Notes to Consolidated Financial Statements
(unaudited)

1. Organization and Description of Business

STAG Industrial, Inc. (the “Company”) is an industrial real estate operating company focused on the acquisition and operation of single-tenant, industrial properties throughout the United States. The Company was formed as a Maryland corporation and has elected to be treated and intends to continue to qualify as a real estate investment trust (“REIT”) under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended. The Company is structured as an umbrella partnership REIT, commonly called an UPREIT, and owns substantially all of its assets and conducts substantially all of its business through its operating partnership, STAG Industrial Operating Partnership, L.P., a Delaware limited partnership (the “Operating Partnership”). As of March 31, 2019 and December 31, 2018, the Company owned a 96.7% and 96.5%, respectively, common equity interest in the Operating Partnership. The Company, through its wholly owned subsidiary, is the sole general partner of the Operating Partnership. As used herein, the “Company” refers to STAG Industrial, Inc. and its consolidated subsidiaries and partnerships, including the Operating Partnership, except where context otherwise requires.

As of March 31, 2019, the Company owned 395 buildings in 38 states with approximately 78.2 million rentable square feet, consisting of 328 warehouse/distribution buildings, 58 light manufacturing buildings, and nine flex/office buildings. The Company’s buildings were approximately 95.2% leased to 359 tenants as of March 31, 2019.

2. Summary of Significant Accounting Policies

Interim Financial Information

The accompanying interim financial statements have been presented in conformity with accounting principles generally accepted in the United States of America (“GAAP”) and with the instructions to Form 10-Q and Regulation S-X for interim financial information. Accordingly, these statements do not include all of the information and notes required by GAAP for complete financial statements. In the opinion of management, the accompanying interim financial statements include all adjustments, consisting of normal recurring items, necessary for their fair statement in conformity with GAAP. Interim results are not necessarily indicative of results for a full year. The year-end consolidated balance sheet data was derived from audited financial statements, but does not include all disclosures required by GAAP. The information included in this Quarterly Report on Form 10-Q should be read in conjunction with the Company’s consolidated financial statements and notes thereto contained in the Company’s Annual Report on Form 10-K for the fiscal year ended December 31, 2018.

Basis of Presentation

The Company’s consolidated financial statements include the accounts of the Company, the Operating Partnership, and their subsidiaries. Interests in the Operating Partnership not owned by the Company are referred to as “Noncontrolling Common Units.” These Noncontrolling Common Units are held by other limited partners in the form of common units (“Other Common Units”) and long term incentive plan units (“LTIP units”) issued pursuant to the STAG Industrial, Inc. 2011 Equity Incentive Plan, as amended and restated (the “2011 Plan”). All significant intercompany balances and transactions have been eliminated in the consolidation of entities. The financial statements of the Company are presented on a consolidated basis for all periods presented.

New Accounting Standards and Reclassifications

New Accounting Standards Adopted

In July 2018, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) 2018-11 which amends Topic 842, Leases, and provides lessors with a practical expedient, by class of underlying asset, to not separate non-lease components from the associated lease component and, instead, to account for those components as a single component if the non-lease components otherwise would be accounted for under the new revenue guidance and both of the following are met: i) the timing and pattern of transfer of the non-lease component(s) and associated lease component are the same; and ii) the lease component, if accounted for separately, would be classified as an operating lease. Under this new expedient, if the non-lease components associated with the lease component are the predominant component of the combined component, a company should account for the combined component in accordance with Topic 606, Revenue from Contracts with Customers. Otherwise, the company should account for the combined component as an operating lease in accordance with Topic 842. In December 2018, the FASB issued ASU 2018-20 which amends Topic 842, Leases, and allows lessors to continue to exclude from revenue the lessor costs that are paid by lessees directly to third parties. The Company adopted Topic 842 on January 1, 2019, using the practical expedient, and i

Table of Contents

t did not have a material impact on the Company's consolidated financial statements. The Company determined that for all leases where the Company is the lessor, that the timing and pattern of transfer of the non-lease components and associated lease components are the same, and that the lease components, if accounted for separately, would be classified as an operating lease. Accordingly, the Company has made an accounting policy election to recognize the combined component in accordance with Topic 842 as rental income on the accompanying Consolidated Statements of Operations.

In February 2016, the FASB issued ASU 2016-02, Leases (Topic 842), and various subsequent ASU's, which set out the principles for the recognition, measurement, presentation and disclosure of leases for both parties to a contract (i.e. lessees and lessors). Topic 842 superseded the previous leases standard, Topic 840, Leases. The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based on the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification determines whether lease expense is recognized based on an effective interest method or on a straight line basis over the term of the lease, respectively. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Leases with a term of 12 months or less are accounted for similar to the previous guidance for operating leases. The new standard requires lessors to account for leases using an approach that is substantially equivalent to the previous guidance for sales-type leases, direct financing leases and operating leases. ASU 2016-02 impacted the Company's consolidated financial statements as the Company has ground leases and its corporate office lease for which it is the lessee, which resulted in the recording of a right-of-use asset and the related lease liability.

The Company adopted ASU 2016-02 on January 1, 2019, using the modified retrospective transition method. The adoption of this standard resulted in a cumulative effect adjustment of approximately \$0.2 million recorded as an increase to cumulative dividends in excess of earnings as of January 1, 2019 in the accompanying Consolidated Statements of Equity. The cumulative effect adjustment related to initial direct costs of leases where the Company is the lessor and that, as of January 1, 2019, had not begun to amortize and are no longer allowed to be capitalized under the new standard. On January 1, 2019, the Company recognized operating lease right-of-use assets of approximately \$16.3 million and related operating lease liabilities of approximately \$18.0 million on the accompanying Consolidated Balance Sheets, related to the leases where the Company is the lessee. The Company adopted the new standard using the practical expedient package which allowed the Company to (i) not reassess whether any expired or existing contracts are or contain leases; (ii) not reassess the lease classification for any expired or existing leases; and (iii) not reassess initial direct costs for any existing leases. This practical expedient allows the Company to continue to account for its ground leases as operating leases. Prospectively, any new or modified ground leases may be classified as a financing lease. The adoption of this standard by the Company has been applied prospectively, and the comparative periods have not been restated.

For leases in which the Company is the lessee, the Company recognizes a right-of-use asset and corresponding lease liability on the accompanying Consolidated Balance Sheets equal to the present value of the fixed lease payments. In determining operating right-of-use asset and lease liability for the Company's existing operating leases upon the adoption of the new lease guidance, the Company was required to estimate an appropriate incremental borrowing rate on a fully-collateralized basis for the terms of the leases. The Company utilized a market-based approach to estimate the incremental borrowing rate for each individual lease. Since the terms under the ground leases are significantly longer than the terms of borrowings available to the Company on a fully-collateralized basis, the estimate of this rate required significant judgment, and considered factors such as yields on outstanding public debt and other market based pricing on longer duration financing instruments.

The new leases standard requires the Company to evaluate cash basis versus accrual basis of rental income recognition based on the collectability of future lease payments.

Reclassifications

Prior period amounts have been reclassified to conform to the current year presentation due to the adoption of ASU 2016-02. Amounts previously classified as rental income and tenant recoveries in the prior period are now classified as rental income on the accompanying Consolidated Statements of Operations, as the Company has made an accounting policy election to combine these amounts that are accounted for under the new leases standard.

