ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 (NO FEE REQUIRED)
For the fiscal year ended December 31, 2016
Or
 TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934 (NO FEE REQUIRED)
For the transition period from _____ to _____

Commission file number 0-11129
COMMUNITY TRUST BANCORP, INC.
(Exact Name of Registrant as Specified in its Charter)

Kentucky	61-0979818
(State or Other Jurisdiction of Incorporation or Organization)	(IRS Employer Identification No.)
346 North Mayo Trail	41501
Pikeville, Kentucky	(Zip Code)
(Address of Principal Executive Offices)	
(606) 432-1414	
(Registrant's Telephone Number)	

Securities registered pursuant to Section 12(b) of the Act:

Common Stock, \$5.00 par value	The NASDAQ Stock Market LLC
(Title of Class)	(Name of Exchange on Which Registered)

Securities registered pursuant to Section 12(g) of the Act:
None

Indicate by check mark if the registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act.

Yes No

Indicate by check mark if the registrant is not required to file reports pursuant to Section 13 or Section 15(d) of the Act.

Yes No

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports) and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every interactive data file required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files.)

Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K. []

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See definition of "accelerated filer, large accelerated filer, and smaller reporting company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer Non-accelerated filer Smaller reporting company
(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Based upon the closing price of the Common Shares of the Registrant on the NASDAQ-Stock Market LLC – Global Select Market, the aggregate market value of voting stock held by non-affiliates of the Registrant as of June 30, 2016 was \$578.0 million. For the purpose of the foregoing calculation only, all directors and executive officers of the Registrant have been deemed affiliates. The number of shares outstanding of the Registrant's Common Stock as of February 28, 2017 was 17,660,868.

DOCUMENTS INCORPORATED BY REFERENCE

Part III of this Form 10-K incorporates by reference certain information from Registrant's Proxy Statement for the Annual Meeting of Shareholders to be held on April 25, 2017.

CAUTIONARY STATEMENT
REGARDING FORWARD LOOKING STATEMENTS

Certain of the statements contained herein that are not historical facts are forward-looking statements within the meaning of the Private Securities Litigation Reform Act. Community Trust Bancorp, Inc.'s ("CTBI") actual results may differ materially from those included in the forward-looking statements. Forward-looking statements are typically identified by words or phrases such as "believe," "expect," "anticipate," "intend," "estimate," "may increase," "may fluctuate," similar expressions or future or conditional verbs such as "will," "should," "would," and "could." These forward-looking statements involve risks and uncertainties including, but not limited to, economic conditions, portfolio growth, the credit performance of the portfolios, including bankruptcies, and seasonal factors; changes in general economic conditions including the performance of financial markets, prevailing inflation and interest rates, realized gains from sales of investments, gains from asset sales, and losses on commercial lending activities; results of various investment activities; the effects of competitors' pricing policies, changes in laws and regulations, competition, and demographic changes on target market populations' savings and financial planning needs; industry changes in information technology systems on which we are highly dependent; failure of acquisitions to produce revenue enhancements or cost savings at levels or within the time frames originally anticipated or unforeseen integration difficulties; and the resolution of legal proceedings and related matters. In addition, the banking industry in general is subject to various monetary, operational, and fiscal policies and regulations, which include, but are not limited to, those determined by the Federal Reserve Board, the Federal Deposit Insurance Corporation, the Consumer Financial Protection Bureau, and state regulators, whose policies, regulations, and enforcement actions could affect CTBI's results. These statements are representative only on the date hereof, and CTBI undertakes no obligation to update any forward-looking statements made.

PART I

Item 1. Business

Community Trust Bancorp, Inc. ("CTBI") is a bank holding company registered with the Board of Governors of the Federal Reserve System pursuant to Section 5(a) of the Bank Holding Company Act of 1956, as amended. CTBI was incorporated August 12, 1980, under the laws of the Commonwealth of Kentucky for the purpose of becoming a bank holding company. Currently, CTBI owns all the capital stock of one commercial bank and one trust company, serving small and mid-sized communities in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. The commercial bank is Community Trust Bank, Inc., Pikeville, Kentucky ("CTB") and the trust company is Community Trust and Investment Company, Lexington, Kentucky.

At December 31, 2016, CTBI had total consolidated assets of \$3.9 billion and total consolidated deposits, including repurchase agreements, of \$3.3 billion. Total shareholders' equity at December 31, 2016 was \$500.6 million. Trust assets under management at December 31, 2016 were \$2.1 billion, including CTB's investment portfolio totaling \$0.6 billion.

Through its subsidiaries, CTBI engages in a wide range of commercial and personal banking and trust and wealth management activities, which include accepting time and demand deposits; making secured and unsecured loans to corporations, individuals and others; providing cash management services to corporate and individual customers; issuing letters of credit; renting safe deposit boxes; and providing funds transfer services. The lending activities of CTB include making commercial, construction, mortgage, and personal loans. Lease-financing, lines of credit, revolving lines of credit, term loans, and other specialized loans, including asset-based financing, are also available.

Our corporate subsidiaries act as trustees of personal trusts, as executors of estates, as trustees for employee benefit trusts, as paying agents for bond and stock issues, as investment agent, as depositories for securities, and as providers of full service brokerage and insurance services.

COMPETITION

CTBI's subsidiaries face substantial competition for deposit, credit, trust, wealth management, and brokerage relationships in the communities we serve. Competing providers include state banks, national banks, thrifts, trust companies, insurance companies, mortgage banking operations, credit unions, finance companies, brokerage companies, and other financial and non-financial companies which may offer products functionally equivalent to those offered by our subsidiaries. As financial services become increasingly dependent on technology, permitting transactions to be conducted by telephone, mobile banking, and the internet, non-bank institutions are able to attract funds and provide lending and other financial services without offices located in our market areas. Many of our nonbank competitors have fewer regulatory constraints, broader geographic service areas, greater capital and, in some cases, lower cost structures. In addition, competition for quality customers has intensified as a result of changes in regulation, consolidation among financial service providers, and advances in technology and product delivery systems. Many of these providers offer services within and outside the market areas served by our subsidiaries. We strive to offer competitively priced products along with quality customer service to build customer relationships in the communities we serve.

The United States and global markets, as well as general economic conditions, have been volatile. Some financial institutions have failed and others have been forced to seek acquisition partners. Larger financial institutions could strengthen their competitive position as a result of ongoing consolidation within the financial services industry.

Banking legislation in Kentucky places no limits on the number of banks or bank holding companies that a bank holding company may acquire. Interstate acquisitions are allowed where reciprocity exists between the laws of Kentucky and the home state of the bank or bank holding company to be acquired. Bank holding companies continue to be limited to control of less than 15% of deposits held by banks in the states where they do business (exclusive of inter-bank and foreign deposits). Competition for deposits may be increasing as a consequence of FDIC assessments shifting from deposits to an asset based formula, as larger banks may move away from non-deposit funding sources.

No material portion of our business is seasonal. We are not dependent upon any one customer or a few customers, and the loss of any one or a few customers would not have a material adverse effect on us. See note 19 to the consolidated financial statements for additional information regarding concentrations of credit.

We do not engage in any operations in foreign countries.

EMPLOYEES

As of December 31, 2016, CTBI and subsidiaries had 996 full-time equivalent employees. Our employees are provided with a variety of employee benefits. A retirement plan, an employee stock ownership plan, group life insurance, major medical insurance, a cafeteria plan, and management and employee incentive compensation plans are available to all eligible personnel.

SUPERVISION AND REGULATION

General

We, as a registered bank holding company, are restricted to those activities permissible under the Bank Holding Company Act of 1956, as amended, and are subject to actions of the Board of Governors of the Federal Reserve System thereunder. We are required to file an annual report with the Federal Reserve Board and are subject to an

annual examination by the Board.

Community Trust Bank, Inc. is a state-chartered bank subject to state and federal banking laws and regulations and periodic examination by the Kentucky Department of Financial Institutions and the restrictions, including dividend restrictions, thereunder. CTB is also a member of the Federal Reserve System and is subject to certain restrictions imposed by and to examination and supervision under the Federal Reserve Act. Community Trust and Investment Company is also regulated by the Kentucky Department of Financial Institutions and the Federal Reserve.

Deposits of CTB are insured up to applicable limits by the Federal Deposit Insurance Corporation (FDIC), which subjects banks to regulation and examination under the provisions of the Federal Deposit Insurance Act.

The operations of CTBI and our subsidiaries are also affected by other banking legislation and policies and practices of various regulatory authorities. Such legislation and policies include statutory maximum rates on some loans, reserve requirements, domestic monetary and fiscal policy, and limitations on the kinds of services that may be offered.

