BANK OF THE OZARKS, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Unaudited

1. Organization and Principles of Consolidation

Bank of the Ozarks, Inc. (the "Company") is a bank holding company headquartered in Little Rock, Arkansas, which operates under the rules and regulations of the Board of Governors of the Federal Reserve System. The Company owns a wholly-owned state chartered bank subsidiary – Bank of the Ozarks (the "Bank"), eight 100%-owned finance subsidiary business trusts – Ozark Capital Statutory Trust II ("Ozark II"), Ozark Capital Statutory Trust III ("Ozark III"), Ozark Capital Statutory Trust IV ("Ozark IV"), Ozark Capital Statutory Trust V ("Ozark V") (collectively, the "Ozark Trusts"), Intervest Statutory Trust II ("Intervest II"), Intervest Statutory Trust III ("Intervest III"), Intervest Statutory Trust IV ("Intervest IV") and Intervest Statutory Trust V ("Intervest V"), (collectively, the "Intervest Trusts"; and together with Ozark Trusts, the "Trusts") and, indirectly through the Bank, a subsidiary engaged in the development of real estate, a subsidiary that owns private aircraft and various other entities that hold foreclosed assets or tax credits or engage in other activities. The Company and Bank are subject to the regulation of certain federal and state agencies and undergo periodic examinations by those regulatory authorities. The consolidated financial statements include the accounts of the Company, the Bank, the real estate subsidiary, the aircraft subsidiary and certain of those various other entities in accordance with accounting principles generally accepted in the United States ("GAAP"). Significant intercompany transactions and amounts have been eliminated in consolidation.

At September 30, 2015, the Company had 174 offices, including 81 in Arkansas, 28 in Georgia, 25 in North Carolina, 22 in Texas, 10 in Florida, three in Alabama, two offices each in South Carolina and New York and one office in California.

2. Basis of Presentation

The accompanying consolidated financial statements have been prepared by the Company, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") in Article 10 of Regulation S-X and in accordance with the instructions to Form 10-Q and GAAP for interim financial information. Certain information, accounting policies and footnote disclosures normally included in complete financial statements prepared in accordance with GAAP have been condensed or omitted in accordance with such rules and regulations. These consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the year ended December 31, 2014.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could differ from those estimates. In the opinion of management, all adjustments considered necessary, consisting of normal recurring items, have been included for a fair presentation of the accompanying consolidated financial statements. Operating results for the three months or nine months ended September 30, 2015 are not necessarily indicative of the results that may be expected for the full year or future periods.

Certain reclassifications of prior period amounts have been made to conform with the current period presentation. These reclassifications had no impact on previously reported net income.

During the fourth quarter of 2014, the Bank and the Federal Deposit Insurance Corporation (“FDIC”) entered into agreements terminating the loss share agreements for all seven of its FDIC-assisted acquisitions. As a result of entering these termination agreements, the Company reclassified its loans previously reported as covered by FDIC loss share to purchased loans for all periods presented, and it has reclassified all interest income on loans previously reported as covered by FDIC loss share to interest income on purchased loans for all periods presented.

During the second quarter of 2015, the Company revised its initial estimates and assumptions regarding the recovery of certain acquired loans and acquired deferred tax assets from its acquisition of Intervest Bancshares Corporation (“Intervest”). As a result, certain amounts previously reported in the Company’s consolidated financial statements have been recast.

3. Acquisitions

Bank of the Carolinas

On August 5, 2015, the Company completed the acquisition of Bank of the Carolinas Corporation (“BCAR”) and its wholly-owned subsidiary Bank of the Carolinas for an aggregate of 1,447,620 shares of common stock (plus cash in lieu of fractional shares) in a transaction valued at approximately $65.4 million. The acquisition of BCAR expands the Company’s operations in North Carolina by adding eight banking offices, including one office each in Advance, Asheboro, Concord, Harrisburg, Landis, Lexington,

Mocksville and Winston-Salem. As a result of the BCAR acquisition, the Company acquired total assets with an estimated fair value of $350.9 million, total loans with an estimated fair value of $265.8 million and total deposits with an estimated fair value of $288.9 million. Goodwill of $5.2 million, which is the excess of the merger consideration over the estimated fair value of net assets acquired, was recorded in the BCAR acquisition and is the result of expected operational synergies, expansion of banking services in the Piedmont Triad region of North Carolina and other factors. This goodwill is not expected to be deductible for tax purposes.

Intervest

On February 10, 2015, the Company completed its previously announced acquisition of Intervest and its wholly-owned bank subsidiary Intervest National Bank, for an aggregate of 6,637,243 shares of its common stock (plus cash in lieu of fractional shares) in a transaction valued at approximately $238.5 million. The acquisition of Intervest provided the Company with a banking office in New York City and expanded its service area in Florida by adding five banking offices in Clearwater, Florida and one office in South Pasadena, Florida. During the third quarter of 2015, the Company closed one of the acquired banking offices in Clearwater, Florida.

During the second quarter of 2015, management revised its initial estimates and assumptions regarding the recovery of certain acquired loans and acquired deferred tax assets. Because such revision occurred during the first 12 months following the date of acquisition and was not the result of a change in circumstances, management has recast the first quarter 2015 consolidated financial statements to decrease the goodwill recorded in the Intervest acquisition by $2.7 million to reflect this change in estimate.

The following table provides a summary of the assets acquired and liabilities assumed as recorded by Intervest, the estimates of the fair value adjustments necessary to adjust those acquired assets and assumed liabilities to estimated fair value, the recast adjustment described above and the estimates of the resultant fair values of those assets and liabilities as recorded by the Company. As provided for under GAAP, management has up to 12 months following the date of acquisition to finalize the fair values of the acquired assets and assumed liabilities. Once management has finalized the fair values of acquired assets and assumed liabilities within this 12-month period, management considers such values to be the day 1 fair values ("Day 1 Fair Values"). The fair value adjustments and the resultant fair values shown in the following table may be subject to further adjustment.

Explanation of preliminary fair value adjustments

a- Adjustment reflects the fair value adjustment based on the pricing of the acquired investment securities portfolio.
b- Adjustment reflects the fair value adjustment based on the evaluation of the acquired loan portfolio and to eliminate the recorded allowance for loan losses.
c- Adjustment reflects the fair value adjustment based on the evaluation of the premises and equipment acquired.
d- Adjustment reflects the fair value adjustment based on the evaluation of the acquired foreclosed assets.
e- Adjustment reflects the fair value adjustment based on the evaluation of accrued interest receivable and other assets.
f- Adjustment reflects the fair value adjustment for the core deposit intangible asset recorded as a result of the acquisition.
g- This adjustment reflects the differences in the carrying values of acquired assets and assumed liabilities for financial reporting purposes and their basis for federal income tax purposes.
h- Adjustment reflects the fair value adjustment based on the evaluation of the acquired deposits.
i- Adjustment reflects the fair value adjustment of these assumed liabilities based on a valuation of such instruments by an independent, third party valuation firm.
j- Adjustment reflects the amount needed to adjust other liabilities to estimated fair value and to record certain liabilities directly attributable to the Intervest acquisition.

As a result of the recast adjustment described above, certain amounts previously reported in the Company's consolidated financial statements as of March 31, 2015 have been recast. The following is a summary of those financial statement captions that have been impacted by the recast adjustment.

| | As Previously Reported | Recast Adjustment | As Recast |
|---|---|---|---|
| | (Dollars in thousands) | | |
| Purchased loans | $2,042,164 | $ 4,393 | $2,046,557 |
| Net deferred tax asset | 63,483 | (985) | 62,498 |
| Goodwill | 125,603 | (2,719) | 122,884 |
| Income taxes receivable | 689 | (689) | — |

Goodwill of $44.2 million, which is the excess of the merger consideration over the estimated fair value of net assets acquired, was recorded in the Intervest acquisition and is the result of expected operational synergies, expansion of full service banking in New York City and other factors. This goodwill is not expected to be deductible for tax purposes. To the extent that management further revises any of the above fair value adjustments as a result of its continuing evaluation, the amount of goodwill recorded in the Intervest acquisition may be subject to further adjustment.

The Company's consolidated results of operations include the operating results of Intervest beginning February 11, 2015 through the end of the reporting period. For the three months ended September 30, 2015, Intervest contributed $13.1 million of net interest income and $5.7 million of net income to the Company's operating results. For the nine months ended September 30, 2015, Intervest contributed $36.9 million of net interest income and $19.2 million of net income to the Company's operating results.

The following unaudited supplemental pro forma information is presented to show the estimated results assuming Intervest was acquired as of the beginning of the earliest period presented, adjusted for estimated potential costs savings. These unaudited pro forma results are not necessarily indicative of the operating results that the Company

would have achieved had it completed the acquisition as of January 1, 2014 or 2015 and should not be considered as representative of future operating results.

| | Nine Months Ended September 30, | |

| Diluted earnings per common share – pro forma (unaudited) | $1.55 | $1.21 |

Summit Bancorp, Inc.

On May 16, 2014, the Company completed its acquisition of Summit Bancorp, Inc. ("Summit") and Summit Bank, its wholly-owned bank subsidiary, for an aggregate of $42.5 million in cash and 5,765,846 shares of its common stock. The acquisition of Summit expanded its service area in Central, South and Western Arkansas by adding 23 banking locations and one loan production office in nine Arkansas counties. Subsequent to the acquisition, the Company closed the acquired loan production office and nine banking offices, including seven banking offices that were acquired from Summit, in markets where the Company had excess branches as a result of the Summit acquisition. Goodwill of $73.4 million, which is the excess of the merger consideration over the fair value of net assets acquired, was recorded in the Summit acquisition and is the result of expected operational synergies and other factors. This goodwill is not expected to be deductible for tax purposes.

Bancshares, Inc.

On March 5, 2014, the Company completed its acquisition of Bancshares, Inc. ("Bancshares") and OMNIBANK, N.A., its wholly-owned bank subsidiary, for an aggregate of $21.5 million in cash. The Company recognized a bargain purchase gain of $4.7 million during the first quarter of 2014 as a result of the Bancshares acquisition. The acquisition of Bancshares expanded the Company's service area in South Texas by adding three offices in Houston and one office each in Austin, Cedar Park, Lockhart, and San Antonio.

4. Earnings Per Common Share ("EPS")

Basic EPS is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding. Diluted EPS is computed by dividing net income available to common stockholders by the weighted-average number of common shares outstanding after consideration of the dilutive effect, if any, of outstanding common stock options using the treasury stock method. For the three months and nine months ended September 30, 2015, options to purchase 4,000 shares and 519,270 shares, respectively, of the Company's common stock were excluded from the diluted EPS calculations as inclusion of these options would have been anti-dilutive. No options to purchase shares of common stock for the three months and nine months ended September 30, 2014 were excluded from the diluted EPS calculations as all options were dilutive.

The following table presents the computation of basic and diluted EPS for the periods indicated.

5. Investment Securities

At September 30, 2015 and 2014 and at December 31, 2014, the Company classified all of its investment securities portfolio as AFS. Accordingly, investment securities are stated at estimated fair value in the consolidated financial statements with unrealized gains and losses, net of related income tax, reported as a separate component of stockholders' equity and included in accumulated other comprehensive income (loss).

The following table presents the amortized cost and estimated fair value of investment securities AFS as of the dates indicated. The Company's investment in the "CRA qualified investment fund" includes shares held in a mutual fund that qualifies under the Community Reinvestment Act of 1977 for community reinvestment purposes. The Company's holdings of equity securities in Federal Home Loan Bank of Dallas ("FHLB") and First National Banker's Bankshares, Inc. ("FNBB") do not have readily determinable fair values and are carried at cost.

In evaluating the Company’s unrealized loss positions for other-than-temporary impairment of its investment securities portfolio, management considers the credit quality of the issuer, the nature and cause of the unrealized loss, the severity and duration of the impairments and other factors. At September 30, 2015 management determined the unrealized losses were the result of fluctuations in interest rates and did not reflect deteriorations of the credit quality of the investments. Accordingly, management considers these unrealized losses to be temporary in nature. The Company does not have the intent to sell these investment securities with unrealized losses and, more likely than not, will not be required to sell these investment securities before fair value recovers to amortized cost.

The following table shows the amortized cost and estimated fair value of investment securities AFS by maturity or estimated date of repayment as of the date indicated.

| | September 30, 2015 | |
|---|---|---|
| Maturity or Estimated Repayment | Amortized Cost | Estimated Fair Value |
| | (Dollars in thousands) | |
| One year or less | $50,009 | $50,799 |
| After one year to five years | 145,036 | 147,853 |
| After five years to ten years | 193,377 | 197,734 |
| After ten years | 389,015 | 399,987 |
| Total | $777,437 | $796,373 |

For purposes of this maturity distribution, all investment securities AFS are shown based on their contractual maturity date or estimated date of repayment, except (i) FHLB and FNBB equity securities and the CRA qualified investment fund with no contractual maturity date are shown in the longest maturity category and (ii) U.S. Government agency securities and municipal housing authority securities backed by residential mortgages are allocated among various maturities based on an estimated repayment schedule utilizing Bloomberg median prepayment speeds or other estimates of prepayment speeds and interest rate levels at the measurement date. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

The following table is a summary of sales activities in the Company’s investment securities AFS for the periods indicated.

| Ending balance | $59,017 | $49,606 | $59,017 | $49,606 |

As of September 30, 2015, the Company had identified purchased loans where it had determined it was probable that the Company would be unable to collect all amounts according to the contractual terms thereof (for purchased loans without evidence of credit deterioration at date of acquisition) or the expected performance of such loans had deteriorated from its performance expectations established in conjunction with the determination of the Day 1 Fair Values or since its most recent review of such portfolio's performance (for purchased loans with evidence of credit deterioration at date of acquisition). As a result, the Company recorded partial charge-offs totaling $0.7 million and $0.5 million during the three months ended September 30, 2015 and 2014, respectively, and $2.4 million and $1.8 million during the nine months ended September 30, 2015 and 2014, respectively. The Company also recorded provision for loan and lease losses of $0.7 million and $0.5 million during the three months ended September 30, 2015 and 2014, respectively, and $2.4 million and $1.8 million during the nine months ended September 30, 2015 and 2014, respectively. At September 30, 2015, the Company had $10.0 million of impaired purchased loans compared to $15.3 million at September 30, 2014 and $14.0 million at December 31, 2014.

Management has determined that certain of the Company's impaired non-purchased loans and leases do not require any specific allowance at September 30, 2015 and 2014 or at December 31, 2014 because (i) management's analysis of such individual loans and leases resulted in no impairment or (ii) all identified impairment on such loans and leases has previously been charged off.

Interest income on impaired non-purchased loans and leases is recognized on a cash basis when and if actually collected. Total interest income recognized on impaired non-purchased loans and leases for the three months and nine months ended September 30, 2015 and 2014 and for the year ended December 31, 2014 was not material.