Dispositions

During the three months ended March 31, 2019, the Company sold five buildings comprised of approximately 1.0 million square feet with a net book value of approximately \$15.3 million to third parties. These buildings contributed approximately \$0.1 million and \$1.1 million to revenue for the three months ended March 31, 2019 and 2018, respectively. These buildings contributed approximately \$(0.2) million and \$0.5 million to net income (loss) (exclusive of gain on the sales of rental property, net) for the three months ended March 31, 2019 and 2018, respectively. Net proceeds from the sales of rental property were approximately \$16.6 million and the Company recognized the full gain on the sales of rental property, net, of approximately \$1.3 million for the three months ended March 31, 2019.

Loss on Impairments

The following table summarizes the Company's loss on impairments for assets held and used during the three months ended March 31, 2019.

Market ⁽¹⁾	Buildings	Event or Change in Circumstance Leading to Impairment Evaluation ⁽²⁾	Valuation technique utilized to estimate fair value	Fair Value ⁽³⁾	Loss on Impairments (in thousands)

Three months ended March 31, 2019				\$4,373	\$ 5,344

(1) As defined by CoStar. If the building is located outside of a CoStar defined market, the city and state is reflected.

The Company tested the asset group for impairment utilizing a probability weighted recovery analysis of certain (2) scenarios, and it was determined that the carrying value of the property and intangibles were not recoverable from the estimated future undiscounted cash flows.

The estimated fair value of the property is based on Level 3 inputs and is a non-recurring fair value measurement.

(3) Level 3 is defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions.

(4) Level 3 inputs used to determine fair value for the property impaired for the three months ended March 31, 2019: discount rate of 12.0% and exit capitalization rate of 12.0%.

Total / weighted average interest rate ⁽⁶⁾ \$ 1,340,838 \$ 1,325,908 3.56 %

Interest rate as of March 31, 2019. At March 31, 2019, the one-month LIBOR (“L”) was 2.49450%. The current interest rate is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in (1) obtaining debt or any unamortized fair market value premiums. The spread over the applicable rate for the Company’s unsecured credit facility and unsecured term loans is based on the Company’s debt rating, as defined in the respective loan agreements.

(2) As of March 31, 2019, one-month LIBOR for the unsecured term loans A, B, C, D, and E was swapped to a fixed rate of 1.70%, 2.05%, 1.39%, 1.85%, and 2.92%, respectively.

Prepayment terms consist of (i) pre-payable with no penalty; (ii) pre-payable with penalty; (iii) pre-payable without (3) penalty three months prior to the maturity date, however can be defeased; and (iv) pre-payable without penalty three months prior to the maturity date.

The capacity of the unsecured credit facility is \$500.0 million. Deferred financing fees and debt issuance costs, net (4) of accumulated amortization related to the unsecured credit facility of approximately \$3.0 million and \$3.2 million is included in prepaid expenses and other assets on the accompanying Consolidated Balance Sheets as of March 31, 2019 and December 31, 2018, respectively.

(5) Capacity of \$175.0 million, which the Company has until July 25, 2019 to draw.

The weighted average interest rate was calculated using the fixed interest rate swapped on the notional amount of (6) \$600.0 million of debt, and is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in obtaining debt or any unamortized fair market value premiums.

The aggregate undrawn nominal commitment on the unsecured credit facility and unsecured term loans as of March 31, 2019 was approximately \$553.9 million, including issued letters of credit. The Company’s actual borrowing capacity at any given point in time may be less and is restricted to a maximum amount based on the Company’s debt covenant compliance. Total accrued interest for the Company’s indebtedness was approximately \$7.7 million and \$5.9 million as of March 31, 2019 and December 31, 2018, respectively, and is included in accounts payable, accrued expenses and other liabilities on the accompanying Consolidated Balance Sheets.

Table of Contents

The table below sets forth the costs included in interest expense related to the Company's debt arrangements on the accompanying Consolidated Statement of Operations for the three months ended March 31, 2019 and 2018.

Financial Covenant Considerations

The Company was in compliance with all financial and other covenants as of March 31, 2019 and December 31, 2018 related to its unsecured credit facility, unsecured term loans, unsecured notes, and mortgage notes. The real estate net book value of the properties that are collateral for the Company's debt arrangements was approximately \$87.2 million and \$88.2 million at March 31, 2019 and December 31, 2018, respectively, and is limited to senior, property-level secured debt financing arrangements.

Fair Value of Debt

The following table presents the aggregate principal outstanding under the Company's debt arrangements and the corresponding estimate of fair value as of March 31, 2019 and December 31, 2018 (in thousands).

The applicable fair value guidance establishes a three tier value hierarchy, which prioritizes the inputs used in measuring fair value. These tiers include: Level 1, defined as observable inputs such as quoted prices in active markets; Level 2, defined as inputs other than quoted prices in active markets that are either directly or indirectly observable; and Level 3, defined as unobservable inputs in which little or no market data exists, therefore requiring an entity to develop its own assumptions. The fair value of the Company's debt is based on Level 3 inputs.

5. Use of Derivative Financial Instruments

Risk Management Objective of Using Derivatives

The Company's use of derivative instruments is limited to the utilization of interest rate swaps to manage interest rate risk exposure on existing and future liabilities and not for speculative purposes. The principal objective of such arrangements is to minimize the risks and related costs associated with the Company's operating and financial

structure.

Cash Flow Hedges of Interest Rate Risk

The Company's objectives in using interest rate swaps are to add stability to interest expense and to manage its exposure to interest rate movements.

For derivatives designated and that qualify as cash flow hedges of interest rate risk, the gain or loss on the derivative is recorded in accumulated other comprehensive income (loss) and subsequently reclassified into interest expense in the same periods during which the hedged transaction affects earnings.

Amounts reported in accumulated other comprehensive income (loss) related to derivatives designated as qualifying cash flow hedges will be reclassified to interest expense as interest payments are made on the Company's variable rate debt. The Company estimates that approximately \$3.0 million will be reclassified from accumulated other comprehensive income (loss) as a decrease to interest expense over the next 12 months.

The table below presents the effect of cash flow hedge accounting and the location in the consolidated financial statements for the three months ended March 31, 2019 and 2018.

Credit-risk-related Contingent Features

The Company has agreements with each of its derivative counterparties that contain a provision where the Company could be declared in default on its derivative obligations if repayment of the underlying indebtedness is accelerated by the lender due to the Company's default on the indebtedness.

As of March 31, 2019, derivatives that were in a net liability position by counterparty and subject to credit-risk-related contingent features had a termination value of approximately \$3.5 million, which includes accrued interest but excludes any adjustment for nonperformance risk. As of March 31, 2019, the Company had not breached the provisions of these agreements and had not posted any collateral related to these agreements. If the Company had breached any of these provisions at March 31, 2019, it could have been required to settle its obligations under the agreement of the interest rate swaps in a liability position plus accrued interest for approximately \$3.5 million.

Fair Value of Interest Rate Swaps

The Company's valuation of the interest rate swaps is determined using widely accepted valuation techniques including discounted cash flow analysis on the expected cash flows of each derivative. This analysis reflects the contractual terms of the derivatives, including the period to maturity, and uses observable market-based inputs including interest rate curves.