CTBI's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports are available free of charge on our website at www.ctbi.com as soon as reasonably practicable after such materials are electronically filed with or furnished to the Securities and Exchange Commission. CTBI's Code of Business Conduct and Ethics and other corporate governance documents are also available on our website. Copies of our annual report will be made available free of charge upon written request to:

Basel III

On July 2, 2013, the Federal Reserve approved final rules that substantially amend the regulatory risk-based capital rules applicable to CTBI and CTB. The FDIC subsequently approved these rules. The final rules implement the "Basel III" regulatory capital reforms and changes required by the Dodd-Frank Wall Street Reform and Consumer Protection Act ("Dodd-Frank Act").

The rules include new risk-based capital and leverage ratios, which are being phased in from 2015 to 2019, and refine the definition of what constitutes "capital" for purposes of calculating those ratios. The new minimum capital level requirements applicable to CTBI and CTB under the final rules are: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4% for all institutions. The final rules also establish a "capital conservation buffer" above the new regulatory minimum capital requirements, which must consist entirely of common equity Tier 1 capital. The capital conservation buffer began to be phased in on January 1, 2016 at 0.625% of risk-weighted assets and will increase by 0.625% annually until fully implemented in January 2019. An institution is subject to limitations on certain activities including payment of dividends, share repurchases, and discretionary bonuses to executive officers if its capital level is below the capital conservation buffer amount.

The final rules also implement revisions and clarifications consistent with Basel III regarding the various components of Tier 1 capital, including common equity, unrealized gains and losses, as well as certain instruments that will no longer qualify as Tier 1 capital, some of which will be phased out over time. However, the final rules provide that small depository institution holding companies with less than \$15 billion in total assets as of December 31, 2009 (which includes CTBI) will be able to permanently include non-qualifying instruments that were issued and included

in Tier 1 or Tier 2 capital prior to May 19, 2010 in additional Tier 1 or Tier 2 capital until they redeem such instruments or until the instruments mature.

The final rules also contain revisions to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions, including the Bank, if their capital levels begin to show signs of weakness. These revisions took effect January 1, 2015. Under the prompt corrective action requirements, which are designed to complement the capital conservation buffer, insured depository institutions are required to meet the following increased capital level requirements in order to qualify as “well capitalized:” (i) a new common equity Tier 1 capital ratio of 6.5%; (ii) a Tier 1 capital ratio of 8% (increased from 6%); (iii) a total capital ratio of 10% (unchanged from previous rules); and (iv) a Tier 1 leverage ratio of 5% (unchanged from previous rules).

The final rules set forth certain changes for the calculation of risk-weighted assets, which we were required to utilize beginning January 1, 2015. The standardized approach final rule utilizes an increased number of credit risk exposure categories and risk weights, and also addresses: (i) an alternative standard of creditworthiness consistent with Section 939A of the Dodd-Frank Act; (ii) revisions to recognition of credit risk mitigation; (iii) rules for risk weighting of equity exposures and past due loans; (iv) revised capital treatment for derivatives and repo-style transactions; and (v) disclosure requirements for top-tier banking organizations with \$50 billion or more in total assets that are not subject to the “advance approach rules” that apply to banks with greater than \$250 billion in consolidated assets. We currently satisfy the well-capitalized and capital conservation buffer standards, and based on our current capital composition and levels, we anticipate that our capital ratios, on a Basel III basis, will continue to exceed the well-capitalized minimum capital requirements and the capital conservation buffer standards.

Item 1A. Risk Factors

An investment in our common stock is subject to risks inherent to our business. The material risks and uncertainties that management believes affect us are described below. Before making an investment decision, you should carefully consider the risks and uncertainties described below, together with all of the other information included or incorporated by reference herein. The risks and uncertainties described below are not the only ones facing us. Additional risks and uncertainties that management is not aware of or focused on or that management currently deems immaterial may also impair our business operations. This report is qualified in its entirety by these risk factors. See also, “Cautionary Statement Regarding Forward-Looking Statements.” If any of the following risks actually occur, our financial condition and results of operations could be materially and adversely affected. If this were to happen, the value of our common stock could decline significantly, and you could lose all or part of your investment.

Economic Risk

CTBI may continue to be adversely affected by economic and market conditions.

Beginning in 2008, the U.S. economy faced a severe economic crisis including a major recession from which it is recovering. Commerce and business growth in certain regions in the U.S. remains reduced and local governments and many businesses continue to experience financial difficulty. In some areas of the U.S., including certain parts of our service area, unemployment levels remain elevated. There can be no assurance that these conditions will continue to improve and these conditions could worsen. In addition, the level of U.S. debt, the Federal Open Market Committee’s plan for economic stabilization, potential volatility in oil prices, potential U.S. tax law modifications, and the repeal of the Patient Protection and Affordable Care Act and the implementation of replacement healthcare legislation may have a destabilizing effect on financial markets or a negative effect on the economy.

Our financial performance generally, and in particular the ability of borrowers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services we offer, is highly dependent upon the business environment in the markets where we operate, in the states of Kentucky, West Virginia, and Tennessee and in the United States as a whole. While unemployment rates have

improved in many areas of the United States, unemployment rates remain elevated in certain markets in which we operate. A favorable business environment is generally characterized by, among other factors, economic growth, efficient capital markets, low inflation, low unemployment, high business and investor confidence, and strong business earnings. Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity, or investor or business confidence; limitations on the availability or increases in the cost of credit and capital; increases in inflation or interest rates; high unemployment; natural disasters; or a combination of these or other factors.

Overall, during recent years, the business environment has been adverse for many households and businesses in the United States and worldwide. While economic conditions in the United States and worldwide have improved since the recession, there can be no assurance that this improvement will continue or that another recession will not occur. Economic pressure on consumers and uncertainty regarding continuing economic improvement may result in changes in consumer and business spending, borrowing, and savings habits. Such conditions could adversely affect the credit quality of our loans and our business, financial condition, and results of operations.

Economy of Our Markets

Our business may continue to be adversely affected by ongoing weaknesses in the local economies on which we depend.

Our loan portfolio is concentrated primarily in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. Our profits depend on providing products and services to clients in these local regions. While unemployment rates have improved in many areas of the United States, unemployment rates remain elevated in certain markets in which we operate. Increases in unemployment, decreases in real estate values, or increases in interest rates could weaken the local economies in which we operate. These economic indicators typically affect certain industries, such as real estate and financial services, more significantly. High levels of unemployment and depressed real estate asset values in certain of the markets we serve would likely prolong the economic recovery period in our market area. Also, our growth within certain of our markets may be adversely affected by the lack of population growth in such markets in recent years. Weakness in our market area could depress our earnings and consequently our financial condition because:

- Clients may not want, need, or qualify for our products and services;
- Borrowers may not be able to repay their loans;
- The value of the collateral securing our loans to borrowers may decline; and
- The quality of our loan portfolio may decline.

Mortgage Assistance Risk

As government funded mortgage assistance programs lapse, consumer real estate defaults may increase.

During the economic recession, various legislation was enacted designed to assist those hit hardest through economic subsidies. These subsidies most often came in the form of mortgage payment assistance or mortgage note restructuring. Examples of these programs include: Consumer Financial Protection Bureau Alternatives to Foreclosure In House Modification Program, Kentucky Housing Unemployed Bridge Loan Program, Tennessee Hardest Hit Fund, Home Affordable Modification Program Home Affordable Refinance Program, and Freddie Mac Alternatives to Foreclosure. As these programs sunset or as the participants complete their eligibility in the program(s), we may experience significantly higher levels of past due mortgage loans and default rates.

Interest Rate Risk

Changes in interest rates could adversely affect our earnings and financial condition.

Our earnings and financial condition are dependent to a large degree upon net interest income, which is the difference between interest earned from loans and investments and interest paid on deposits and borrowings. The narrowing of interest-rate spreads, meaning the difference between the interest rates earned on loans and investments and the

interest rates paid on deposits and borrowings, could adversely affect our earnings and financial condition. Interest rates are highly sensitive to many factors, including:

- The rate of inflation;
- The rate of economic growth;
- Employment levels;
- Monetary policies; and
- Instability in domestic and foreign financial markets.

Changes in market interest rates will also affect the level of voluntary prepayments on our loans and the receipt of payments on our mortgage-backed securities resulting in the receipt of proceeds that may be reinvested at a lower rate than the loan or mortgage-backed security being prepaid.

We originate residential loans for sale and for our portfolio. The origination of loans for sale is designed to meet client financing needs and earn fee income. The origination of loans for sale is highly dependent upon the local real estate market and the level and trend of interest rates. Increasing interest rates may reduce the origination of loans for sale and consequently the fee income we earn. While our commercial banking, construction, and income property business lines remain a significant portion of our activities, high interest rates may reduce our mortgage-banking activities and thereby our income. In contrast, decreasing interest rates have the effect of causing clients to refinance mortgage loans faster than anticipated. This causes the value of assets related to the servicing rights on loans sold to be lower than originally anticipated. If this happens, we may need to write down our servicing assets faster, which would accelerate our expense and lower our earnings.

