

PETROBRAS - PETROLEO BRASILEIRO SA  
Form 6-K  
November 06, 2018

UNITED STATES

SECURITIES AND EXCHANGE COMMISSION

Washington, D.C. 20549

FORM 6-K

Report of Foreign Private Issuer  
Pursuant to Rule 13a-16 or 15d-16 of the  
Securities Exchange Act of 1934

For the month of November, 2018

Commission File Number 1-15106

PETRÓLEO BRASILEIRO S.A. - PETROBRAS

(Exact name of registrant as specified in its charter)

Brazilian Petroleum Corporation - PETROBRAS

(Translation of Registrant's name into English)

Edgar Filing: PETROBRAS - PETROLEO BRASILEIRO SA - Form 6-K

Avenida República do Chile, 65  
20031-912 - Rio de Janeiro, RJ  
Federative Republic of Brazil

(Address of principal executive office)

Indicate by check mark whether the registrant files or will file annual reports under cover Form 20-F or Form 40-F.

Form 20-F  Form 40-F

Indicate by check mark whether the registrant by furnishing the information contained in this Form is also thereby furnishing the information to the Commission pursuant to Rule 12g3-2(b) under the Securities Exchange Act of 1934.

Yes  No

## FINANCIAL REPORT

Rio de Janeiro

November 6<sup>th</sup>, 2018

9M-2018 Results\*:

Derived from unaudited consolidated interim financial information reviewed by independent auditors, stated in millions of U.S. dollars, prepared in accordance with International Financial Reporting Standards - IFRS issued by the International Accounting Standards Board - IASB.

The main functional currency of the Petrobras Group is the Brazilian real, which is the functional currency of the parent company and its Brazilian subsidiaries, and the presentation currency of the Petrobras Group is the U.S. dollar. Therefore, financial records are maintained in Brazilian reais and income and expenses are translated into U.S. dollars using the average exchange rates prevailing during the period, as set out in IAS 21 – “The effects of foreign exchanges rates”.

When the Brazilian real appreciates relative to the U.S. dollar, the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. When the Brazilian real depreciates relative to the U.S. dollar, the effect is to generally decrease revenues and expenses when expressed in U.S. dollars. In 9M-2018, the average Brazilian real depreciated by 13% in relation to the U.S. dollar when compared to 9M-2017. The foreign exchange translation effects on the Company’s results are shown in item VII - Foreign exchange translation effects on results of operations in 9M-2018.

### Gross Profit

Gross profit was US\$ 25,795 million in 9M-2018, a 23% increase compared to US\$ 20,917 million in 9M-2017, mainly due to higher margins of oil exports, as a result of the increase in Brent prices, and to higher margin in the domestic sales of oil products. On the other hand, domestic sales volumes of oil products dropped (mainly gasoline). Gross Margin\*\* was 36% in 9M-2018, compared to 32% in 9M-2017.

### Operating income and expenses

Operating income was US\$ 14,423 million in 9M-2018, a 24% increase from US\$ 11,654 million in 9M-2017 mainly due to the rise in gross profit, negatively impacted by higher sale expenses, derived from the payment of tariffs to the third-party gas pipeline, by the foreign exchange losses on Class Action outstanding balance and by lower gains with divestments, when compared to 9M-2017. There was also reduction in general and administrative expenses.

### Net Finance Income (Expense)

The net finance expense was US\$ 4,447 million in 9M-2018, a 41% decrease compared to US\$ 7,555 million in 9M-2017 mainly as a result of lower financing expenses, due to prepayment of debt and to the gain arising from the renegotiation of debts with Eletrobras System.

### Net income (loss) attributable to the shareholders of Petrobras

Net income attributable to the shareholders of Petrobras was US\$ 6,622 million in 9M-2018, a 315% increase compared to US\$ 1,596 million in 9M-2017. The result improved mainly due to increase in domestic oil products and oil exports margins and to the drop in net finance expenses.

