equity securities are reported in this category

Proceeds from sales of mortgage-backed securities were \$113.6 million and repayments, maturities and calls of mortgage-backed securities were \$179.0 million during the first six months of 2013 compared to proceeds from sales of \$179.5 million and repayments, maturities, and calls of \$178.1 million during the same period a year ago. Proceeds from sales of other investment securities were \$440.1 million during the first six months of 2013 compared to \$41.1 million during the same period year ago. Proceeds from maturity and calls of other investment securities were \$80.1 million during the first six months of 2013 compared to \$470.8 million during the same period ago. Gains of \$18.5 million and no losses were realized on sales and calls of investment securities during the first six months of 2013 compared to gains of \$5.2 million and losses of \$608,000 realized for the same period a year ago.

The unrealized loss on investments in corporate bonds relates to the Company's investment in 15 issues of bonds of financial institutions, all of which were investment grade at the date of acquisition and as of June 30, 2013. The unrealized losses for these now floating rate securities were primarily caused by the widening of credit spreads since the dates of acquisition. The contractual terms of those investments do not permit the issuers to settle the security at a price less than the amortized cost of the investment. The Company currently does not believe it is probable that it will be unable to collect all amounts due according to the contractual terms of the investments. Therefore, it is expected that these bonds would not be settled at a price less than the amortized cost of the investment. Because the Company does not intend to sell and would not be required to sell these investments until a recovery of fair value, which may be at maturity, it does not consider its investments in these corporate bonds to be other-than-temporarily impaired at June 30, 2013.

The temporarily impaired securities represent 58.0% of the fair value of investment securities as of June 30, 2013. Unrealized losses for securities with unrealized losses for less than twelve months represent 4.3%, and securities with unrealized losses for twelve months or more represent 4.6%, of the historical cost of these securities. Unrealized losses on these securities generally resulted from increases in interest rates or spreads subsequent to the date that these securities were purchased.

At June 30, 2013, management believed the impairment was temporary and, accordingly, no impairment loss has been recognized in our condensed consolidated statements of operations. The Company expects to recover the amortized cost basis of its debt securities, and has no intent to sell and will not be required to sell available-for-sale debt securities that have declined below their cost before their anticipated recovery.

The table below shows the fair value and unrealized losses of the temporarily impaired securities in our investment securities portfolio as of June 30, 2013, and December 31, 2012:

**June 30, 2013****Temporarily impaired securities**

Investment securities having a carrying value of \$1.12 billion at June 30, 2013, and \$1.45 billion at December 31, 2012, were pledged to secure public deposits, other borrowings, treasury tax and loan, Federal Home Loan Bank advances, securities sold under agreements to repurchase, interest rate swaps, and foreign exchange transactions.

### 7. Loans

Most of the Company's business activity is with Asian customers located in Southern and Northern California; New York City, New York; Houston and Dallas, Texas; Seattle, Washington; Boston, Massachusetts; Chicago, Illinois; Edison, New Jersey; Las Vegas, Nevada, and Hong Kong. The Company has no specific industry concentration, and generally its loans are collateralized with real property or other pledged collateral of the borrowers. Loans are generally expected to be paid off from the operating profits of the borrowers, refinancing by another lender, or through sale by the borrowers of the secured collateral.

The components of loans in the condensed consolidated balance sheets as of June 30, 2013, and December 31, 2012, were as follows:

	<b>June 30, 2013</b>	<b>December 31, 2012</b>
	<b>(In thousands)</b>	
<b>Type of Loans:</b>		
Commercial loans	\$2,210,761	\$2,127,107
Residential mortgage loans	1,224,692	1,146,230
Commercial mortgage loans	3,909,559	3,768,452
Equity lines	182,855	193,852

Unamortized deferred loan fees	(11,685 )	(10,238 )
Total loans, net	\$7,502,955	\$7,235,587

At June 30, 2013, recorded investment in impaired loans totaled \$211.1 million and was comprised of non-accrual loans of \$95.6 million, and accruing troubled debt restructured (“TDR”) loans of \$115.5 million. At December 31, 2012, recorded investment in impaired loans totaled \$248.6 million and was comprised of non-accrual loans of \$103.9 million and accruing TDRs of \$144.7 million. For impaired loans, the amounts previously charged off represent 23.7% at June 30, 2013, and 23.2% at December 31, 2012, of the contractual balances for impaired loans. The following table presents the average balance and interest income recognized related to impaired loans for the periods indicated:

	<b>Impaired Loans</b>				<b>Interest Income Recognized</b>

The determination of the amount of the allowance for credit losses for impaired loans is based on management's current judgment about the credit quality of the loan portfolio and takes into consideration known relevant internal and external factors that affect collectibility when determining the appropriate level for the allowance for credit losses. The nature of the process by which the Bank determines the appropriate allowance for credit losses requires the exercise of considerable judgment. This allowance evaluation process is also applied to troubled debt restructurings since they are considered to be impaired loans.

A troubled debt restructuring is a formal modification of the terms of a loan when the lender, for economic or legal reasons related to the borrower's financial difficulties, grants a concession to the borrower. The concessions may be granted in various forms, including a change in the stated interest rate, a reduction in the loan balance or accrued interest, or an extension of the maturity date that causes significant delay in payment.

TDRs on accrual status are comprised of the loans that have, pursuant to the Bank's policy, performed under the restructured terms and have demonstrated sustained performance under the modified terms for six months before being returned to accrual status. The sustained performance considered by management pursuant to its policy includes the periods prior to the modification if the prior performance met or exceeded the modified terms. This would include cash paid by the borrower prior to the restructure to set up interest reserves.

At June 30, 2013, accruing TDRs were \$115.5 million and non-accrual TDRs were \$48.5 million compared to accruing TDRs of \$144.7 million and non-accrual TDRs of \$47.7 million at December 31, 2012. The Company allocated specific reserves of \$5.2 million to accruing TDRs and \$4.6 million to non-accrual TDRs at June 30, 2013, and \$1.1 million to accruing TDRs and \$7.8 million to non-accrual TDRs at December 31, 2012. The following table presents TDRs that were modified during the first six months of 2013 and 2012, their specific reserve at June 30, 2013, and charge-offs during the first six months of 2013 and 2012:

	Six months ended June 30, 2013				June 30, 2013

---

Modifications of the loan terms during the first six months of 2013 were in the form of changes in the stated interest rate, and in payment terms to interest only from principal and interest or reduction in monthly payment amount, multiple note structure, and waiver of late charges and collection fees. The length of time for which modifications involving a reduction of the stated interest rate or changes in payment terms that were documented ranged from twelve months to three years from the modification date.