We consider interest rate risk one of our most significant market risks. Interest rate risk is the exposure to adverse changes in net interest income due to changes in interest rates. Consistency of our net interest revenue is largely dependent upon the effective management of interest rate risk. We employ a variety of measurement techniques to identify and manage our interest rate risk including the use of an earnings simulation model to analyze net interest income sensitivity to changing interest rates. The model is based on actual cash flows and repricing characteristics for on and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain financial assets and liabilities. Assumptions based on the historical behavior of deposit rates and balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain, and as a result, the model cannot precisely measure net interest income or precisely predict the impact of fluctuations in interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

Liquidity Risk

CTBI is subject to liquidity risk.

CTBI requires liquidity to meet its deposit and debt obligations as they come due and to fund loan demands. CTBI's access to funding sources in amounts adequate to finance its activities or on terms that are acceptable to it could be impaired by factors that affect it specifically or the financial services industry or economy in general. Factors that could reduce its access to liquidity sources include a downturn in the market, difficult credit markets, or adverse regulatory actions against CTBI. CTBI's access to deposits may also be affected by the liquidity needs of its depositors. In particular, a substantial majority of CTBI's liabilities are demand, savings, interest checking, and money market deposits, which are payable on demand or upon several days' notice, while by comparison, a substantial portion of its assets are loans, which cannot be called or sold in the same time frame. To the extent that consumer confidence in other investment vehicles, such as the stock market, increases, customers may move funds from bank deposits and products into such other investment vehicles. Although CTBI historically has been able to replace maturing deposits and advances as necessary, it might not be able to replace such funds in the future, especially if a large number of its depositors sought to withdraw their accounts, regardless of the reason. A failure to maintain adequate liquidity could have a material adverse effect on our financial condition and results of operations.

Banking Reform

Our business may be adversely affected by “banking reform” legislation.

On July 2, 2013, the Federal Reserve approved final rules that substantially amend the regulatory risk-based capital rules applicable to CTBI and CTB. The FDIC subsequently approved these rules. The final rules implement the “Basel III” regulatory capital reforms and changes required by the Dodd-Frank Act.

The rules include new risk-based capital and leverage ratios, which are being phased in from 2015 to 2019, and refine the definition of what constitutes “capital” for purposes of calculating those ratios. The new minimum capital level requirements applicable to CTBI and CTB under the final rules are: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4% for all institutions. The final rules also establish a “capital conservation buffer” above the new regulatory minimum capital requirements, which must consist entirely of common equity Tier 1 capital. The capital conservation buffer began to be phased in on January 1, 2016 at 0.625% of risk-weighted assets and will increase by 0.625% annually until fully implemented in January 2019. An institution is subject to limitations on certain activities including payment of dividends, share repurchases, and discretionary bonuses to executive officers if its capital level is below the capital conservation buffer amount.

The final rules also implement revisions and clarifications consistent with Basel III regarding the various components of Tier 1 capital, including common equity, unrealized gains and losses, as well as certain instruments that will no longer qualify as Tier 1 capital, some of which will be phased out over time. However, the final rules provide that small depository institution holding companies with less than \$15 billion in total assets as of December 31, 2009 (which includes CTBI) will be able to permanently include non-qualifying instruments that were issued and included in Tier 1 or Tier 2 capital prior to May 19, 2010 in additional Tier 1 or Tier 2 capital until they redeem such instruments or until the instruments mature.

The final rules also contain revisions to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions, including the Bank, if their capital levels begin to show signs of weakness. These revisions took effect January 1, 2015. Under the prompt corrective action requirements, which are designed to complement the capital conservation buffer, insured depository institutions are required to meet the following increased capital level requirements in order to qualify as “well capitalized:” (i) a new common equity Tier 1 capital ratio of 6.5%; (ii) a Tier 1 capital ratio of 8% (increased from 6%); (iii) a total capital ratio of 10% (unchanged from previous rules); and (iv) a Tier 1 leverage ratio of 5% (unchanged from previous rules).

The final rules set forth certain changes for the calculation of risk-weighted assets, which we were required to utilize beginning January 1, 2015. The standardized approach final rule utilizes an increased number of credit risk exposure categories and risk weights, and also addresses: (i) an alternative standard of creditworthiness consistent with Section 939A of the Dodd-Frank Act; (ii) revisions to recognition of credit risk mitigation; (iii) rules for risk weighting of equity exposures and past due loans; (iv) revised capital treatment for derivatives and repo-style transactions; and (v) disclosure requirements for top-tier banking organizations with \$50 billion or more in total assets that are not subject to the “advance approach rules” that apply to banks with greater than \$250 billion in consolidated assets. We currently satisfy the well-capitalized and capital conservation buffer standards, and based on our current capital composition and levels, we anticipate that our capital ratios, on a Basel III basis, will continue to exceed the well-capitalized minimum capital requirements and capital conservation buffer standards.

Government Policies and Oversight

Our business may be adversely affected by changes in government policies and oversight.

The earnings of banks and bank holding companies such as ours are affected by the policies of regulatory authorities, including the Federal Reserve Board, which regulates the money supply. Among the methods employed by the

Federal Reserve Board are open market operations in U.S. Government securities, changes in the discount rate on member bank borrowings, and changes in reserve requirements against member bank deposits. These methods are used in varying combinations to influence overall growth and distribution of bank loans, investments and deposits, and their use may also affect interest rates charged on loans or paid on deposits. The monetary policies of the Federal Reserve Board have had a significant effect on the operating results of commercial and savings banks in the past and are expected to continue to do so in the future.

Many states and municipalities are experiencing financial stress. As a result, various levels of government have sought to increase their tax revenues through increased tax levies, which could have an adverse impact on our results of operations.

In recent years, federal banking regulators have increased regulatory scrutiny, and additional limitations (including those contained in the Dodd-Frank Act) on financial institutions have been proposed or adopted by regulators and by Congress. Moreover, banking regulatory agencies have increasingly over the last few years used authority under Section 5 of the Federal Trade Commission Act to take supervisory or enforcement action with respect to alleged unfair or deceptive acts or practices by banks to address practices that may not necessarily fall within the scope of a specific banking or consumer finance law. The banking industry is highly regulated and changes in federal and state banking regulations as well as policies and administration guidelines may affect our practices, growth prospects, and earnings. In particular, there is no assurance that governmental actions designed to stabilize the economy and banking system will not adversely affect the financial position or results of operations of CTBI.

From time to time, CTBI and/or its subsidiaries may be involved in information requests, reviews, investigations, and proceedings (both formal and informal) by various governmental agencies and law enforcement authorities regarding our respective businesses. Any of these matters may result in material adverse consequences to CTBI and its subsidiaries, including adverse judgements, findings, limitations on merger and acquisition activity, settlements, fines, penalties, orders, injunctions, and other actions. Such adverse consequences may be material to the financial position of CTBI or its results of operations.

In particular, consumer products and services are subject to increasing regulatory oversight and scrutiny with respect to compliance with consumer laws and regulations. We may face a greater number or wider scope of investigations, enforcement actions, and litigation in the future related to consumer practices. In addition, any required changes to our business operations resulting from these developments could result in a significant loss of revenue, require remuneration to customers, trigger fines or penalties, limit the products or services we offer, require us to increase certain prices and therefore reduce demand for our products, impose additional compliance costs on us, cause harm to our reputation, or otherwise adversely affect our consumer business.

On February 3, 2017, President Trump issued an executive order directing the Secretary of the Treasury to consult with the heads of members agencies of the Financial Stability Oversight Council and identify federal regulations that inhibit certain core principles, including making regulation efficient, effective and appropriately tailored. While this process may lead to the revision or easing of some regulations applicable to us, there can be no assurance that the regulatory environment for financial institutions will become more favorable.

Credit Risk

Our earnings and reputation may be adversely affected if we fail to effectively manage our credit risk.

Originating and underwriting loans are integral to the success of our business. This business requires us to take “credit risk,” which is the risk of losing principal and interest income because borrowers fail to repay loans. Collateral values and the ability of borrowers to repay their loans may be affected at any time by factors such as:

- The length and severity of downturns in the local economies in which we operate or the national economy;
- The length and severity of downturns in one or more of the business sectors in which our customers operate, particularly the automobile, hotel/motel, coal, and residential development industries; or

· A rapid increase in interest rates.

Our loan portfolio includes loans with a higher risk of loss.

We originate commercial real estate loans, construction and development loans, consumer loans, and residential mortgage loans, primarily within our market area. Commercial real estate, commercial, and construction and development loans tend to involve larger loan balances to a single borrower or groups of related borrowers and are most susceptible to a risk of loss during a downturn in the business cycle. These loans also have historically had a greater credit risk than other loans for the following reasons:

Commercial Real Estate Loans. Repayment is dependent on income being generated in amounts sufficient to cover operating expenses and debt service. As of December 31, 2016, commercial real estate loans, including multi-family loans, comprised approximately 37% of our total loan portfolio.