(1) The Company does not risk rate its residential 1-4 family loans, its consumer loans, and certain “other” loans. However, for purposes of the above table, the Company considers such loans to be (i) satisfactory – if they are performing and less than 30 days past due, (ii) watch – if they are performing and 30 to 89 days past due or (iii) substandard – if they are nonperforming or 90 days or more past due.

The following categories of credit quality indicators are used by the Company.

Satisfactory – Loans and leases in this category are considered to be a satisfactory credit risk and are generally considered to be collectible in full.

Moderate – Loans and leases in this category are considered to be a marginally satisfactory credit risk and are generally considered to be collectible in full.

Watch – Loans and leases in this category are presently protected from apparent loss; however, weaknesses exist which could cause future impairment of repayment of principal or interest.

Substandard – Loans and leases in this category are characterized by deterioration in quality exhibited by a number of weaknesses requiring corrective action and posing risk of some loss.

The following table is an aging analysis of past due non-purchased loans and leases as of the dates indicated.

The following grades are used for purchased loans without evidence of credit deterioration at the date of acquisition.

FV 33 – Loans in this category are considered to be satisfactory with minimal credit risk and are generally considered collectible.

FV 44 – Loans in this category are considered to be marginally satisfactory with minimal to moderate credit risk and are generally considered collectible.

FV 55 – Loans in this category exhibit weakness and are considered to have elevated credit risk and elevated risk of repayment.

FV 36 – Loans in this category were not individually reviewed at the date of purchase and are assumed to have characteristics similar to the characteristics of the aggregate acquired portfolio.

FV 77 – Loans in this category have deteriorated since the date of purchase and are considered impaired.

The following grades are used for purchased loans with evidence of credit deterioration at the date of acquisition.

FV 66 – Loans in this category are performing in accordance with or exceeding management’s performance expectations established in conjunction with the determination of Day 1 Fair Values.

FV 88 – Loans in this category have deteriorated from management’s performance expectations established in conjunction with the determination of Day 1 Fair Values.

The Company had no allowance at September 30, 2015 and 2014 or December 31, 2014 for its (i) purchased loans without evidence of credit deterioration at the date of acquisition as management’s analysis of such individual loans resulted in no impairment or all identified impairment on such loans had been charged off, or (ii) purchased loans with evidence of credit deterioration at the date of acquisition as all such loans were performing in accordance with management’s expectations established in conjunction with the determination of the Day 1 Fair Values or all losses had been charged off on such loans whose performance had deteriorated from management’s expectations established in conjunction with the determination of the Day 1 Fair Values.

Federal net operating losses were acquired in the Bancshares, BCAR and The First National Bank of Shelby (“FNB Shelby”) acquisitions. The federal net operating losses acquired totaled $75.0 million, of which $72.2 million remained to be utilized as of September 30, 2015 and will expire at various dates beginning in 2028 to 2033.

State net operating losses were acquired in the FNB Shelby, Summit, Intervest and BCAR acquisitions. The state net operating losses acquired totaled $84.3 million, of which $69.2 million remained to be utilized as of September 30, 2015 and will expire at various dates beginning in 2022 to 2034.

At September 30, 2015 and 2014 and December 31, 2014, the Company had a deferred tax valuation allowance of $0.5 million to reflect its assessment that the realization of the benefits from the recovery of net operating losses acquired in the Bancshares acquisition are expected to be subject to limitations under section 382 of the Internal Revenue Code.

To the extent that additional information becomes available regarding the settlement or recovery of acquired net operating loss carryforwards or assets with built-in losses acquired in any of the Company’s previous acquisitions, management may be required to make adjustments to its deferred tax asset valuation allowance, which could affect goodwill or deferred income tax expense (benefit).

On February 10, 2015, in conjunction with the Intervest acquisition, the Company acquired the Intervest Trusts with outstanding subordinated debentures totaling $56.7 million and related trust preferred securities totaling $55.0 million. On the date of such acquisition, the Company recorded the assumed subordinated debentures owed to the Intervest Trusts at estimated fair value of $52.2 million, based on an independent third party valuation, to reflect a current market interest rate for comparable obligations. The fair value adjustment of $4.5 million is being amortized, using a level-yield methodology over the estimated holding period of approximately eight years, as an increase in interest expense of the subordinated debentures owed to the Intervest Trusts. In addition to the subordinated debentures of the Intervest Trusts, the Company also acquired $1.7 million of trust common equity issued by the Intervest Trusts.

The trust preferred securities issued by Intervest Trust II and the related subordinated debentures bear interest, adjustable quarterly, at 90-day London Interbank Offered Rates (“LIBOR”) plus 2.95% and contain a final maturity of September 17, 2033. The trust preferred securities issued by Intervest Trust III and the related subordinated debentures bear interest, adjustable quarterly, at 90-day LIBOR plus 2.79% and contain a final maturity of March 17, 2034. The trust preferred securities issued by Intervest Trust IV and the related subordinated debentures bear interest, adjustable quarterly, at 90-day LIBOR plus 2.40% and contain a final maturity of September 20, 2034. The trust preferred securities issued by Intervest Trust V and the related subordinated debentures bear interest, adjustable quarterly, at 90-day LIBOR plus 1.65% and contain a final maturity of December 15, 2036.

At September 30, 2015, the Company had an aggregate of $121.7 million of subordinated debentures outstanding (with an aggregate carrying value of $117.5 million) and had an asset of $3.7 million representing its investment in the common equity issued by the Trusts. The sole assets of the Trusts are the adjustable rate debentures and the liabilities of the Trusts are the trust preferred securities. At September 30, 2015 and 2014, the Trusts had aggregate common equity of $3.7 million and $1.9 million, respectively, and did not have any restricted net assets. The Company has, through various contractual arrangements or by operation of law, fully and unconditionally guaranteed all obligations

of the Trusts with respect to the trust preferred securities. Additionally, there are no restrictions on the ability of the Trusts to transfer funds to the Company in the form of cash dividends, loans or advances. The Company has the option to defer interest payments on the subordinated debentures from time to time for a period not to exceed five consecutive years. These trust preferred securities generally mature at or near the 30th anniversary date of each issuance. However, the trust preferred securities and related subordinated debentures may be prepaid at par, subject to regulatory approval.

11. Stock-Based Compensation

The Company has a nonqualified stock option plan for certain employees of the Company. This plan provides for the granting of nonqualified options to purchase shares of common stock in the Company. No option may be granted under this plan for less than the fair market value of the common stock, defined by the plan as the average of the highest reported asked price and the lowest reported bid price, on the date of the grant. The benefits or amounts that may be received by or allocated to any particular officer or employee of the Company under this plan will be determined in the sole discretion of the personnel and compensation committee of the Company’s board of directors. All employee options outstanding at September 30, 2015 were issued with a vesting date three years after issuance and an expiration date seven years after issuance.

During the second quarter of 2015, the Company adopted the Bank of the Ozarks, Inc. Non-Employee Director Stock Plan (the "Director Plan") that provides for awards of common stock to eligible non-employee directors. The Director Plan grants to each director who is not otherwise an employee of the Company, or any subsidiary, shares of common stock on the day of his or her election as director of the Company at each annual shareholders meeting, or any special meeting called for the purpose of electing a director or directors of the Company, and upon appointment for the first time as director of the Company. The number of shares of common stock to be awarded will be the equivalent of $25,000 worth of shares of common stock based on the average of the highest reported asked price and lowest reported bid price on the grant date. The common stock awarded under this plan is fully vested on the grant date. The aggregate number of shares of common stock which may be issued as awards under this plan will not exceed 50,000 shares, subject to certain adjustments. For the three months ended September 30, 2015, the Company issued no shares of common stock under the Director Plan. For the nine months ended September 30, 2015, the Company issued 7,657 shares of common stock and incurred $0.3 million in stock-based compensation expense related to common-stock awards issued under the Director Plan.

Prior to the adoption of the Director Plan, the Company had a nonqualified stock option plan for non-employee directors. No options were granted under this plan during the three months or nine months ended September 30, 2015. All options previously granted under this plan were exercisable immediately and expire ten years after issuance.

All shares issued in connection with options exercised under both the employee and non-employee director stock option plans were in the form of newly issued shares.

The following table summarizes stock option activity for both the employee and non-employee director stock option plans for the period indicated.

| | Options | Weighted-Average Exercise Price/Share | Weighted-Average Remaining Contractual Life (in years) | Aggregate Intrinsic Value (in thousands) | |
|---|---|---|---|---|---|
| Nine Months Ended September 30, 2015: | | | | | |

| Expected to vest in future periods | 1,246,000 | | | | |
| Fully vested and expected to vest – September 30, 2015 (2) | 1,544,550 | $ 23.70 | 5.0 | $ 30,979 | (1) |

(1) Based on closing price of $43.76 per share on September 30, 2015.

(2) At September 30, 2015, the Company estimated that outstanding options to purchase 100,870 shares of its common stock would not vest and would be forfeited prior to their vesting date.

Intrinsic value for stock options is defined as the amount by which the current market price of the underlying stock exceeds the exercise price. For those stock options where the exercise price exceeds the current market price of the

underlying stock, the intrinsic value is zero. The total intrinsic value of options exercised during the three months ended September 30, 2015 and 2014 was $0.5 million and $0.9 million, respectively. The total intrinsic value of options exercised during the nine months ended September 30, 2015 and 2014 was $3.3 million and $5.0 million, respectively.

Options to purchase 4,000 shares and 52,000 shares of the Company's stock were issued during the nine months ended September 30, 2015 and 2014, respectively. Stock-based compensation expense for stock options included in non-interest expense was $0.6 million and $0.4 million for the three months ended September 30, 2015 and 2014, respectively, and $1.8 million and $1.6 million for the nine months ended September 30, 2015 and 2014. Total unrecognized compensation cost related to non-vested stock option grants was $3.1 million at September 30, 2015 and is expected to be recognized over a weighted-average period of 1.8 years.

The Company has a restricted stock and incentive plan whereby all officers and employees of the Company are eligible to receive awards of restricted stock, restricted stock units or performance awards. The benefits or amounts that may be received by or allocated to any particular officer or employee of the Company under this plan will be determined in the sole discretion of the Company’s board of directors or its personnel and compensation committee. Shares of common stock issued under the plan may be shares of original issuance or shares held in treasury that have been reacquired by the Company. While the vesting period for awards under the plan is determined by the personnel and compensation committee at the time of grant, all restricted stock awards granted under the plan have a vesting date of three years after issuance.

The following table summarizes non-vested restricted stock activity for the period indicated.

| | Nine Months Ended September 30, 2015 |
|---|---|
| Outstanding – January 1, 2015 | 444,700 |
| Granted | 245,300 |
| Forfeited | (41,325) |
| Vested | — |
| Outstanding – September 30, 2015 | 648,675 |
| | |
| Weighted-average grant date fair value | $ 25.29 |

The fair value of the restricted stock awards is amortized to compensation expense over the vesting period and is based on the market price of the Company’s common stock at the date of grant multiplied by the number of shares granted that are expected to vest. Stock-based compensation expense for restricted stock included in non-interest expense was $1.4 million and $0.9 million for the three months ended September 30, 2015 and 2014, respectively, and $4.1 million and $2.8 million for the nine months ended September 30, 2015 and 2014, respectively. Unrecognized compensation expense for non-vested restricted stock awards was $8.0 million at September 30, 2015 and is expected to be recognized over a weighted-average period of 2.0 years.

12. Fair Value Measurements

The Company measures certain of its assets and liabilities on a fair value basis using various valuation techniques and assumptions, depending on the nature of the asset or liability. Fair value is defined as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Additionally, fair value is used either annually or on a non-recurring basis to evaluate certain assets and liabilities for impairment or for disclosure purposes. The Company had no liabilities that were accounted for at fair value at September 30, 2015 or 2014 or at December 31, 2014.

The Company applies the following fair value hierarchy.

Level 1 – Quoted prices for identical instruments in active markets.

Level 2 – Quoted prices for similar instruments in active markets; quoted prices for identical or similar instruments in markets that are not active; and model-derived valuations whose inputs are observable.

Level 3 – Instruments whose inputs are unobservable.

The following table sets forth the Company's assets, as of the dates indicated, that are accounted for at fair value.

The following table presents information related to Level 3 non-recurring fair value measurements as of the date indicated.

| Description (Dollars in thousands) | Fair Value at September 30, 2015 | Technique | Unobservable Inputs |

(1) The Company utilizes valuation techniques consistent with the market, cost, and income approaches, or a combination thereof in determining fair value.

The following methods and assumptions are used to estimate the fair value of the Company’s assets and liabilities that are accounted for at fair value.

Investment securities – The Company utilizes independent third parties as its principal pricing sources for determining fair value of investment securities which are measured on a recurring basis. As a result, the Company receives estimates of fair values from at least two independent pricing sources for the majority of its individual securities within its investment portfolio. For investment securities traded in an active market, fair values are based on quoted market prices if available. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities, broker quotes, comprehensive interest rate tables and pricing matrices or a combination thereof. For investment securities traded in a market that is not active, fair value is determined using unobservable inputs. All fair value estimates of the Company’s investment securities are reviewed and approved on a quarterly basis by its Investment Portfolio Manager and its Chief Financial Officer.

The Company has determined that certain of its investment securities had a limited to non-existent trading market at September 30, 2015. As a result, the Company considers these investments as Level 3 in the fair value hierarchy. Specifically, the fair values of certain obligations of state and political subdivisions consisting primarily of certain unrated private placement bonds (the “private placement bonds”) in the amount of $18.7 million at September 30, 2015 were calculated using Level 3 hierarchy inputs and assumptions as the trading market for such securities was determined to be “not active.” This determination was based on the limited number of trades or, in certain cases, the existence of no reported trades for the private placement bonds. The private placement bonds are generally prepayable at par value at the option of the issuer. As a result, management believes the private placement bonds should be

individually valued at the lower of (i) the matrix pricing provided by the Company's third party pricing services for comparable unrated municipal securities or (ii) par value. At September 30, 2015, the third parties' pricing matrices valued the Company's portfolio of private placement bonds at $18.7 million which was equal to the aggregate par value of the private placement bonds. Accordingly, at September 30, 2015, the Company reported the private placement bonds at $18.7 million.

Impaired non-purchased loans and leases – Fair values are measured on a nonrecurring basis and are based on the underlying collateral value of the impaired loan or lease, net of holding and selling costs, or the estimated discounted cash flows for such loan or lease. At September 30, 2015 the Company had reduced the carrying value of its impaired loans and leases (all of which are included in nonaccrual loans and leases) by $5.0 million to the estimated fair value of $11.4 million. The $5.0 million adjustment to reduce the carrying value of impaired loans and leases to estimated fair value consisted of $4.1 million of partial charge-offs and $0.9 million of specific allowance for loan and lease loss allocations.