The Company incorporates credit valuation adjustments to appropriately reflect both its own nonperformance risk and the respective counterparty's nonperformance risk in the fair value measurements. In adjusting the fair value of its derivative contracts for the effect of nonperformance risk, the Company has considered the impact of netting and any applicable credit enhancements, such as collateral postings, thresholds, mutual puts, and guarantees.

Although the Company has determined that the majority of the inputs used to value its derivatives fall within Level 2 of the fair value hierarchy, the credit valuation adjustments associated with its derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by itself and its counterparties. However, as of March 31, 2019 and December 31, 2018, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives. As a result, the Company has determined that its derivative valuations in their entirety are classified in Level 2 of the fair value hierarchy.

The following sets forth the Company's financial instruments that are accounted for at fair value on a recurring basis as of March 31, 2019 and December 31, 2018.

LTIP Units

LTIP units granted on January 7, 2019 to non-employee, independent directors, subject to the recipient's continued service, will vest on January 1, 2020. LTIP units granted on January 7, 2019 to certain senior executive officers and senior employees, subject to the recipient's continued employment, will vest quarterly over four years, with the first vesting date having been March 31, 2019. Refer to Note 8 for a discussion of the LTIP units granted on January 7, 2019 pursuant to the March 8, 2016 performance units.

The fair value of the LTIP units at the date of grant was determined by a lattice-binomial option-pricing model based on a Monte Carlo simulation. The fair value of the LTIP units are based on Level 3 inputs and are non-recurring fair value measurements. The table below sets forth the assumptions used in valuing such LTIP units granted during the three months ended March 31, 2019 (excluding those LTIP units granted pursuant to the March 8, 2016 performance units; refer to Note 8 for details).

8. Equity Incentive Plan

On January 7, 2019, the Company granted performance units approved by the compensation committee of the board of directors, under the 2011 Plan to certain key employees of the Company. The terms of the performance units granted on January 7, 2019 are substantially the same as the terms of the performance units granted on January 5, 2018 and January 6, 2017, except that the measuring period commences on January 1, 2019 and ends on December 31, 2021, and the award shares are immediately vested at the end of the measuring period.

The fair value of the performance units at the date of grant was determined by a lattice-binomial option-pricing model based on a Monte Carlo simulation. The fair value of the performance units are based on Level 3 inputs and are non-recurring fair value measurements. The performance unit equity compensation expense is recognized ratably from the grant date into earnings over the vesting period. The table below sets forth the assumptions used in valuing the performance units granted during the three months ended March 31, 2019.

Performance Units	Assumptions	
Grant date	January 7, 2019	
Expected volatility	20.7	%
Expected dividend yield	6.0	%
Risk-free interest rate	2.56	%
Fair value of performance units grant (in thousands)	\$5,620	

On December 31, 2018, the Company's three year measurement period pursuant to the March 8, 2016 performance units concluded. It was determined that the Company's total stockholder return exceeded the threshold percentage and return hurdle. The compensation committee of the board of directors approved the issuance of 102,216 vested LTIP units and 74,032 vested shares of common stock (of which 30,193 shares of common stock were repurchased and retired) to the participants, which were issued on January 7, 2019. The compensation committee of the board of directors also approved the issuance of 107,308 LTIP units and 22,678 restricted shares of common stock that will vest on December 31, 2019, which were issued on January 7, 2019.

The unrecognized compensation expense associated with the Company's performance units at March 31, 2019 was approximately \$9.2 million and is expected to be recognized over a weighted average period of approximately 2.4 years.

Non-cash Compensation Expense

The following table summarizes the amount recorded in general and administrative expenses in the accompanying Consolidated Statements of Operations for the amortization of restricted shares of common stock, LTIP units, performance units, and the Company's director compensation for the three months ended March 31, 2019 and 2018.

Three months
ended March 31,

Non-Cash Compensation Expense (in thousands)	2019	2018
Restricted shares of common stock	\$427	\$434
LTIP units	887	871
Performance units	859	829
Director compensation ⁽¹⁾	105	86
Total non-cash compensation expense	\$2,278	\$2,220

All of the Company's independent directors elected to receive shares of common stock in lieu of cash for their service during the three months ended March 31, 2019 and 2018. The number of shares of common stock granted ⁽¹⁾ is calculated based on the trailing 10 days average common stock price ending on the third business day preceding the grant date.

9. Leases

Lessor Leases

The Company has operating leases in which it is the lessor for its rental property. Certain leases contain variable lease payments based upon changes in the Consumer Price Index (“CPI”). Certain leases contain options to renew or terminate the lease, and options for the lessee to purchase the rental property, all of which are predominately at the sole discretion of the lessee.

The following table summarizes the components of rental income recognized during the three months ended March 31, 2019 included in the accompanying Consolidated Statements of Operations.

	Three months ended March 31, 2019
Rental Income (in thousands)	
Fixed lease payments	\$72,117
Variable lease payments	22,181
Straight-line rental income	2,284
Net decrease to rental income related to above and below market lease amortization	(967)
Total rental income	\$95,615

As of March 31, 2019 and December 31, 2018, the Company had accrued rental income of approximately \$34.2 million and \$32.4 million, respectively, included in tenant accounts receivable on the accompanying Consolidated Balance Sheets.

As of March 31, 2019 and December 31, 2018, the Company had approximately \$18.4 million and \$18.3 million, respectively, of total lease security deposits available in the form of existing letters of credit, which are not reflected on the accompanying Consolidated Balance Sheets. As of March 31, 2019 and December 31, 2018, the Company had approximately \$0.7 million and \$0.7 million, respectively, of lease security deposits available in cash, which are included in restricted cash on the accompanying Consolidated Balance Sheets. The Company’s remaining lease security deposits are commingled in cash and cash equivalents. These funds may be used to settle tenant accounts receivables in the event of a default under the related lease. As of March 31, 2019 and December 31, 2018, the Company’s total liability associated with these lease security deposits was approximately \$8.7 million and \$8.4 million, respectively, and is included in tenant prepaid rent and security deposits on the accompanying Consolidated Balance Sheets.

The Company estimates that billings for real estate taxes, which are the responsibility of certain tenants under the terms of their leases and are not reflected on the Company’s consolidated financial statements, were approximately \$3.9 million and \$3.1 million for the three months ended March 31, 2019 and 2018, respectively. These amounts would have been the maximum real estate tax expense of the Company, excluding any penalties or interest, had the tenants not met their contractual obligations for these periods.

The following table summarizes the maturity of fixed lease payments under the Company’s leases as of March 31, 2019.

During the three months ended March 31, 2019 and 2018, there were 214 and 202, unvested shares of restricted (1) common stock, respectively, on a weighted average basis that were not included in the computation of diluted earnings per share because the allocation of income under the two-class method was more dilutive.

11. Commitments and Contingencies

The Company is subject to various legal proceedings and claims that arise in the ordinary course of business. These matters are generally covered by insurance subject to deductible requirements. Management believes that the ultimate settlement of these actions will not have a material adverse effect on the Company's financial position, results of operations, or cash flows.

The Company has letters of credit of approximately \$5.6 million as of March 31, 2019 related to construction projects and certain other agreements. As of March 31, 2019, the Company has a development commitment related to a building expansion under a tenant lease of approximately \$9.8 million.

12. Subsequent Events

The following non-recognized subsequent events were noted.