Other Commercial Loans. Repayment is generally dependent upon the successful operation of the borrower's business. In addition, the collateral securing the loans may depreciate over time, be difficult to appraise, be illiquid, or fluctuate in value based on the success of the business. As of December 31, 2016, other commercial loans comprised approximately 12% of our total loan portfolio.

Construction and Development Loans. The risk of loss is largely dependent on our initial estimate of whether the property's value at completion equals or exceeds the cost of property construction and the availability of take-out financing. During the construction phase, a number of factors can result in delays or cost overruns. If our estimate is inaccurate or if actual construction costs exceed estimates, the value of the property securing our loan may be insufficient to ensure full repayment when completed through a permanent loan, sale of the property, or by seizure of collateral. As of December 31, 2016, construction and development loans comprised approximately 4% of our total loan portfolio.

Consumer loans may carry a higher degree of repayment risk than residential mortgage loans, particularly when the consumer loan is unsecured. Repayment of a consumer loan typically depends on the borrower's financial stability, and it is more likely to be affected adversely by job loss, illness, or personal bankruptcy. In addition, federal and state bankruptcy, insolvency, and other laws may limit the amount we can recover when a consumer client defaults. As of December 31, 2016, consumer loans comprised approximately 20% of our total loan portfolio.

A significant part of our lending business is focused on small to medium-sized business which may be impacted more severely during periods of economic weakness.

A significant portion of our commercial loan portfolio is tied to small to medium-sized businesses in our markets. During periods of economic weakness, small to medium-sized businesses may be impacted more severely than larger businesses. As a result, the ability of smaller businesses to repay their loans may deteriorate, particularly if economic challenges persist over a period of time, and such deterioration would adversely impact our results of operations and financial condition.

A large percentage of our loan portfolio is secured by real estate, in particular commercial real estate. Weakness in the real estate market or other segments of our loan portfolio would lead to additional losses, which could have a material adverse effect on our business, financial condition, and results of operations.

As of December 31, 2016, approximately 68% of our loan portfolio is secured by real estate, 39% of which is commercial real estate. High levels of commercial and consumer delinquencies or declines in real estate market values could require increased net charge-offs and increases in the allowance for loan and lease losses, which could have a material adverse effect on our business, financial condition, and results of operations and prospects.

Our level of other real estate owned remains above our historical norm, primarily as a result of foreclosures. To the extent that we continue to hold a higher level of other real estate owned, related real estate expense will likely remain high.

During the economic downturn which began in 2008, we experienced an increase in nonperforming real estate loans. As a result, we have experienced, and we continue to experience, an increased level of foreclosed properties. Foreclosed real estate expense consists of maintenance costs, taxes, valuation adjustments to appraisal values, and gains or losses on disposition. The amount that we may realize after a default is dependent upon factors outside of our control, including but not limited to: (i) general and local economic conditions; (ii) neighborhood values; (iii) interest rates; (iv) real estate tax rates; (v) operating expenses of the properties; (vi) environmental remediation liabilities; (vii) ability to obtain and maintain occupancy of the properties; (viii) zoning laws; (ix) governmental rules, regulations, and fiscal policies; (x) potential vandalism; and (xi) acts of God. Expenditures associated with the ownership of real estate, such as real estate taxes, insurance, and maintenance costs, may adversely affect income from the real estate. The cost of operating real property may exceed the income earned from the property, and we may need to advance funds in order to protect our investment in the property, or we may be required to dispose of the property at a loss. If our levels of other real estate owned increase or are sustained and local real estate values decline, our foreclosed real estate expense will increase, which would adversely impact our results of operations.

As of December 31, 2016, forty-two percent (based on book value) of our foreclosed properties had been held by us for over five years. Regulatory approval is required and has been obtained to hold these properties beyond the initial period of five years. Additional approval may be required to continue to hold these properties in the event they are not liquidated during the extension period, which is typically one year. While we have previously received regulatory approval to continue to hold foreclosed properties for over five years, to the extent such approval is not obtained in the future with respect to a foreclosed property, we might be forced to liquidate such property at a price less than its appraised value.

Environmental Liability Risk

We are subject to environmental liability risk associated with lending activity.

A significant portion of our loan portfolio is secured by real property. During the ordinary course of business, we may foreclose on and take title to properties securing loans. In doing so, there is a risk that hazardous or toxic substances could be found on these properties. If hazardous or toxic substances are found, we may be liable for remediation costs, as well as for personal injury and property damage. Environmental laws may require us to incur substantial expenses and may materially reduce the affected property's value or limit our ability to use or sell the affected property. In addition, future laws or more stringent interpretations or enforcement policies with respect to existing laws may increase our exposure to environmental liability. Although we have policies and procedures to perform an environmental review before initiating any foreclosure action on real property, these reviews may not be sufficient to detect all potential environmental hazards. The remediation costs and any other financial liabilities associated with an environmental hazard could have a material adverse effect on our financial condition and results of operations.

Competition

Strong competition within our market area may reduce our ability to attract and retain deposits and originate loans.

We face competition both in originating loans and in attracting deposits. Competition in the financial services industry is intense. We compete for clients by offering excellent service and competitive rates on our loans and deposit products. The type of institutions we compete with include commercial banks, savings institutions, mortgage banking firms, credit unions, finance companies, mutual funds, insurance companies and brokerage and investment banking firms. Competition arises from institutions located within and outside our market areas. As financial services become increasingly dependent on technology, permitting transactions to be conducted by telephone, mobile banking, and the internet, non-bank institutions are able to attract funds and provide lending and other financial services without offices located in our market areas. As a result of their size and ability to achieve economies of scale, certain of our

competitors offer a broader range of products and services than we offer. With the increased consolidation in the financial industry, larger financial institutions may strengthen their competitive positions. In addition, to stay competitive in our markets we may need to adjust the interest rates on our products to match the rates offered by our competitors, which could adversely affect our net interest margin. As a result, our profitability depends upon our continued ability to successfully compete in our market areas while achieving our investment objectives.

Technology and other changes are allowing consumers to complete financial transactions through alternative methods to those which historically involved banks. For example, consumers can now hold funds that would have been held as bank deposits in mutual funds, brokerage accounts, or general purpose reloadable prepaid cards. In addition, consumers can complete transactions, such as paying bills or transferring funds, directly without utilizing the services of a bank. The process of eliminating banks as intermediaries (known as disintermediation), could result in the loss of fee income, as well as the loss of deposits and the income that might be generated from those deposits. The related revenue reduction could adversely affect our financial condition, cash flows, and results of operations.

Acquisition Risk

We may have difficulty in the future continuing to grow through acquisitions.

We may experience difficulty in making acquisitions on acceptable terms due to the decreasing number of suitable acquisition targets, competition for attractive acquisitions, regulatory impediments, and certain limitations on interstate acquisitions.

Any future acquisitions or mergers by CTBI or its banking subsidiary are subject to approval by the appropriate federal and state banking regulators. The banking regulators evaluate a number of criteria in making their approval decisions, such as:

- Safety and soundness guidelines;

- Compliance with all laws including the USA Patriot Act, the International Money Laundering Abatement and Anti-Terrorist Financing Act, the Sarbanes-Oxley Act and the related rules and regulations promulgated under such Act or the Exchange Act, the Equal Credit Opportunity Act, the Fair Housing Act, the Community Reinvestment Act, the Home Mortgage Disclosure Act, and all other applicable fair lending and consumer protection laws and other laws relating to discriminatory business practices; and

- Anti-competitive concerns with the proposed transaction.

If the banking regulators or a commenter on our regulatory application raise concerns about any of these criteria at the time a regulatory application is filed, the banking regulators may deny, delay, or condition their approval of a proposed transaction. As more fully described under “Results of Operations and Financial Condition” in Item 7, the resolution of a Federal Reserve investigation in 2014 has resulted in impediments to CTBI’s merger and acquisition activity for an unspecified period of time.

We have grown, and, subject to regulatory approval, intend to continue to grow, through acquisitions of banks and other financial institutions. After these acquisitions, we may experience adverse changes in results of operations of acquired entities, unforeseen liabilities, asset quality problems of acquired entities, loss of key personnel, loss of clients because of change of identity, difficulties in integrating data processing and operational procedures, and deterioration in local economic conditions. These various acquisition risks can be heightened in larger transactions.

Integration Risk

We may not be able to achieve the expected integration and cost savings from our bank acquisition activities.

We have a long history of acquiring financial institutions and, subject to regulatory approval, we expect this acquisition activity to continue in the future. Difficulties may arise in the integration of the business and operations of the financial institutions that agree to merge with and into CTBI and, as a result, we may not be able to achieve the cost savings and synergies that we expect will result from the merger activities. Achieving cost savings is dependent

on consolidating certain operational and functional areas, eliminating duplicative positions and terminating certain agreements for outside services. Additional operational savings are dependent upon the integration of the banking businesses of the acquired financial institution with that of CTBI, including the conversion of the acquired entity's core operating systems, data systems and products to those of CTBI and the standardization of business practices. Complications or difficulties in the conversion of the core operating systems, data systems, and products of these other banks to those of CTBI may result in the loss of clients, damage to our reputation within the financial services industry, operational problems, one-time costs currently not anticipated by us, and/or reduced cost savings resulting from the merger activities.