Impaired purchased loans – Impaired purchased loans are measured at fair value on a non-recurring basis. As of September 30, 2015, the Company had identified purchased loans where current information indicates it is probable that the Company will not be able to collect all amounts according to the contractual terms thereof (for purchased loans without evidence of credit deterioration at date of acquisition) or the expected performance of such loans had deteriorated from management's performance expectations established in conjunction with the determination of the Day 1 Fair Values or since management's most recent review of such portfolio's performance (for purchased loans with evidence of credit deterioration at date of acquisition). As a result, the Company recorded partial charge-offs totaling $0.7 million and $0.5 million during the three months ended September 30, 2015 and 2014, respectively, and $2.4 million and $1.8 million during the nine months ended September 30, 2015 and 2014, respectively. The Company also recorded provision for loan and lease losses of $0.7 million and $0.5 million during the three months ended September 30, 2015 and 2014, respectively, and $2.4 million and $1.8 million during the nine months ended September 30, 2015 and 2014, respectively, to cover such charge-offs. At September 30, 2015, the Company had $10.0 million of impaired purchased loans.

Foreclosed assets – Repossessed personal properties and real estate acquired through or in lieu of foreclosure are measured on a non-recurring basis and are initially recorded at the lesser of current principal investment or fair value less estimated cost to sell (generally 8% to 10%) at the date of repossession or foreclosure. Purchased foreclosed assets are initially recorded at Day 1 Fair Values. In estimating such Day 1 Fair Values, management considered a number of factors including, among others, appraised value, estimated selling price, estimated holding periods and net present value (calculated using discount rates ranging from 8.0% to 9.5% per annum) of cash flows expected to be received. Valuations of these assets are periodically reviewed by management with the carrying value of such assets adjusted to the then estimated fair value net of estimated selling costs, if lower, until disposition. Fair values of foreclosed and repossessed assets are generally based on third party appraisals, broker price opinions or other valuations of the property.

The following table presents additional information for the periods indicated about assets measured at fair value on a recurring basis and for which the Company has utilized Level 3 inputs to determine fair value.

13. Fair Value of Financial Instruments

The following methods and assumptions were used to estimate the fair value of financial instruments.

Cash and due from banks – For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Investment securities – The Company utilizes independent third parties as its principal pricing sources for determining fair value of investment securities which are measured on a recurring basis. As a result, the Company receives estimates of fair values from at least two independent pricing sources for the majority of its individual securities within its investment portfolio. For investment securities traded in an active market, fair values are based on quoted market prices if available. If quoted market prices are not available, fair values are based on quoted market prices of comparable securities, broker quotes, comprehensive interest rate tables, pricing matrices or a combination thereof. For investment securities traded in a market that is not active, fair value is determined using unobservable inputs. All fair value estimates of the Company's investment securities are reviewed and approved on a quarterly basis by its Investment Portfolio Manager and its Chief Financial Officer. The Company's investments in FHLB and FNBB equity securities totaling $10.0 million at September 30, 2015, $14.2 million at December 31, 2014 and $17.6 million at September 30, 2014, do not have readily determinable fair values and are carried at cost.

Loans and leases – The fair value of loans and leases, including purchased loans, is estimated by discounting the contractual cash flows to be received in future periods using the current rate at which similar loans or leases would be made to borrowers or lessees with similar credit ratings and for the same remaining maturities.

Deposit liabilities – The fair value of demand deposits, savings accounts, money market deposits and other transaction accounts is the amount payable on demand at the reporting date. The fair value of fixed maturity time deposits is estimated using the rate currently available for deposits of similar remaining maturities.

Repurchase agreements – For these short-term instruments, the carrying amount is a reasonable estimate of fair value.

Other borrowed funds – For these short-term instruments, the carrying amount is a reasonable estimate of fair value. The fair value of long-term instruments is estimated based on the current rates available to the Company for borrowings with similar terms and remaining maturities.

Subordinated debentures – The fair values of these instruments are based primarily upon discounted cash flows using rates for securities with similar terms and remaining maturities.

Off-balance sheet instruments – The fair values of commercial loan commitments and letters of credit are based on fees currently charged to enter into similar agreements, taking into account the remaining terms of the agreements, and were not material at September 30, 2015 and 2014 or at December 31, 2014.

The fair values of certain of these instruments were calculated by discounting expected cash flows, which contain numerous uncertainties and involve significant judgments by management. Fair value is the estimated amount at which financial assets or liabilities could be exchanged in a current transaction between willing parties other than in a forced or liquidation sale. Because no market exists for certain of these financial instruments and because management does not intend to sell these financial instruments, the Company did not know whether the fair values represent values at which the respective financial instruments could be sold individually or in the aggregate.

The following table presents the carrying amounts and estimated fair values as of the dates indicated and the fair value hierarchy of the Company's financial instruments.

| | | September 30, 2015 | | 2014 | | December 31, 2014 | |

14. Repurchase Agreements With Customers

At September 30, 2015 and 2014 and December 31, 2014, securities sold under agreements to repurchase ("repurchase agreements") totaled $80.0 million, $73.9 million and $65.6 million, respectively. Securities utilized as collateral for repurchase agreements are primarily U.S. Government agency mortgage-backed securities and are maintained by the Company's safekeeping agents. These securities are reviewed by the Company on a daily basis, and the Company may be required to provide additional collateral due to changes in the fair market value of these securities. The terms of the Company's repurchase agreements are continuous but may be cancelled at any time by the Company or the customer.

15. Changes In and Reclassifications From Accumulated Other Comprehensive Income ("AOCI")

The following table presents changes in AOCI for the periods indicated.

| | Three Months Ended | | Nine Months Ended | |

| Ending balance of AOCI – unrealized gains and losses on investment securities AFS | $11,721 | $10,724 | $11,721 | $10,724 |

Amounts reclassified from AOCI are included in net gains on investment securities and the tax effect of amounts reclassified from AOCI are included in provision for income tax in the consolidated statements of income. The amounts reclassified from AOCI relate entirely to unrealized gains/losses on investment securities AFS that were sold during the periods indicated.

17. Subsequent Event

On October 19, 2015, the Company entered into a definitive agreement and plan of merger (the “C&S Agreement”) with Community & Southern Holdings, Inc. (“C&S”) and its wholly-owned bank subsidiary Community & Southern Bank, whereby the Company will acquire all of the outstanding common stock of C&S in a transaction valued at approximately $799.6 million. Community & Southern Bank, headquartered in Atlanta, Georgia, operates 47 banking offices throughout Georgia and one banking office in Jacksonville, Florida. At September 30, 2015, including the pro forma impact of certain assets acquired and liabilities assumed by C&S from CertusBank, C&S had approximately $4.4 billion in total assets, approximately $3.0 billion in total loans, approximately $3.7 billion in total deposits and approximately $457 million in stockholders’ equity.

Under the terms of the C&S Agreement, each outstanding share of common stock of C&S and each outstanding C&S stock option, warrant, restricted stock unit and deferred stock unit will be converted into the right to receive shares of the Company’s common stock, plus cash in lieu of any fractional share, all subject to certain conditions and potential adjustments. The number of Company shares to be issued will be determined based on the Company’s fifteen day volume weighted average stock price as of the second business day prior to the closing date, subject to a minimum price of $34.10 per share and a maximum price of $56.84 per share. Upon the closing of the transaction, which is expected to occur late in the first quarter or in the second quarter of 2016, C&S will merge into the Company and Community & Southern Bank will merge into the Bank. Completion of the transaction is subject to certain closing conditions, including receipt of customary regulatory approvals and the approval of C&S and the Company’s shareholders.

18. Recent and Proposed Accounting Pronouncements

Recent Accounting Pronouncements

In May 2014, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2014-09, "Revenue from Contracts with Customers." ASU 2014-09 provides guidance that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods and services. In August 2015, the FASB issued ASU 2015-14, which defers the effective date of this standard to annual and interim periods beginning after December 15, 2017; however, early adoption is permitted for annual and interim reporting periods beginning after December 15, 2016. The Company is currently evaluating the impact, if any, ASU 2014-09 will have on its financial position, results of operations, and its financial statement disclosures.

In June 2014, the FASB issued ASU 2014-11 "Transfers and Servicing (Topic 860)." ASU 2014-11 amends the accounting guidance for repo-to-maturity transactions and requires such transactions to be accounted for as secured borrowings. In addition, ASU

2014-11 requires enhanced disclosures related to the collateral pledged, maturity and risk associated with repurchase agreements. The Company adopted the provision of ASU 2014-11 beginning April 1, 2015. The adoption of ASU 2014-11 had no significant impact on the Company's financial position or results of operations but did require additional disclosures about the Company's repurchase agreements.

In January 2015, the FASB issued ASU 2015-01, "Income Statement – Extraordinary and Unusual Items (Subtopic 225-20) – Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items." ASU 2015-01 eliminates from GAAP the concept of extraordinary items, which, among other things, required an entity to segregate extraordinary items considered to be unusual and infrequent from the results of ordinary operations and show the item separately in the income statement, net of tax, after income from continuing operations. ASU 2015-01 is effective for interim and annual periods beginning after December 15, 2015. ASU 2015-01 is not expected to have a significant impact on the Company's financial position, results of operations, or its financial statement disclosures.

In February 2015, the FASB issued ASU 2015-02, "Consolidation (Topic 810): Amendments to the Consolidation Analysis" which amends the consolidation requirements of ASU 810 by changing the consolidation analysis required under GAAP. The revised guidance amends the consolidation analysis based on certain fee arrangements or relationships to the reporting entity and, for limited partnerships, requires entities to consider the limited partner's rights relative to the general partner. ASU 2015-02 is effective for annual and interim periods beginning after December 15, 2015. ASU 2015-02 is not expected to have a significant impact on the Company's financial position, results of operations, or its financial statement disclosures.

In April 2015, the FASB issued ASU 2015-03, "Interest – Imputation of Interest (Subtopic 835-30) – Simplifying the Presentation of Debt Issuance Costs." ASU 2015-03 requires that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in ASU 2015-03. In August 2015, the FASB issued ASU 2015-15 to clarify the SEC staff's position on presenting and measuring debt issue costs related to line-of-credit arrangements.  ASU 2015-03 and ASU 2015-15 are effective for interim and annual periods beginning after December 15, 2015. ASU 2015-03 and ASU 2015-15 are not expected to have a significant impact on the Company's financial position, results of operations, or its financial statement disclosures.

In September 2015, the FASB issued ASU 2015-16 "Simplifying the Accounting for Measurement-Period Adjustments."  ASU 2015-16 requires entities to recognize measurement period adjustments during the reporting period in which the adjustments are determined.  The income effects, if any, of a measurement period adjustment are cumulative and are to be reported in the period in which the adjustment to a provisional amount is determined.  Also, ASU 2015-16 requires presentation on the face of the income statement or in the notes, the effect of the measurement period adjustment as if the adjustment had been recognized at acquisition date.  ASU 2015-16 is effective for fiscal periods beginning after December 15, 2016 and should be applied prospectively to measurement period adjustments that occur after the effective date.

Proposed Accounting Pronouncements

In December 2012, the FASB announced a project related to the impairment of financial instruments in an effort to provide new guidance that would significantly change how entities measure and recognize credit impairment for certain financial assets.  While completion of the project and related guidance is still pending, it is anticipated that new guidance will replace the current incurred loss model that is utilized in estimating the allowance for loan and lease losses with a model that requires management to estimate all contractual cash flows that are not expected to be collected over the life of the loan.  This revised model is what FASB describes as the current expected credit loss ("CECL") model and FASB believes the CECL model will result in more timely recognition of credit losses since the CECL model incorporates expected credit losses versus incurred credit losses.  The proposed scope of FASB's CECL model would include loans, held-to-maturity debt instruments, lease receivables, loan commitments and financial

guarantees that are not accounted for at fair value. The final issuance date and the implementation date of the CECL guidance is currently pending; however, the Company will continue to monitor FASB's progress on this project.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
Unless this quarterly report on Form 10-Q indicates otherwise, or the context otherwise requires, the terms "we," "our," "us," and "the Company," as used herein refer to Bank of the Ozarks, Inc. and its subsidiaries, including Bank of the Ozarks, which we sometimes refer to as "Bank of the Ozarks," "our bank subsidiary," or "the Bank."

FORWARD-LOOKING INFORMATION

This quarterly report on Form 10-Q, including Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A"), other filings made by us with the Securities and Exchange Commission ("SEC") and other oral and written statements or reports by us and our management include certain forward-looking statements that are intended to be covered by the Private Securities Litigation Reform Act of 1995. Forward-looking statements are based on management's expectations as well as certain assumptions and estimates made by, and information available to, management at the time. Forward-looking statements include, without limitation, statements about economic, real estate market, competitive, employment, credit market and interest rate conditions and our plans, goals, beliefs, expectations, thoughts, estimates and outlook for the future with respect to our revenue growth; net income and earnings per common share; net interest margin; net interest income; non-interest income, including service charges on deposit accounts, mortgage lending and trust income, gains (losses) on investment securities and sales of other assets; gains on merger and acquisition transactions; other income from purchased loans; non-interest expense; efficiency ratio; anticipated future operating results and financial performance; asset quality and asset quality ratios, including the effects of current economic and real estate market conditions; nonperforming loans and leases; nonperforming assets; net charge-offs and net charge-off ratios; provision and allowance for loan and lease losses; past due loans and leases; current or future litigation; interest rate sensitivity, including the effects of possible interest rate changes; future growth and expansion opportunities including plans for making additional acquisitions; problems with integrating or managing acquisitions; the effect of the announcements or completion of any pending or future mergers or acquisitions on customer relationships and operating results; plans for opening new offices or relocating or closing existing offices; opportunities and goals for future market share growth; expected capital expenditures; loan, lease and deposit growth, including growth from unfunded closed loans; changes in the volume, yield and value of our investment securities portfolio; availability of unused borrowings and other similar forecasts and statements of expectation. Words such as "anticipate," "believe," "could," "estimate," "expect," "goal," "hope," "intend," "look," "may," "pl "seek," "target," "trend," "will," "would," and similar expressions, as they relate to us or our management, identify forward-looking statements.