On April 1, 2019, the Company completed an underwritten public offering of 7,475,000 shares of common stock (including 975,000 shares issued pursuant to the underwriters' option to purchase additional shares) at a price to the underwriters of \$28.72 per share. The offering closed on April 4, 2019 and the Company received net proceeds of approximately \$214.7 million.

On April 30, 2019, the Company filed Articles of Amendment to its Articles of Amendment and Restatement to increase the number of authorized shares of the Company's common stock from 150,000,000 to 300,000,000 and the number of authorized shares of preferred stock from 15,000,000 to 20,000,000.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Certain Definitions

In this report:

We define “GAAP” as generally accepted accounting principles in the United States.

We define “total annualized base rental revenue” as the contractual monthly base rent as of March 31, 2019 (which differs from rent calculated in accordance with GAAP) multiplied by 12. If a tenant is in a free rent period as of March 31, 2019, the total annualized base rental revenue is calculated based on the first contractual monthly base rent amount multiplied by 12.

We define “occupancy rate” as the percentage of total leasable square footage for which either revenue recognition has commenced in accordance with GAAP or the lease term has commenced as of the close of the reporting period, whichever occurs earlier.

We define the “Value Add Portfolio” as properties that meet any of the following criteria: (i) less than 75% occupied as of the acquisition date; (ii) will be less than 75% occupied due to known move-outs within two years of the acquisition date; (iii) out of service with significant physical renovation of the asset; or (iv) development.

We define “Stabilization” for properties under development or being redeveloped as the earlier of achieving 90% occupancy or twelve months after completion. With respect to properties acquired and immediately added to the Value Add Portfolio, (i) if acquired with less than 75% occupancy as of the acquisition date, Stabilization will occur upon the earlier of achieving 90% occupancy or twelve months from the acquisition date; or (ii) if acquired and will be less than 75% occupied due to known move-outs within two years of the acquisition date, Stabilization will occur

upon the earlier of achieving 90% occupancy after the known move-outs have occurred or twelve months after the known move-outs have occurred.

We define the “Operating Portfolio” as all warehouse and light manufacturing assets that were acquired stabilized or have achieved Stabilization. The Operating Portfolio excludes non-core flex/office assets and assets contained in the Value Add Portfolio.

We define a “Comparable Lease” as a lease in the same space with a similar lease structure as compared to the previous in-place lease, excluding new leases for space that was not occupied under our ownership.

We define “SL Rent Change” as the percentage change in the average monthly base rent over the term of the lease, calculated on a straight-line basis, of the lease commenced during the period compared to the Comparable Lease for assets included in the Operating Portfolio. Rent under gross or similar type leases are converted to a net rent based on an estimate of the applicable recoverable expenses, and this calculation excludes the impact of any holdover rent.

Table of Contents

We define “Cash Rent Change” as the percentage change in the base rent of the lease commenced during the period compared to the base rent of the Comparable Lease for assets included in the Operating Portfolio. The calculation compares the first base rent payment due after the lease commencement date compared to the base rent of the last monthly payment due prior to the termination of the lease, excluding holdover rent. Rent under gross or similar type leases are converted to a net rent based on an estimate of the applicable recoverable expenses.

Overview

We are a REIT focused on the acquisition, ownership, and operation of single-tenant, industrial properties throughout the United States. We are a Maryland corporation and our common stock is publicly traded on the New York Stock Exchange under the symbol “STAG.”

We are organized and conduct our operations to qualify as a REIT under Sections 856 through 860 of the Internal Revenue Code of 1986, as amended, and generally are not subject to federal income tax to the extent we currently distribute our income to our stockholders and maintain our qualification as a REIT. We remain subject to state and local taxes on our income and property and to U.S. federal income and excise taxes on our undistributed income.

Factors That May Influence Future Results of Operations

Our ability to increase revenues or cash flow will depend in part on our (i) external growth, specifically acquisition activity, and (ii) internal growth, specifically occupancy and rental rates on our portfolio. A variety of other factors, including those noted below, also affect our future results of operations.

Outlook

The outlook for our business remains positive, albeit on a moderated basis in light of over nine years of economic growth, some uncertainty regarding the current U.S. presidential administration and its policy initiatives, and continued asset appreciation. In the first quarter of 2019, the federal funds target rate was unchanged at a target range of 2.25% to 2.50%. This target rate range supports continued economic growth and is expected to remain unchanged throughout 2019. We believe economic growth combined with the currently favorable industrial supply demand should translate to a net positive result for our business. Specifically, we expect our existing portfolio will benefit from rising rental rates and strong occupancy. Furthermore, we believe certain characteristics of our business should position us well in an uncertain interest rate environment, including the fact that we have minimal floating rate debt exposure (taking into account our hedging activities) and that many of our competitors for the assets we purchase tend to be smaller local and regional investors who are likely to be more heavily impacted by interest rates. Several industrial specific trends contribute to the expected strong demand, including:

- the rise of e-commerce (as compared to the traditional retail store distribution model) and the concomitant demand by e-commerce industry participants for well-located, functional distribution space;
- the increasing attractiveness of the U.S. as a manufacturing and distribution location because of the size of the U.S. consumer market, an increase in overseas labor costs and the overall cost of supplying and shipping goods (i.e. the shortening and fattening of the supply chain); and
- the overall quality of the transportation infrastructure in the U.S.

Our portfolio continues to benefit from historically low availability throughout the national industrial market. At the end of the first quarter, demand for space has continued to outpace new supply supporting an accommodative environment for owners. Development activity has steadily increased over the past several years and is now reaching material levels in a growing number of primary industrial markets. Though availability remains historically low, this is a trend we will monitor closely. In addition, currently, the supply remains fairly concentrated in the larger primary

industrial markets and we have limited exposure to many of these markets. On the demand side, we note that the quality and availability of labor remains a key focus of tenants making occupancy decisions. We will continue to monitor the supply and demand fundamentals for industrial real estate and assess its impact on our business.

Conditions in Our Markets

The buildings in our portfolio are located in markets throughout the United States. Positive or negative changes in economic or other conditions, new supply, adverse weather conditions and natural disasters, and other factors in these markets may affect our overall performance.

Table of Contents

Rental Income

We receive income primarily in the form of rental income from the tenants who occupy our buildings. The amount of rental income generated by the buildings in our portfolio depends principally on occupancy and rental rates. As of March 31, 2019, our Operating Portfolio was approximately 95.7% leased and our SL Rent Change on new and renewal leases together grew approximately 24.3% during the three months ended March 31, 2019.

Future economic downturns or regional downturns affecting our submarkets that impair our ability to renew or re-lease space and the ability of our tenants to fulfill their lease commitments, as in the case of tenant bankruptcies, could adversely affect our ability to maintain or increase rental rates at our buildings. Our ability to lease our properties and the attendant rental rate is dependent upon, among other things, (i) the overall economy, (ii) the supply/demand dynamic in our markets, (iii) the quality of our properties, including age, clear height, and configuration, and (iv) our tenants' ability to meet their contractual obligations to us.

The following table provides a summary of our Operating Portfolio leases that commenced during the three months ended March 31, 2019. Certain leases contain rental concessions; any such rental concessions are accounted for on a straight-line basis over the term of the lease.

