Notes to Condensed Consolidated Financial Statements – Unaudited
June 30, 2018

(\$ in thousands except share and per share data)

Note A – Basis of Reporting

The accompanying unaudited condensed consolidated financial statements of Steven Madden, Ltd. and subsidiaries (the “Company”) have been prepared in accordance with generally accepted accounting principles in the United States of America (“GAAP”) for interim financial information and pursuant to the rules and regulations of the Securities and Exchange Commission (the “SEC”). Accordingly, they do not include all of the information and footnotes required by GAAP for complete financial statements. In the opinion of management, such statements include all adjustments (consisting only of normal recurring items) which are considered necessary for a fair presentation of the financial position of the Company and the results of its operations and cash flows for the periods presented. Certain adjustments were made to prior years' amounts to conform to the 2018 presentation. The results of operations for the three and six month periods ended June 30, 2018 are not necessarily indicative of the operating results for the full year. These financial statements should be read in conjunction with the financial statements and related disclosures for the year ended December 31, 2017 included in the Annual Report of Steven Madden, Ltd. on Form 10-K filed with the SEC on March 1, 2018.

Note B – Use of Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.

Significant areas involving management estimates include allowances for bad debts, returns and customer chargebacks, inventory valuation, valuation of intangible assets, litigation reserves and contingent payment liabilities. The Company provides reserves on trade accounts receivables and factor receivables for future customer chargebacks and markdown allowances, discounts, returns and other miscellaneous compliance-related deductions that relate to the current period sales. The Company evaluates anticipated chargebacks by reviewing several performance indicators of its major customers. These performance indicators, which include retailers' inventory levels, sell-through rates and gross margin levels, are analyzed by management to estimate the amount of the anticipated customer allowance.

Note C – Factor Receivable

The Company has a collection agency agreement with Rosenthal & Rosenthal, Inc. (“Rosenthal”). The agreement can be terminated by the Company or Rosenthal at any time upon 60 days prior written notice. Under the agreement, the Company can request advances from Rosenthal of up to 85% of aggregate receivables submitted to Rosenthal. The agreement provides the Company with a \$30,000 credit facility with a \$15,000 sub-limit for letters of credit at an interest rate based, at the Company's election, upon a calculation that utilizes either the prime rate minus 0.5% or LIBOR plus 2.5%. As of June 30, 2018 and 2017, no borrowings were outstanding. As of June 30, 2018 and 2017, there were open letters of credit of \$110 and \$524, respectively. The Company also pays Rosenthal a fee based on a percentage of the gross invoice amount submitted to Rosenthal. With respect to receivables related to our private label business, the fee is 0.14% of the gross invoice amount. With respect to all other receivables, the fee is 0.20% of the gross invoice amount. Rosenthal assumes the credit risk on a substantial portion of the receivables that the Company submits to it and, to the extent of any loans made to the Company, Rosenthal maintains a lien on the Company's receivables to secure the Company's obligations.

Note D – Marketable Securities

Marketable securities consist primarily of certificates of deposit and corporate bonds with maturities greater than three months and up to four years at the time of purchase. These securities, which are classified as available-for-sale, are

carried at fair value, with unrealized gains and losses, net of any tax effect, reported in stockholders' equity as accumulated other comprehensive income (loss). These securities are classified as current and non-current marketable securities based upon their maturities. Amortization of premiums and discounts is included in interest income. For the three and six months ended June 30, 2018, the amortization of bond premiums totaled \$183 and \$382 compared to \$245 and \$553 for the comparable period in 2017. The value of these securities may fluctuate as a result of changes in market interest rates and credit risk. The schedule of maturities at June 30, 2018 and December 31, 2017 is as follows:

For the six month period ended June 30, 2018, current marketable securities included unrealized losses of \$114 and long-term marketable securities included unrealized losses of \$21. For the comparable period in 2017, current marketable securities included unrealized gains of \$1 and unrealized losses of \$118 while long-term marketable securities included unrealized gains of \$53 and unrealized losses of \$48.