We expect that the TDR loans on accruing status as of June 30, 2013, which were all performing in accordance with their restructured terms, will continue to comply with the restructured terms because of the reduced principal or interest payments on these loans. A summary of TDRs by type of concession, and by type of loan as of June 30, 2013, and December 31, 2012, is shown below:

<b>June 30, 2013</b>				
<b>Accruing TDRs</b>	<b>Principal Rate</b>		<b>Rate</b>	<b>Total</b>
	<b>Deferral</b>	<b>Reduction</b>	<b>Reduction and Payment</b>

A loan is considered to be in payment default once it is 60 to 90 days contractually past due under the modified terms. One land loan of \$1.8 million and two commercial loans of \$111,000 were modified as TDRs during the previous twelve months and subsequently defaulted as of June 30, 2013, within the three months and six months ended June 30, 2013. One of these three TDRs incurred a charge-off amounting to \$254,000 within the twelve month period.

Under the Company's internal underwriting policy, an evaluation is performed of the probability that the borrower will be in payment default on any of its debt in the foreseeable future without the modification in order to determine whether a borrower is experiencing financial difficulty.

As of June 30, 2013, there were no commitments to lend additional funds to those borrowers whose loans have been restructured, were considered impaired, or were on non-accrual status.

As part of the on-going monitoring of the credit quality of our loan portfolio, the Company utilizes a risk grading matrix to assign a risk grade to each loan. The risk rating categories can be generally described by the following grouping for non-homogeneous loans:

**Pass/Watch** – These loans range from minimal credit risk to lower than average, but still acceptable, credit risk.

**Special Mention** – Borrower is fundamentally sound and loan is currently protected but adverse trends are apparent that, if not corrected, may affect ability to repay. Primary source of loan repayment remains viable but there is increasing reliance on collateral or guarantor support.

**Substandard** – These loans are inadequately protected by current sound net worth, paying capacity or pledged collateral. Well-defined weaknesses exist that could jeopardize repayment of debt. Loss may not be imminent, but if weaknesses are not corrected, there is a good possibility of some loss.

**Doubtful** – The possibility of loss is extremely high, but due to identifiable and important pending events (which may strengthen the loan) a loss classification is deferred until the situation is better defined.

**Loss** – These loans are considered uncollectible and of such little value that to continue to carry the loan as an active asset is no longer warranted.

The following table presents loan portfolio by risk rating as of June 30, 2013, and as of December 31, 2012:

	<b>June 30, 2013</b>

The allowance for loan losses and the reserve for off-balance sheet credit commitments are significant estimates that can and do change based on management's process in analyzing the loan portfolio and on management's assumptions about specific borrowers, underlying collateral, and applicable economic and environmental conditions, among other factors.

The following table presents the balance in the allowance for loan losses by portfolio segment and based on impairment method as of June 30, 2013, and as of December 31, 2012.

	<b>Commercial Loans</b>	<b>Real Estate Construction Loans</b>	<b>Commercial Mortgage Loans</b>	<b>Residential Mortgage Loans and Equity Lines</b>	<b>Installment and Other Loans</b>	<b>Total</b>

**8. Commitments and Contingencies**

The Company is involved in various litigation concerning transactions entered into during the normal course of business. Management, after consultation with legal counsel, does not believe that the resolution of such litigation will have a material effect upon its consolidated financial condition, results of operations, or liquidity taken as a whole. Although the Company establishes accruals for legal proceedings when information related to the loss contingencies represented by those matters indicates both that a loss is probable and that the amount of loss can be reasonably estimated, the Company does not have accruals for all legal proceedings where there is a risk of loss. In addition, amounts accrued may not represent the ultimate loss to the Company from the legal proceedings in question. Thus, ultimate losses may be higher or lower, and possibly significantly so, than the amounts accrued for legal loss contingencies.

In the normal course of business, the Company becomes a party to financial instruments with off-balance sheet risk to meet the financing needs of its customers. These financial instruments include commitments to extend credit in the form of loans, or through commercial or standby letters of credit, and financial guarantees. These instruments represent varying degrees of exposure to risk in excess of the amounts included in the accompanying condensed consolidated balance sheets. The contractual or notional amount of these instruments indicates a level of activity associated with a particular class of financial instrument and is not a reflection of the level of expected losses, if any.

### **9. Securities Sold Under Agreements to Repurchase**

Securities sold under agreements to repurchase were \$950.0 million with a weighted average rate of 3.80% at June 30, 2013, compared to \$1.3 billion with a weighted average rate of 3.84% at December 31, 2012. In 2012, the Company modified \$200.0 million of securities sold under agreements to repurchase by extending the term by an additional four years on average, reducing the rate by an average of 168 basis points and removing the callable feature. In 2012, the Company prepaid securities sold under agreements to repurchase totaling \$150 million with a weighted average rate of 4.43% and incurred prepayment penalties of \$9.4 million. In the first six months of 2013, the Company prepaid securities sold under agreements to repurchase totaling \$300 million with a weighted average rate of 3.97% and incurred prepayment penalties of \$15.7 million. Five floating-to-fixed rate agreements totaling \$300.0 million have initial floating rates for a period of time ranging from six months to one year, with floating rates ranging from the three-month LIBOR minus 200 basis points to the three-month LIBOR rate minus 340 basis points. Thereafter, the rates are fixed for the remainder of the term, with interest rates ranging from 4.78% to 5.07%. After the initial floating rate term, the counter parties have the right to terminate the transaction at par at the fixed rate reset date and quarterly thereafter. Nine fixed-to-floating rate agreements totaling \$450.0 million have initial fixed rates ranging from 1.00% to 3.50% with initial fixed rate terms ranging from six months to 18 months. For the remaining term, the rates float at 8% minus the three-month LIBOR rate with a maximum rate ranging from 3.25% to 3.75% and minimum rate of 0.0%. After the initial fixed rate term, the counter parties have the right to terminate the transaction at par at the floating rate reset date and quarterly thereafter. The table below provides summary data for the \$750 million of callable securities sold under agreements to repurchase as of June 30, 2013:

<b>(Dollars in millions)</b>	Fixed-to-floating					Floating-to-fixed		Total
	Float Rate					Fixed Rate		
Rate type	8% minus 3 month LIBOR							
Rate index								
Maximum rate	3.75%	3.50%	3.50%	3.53%	3.25%			
Minimum rate	0.0%	0.0%	0.0%	0.0%	0.0%			
No. of agreements	1	3	3	1	1	1	4	14
Amount	\$50.0	\$150.0	\$150.0	\$50.0	\$50.0	\$100.0	\$200.0	\$750.0
Weighted average rate	3.75%	3.50%	3.50%	3.53%	3.25%	4.78%	5.00%	4.07%
Final maturity	2014	2014	2015	2015	2015	2014	2017	

The table below provides summary data for non-callable fixed rate securities sold under agreements to repurchase as of June 30, 2013:

<b>Maturity</b>	<b>No. of</b>	<b>Amount</b>	<b>Weighted Average</b>	
	Agreements	(In thousands)	Interest Rate	
3 years to 5 years	3	\$ 150,000	2.71	%
Over 5 years	1	50,000	2.98	%
Total	4	\$ 200,000	2.78	%

These transactions are accounted for as collateralized financing transactions and recorded at the amounts at which the securities were sold. The Company may have to provide additional collateral for the repurchase agreements, as necessary. The underlying collateral pledged for the repurchase agreements consists of U.S. Treasury securities, U.S. government agency security debt, and mortgage-backed securities with a fair value of \$1.1 billion as of June 30, 2013, and \$1.4 billion as of December 31, 2012.

### **10. Income Taxes**

Income tax expense totaled \$33.5 million, or an effective tax rate of 36.3%, for the first six months of 2013, compared to an income tax expense of \$33.2 million, or an effective tax rate of 36.1%, for the same period a year ago. The effective tax rate includes the impact of the utilization of low income housing tax credits and recognition of other tax credits for both years.

As of December 31, 2012, the Company had income tax refunds receivable of \$12.4 million. These income tax receivables are included in other assets in the accompanying consolidated balance sheets.

The Company's tax returns are open for audits by the Internal Revenue Service back to 2010 and by the California Franchise Tax Board back to 2003. The Company is under audit by the California Franchise Tax Board for the years 2003 to 2007. As the Company is presently under audit by a number of tax authorities, it is reasonably possible that unrecognized tax benefits could change significantly over the next twelve months. The Company does not expect that any such changes would have a material impact on its annual effective tax rate.

### **11. Fair Value Measurements**

The Company adopted ASC Topic 820 on January 1, 2008, and determined the fair values of our financial instruments based on the following:

Level 1 - Quoted prices in active markets for identical assets or liabilities.

Level 2 - Observable prices in active markets for similar assets or liabilities; prices for identical or similar assets or liabilities in markets that are not active; directly observable market inputs for substantially the full term of the asset and liability; market inputs that are not directly observable but are derived from or corroborated by observable market data.

Level 3 – Unobservable inputs based on the Company’s own judgments about the assumptions that a market participant would use.

The Company uses the following methodologies to measure the fair value of its financial assets and liabilities on a recurring basis:

*Securities Available for Sale.* For certain actively traded agency preferred stocks, mutual funds, and U.S. Treasury securities, the Company measures the fair value based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures securities by using quoted market prices for similar securities or dealer quotes, a Level 2 measurement. This category generally includes U.S. Government agency securities, state and municipal securities, mortgage-backed securities (“MBS”), commercial MBS, collateralized mortgage obligations, asset-backed securities, corporate bonds and trust preferred securities.

*Trading Securities.* The Company measures the fair value of trading securities based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures the fair value for other trading securities based on quoted market prices for similar securities or dealer quotes, a Level 2 measurement.

*Warrants.* The Company measures the fair value of warrants based on unobservable inputs based on assumption and management judgment, a Level 3 measurement.

*Currency Option and Foreign Exchange Contracts.* The Company measures the fair value of currency option and foreign exchange contracts based on dealer quotes on a recurring basis, a Level 2 measurement.

*Interest Rate Swaps.* Fair value of interest rate swaps is derived from observable market prices for similar assets on a recurring basis, a Level 2 measurement.

The valuation techniques for the assets and liabilities valued on a nonrecurring basis are as follows:

*Impaired Loans.* The Company does not record loans at fair value on a recurring basis. However, from time to time, nonrecurring fair value adjustments to collateral dependent impaired loans are recorded based on either the current appraised value of the collateral, a Level 2 measurement, or management’s judgment and estimation of value reported on older appraisals that are then adjusted based on recent market trends, a Level 3 measurement.

*Goodwill.* The Company first assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in ASC Topic 350. The two-step impairment testing process, if needed, begins by assigning net assets and goodwill to the three reporting units— Commercial Lending, Retail Banking, and East Coast Operations. The Company then completes “step one” of the impairment test by comparing the fair value of each reporting unit (as determined based on the discussion below) with the recorded book value (or “carrying amount”) of its net assets, with goodwill included in the computation of the carrying amount. If the fair value of a reporting unit exceeds its carrying amount, goodwill of that reporting unit is not considered impaired, and “step two” of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its fair value, step two of the impairment test is performed to determine the amount of impairment. Step two of the impairment test compares the carrying amount of the reporting unit’s goodwill to the “implied fair value” of that goodwill. The implied fair value of goodwill is computed by assuming that all assets and liabilities of the reporting unit would be adjusted to the current fair value, with the offset as an adjustment to goodwill. This adjusted goodwill balance is the implied fair value used in step two. An impairment charge is recognized for the amount by which the carrying amount of goodwill exceeds its implied fair value. In connection with the determination of fair value, certain data and information is utilized, including earnings forecasts at the reporting unit level for the next four years. Other key assumptions include terminal values based on future growth rates and discount rates for valuing the cash flows, which have inputs for the risk-free rate, market risk premium and adjustments to reflect inherent risk and required market returns. Because of the significance of unobservable inputs in the valuation of goodwill impairment, goodwill subject to nonrecurring fair value adjustments is classified as a Level 3 measurement.

*Core Deposit Intangibles.* Core deposit intangibles is initially recorded at fair value based on a valuation of the core deposits acquired and is amortized over its estimated useful life to its residual value in proportion to the economic benefits consumed. The Company assesses the recoverability of this intangible asset on a nonrecurring basis using the core deposits remaining at the assessment date and the fair value of cash flows expected to be generated from the core deposits, a Level 3 measurement.