Operating Portfolio	Square Feet	Cash Basis Rent Per Square Foot	SL Rent Per Square Foot	Total Costs Per Square Foot ⁽¹⁾	Cash Rent Change	SL Rent Change	Weighted Average Lease Term ⁽²⁾ (years)	Rental Concessions per Square Foot ⁽³⁾
Three months ended March 31, 2019								
New Leases ⁽⁴⁾	123,190	\$ 4.15	\$ 4.32	\$ 1.97	3.5 %	17.1 %	6.5	\$ 1.07
Renewal Leases ⁽⁵⁾	2,468,163	\$ 3.94	\$ 4.10	\$ 0.58	15.6 %	24.7 %	4.1	\$ —
Total/weighted average	2,591,353	\$ 3.95	\$ 4.11	\$ 0.64	14.9 %	24.3 %	4.2	\$ 0.05

We define Total Costs as the costs for improvements of vacant and renewal spaces, as well as the contingent-based (1) legal fees and commissions for leasing transactions. Total Costs per square foot represent the total costs expected to be incurred on the leases that commenced during the period and do not reflect actual expenditures for the period.

(2) We define weighted average lease term as the contractual lease term in years, assuming that tenants exercise no renewal options, purchase options, or early termination rights, weighted by square footage.

(3) Represents the total rental concessions for the entire lease term.

(4) We define a New Lease as any lease that is signed for an initial term equal to or greater than twelve months for any vacant space; this includes a new tenant or an existing tenant that is expanding into new (additional) space.

We define Renewal Lease as a lease signed by an existing tenant to extend the term for twelve months or more, (5) including (i) a renewal of the same space as the current lease at lease expiration, (ii) a renewal of only a portion of the current space at lease expiration and (iii) an early renewal or workout, which ultimately does extend the original term for twelve months or more.

Property Operating Expenses

Our property operating expenses generally consist of utilities, real estate taxes, management fees, insurance, and site repair and maintenance costs. For the majority of our tenants, our property operating expenses are controlled, in part, by the triple net provisions in tenant leases. In our triple net leases, the tenant is responsible for all aspects of and costs related to the building and its operation during the lease term, including utilities, taxes, insurance and maintenance costs, but typically excluding roof and building structure. However, we also have modified gross leases and gross leases in our building portfolio. The terms of those leases vary and on some occasions we may absorb certain building related expenses of our tenants. In our modified gross leases, we are responsible for some building related expenses

during the lease term, but the cost of most of the expenses is passed through to the tenant for reimbursement to us. In our gross leases, we are responsible for all costs related to the building and its operation during the lease term. Our overall performance will be affected by the extent to which we are able to pass-through property operating expenses to our tenants.

Scheduled Lease Expirations

Our ability to re-lease space subject to expiring leases will impact our results of operations and is affected by economic and competitive conditions in our markets and by the desirability of our individual buildings. Leases that comprise approximately 7.8% of our annualized base rental revenue will expire during the period from April 1, 2019 to March 31, 2020, excluding month to month leases. We assume, based upon internal renewal probability estimates that some of our tenants will renew and others will vacate and the associated space will be re-let subject to downtime assumptions. Using the aforementioned assumptions, we expect that the rental rates on the respective new leases will generally be the same as the rates under existing leases expiring during the period April 1, 2019 to March 31, 2020, thereby resulting in approximately the same revenue from the same space.

Table of Contents

The following table sets forth a summary of lease expirations for leases in place as of March 31, 2019, plus available space, for each of the ten calendar years beginning with 2019 and thereafter in our portfolio. The information in the table assumes that tenants exercise no renewal options and no early termination rights.

Portfolio Dispositions

During the three months ended March 31, 2019, we sold five buildings comprised of approximately 1.0 million square feet with a net book value of approximately \$15.3 million to third parties. Net proceeds from the sales of rental property were approximately \$16.6 million and we recognized the full gain on the sales of rental property, net, of approximately \$1.3 million for the three months ended March 31, 2019.

Critical Accounting Policies

See “Critical Accounting Policies” in “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in our Annual Report on Form 10-K for the year ended December 31, 2018, for a discussion of our critical accounting policies and estimates.

On January 1, 2019, we adopted ASU 2016-02, Leases (Topic 842); see Note 2 in the accompanying Notes to Consolidated Financial Statements under “New Accounting Standards and Reclassifications.”

Results of Operations

The following discussion of our results of our same store (as defined below) net operating income (“NOI”) should be read in conjunction with our Consolidated Financial Statements. For a detailed discussion of NOI, including the reasons management believes NOI is useful to investors, see “Non-GAAP Financial Measures” below. Same store results are considered to be useful to investors in evaluating our performance because they provide information relating to changes in building-level operating performance without taking into account the effects of acquisitions or dispositions. We encourage the reader to not only look at our same store results, but also our total portfolio results, due to historic and future growth.

Comparison of the three months ended March 31, 2019 to the three months ended March 31, 2018

We define same store properties as properties that were in the Operating Portfolio for the entirety of the comparative periods presented. Same store properties exclude Operating Portfolio properties with expansions placed into service after December 31, 2017. On March 31, 2019, we owned 317 industrial buildings consisting of approximately 63.2 million square feet, which represents approximately 80.8% of our total portfolio, that are considered our same store portfolio in the analysis below. Same store occupancy decreased approximately 0.7% to 95.5% as of March 31, 2019 compared to 96.2% as of March 31, 2018.

The following table summarizes selected operating information for our same store portfolio and our total portfolio for the three months ended March 31, 2019 and 2018 (dollars in thousands). This table includes a reconciliation from our same store portfolio to our total portfolio by also providing information for the three months ended March 31, 2019 and 2018 with respect to the buildings acquired and disposed of and Operating Portfolio buildings with expansions placed into service or transferred from the Value Add Portfolio to the Operating Portfolio after December 31, 2017 and our flex/office buildings and Value Add Portfolio.

Table of Contents

Net Income

Net income for our total portfolio decreased by \$17.8 million or 70.6% to \$7.4 million for the three months ended March 31, 2019, compared to \$25.1 million for the three months ended March 31, 2018.

Same Store Total Operating Revenue

Same store total operating revenue consists primarily of rental income consisting of (i) fixed lease payments, variable lease payments, straight-line rental income, and above and below market lease amortization from our properties (“lease income”), and (ii) other tenant billings for insurance, real estate taxes and certain other expenses (“other billings”).

For a detailed reconciliation of our same store total operating revenue to net income, see the table above.

Same store rental income, which is comprised of lease income and other billings as discussed below, increased by \$3.0 million or 4.1% to \$76.8 million for the three months ended March 31, 2019 compared to \$73.8 million for the three months ended March 31, 2018.

Same store lease income increased by \$1.3 million or 2.1% to \$63.7 million for the three months ended March 31, 2019 compared to \$62.4 million for the three months ended March 31, 2018. Approximately \$2.4 million of the increase was attributable to rental increases due to new leases and renewals of existing tenants and approximately \$0.2 million due to a net decrease in the amortization of net above market leases. This increase was partially offset by an approximately \$1.3 million decrease due to a reduction of base rent due to tenants downsizing their spaces and vacancies.

Same store other billings increased by \$1.7 million or 14.9% to \$13.1 million for the three months ended March 31, 2019 compared to \$11.4 million for the three months ended March 31, 2018. The increase was primarily attributable to an increase in real estate taxes levied by the taxing authority and changes to lease terms where we began paying the real estate taxes and operating expenses on behalf of tenants that had previously paid its taxes and operating expenses directly to respective vendors of approximately \$2.0 million. This increase was partially offset by a decrease of approximately \$0.3 million related to tenant specific billings that occurred during the three months ended March 31, 2019 that did not recur during the three months ended March 31, 2018.