Note E – Fair Value Measurement

The accounting guidance under Accounting Standards Codification 820-10, “Fair Value Measurements and Disclosures” (“ASC 820-10”) requires the Company to make disclosures about the fair value of certain of its assets and liabilities. ASC 820-10 clarifies the principle that fair value should be based on the assumptions market participants would use when pricing an asset or liability and establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. ASC 820-10 utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. A brief description of those three levels is as follows:

- Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities.
- Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly.
- Level 3: Significant unobservable inputs.

The Company’s financial assets and liabilities subject to fair value measurements as of June 30, 2018 and December 31, 2017 are as follows:

Total liabilities	\$10,783	\$—	\$783	\$10,000

Our level 3 balance consists of contingent consideration related to an acquisition. The changes in our level 3 liabilities for the periods ended June 30, 2018 and December 31, 2017 are as follows:

	Balance at January 1,	Payments	Acquisitions	Change in estimate	Balance at June 30,
2018					
Liabilities:					
Contingent consideration	\$10,000	(7,000)	—	—	\$3,000
2017					
Liabilities:					
Contingent consideration	\$7,948	(7,359)	20,617	(11,206)	\$10,000

The change in estimate of the contingent consideration for the year ended December 31, 2017 of \$11,206, which occurred in the fourth quarter, has been reflected as a reduction in operating expenses on the Consolidated Statement of Income for the year ended December 31, 2017.

Forward contracts are entered into to manage the risk associated with the volatility of future cash flows (see Note N). Fair value of these instruments is based on observable market transactions of spot and forward rates.

The Company has recorded a liability for potential contingent consideration in connection with the January 30, 2017 acquisition of all of the outstanding capital stock of Schwartz & Benjamin, Inc., B.D.S., Inc., Quinby Ridge Enterprises LLC and DanielBarbara Enterprises LLC (collectively, "Schwartz & Benjamin"). Pursuant to the terms of an earn-out provision contained in the equity purchase agreement, as amended, between the Company and the sellers of Schwartz & Benjamin, earn-out payments are based on the performance of certain specified license agreements. The fair value of the contingent payments was estimated using the present value of the payments based on management's projections of the financial results of Schwartz & Benjamin during the earn-out period. An earn-out payment in the aggregate amount of \$7,000 was paid to the sellers of Schwartz & Benjamin in the first quarter of 2018.

The Company recorded a liability for potential contingent consideration in connection with the December 30, 2014 acquisition of all of the outstanding capital stock of Trendy Imports S.A. de C.V., Comercial Diecisiete S.A. de C.V., and Maximus Designer

Shoes S.A. de C.V. (together "SM Mexico"). Pursuant to the terms of an earn-out agreement between the Company and the seller of SM Mexico, earn-out payments were due annually to the seller of SM Mexico based on the financial performance of SM Mexico for each of the twelve-month periods ending on December 31, 2015 and 2016, inclusive. The fair value of the contingent payments was estimated using the present value of management's projections of the financial results of SM Mexico during the earn-out period. The first earn-out payment of \$3,482 for the period ended December 31, 2015 was paid to the seller of SM Mexico in the first quarter of 2016. The final earn-out payment of \$4,618 for the period ended December 31, 2016 was paid to the seller of SM Mexico in 2017.

The Company recorded a liability for potential contingent consideration in connection with the February 21, 2012 acquisition of all of the assets of Steve Madden Canada Inc., Steve Madden Retail Canada Inc., Pasa Agency Inc. and Gelati Imports Inc. (collectively, "SM Canada"). Pursuant to the terms of an earn-out agreement between the Company and the seller of SM Canada, earn-out payments were due annually to the seller of SM Canada based on the financial performance of SM Canada for each of the 12-month periods ending on March 31, 2013 through 2017, inclusive. The fair value of the contingent payments was estimated using the present value of management's projections of the financial results of SM Canada during the earn-out period. The final earn-out payment of \$2,741 for the period ended March 31, 2017 was paid to the seller of SM Canada in 2017.

Accounting guidance permits entities to choose to measure financial instruments and certain other items at fair value that are not currently required to be measured at fair value. The accounting guidance also establishes presentation and disclosure requirements designed to facilitate comparisons between entities that chose different measurement attributes for similar assets and liabilities. The Company has elected not to measure any eligible items at fair value.