Adjusted EBITDA\*\*

Adjusted EBITDA increased to US\$ 23,844 million in 9M-2018, from US\$ 20,039 million in 9M-2017. The Adjusted EBITDA Margin\*\* reached 33% in 9M-2018 compared to 31% in 9M-2017.

Net cash provided by operating activities and Free Cash Flow \*\*

Free cash flow was US\$ 10,604 million in 9M-2018, a decrease of 10% when compared to US\$ 11,814 million in 9M-2017, derived, primarily, from foreign exchange translation effects.

\* Additional information about operating results of 9M-2018 x 9M-2017, see “Additional Information” item II.

\*\* See definitions of Free Cash Flow, Gross Margin, Adjusted EBITDA and Adjusted EBITDA Margin in glossary and the respective reconciliations in Liquidity and Capital Resources and Reconciliation of Adjusted EBITDA.

This release includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, that are subject to risks and uncertainties. The forward-looking statements, which address the Company's expected business and financial

performance, among other matters, contain words such as “believe,” “expect,” “estimate,” “anticipate,” “optimistic,” “intend,” “aim,” “will,” “may,” “should,” “could,” “would,” “likely,” and similar expressions. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date on which they are made. There is no assurance that the expected events, trends or results will actually occur. We undertake no obligation to publicly update or revise any forward-looking statements, whether as a result of new information or future events or for any other reason.

The Company’s actual results could differ materially from those expressed or forecast in any forward-looking statements as a result of a variety of assumptions and factors. These factors include, but are not limited to, the following: (i) failure to comply with laws or regulations, including fraudulent activity, corruption, and bribery; (ii) the outcome of ongoing corruption investigations and any new facts or information that may arise in relation to the “Lava Jato Operation”; (iii) the effectiveness of the Company’s risk management policies and procedures, including operational risk; and (iv) litigation, such as class actions or proceedings brought by governmental and regulatory agencies. A description of other factors can be found in the Company’s Annual Report on Form 20-F for the year ended December 31, 2015, and the Company’s other filings with the U.S. Securities and Exchange Commission.

## II. Results of Operations of Jan-Sep/2018 compared to Jan-Sep/2017

The main functional currency of the Petrobras Group is the Brazilian real, which is the functional currency of the parent company and its Brazilian subsidiaries. As the presentation currency of the Petrobras Group is the U.S. dollar, the results of operations in Brazilian reais are translated into U.S. dollars using the average exchange rates prevailing during the period, as set out in IAS 21 – “The effects of foreign exchanges rates”. For detailed information about foreign exchange translation effects on the Company’s income statement, see item VII “Foreign exchange translation effects on results of operations of Jan-Sep/2018”.

Sales revenues were US\$ 71,238 million in Jan-Sep/2018, a 9% increase (US\$ 5,978 million) when compared to US\$ 65,260 million in Jan-Sep/2017, mainly due to:

Higher domestic revenues (US\$ 2,979 million), mainly as a result of:

Higher oil products revenues (US\$ 4,143 million), primarily reflecting an increase in average realization prices of diesel, gasoline and liquefied petroleum gas in accordance with our pricing policies for these products, higher prices of other oil products following the increase in international prices, as well as an increase in diesel sales volume due to lower imports from competitors. These effects were partially offset by the decrease in oil products sales volume, mainly for gasoline due to a higher portion of ethanol in fuel market, as well as lower sales of naphtha to Braskem. Higher revenues of natural gas (US\$ 347 million), due to increase in prices; and  
Decreased electricity revenues when expressed in U.S. dollars (US\$ 618 million), following lower prices.

Higher export revenues (US\$ 1,728 million), driven by an increase in international prices of crude oil and oil products, partially offset by the decrease in crude oil volume exported due to lower production;

Higher revenues from operations abroad (US\$ 1,271 million) following higher international prices.