Operational Risk

An extended disruption of vital infrastructure or a security breach could negatively impact our business, results of operations, and financial condition.

Our operations depend upon, among other things, our infrastructure, including equipment and facilities. Extended disruption of vital infrastructure by fire, power loss, natural disaster, telecommunications failure, computer hacking or viruses, terrorist activity or the domestic and foreign response to such activity, or other events outside of our control could have a material adverse impact on the financial services industry as a whole and on our business, results of operations, cash flows, and financial condition in particular. Our business recovery plan may not work as intended or may not prevent significant interruption of our operations. The occurrence of any failures, interruptions, or security breaches of our information systems could damage our reputation, result in the loss of customer business, subject us to additional regulatory scrutiny, or expose us to civil litigation and possible financial liability, any of which could have an adverse effect on our financial condition and results of operation.

Third party vendors provide key components of our business infrastructure, such as processing, internet connections, and network access. While CTBI has selected these third party vendors carefully through its vendor management process, it does not control their actions and generally is not able to obtain satisfactory indemnification provisions in its third party vendor written contracts. Any problems caused by third parties or arising from their services, such as disruption in service, negligence in the performance of services or a breach of customer data security with regard to the third parties' systems, could adversely affect our ability to deliver services, negatively impact our business reputation, cause a loss of customers, or result in increased expenses, regulatory fines and sanctions, or litigation.

Market Risk

Community Trust Bancorp, Inc.'s stock price is volatile.

Our stock price has been volatile in the past, and several factors could cause the price to fluctuate substantially in the future. These factors include:

- Actual or anticipated variations in earnings;
- Changes in analysts' recommendations or projections;
- CTBI's announcements of developments related to our businesses;
- Operating and stock performance of other companies deemed to be peers;
- New technology used or services offered by traditional and non-traditional competitors;
- News reports of trends, concerns, and other issues related to the financial services industry; and
- Additional governmental policies and enforcement of current laws.

Our stock price may fluctuate significantly in the future, and these fluctuations may be unrelated to CTBI's performance. Although investor confidence in financial institutions has strengthened, the financial crisis adversely impacted investor confidence in the financial institutions sector. General market price declines or market volatility in the future could adversely affect the price of our common stock, and the current market price may not be indicative of future market prices.

Technology Risk

CTBI continually encounters technological change.

The financial services industry is continually undergoing rapid technological change with frequent introductions of new technology-driven products and services. The effective use of technology increases efficiency and enables financial institutions to better serve customers and to reduce costs. Our future success depends, in part, upon our ability to address the needs of our customers by using technology to provide products and services that will satisfy customer demands, as well as to create additional efficiencies in our operations. Many of our competitors have substantially greater resources to invest in technological improvements. We may not be able to effectively implement new technology-driven products and services or be successful in marketing these products and services to our customers. Failure to successfully keep pace with technological change affecting the financial services industry could have a material adverse impact on our business and, in turn, our financial condition and results of operations.

Cyber Risk

A breach in the security of our systems could disrupt our business, result in the disclosure of confidential information, damage our reputation, and create significant financial and legal exposure for us.

Our businesses are dependent on our ability and the ability of our third party service providers to process, record, and monitor a large number of transactions. If the financial, accounting, data processing, or other operating systems and facilities fail to operate properly, become disabled, experience security breaches, or have other significant shortcomings, our results of operations could be materially adversely affected.

Although we and our third party service providers devote significant resources to maintain and upgrade our systems and processes that are designed to protect the security of computer systems, software, networks, and other technology assets and the confidentiality, integrity, and availability of information belonging to us and our customers, there is no assurance that our security systems and those of our third party service providers will provide absolute security. Financial services institutions and companies engaged in data processing have reported breaches in the security of their websites or other systems, some of which have involved sophisticated and targeted attacks intended to obtain unauthorized access to confidential information, destroy data, disable or degrade service, or sabotage systems, often through the introduction of computer viruses or malware, cyber-attacks, and other means. Despite our efforts and those of our third party service providers to ensure the integrity of these systems, it is possible that we or our third party service providers may not be able to anticipate or to implement effective preventive measures against all security breaches of these types, especially because techniques used change frequently or are not recognized until launched, and because security attacks can originate from a wide variety of sources.

A successful breach of the security of our systems or those of our third party service providers could cause serious negative consequences to us, including significant disruption of our operations, misappropriation of our confidential information or the confidential information of our customers, or damage to our computers or operating systems, and could result in violations of applicable privacy and other laws, financial loss to us or to our customers, loss in confidence in our security measures, customer dissatisfaction, litigation exposure, and harm to our reputation, all of which could have a material adverse effect on us. While we maintain insurance coverage that should, subject to policy terms and conditions, cover certain aspects of our cyber risks, this insurance coverage may be insufficient to cover all losses we could experience resulting from a cyber security breach.

We could incur increased costs or reductions in revenue or suffer reputational damage in the event of misuse of information.

Our operations rely on the secure processing, transmission and storage of confidential information in our computer systems and networks regarding our customers and their accounts. To provide these products and services, we use information systems and infrastructure that we and third party service providers operate. As a financial institution, we also are subject to and examined for compliance with an array of data protection laws, regulations, and guidance, as well as to our own internal privacy and information security policies and programs.

Information security risks for financial institutions like us have generally increased in recent years in part because of the proliferation of new technologies, the use of the Internet and telecommunications technologies to conduct financial transactions, and the increased sophistication and activities of organized crime, hackers, and other external parties. Our technologies and systems may become the target of cyber-attacks or other attacks that could result in the misuse or destruction of our or our customers' confidential, proprietary, or other information or that could result in disruptions to the business operations of us or our customers or other third parties. Also, our customers, in order to access some of our products and services, may use personal computers, smart mobile phones, tablet PCs, and other devices that are beyond our controls and security systems. Further, a breach or attack affecting one of our third-party service providers or partners could impact us through no fault of our own. In addition, because the methods and techniques employed by perpetrators of fraud and others to attack systems and applications change frequently and often are not fully recognized or understood until after they have been launched, we and our third-party service providers and partners may be unable to anticipate certain attack methods in order to implement effective preventative measures.

While we have policies and procedures designed to prevent or limit the effect of the possible security breach of our information systems, if unauthorized persons were somehow to get access to confidential or proprietary information in our possession or to our proprietary information, it could result in significant legal and financial exposure, damage to our reputation, or a loss of confidence in the security of our systems that could materially adversely affect our business.

Counterparty Risk

The soundness of other financial institutions could adversely affect CTBI.

Our ability to engage in routine funding transactions could be adversely affected by the actions and commercial soundness of other financial institutions. Financial services companies are interrelated as a result of trading, clearing, counterparty, or other relationships. We have exposure to many different industries and counterparties, and we routinely execute transactions with counterparties in the financial services industry, including brokers and dealers, commercial banks, investment banks, mutual and hedge funds, and other institutional counterparties. As a result, defaults by, or even rumors or questions about, one or more financial services companies, or the financial services industry generally, have led to market-wide liquidity problems and could lead to losses or defaults by us or by other institutions. Many of these transactions expose us to credit risk in the event of default of our counterparty or client. In addition, our credit risk may be exacerbated when the collateral held by us cannot be realized or is liquidated at prices not sufficient to recover the full amount of the loan due us. There is no assurance that any such losses would not materially and adversely affect our businesses, financial condition, or results of operations.

Item 1B. Unresolved Staff Comments

None.

SELECTED STATISTICAL INFORMATION

The following tables set forth certain statistical information relating to CTBI and subsidiaries on a consolidated basis and should be read together with our consolidated financial statements.

Consolidated Average Balance Sheets and Taxable Equivalent Income/Expense and Yields/Rates

Net interest margin	3.70 %	3.81 %	3.92 %

(1) Interest includes fees on loans of \$1,717, \$1,782, and \$1,848 in 2016, 2015, and 2014, respectively.

(2) Loan balances include deferred loan origination costs and principal balances on nonaccrual loans.

(3) Tax exempt income on securities and loans is reported on a fully taxable equivalent basis using a 35% rate.

Net Interest Differential

The following table illustrates the approximate effect of volume and rate changes on net interest differentials between 2016 and 2015 and also between 2015 and 2014.