The carrying value of certain financial instruments such as accounts receivable, factor accounts receivable and accounts payable approximates their fair values due to the short-term nature of their underlying terms. The fair values of investment in marketable securities available for sale are determined by reference to publicly quoted prices in an active market. Fair value of the notes receivable held by the Company approximates their carrying value based upon their imputed or actual interest rate, which approximates applicable current market interest rates.

Note F – Revenue Recognition

Adoption of Accounting Standards Update, Topic 606, "Revenue from Contracts with Customers"

In May 2014, the Financial Accounting Standards Board (the "FASB") issued new accounting guidance ("Topic 606"), Accounting Standards Update No. 2014-09 ("ASU 2014-09"), "Revenue from Contracts with Customers," on revenue recognition. The new standard has replaced Revenue Recognition Topic 605 and provides for a single five-step model to be applied to all revenue contracts with customers as well as requiring additional financial statement disclosures that will enable users to understand the nature, amount, timing and uncertainty of revenue and cash flows relating to customer contracts. Effective January 1, 2018, the Company adopted the requirements of Topic 606 using the cumulative effect adjustment approach. The impacts to the financial statements of this adoption are primarily related to balance sheet classification, including amounts associated with the change in balance sheet classification of the sales returns reserves, with no significant impact to the income statement as the Company's existing revenue recognition policies are in line with Topic 606.

The Company recognizes revenue when performance obligations identified under the terms of contracts with its customers are satisfied, which generally occurs upon the transfer of control in accordance with the contractual terms and conditions of the sale. The majority of the Company's revenue is recognized at a point in time when product is shipped to the customer. Revenue is measured as the amount of consideration the Company expects to receive in exchange for transferring goods, which includes estimates for variable consideration. Variable consideration mainly includes markdown allowances, co-op advertising programs and product returns. The revenue recognition for the Company's segments are described below (see Note O for disaggregated revenue amounts by segment).

A. Disaggregation of Revenue

Wholesale Sales Segment. The Company generates revenue through the design, sourcing and sale of branded footwear and accessories to both domestic and international customers who in-turn sell the products to the consumer. The Company recognizes revenue when performance obligations identified under the terms of contracts with its customers are satisfied, which

occurs upon the transfer of control of the merchandise in accordance with the contractual terms and conditions of the sale. The Company's revenue associated with its branded footwear and accessories products is recognized at a point in time when product is shipped to the customer. The Company also generates revenue through the design, sourcing and sale of private label footwear and accessories to both domestic and international customers who brand the products and sell them to the consumer. The Company's revenue associated with private label footwear and accessories products is recognized at a point in time when product is physically delivered to the customer's freight forwarder.

Retail Segment. The Company owns and operates approximately 208 retail stores throughout the United States, Canada, Mexico, South Africa, China and Taiwan, and six e-commerce sites. The Company generates revenue through the sale of branded footwear and accessories directly to the consumer. The Company's revenue associated with Retail sales is recognized at the time of the point of sale when the customer takes control of the goods and payment is received.

First Cost Segment. The Company earns commissions for serving as a buying agent for footwear products under private labels for many of the large mass-market merchandisers, shoe chains and other mid-tier retailers. As a buying agent, the Company utilizes its expertise and relationships with shoe manufacturers to facilitate the production of private label shoes to customer specifications. The Company's commission revenue also includes fees charged for its design, product and development services provided to certain suppliers. The Company satisfies its performance obligation to its customers by performing the services in buyer agency agreements and thereby earning its commission fee at the point in time when the customer's freight forwarder takes control of the goods. The Company satisfies its performance obligation with the suppliers and earns its design fee from the factory at the point in time when the customer's freight forwarder takes control of the goods.

Licensing Segment. The Company licenses various trademarks it owns under licensing agreements for use in connection with the manufacture, marketing and sale of eyewear, outerwear, hosiery, activewear, sleepwear, jewelry, watches, hair accessories, umbrellas, bedding, luggage, men's leather accessories, women's and children's apparel, swimwear, stationary and household goods. The license agreements require the licensee to pay the Company a royalty and, in substantially all of the agreements, an advertising fee, both of which are based on the higher of a minimum or a net sales percentage as defined in the various agreements. Licensing revenue is recognized on the basis of net sales reported by the licensees, or the minimum guaranteed royalties, if higher. In substantially all of the Company's license agreements, the minimum guaranteed royalty is earned and receivable on a quarterly basis. The Company recognizes licensing revenue over the period of time in which the license is provided to the benefit of the licensee.