Cost of sales was US\$ 45,443 million in Jan-Sep/2018, a 2% increase (US\$ 1,100 million) compared to US\$ 44,343 million in Jan-Sep/2017, mainly due to:

Higher production taxes expenses and import costs of crude oil, oil products and natural gas, due to higher international prices;

Increased costs from operations abroad, following higher international prices; and

Higher share of crude oil imports on feedstock processed and of LNG on sales mix.

Foreign exchange translation effects partially offset the aforementioned issues due to the decrease of the average cost of sales when expressed in U.S. dollars, reflecting the depreciation of the average Brazilian real;

Selling expenses were US\$ 4,083 million in Jan-Sep/2018, a 23% increase (US\$ 775 million) compared to US\$ 3,308 million in Jan-Sep/2017, mainly due to:

Increased impairment of trade and other receivables, primarily relating to companies from the electricity sector; and

Higher transportation charges, due to the payment of tariffs for the use of third party gas pipelines, following the sale of Nova Transportadora do Sudeste (NTS) in April 2017.

General and administrative expenses were US\$ 1,832 million in Jan-Sep/2018, a 17% decrease (US\$ 366 million) compared to US\$ 2,198 million in Jan-Sep/2017, mainly due to lower expenses with outsourced consulting, IT and administrative services, following financial discipline of controlling expenses.

## Edgar Filing: PETROBRAS - PETROLEO BRASILEIRO SA - Form 6-K

Exploration costs were US\$ 402 million in Jan-Sep/2018, a 19% decrease (US\$ 92 million) compared to US\$ 494 million in Jan-Sep/2017, mainly due to lower exploration expenditures written off with projects without economic viability (US\$ 153 million), partially offset by higher provisions related to contractual penalties arising from local content requirements (US\$ 70 million).

Other taxes were US\$ 448 million in Jan-Sep/2018, a US\$ 919 million decrease compared to US\$ 1,367 million in Jan-Sep/2017, mainly as a result of the Company's decision, in Jan-Sep/2017, to benefit from the Tax Settlement Programs (US\$ 799 million) and from the State Tax Amnesty Program (US\$ 56 million).

Other income and expenses totaled US\$ 4,131 million in expenses in Jan-Sep/2018, a US\$ 2,647 million increase compared to the US\$ 1,484 million in expenses in Jan-Sep/2017, mainly due to:

- Lower net gain on the sale and write-off of assets (US\$ 1,009 million), mainly driven by the US\$ 1,952 million gain on sale of interests in NTS recognized in Jan-Sep/2017; partially offset by the gains, in Jan-Sep/2018, on sale of Lapa and Iara fields (US\$ 689 million) and by the contingent payment received for the sale of Carcará area (US\$ 300 million);

- Agreement to settle Lava Jato Investigations with U.S. Authorities (US\$ 895 million) in 2018;

- Lower fair value of commodities put options related to the hedge of part of crude oil production (US\$ 608 million), considering its nature of insurance and protection against the variation of the commodity.

- Foreign exchange losses in 2018 related to the Class Action Settlement provision (US\$ 539 million);

- Increased impairment of assets (US\$ 239 million), mainly related to E&P assets of PAI;

- Higher amounts recovered from Lava Jato Investigations (US\$ 392 million); and

- Reversal of provision for losses and contingencies with judicial proceedings related to the extrajudicial agreement of BR Distribuidora for the settlement of tax debts with the State of Mato Grosso (US\$ 347 million).

Net finance expense (income) was US\$ 4,447 million in Jan-Sep/2018, a 41% decrease (US\$ 3,108 million) when compared to US\$ 7,555 million in Jan-Sep/2017, mainly due to:

- Lower debt interest and charges (US\$ 1,019 million) due to lower interest expenses following pre-payment of debts;
- Decreased foreign exchange losses mainly reflecting a US\$ 651 million loss in Jan-Sep/2017 driven by the impact of 12% depreciation of the U.S. dollar on the Company's net debt in Euro, compared to US\$ 2 million gain in Jan-Sep/2018 following a 3.1% appreciation of the U.S. dollar on the Company's net debt in Euro. This effect was partially offset by a higher reclassification of foreign exchange losses from equity to net income derived from occurred exports designated for cash flow hedge accounting (US\$ 88 million).