Same Store Operating Expenses

Same store operating expenses consist primarily of property operating expenses and real estate taxes and insurance.

For a detailed reconciliation of our same store operating expenses to net income, see the table above.

Total same store property operating expenses increased by \$1.6 million or 11.1% to \$15.5 million for the three months ended March 31, 2019 compared to \$14.0 million for the three months ended March 31, 2018. This increase was primarily related to increases in real estate taxes levied by the related taxing authority of approximately \$1.7 million and an increase in snow removal expense of approximately \$0.4 million. These increases were partially offset by a decrease in insurance expense and utility expense of approximately \$0.6 million.

Acquisitions and Dispositions Net Operating Income

For a detailed reconciliation of our acquisitions and dispositions NOI to net income, see the table above.

Subsequent to December 31, 2017, we acquired 59 buildings consisting of approximately 11.9 million square feet (excluding four buildings that were included in the Value Add Portfolio at March 31, 2019 or transferred from the Value Add Portfolio to the Operating Portfolio after December 31, 2017), and sold 24 buildings consisting of approximately 4.9 million square feet. For the three months ended March 31, 2019 and 2018, the buildings acquired after December 31, 2017 contributed approximately \$13.0 million and \$0.7 million to NOI, respectively. For the three months ended March 31, 2019 and 2018, the buildings sold after December 31, 2017 contributed approximately \$(0.1) million and \$3.2 million to NOI, respectively. Refer to Note 3 in the accompanying Notes to Consolidated Financial Statements for additional discussion regarding buildings acquired or sold.

Other Net Operating Income

Our other assets include our flex/office buildings, Value Add Portfolio, and Operating Portfolio buildings with expansions placed in service or transferred from the Value Add Portfolio to the Operating Portfolio after December 31, 2017. Other NOI also includes termination income from buildings in our same store portfolio.

Table of Contents

For a detailed reconciliation of our other NOI to net income, see the table above.

At March 31, 2019, we owned nine flex/office buildings consisting of approximately 0.6 million square feet, five buildings in our Value Add Portfolio consisting of approximately 1.1 million square feet, and five buildings consisting of approximately 1.4 million square feet that were Operating Portfolio buildings with expansions placed in service or transferred from the Value Add Portfolio to the Operating Portfolio after December 31, 2017. These buildings contributed approximately \$1.9 million and \$1.9 million to NOI for the three months ended March 31, 2019 and 2018, respectively. Additionally, there was approximately \$43,000 and \$20,000 of termination fee income from certain buildings in our same store portfolio for the three months ended March 31, 2019 and 2018, respectively.

Total Other Expenses

Total other expenses consist of general and administrative expenses, depreciation and amortization, loss on impairments, and other expenses.

Total other expenses increased \$5.3 million or 10.2% for the three months ended March 31, 2019 to \$57.3 million compared to \$51.9 million for the three months ended March 31, 2018. This is primarily a result of an increase in depreciation and amortization of approximately \$2.3 million due to an increase in the depreciable asset base as a result of acquisitions, as well as an increase in loss on impairments of approximately \$2.4 million. Additionally, general and administrative expenses increased by approximately \$0.5 million due to increases in compensation and other payroll costs.

Total Other Income (Expense)

Total other income (expense) consists of interest and other income, interest expense, and gain on the sales of rental property, net. Interest expense includes interest incurred during the period as well as adjustments related to amortization of financing fees and debt issuance costs, and amortization of fair market value adjustments associated with the assumption of debt.

Total other income (expense) decreased \$22.8 million or 202.1% to a total other expense position of \$11.5 million for the three months ended March 31, 2019 compared a total other income of \$11.3 million for the three months ended March 31, 2018. This decrease is primarily the result of a decrease in the gain on the sales of rental property, net of approximately \$21.4 million. This decrease is also attributable to an increase in interest expense of approximately \$1.4 million which was primarily attributable to the funding of a new unsecured term loan on March 28, 2018 and July 27, 2018 and the funding of unsecured notes on June 13, 2018.

Non-GAAP Financial Measures

In this report, we disclose funds from operations (“FFO”) and NOI, which meet the definition of “non-GAAP financial measures” as set forth in Item 10(e) of Regulation S-K promulgated by the Securities and Exchange Commission (“SEC”). As a result, we are required to include in this report a statement of why management believes that presentation of these measures provides useful information to investors.

Funds From Operations

FFO should not be considered as an alternative to net income (determined in accordance with GAAP) as an indication of our performance, and we believe that to understand our performance further, FFO should be compared with our reported net income (loss) in accordance with GAAP, as presented in our consolidated financial statements included in

this report.

We calculate FFO in accordance with the standards established by the National Association of Real Estate Investment Trusts ("NAREIT"). FFO represents GAAP net income (loss), excluding gains (or losses) from sales of depreciable operating buildings, impairment write-downs of depreciable real estate, real estate related depreciation and amortization (excluding amortization of deferred financing costs and fair market value of debt adjustment) and after adjustments for unconsolidated partnerships and joint ventures.

Management uses FFO as a supplemental performance measure because it is a widely recognized measure of the performance of REITs. FFO may be used by investors as a basis to compare our operating performance with that of other REITs.

However, because FFO excludes depreciation and amortization and captures neither the changes in the value of our buildings that result from use or market conditions nor the level of capital expenditures and leasing commissions necessary to maintain the

Table of Contents

operating performance of our buildings, all of which have real economic effects and could materially impact our results from operations, the utility of FFO as a measure of our performance is limited. In addition, other REITs may not calculate FFO in accordance with the NAREIT definition, and, accordingly, our FFO may not be comparable to such other REITs' FFO. FFO should not be used as a measure of our liquidity, and is not indicative of funds available for our cash needs, including our ability to pay dividends.

The following table sets forth a reconciliation of our FFO attributable to common stockholders and unit holders for the periods presented to net income, the nearest GAAP equivalent.

Net Operating Income

We consider NOI to be an appropriate supplemental performance measure to net income (loss) because we believe it helps investors and management understand the core operations of our buildings. NOI is defined as rental income, which includes billings for common area maintenance, real estate taxes and insurance, less property expenses and real estate taxes and insurance. NOI should not be viewed as an alternative measure of our financial performance since it excludes expenses which could materially impact our results of operations. Further, our NOI may not be comparable to that of other real estate companies, as they may use different methodologies for calculating NOI.

The following table sets forth a reconciliation of our NOI for the periods presented to net income, the nearest GAAP equivalent.

Cash Flows

Comparison of the three months ended March 31, 2019 to the three months ended March 31, 2018

The following table summarizes our cash flows for the three months ended March 31, 2019 compared to the three months ended March 31, 2018.

Cash Flows (dollars in thousands)	Three months ended March 31,		Change	
	2019	2018	\$	%
Net cash provided by operating activities	\$47,150	\$41,974	\$5,176	12.3 %
Net cash used in investing activities	\$176,816	\$36,112	\$140,704	389.6%
Net cash provided by (used in) financing activities	\$119,432	\$(16,277)	\$135,709	833.7%

Net cash provided by operating activities increased \$5.2 million to \$47.2 million for the three months ended March 31, 2019 compared to \$42.0 million for the three months ended March 31, 2018. The increase was primarily attributable to incremental operating cash flows from property acquisitions completed after March 31, 2018, and operating performance at existing properties.