B. Variable Consideration

Markdown Allowances

The Company provides markdown allowances to its retailer customers, which are recorded as a reduction of revenue in the period in which the branded footwear and accessories revenues are recognized. The Company estimates its markdown allowances by reviewing several performance indicators, including retailers' inventory levels, sell-through rates and gross margin levels.

Co-op Advertising Programs

Under co-op advertising programs, the Company agrees to reimburse the retailer for a portion of the costs incurred by the retailer to advertise and promote certain of the Company's products. The Company estimates the costs of co-op advertising programs based on the terms of the agreements with its retailer customers.

Rights of Return

The Company's Retail segment does accept returns within 30 days from the date of sale for unworn merchandise which the Company is able to re-sell through the channel. The Company does not accept returns as a normal business practice from its branded and private label wholesale customers except for our cold weather accessories business and our Blondo and Kate Spade product lines. The Company estimates returns based on historical experience and current market conditions. Such amounts have historically not been material.

Note G – Share Repurchase Program

The Company's Board of Directors authorized a share repurchase program (the "Share Repurchase Program"), effective as of January 1, 2004. The Share Repurchase Program does not have a fixed expiration or termination date and may be modified or terminated by the Board of Directors at any time. On several occasions the Board of Directors has increased the amount authorized for repurchase, most recently on July 28, 2017 when the Board of Directors approved the extension of the Share Repurchase Program for an additional \$200,000 in repurchases of the Company's common stock. The Share Repurchase Program permits the Company to effect repurchases from time to time through a combination of open market repurchases or in privately negotiated transactions at such prices and times as are determined to be in the best interest of the Company. During the six months ended June 30, 2018, an aggregate of 709,188 shares of the Company's common stock were repurchased under the Share Repurchase Program, at an average price per share of \$46.20, for an aggregate purchase price of approximately \$32,763. As of June 30, 2018, approximately \$148,099 remained available for future repurchases under the Share Repurchase Program.

The Steven Madden, Ltd. 2006 Stock Incentive Plan provides the Company with the right to deduct or withhold, or require employees to remit to the Company, an amount sufficient to satisfy any applicable tax withholding obligations applicable to stock-based compensation awards. To the extent permitted, employees may elect to satisfy all or part of such withholding obligations by tendering to the Company previously owned shares or by having the Company withhold shares having a fair market value equal to the minimum statutory tax withholding rate that could be imposed on the transaction. During the six months ended June 30, 2018, an aggregate of 50,264 shares were withheld in connection with the settlement of vested restricted stock to satisfy tax withholding requirements, at an average price per share of \$46.53, for an aggregate purchase price of approximately \$2,339.

Note H – Net Income Per Share of Common Stock

Basic net income per share is based on the weighted average number of shares of common stock outstanding during the period, which does not include unvested restricted common stock subject to forfeiture of 3,954,000 and 3,934,000 shares for the three and six months ended June 30, 2018, respectively, compared to 4,247,000 and 4,236,000 shares for the three and six months ended June 30, 2017. Diluted net income per share reflects: (a) the potential dilution assuming shares of common stock were issued upon the exercise of outstanding in-the-money options and the proceeds thereof were used to purchase shares of the Company's common stock at the average market price during the period, and (b) the vesting of granted non-vested restricted stock awards for which the assumed proceeds upon vesting are deemed to be the amount of compensation cost not yet recognized attributable to future services using the treasury stock method, to the extent dilutive. For the three and six months ended June 30, 2018, options to purchase

approximately 27,000 and 14,000 shares of common stock, respectively, have been excluded from the calculation of diluted net income per share as compared to 9,000 and 25,000 shares that were excluded for the three and six months ended June 30, 2017, as the result would have been antidilutive. For the three and six months ended June 30, 2018 and 2017, all unvested restricted stock awards were dilutive.