Actual future performance, outcomes and results may differ materially from those expressed in forward-looking statements made by us and our management due to certain risks, uncertainties and assumptions. Certain factors that may affect our future results include, but are not limited to, potential delays or other problems in implementing our growth and expansion strategy including delays in identifying satisfactory sites, hiring or retaining qualified personnel, obtaining regulatory or other approvals, obtaining permits and designing, constructing and opening new offices; the ability to enter into and/or close additional acquisitions; problems with, or additional expenses relating to, integrating or managing acquisitions; the availability of capital; the ability to attract new or retain existing or acquired deposits; the ability to achieve growth in loans and leases, including growth from unfunded closed loans; the ability to generate future revenue growth or to control future growth in non-interest expense; interest rate fluctuations, including changes in the yield curve between short-term and long-term interest rates; competitive factors and pricing pressures, including their effect on our net interest margin; general economic, unemployment, credit market and real estate market conditions, and the effect of such conditions on the creditworthiness of borrowers and lessees, collateral values, the value of investment securities and asset recovery values; changes in legal and regulatory requirements; recently enacted and potential legislation and regulatory actions, and the costs and expenses to comply with new legislation and regulatory actions, including legislation and regulatory actions intended to stabilize economic conditions and credit markets, strengthen the capital of financial institutions, increase regulation of the financial services industry and protect homeowners or consumers; changes in U.S. government monetary and fiscal policy; possible further downgrade of U.S. Treasury securities; the ability to keep pace with technological changes, including changes regarding cyber security; an increase in the incidence or severity of fraud, illegal payments, security breaches

and other illegal acts impacting our bank subsidiary or our customers; adoption of new accounting standards or changes in existing standards; and adverse results in current or future litigation or regulatory examinations as well as other factors described in this quarterly report on Form 10-Q or as detailed from time to time in the other reports we file with the SEC, including those factors included in the disclosures under the heading "Forward-Looking Information" and "Item 1A. Risk Factors" in our most recent Annual Report on Form 10-K for the year ended December 31, 2014. Should one or more of the foregoing risks materialize, or should underlying assumptions prove incorrect, actual results or outcomes may vary materially from those described in the forward-looking statements. We disclaim any obligation to update or revise any forward-looking statement based on the occurrence of future events, the receipt of new information or otherwise.

SELECTED AND SUPPLEMENTAL FINANCIAL DATA

The following tables set forth selected unaudited consolidated financial data as of and for the three months and nine months ended September 30, 2015 and 2014 and supplemental unaudited quarterly financial data for each of the most recent eight quarters beginning with the fourth quarter of 2013 through the third quarter of 2015. These tables are qualified in their entirety by our consolidated financial statements and related notes presented elsewhere in this quarterly report on Form 10-Q. The calculations of our tangible book value per common share and our annualized returns on average tangible common stockholders' equity and the reconciliations to generally accepted accounting principles ("GAAP") are included in this MD&A under "Capital Resources and Liquidity" in this quarterly report on Form 10-Q.

(3) Excludes purchased loans and net charge-offs related to such loans.
(4) Excludes purchased loans, except for their inclusion in total assets.
(5) Ratios for prior periods have been recalculated to include foreclosed assets previously covered by FDIC loss share agreements as nonperforming assets.

OVERVIEW

The following discussion explains our financial condition and results of operations as of and for the three months and nine months ended September 30, 2015. The purpose of this discussion is to focus on information about our financial condition and results of operations which is not otherwise apparent from the consolidated financial statements. The following discussion and analysis should be read in conjunction with the consolidated financial statements and related notes presented elsewhere in this report and our Annual Report on Form 10-K for the year ended December 31, 2014 previously filed with the SEC. Annualized results for these interim periods may not be indicative of results for the full year or future periods.

Bank of the Ozarks, Inc. is a bank holding company whose primary business is commercial banking conducted through its wholly-owned state chartered bank subsidiary – Bank of the Ozarks. Our results of operations depend primarily on net interest income, which is the difference between the interest income from earning assets, such as loans and leases and investments, and the interest expense incurred on interest bearing liabilities, such as deposits, borrowings and subordinated debentures. We also generate non-interest income, including, among others, service charges on deposit accounts, mortgage lending income, trust income, bank owned life insurance ("BOLI") income, other income from purchased loans, gains on investment securities and from sales of other assets, and gains on merger and acquisition transactions.

Our non-interest expense consists primarily of employee compensation and benefits, net occupancy and equipment expense and other operating expenses. Our results of operations are significantly affected by our provision for loan and lease losses and our provision for income taxes.

CRITICAL ACCOUNTING POLICIES

The preparation of financial statements in conformity with GAAP requires management to make estimates, assumptions and judgments that affect the amounts reported in the consolidated financial statements. Our determination of (i) the provisions to and the adequacy of the allowance for loan and lease losses ("ALLL"), (ii) the fair value of our investment securities portfolio, (iii) the fair value of foreclosed assets and (iv) the fair value of the assets acquired and liabilities assumed pursuant to business combination transactions all involve a higher degree of judgment and complexity than our other significant accounting policies. Accordingly, we consider the determination of (i) provisions to and the adequacy of the ALLL, (ii) the fair value of our investment securities portfolio, (iii) the fair value of foreclosed assets and (iv) the fair value of the assets acquired and liabilities assumed pursuant to business combination transactions to be critical accounting policies. A detailed discussion of each of these critical accounting policies is included in our Annual Report on Form 10-K for the year ended December 31, 2014. There has been no change in our critical accounting policies and no material change in the application of critical accounting policies as presented in our Annual Report on Form 10-K for the year ended December 31, 2014.

ANALYSIS OF RESULTS OF OPERATIONS

General

During the fourth quarter of 2014, we entered into agreements with the Federal Deposit Insurance Corporation ("FDIC") terminating the loss share agreements for all seven of our FDIC-assisted acquisitions. As a result of entering these termination agreements, we reclassified loans previously reported as covered by FDIC loss share to purchased loans for all periods presented. Additionally, we reclassified all interest income on loans previously reported as covered by FDIC loss share to interest income on purchased loans for all periods presented.

Net income available to our common stockholders was $46.1 million for the third quarter of 2015, a 43.7% increase from $32.1 million for the third quarter of 2014. Diluted earnings per common share were $0.52 for the third quarter of 2015, a 30.0% increase from $0.40 for the third quarter of 2014. For the first nine months of 2015, net income

available to common stockholders was $130.8 million, a 56.0% increase from $83.9 million for the first nine months of 2014. Diluted earnings per common share for the first nine months of 2015 were $1.51, a 39.8% increase from $1.08 for the first nine months of 2014.

Our annualized return on average assets was 2.05% for the third quarter of 2015 compared to 1.98% for the third quarter of 2014. Our annualized return on average common stockholders' equity was 14.46% for the third quarter of 2015 compared to 14.80% for the third quarter of 2014. Our annualized return on average tangible common stockholders' equity was 16.48% for the third quarter of 2015 compared to 16.93% for the third quarter of 2014. Our annualized return on average assets was 2.11% for the first nine months of 2015 compared to 1.98% for the first nine months of 2014. Our annualized return on average common stockholders' equity was 14.95% for the first nine months of 2015 compared to 14.92% for the first nine months of 2014. Our annualized return on average tangible common stockholders' equity was 17.08% for the first nine months of 2015 compared to 16.27% for the first nine months of 2014. The calculation of our return on average tangible common stockholders' equity and the reconciliation to GAAP is included elsewhere in this MD&A.

Total assets were $9.33 billion at September 30, 2015 compared to $6.77 billion at December 31, 2014. Non-purchased loans and leases were $5.45 billion at September 30, 2015 compared to $3.98 billion at December 31, 2014. Purchased loans were $1.96 billion at September 30, 2015 compared to $1.15 billion at December 31, 2014. Total loans and leases were $7.41 billion at September 30, 2015 compared to $5.13 billion at December 31, 2014. Deposits were $7.61 billion at September 30, 2015 compared to $5.50 billion at December 31, 2014.

Common stockholders' equity was $1.31 billion at September 30, 2015 compared to $908 million at December 31, 2014. Tangible common stockholders' equity was $1.16 billion at September 30, 2015 compared to $803 million at December 31, 2014. Book value per common share was $14.89 at September 30, 2015 compared to $11.37 at December 31, 2014. Tangible book value per common share was $13.12 at September 30, 2015 compared to $10.04 at December 31, 2014. The calculation of our tangible common stockholders' equity and tangible book value per common share and the reconciliation to GAAP is included elsewhere in this MD&A.

On March 5, 2014, we completed our acquisition of Bancshares, Inc. ("Bancshares"). Our consolidated results of operations include the acquired operations of Bancshares beginning March 6, 2014.

On May 16, 2014, we completed our acquisition of Summit Bancorp, Inc. ("Summit"). Our consolidated results of operations include the acquired operations of Summit beginning May 17, 2014.

On February 10, 2015, we completed our acquisition of Intervest Bancshares Corporation ("Intervest"). Our consolidated results of operations include the acquired operations of Intervest beginning February 11, 2015. During the second quarter of 2015, we revised our initial estimates regarding the recovery of certain acquired loans and acquired deferred tax assets in the Intervest acquisition. Because such revision occurred during the first 12 months following the date of acquisition and was not the result of a change in circumstances, we have recast the consolidated financial statements as of and for the three months ended March 31, 2015 to decrease the goodwill recorded in the Intervest acquisition by $2.7 million to reflect this change in estimate. The fair value adjustments and resultant fair values recorded in the Intervest acquisition may be subject to further adjustments.

On August 5, 2015, we completed our acquisition of Bank of the Carolinas Corporation ("BCAR"). Our consolidated results of operations include the acquired operations of BCAR beginning August 6, 2015.

Net Interest Income

Net interest income is a significant source of our earnings and represents the amount by which interest income on earning assets exceeds the interest expense paid on liabilities. The volume of interest earning assets and the related funding sources, the overall mix of these assets and liabilities, and the rates paid on each affect net interest income.

Net interest income and net interest margin are analyzed in this discussion and the following tables on a fully taxable equivalent ("FTE") basis. The adjustment to convert certain income to a FTE basis consists of dividing federal tax-exempt income by one minus our statutory federal income tax rate of 35%. The FTE adjustments to net interest income were $2.4 million and $2.9 million for the three months ended September 30, 2015 and 2014, respectively, and $7.5 million and $8.1 million for the nine months ended September 30, 2015 and 2014, respectively. No adjustments have been made in this analysis for income exempt from state income taxes or for interest expense deductions disallowed under the provisions of the Internal Revenue Code (the "Code") as a result of investment in certain tax-exempt securities.

Net interest income for the third quarter of 2015 increased 27.4% to $98.8 million compared to $77.5 million for the third quarter of 2014. Net interest income for the first nine months of 2015 increased 41.7% to $283.1 million compared to $199.9 million for the first nine months of 2014. This increase in net interest income for the third quarter and first nine months of 2015 compared to the same periods in 2014 was primarily due to the increase in average earning assets, which increased 37.9% to $7.73 billion for the third quarter and 48.2% to $7.17 billion for the first nine

months of 2015, compared to $5.61 billion for the third quarter and $4.84 billion for the first nine months of 2014, partially offset by decreases in our net interest margin.

The increase in average earning assets for the third quarter and first nine months of 2015 compared to the same periods in 2014 was due to an increase in the average balances of non-purchased loans and leases of $1.62 billion, or 47.5%, for the third quarter and $1.54 billion, or 51.3%, for the first nine months of 2015 compared to the same periods in 2014 as we continued to experience strong growth in our originations of non-purchased loans and leases. Additionally, the average balance of purchased loans increased $595 million, or 44.6%, for the third quarter and $786 million, or 74.3%, for the first nine months of 2015 compared to the same periods in 2014, primarily as a result of our Intervest acquisition.

Our net interest margin for the third quarter of 2015 decreased 42 basis points ("bps") to 5.07% compared to 5.49% for the third quarter in 2014. This decrease was primarily due to a 44 bps decrease in the yield on earning assets, partially offset by a four bps reduction in rates paid on interest bearing liabilities. Our net interest margin for the first nine months of 2015 decreased 24 bps to 5.28% compared to 5.52% for the first nine months of 2014. This decrease was primarily due to a 30 bps decrease in the yield on earning assets, partially offset by a seven bps reduction in the rates paid on interest bearing liabilities.

Yields on earning assets decreased to 5.43% for the third quarter and 5.64% for the first nine months of 2015 compared to 5.87% for the third quarter and 5.94% for the first nine months of 2014 primarily due to the decreases in yield on our non-purchased loan and lease portfolio, our purchased loan portfolio and our aggregate investment securities portfolio. The yield on our non-purchased loan and lease portfolio decreased eight bps for the third quarter and five bps for the first nine months of 2015 compared to the same periods in 2014. These decreases were primarily attributable to the extremely low interest rate environment experienced in recent years and increased pricing competition from many of our competitors. Assuming this low interest rate environment and pricing competition from many of our competitors continues, we expect our yields on our non-purchased loan and lease portfolio will continue to decrease. The yield on our purchased loan portfolio decreased 170 bps for the third quarter and 155 bps for the first nine months of 2015 compared to the same periods in 2014. These decreases were primarily attributable to the loans acquired in our Summit and Intervest transactions, many of which did not contain evidence of credit deterioration on the date of purchase and were priced at a lower yield compared to the then existing yield on our purchased loan portfolio. These decreases in yield on our purchased loan portfolio were partially offset by increases in the yield on certain purchased loans with evidence of credit deterioration on the date of acquisition due to upward revisions of estimated cash flows as a result of recent evaluations of the expected performance of such loans. The yield on our aggregate investment securities portfolio decreased four bps for the third quarter and 11 bps for the first nine months of 2015 compared to the same periods in 2014. These decreases were primarily the result of (i) a change in the composition of our investment securities portfolio to include a larger percentage of taxable investment securities, which comprised 47.1% of total average investment securities for the third quarter and 45.4% for the first nine months of 2015 compared to 40.4% for the third quarter and 40.5% for the first nine months of 2014 and (ii) the current low interest rate environment which has resulted in many issuers of investment securities, particularly tax-exempt municipal bonds, calling higher-rate investment securities and refinancing such securities at lower interest rates. Assuming this current low interest rate environment continues, we expect additional tax-exempt investment securities to be called by their issuers and be refinanced at lower interest rates, likely resulting in continued decreases on the yield of our tax-exempt investment securities portfolio.

The overall decrease in rates on average interest bearing liabilities, which decreased four bps for the third quarter and seven bps for the nine months ended September 30, 2015 compared to the same periods in 2014, was primarily due to a shift in the composition of total interest bearing liabilities to include a larger percentage of interest bearing deposits, partially offset by an increase in rates on interest bearing deposits, particularly time deposits. Interest bearing deposits, which generally have lower rates than most of our other interest bearing liabilities, comprised 94.3% of total average interest bearing liabilities for the third quarter and 93.9% for the first nine months of 2015 compared to 90.4% for the third quarter and 89.4% for the first nine months of 2014. The increase in interest bearing deposits as a percentage of total interest bearing liabilities was due, in part, to interest bearing deposits assumed in our Summit and Intervest acquisitions and growth in interest bearing deposits. The increase in rates on interest bearing deposits, which increased eight bps for both the third quarter and first nine months of 2015 compared to the same periods in 2014, is primarily due to a shift in the composition of interest bearing deposits to a larger percentage of time deposits, primarily as a result of our Intervest acquisition. The average balance of time deposits increased from 29.7% of total average interest bearing deposits for the third quarter of 2014 to 36.3% for the third quarter of 2015 and from 29.0% for the first nine months of 2014 to 37.9% for the first nine months of 2015. Additionally, throughout much of 2014 and during the third quarter of 2015, we increased deposit pricing, including the pricing of time deposits, in several target markets to fund growth in loans and leases. To the extent we have future growth in loans and leases, we would expect to increase deposit pricing in certain target markets to fund such growth. Any such increase in deposit pricing is expected to result in increased deposit costs in future periods.