(in thousands)	Total Change 2016/2015	Change Due to		Total Change 2015/2014	Change Due to	
		Volume	Rate		Volume	Rate
Interest income:						
Loans	\$3,151	\$5,760	\$(2,609)	\$2,375	\$7,141	\$(4,766)
Loans held for sale	6	(24)	30	21	11	10
U.S. Treasury and agencies	(756)	(10)	(746)	(1,877)	(572)	(1,305)
Tax exempt state and political subdivisions	20	(93)	113	199	244	(45)
Other securities	(132)	(176)	44	(284)	(220)	(64)
Federal Reserve Bank and Federal Home Loan Bank stock	1	0	1	(126)	(57)	(69)
Federal funds sold	6	(1)	7	(2)	(2)	0
Interest bearing deposits	319	52	267	(29)	(32)	3
Other investments	(39)	(35)	(4)	(31)	(29)	(2)
Investment in unconsolidated subsidiaries	8	0	8	1	0	1
Total interest income	2,584	5,473	(2,889)	247	6,484	(6,237)
Interest expense:						
Savings and demand deposits	267	161	106	158	141	17
Time deposits	1,038	(84)	1,122	(340)	(438)	98
Repurchase agreements and federal funds purchased	217	23	194	97	83	14
Advances from Federal Home Loan Bank	13	(4)	17	22	42	(20)
Long-term debt	247	0	247	39	0	39
Total interest expense	1,782	96	1,686	(24)	(172)	148
Net interest income	\$802	\$5,377	\$(4,575)	\$271	\$6,656	\$(6,385)

For purposes of the above table, changes which are due to both rate and volume are allocated based on a percentage basis, using the absolute values of rate and volume variance as a basis for percentages. Income is stated at a fully taxable equivalent basis, assuming a 35% tax rate.

Investment Portfolio

The calculations of the weighted average interest rates for each maturity category are based upon yield weighted by the respective costs of the securities. The weighted average rates on state and political subdivisions are computed on a taxable equivalent basis using a 35% tax rate.

Excluding those holdings of the investment portfolio in U.S. Treasury securities, government agencies, and government sponsored agency mortgage-backed securities, there were no securities of any one issuer that exceeded 10% of our shareholders' equity at December 31, 2016.

The book values of securities available-for-sale and securities held-to-maturity as of December 31, 2016 and 2015 are presented in note 3 to the consolidated financial statements.

The book value of securities at December 31, 2014 is presented below:

(in thousands)	Available-for-Sale	Held-to-Maturity

Discussion of the Nonaccrual Policy

The accrual of interest income on loans is discontinued when management believes, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that the collection of interest is doubtful. Cash payments received on nonaccrual loans generally are applied against principal, and interest income is only recorded once principal recovery is reasonably assured. Any loans greater than 90 days past due must be well secured and in the process of collection to continue accruing interest. See note 1 for further discussion on our nonaccrual policy.

Potential Problem Loans

Interest accrual is discontinued when we believe, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful.

Foreign Outstandings

None

Loan Concentrations

We had no concentration of loans exceeding 10% of total loans at December 31, 2016. See note 19 to the consolidated financial statements for further information.

Consumer indirect	0.67		0.55		0.67		0.75		0.67	
Total	0.28	%	0.25	%	0.31	%	0.30	%	0.37	%

Other ratios:

Allowance to net loans, end of year	1.22	%	1.26	%	1.26	%	1.30	%	1.30	%
Provision for loan losses to average loans	0.27	%	0.31	%	0.33	%	0.33	%	0.37	%

The allowance for loan and lease losses balance is maintained at a level considered adequate to cover anticipated probable losses based on past loss experience, general economic conditions, information about specific borrower situations including their financial position and collateral values, and other factors and estimates which are subject to change over time. This analysis is completed quarterly and forms the basis for allocation of the loan loss reserve and what charges to the provision may be required. See notes 1, 4, and 7 to the consolidated financial statements for further information.

Average Deposits and Other Borrowed Funds

See notes 8 and 16 to the consolidated financial statements included herein for the year ended December 31, 2016, for additional information relating to lease commitments and amounts invested in premises and equipment.

Item 3. Legal Proceedings

CTBI and subsidiaries, and from time to time, our officers, are named defendants in legal actions arising from ordinary business activities. Management, after consultation with legal counsel, believes any pending actions are without merit or that the ultimate liability, if any, will not materially affect our consolidated financial position or results of operations.

Item 4. Mine Safety Disclosures

Not applicable.

PART II

Item 5. Market for the Registrant's Common Equity, Related Shareholder Matters, and Issuer Purchases of Equity Securities

Our common stock is listed on The NASDAQ-Stock Market LLC – Global Select Market under the symbol CTBI. As of February 28, 2017, there were approximately 6,400 holders of record of our outstanding common shares.

Dividends

The annual dividend paid to our stockholders was increased from \$1.22 per share to \$1.26 per share during 2016. We have adopted a conservative policy of cash dividends by generally maintaining an average annual cash dividend ratio of approximately 45%, with periodic stock dividends. The current year cash dividend ratio was 46.67%. Dividends are typically paid on a quarterly basis. Future dividends are subject to the discretion of CTBI's Board of Directors, cash needs, general business conditions, dividends from our subsidiaries, and applicable governmental regulations and policies. For information concerning restrictions on dividends from the subsidiary bank to CTBI, see note 21 to the consolidated financial statements included herein for the year ended December 31, 2016.

Stock Repurchases

CTBI did not acquire any shares of common stock through the stock repurchase program during the years 2016 and 2015. There are 67,371 shares remaining under CTBI's current repurchase authorization. For further information, see the Stock Repurchase Program section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Securities Authorized for Issuance Under Equity Compensation Plans

For information concerning securities authorized for issuance under CTBI's equity compensation plans, see Part III, Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Shareholder Matters.

Common Stock Performance

The following graph shows the cumulative total return experienced by CTBI's shareholders during the last five years compared to the NASDAQ Stock Market (U.S.) and the NASDAQ Bank Stock Index. The graph assumes the investment of \$100 on December 31, 2011 in CTBI's common stock and in each index and the reinvestment of all dividends paid during the five-year period.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

The following Management's Discussion and Analysis of Financial Condition and Results of Operations ("MD&A") is intended to help the reader understand Community Trust Bancorp, Inc., our operations, and our present business environment. The MD&A is provided as a supplement to—and should be read in conjunction with—our consolidated financial statements and the accompanying notes thereto contained in Item 8 of this annual report. The MD&A includes the following sections:

v Our Business

v Financial Goals and Performance

v Results of Operations and Financial Condition

v Contractual Obligations and Commitments

v Liquidity and Market Risk

v Interest Rate Risk

v Capital Resources

v Impact of Inflation, Changing Prices, and Economic Conditions

v Stock Repurchase Program

v Critical Accounting Policies and Estimates

Our Business

Community Trust Bancorp, Inc. ("CTBI") is a bank holding company headquartered in Pikeville, Kentucky. Currently, we own one commercial bank, Community Trust Bank, Inc. ("CTB") and one trust company, Community Trust and Investment Company. Through our subsidiaries, we have eighty banking locations in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee, four trust offices across Kentucky, and one trust office in northeastern Tennessee. At December 31, 2016, we had total consolidated assets of \$3.9 billion and total consolidated deposits, including repurchase agreements, of \$3.3 billion. Total shareholders' equity at December 31, 2016 was \$500.6 million. Trust assets under management, which are excluded from CTBI's total consolidated assets, at December 31, 2016, were \$2.1 billion. Trust assets under management include CTB's investment portfolio totaling \$0.6 billion.

Through its subsidiaries, CTBI engages in a wide range of commercial and personal banking and trust and wealth management activities, which include accepting time and demand deposits; making secured and unsecured loans to corporations, individuals and others; providing cash management services to corporate and individual customers; issuing letters of credit; renting safe deposit boxes; and providing funds transfer services. The lending activities of CTB include making commercial, construction, mortgage, and personal loans. Lease-financing, lines of credit, revolving lines of credit, term loans, and other specialized loans, including asset-based financing, are also available. Our corporate subsidiaries act as trustees of personal trusts, as executors of estates, as trustees for employee benefit trusts, as paying agents for bond and stock issues, as investment agent, as depositories for securities, and as providers of full service brokerage and insurance services. For further information, see Item 1 of this annual report.

Financial Goals and Performance

The following table shows the primary measurements used by management to assess annual performance. The goals in the table below should not be viewed as a forecast of our performance for 2017. Rather, the goals represent a range of target performance for 2017. There is no assurance that any or all of these goals will be achieved. See “Cautionary Statement Regarding Forward Looking Statements.”