Note I – Income Taxes

The Company's provision for income taxes for the three and six months ended June 30, 2018 and 2017, respectively, is based on the estimated annual effective tax rate, plus discrete items. The following table presents the provision for income taxes and the effective tax rates for the three and six months ended June 30, 2018 and 2017:

STEVEN MADDEN, LTD. AND SUBSIDIARIES

Note I – Income Taxes (continued)

	Three months ended		Six months ended		
	June 30,		June 30,		
	2018	2017	2018	2017	
Income before provision for income taxes	\$42,617	\$42,605	\$79,771	\$74,068	
Provision for income taxes	\$10,172	13,582	18,128	24,523	
Effective tax rate	23.9	% 31.9	% 22.7	% 33.1	%

The primary difference between the Company's effective tax rates for the six months ended June 30, 2018 and 2017 is due to the reduction of the US statutory tax rate from 35% to 21%, which was imposed by the Tax Cuts and Jobs Act (the "Tax Cuts Act"). The effective tax rate may vary significantly due to fluctuations in the amount and source, including both foreign and domestic, of pretax income and changes in amounts of non-deductible expenses and other items that could impact the effective tax rate.

Provisional amounts in effective rate

The Tax Cuts Act, which was enacted on December 22, 2017, reduces the U.S. federal corporate income tax rate from 35% to 21%, requires companies to pay a one-time transition tax on earnings of certain foreign subsidiaries that were previously tax deferred and creates new taxes on certain foreign sourced earnings. We are applying the guidance in Staff Accounting Bulletin 118 when accounting for the enactment-date effects of the Tax Cuts Act. At June 30, 2018, we have not completed our accounting for all of the tax effects of the Tax Cuts Act. We will continue to make and refine our calculations as additional analysis is completed. Our estimates may also be affected as we gain a more thorough understanding of the Tax Cuts Act. These changes could be material to income tax expense.

Foreign tax effects

Transition Tax

The one-time transition tax is based on our total post-1986 earnings and profits ("E&P") which we had deferred from US income taxes under previous U.S. law. We originally recorded a provisional amount for our one-time transition tax liability attributable to our foreign subsidiaries, resulting in a transition tax liability of \$21,994 recorded in other liabilities at December 31, 2017. At this time, we are further analyzing the current estimate of our transition tax calculation to finalize it no later than the fourth quarter of 2018. As of June 30, 2018, the Company continues to have provisional amounts recorded for the one-time transition tax liability for which overpayments of 2017 tax payments have been offset against the one-time transition tax liability at June 30, 2018. As we continue to refine our E&P analysis, we will refine our calculations of the one-time transition tax, which could affect the measurement of this liability. No additional income taxes have been provided for any remaining undistributed foreign earnings not subject to the transition tax, or any additional outside basis difference inherent in these entities, as these amounts continue to be indefinitely reinvested in foreign operations.

Note J – Equity-Based Compensation

In March 2006, the Company's Board of Directors approved the Steven Madden, Ltd. 2006 Stock Incentive Plan, as amended (the "Plan"), under which nonqualified stock options, stock appreciation rights, performance shares, restricted stock, other stock-based awards, and performance-based cash awards may be granted to employees, consultants and non-employee directors. The following table summarizes the number of shares of common stock authorized for use under the Plan, the number of stock-based awards granted (net of expired or cancelled awards) under the Plan and the number of shares of common stock available for the grant of stock-based awards under the Plan:

As of June 30, 2018, there were unvested options relating to 1,233,849 shares of common stock outstanding with a total of \$10,055 of unrecognized compensation cost and an average vesting period of 2.9 years.