Table of Contents

These increases were partially offset by the loss of cash flows from property dispositions completed after March 31, 2018 and fluctuations in working capital due to timing of payments and rental receipts.

Net cash used in investing activities increased \$140.7 million to \$176.8 million for the three months ended March 31, 2019 compared to \$36.1 million for the three months ended March 31, 2018. The increased cash outflow was primarily due to the acquisition of ten buildings for a total cash consideration of approximately \$185.4 million for the three months ended March 31, 2019 compared to the acquisition of 6 buildings for a total cash consideration of approximately \$78.8 million for the three months ended March 31, 2018. The increase is also attributable to a decrease in net proceeds from the sales of rental property, net related to the disposition of 5 buildings during the three months ended March 31, 2019 for net proceeds of approximately \$16.6 million, compared to the three months ended March 31, 2018 where we sold two buildings for net proceeds of approximately \$49.6 million.

Net cash provided by (used in) financing activities increased \$135.7 million to \$119.4 million for the three months ended March 31, 2019 compared to \$(16.3) million for the three months ended March 31, 2018. The increase is primarily attributable to proceeds from the sales of common stock of approximately \$150.2 million and an increase of net cash inflow on our unsecured credit facility of approximately \$68.0 million during the three months ended March 31, 2019 compared to the three months ended March 31, 2018. These increases were partially offset by a decrease in proceeds from unsecured term loans of approximately \$75.0 million and an approximately \$6.1 million increase in dividends paid during the three months ended March 31, 2019 compared to the three months ended March 31, 2018.

Liquidity and Capital Resources

We believe that our liquidity needs will be satisfied through cash flows generated by operations, disposition proceeds, and financing activities. Operating cash flow is primarily rental income, expense recoveries from tenants, and other income from operations and is our principal source of funds that we use to pay operating expenses, debt service, recurring capital expenditures and the distributions required to maintain our REIT qualification. We look to the capital markets (common equity, preferred equity, and debt) to primarily fund our acquisition activity. We seek to increase cash flows from our properties by maintaining quality standards for our buildings that promote high occupancy rates and permit increases in rental rates while reducing tenant turnover and controlling operating expenses. We believe that our revenue, together with proceeds from building sales and debt and equity financings, will continue to provide funds for our short-term and medium-term liquidity needs.

Our short-term liquidity requirements consist primarily of funds to pay for operating expenses and other expenditures directly associated with our buildings, including interest expense, interest rate swap payments, scheduled principal payments on outstanding indebtedness, funding of property acquisitions under contract, general and administrative expenses, and capital expenditures for tenant improvements and leasing commissions.

Our long-term liquidity needs, in addition to recurring short-term liquidity needs as discussed above, consist primarily of funds necessary to pay for acquisitions, non-recurring capital expenditures, and scheduled debt maturities. We intend to satisfy our long-term liquidity needs through cash flow from operations, the issuance of equity or debt securities, other borrowings, property dispositions, or, in connection with acquisitions of certain additional buildings, the issuance of common units in the Operating Partnership.

As of March 31, 2019, we had total immediate liquidity of approximately \$561.8 million, comprised of \$7.9 million of cash and cash equivalents and \$553.9 million of immediate availability on our unsecured credit facility and unsecured term loans.

Edgar Filing: STAG Industrial, Inc. - Form 10-Q

In addition, we require funds for future dividends to be paid to our common and preferred stockholders and unit holders in the Operating Partnership. These distributions on our common stock are voluntary (at the discretion of our board of directors), to the extent we have satisfied distribution requirements in order to maintain our REIT status for federal income tax purposes, and may be reduced or stopped if needed to fund other liquidity requirements or for other reasons. The table below sets forth the dividends attributable to our outstanding common stock that had a record date during the three months ended March 31, 2019.

Month Ended 2019	Declaration Date	Record Date	Per Share	Payment Date

(1) Interest rate as of March 31, 2019. At March 31, 2019, the one-month LIBOR (“L”) was 2.49450%. The interest rate is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in obtaining debt or any unamortized fair market value premiums. The spread over the applicable rate for our unsecured credit facility and unsecured term loans is based on our debt rating, as defined in the respective loan agreements.

(2) As of March 31, 2019, one-month LIBOR for the unsecured term loans A, B, C, D, and E was swapped to a fixed rate of 1.70%, 2.05%, 1.39%, 1.85%, and 2.92%, respectively.

(3) Prepayment terms consist of (i) pre-payable with no penalty; (ii) pre-payable with penalty; (iii) pre-payable without penalty three months prior to the maturity date, however can be defeased; and (iv) pre-payable without penalty three months prior to the maturity date.

(4) The capacity of the unsecured credit facility is \$500.0 million.

(5) Capacity of \$175.0 million, which we have until July 25, 2019 to draw.

(6) The weighted average interest rate was calculated using the fixed interest rate swapped on the notional amount of \$600.0 million of debt that was in effect as of March 31, 2019, and is not adjusted to include the amortization of deferred financing fees or debt issuance costs incurred in obtaining debt or any unamortized fair market value premiums.

Table of Contents

The aggregate undrawn nominal commitments on the unsecured credit facility and unsecured term loans as of March 31, 2019 was approximately \$553.9 million, including issued letters of credit. Our actual borrowing capacity at any given point in time may be less and is restricted to a maximum amount based on our debt covenant compliance.

Our unsecured credit facility, unsecured term loans, unsecured notes, and mortgage notes are subject to ongoing compliance with a number of financial and other covenants. As of March 31, 2019, we were in compliance with the applicable financial covenants.

The chart below details our debt capital structure as of March 31, 2019.

Debt Capital Structure	March 31, 2019	
Total principal outstanding (in thousands)	\$ 1,347,030	
Weighted average duration (years)	4.4	
% Secured debt	4	%
% Debt maturing next 12 months	—	%
Net Debt to Real Estate Cost Basis ⁽¹⁾	37	%

We define Net Debt as our amounts outstanding under our unsecured credit facility, unsecured term loans, unsecured notes, and mortgage notes, less cash and cash equivalents. We define Real Estate Cost Basis as the book value of rental property and deferred leasing intangibles, exclusive of the related accumulated depreciation and amortization.

We regularly pursue new financing opportunities to ensure an appropriate balance sheet position. As a result of these dedicated efforts, we are confident in our ability to meet future debt maturities and building acquisition funding needs. We believe that our current balance sheet is in an adequate position at the date of this filing, despite possible volatility in the credit markets.

Our interest rate exposure as it relates to interest expense payments on our floating rate debt is managed through our use of interest rate swaps, which fix the rate of our long term floating rate debt. For a detailed discussion on our use of interest rate swaps, see “Interest Rate Risk” below.

Preferred Stock

The table below sets forth our outstanding preferred stock issuances as of March 31, 2019.