*Other Real Estate Owned.* Real estate acquired in the settlement of loans is initially recorded at fair value based on the appraised value of the property on the date of transfer, less estimated costs to sell, a Level 2 measurement. From time to time, nonrecurring fair value adjustments are made to other real estate owned based on the current updated appraised value of the property, also a Level 2 measurement, or management's judgment and estimation of value reported on older appraisals that are then adjusted based on recent market trends, a Level 3 measurement.

*Investments in Venture Capital.* The Company periodically reviews its investments in venture capital for other-than-temporary impairment on a nonrecurring basis. Investments in venture capital were written down to their fair value based on available financial reports from venture capital partnerships and management's judgment and estimation, a Level 3 measurement.

*Equity Investments.* The Company records equity investments at fair value on a nonrecurring basis based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement.

The following table presents the Company's hierarchy for its assets and liabilities measured at fair value on a recurring basis as of June 30, 2013, and December 31, 2012:

<b>June 30, 2013</b>	Fair Value Measurements			Total at Fair Value

The Company measured the fair value of its warrants on a recurring basis using significant unobservable inputs. The fair value of warrants was \$72,000 at June 30, 2013, compared to \$104,000 at December 31, 2012. The fair value adjustment of warrants was included in other operating income in the second quarter of 2013.

For financial assets measured at fair value on a nonrecurring basis that were still reflected in the balance sheet at June 30, 2013, the following table provides the level of valuation assumptions used to determine each adjustment the carrying value of the related individual assets as of June 30, 2013, and December 31, 2012, and the total losses/(gains) for the periods indicated:

	June 30, 2013			Total at Fair Value	Total Losses/(gains)

(1) Other real estate owned balance of \$46.4 million in the condensed consolidated balance sheet is net of estimated disposal costs.

The significant unobservable (Level 3) inputs used in the fair value measurement of collateral for collateral-dependent impaired loans was primarily based on the appraised value of collateral adjusted by estimated sales cost and commissions. The Company generally obtains new appraisal reports every six months. As the Company's primary objective in the event of default would be to monetize the collateral to settle the outstanding balance of the loan, less marketable collateral would receive a larger discount. During the reported periods, collateral discounts ranged from 45% in the case of accounts receivable collateral to 65% in the case of inventory collateral.

The significant unobservable inputs used in the fair value measurement of loans held for sale was primarily based on the quoted price or sale price adjusted by estimated sales cost and commissions. The significant unobservable inputs used in the fair value measurement of other real estate owned (“OREO”) was primarily based on the appraised value of OREO adjusted by estimated sales cost and commissions.

The Company applies estimated sales cost and commission ranging from 3% to 6% to collateral value of impaired loans, quoted price or loan sale price of loans held for sale, and appraised value of OREOs.

The significant unobservable inputs in the Black-Scholes option pricing model for the fair value of warrants are the expected life of warrant ranging from 1 to 4 years, risk-free interest rate from 0.38% to 1.05%, and stock volatility from 10.4% to 16.7%.

## **12. Fair Value of Financial Instruments**

The following methods and assumptions were used to estimate the fair value of each class of financial instruments.

*Cash and Cash Equivalents.* For cash and cash equivalents, the carrying amount was assumed to be a reasonable estimate of fair value, a Level 1 measurement.

*Short-term Investments.* For short-term investments, the carrying amount was assumed to be a reasonable estimate of fair value, a Level 1 measurement.

*Securities Purchased under Agreements to Resell.* The fair value of securities purchased under agreements to resell is based on dealer quotes, a Level 2 measurement.

*Securities.* For securities, including securities held-to-maturity, available-for-sale and for trading, fair values were based on quoted market prices at the reporting date. If a quoted market price was not available, fair value was estimated using quoted market prices for similar securities or dealer quotes. For certain actively traded agency preferred stocks and U.S. Treasury securities, the Company measures the fair value based on quoted market prices in active exchange markets at the reporting date, a Level 1 measurement. The Company also measures securities by using quoted market prices for similar securities or dealer quotes, a Level 2 measurement. This category generally includes U.S. Government agency securities, state and municipal securities, mortgage-backed securities (“MBS”),

commercial MBS, collateralized mortgage obligations, asset-backed securities, and corporate bonds.

*Loans.* Fair values were estimated for portfolios of loans with similar financial characteristics. Each loan category was further segmented into fixed and adjustable rate interest terms and by performing and non-performing categories.

The fair value of performing loans was calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk inherent in the loan, a Level 3 measurement.

The fair value of impaired loans was calculated based on the net realizable fair value of the collateral or the observable market price of the most recent sale or quoted price from loans held for sale. The Company does not record loans at fair value on a recurring basis. Nonrecurring fair value adjustments to collateral dependent impaired loans are recorded based on the current appraised value of the collateral, a Level 2 measurement.

*Deposit Liabilities.* The fair value of demand deposits, savings accounts, and certain money market deposits was assumed to be the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit was estimated using the rates currently offered for deposits with similar remaining maturities, a Level 3 measurement.

*Securities Sold under Agreements to Repurchase.* The fair value of securities sold under agreements to repurchase is based on dealer quotes, a Level 2 measurement.

*Advances from Federal Home Loan Bank (“FHLB”).* The fair value of the advances is based on quotes from the FHLB to settle the advances, a Level 2 measurement.

*Other Borrowings.* This category includes borrowings from other financial institutions. The fair value of other borrowings is calculated by discounting scheduled cash flows through the estimated maturity using estimated market discount rates that reflect the credit and interest rate risk, a Level 3 measurement.

*Long-term Debt.* The fair value of long-term debt is estimated based on the quoted market prices or dealer quotes, a Level 2 measurement.

*Currency Option and Foreign Exchange Contracts.* The Company measures the fair value of currency option and foreign exchange contracts based on dealer quotes, a Level 2 measurement.

*Interest Rate Swaps.* Fair value of interest rate swaps was derived from observable market prices for similar assets, a Level 2 measurement.

*Off-Balance-Sheet Financial Instruments.* The fair value of commitments to extend credit, standby letters of credit, and financial guarantees written were estimated using the fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements and the present creditworthiness of the counter parties. The fair value of guarantees and letters of credit was based on fees currently charged for similar agreements or on the estimated cost to terminate them or otherwise settle the obligations with the counter parties at the reporting date. The fair value of off-balance-sheet financial instruments was based on the assumptions that a market participant would use, a Level 3 measurement.