The Company uses the Black-Scholes option-pricing model to estimate the fair value of options granted, which requires several assumptions. The expected term of the options represents the estimated period of time until exercise and is based on the historical experience of similar awards. Expected volatility is based on the historical volatility of

the Company's common stock. The risk free interest rate is based on the U.S. Treasury yield curve in effect at the time of the grant. The dividend yield is based on the Company's annualized dividend per share amount divided by the Company's stock price. The following weighted average assumptions were used for stock options granted during the six months ended June 30, 2018 and 2017:

of \$17,396 less a working capital adjustment of \$901, plus potential earn-out payments based on the achievement of certain earnings targets for each of the twelve month periods ending on January 31, 2018 through 2023, inclusive. The fair value of the contingent payments were estimated using the present value of the payments based on management's projections of the financial results of Schwartz & Benjamin during the earn-out period and was finalized at \$20,617. Accordingly, the assets and liabilities of Schwartz & Benjamin were recorded at their fair values, and the excess of the purchase price over the fair value of the assets acquired and liabilities assumed, including identified intangible assets, was recorded as goodwill. The fair values assigned to tangible and intangible assets acquired and liabilities assumed are based on management's estimates and assumptions. The purchase price was allocated as follows:

Note P – Recent Accounting Pronouncements

Recently Adopted

In May 2014, the FASB issued new accounting guidance ("Topic 606"), Accounting Standards Update No. 2014-09 ("ASU 2014-09"), "Revenue from Contracts with Customers," on revenue recognition. The new standard is an update to Revenue Recognition Topic 605 and provides for a single five-step model to be applied to all revenue contracts with customers as well as requiring additional financial statement disclosures that will enable users to understand the nature, amount, timing and uncertainty of revenue and cash flows relating to customer contracts. Effective January 1, 2018, the Company adopted the requirements of Topic 606 using the cumulative effect adjustment approach. The impacts to the financial statements of this adoption are primarily related to balance sheet classification, including amounts associated with the change in balance sheet classification of the sales returns reserves, with no impact to the income statement as the Company's existing revenue recognition policies are in line with Topic 606.

In January 2016, the FASB issued Accounting Standards Update 2016-01 ("ASU 2016-01"), "Financial Instruments - Overall (Subtopic 825-10): Recognition and Measurement of Financial Assets and Financial Liabilities." ASU 2016-01 generally requires companies to measure investments in equity securities, except those accounted for under the equity method, at fair value and recognize any changes in fair value in net income. The new guidance must be applied using a modified-retrospective approach and is effective for periods beginning after December 15, 2017 and early adoption is not permitted. The Company adopted the provisions of ASU 2016-01 in the first quarter of 2018 and the adoption did not have a material impact on the Company's financial statements as the Company does not carry investments in equity securities.

In August 2016, the FASB issued Accounting Standards Update 2016-15 ("ASU 2016-15"), "Classification of Certain Cash Receipts and Cash Payments." ASU 2016-15 clarifies how certain cash receipts and payments should be presented in the statement of cash flows. The main provisions are related to certain types of debt, contingent consideration, insurance proceeds and equity method investee distributions. The guidance is effective for fiscal years beginning after December 15, 2017 and interim periods within those fiscal years with early adoption permitted. The

Company adopted the provisions of ASU 2016-15 in the first quarter of 2018. The adoption did not have a material impact on the Company's financial statements as the Company's current financial statements are in line with the provision.

Not Yet Adopted

In February 2018, the FASB issued Accounting Standards Update No. 2018-02 ("ASU 2018-02"), "Income Statement - Reporting Comprehensive Income (Topic 220): Reclassification of Certain Tax Effects from Accumulated Other Comprehensive Income,"

which allows for stranded tax effects in accumulated other comprehensive income resulting from the U.S. Tax Cuts and Jobs Act to be reclassified to retained earnings. ASU 2018-02 is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018. Early adoption is permitted. The Company is currently evaluating the impact of adopting the new standard and does not expect the new standard to have a material impact on the Company's financial position or results of operations.

In August 2017, the FASB issued Accounting Standards Update 2017-12 ("ASU 2017-12"), "Derivatives and Hedging (Topic 815): Targeted Improvements to Accounting for Hedging Activities." ASU 2017-12 changes the recognition and presentation requirements of hedge accounting. The guidance provides new alternatives for applying hedge accounting to additional hedging strategies and measuring the hedged item in fair value hedges of interest rate risk, as well as applies new alternatives for reducing the cost and complexity of applying hedge accounting by easing the requirements for effectiveness testing, hedge documentation and application of the critical terms match method, and reducing the risk of material error correction if a company applies the shortcut method inappropriately. The guidance is effective for annual and interim periods in fiscal years beginning after December 15, 2018 and early adoption is permitted any time after the issuance of ASU 2017-12, including in an interim period. The Company is currently evaluating the effect that the new guidance will have on its financial statements and related disclosures.