- Gains arising from the renegotiation of debts from Eletrobras Group in 2Q-2018 (US\$ 580 million); and

- Finance charges due to the Company's decision to benefit from the Tax Settlement Programs (Programas de Regularização de Tributos Federais) in Jan-Sep/2017 (US\$ 630 million).

Income taxes expenses were US\$ 3,834 million in Jan-Sep/2018, a 37% increase (US\$ 1,034 million) compared to US\$ 2,800 million in Jan-Sep/2017, as a result of higher taxable income (before taxes) of the period, partially offset by the Company's decision, in Jan-Sep/2017, to benefit from the Tax Settlement Programs (Programas de Regularização de Tributos Federais). For more information about income taxes expenses, see Note 19.6 to the Company's unaudited interim consolidated financial statements.

Result attributable to non-controlling interests were US\$ 11 million in Jan-Sep/2018, a US\$ 216 million decrease compared to the US\$ 227 million in Jan-Sep/2017, mainly reflecting the impact of the foreign exchange depreciation of the Brazilian real on debt of structured entities in U.S. dollars, partially offset by the positive result of BR

Distribuidora, which has not been a wholly-owned subsidiary since December 2017.

\* For detailed information about foreign exchange translation effects on the Company's income statement, see item VII "Foreign exchange translation effects on results of operations of Jan-Sep/2018".

5

a) EXPLORATION & PRODUCTION (E&P)

9M-2018 x 9M-2017

Gross Profit

The growth in gross profit reflects the increase in Brent, partially offset by the reduction in production.

Operating Income and Expense

The increase in operating income is due, in addition to the increase in gross profit, to the result of the assignment of rights in the areas of Lapa, Iara and Carcará, and the provision for write-down of the receivable related to Vitória 10,000 drilling rig, driven by the termination of the finance lease agreement.

Operating Performance

Production

Oil, NGL and natural gas production decreased compared to the same period last year, mainly due to divestments of Lapa and Roncador fields, to the end of the early production system in Itapu field in the Santos Basin, and to the natural decline in production, partially offset by the production startup of FPSO Cidade de Campos dos Goytacazes in the Tartaruga Verde field, and of the P-74 in Búzios field.

Lifting Cost

The indicator decreased due to the impact of the appreciation of U.S. dollar over expenses denominated in reais, in addition to the lower expenses with interventions in wells. This effect was partially offset by the reduction in production.

In addition, there was higher government participation expenses as a result of higher international oil prices.

7

b) REFINING, TRANSPORTATION AND MARKETING (RTM)

9M-2018 x 9M-2017

Operating Income and expense

The increase in operating income was a result of higher margin of oil products and crude oil, due to the realization of inventories formed at lower prices. This result was partially compensated by lower sales volumes and foreign exchange translation effects.

Operating Performance

Imports and Exports of Crude Oil and Oil Products

There was a reduction in net export of oil due to lower production.

The increase in net export of oil products is due to the loss of market share from gasoline to ethanol and a reduction in sales of naphtha to Braskem.

The company maintained its position as a net exporter, with a balance of 272 thousand bpd.

Refining Operations

Processed feedstock remained at the same level as 2017.

Refining Cost

Refining cost dropped mainly reflecting cost efficiencies.

\*\* Imports of regasified LNG have been considered as from the RMF 2Q-2018. Until the RMF 1Q-2018, it considered imports of LNG, regardless of its regasification within the analyzed period.

c) GAS & POWER (G&P)

9M-2018 x 9M-2017

Gross Profit

Gross profit was lower due to foreign exchange translation effects, since the US dollar denominated portion of the costs is higher than in the revenues.