	2016 Goals	2016 Performance	2017 Goals
Earnings per share	\$2.72 - \$2.82	\$2.70	\$2.76 - \$2.86
Net income	\$48.0 - \$49.2 million	\$47.3 million	\$49.0 - \$50.2 million
ROAA	1.22% - 1.28%	1.21%	1.19% - 1.25%
ROAE	9.4% - 10.4%	9.58%	9.10% - 10.10%
Revenues		\$181.5 million	
	\$183.0 - \$189.6 million		\$187.8 - \$193.8 million
Noninterest revenue as of % of total revenue	26.0% - 26.5%	26.48%	25.00% - 25.80%
Assets	\$3.8 - \$4.2 billion	\$3.93 billion	\$3.90 - \$4.40 billion
Loans	\$2.9 - \$3.1 billion	\$2.94 billion	\$3.00 - \$3.20 billion
Deposits, including repurchase agreements	\$3.2 - \$3.4 billion	\$3.33 billion	\$3.30 - \$3.50 billion
Shareholders' equity	\$485.0 - \$520.0 million	\$500.6 million	\$510.0 - \$550.0 million

Results of Operations and Financial Condition

We reported earnings of \$47.3 million, or \$2.70 per basic share, for the year ended December 31, 2016 compared to \$46.4 million, or \$2.66 per basic share, for the year ended December 31, 2015 and \$43.3 million, or \$2.50 per basic share, for the year ended December 31, 2014.

2016 Highlights

v Our loan portfolio increased \$64.4 million from December 31, 2015.

v Our investment portfolio increased \$9.7 million from December 31, 2015.

v Deposits, including repurchase agreements, increased \$100.4 million from December 31, 2015.

v Nonperforming loans at \$27.5 million decreased \$1.1 million from December 31, 2015. Nonperforming assets at \$63.4 million decreased \$6.0 million from December 31, 2015.

v Net loan charge-offs for the year 2016 were \$8.0 million, or 0.28% of average loans, compared to \$7.0 million, or 0.25%, for the year 2015.

Net income	\$ 47,346	\$ 46,432	\$ 43,251	\$ 914	2.0 %
Average earning assets	\$ 3,652,714	\$ 3,524,506	\$ 3,422,450	\$ 128,208	3.6 %
Yield on average earnings assets	4.07 %	4.14 %	4.26 %	(0.07)%	(1.8)%
Cost of interest bearing funds	0.52 %	0.46 %	0.46 %	0.06 %	12.5 %
Net interest margin	3.70 %	3.81 %	3.92 %	(0.11)%	(2.9)%

Net Interest Income

Net interest income for the year ended December 31, 2016 of \$133.0 million increased \$0.8 million, or 0.6%, from prior year. Average earning assets increased \$128.2 million over prior year. Our yield on average earning assets decreased 7 basis points from prior year, while our cost of interest bearing funds increased 6 basis points. Average loans to deposits, including repurchase agreements, for the year ended December 31, 2016 were 88.2% compared to 87.2% for the year ended December 31, 2015.

Net interest income for the year ended December 31, 2015 increased \$0.2 million, or 0.1%, from 2014. Our yield on average earning assets decreased 12 basis points from 2014 to 2015, while our cost of interest bearing funds remained flat. Average loans to deposits, including repurchase agreements, for the year ended December 31, 2015 were 87.2% compared to 84.4% for the year ended December 31, 2014.

Provision for Loan Losses

The provision for loan losses added to the allowance for 2016 of \$7.9 million was a \$0.8 million decrease from prior year. This provision represented a charge against current earnings in order to maintain the allowance at an appropriate level determined using the accounting estimates described in the Critical Accounting Policies and Estimates section.

The provision for loan losses added to the allowance for 2015 of \$8.7 million was a \$0.1 million decrease from 2014.

Noninterest Income

Noninterest income for the year ended December 31, 2016 of \$48.4 million was an increase of \$1.6 million, or 3.5%, from 2015. The increase in noninterest income year over year was primarily due to a \$0.7 million increase in deposit services charges, a \$0.3 million increase in trust revenue, a \$0.3 million increase in loan related fees, and a \$0.6 million positive variance in securities gains (losses).

Noninterest income for the year ended December 31, 2015 increased \$1.7 million, or 3.8%, from 2014 as a result of increases in gains on sales of loans (\$0.5 million), deposit service charges (\$0.4 million), trust revenue (\$0.3 million), and loan related fees (\$0.3 million) and decreased securities losses (\$0.1 million). Loan related fees were affected by a \$0.5 million fluctuation in the fair value adjustments of our mortgage servicing rights from 2014 to 2015.

Noninterest Expense

Noninterest expense for the year ended December 31, 2016 of \$107.1 million increased \$1.7 million, or 1.6%, from prior year. The increase in noninterest expense was primarily due to an increase in personnel expense, partially offset by decreased FDIC insurance expense. The increase in our personnel expense is a result of changes in our group medical insurance expense caused by differences in our claims paid experience as a self-insured employer.

Noninterest expense for the year ended December 31, 2015 decreased \$0.6 million, or 0.5%, from 2014, as a result of decreases in occupancy and equipment expense (\$0.6 million), data processing expense (\$1.1 million), and repossession expense (\$0.2 million), partially offset by a \$1.7 million increase in amortization expense related to tax credits.

Balance Sheet Review

CTBI's total assets at \$3.9 billion increased \$28.2 million, or 0.7%, from December 31, 2015. Loans outstanding at December 31, 2016 were \$2.9 billion, increasing \$64.4 million, or 2.2%, year over year. We experienced growth during the year of \$9.7 million in the commercial loan portfolio, \$54.6 million in the indirect loan portfolio, and \$6.7 million in the consumer direct loan portfolio, partially offset by a \$6.6 million decrease in the residential loan portfolio. CTBI's investment portfolio increased \$9.7 million, or 1.6%, from December 31, 2015. Deposits in other banks decreased \$42.1 million from December 31, 2015. Deposits, including repurchase agreements, at \$3.3 billion increased \$100.4 million, or 3.1%, from December 31, 2015.

Shareholders' equity at December 31, 2016 was \$500.6 million compared to \$475.6 million at December 31, 2015. CTBI's annualized dividend yield to shareholders as of December 31, 2016 was 2.58%.

Asset Quality

CTBI's total nonperforming loans were \$27.5 million at December 31, 2016, a 4.0% decrease from the \$28.6 million at December 31, 2015. The decrease for the year included a \$1.2 million decrease in loans 90+ days past due partially offset by a \$0.1 million increase in nonaccrual loans. Loans 30-89 days past due and accruing interest at \$16.4 million was an increase of \$2.0 million from December 31, 2015. Our loan portfolio management processes focus on the immediate identification, management, and resolution of problem loans to maximize recovery and minimize loss. Our loan portfolio risk management processes include weekly delinquent loan review meetings at the market levels and monthly delinquent loan review meetings involving senior corporate management to review all nonaccrual loans and loans 30 days or more past due. Any activity regarding a criticized/classified loan (i.e. problem loan) must be approved by CTB's Watch List Asset Committee (i.e. Problem Loan Committee). CTB's Watch List Asset Committee also meets on a quarterly basis and reviews every criticized/classified loan of \$100,000 or greater. We also have a Loan Review Department that reviews every market within CTB annually and performs extensive testing of the loan portfolio to assure the accuracy of loan grades and classifications for delinquency, troubled debt restructuring, impaired status, impairment, nonaccrual status, and adequate loan loss reserves. The Loan Review Department has annually reviewed on average 95% of the outstanding commercial loan portfolio for the past three years. The average annual review percentage of the consumer and residential loan portfolio for the past three years was 85% based on the loan production during the number of months included in the review scope. The review scope is generally four to six months of production.

Impaired loans, loans not expected to meet contractual principal and interest payments, at December 31, 2016 totaled \$52.2 million compared to \$49.9 million at December 31, 2015. Included in certain loan categories of impaired loans are troubled debt restructurings that were classified as impaired. At December 31, 2016, CTBI had \$28.8 million in commercial loans secured by real estate, \$5.3 million in commercial real estate construction loans, \$10.8 million in commercial other loans, and \$1.5 million in real estate mortgage loans that were modified in troubled debt restructurings and impaired. Management evaluates all impaired loans for impairment and records a direct charge-off or provides specific reserves when necessary.

For further information regarding nonperforming and impaired loans, see note 4 to the consolidated financial statements.

CTBI generally does not offer high risk loans such as option ARM products, high loan to value ratio mortgages, interest-only loans, loans with initial teaser rates, or loans with negative amortizations, and therefore, CTBI would have no significant exposure to these products.

Our level of foreclosed properties at \$35.9 million at December 31, 2016 was a \$4.8 million decrease from \$40.7 million at December 31, 2015. Sales of foreclosed properties for the year ended December 31, 2016 totaled \$9.5 million while new foreclosed properties totaled \$5.9 million. At December 31, 2016, the book value of properties under contracts to sell was \$1.9 million; however, the closings had not occurred at year-end.