In June 2016, the FASB issued Accounting Standards Update 2016-13 ("ASU 2016-13"), "Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments." ASU 2016-13 replaces the incurred loss impairment methodology in current GAAP with a methodology that reflects expected credit losses and requires consideration of a broader range of reasonable and supportable information to inform credit loss estimates. The new guidance is effective for fiscal years beginning after December 15, 2019, including interim periods within those fiscal years. The Company is currently evaluating the effect that the new guidance will have on its financial statements and related disclosures.

In February 2016, the FASB issued Accounting Standards Update No. 2016-02 ("ASU 2016-02"), "Leases," which is effective for fiscal years, and interim periods within those years, beginning after December 15, 2018 with early adoption permitted. Under ASU 2016-02, lessees will be required to recognize for all leases with terms longer than twelve months, at the commencement date of the lease, a lease liability, which is a lessee's obligation to make lease payments arising from a lease measured on a discounted basis, and a right-to-use asset, which is an asset that represents the lessee's right to use or control the use of a specified asset for the lease term. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition. The Company is currently evaluating the effect that the new guidance will have on its financial statements and related disclosures and, although the analysis is not complete, it is currently expected to have a material impact on its financial statements and related disclosures.

In July 2018, the FASB issued Accounting Standards Updates No. 2018-10 and 2018-11 ("ASU 2018-10"), Leases, which make 16 technical corrections to the new leases standard and other accounting topics, alleviating unintended consequences resulting from applying ASU 2016-02. ASU 2018-10 does not make any substantive changes to the core provisions or principles of the new standard in ASC 2016-02 and its effective date will coincide with the effective date of the ASC 2016-02.

The Company's reported results are presented in accordance with generally accepted accounting principles in the United States ("GAAP"). In April 2018, the Board of Directors of the Company declared an additional quarterly cash dividend of \$0.20 per share on the Company's outstanding shares of common stock. The dividend was paid on June 29, 2018 to stockholders of record as of the close of business on June 12, 2018. The total cash dividends paid for the three months ended June 30, 2018 was \$11,716.

In July 2018, the Board of Directors of the Company declared an additional quarterly cash dividend of \$0.20 per share on the Company's outstanding shares of common stock. The dividend will be paid on September 28, 2018 to stockholders of record as of the close of business on September 18, 2018.

Therefore, we can give no assurance that cash dividends of any kind will be paid to holders of our common stock in the future.

INFLATION

We do not believe that inflation had a significant effect on our sales or profitability in the three months ended June 30, 2018. Historically, we have minimized the impact of product cost increases by increasing prices, changing suppliers and by improving operating efficiencies. However, no assurance can be given that we will be able to offset any such inflationary cost increases in the future.

OFF BALANCE SHEET ARRANGEMENTS

The Company has no off-balance sheet arrangements.

CRITICAL ACCOUNTING POLICIES AND THE USE OF ESTIMATES

Apart from the adoption of ASU 2014-09 (see Note F to the Condensed Consolidated Financial Statements included in this Quarterly Report), there have been no material changes to our critical accounting policies and the use of estimates from these disclosures reported in our Annual Report on Form 10-K for the fiscal year ended December 31, 2017 filed with the Securities and Exchange Commission on March 1, 2018.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

(\$ in thousands)

We do not engage in the trading of market risk sensitive instruments in the normal course of business. Our financing arrangements are subject to variable interest rates, primarily based on the prime rate and LIBOR. The terms of our collection agency agreements with Rosenthal & Rosenthal, Inc. can be found in the Liquidity and Capital Resources section of Item 2 and in Note C to the Condensed Consolidated Financial Statements included in this Quarterly Report.

As of June 30, 2018, we held marketable securities valued at \$66,449, which consist primarily of certificates of deposit and corporate bonds. The values of these securities may fluctuate as a result of changes in values, market interest rates and credit risk. We have the ability to hold these investments until maturity. In addition, any decline in interest rates would be expected to reduce our interest income.