Operating income and expense

Operating income decreased as a result of higher sales expenses with the payment of tariffs for the use of gas pipelines in the Southeast grid, and expected credit losses (ECL) related to the supply of natural gas to the thermoelectric segment in the Northern Region, in addition to gains on the sale of NTS in 2Q17.

Operating Performance

Physical and Financial Indicators

Increased imports of LNG due to lower availability of domestic gas, as a result of stoppage at Mexilhão platform.

The higher volume of sales in the Free Contracting Market (ACL) was due to new sales opportunities in the short-term market. The volume reduction in the Regulated Contracting Market (RCA) resulted from the expiration of contracts.

Despite the foreign translation effects from the depreciation of Real against the U.S. dollar, the electricity price in the spot market increased due to the lower affluence at the beginning of the dry season and the fact that the reservoirs started the year at levels lower than in 2017. However, energy generation was lower than the previous year due to

higher gas costs.

d) DISTRIBUTION

9M-2018 x 9M-2017

Gross Profit

The decrease in gross profit reflected the reduction in the volume sold of gasoline and fuel oil.

Operating income and expense

Operating income increased primarily as a result of the reversal of the provision for losses on lawsuits arising from the Extraordinary Settlement Agreement signed with the State of Mato Grosso.

Investments by non-controlling interest	33	(61)
Effect of exchange rate changes on cash and cash equivalents	(623)	45
Cash and cash equivalents at the end of period	14,187	23,495
Government bonds and time deposits with maturities of more than 3 months at the end of period	1,040	1,813
Adjusted cash and cash equivalents* at the end of period	15,227	25,308
Reconciliation of Free cash flow		
Net cash provided by (used in) operating activities	19,501	21,085
Acquisition of PP&E and intangibles assets, investments in investees and dividends received	(8,897)	(9,271)
Free cash flow*	10,604	11,814

As of September 30, 2018, the balance of cash and cash equivalents was US\$ 14,187 million and the balance of adjusted cash and cash equivalents was US\$ 15,227 million. The resources from cash provided by operating activities of US\$ 19,501 million, proceeds from financing of US\$ 9,008 million, proceeds from divestments of US\$ 4,915 million were used for repayment of financing (and interest payments) and for capital expenditures.

Net cash provided by operating activities decreased to US\$ 19,501 million, as a result of foreign exchange translation effects, payment of two installments of the agreement to settle Class Action and lower sales volumes, partially offset by higher margins in domestic sales of oil products and oil exports.

Acquisition of PP&E and intangibles assets, investments in investees and dividends received totaled US\$ 8,897 million in 9M-2018, a reduction of 4%.

The above mentioned factors led to a decrease of 10% in Free cash flow, which totaled US\$ 10,604 million in 9M-2018.

From January to September 2018, proceeds from financing amounted to US\$ 9,008 million, in part as a result of: (i) funds raised from the domestic and international banking market in the amount of US\$ 5,643 million with average

term of 6.19 years; (ii) global notes issued in the capital market in the amount of US\$ 1,962 million and maturing in 2029; and (iii) proceeds from Export Credit Agency amounting to US\$ 1,041 million.

In addition, the Company paid debts: (i) US\$ 12,816 million relating to repurchase of global bonds previously issued by the Company in the capital market, with net premium paid to bond holders amounting to US\$ 305 million; and (ii) pre-payment of banking loans in the domestic and international market totaling US\$ 11,974 million; and (iii) pre-payment of US\$ 687 million with respect to financings with BNDES.

The nominal cash flow (cash view), including principal and interest payments, by maturity, is set out in US\$ million, below:

Maturity	2018	2019	2020	2021	2022	2023 and thereafter	Balance on September 30, 2018	Balance on December 31, 2017
Principal	734	2,555	5,473	7,800	11,798	60,504	88,864	110,530
Interest	1,384	5,090	4,916	4,583	4,089	32,669	52,730	60,728
Total	2,118	7,645	10,389	12,383	15,887	93,173	141,594	171,258

\* See reconciliation of Adjusted Cash and Cash Equivalents in Net Debt and definitions of Adjusted Cash and Cash Equivalents and Free Cash Flow in Glossary.