Fair value was estimated in accordance with ASC Topic 825, formerly SFAS 107. Fair value estimates were made at specific points in time, based on relevant market information and information about the financial instrument. These estimates do not reflect any premium or discount that could result from offering for sale at one time the Bank's entire holdings of a particular financial instrument. Because no market exists for a significant portion of the Bank's financial instruments, fair value estimates were based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates were subjective in nature and involved uncertainties and matters of significant judgment and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates. The following table presents the estimated fair value of financial instruments as of June 30, 2013, and as of December 31, 2012:

	<b>June 30, 2013</b>		<b>31-Dec-12</b>

### **13. Goodwill and Goodwill Impairment**

The Company's policy is to assess goodwill for impairment at the reporting unit level on an annual basis or between annual assessments if a triggering event occurs or circumstances change that would more likely than not reduce the fair value of a reporting unit below its carrying amount. Impairment is the condition that exists when the carrying amount of goodwill exceeds its implied fair value.

The Company first assesses qualitative factors to determine whether it is more likely than not that the fair value of a reporting unit is less than its carrying amount as a basis for determining whether it is necessary to perform the two-step goodwill impairment test described in ASC Topic 350. The two-step impairment testing process, if needed, begins by assigning net assets and goodwill to our three reporting units— Commercial Lending, Retail Banking, and East Coast Operations. The Company then completes “step one” of the impairment test by comparing the fair value of each reporting unit (as determined based on the discussion below) with the recorded book value (or “carrying amount”) of its net assets, with goodwill included in the computation of the carrying amount. If the fair value of a reporting unit exceeds its carrying amount, goodwill of that reporting unit is not considered impaired, and “step two” of the impairment test is not necessary. If the carrying amount of a reporting unit exceeds its fair value, step two of the impairment test is performed to determine the amount of impairment. Step two of the impairment test compares the carrying amount of the reporting unit's goodwill to the “implied fair value” of that goodwill. The implied fair value of goodwill is computed by assuming that all assets and liabilities of the reporting unit would be adjusted to the current fair value, with the offset as an adjustment to goodwill. This adjusted goodwill balance is the implied fair value used in step two. An impairment charge is recognized for the amount by which the carrying amount of goodwill exceeds its implied fair value.

At June 30, 2013, the Company's market capitalization was above book value and there was no triggering event that required the Company to assess goodwill for impairment as of an interim date.

#### **14. Financial Derivatives**

It is the policy of the Company not to speculate on the future direction of interest rates. However, the Company enters into financial derivatives in order to seek mitigation of exposure to interest rate risks related to our interest-earning assets and interest-bearing liabilities. We believe that these transactions, when properly structured and managed, may provide a hedge against inherent interest rate risk in the Company's assets or liabilities and against risk in specific transactions. In such instances, the Company may protect its position through the purchase or sale of interest rate futures contracts for a specific cash or interest rate risk position. Other hedge transactions may be implemented using interest rate swaps, interest rate caps, floors, financial futures, forward rate agreements, and options on futures or bonds. Prior to considering any hedging activities, we seek to analyze the costs and benefits of the hedge in comparison to other viable alternative strategies. All hedges will require an assessment of basis risk and must be approved by the Bank's Investment Committee.

The Company follows ASC Topic 815 which establishes accounting and reporting standards for financial derivatives, including certain financial derivatives embedded in other contracts, and hedging activities. It requires the recognition of all financial derivatives as assets or liabilities in the Company's consolidated balance sheet and measurement of those financial derivatives at fair value. The accounting treatment of changes in fair value is dependent upon whether or not a financial derivative is designated as a hedge and, if so, the type of hedge.

The Company enters into foreign exchange forward contracts and foreign currency option contracts with various counter parties to mitigate the risk of fluctuations in foreign currency exchange rates for foreign exchange certificates of deposit, foreign exchange contracts, or foreign currency option contracts entered into with our clients. These contracts are not designated as hedging instruments and are recorded at fair value in our condensed consolidated balance sheets. Changes in the fair value of these contracts as well as the related foreign exchange certificates of deposit, foreign exchange contracts or foreign currency option contracts are recognized immediately in net income as a component of non-interest income. Period end gross positive fair values are recorded in other assets and gross negative fair values are recorded in other liabilities. At June 30, 2013, the notional amount of option contracts totaled \$510,000 with a net positive fair value of \$55,000. Spot and forward contracts in the total notional amount of \$210.7 million had a positive fair value of \$3.2 million at June 30, 2013. Spot and forward contracts in the total notional amount of \$233.1 million had a negative fair value of \$6.2 million at June 30, 2013. At December 31, 2012, the notional amount of option contracts totaled \$209,000 with a net negative fair value of \$2,000. Spot and forward contracts in the total notional amount of \$188.1 million had a positive fair value of \$2.9 million at December 31, 2012. Spot and forward contracts in the total notional amount of \$133.7 million had a negative fair value of \$1.6 million at December 31, 2012.

**15. Balance Sheet Offsetting**

Certain financial instruments, including resell and repurchase agreements, securities lending arrangements and derivatives, may be eligible for offset in the consolidated balance sheet and/or subject to master netting arrangements or similar agreements. The Company's securities sold with agreement to repurchase and derivative transactions with upstream financial institution counterparties are generally executed under International Swaps and Derivative Association master agreements which include "right of set-off" provisions. In such cases there is generally a legally enforceable right to offset recognized amounts and there may be an intention to settle such amounts on a net basis. Nonetheless, the Company does not generally offset such financial instruments for financial reporting purposes.

Financial instruments that are eligible for offset in the consolidated balance sheet as of June 30, 2013, and December 31, 2012, are presented in the following tables:

(In thousands)	Gross Amounts of Recognized Liabilities	Gross Amounts Offset in the Balance Sheet	Net Amounts of Liabilities presented in the Balance Sheet	Gross Amounts Not Offset in the Statement of Financial Position		Net Amount
				Financial Instruments	Collateral Posted	
June 30, 2013

**16. Stockholders' Equity**

Total equity was \$1.54 billion at June 30, 2013, a decrease of \$90.1 million, or 5.5%, from \$1.63 billion at December 31, 2012, primarily due to the redemption on March 20, 2013, of \$129 million, or 50%, of Bancorp's Series B Preferred Stock issued under the U.S. Treasury's TARP Capital Purchase Program and increases in unrealized losses on securities available for sale of \$15.5 million offset by increases of \$59.1 million in net income. A \$1.3 million noncash charge associated with the redemption of Series B Preferred Stock was reflected in net income available to common stockholders.