We face market risk to the extent that our U.S. or foreign operations involve the transaction of business in foreign currencies. Also, our inventory purchases are primarily done in foreign jurisdictions and inventory purchases may be impacted by fluctuations in the exchange rates between the U.S. dollar and the local currencies of our contract manufacturers, which could have the effect of increasing the cost of goods sold in the future. We manage these risks primarily by denominating these purchases in U.S. dollars. To mitigate the risk of purchases that are denominated in foreign currencies we may enter into forward foreign exchange contracts for terms of no more than two years. A description of our accounting policies for derivative financial instruments is included in Note M to the Condensed Consolidated Financial Statements.

In the first six months of 2018, the Company entered into forward foreign exchange contracts totaling \$21,679. We performed a sensitivity analysis based on a model that measures the impact of a hypothetical change in foreign currency exchange rate to determine the effects that market risk exposures may have on the fair values of our forward foreign exchange contracts that were outstanding as of June 30, 2018. As of June 30, 2018, a 10% appreciation or depreciation of the U.S. dollar against the exchange rates for foreign currencies under forward foreign exchange contracts would result in a net increase or decrease, respectively, in the fair value of our derivatives portfolio of approximately \$2,250.

In addition, we are exposed to translation risk in connection with our foreign operations in Canada, Mexico, Europe, South Africa, China and Taiwan because our subsidiaries and joint ventures in these countries utilize the local currency as their functional currency and those financial results must be translated into U.S. dollars. As currency exchange rates fluctuate, foreign currency exchange rate translation adjustments reflected in our financial statements with respect to our foreign operations affects the comparability of financial results between years.

ITEM 4. CONTROLS AND PROCEDURES

As required by Rule 13a-15(b) of the Securities Exchange Act of 1934 (the "Exchange Act"), our management, including our Chief Executive Officer and Chief Financial Officer, has evaluated the effectiveness of our disclosure controls and procedures as of the end of the fiscal quarter covered by this Quarterly Report. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer have concluded that our disclosure controls and procedures (as defined in Rule 13a-15(e) under the Exchange Act) were, as of the end of the fiscal quarter covered by this Quarterly Report, effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and is accumulated and communicated to our management, including the Chief Executive Officer and Chief Financial Officer, to allow timely decisions regarding required disclosure.

As required by Rule 13a-15(d) under the Exchange Act, our management, including our Chief Executive Officer and Chief Financial Officer, has evaluated our internal controls over financial reporting to determine whether any changes occurred during the quarter

30

covered by this Quarterly Report that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting. Based on that evaluation, there has been no such change during the quarter covered by this Quarterly Report.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The Company has been named as a defendant in certain lawsuits in the normal course of business. In the opinion of management, after consulting with legal counsel, the liabilities, if any, resulting from these matters should not have a material effect on the Company's financial position or results of operations or cash flows. It is the policy of management to disclose the amount or range of reasonably possible losses in excess of recorded amounts.

ITEM 1A. RISK FACTORS

There have been no material changes in our risk factors from those disclosed in our 2017 Annual Report on Form 10-K, with the exception of the following:

Changes in trade policies and tariffs imposed by the United States government and the governments of other nations could have a material adverse effect on the Company's business and results of operations.

Our operations are dependent upon products purchased, manufactured and sold internationally. In 2018, the U.S. government imposed significant tariffs and created the potential for significant additional changes in trade policies, including tariffs and government regulations affecting trade between the United States and countries where we purchase, manufacture and sell out products. The potential changes being discussed include the renegotiation or termination of trade agreements and the imposition of higher tariffs on imports into the United States from key trade partners, including China, Canada, and Mexico. Such actions could increase the cost to us to manufacture and import our products into the United States. Also, several countries have imposed significant tariffs on goods imported from the United States and have created the potential for additional, retaliatory tariffs. Any such actions could cause increases in the prices at which we sell our merchandise to customers outside the United States. These governmental actions related to tariffs or international trade agreements or policies have the potential to reduce demand for our products and increase our costs and to materially adversely impact our business and results of operations.