## V. Consolidated debt

As of September 30, 2018, the total debt in U.S. dollars decreased 19% when compared to December 31, 2017. The net debt in U.S. dollars decreased by 14% when compared to December 31, 2017, mainly as a result of repayments of principal and interest.

Current debt and non-current debt include finance lease obligations of US\$ 22 million and US\$ 166 million as of September 30, 2018, respectively (US\$ 25 million and US\$ 204 million on December 31, 2017).

The weighted average maturity of outstanding debt reached 9.05 years as of September 30, 2018 (compared to 8.62 years as of December 31, 2017). The Average interest rate increased to 6.2% in September, 2018 from 6.1% in December 31, 2017.

The ratio between net debt and the Adjusted EBITDA\* decreased to 2.62 as of September 30, 2018 from 3.53 as of December 31, 2017. The ratio between net debt and the OCF decreased to 2.90 as of September 30, 2018 from 3.20 as of December 31, 2017.

## VI. Reconciliation of Adjusted EBITDA and Net Debt/Adjusted EBITDA Metric

LTM Adjusted EBITDA reflects the sum of the last twelve months of Adjusted EBITDA and represents an alternative measure to our net cash provided by operating activities and is computed by using the EBITDA (net income before net finance income (expense), income taxes, depreciation, depletion and amortization) adjusted by items not considered part of Company's primary business, which include results in equity-accounted investments, impairment, cumulative foreign exchange adjustments reclassified to the income statement and results from disposal and write-offs of assets.

In calculating Adjusted EBITDA for Jan-Sep/2018, we adjusted our EBITDA for the period by adding foreign exchange gains and losses resulting from provisions for legal proceedings denominated in foreign currencies. Legal provisions in foreign currencies primarily consist Petrobras's portion of the class action settlement provision created in December 2017. The foreign exchange gains or losses on legal provisions are presented in other income and expenses for accounting purposes but management does not consider them to be part of the Company's primary business. In addition, they are substantially similar to the foreign exchange effects presented within net finance income. No adjustments have been made to the comparative measures presented as amounts were not significant in these periods.

This measure is used to calculate the metric Net Debt/ LTM Adjusted EBITDA, which is established in the business plan 2018-2022, to support management's assessment of liquidity and leverage.

Net Debt reflects the gross debt net of cash and cash equivalents, government bonds and time deposits from highly rated financial institutions abroad with maturities of more than 3 months from the date of acquisition, considering the expected realization of those financial investments in the short-term.

The Adjusted EBITDA is an alternative performance measure for the Company. This measure is being presented as a supplementary information to readers.

EBITDA, Adjusted EBITDA, LTM Adjusted EBITDA and Net debt/Adjusted EBITDA are not defined in the International Financial Reporting Standards – IFRS. Our calculation may not be comparable to the calculation of other companies and it should not be considered in isolation or as a substitute for any measure calculated in accordance with IFRS. These measures must be considered together with other measures and indicators for a better understanding of the Company's financial conditions.

## Net Debt/Adjusted EBITDA Metric

The Net debt/Adjusted EBITDA ratio is an important metric used in our 2018-2022 Plan that supports our management in assessing the liquidity and leverage of Petrobras Group.

In order to translate the items comprising this metric into the presentation currency of the Company's financial statements (U.S. dollars), the Company applied the same foreign exchange translation method as set out IAS 21 - The effects of changes in foreign exchanges rates (see note 2.2 to the interim financial statements for September 30, 2018). Accordingly, assets and liabilities items were translated into U.S. dollars at the exchange rate as of the date of the statement of financial position, and all items pertaining to the statement of income and statement of cash flows were translated at the average rates prevailing at each quarter of the years.