The accumulated other comprehensive loss as of June 30, 2013, was all from unrealized losses on securities available-for-sale. Activity in accumulated other comprehensive income, net of tax, and reclassification out of accumulated other comprehensive income for the three months and six months ended June 30, 2013, was as follows:

	Three months ended June 30, 2013			Six months ended June 30, 2013		
	Pre-tax	Tax expense	Net-of-tax	Pre-tax	Tax expense	Net-of-tax

## **Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.**

The following discussion is given based on the assumption that the reader has access to and has read the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

### **Critical Accounting Policies**

The discussion and analysis of the Company's unaudited condensed consolidated balance sheets and results of operations are based upon its unaudited condensed consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these condensed consolidated financial statements requires management to make estimates and judgments that affect the reported amounts of assets and liabilities, revenues and expenses, and related disclosures of contingent assets and liabilities at the date of our financial statements. Actual results may differ from these estimates under different assumptions or conditions.

Management of the Company considers the following to be critical accounting policies:

Accounting for the allowance for credit losses involves significant judgments and assumptions by management, which have a material impact on the carrying value of net loans. The judgments and assumptions used by management are based on historical experience and other factors, which are believed to be reasonable under the circumstances as described in “*Allowance for Credit Losses*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

Accounting for investment securities involves significant judgments and assumptions by management, which have a material impact on the carrying value of securities and the recognition of any “other-than-temporary” impairment to our investment securities. The judgments and assumptions used by management are described in “*Investment Securities*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

Accounting for income taxes involves significant judgments and assumptions by management, which have a material impact on the amount of taxes currently payable and the income tax expense recorded in the financial statements. The judgments and assumptions used by management are described in “*Income Taxes*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

Accounting for goodwill and goodwill impairment involves significant judgments and assumptions by management, which have a material impact on the amount of goodwill and noninterest expense recorded in the financial statements. The judgments and assumptions used by management are described in “*Goodwill and Goodwill Impairment*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

Accounting for other real estate owned involves significant judgments and assumptions by management, which have a material impact on the value of other real estate owned and noninterest expense recorded in the financial statements. The judgments and assumptions used by management are described in “*Valuation of Other Real Estate Owned (OREO)*” under “Management’s Discussion and Analysis of Financial Condition and Results of Operations—Critical Accounting Policies” in the Company’s Annual Report on Form 10-K for the year ended December 31, 2012.

## Highlights

Strong loan growth of \$330 million, or 4.5%, to \$7.69 billion at June 30, 2013, from \$7.36 billion at March 31, 2013.

Conversion to a new core processing system on July 15, 2013

## Quarterly Statement of Operations Review

### Net Income

Net income available to common stockholders for the quarter ended June 30, 2013, was \$27.8 million, an increase of \$2.1 million, or 8.2%, compared to a net income available to common stockholders of \$25.7 million for the same quarter a year ago. Diluted earnings per share available to common stockholders for the quarter ended June 30, 2013, was \$0.35 compared to \$0.33 for the same quarter a year ago due primarily to increases in gains on sale of securities and decreases in other real estate owned (“OREO”) expenses offset by increases in costs associated with debt redemption and the reversal for credit losses in 2012.

Return on average stockholders' equity was 7.74% and return on average assets was 1.15% for the quarter ended June 30, 2013, compared to a return on average stockholders' equity of 7.72% and a return on average assets of 1.13% for the same quarter a year ago.

**Financial Performance**

	Three months ended June 30,	
	2013	2012
Net income	\$29.9 million	\$29.9 million
Net income available to common stockholders	\$27.8 million	\$25.7 million
Basic earnings per common share	\$0.35	\$0.33
Diluted earnings per common share	\$0.35	\$0.33
Return on average assets	1.15%	1.13%
Return on average total stockholders' equity	7.74%	7.72%
Efficiency ratio	53.53%	53.21%

**Net Interest Income Before Provision for Credit Losses**

Net interest income before provision for credit losses increased \$874,000, or 1.1%, to \$80.0 million during the second quarter of 2013 compared to \$79.1 million during the same quarter a year ago. The increase was due primarily to the decrease in interest expense from time deposits and securities sold under agreements to repurchase offset by the decrease in interest income from investment securities.

The net interest margin, on a fully taxable-equivalent basis, was 3.30% for the second quarter of 2013, compared to 3.35% for the first quarter of 2013, and 3.24% for the second quarter of 2012. The decrease in the interest expense on time deposits and securities sold under agreements to repurchase offset by decrease in earnings on investment securities and loans contributed to the increase in the net interest margin compared to the second quarter of 2012. The net interest margin for the first quarter of 2013 was favorably impacted by a higher than normal amount of interest recognized on payoff of loans that had been on nonaccrual status.

For the second quarter of 2013, the yield on average interest-earning assets was 4.16%, on a fully taxable-equivalent basis, the cost of funds on average interest-bearing liabilities was 1.11%, and the cost of interest bearing deposits was 0.63%. In comparison, for the second quarter of 2012, the yield on average interest-earning assets was 4.39%, on a fully taxable-equivalent basis, the cost of funds on average interest-bearing liabilities was 1.45%, and the cost of interest bearing deposits was 0.80%. The interest spread, defined as the difference between the yield on average interest-earning assets and the cost of funds on average interest-bearing liabilities, increased 11 basis points to 3.05% for the quarter ended June 30, 2013, from 2.94% for the same quarter a year ago, primarily for the reasons discussed above.

Edgar Filing: CATHAY GENERAL BANCORP - Form 10-Q

The following table sets forth information concerning average interest-earning assets, average interest-bearing liabilities, and the average yields and rates paid on those assets and liabilities for the three months ended June 30, 2013, and 2012. Average outstanding amounts included in the table are daily averages.

Changes in net interest income	\$7,049	\$(6,718 )	\$331

(1) Changes in interest income and interest expense attributable to changes in both volume and rate have been allocated proportionately to changes due to volume and changes due to rate.

(2) The amount of interest earned on certain securities of states and political subdivisions and other securities held has been adjusted to a fully taxable-equivalent basis using a statutory Federal income tax rate of 35%.