Our other borrowing sources include (i) repurchase agreements with customers (“repos”), (ii) other borrowings comprised primarily of Federal Home Loan Bank of Dallas (“FHLB”) advances, and, to a lesser extent, Federal Reserve Bank (“FRB”) borrowings and federal funds purchased and (iii) subordinated debentures. The rates on repos increased two bps for the third quarter and one bps for the first nine months of 2015 compared to the same periods of 2014. The rates on our other borrowing sources, which consist primarily of fixed rate callable FHLB advances, decreased five bps in the third quarter and 15 bps for the first nine months of 2015 compared to the same periods of 2014. This decrease in rates on other borrowings is primarily the result of our prepaying $90 million of fixed rate callable FHLB advances with a weighted average interest rate of 4.13% during the fourth quarter of 2014, and our prepaying $30 million of fixed rate callable FHLB advances with a weighted average interest rate of 4.07% during the first quarter of 2015. The weighted average interest rate on our remaining $160 million of fixed rate callable FHLB advances is approximately 3.54%. The rates paid on our subordinated debentures, which are tied to a spread over the 90-day London Interbank Offered Rate (“LIBOR”) and reset periodically, increased 72 bps in the third quarter and 64 bps for the first nine months of 2015 compared to the same periods in 2014. This increase in rates on our subordinated debentures is primarily due to the $52.2 million of subordinated debentures assumed in the Intervest transaction, which, net of amortization of the discount of the purchase accounting adjustments, had a weighted average interest rate of 4.18% at September 30, 2015.

The following table sets forth certain information relating to our net interest income for the periods indicated. The yields and rates are derived by dividing interest income or interest expense by the average balance of the related assets or liabilities, respectively, for the periods shown. Average balances are derived from daily average balances for such assets and liabilities. The average balances of investment securities are computed based on amortized cost adjusted for unrealized gains and losses on investment securities AFS and other-than-temporary impairment writedowns. The yields on investment securities include amortization of premiums and accretion of discounts. The average balance of non-purchased loans and leases includes non-purchased loans and leases on which we have discontinued accruing interest. The yields on non-purchased loans and leases and purchased loans without evidence of credit deterioration at date of acquisition include late fees and amortization of certain deferred fees, origination costs and, for such purchased loans, accretion or amortization of any purchase accounting yield adjustment. The yields on purchased loans with evidence of credit deterioration at date of acquisition consist of accretion of the net present value of expected future cash flows using the effective yield method over the term of the loans and include late fees. Interest expense and rates on other borrowings are presented net of interest capitalized on construction projects. The interest expense on the subordinated debentures assumed in the Intervest transaction includes the amortization of purchase accounting adjustments, using the level yield method, over the estimated holding period of approximately eight years.

The following table reflects how changes in the volume of interest earning assets and interest bearing liabilities and changes in interest rates have affected our interest income - FTE, interest expense and net interest income - FTE for the periods indicated. Information is provided in each category with respect to changes attributable to (1) changes in volume (changes in volume multiplied by prior yield/rate); (2) changes in yield/rate (changes in yield/rate multiplied by prior volume); and (3) changes in both yield/rate and volume (changes in yield/rate multiplied by changes in volume). The changes attributable to the combined impact of volume and yield/rate have all been allocated to the changes due to volume.

Non-Interest Income

Our non-interest income consists primarily of, among others, service charges on deposit accounts, mortgage lending income, trust income, BOLI income, other income from purchased loans, gains on investment securities and on sales of other assets and gains on merger and acquisition transactions.

Non-interest income for the third quarter of 2015 increased 15.0% to $22.1 million compared to $19.2 million for the third quarter of 2014. Non-interest income for the first nine months of 2015 increased 30.7% to $74.5 million compared to $57.0 million for the first nine months of 2014. Non-interest income for the first nine months of 2014 included $4.6 million of tax-exempt bargain purchase gain from our Bancshares acquisition. There were no bargain purchase gains during the first nine months of 2015.

Service charges on deposit accounts increased 0.9% to $7.43 million for the third quarter of 2015 compared to $7.36 million for the third quarter of 2014. Service charges on deposit accounts increased 7.9% to $21.1 million in the first nine months of 2015 compared to $19.6 million in the first nine months of 2014. The increase in service charges on deposit accounts for the nine months ended September 30, 2015 compared to the same period in 2014 was primarily a result of growth in the number of transaction accounts and the addition of deposit customers from our Summit acquisition, and, to a lesser extent, our Intervest and BCAR acquisitions.

Mortgage lending income increased 5.6% to $1.8 million for the third quarter of 2015 compared to $1.7 million for the third quarter of 2014. Mortgage lending income increased 34.1% to $5.1 million in the first nine months of 2015 compared to $3.8 million in the first nine months of 2014. The volume of originations of mortgage loans available for sale decreased 1.6% to $61.7 million for the third quarter of 2015 compared to $62.7 million for the third quarter of 2014. The volume of originations of mortgage loans available for sale increased 29.6% to $198.0 million for the first nine months of 2015 compared to $152.8 million for the first nine months of 2014.

Trust income increased 5.7% to $1.5 million for the third quarter of 2015 compared to $1.4 million for the third quarter of 2014. Trust income increased 7.2% to $4.4 million for the first nine months of 2015 compared to $4.1 million for the first nine months of 2014. These increases in trust income are primarily the result of growth in both corporate and personal trust income.

BOLI income increased 62.9% to $2.3 million for the third quarter of 2015 compared to $1.4 million for the third quarter of 2014, primarily due to $85 million of BOLI purchased in May 2015. BOLI income increased 101.9% to $7.7 million for the first nine months of 2015 compared to $3.8 million for the first nine months of 2014, primarily due to $2.3 million in BOLI death benefits in the first quarter of 2015 and $85 million of BOLI purchased in May 2015.

During the fourth quarter of 2014, we entered into agreements with the FDIC terminating the loss share agreements for all seven of our FDIC-assisted acquisitions. As a result, we had no net accretion (amortization) of the FDIC loss share receivable and FDIC clawback payable in the third quarter and first nine months of 2015 compared to $0.6 million of net amortization expense in both the third quarter and first nine months of 2014.

Other income from purchased loans was $5.5 million in the third quarter of 2015 compared to $3.4 million in the third quarter of 2014 and $21.3 million in the first nine months of 2015 compared to $10.3 million in the first nine months of 2014. Net gains on sales of other assets were $1.9 million in the third quarter of 2015 compared to $1.7 million in the third quarter of 2014 and $7.3 million in the first nine months of 2015 compared to $4.1 million in the first nine months of 2014. The increases in other income from purchased loans and net gains on sales of other assets during the third quarter and first nine months of 2015 compared to the same periods in 2014 are, in part, attributable to our having terminated the loss share agreements with the FDIC. Subsequent to the termination of such loss share agreements, all recoveries, gains, charge-offs, losses and expenses related to the previously covered assets are recognized entirely by us, since the FDIC no longer shares in such items.

There were no net gains on investment securities in the third quarter of 2015 compared to $43,000 in the third quarter of 2014. There were $2.6 million of net gains on investment securities in the first nine months of 2015 compared to $0.1 million in the first nine months of 2014. During the first quarter of 2015, we sold certain of our longer term municipal bonds resulting in proceeds of $30 million and net gains of $2.5 million. We utilized these proceeds to prepay $30 million of our highest rate callable FHLB advances resulting in prepayment penalties of $2.5 million. These transactions were executed for various reasons, including reducing interest rate risk, increasing secondary sources of liquidity and more efficiently allocating capital.

The following table presents non-interest income for the periods indicated.

Non-Interest Expense

Our non-interest expense consists of salaries and employee benefits, net occupancy and equipment and other operating expenses. Non-interest expense increased 6.8% to $45.4 million for the third quarter of 2015 compared to $42.5 million for the third quarter of 2014. Non-interest expense increased 18.2% to $139.3 million for the first nine months of 2015 compared to $117.9 million for the first nine months of 2014. During the third quarter of 2015, our non-interest expense included approximately $2.9 million of acquisition-related and systems conversion expenses and $0.2 million of software and contract termination charges. During the third quarter of 2014, our non-interest expense included approximately $2.2 million of acquisition-related and systems conversion expenses, $0.5 million of software and contract termination charges and approximately $0.6 million of fraud losses attributable to a large retailer's system breach. During the first nine months of 2015, our non-interest expense included $2.5 million in FHLB advance prepayment penalties, approximately $5.7 million of acquisition-related and systems conversion expenses and $1.0 million of software and contract termination charges. During the first nine months of 2014, our non-interest expense included approximately $3.7 million of acquisition-related and systems conversion expenses, $5.6 million of software and contract termination charges and approximately $0.6 million of fraud losses as a result of a large retailer's system breach. The software and contract termination charges are included in other non-interest expense in the following table.

Salaries and employee benefits, our largest component of non-interest expense, increased 1.6% to $21.2 million in the third quarter of 2015 compared to $20.9 million in the third quarter of 2014. Salaries and employee benefits increased 15.8% to $66.5 million for the first nine months of 2015 compared to $57.4 million for the first nine months of 2014. We had 1,654 full-time equivalent employees at September 30, 2015 compared to 1,513 full-time equivalent employees at September 30, 2014.

Net occupancy and equipment expense for the third quarter of 2015 increased 18.4% to $8.1 million compared to $6.8 million for the third quarter of 2014. Net occupancy and equipment expense for the first nine months of 2015 increased 29.2% to $22.7 million compared to $17.6 million for the first nine months of 2014. At September 30, 2015, we had 174 offices, compared to 164 offices at September 30, 2014.

Our efficiency ratio (non-interest expense divided by the sum of net interest income – FTE and non-interest income) was 37.6% for the third quarter and 39.0% for the first nine months of 2015 compared to 44.0% for the third quarter and 45.9% for the first nine months of 2014.

The following table presents non-interest expense for the periods indicated.

Income Taxes

The provision for income taxes was $23.4 million for the third quarter and $65.7 million for the first nine months of 2015 compared to $15.6 million for the third quarter and $36.6 million for the first nine months of 2014. The effective income tax rate was 33.6% for the third quarter and 33.4% for the first nine months of 2015 compared to 32.7% for the third quarter and 30.4% for the first nine months of 2014. The increase in the effective tax rate for the third quarter and first nine months of 2015 compared to the third quarter and first nine months of 2014 was due primarily to the growth in income that is subject to federal and/or state income taxes. The effective tax rates were also affected by various other factors including non-taxable income and non-deductible expenses.

ANALYSIS OF FINANCIAL CONDITION

Loan and Lease Portfolio

At September 30, 2015, our total loan and lease portfolio was $7.41 billion, including $5.45 billion of non-purchased loans and leases and $1.96 billion of purchased loans, compared to $5.13 billion of total loans and leases at December 31, 2014, including $3.98 billion of non-purchased loans and leases and $1.15 billion of purchased loans, and $4.92 billion of total loans and leases at September 30, 2014, including $3.64 billion of non-purchased loans and leases and $1.28 billion of purchased loans. Real estate loans, our largest category of loans, consist of all loans secured by real estate as evidenced by mortgages or other liens, including all loans made to finance the development of real property construction projects, provided such loans are secured by real estate. Total real estate loans were $6.79 billion at September 30, 2015 compared to $4.51 billion at December 31, 2014 and $4.25 billion at September 30, 2014. The amount and type of loans and leases outstanding as of the dates indicated, and their respective percentage of the total loan and lease portfolio are reflected in the following table.

Many of our construction and development loans provide for the use of interest reserves. When we underwrite construction and development loans, we consider the expected total project costs, including hard costs such as land, site work and construction costs and soft costs such as architectural and engineering fees, closing costs, leasing commissions and construction period interest. Based on the total project costs and other factors, we determine the required borrower cash equity contribution and the maximum amount we are willing to loan. In the vast majority of cases, we require that all of the borrower's cash equity contribution be contributed prior to any material loan advances. This ensures that the borrower's cash equity required to complete the project will be available for such purposes. As a result of this practice, the borrower's cash equity typically goes toward the purchase of the land and early stage hard costs and soft costs. This results in us funding the loan later as the project progresses, and accordingly, we typically fund the majority of the construction period interest through loan advances. However, when we initially determine the borrower's cash equity requirement, we typically require borrower's cash equity in an amount to cover a majority, or all, of the soft costs, including an amount equal to construction period interest, and an appropriate portion of the hard costs. We advanced construction period interest on construction and development loans totaling $15.1 million in the third quarter and $27.3 in the first nine months of 2015. While we advanced these sums as part of the funding process, we believe that the borrowers in effect had in most cases already provided for these sums as part of their initial equity contribution. Specifically, the maximum committed balance of all construction and development loans which provide for the use of interest reserves at September 30, 2015 was approximately $6.2 billion, of which $2.1 billion was outstanding at September 30, 2015 and $4.1 billion remained to be advanced. The weighted average loan-to-cost on such loans, assuming such loans are ultimately fully advanced, will be approximately 51%, which means that the weighted average cash equity contributed on such loans, assuming such loans are ultimately fully advanced, will be approximately 49%. The weighted average final loan-to-value ratio on such loans, based on the most recent appraisals and assuming such loans are ultimately fully advanced, is expected to be approximately 43%.

The following table reflects total loans and leases as of September 30, 2015 grouped by expected amortizations, expected paydowns or the earliest repricing opportunity for floating rate loans. This cash flow or repricing schedule approximates our ability to reprice the outstanding principal of total loans and leases either by adjusting rates on existing loans and leases or reinvesting principal cash flow in new loans and leases. For non-purchased loans and leases and purchased loans without evidence of credit deterioration on the date of purchase, the table below reflects the earliest contractual repricing period. For purchased loans with evidence of credit deterioration at the date of purchase, the table below reflects estimated cash flows based on the most recent evaluation of each individual loan. Because income on purchased loans with evidence of credit deterioration on the date of acquisition is recognized by accretion of the discount of estimated cash flows, such loans are not considered to be floating or adjustable rate loans and are reported below as fixed rate loans.