Preferred Stock Issuances	Issuance Date	Number of Shares	Liquidation Value Per Share	Interest Rate
Series C Preferred Stock	March 17, 2016	3,000,000	\$ 25.00	6.875%

The Series C Preferred Stock ranks senior to our common stock with respect to dividend rights and rights upon the liquidation, dissolution or winding up of our affairs. The Series C Preferred Stock has no stated maturity date and is not subject to mandatory redemption or any sinking fund. Generally, we are not permitted to redeem the Series C Preferred Stock prior to March 17, 2021, except in limited circumstances relating to our ability to qualify as a REIT and in certain other circumstances related to a change of control.

Subsequent to March 31, 2019, on April 30, 2019, we filed Articles of Amendment to our Articles of Amendment and Restatement to increase the number of authorized shares of our preferred stock from 15,000,000 to 20,000,000.

Subsequent to March 31, 2019, on April 4, 2019, we completed an underwritten public offering of 7,475,000 shares of common stock (including 975,000 shares issued pursuant to the underwriters' option to purchase additional shares) at a price to the underwriters of \$28.72 per share. We received net proceeds from the sale of common stock in the offering of approximately \$214.7 million.

Noncontrolling Interest

We own our interests in all of our properties and conduct substantially all of our business through the Operating Partnership. We are the sole member of the sole general partner of the Operating Partnership. As of March 31, 2019, we owned approximately 96.7% of the Operating Partnership, and our current and former executive officers, directors, senior employees and their affiliates, and third parties who contributed properties to us in exchange for common units in our Operating Partnership, owned the remaining 3.3%.

Interest Rate Risk

We use interest rate swaps to fix the rate of our variable rate debt. As of March 31, 2019, all of our outstanding variable rate debt, with the exception of our unsecured credit facility, was fixed with interest rate swaps through maturity.

We recognize all derivatives on the balance sheet at fair value. If the derivative is designated as a hedge, depending on the nature of the hedge, changes in the fair value of derivatives are either offset against the change in fair value of the hedged assets, liabilities, or firm commitments through earnings or recognized in other comprehensive income (loss), which is a component of equity. Derivatives that are not designated as hedges must be adjusted to fair value and the changes in fair value must be reflected as income or expense.

We have established criteria for suitable counterparties in relation to various specific types of risk. We only use counterparties that have a credit rating of no lower than investment grade at swap inception from Moody's Investor Services, Standard & Poor's, or Fitch Ratings or other nationally recognized rating agencies.

The swaps outlined in the above table were all designated as cash flow hedges of interest rate risk, and all are valued as Level 2 financial instruments. Level 2 financial instruments are defined as significant other observable inputs. As of March 31, 2019, the fair value of 18 of our interest rate swaps were in an asset position of approximately \$5.2 million and the fair value of seven of our interest rate swaps were in a liability position of approximately \$7.1 million, including any adjustment for nonperformance risk related to these agreements.

As of March 31, 2019, we had \$715.5 million of variable rate debt. As of March 31, 2019, all of our outstanding variable rate debt, with the exception of our unsecured credit facility, was fixed with interest rate swaps through maturity. To the extent interest rates increase, interest costs on our floating rate debt not fixed with interest rate swaps will increase, which could adversely affect our cash flow and our ability to pay principal and interest on our debt and our ability to make distributions to our security holders. From time to time, we may enter into interest rate swap agreements and other interest rate hedging contracts, including swaps, caps and floors. In addition, an increase in

interest rates could decrease the amounts third parties are willing to pay for our assets, thereby limiting our ability to change our portfolio promptly in response to changes in economic or other conditions.

Off-balance Sheet Arrangements

As of March 31, 2019, we had letters of credit related to development projects and certain other agreements of approximately \$5.6 million and a development commitment related to a building expansion under a tenant lease of approximately \$9.8 million. As of March 31, 2019, we had no other material off-balance sheet arrangements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Our future income, cash flows and fair values relevant to financial instruments are dependent upon prevailing market interest rates. Market risk refers to the risk of loss from adverse changes in market prices and interest rates. The primary market risk we are exposed to is interest rate risk. We have used derivative financial instruments to manage, or hedge, interest rate risks related to our borrowings, primarily through interest rate swaps.

As of March 31, 2019, we had \$715.5 million of variable rate debt outstanding. As of March 31, 2019, all of our outstanding variable rate debt, with the exception of \$115.5 million outstanding under our unsecured credit facility, was fixed with interest rate swaps. To the extent we undertake additional variable rate indebtedness, if interest rates increase, then so will the interest costs

on our unhedged variable rate debt, which could adversely affect our cash flow and our ability to pay principal and interest on our debt and our ability to make distributions to our security holders. Further, rising interest rates could limit our ability to refinance existing debt when it matures or significantly increase our future interest expense. From time to time, we enter into interest rate swap agreements and other interest rate hedging contracts, including swaps, caps and floors. While these agreements are intended to lessen the impact of rising interest rates on us, they also expose us to the risk that the other parties to the agreements will not perform, we could incur significant costs associated with the settlement of the agreements, the agreements will be unenforceable and the underlying transactions will fail to qualify as highly-effective cash flow hedges under GAAP. In addition, an increase in interest rates could decrease the amounts third parties are willing to pay for our assets, thereby limiting our ability to change our portfolio promptly in response to changes in economic or other conditions. If interest rates increased by 100 basis points and assuming we had an outstanding balance of \$115.5 million on our unsecured credit facility (the portion outstanding at March 31, 2019 not fixed by interest rate swaps) for the three months ended March 31, 2019, our interest expense would have increased by approximately \$0.3 million for the three months ended March 31, 2019.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

As required by SEC Rule 13a-15(b), we have evaluated, under the supervision of and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) of the Exchange Act, as of March 31, 2019. Based on the foregoing, our Chief Executive Officer and Chief Financial Officer concluded that our disclosure controls and procedures for the periods covered by this report were effective to provide reasonable assurance that information required to be disclosed by our Company in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to our management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls

There was no change to our internal control over financial reporting during the quarter ended March 31, 2019 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. Other Information

Item 1. Legal Proceedings

From time to time, we are a party to various lawsuits, claims and other legal proceedings that arise in the ordinary course of our business. We are not currently a party, as plaintiff or defendant, to any legal proceedings which, individually or in the aggregate, would be expected to have a material effect on our business, financial condition or results of operations if determined adversely to our company.

Item 1A. Risk Factors

There have been no material changes from the risk factors disclosed in the Annual Report on Form 10-K for the year ended December 31, 2018 filed with the SEC on February 13, 2019.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

Recent Sales of Unregistered Equity Securities

During the quarter ended March 31, 2019, the Operating Partnership issued (i) 364,173 long term incentive plan units (“LTIP units”) pursuant to the STAG Industrial, Inc. 2011 Equity Incentive Plan, as amended and restated (the “2011 Plan”), and (ii) 202,173 common units in the Operating Partnership upon exchange of outstanding LTIP units. Subject to certain restrictions, common units in the Operating Partnership may be redeemed for cash in an amount equal to the value of a share of common stock or, at our election, for a share of common stock on a one-for-one basis.

During the quarter ended March 31, 2019, we issued 439,071 shares of common stock upon redemption of 439,071 common units in the Operating Partnership held by various limited partners. The issuance of such shares of common stock was either registered under the Securities Act or effected in reliance upon an exemption from registration provided by Section 4(a)(2) under the Securities Act and the rules and regulations promulgated thereunder. We relied on the exemption based on representations given by the holders of the common units.

All other issuances of unregistered securities during the quarter ended March 31, 2019, if any, have previously been disclosed in filings with the SEC.