**Provision for Credit Losses**

There was no provision for credit losses for the second quarter of 2013 compared to a credit of \$5.0 million in the second quarter of 2012. The provision for credit losses was based on the review of the adequacy of the allowance for loan losses at June 30, 2013. The provision or reversal for credit losses represents the charge against or benefit toward current earnings that is determined by management, through a credit review process, as the amount needed to establish an allowance that management believes to be sufficient to absorb credit losses inherent in the Company's loan portfolio, including unfunded commitments. The following table summarizes the charge-offs and recoveries for the periods indicated:

	Three months ended June 30, 2013 2012		Six months ended June 30, 2013 2012	
	(In thousands)			
Charge-offs:				
Commercial loans	\$1,690	\$2,133	\$4,380	\$7,092

Real estate loans (1)	1,189	1,983	2,319	10,910
Real estate- land loans	1,048	25	1,318	99
Installment and other loans	-	-	-	25
Total charge-offs	3,927	4,392	8,017	19,252
Recoveries:				
Commercial loans	624	153	1,579	899
Construction loans- residential	108	1,364	154	3,263
Construction loans- other	833	227	866	1,885
Real estate loans (1)	2,645	4,836	3,004	6,467
Real estate- land loans	645	373	654	1,166
Installment and other loans	11	-	11	3
Total recoveries	4,866	6,953	6,268	13,683
Net (recoveries)/charge-offs	\$(939 )	\$(2,561)	\$1,749	\$5,569

(1) Real estate loans include commercial mortgage loans, residential mortgage loans and equity lines.

### Non-Interest Income

Non-interest income, which includes revenues from depository service fees, letters of credit commissions, securities gains (losses), gains (losses) on loan sales, wire transfer fees, and other sources of fee income, was \$20.4 million for the second quarter of 2013, an increase of \$10.5 million, or 107%, compared to \$9.9 million for the second quarter of 2012. The increase in non-interest income in the second quarter of 2013 was primarily due to an increase of \$9.8 million from gains on sale of securities and an increase of \$625,000 in commissions from wealth management.

### Non-Interest Expense

Non-interest expense increased \$6.4 million, or 13.5%, to \$53.7 million in the second quarter of 2013 compared to \$47.3 million in the same quarter a year ago. The efficiency ratio was 53.53% in the second quarter of 2013 compared to 53.21% for the same quarter a year ago.

Prepayment penalties increased to \$10.1 million in the second quarter of 2013 compared to zero in the same quarter a year ago. The Company prepaid securities sold under agreements to repurchase of \$200.0 million in the second quarter of 2013. Salaries and employee benefits increased \$1.5 million, or 7.4%, in the second quarter of 2013 compared to the same quarter a year ago primarily due to the hiring of new employees as well as an increase in the number of temporary employees assisting in the core system conversion. Professional expense increased \$1.7 million to \$6.9 million in the second quarter of 2013 compared to \$5.2 million in the same quarter a year ago primarily due to higher legal collection expenses of \$738,000 and higher consulting expenses of \$1.1 million. Offsetting the above increases was a \$7.3 million decrease in OREO expenses. Decreases in the OREO writedowns of \$5.6 million and OREO operating expenses of \$1.4 million contributed primarily to the decrease in OREO expenses.

## Income Taxes

The effective tax rate for the second quarter of 2013 was 35.7% compared to 35.8% in the second quarter of 2012. The effective tax rate includes the impact of the utilization of low income housing tax credits and the recognition of other tax credits.

## Year-to-Date Statement of Operations Review

Net income attributable to common stockholders for the six months ended June 30, 2013, was \$51.5 million, an increase of \$1.0 million, or 1.9%, compared to net income attributable to common stockholders of \$50.5 million for the same period a year ago due primarily to increases in gains on sale of securities, decreases in OREO expenses, and increases in commissions from wealth management, offset by decreases in the reversal for credit losses, increases in prepayment penalties on the prepayment of securities sold under an agreement to repurchase, increases in salaries and incentive compensation expense, increases in consulting expense, and increases in legal and collection expense. Diluted earnings per share was \$0.65 compared to \$0.64 per share for the same period a year ago. The net interest margin for the six months ended June 30, 2013, increased 5 basis points to 3.33% compared to 3.28% for the same period a year ago.

Return on average stockholders' equity was 7.47% and return on average assets was 1.13% for the six months ended June 30, 2013, compared to a return on average stockholders' equity of 7.67% and a return on average assets of 1.12% for the same period of 2012. The efficiency ratio for the six months ended June 30, 2013, was 52.64% compared to 53.35% for the same period a year ago.

The following table sets forth information concerning average interest-earning assets, average interest-bearing liabilities, and the average yields and rates paid on those assets and liabilities for the six months ended June 30, 2013, and 2012. Average outstanding amounts included in the table are daily averages.

(1) Changes in interest income and interest expense attributable to changes in both volume and rate have been allocated proportionately to changes due to volume and changes due to rate.

(2) The amount of interest earned on certain securities of states and political subdivisions and other securities held has been adjusted to a fully taxable-equivalent basis using a statutory federal income tax rate of 35%.

**Balance Sheet Review**

## Assets

Total assets were \$10.60 billion at June 30, 2013, a decrease of \$90.9 million, or 0.8%, from \$10.69 billion at December 31, 2012, primarily due to a \$272.1 million decrease in short-term investments and interest bearing deposits, a \$46.9 million decrease in investment securities, a \$18.2 million decrease in customers' liability on acceptances, and a \$8.4 million decrease in Federal Home Loan Bank stock offset by a \$265.2 million increase in loans.

## Investment Securities

Investment securities represented 19.0% of total assets at June 30, 2013, compared with 19.3% of total assets at December 31, 2012. The carrying value of investment securities at June 30, 2013, was \$2.02 billion compared with \$2.06 billion at December 31, 2012. Securities available-for-sale are carried at fair value and had a net unrealized loss of \$15.1 million at June 30, 2013, compared with a net unrealized gain of \$465,000 at December 31, 2012. During the first quarter of 2013, due to the ongoing discussions regarding corporate income tax rates which could have a negative impact on the after-tax yields and fair values of the Company's portfolio of municipal securities, the Company determined it may sell such securities in response to market conditions. As a result, the Company reclassified its municipal securities from securities held-to-maturity to securities available-for-sale. Concurrent with this reclassification, the Company also reclassified all other securities held-to-maturity, which together with the municipal securities had an amortized cost on the date of transfer of \$722.5 million, to securities available-for-sale. At the reclassification date, a net unrealized gain was recorded in other comprehensive income for these securities totaling \$40.5 million.