(1) We have included a floor rate in many of our loans and leases. As a result of such floor rates, many loans and leases will not immediately reprice in a rising rate environment if the interest rate index and margin on such loans and leases continue to result in a computed interest rate less than the applicable floor rate. The earnings simulation model results included elsewhere in this MD&A include consideration of the impact of all interest rate floors and ceilings in loans and leases.

On February 10, 2015, the date we closed our Intervest acquisition, each outstanding loan in Intervest’s loan portfolio was categorized into (i) a loan without evidence of credit deterioration or (ii) a loan with evidence of credit deterioration. The following table presents, by risk rating, the unpaid principal balance, fair value adjustment, Day 1 Fair Value and the weighted-average fair value adjustment applied to the purchased loans without evidence of credit deterioration in the Intervest acquisition.

The following grades are used for purchased loans without evidence of credit deterioration at date of acquisition.

FV 33 – Loans in this category are considered to be satisfactory with minimal credit risk and are generally considered collectible.

FV 44 – Loans in this category are considered to be marginally satisfactory with minimal to moderate credit risk and are generally considered collectible.

FV 55 – Loans in this category exhibit weakness and are considered to have elevated credit risk and elevated risk of repayment.

FV 36 – Loans, if any, in this category were not individually reviewed at the date of purchase and are assumed to have characteristics similar to the characteristics of the aggregate acquired portfolio.

The following table is a summary of the loans acquired in the Intervest acquisition with evidence of credit deterioration at the date of acquisition.

Nonperforming Assets

Non-Purchased Loans and Leases and Foreclosed Assets

Our nonperforming assets consist of (1) nonaccrual loans and leases, (2) accruing loans and leases 90 days or more past due, (3) certain troubled and restructured loans for which a concession has been granted by us to the borrower because of a deterioration in the financial position of the borrower (TDRs) and (4) real estate or other assets that have been acquired in partial or full satisfaction of loan or lease obligations or upon foreclosure. Purchased loans are not included in the following table as nonperforming assets, except for their inclusion in total assets for purposes of calculation of certain asset quality ratios, but are analyzed and discussed separately elsewhere in this MD&A.

The accrual of interest on non-purchased loans and leases is discontinued when, in management's opinion, the borrower or lessee may be unable to meet payments as they become due. We generally place a loan or lease on nonaccrual status when such loan or lease is (i) deemed impaired or (ii) 90 days or more past due, or earlier when doubt exists as to the ultimate collection of payments. We may continue to accrue interest on certain loans or leases contractually past due 90 days or more if such loans or leases are both well secured and in the process of collection. At the time a loan or lease is placed on nonaccrual status, interest previously accrued but uncollected is reversed and charged against interest income. Nonaccrual loans and leases are generally returned to accrual status when payments are less than 90 days past due and we reasonably expect to collect all payments. If a loan or lease is determined to be uncollectible, the portion of the principal determined to be uncollectible will be charged against the ALLL. Loans for which the terms have been modified and for which (i) the borrower is experiencing financial difficulties and (ii) we have granted a concession to the borrower are considered troubled debt restructurings ("TDRs") and are included in impaired loans and leases. Income on nonaccrual loans or leases, including impaired loans and leases but excluding certain TDRs which continue to accrue interest, is recognized on a cash basis when and if actually collected.

The following table presents a summary of nonperforming assets, excluding purchased loans, as of the dates indicated.

| Nonperforming assets to total assets (2) (3) | 0.41 | 0.92 | 0.87 |

(1) Repossessed personal properties and real estate acquired through or in lieu of foreclosure are initially recorded at the lesser of current principal investment or estimated market value less estimated cost to sell at the date of repossession or foreclosure. Valuations of these assets are periodically reviewed by management with the carrying value of such assets adjusted through non-interest expense to the then estimated market value net of estimated

selling costs, if lower, until disposition.

(2) As a result of terminating our loss share agreements with the FDIC during the fourth quarter of 2014, we reclassified foreclosed assets previously reported as covered by FDIC loss share to foreclosed assets for all prior periods. All prior period ratios of nonperforming assets to total assets have been recalculated to include foreclosed assets previously covered by FDIC loss share as nonperforming assets.

(3) Excludes purchased loans except for their inclusion in total assets.

If an adequate current determination of collateral value has not been performed, once a loan or lease is considered impaired, we seek to establish an appropriate value for the collateral. This assessment may include (i) obtaining an updated appraisal, (ii) obtaining one or more broker price opinions or comprehensive market analyses, (iii) internal evaluations or (iv) other methods deemed appropriate considering the size and complexity of the loan and the underlying collateral. On an ongoing basis, typically at least quarterly, we evaluate the underlying collateral on all impaired loans and leases and, if needed, due to changes in market or property conditions, the underlying collateral is reassessed and the estimated fair value is revised. The determination of collateral value includes any adjustments considered necessary related to estimated holding periods and estimated selling costs.

At September 30, 2015, we had reduced the carrying value of our non-purchased loans and leases deemed impaired (all of which were included in nonaccrual loans and leases) by $5.0 million to the estimated fair value of such loans and leases of $11.4 million. The adjustment to reduce the carrying value of such impaired loans and leases to estimated fair value consisted of $4.1 million of partial charge-offs and $0.9 million of specific loan and lease loss allocations. These amounts do not include our $10.0 million of impaired purchased loans at September 30, 2015.

The following table is a summary of the amount and type of foreclosed assets as of the dates indicated.

Purchased Loans

Purchased loans without evidence of credit deterioration at the date of acquisition are reviewed subsequent to the date of acquisition any time a loan is renewed or extended, at any time information becomes available to us that provides material insight regarding the loan's performance, the borrower or the underlying collateral or in conjunction with the annual review of each acquired portfolio. To the extent that current information indicates it is probable that we will collect all amounts according to the contractual terms thereof, such loan is not considered impaired and is not considered in the determination of the required ALLL. To the extent that current information indicates it is probable that we will not be able to collect all amounts according to the contractual terms thereon, such loan is rated FV 77, is included in certain of our asset quality metrics, is considered an impaired loan and is considered in the determination of the required level of ALLL.

Purchased loans with evidence of credit deterioration on the date of purchase are reviewed (i) any time a loan is renewed or extended, (ii) at any other time additional information becomes available to us that provides material additional insight regarding a loan's performance, the status of the borrower, or the quality or value of the underlying collateral, or (iii) in conjunction with the annual review of projected cash flows of each acquired portfolio. We separately review the performance of the portfolio of purchased loans with evidence of credit deterioration on an annual basis, or more frequently to the extent that material information becomes available regarding the performance of an individual loan, to make determinations of the constituent loans' performance and to consider whether there has been any significant change in performance since our initial expectations established in conjunction with the determination of the Day 1 Fair Values or since our most recent review of such portfolio's performance. To the extent that a purchased loan with evidence of credit deterioration on the date of purchase is performing in accordance with or exceeding our performance expectation established in conjunction with the determination of the Day 1 Fair Values, such loan is rated FV66, is not included in any of the credit quality ratios, is not considered to be a nonaccrual, nonperforming or impaired loan, and is not considered in the determination of the required ALLL. To the extent that the performance of a purchased loan with evidence of credit deterioration on the date of purchase has deteriorated from our expectation established in conjunction with the determination of the Day 1 Fair Values, such loan is rated FV88, is included in certain of our credit quality metrics, is considered an impaired loan, and is considered in the determination of the required level of ALLL.

The following table presents a summary of our impaired purchased loans as of the dates indicated.

Impaired Purchased Loans

| | September 30, | | December 31, |
|---|---|---|---|
| | 2015 | 2014 | 2014 |
| | (Dollars in thousands) | | |
| Impaired purchased loans without evidence of credit deterioration (rated FV 77) | $600 | $729 | $ 748 |
| Impaired purchased loans with evidence of credit deterioration (rated FV 88) | 9,419 | 14,562 | 13,292 |
| Total impaired purchased loans | $10,019 | $15,291 | $ 14,040 |
| Impaired purchased loans to total purchased loans | 0.51 % | 1.19 % | 1.22 % |

As of September 30, 2015 and 2014 and December 31, 2014, we had identified purchased loans where we had determined it was probable that we would be unable to collect all amounts according to the contractual terms thereof (for purchased loans without evidence of credit deterioration at date of acquisition) or the expected performance of such loans had deteriorated from our performance expectations established in conjunction with the determination of the Day 1 Fair Values or since our most recent review of such portfolio's performance (for purchased loans with evidence of credit deterioration at date of acquisition). As a result, we recorded partial charge-offs totaling $0.7 million for such loans during the third quarter and $2.4 million for the first nine months of 2015 compared to $0.5 million during the third quarter and $1.8 million for the first nine months of 2014. We also recorded provision for loan and lease losses of $0.7 million during the third quarter and $2.4 million during the first nine months of 2015 compared to $0.5 million during the third quarter and $1.8 million during the first nine months of 2014 to cover such charge-offs. In addition to these charge-offs, we transferred certain of these purchased loans to foreclosed assets. As a result of these actions, we had $10.0 million of impaired purchased loans at September 30, 2015, compared to $15.3 million at September 30, 2014 and $14.0 million at December 31, 2014.

Allowance and Provision for Loan and Lease Losses

Our ALLL was $59.0 million, or 1.08% of total non-purchased loans and leases at September 30, 2015, compared to $52.9 million, or 1.33% of total non-purchased loans and leases at December 31, 2014 and $49.6 million, or 1.36% of total non-purchased loans and leases at September 30, 2014. We had no ALLL at September 30, 2015 and 2014 or December 31, 2014 for our (i) purchased loans without evidence of credit deterioration at the date of acquisition as management’s analysis of such individual loans resulted in no impairment or all identified impairment on such loans had been charged off, or (ii) purchased loans with evidence of credit deterioration at the date of acquisition as all such loans were performing in accordance with management’s expectations established in conjunction with the determination of the Day 1 Fair Values or all losses had been charged off on such loans whose performance had deteriorated from management’s expectations established in conjunction with the determination of the Day 1 Fair Values. Our ALLL was equal to 421% of our total nonperforming non-purchased loans and leases at September 30, 2015, compared to 251% at December 31, 2014 and 276% at September 30, 2014.

The amount of provision to the ALLL is based on our analysis of the adequacy of the ALLL utilizing the criteria discussed in the Critical Accounting Policies section of our Annual Report on Form 10-K for the year ended December 31, 2014. The provision for loan and lease losses for the third quarter of 2015 was $3.6 million, including $2.9 million for non-purchased loans and leases and $0.7 million for purchased loans, compared to $3.7 million for the third quarter of 2014, including $3.2 million for non-purchased loans and leases and $0.5 million for purchased loans. The provision for loan and lease losses for the first nine months of 2015 was $14.2 million, including $11.8 million for non-purchased loans and $2.4 million for purchased loans, compared to $10.6 million for the first nine months of 2014, including $8.8 million for non-purchased loans and $1.8 million for purchased loans. The increase in the provision for loan and lease loss during the first nine months of 2015 compared to the first nine months of 2014 was due to an increase in charge-offs as well as the provision necessary to cover the growth of our non-purchased loan and lease portfolio. During the first quarter of 2015, we sold $15.9 million of performing loans, with deteriorating credit trends, from our Corporate Loan Specialties Group, or CLSG, resulting in net charge-offs of $2.4 million.

Our practice is to charge off any estimated loss as soon as we are able to identify and reasonably quantify such potential loss. Accordingly, only a small portion of our ALLL is needed for potential losses on non-performing loans. Our ALLL to non-purchased loans and leases has decreased to 1.08% at September 30, 2015, compared to 1.33% at December 31, 2014 and 1.36% at September 30, 2014 primarily as a result of the low level of net charge-offs in recent quarters and due to generally improving economic conditions in many of our markets. While we believe the ALLL at September 30, 2015 and related provision for the third quarter and first nine months of 2015 were appropriate, changing economic and other conditions may require future adjustments to the ALLL or the amount of provision thereto.

An analysis of the allowance for loan and lease losses for the periods indicated is shown in the following table.

Our net charge-offs were $1.3 million for the third quarter of 2015, including $0.6 million for non-purchased loans and leases and $0.7 million for purchased loans, compared to $1.0 million for the third quarter of 2014, including $0.5 million for non-purchased loans and leases and $0.5 million for purchased loans. Our net charge-offs were $8.1 million for the first nine months of 2015, including $5.7 million for non-purchased loans and leases and $2.4 million for purchased loans, compared to $3.9 million for the first nine months of 2014, including $2.1 million for non-purchased loans and leases and $1.8 million for purchased loans. The increase in our net charge-offs for non-purchased loans and leases for the first nine months of 2015 compared to the same period in 2014 was primarily due to the $2.4 million of net charge-offs of loans from our CLSG previously discussed. Our net charge-offs for purchased loans increased for the first nine months of 2015 compared to the same period in 2014, in part, due to our having previously terminated the loss share agreements on our FDIC-assisted acquisitions.

Investment Securities

At September 30, 2015 and 2014 and at December 31, 2014, we classified all of our investment securities portfolio as AFS. Accordingly, our investment securities are stated at estimated fair value in the consolidated financial statements with the unrealized gains and losses, net of related income tax, reported as a separate component of stockholders' equity and included in accumulated other comprehensive income.

The following table presents the amortized cost and estimated fair value of investment securities AFS as of the dates indicated. The Company's investment in the CRA qualified investment fund includes shares held in a mutual fund that qualifies under the Community Reinvestment Act of 1977 for community reinvestment purposes. Our holdings of equity securities in FHLB and First National Banker's Bankshares, Inc. ("FNBB") do not have readily determinable fair values and are carried at cost.

Our investment securities portfolio is reported at estimated fair value, which included gross unrealized gains of $19.9 million and gross unrealized losses of $1.0 million at September 30, 2015; gross unrealized gains of $21.0 million and gross unrealized losses of $3.4 million at September 30, 2014; and gross unrealized gains of $24.4 million and gross unrealized losses of $1.2 million at December 31, 2014. Management believes that all of its unrealized losses on individual investment securities at September 30, 2015 are the result of fluctuations in interest rates and do not reflect deterioration in the credit quality of these investments. Accordingly, management considers these unrealized losses to be temporary in nature. We do not have the intent to sell these investment securities with unrealized losses and, more likely than not, will not be required to sell these investment securities before fair value recovers to amortized cost.

The following table presents unaccreted discounts and unamortized premiums of our investment securities as of the dates indicated.