The Company has pursued a 2.5 target ratio based on our net debt and Adjusted EBITDA computed in reais and, depending on the foreign translation effects on items that comprise this metric, the Net Debt/Adjusted EBITDA may

significantly differ or even present a different trend when calculated in USD.

The following table presents, in both currencies, the reconciliation for this metric to the most directly comparable GAAP measure in accordance with IFRS, which is in this case the Gross Debt Net of Cash and Cash Equivalents / Net Cash provided by operating activities ratio:

\* Includes results with disposal and write-offs of assets and re-measurement of remaining interests at fair value.

	R\$ million		US\$ million

## VII. Foreign Exchange Translation Effects on Results of Operations of Jan-Sep/2018

The main functional currency of the Petrobras Group is the Brazilian real, which is the functional currency of the parent company and its Brazilian subsidiaries. However, the presentation currency of this financial report is the U.S. Dollar to facilitate the comparison with other oil and gas companies. Therefore, the results of operations in Brazilian real were translated into U.S. dollars using the average exchange rates prevailing during the period, as set out in IAS 21 – “The effects of foreign exchanges rates”.

When the Brazilian real appreciates against the U.S. dollar, the effect is to generally increase both revenues and expenses when expressed in U.S. dollars. When the Brazilian real depreciates against the U.S. dollar, as it did in Jan-Sep/2018, the effect is to generally decrease both revenues and expenses when expressed in U.S. dollars.

In order to isolate the foreign exchange translation effect on results of operations, the table below presents a reconciliation of income statement to financial information on a constant currency basis, assuming the same exchange rates between each quarter for translation. In 2018, the results on a constant currency basis were computed by converting the 1Q-2018, 2Q-2018 and 3Q-2018 results from Brazilian real into U.S. dollars based on the same average exchange rates used in 1Q-2017, 2Q-2017 and 3Q-2017 (3.1451, 3.2174 and 3.1640, respectively).

The amounts and respective variations presented in constant currency are not measures defined in the International Financial Reporting Standards – IFRS. Our calculation may not be comparable to the calculation of other companies and it should not be considered as a substitute for any measure calculated in accordance with IFRS.

X - Glossary

ACL - Ambiente de Contratação Livre (Free contracting market) in the electricity system.

ACR - Ambiente de Contratação Regulada (Regulated contracting market) in the electricity system.

Adjusted cash and cash equivalents - Sum of cash and cash equivalents, government bonds and time deposits from highly rated financial institutions abroad with maturities of more than 3 months from the date of acquisition, considering the expected realization of those financial investments in the short-term. This measure is not defined under the International Financial Reporting Standards – IFRS and should not be considered in isolation or as a substitute for cash and cash equivalents computed in accordance with IFRS. It may not be comparable to adjusted cash and cash equivalents of other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity and supports leverage management.

Adjusted EBITDA – Net income plus net finance income (expense); income taxes; depreciation, depletion and amortization; results in equity-accounted investments; impairment, cumulative translation adjustment and gains/losses on disposal/write-offs of assets. Adjusted EBITDA is not a measure defined by IFRS and it is possible

that it may not be comparable to similar measures reported by other companies, however management believes that it is an appropriate supplemental measure to assess our profitability. Adjusted EBITDA shall be considered in conjunction with other metrics for a better understanding on our performance.

Adjusted EBITDA margin - Adjusted EBITDA divided by sales revenues.

ANP - Brazilian National Petroleum, Natural Gas and Biofuels Agency.

Basic and diluted earnings (losses) per share - Calculated based on the weighted average number of shares.