The following table reflects the amortized cost, gross unrealized gains, gross unrealized losses, and fair value of investment securities as of June 30, 2013, and December 31, 2012:

	<b>June 30, 2013</b>

For additional information, see Note 6 to the Company's condensed consolidated financial statements presented elsewhere in this report.

Investment securities having a carrying value of \$1.12 billion at June 30, 2013, and \$1.45 billion at December 31, 2012, were pledged to secure public deposits, other borrowings, treasury tax and loan, Federal Home Loan Bank advances, securities sold under agreements to repurchase, interest rate swaps, and foreign exchange transactions.

**Loans**

Gross loans were \$7.69 billion at June 30, 2013, an increase of \$265.2 million, or 3.6%, from \$7.43 billion at December 31, 2012, primarily due to an increase of \$141.1 million, or 3.7%, in commercial mortgage loans, an increase of \$83.7 million, or 3.9%, in commercial loans and an increase of \$78.5 million, or 6.8%, in residential mortgage loans offset by a decrease of \$27.3 million, or 15.1%, in construction loans and a decrease of \$11.0 million, or 5.7%, in equity lines. The following table sets forth the classification of loans by type, mix, and percentage change as of the dates indicated:

	<b>June 30, 2013</b>	<b>% of Gross Loans</b>		<b>December 31, 2012</b>	<b>% of Gross Loans</b>	<b>% Change</b>		
<b>Type of Loans</b>	<b>(Dollars in thousands)</b>							
Commercial loans	\$2,210,761	28.7	%	\$2,127,107	28.6	%	3.9	%
Residential mortgage loans	1,224,692	15.9		1,146,230	15.4		6.8	
Commercial mortgage loans	3,909,559	50.8		3,768,452	50.7		3.7	
Equity lines	182,855	2.4		193,852	2.6		(5.7)	)
Real estate construction loans	153,663	2.0		180,950	2.5		(15.1)	)
Installment and other loans	12,843	0.2		12,556	0.2		2.3	
Gross loans	\$7,694,373	100	%	\$7,429,147	100	%	3.6	%
Allowance for loan losses	(179,733 )			(183,322 )			(2.0)	)
Unamortized deferred loan fees	(11,685 )			(10,238 )			14.1	
Total loans, net	\$7,502,955			\$7,235,587			3.7	%

**Non-performing Assets**

Non-performing assets include loans past due 90 days or more and still accruing interest, non-accrual loans, and other real estate owned. The Company's policy is to place loans on non-accrual status if interest and/or principal is past due 90 days or more, or in cases where management deems the full collection of principal and interest unlikely. After a loan is placed on non-accrual status, any previously accrued but unpaid interest is reversed and charged against current income and subsequent payments received are generally first applied towards the outstanding principal balance of the loan. Depending on the circumstances, management may elect to continue the accrual of interest on certain past due loans if partial payment is received and/or the loan is well collateralized and in the process of collection. The loan is generally returned to accrual status when the borrower has brought the past due principal and interest payments current and, in the opinion of management, the borrower has demonstrated the ability to make future payments of principal and interest as scheduled.

Management reviews the loan portfolio regularly for problem loans. During the ordinary course of business, management becomes aware of borrowers that may not be able to meet the contractual requirements of the loan agreements. Such loans are placed under closer supervision with consideration given to placing the loans on non-accrual status, the need for an additional allowance for loan losses, and (if appropriate) partial or full charge-off.

The ratio of non-performing assets to total assets was 1.4% at June 30, 2013, compared to 1.4% at December 31, 2012. Total non-performing assets decreased \$6.1 million, or 4.1%, to \$144.8 million at June 30, 2013, compared to \$150.9 million at December 31, 2012, primarily due to a \$8.3 million, or 8.0%, decrease in non-accrual loans offset by a \$2.8 million, or 5.9%, increase in OREO.

As a percentage of gross loans, excluding loans held for sale, plus OREO, our non-performing assets decreased to 1.87% at June 30, 2013, from 2.02% at December 31, 2012. The non-performing portfolio loan coverage ratio, defined as the allowance for credit losses to non-performing loans, increased to 191.3% at June 30, 2013, from 176.7% at December 31, 2012.

The following table presents the changes in non-performing assets and TDRs at June 30, 2013, compared to December 31, 2012, and to June 30, 2012:

<b>(Dollars in thousands)</b>	June 30, 2013	December 31, 2012	% Change	June 30, 2012	% Change
<b>Non-performing assets</b>					
Accruing loans past due 90 days or more	\$-	\$630	(100 )	\$746	(100 )

Non-accrual loans held for sale	\$-	\$-	-	\$500	(100 )
Allowance for loan losses	\$179,733	\$183,322	(2 )	\$192,274	(7 )
Allowance for off-balance sheet credit commitments	3,203	1,362	135	1,505	113
Allowance for credit losses	\$182,936	\$184,684	(1 )	\$193,779	(6 )
Total gross loans outstanding, at period-end (1)	\$7,694,373	\$7,429,147	4	\$7,043,683	9
Allowance for loan losses to non-performing loans, at period-end (2)	187.98	%	175.37	%	155.60
Allowance for loan losses to gross loans, at period-end (1)	2.34	%	2.47	%	2.73
Allowance for credit losses to gross loans, at period-end (1)	2.38	%	2.49	%	2.75

(1) Excludes loans held for sale at period-end.

(2) Excludes non-accrual loans held for sale at period-end.

### Non-accrual Loans

At June 30, 2013, total non-accrual loans, excluding loans held for sale, were \$95.6 million, a decrease of \$27.2 million, or 22.2%, from \$122.8 million at June 30, 2012, and a decrease of \$8.3 million, or 8.0%, from \$103.9 million at December 31, 2012. The allowance for the collateral-dependent loans is calculated based on the difference between the outstanding loan balance and the value of the collateral as determined by recent appraisals, sales contracts, or other

available market price information. The allowance for collateral-dependent loans varies from loan to loan based on the collateral coverage of the loan at the time of designation as non-performing. We continue to monitor the collateral coverage, based on recent appraisals, of these loans on a quarterly basis and adjust the allowance accordingly. Non-accrual loans also include those troubled debt restructurings that do not qualify for accrual status.

The following tables present the type of properties securing the non-accrual portfolio loans and the type of businesses the borrowers engaged in as of the dates indicated:

<b>June 30, 2013</b>	<b>December 31, 2012</b>
<b>Real Estate (1) Commercial</b>	<b>Real Estate (1)</b>