We had no net gains or sales of investment securities in the third quarter of 2015, compared to net gains of $43,000 from the sale of $6.6 million of investment securities in the third quarter of 2014. We had net gains of $2.6 million from the sale of $30.2 million of investment securities in the first nine months of 2015, compared with net gains of $0.1 million from the sale of $55.0 million of investment securities in the first nine months of 2014. During the third quarter of 2015 and 2014, respectively, investment securities totaling $43.5 million and $38.6 million matured, were called or were paid down by the issuer. During the first nine months of 2015 and 2014, respectively, investment securities totaling $111.8 million and $68.3 million matured, were called or paid down by the issuer. We purchased $24.0 million in investment securities during the third quarter of 2015 and $61.5 million during the first nine months of 2015 compared to $10.0 million during the third quarter of 2014 and $46.6 million during the first nine months of 2014. On February 10, 2015, we acquired $21.8 million of investment securities as a result of our Intervest acquisition, and on August 5, 2015, we acquired $12.8 million of investment securities as a result of our BCAR acquisition.

We invest in securities we believe offer good relative value at the time of purchase, and we will, from time to time, reposition our investment securities portfolio. In making decisions to sell or purchase securities, we consider credit quality, call features, maturity dates, relative yields, current market factors, interest rate risk and other relevant factors.

For these securities, we have performed our own evaluation of the security and/or the underlying issuer and believe that such security and/or its issuer has credit characteristics equivalent to those which would warrant a credit rating of investment grade (i.e., Baa3 or better by Moody’s or BBB- or better by S&P or a comparable rating by another nationally-recognized credit rating agency).

Deposits

Our lending and investment activities are funded primarily by deposits. The amount and type of deposits outstanding as of the dates indicated and their respective percentage of the total deposits are reflected in the following table. On February 10, 2015, we assumed $1.18 billion of deposits as a result of our acquisition of Intervest, and on August 5, 2015, we assumed $289 million of deposits as a result of our acquisition of BCAR. On May 16, 2014, we assumed $970 million of deposits as a result of our acquisition of Summit. Additionally, we continued to grow our existing deposit base which, excluding deposits acquired in acquisitions, increased $637 million during the first nine months of 2015, of which, $28 million was added during the first quarter, $378 million during the second quarter and $231 million during the third quarter of 2015.

Other Interest Bearing Liabilities

We rely on other interest bearing liabilities to supplement the funding of our lending and investing activities. Such liabilities consist of repurchase agreements with customers, other borrowings (FHLB advances and, to a lesser extent, FRB borrowings and federal funds purchased) and subordinated debentures.

The following table reflects the average balance and rate paid for each category of other interest bearing liabilities for the periods indicated.

(1) Included in other borrowings at September 30, 2015 are FHLB advances that contain quarterly call features and mature as follows: 2017, $140 million at 3.70% weighted-average interest rate and 2018, $20 million at 2.52% weighted-average interest rate.

The decrease in other borrowings for the three and nine months ended September 30, 2015 compared to the same period in 2014 is due to our prepaying $90 million of fixed rate callable FHLB advances during the fourth quarter of 2014 and prepaying $30 million of fixed rate callable FHLB advances during the first quarter of 2015. The increase in subordinated debentures is primarily due to the $52.2 million (net of purchase accounting adjustments) of subordinated debentures assumed in the Intervest transaction.

Capital Resources

Subordinated Debentures. We own eight 100%-owned finance subsidiary business trusts – Ozark Capital Statutory Trust II ("Ozark II"), Ozark Capital Statutory Trust III ("Ozark III"), Ozark Capital Statutory Trust IV ("Ozark IV"), Ozark Capital Statutory Trust V ("Ozark V") (collectively, the "Ozark Trusts"), Intervest Statutory Trust II ("Intervest II"), Intervest Statutory Trust III ("Intervest III"), Intervest Statutory Trust IV ("Intervest IV") and Intervest Statutory Trust V ("Intervest V"), (collectively, the "Intervest Trusts"; and together with Ozark Trusts, the "Trusts"). At September 30, 2015, we had the following issues of trust preferred securities and subordinated debentures owed to the Trusts.

On February 10, 2015, in conjunction with the Intervest acquisition, the Company acquired the Intervest Trusts with outstanding subordinated debentures totaling $56.7 million and related trust preferred securities totaling $55.0 million. On the date of such acquisition, the Company recorded the assumed subordinated debentures owed to the Intervest Trusts at estimated fair value of $52.2 million, based on an independent third party valuation, to reflect a current market interest rate for comparable obligations. The fair value adjustment of $4.5 million is being amortized, using a level-yield methodology over the estimated holding period of approximately eight years, as an increase in interest expense of the subordinated debentures owed to the Intervest Trusts.

Our subordinated debentures and securities generally mature 30 years after issuance and may be prepaid at par, subject to regulatory approval, on or after approximately five years from the date of issuance, or at an earlier date upon certain changes in tax laws, investment company laws or regulatory capital requirements. These subordinated debentures and the related trust preferred securities provide us additional regulatory capital to support our expected future growth and expansion.

We may need to raise additional capital in the future to provide us with sufficient capital resources and liquidity to meet our commitments and business needs. As a publicly traded company, a likely source of additional funds is the capital markets, which can provide us with funds through the public issuance of equity, both common and preferred

stock, and the issuance of senior debt and/or subordinated debentures. We have an effective shelf registration statement on file with the SEC which provides us increased flexibility and more efficient access to the public debt and equity markets if needed. Our ability to raise additional capital, if needed, will depend on, among other things, conditions in the capital markets at that time, which are outside of our control, and our financial performance.

Common Stockholders' Equity and Reconciliation of Non-GAAP Financial Measures. We use non-GAAP financial measures, specifically tangible common stockholders' equity to total tangible assets, tangible book value per common share and return on average tangible common stockholders' equity as important measures of the strength of our capital and our ability to generate earnings on tangible common equity invested by our shareholders. We believe presentation of these non-GAAP financial measures provides useful supplemental information that contributes to a proper understanding of our financial results and capital levels. These non-GAAP disclosures should not be viewed as a substitute for financial results determined in accordance with GAAP, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other companies. Reconciliations of these non-GAAP financial measures to the most directly comparable GAAP financial measures are included in the following tables.

Common Stock Dividend Policy. During the quarter ended September 30, 2015, we paid a dividend of $0.14 per common share compared to $0.12 per common share in the three months ended September 30, 2014. During the nine months ended September 30, 2015, we paid dividends of $0.405 per common share compared to $0.345 per common share during the nine months ended September 30, 2014. On October 1, 2015, our board of directors approved a dividend of $0.145 per common share that was paid on October 23, 2015. The determination of future dividends on our common stock will depend on conditions existing at that time and approval of our board of directors.

Regulatory Capital Compliance

Bank and bank holding company regulatory authorities in the United States impose certain capital standards on all bank holding companies and banks. These capital standards require compliance with capital adequacy guidelines and prompt corrective action regulations and involve quantitative measures of assets, liabilities and certain off-balance-sheet items, which are subject to risk weightings and various other factors.

On July 9, 2013, the FDIC and other federal banking regulators issued a final rule that substantially revised the risk-based capital requirements applicable to bank holding companies and insured depository institutions, including the Company and the Bank, to make them consistent with agreements that were reached by the Basel Committee on Banking Supervision ("Basel III") and certain provisions of the Dodd-Frank Wall Street Reform and Consumer Protection Act (the "Basel III Rules"). The Basel III Rules became effective for the Company and the Bank on January 1, 2015 (subject to a phase-in period for certain provisions). The Basel III Rules require the maintenance of minimum amounts and ratios (set forth in the following table) of common equity tier 1 capital, tier 1 capital and total capital (as defined in the regulations) to risk-weighted assets (as defined), and of tier 1 capital to adjusted quarterly average assets (as defined).

Under the Basel III Rules, common equity tier 1 capital consists of common stock and paid-in capital (net of treasury stock) and retained earnings. Common equity tier 1 capital is reduced by goodwill, certain intangible assets, net of associated deferred tax liabilities, deferred tax assets that arise from tax credit and net operating loss carryforwards, net of any valuation allowance, and certain other items as specified by the Basel III Rules.

Tier 1 capital includes common equity tier 1 capital and certain additional tier 1 items as provided under the Basel III Rules. The tier 1 capital for our holding company consists of common equity tier 1 capital and $118 million of trust preferred securities issued by the Trusts. The Basel III Rules include certain provisions that would require trust preferred securities to be phased out of qualifying tier 1 capital. Currently, our trust preferred securities are grandfathered under the Basel III Rules and will continue to be included as tier 1 capital. However, should we continue to grow and exceed $15 billion in total assets, the grandfather provisions applicable to our trust preferred securities may no longer apply, depending on whether we cross the $15 billion threshold through organic growth or by acquisition. The common equity tier 1 capital and the tier 1 capital are the same for our bank subsidiary.

Basel III Rules allow for insured depository institutions to make a one-time election not to include most elements of accumulated other comprehensive income in regulatory capital and instead effectively use the existing treatment under the general risk-based capital rules. Insured depository institutions, including the Company and Bank, must make their accumulated other comprehensive income opt-out election in the first Consolidated Reports of Condition and Income ("Call Report"), Consolidated Financial Statements for Bank Holding Companies ("FR Y-9C") and Parent Company Only Financial Statements for Large Bank Holding Companies ("FR Y-9LP") reports that are filed for the first quarter of 2015. We made this opt-out election in our Call Report, FR Y-9C and FR Y-9LP filed for the first quarter of 2015 to avoid significant variations in the level of capital depending upon the impact of interest rate fluctuations on the fair value of our investments securities portfolio.

Total capital includes tier 1 capital and tier 2 capital. Tier 2 capital includes, among other things, the allowable portion of the ALLL and any trust preferred securities that are excluded from tier 1 capital.

The Basel III Rules also changed the risk-weights of assets in an effort to better reflect credit risk and other risk exposures. These include a 150% risk weight (up from 100%) for certain high volatility commercial real estate acquisition, development and construction loans and the unsecured portion of non-residential mortgage loans that are 90 days past due or otherwise on nonaccrual status; a 20% (up from 0%) credit conversion factor for the unused portion of a commitment with an original maturity of one year or less that is not unconditionally cancellable; a 250% risk weight (up from 100%) for mortgage servicing rights and deferred tax assets that are not deducted from capital; and increased risk weights (from 0% to up to 600%) for equity exposures.

The common equity tier 1 capital, tier 1 capital and total capital ratios are calculated by dividing the respective capital amounts by risk-weighted assets. The leverage ratio is calculated by dividing tier 1 capital by adjusted quarterly average total assets.

The Basel III Rules limit capital distributions and certain discretionary bonus payments if the banking organization does not hold a "capital conservation buffer" consisting of 2.5% of common equity tier 1 capital, tier 1 capital and total capital to risk-weighted assets in addition to the amount necessary to meet minimum risk-based capital requirements. The capital conservation buffer will be phased in beginning January 1, 2016, at 0.625% of risk-weighted assets, increasing each year until fully implemented at 2.5% on January 1, 2019. When fully phased in on January 1, 2019, the Basel III Rules will require us to maintain (i) a minimum ratio of common equity tier 1 capital to risk-weighted assets of at least 4.5%, plus a 2.5% capital conservation buffer, which effectively results in a minimum ratio of 7.0% upon full implementation, (ii) a minimum ratio of tier 1 capital to risk-weighted assets of at least 6.0%, plus a 2.5% capital conservation buffer, which effectively results in a minimum ratio of 8.50% upon full implementation, (iii) a minimum ratio of total capital to risk-weighted assets of at least 8.0%, plus a 2.5% capital conservation buffer, which effectively results in a minimum ratio of 10.5% upon full implementation and (iv) a minimum leverage ratio of 4.0%.

The following table presents actual and required capital ratios as of September 30, 2015 for the Company and the Bank under the Basel III Rules. The minimum required capital amounts presented include the minimum required capital levels as of September 30, 2015 based on the current phase-in provisions of the Basel III Rules and the minimum required capital levels as of January 1, 2019 when the Basel III Rules have been fully phased-in. Capital levels required to be considered well capitalized are based upon prompt corrective action regulations, as amended to reflect the changes under the Basel III Rules.

| Bank | 824,120 | 12.52 | 197,465 | 3.00 | 329,108 | 5.00 |

As of September 30, 2015, capital levels at both the Company and the Bank exceed all capital adequacy requirements under the Basel III Rules on a fully phased-in basis. Based on the ratios presented above, capital levels as of September 30, 2015 exceed the minimum levels necessary to be considered “well capitalized.”

Liquidity

Bank Liquidity. Liquidity represents an institution’s ability to provide funds to satisfy demands from depositors, borrowers and other creditors by either converting assets into cash or accessing new or existing sources of incremental funds. Liquidity risk arises from the possibility we may be unable to satisfy current or future funding requirements and needs. The ALCO and Investments Committee (“ALCO”), which reports to the board of directors, has primary responsibility for oversight of our liquidity, funds management, asset/liability (interest rate risk) position and investment portfolio functions.

The objective of managing liquidity risk is to ensure the cash flow requirements resulting from depositor, borrower and other creditor demands are met, as well as operating cash needs of the Company, and the cost of funding such requirements and needs is reasonable. We maintain an interest rate risk, liquidity and funds management policy and a contingency funding plan that, among other things, include policies and procedures for managing liquidity risk. Generally we rely on deposits, repayments of loans and leases, and repayments of our investment securities as our primary sources of funds. Our principal deposit sources include consumer, commercial and public funds customers in our markets. We have used these funds, together with wholesale deposit sources such as brokered deposits, along with FHLB advances, federal funds purchased and other sources of short-term borrowings, to make loans and leases, acquire investment securities and other assets and to fund continuing operations.

Deposit levels may be affected by a number of factors, including rates paid by competitors, general interest rate levels, returns available to customers on alternative investments, general economic and market conditions and other factors. Loan and lease repayments are generally a relatively stable source of funds but are subject to the borrowers' and lessees' ability to repay the loans and leases, which can be adversely affected by a number of factors including changes in general economic conditions, adverse trends or events affecting business industry groups or specific businesses, declines in real estate values or markets, business closings or lay-offs, inclement weather, natural disasters and other factors. Furthermore, loans and leases generally are not readily convertible to cash. Accordingly, we may be required from time to time to rely on secondary sources of liquidity to meet growth in loans and leases and deposit withdrawal demands or otherwise fund operations. Such secondary sources include wholesale deposit sources, FHLB advances, secured and unsecured federal funds lines of credit from correspondent banks, FRB borrowings and/or accessing the capital markets.

At September 30, 2015, we had substantial unused borrowing availability. This availability was primarily comprised of the following four options: (1) $1.60 billion of available blanket borrowing capacity with the FHLB (on October 16, 2015, this available blanket borrowing capacity was increased by $922 million to approximately $2.5 billion following the completion of routine collateral examination by the FHLB), (2) $155 million of investment securities available to pledge for federal funds or other borrowings, (3) $170 million of available unsecured federal funds borrowing lines and (4) up to $143 million of available borrowing capacity from borrowing programs of the FRB.