Capital Expenditures – Capital expenditures based on the cost assumptions and financial methodology adopted in our Business and Management Plan, which include acquisition of PP&E and intangibles assets, investment in investees and other items that do not necessarily qualify as cash flows used in investing activities, primarily geological and geophysical expenses, research and development expenses, pre-operating charges, purchase of property, plant and equipment on credit and borrowing costs

Free cash flow - Net cash provided by operating activities less acquisition of PP&E and intangibles assets, investments in investees and dividends received.. Free cash flow is not defined under the IFRS and should not be considered in isolation or as a substitute for cash and cash equivalents calculated in accordance with IFRS. It may not be comparable to free cash flow of other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity and supports leverage management.

Gross Margin - Gross profit over sales revenues.

Jet fuel – Aviation fuel.

Leverage – Ratio between the Net Debt and the sum of Net Debt and Shareholders’ Equity. Leverage is not a measure defined in the IFRS and it is possible that it may not be comparable to similar measures reported by other companies, however management believes that it is an appropriate supplemental measure to assess our liquidity.

Lifting Cost - Crude oil and natural gas lifting cost indicator, which considers expenditures occurred in the period.

LNG - Liquefied natural gas.

LPG - Liquefied crude oil gas.

Net Debt – Gross debt less adjusted cash and cash equivalents. Net debt is not a measure defined in the IFRS and should not be considered in isolation or as a substitute for total long-term debt calculated in accordance with IFRS. Our calculation of net debt may not be comparable to the calculation of net debt by other companies. Management believes that net debt is an appropriate supplemental measure that helps investors assess our liquidity and supports leverage management.

Net Income by Business Segment - Company’s segment results. Petrobras is an integrated energy company and most of the crude oil and natural gas production from the Exploration & Production segment is transferred to other business segments

directly attributable to works in progress.

Consolidated Structured Entities - Entities that have been designated so that voting or similar rights are not the determining factor that decides who controls the entity. Petrobras has no share of earnings in investments in certain structured entities that are consolidated in the financial statements, but the control is determined by the power it has over its relevant operating activities. As there are no interests, the result came from certain consolidated structured entities is attributable to non-controlling interests in the income statement, and it is not considered on net income attributable to shareholders of Petrobras.

CTA – Cumulative translation adjustment – The cumulative amount of exchange variation arising on translation of foreign operations that is recognized in Shareholders' Equity and will be transferred to profit or loss on the disposal of the investment.

Domestic crude oil sales price - Average of the internal transfer prices from Exploration & Production to Refining, Transportation and Marketing.

Domestic natural gas production - Natural gas production in Brazil less LNG plus gas reinjection.

Effect of average cost in the Cost of Sales – In view of the average inventory term of 60 days, the crude oil and oil products international prices movement, as well as foreign exchange effect over imports, production taxes and other factors that impact costs, do not entirely influence the cost of sales in the current period, having their total effects only in the following period.

Feedstock processed – Brazil - Daily volume of crude oil and NGL processed.

Feedstock processed (excluding NGL) - Daily volume of crude oil processed in the Company's refineries in Brazil and is factored into the calculation of the Refining Plants Utilization Factor.

of the Company. Our results by business segment include transactions carried out with third parties, transactions between companies of Petrobras's Group and transfers between Petrobras's business segments that are calculated using internal prices defined through methodologies based on market parameters.

Net Margin - Net income (loss) over sales revenues.

NGL - Natural gas liquids.

OCF - Net Cash provided by (used in) operating activities (operating cash flow)

Operating indicators - Indicators used for businesses management and are not reviewed by independent auditor.

Operating Margin - Operating income (loss) over sales revenues.

PLD (differences settlement price) - Electricity price in the spot market. Weekly weighed prices per output level (light, medium and heavy), number of hours and related market capacity.

Reference feedstock or installed capacity of primary processing - Maximum sustainable feedstock processing reached at the distillation units at the end of each period, respecting the project limits of equipment and the safety, environment and product quality requirements. It is lower than the authorized capacity set by ANP (including temporary authorizations) and by environmental protection agencies.

Refining plants utilization factor (%) - Feedstock processed (excluding NGL) divided by the reference feedstock.

Total net liabilities - Total liability less adjusted cash and cash equivalents.