We anticipate we will continue to rely primarily on deposits, repayments of loans and leases and cash flows from our investment securities portfolio to provide liquidity, as well as other funding sources as appropriate. Additionally, where necessary, the sources of borrowed funds described above will be used to augment our primary funding sources.

Sources and Uses of Funds. Operating activities provided net cash of $77.2 million for the first nine months of 2015 and $48.2 million for the first nine months of 2014. Net cash used or provided by operating activities is comprised primarily of net income, adjusted for non-cash items and for changes in various operating assets and liabilities.

Investing activities used net cash of $532.9 million in the first nine months of 2015 and $382.3 million in the first nine months of 2014. The increase in net cash used by investing activities of $150.6 million was primarily the result of the increase in net cash used to fund non-purchased loan and lease growth in the first nine months of 2015 compared to the same period in 2014 and $85 million of BOLI purchased during the first nine months of 2015 (none in 2014), partially offset by the increase in net cash provided by payments on purchased loans in the first nine months of 2015 compared to the same period in 2014 and the increase in net cash received in merger and acquisition transactions in the first nine months of 2015 compared to the same period in 2014.

Financing activities provided $587.1 million and $250.1 million in the first nine months of 2015 and 2014, respectively. The increase in net cash provided by financing activities was primarily the result of an increase in net cash provided by our deposit activities, which provided $636.9 million during the first nine months of 2015 to help fund our loan and lease growth compared to $197.0 million of net cash provided during the first nine months of 2014. This increase in financing activities cash flows was also affected by our other borrowings, which used $31.5 million during the first nine months of 2015 and provided $71.3 million during the first nine months of 2014.

Off-Balance Sheet Commitments. We are party to financial instruments with off-balance sheet risk in the normal course of business to meet the financing needs of our customers. These financial instruments primarily include commitments to extend credit and standby letters of credit. See Note 9 to the Consolidated Financial Statements for more information about our outstanding guarantees and commitments as of September 30, 2015.

Growth and Expansion

De Novo Growth. In 2015, we opened our fourth retail banking office in Houston, Texas, a loan production office in Little Rock, Arkansas and a loan production office in Greensboro, North Carolina, and we closed a loan production office in Asheville, North Carolina. During the fourth quarter of 2015, we expect to convert a retail banking office in Benton, Arkansas to a loan production office. During 2016, we expect to open our first retail banking office in Siloam Springs in northwest Arkansas, our third retail banking office in Springdale, Arkansas, our third retail banking office in Fayetteville, Arkansas, our first retail banking office in McKinney, Texas and a loan production office in San Francisco, California for our Real Estate Specialties Group, or RESG.

We intend to continue our growth and de novo branching strategy in the future years through the opening of additional retail banking and loan production offices. Opening new offices is subject to local banking market conditions, availability of suitable sites, hiring qualified personnel, obtaining regulatory and other approvals and many other conditions and contingencies that we cannot predict with certainty. We may increase or decrease our expected number of new office openings as a result of a variety of factors including our financial results, changes in economic or competitive conditions, strategic opportunities or other factors.

During the first nine months of 2015, we spent $12.0 million on capital expenditures for premises and equipment. Our capital expenditures for the full year 2015 are expected to be in the range of $15 million to $25 million, including progress payments on construction projects expected to be completed in 2015 and 2016, furniture and equipment costs and acquisition of sites for future development. Actual expenditures may vary significantly from those expected, depending on the number and cost of additional offices acquired or constructed and sites acquired for future

development, progress or delays encountered on ongoing and new construction projects, delays in or inability to obtain required approvals, potential premises and equipment expenditures associated with acquisitions, if any, and other factors.

Acquisitions. We have shown substantial growth through a combination of organic growth and acquisitions. Since 2010, we have completed 13 acquisitions, including seven FDIC-assisted transactions, and on October 19, 2015, we announced our $14^{th}$ acquisition.

On February 10, 2015, we completed our acquisition of Intervest and its wholly-owned bank subsidiary Intervest National Bank, headquartered in New York, New York. The acquisition of Intervest added seven retail banking offices including one in New York City, five in Clearwater, Florida and one in Pasadena, Florida. In September 2015, we closed one of the banking offices in Clearwater, Florida.

On August 5, 2015, we completed our acquisition of BCAR and its wholly-owned bank subsidiary Bank of the Carolinas, headquartered in Mocksville, North Carolina. The acquisition of BCAR added eight retail banking offices in North Carolina, including one each in Advance, Asheboro, Concord, Harrisburg, Landis, Lexington, Mocksville and Winston-Salem.

On October 19, 2015, we entered into a definitive agreement and plan of merger (the "C&S Agreement") with Community & Southern Holdings, Inc. ("C&S") and its wholly-owned bank subsidiary Community & Southern Bank. Community & Southern Bank, headquartered in Atlanta, Georgia operates 47 banking offices throughout Georgia and one banking office in Jacksonville, Florida. Completion of the transaction, which is subject to certain closing activities, including receipt of customary regulatory approvals and the approval of both C&S and our shareholders, is expected to occur late in the first quarter or the second quarter of 2016.

We expect to continue growing through both our de novo branching strategy and traditional acquisitions. With respect to our de novo branching strategy, future de novo branches are expected to be focused in states where we currently have banking offices and we expect to begin focusing on larger markets and MSAs across the U.S. where we currently do not have offices. Future RESG loan production offices are expected to be focused in strategically important markets (most likely San Francisco in the first quarter of 2016 and offices in Washington, D.C., Seattle, Boston and Chicago at later dates). With respect to traditional acquisitions, we are seeking acquisitions that are either immediately accretive to book value, tangible book value, and diluted earnings per share, or strategic in location, or both.

RECENTLY ISSUED ACCOUNTING STANDARDS

See Note 18 to the Consolidated Financial Statements for a discussion of certain recently issued and recently adopted accounting pronouncements.

Item 3. Quantitative and Qualitative Disclosures about Market Risk
Interest rate risk results from timing differences in the repricing of assets and liabilities or from changes in relationships between interest rate indexes. Our interest rate risk management is the responsibility of ALCO, which reports to the board of directors.

We regularly review our exposure to changes in interest rates. Among the factors considered are changes in the mix of interest earning assets and interest bearing liabilities, interest rate spreads and repricing periods. Typically, ALCO reviews on at least a quarterly basis our relative ratio of rate sensitive assets (“RSA”) to rate sensitive liabilities (“RSL”) and the related cumulative gap for different time periods. However, the primary tool used by ALCO to analyze our interest rate risk and interest rate sensitivity is an earnings simulation model.

This earnings simulation modeling process projects a baseline net interest income (assuming no changes in interest rate levels) and estimates changes to that baseline net interest income resulting from changes in interest rate levels. We rely primarily on the results of this model in evaluating our interest rate risk. This model incorporates a number of additional factors including: (1) the expected exercise of call features on various assets and liabilities, (2) the expected rates at which various RSA and RSL will reprice, (3) the expected growth in various interest earning assets and interest bearing liabilities and the expected interest rates on new assets and liabilities, (4) the expected relative movements in different interest rate indexes which are used as the basis for pricing or repricing various assets and liabilities, (5) existing and expected contractual cap and floor rates on various assets and liabilities, (6) expected changes in administered rates on interest bearing transaction, savings, money market and time deposit accounts and the expected impact of competition on the pricing or repricing of such accounts, (7) the timing and amount of cash flows expected to be received on purchased loans and (8) other relevant factors. Inclusion of these factors in the model is intended to more accurately project our expected changes in net interest income resulting from interest rate changes. We typically model our change in net interest income assuming interest rates go up 100 bps, up 200 bps, up 300 bps, up 400 bps, down 100 bps, down 200 bps, down 300 bps and down 400 bps. Based on current conditions, we believe that modeling our change in net interest income assuming interest rates go down 100 bps, down 200 bps, down 300 bps and down 400 bps is not meaningful. For purposes of this model, we have assumed that the change in interest rates phases in over a 12-month period. While we believe this model provides a reasonably accurate projection of our interest rate risk, the model includes a number of assumptions and predictions which may or may not be correct and may impact the model results. These assumptions and predictions include inputs to compute baseline net interest income, growth rates, expected changes in administered rates on interest bearing deposit accounts, competition and a variety of other factors that are difficult to accurately predict. Accordingly, there can be no assurance the earnings simulation model will accurately reflect future results.

The following table presents the earnings simulation model’s projected impact of a change in interest rates on the projected baseline net interest income for the 12-month period commencing October 1, 2015. This change in interest rates assumes parallel shifts in the yield curve and does not take into account changes in the slope of the yield curve or the impact of any possible future acquisitions.

| Shift in Interest Rates (in bps) | % Change in Projected Baseline Net Interest Income |
|---|---|
| +400 | 13.1% |
| +300 | 9.5 |
| +200 | 5.9 |
| +100 | 2.7 |
| -100 | Not meaningful |

| -200 | Not meaningful |
| -300 | Not meaningful |
| -400 | Not meaningful |

In the event of a shift in interest rates, management may take certain actions intended to mitigate the negative impact to net interest income or to maximize the positive impact to net interest income. These actions may include, but are not limited to, restructuring of interest earning assets and interest bearing liabilities, seeking alternative funding sources or investment opportunities and modifying the pricing or terms of loans, leases and deposits.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures.

An evaluation as of the end of the period covered by this quarterly report was carried out under the supervision and with the participation of our management, including our Chairman and Chief Executive Officer and our Chief Financial Officer and Chief Accounting Officer, of the effectiveness of the design and operation of our “disclosure controls and procedures,” which are defined under SEC rules as controls and other procedures of a company that are designed to ensure that information required to be disclosed by a company in the reports that it files or submits under the Exchange Act is recorded, processed, summarized and reported within required time periods. Based upon that evaluation, our Chairman and Chief Executive Officer and our Chief Financial Officer and Chief Accounting Officer concluded that our disclosure controls and procedures were effective.

(b) Changes in Internal Control over Financial Reporting.

Our management, including our Chairman and Chief Executive Officer and our Chief Financial Officer and Chief Accounting Officer, has evaluated any changes in our internal control over financial reporting that occurred during the quarterly period covered by this report and has concluded that there were no changes during the quarterly period covered by this report that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

On January 5, 2012, the Company and the Bank were served with a summons and complaint filed on December 19, 2011, in the Circuit Court of Lonoke County, Arkansas, Division III, styled Robert Walker, Ann B. Hines and Judith Belk vs. Bank of the Ozarks, Inc. and Bank of the Ozarks, Case No. CV-2011-777. In addition, on December 21, 2012, the Bank was served with a summons and complaint filed on December 20, 2012, in the Circuit Court of Pulaski County, Arkansas, Ninth Division, styled Audrey Muzingo v. Bank of the Ozarks, Case No. 60 CV-12-6043. The complaint in each case alleges that the Company and/or Bank have harmed the plaintiffs, current or former customers of the Bank, by improper, unfair, and unconscionable assessment and collection of excessive overdraft fees from the plaintiffs. According to the complaints, plaintiffs claim that the Bank employs sophisticated software to automate its overdraft system, and that this system unfairly and inequitably manipulates and alters customers' transaction records in order to maximize overdraft penalties, particularly utilizing a practice of posting of items in "high-to-low" order, despite the actual sequence in which such items are presented for payment. Plaintiffs claim that the Bank's deposit agreements with customers do not adequately disclose the Bank's overdraft assessment policies and are ambiguous, deceptive, unfair, and misleading. The complaint in each case alleges that these actions and omissions constitute breach of contract, breach of the implied covenant of good faith and fair dealing, unconscionable conduct, conversion, unjust enrichment, and violation of the Arkansas Deceptive Trade Practices Act. The complaint in the Walker case also includes a count for conversion. Each of the complaints seeks to have the cases certified by the court as a class action for all Bank account holders similarly situated, and seeks a declaratory judgment as to the wrongful nature of the Bank's overdraft fee policies, restitution of overdraft fees paid by the plaintiffs and the putative class (defined as all Bank customers residing in Arkansas) as a result of the actions cited in the complaints, disgorgement of profits as a result of the alleged wrongful actions, and unspecified compensatory and statutory or punitive damages, together with pre-judgment interest, costs, and plaintiffs' attorneys' fees.

The Company and Bank filed a motion to dismiss and to compel arbitration in the Walker case. The trial court denied the motion and found that the arbitration provision contained in the controlling Consumer Deposit Account Agreement was unconscionable and thus unenforceable on the grounds that the provision was the result of unequal bargaining power. The Company and Bank appealed the trial court's ruling to the Arkansas Court of Appeals on an interlocutory basis. On September 18, 2013, a three-judge panel of the Arkansas Court of Appeals reversed the trial court's ruling and remanded the case to the trial court for the purpose of entering an order compelling arbitration. On October 7, 2013, the plaintiffs filed petitions for reconsideration and review before the Arkansas Court of Appeals and Arkansas Supreme Court, respectively. On October 30, 2013, the Arkansas Court of Appeals denied the plaintiffs' petition for reconsideration. In January 2014, the Arkansas Supreme Court granted the plaintiff's petition for review. Oral arguments were presented to the Arkansas Supreme Court on May 1, 2014. On May 15, 2014, the Arkansas Supreme Court vacated the Arkansas Court of Appeals' decision, reversing and remanding the case to the trial court to determine, in the first instance, whether there is a valid agreement to arbitrate disputes between the named plaintiffs and the Bank.

An evidentiary hearing was conducted by the trial court on the arbitration issue on October 1, 2014, and the trial court took the matter under advisement. On October 30, 2014, the trial court issued an order once again denying the Company and Bank's motion to dismiss and to compel arbitration. The trial court ruled that the Consumer Deposit Account Agreement containing the arbitration provision was not enforceable because of a lack of mutual agreement and lack of mutual obligation. The Company and Bank have appealed the trial court's ruling to the Arkansas Supreme Court on an interlocutory basis. The Company and Bank filed their initial appellate brief on April 14, 2015. The plaintiffs filed their appellate brief on May 14, 2015, and the Company and the Bank filed their reply brief on May 29, 2015. The Arkansas Supreme Court has determined that oral arguments are unnecessary. A ruling from the Arkansas Supreme Court is expected in mid-November or December of 2015.

The Plaintiff in the Muzingo case has agreed to stay the proceedings in that case pending the outcome of the appeal in the Walker case. The Company and the Bank believe the Plaintiffs' claims in each of these cases are unfounded and

subject to meritorious defenses and intend to vigorously defend against these claims.

The Company is party to various other legal proceedings, as both plaintiff and defendant, arising in the ordinary course of business, including claims of lender liability, broken promises, and other similar lending-related claims. While the ultimate resolution of these various claims and proceedings cannot be determined at this time, management of the Company believes that such claims and proceedings, individually or in the aggregate, will not have a material adverse effect on the future results of operations, financial condition, or liquidity of the Company.