When foreclosed properties are acquired, appraisals are obtained and the properties are booked at the current market value less expected sales costs. Additionally, periodic updated appraisals are obtained on unsold foreclosed properties. When an updated appraisal reflects a market value below the current book value, a charge is booked to current earnings to reduce the property to its new market value less expected sales costs. Charges to earnings in 2016 to reflect the decrease in current market values of foreclosed properties totaled \$1.2 million. There were 72 properties reappraised during 2016. Of these, 45 were written down by a total of \$0.9 million. Charges during the year ended December 31, 2015 were \$1.7 million. Our policy for determining the frequency of periodic reviews is based upon consideration of the specific properties and the known or perceived market fluctuations in a particular market and is typically between 12 and 18 months but generally not more than 24 months. Approximately eighty-eight percent of

our OREO properties have appraisals dated within the past 18 months. Management anticipates that our foreclosed properties will remain elevated as we work through current market conditions.

The appraisal aging analysis of foreclosed properties, as well as the holding period, at December 31, 2016 is shown below:

(in thousands)	Appraisal Aging Analysis		Holding Period Analysis	
	Current Book Value	Holding Period	Current Book Value	
Days Since Last Appraisal				
Up to 3 months	\$2,783	Less than one year	\$5,095	
3 to 6 months	3,739	1 to 2 years	9,145	
6 to 9 months	1,317	2 to 3 years	3,330	
9 to 12 months	3,493	3 to 4 years	976	
12 to 18 months	20,289	4 to 5 years	2,203	
18 to 24 months	4,195	Over 5 years*	15,107	
Over 24 months	40			
Total	\$35,856	Total	\$35,856	

* Regulatory approval is required and has been obtained to hold these properties beyond the initial period of 5 years. Additional approval may be required to continue to hold these properties should they not be liquidated during the extension period, which is typically one year.

Net loan charge-offs for the year were \$8.0 million, or 0.28% of average loans annualized, an increase from prior year's \$7.0 million, or 0.25% of average loans annualized. Of the total net charge-offs, \$3.4 million were in commercial loans, \$2.8 million were in indirect auto loans, \$1.2 million were in residential real estate mortgage loans, and \$0.6 million were in direct consumer loans.

Our loan loss reserve as a percentage of total loans outstanding at December 31, 2016 decreased to 1.22% from the 1.26% at December 31, 2015. Our reserve coverage (allowance for loan and lease loss reserve to nonperforming loans) improved to 130.8% at December 31, 2016 compared to 126.2% at December 31, 2015.

Contractual Obligations and Commitments

As disclosed in the notes to the consolidated financial statements, we have certain obligations and commitments to make future payments under contracts. At December 31, 2016, the aggregate contractual obligations and commitments are:

(in thousands)	Contractual Obligations:	Payments Due by Period			
		Total	1 Year	2-5 Years	After 5 Years
Deposits without stated maturity		\$1,868,265	\$1,868,265	\$0	\$0
Certificates of deposit and other time deposits		1,213,043	988,296	224,419	328
Repurchase agreements and federal funds purchased		255,881	255,881	0	0
Advances from Federal Home Loan Bank		944	106	464	374
Interest on advances from Federal Home Loan Bank*		21	12	9	0
Long-term debt		61,341	0	0	61,341
Interest on long-term debt*		57,842	1,842	10,280	45,720
Annual rental commitments under leases		8,878	2,010	3,779	3,089
Total contractual obligations		\$3,466,215	\$3,116,412	\$238,951	\$110,852

*The amounts provided as interest on advances from Federal Home Loan Bank and interest on long-term debt assume the liabilities will not be prepaid and interest is calculated to their individual maturities.

The interest on \$61.3 million in long-term debt is calculated based on the three-month LIBOR plus 1.59% until its maturity of June 1, 2037. The three-month LIBOR rate is projected using the most likely rate forecast from assumptions incorporated in the interest rate risk model and is determined two business days prior to the interest payment date. These assumptions are uncertain, and as a result, the actual payments will differ from the projection due to changes in economic conditions.

Other Commitments:	Amount of Commitment - Expiration by Period			
	Total	1 Year	2-5 Years	After 5 Years
(in thousands)				
Standby letters of credit	\$29,917	\$19,829	\$10,088	\$0
Commitments to extend credit	570,467	436,984	121,080	12,403
Total other commitments	\$600,384	\$456,813	\$131,168	\$12,403

Commitments to extend credit and standby letters of credit do not necessarily represent future cash requirements in that these commitments often expire without being drawn upon. Refer to note 18 to the consolidated financial statements for additional information regarding other commitments.

Liquidity and Market Risk

The objective of CTBI's Asset/Liability management function is to maintain consistent growth in net interest income within our policy limits. This objective is accomplished through management of our consolidated balance sheet composition, liquidity, and interest rate risk exposures arising from changing economic conditions, interest rates, and customer preferences. The goal of liquidity management is to provide adequate funds to meet changes in loan and lease demand or deposit withdrawals. This is accomplished by maintaining liquid assets in the form of cash and cash equivalents and investment securities, sufficient unused borrowing capacity, and growth in core deposits. As of December 31, 2016, we had approximately \$144.7 million in cash and cash equivalents and approximately \$605.4 million in securities valued at estimated fair value designated as available-for-sale and available to meet liquidity needs on a continuing basis compared to \$187.6 million and \$594.9 million at December 31, 2015. Additional asset-driven liquidity is provided by the remainder of the securities portfolio and the repayment of loans. In addition to core deposit funding, we also have a variety of other short-term and long-term funding sources available. We also rely on Federal Home Loan Bank advances for both liquidity and management of our asset/liability position. Federal Home Loan Bank advances were \$0.9 million at December 31, 2016 compared to \$101.1 million at December 31, 2015. As of December 31, 2016, we had a \$295.8 million available borrowing position with the Federal Home Loan Bank compared to \$218.3 million at December 31, 2015. We generally rely upon net inflows of cash from financing activities, supplemented by net inflows of cash from operating activities, to provide cash for our investing activities. As is typical of many financial institutions, significant financing activities include deposit gathering, use of short-term borrowing facilities such as repurchase agreements and federal funds purchased, and issuance of long-term debt. At December 31, 2016, we had \$57 million in lines of credit with various correspondent banks available to meet any future cash needs compared to \$44 million at December 31, 2015. Our primary investing activities include purchases of securities and loan originations. We do not rely on any one source of liquidity and manage availability in response to changing consolidated balance sheet needs. Included in our cash and cash equivalents at December 31, 2016 were federal funds sold of \$0.5 million compared to \$0.8 million at December 31, 2015, and deposits with the Federal Reserve were \$93.4 million at December 31, 2016 compared to \$130.6 million at December 31, 2015. Additionally, we project cash flows from our investment portfolio to generate additional liquidity over the next 90 days.

The investment portfolio consists primarily of investment grade short-term issues suitable for bank investments. The majority of the investment portfolio is in U.S. government and government sponsored agency issuances. At the end of 2016, available-for-sale (“AFS”) securities comprised approximately 99.9% of the total investment portfolio, and the AFS portfolio was approximately 120.9% of equity capital. Ninety-two percent of the pledge eligible portfolio was pledged.

Interest Rate Risk

We consider interest rate risk one of our most significant market risks. Interest rate risk is the exposure to adverse changes in net interest income due to changes in interest rates. Consistency of our net interest revenue is largely dependent upon the effective management of interest rate risk. We employ a variety of measurement techniques to identify and manage our interest rate risk including the use of an earnings simulation model to analyze net interest income sensitivity to changing interest rates. The model is based on actual cash flows and repricing characteristics for on and off-balance sheet instruments and incorporates market-based assumptions regarding the effect of changing interest rates on the prepayment rates of certain assets and liabilities. Assumptions based on the historical behavior of deposit rates and balances in relation to changes in interest rates are also incorporated into the model. These assumptions are inherently uncertain, and as a result, the model cannot precisely measure net interest income or precisely predict the impact of fluctuations in interest rates on net interest income. Actual results will differ from simulated results due to timing, magnitude, and frequency of interest rate changes as well as changes in market conditions and management strategies.

CTBI’s Asset/Liability Management Committee (ALCO), which includes executive and senior management representatives and reports to the Board of Directors, monitors and manages interest rate risk within Board-approved policy limits. Our current exposure to interest rate risks is determined by measuring the anticipated change in net interest income spread evenly over the twelve-month period.

The following table shows our estimated earnings sensitivity profile as of December 31, 2016:

Change in Interest Rates (basis points)	Percentage Change in Net Interest Income (12 Months)
+400	7.05%
+300	5.10%
+200	3.15%
+100	1.30%
-25	(0.21)%

The following table shows our estimated earnings sensitivity profile as of December 31, 2015:

Change in Interest Rates (basis points)	Percentage Change in Net Interest Income (12 Months)
+400	7.54%
+300	5.46%
+200	3.33%
+100	1.35%
-25	(0.30)%

The simulation model used the yield curve spread evenly over a twelve-month period. The measurement at December 31, 2016 estimates that our net interest income in an up-rate environment would increase by 7.05% at a 400 basis point change, 5.10% increase at a 300 basis point change, 3.15% increase at a 200 basis point change, and a 1.30% increase at a 100 basis point change. In a down-rate environment, a 25 basis point decrease in interest rates would decrease net interest income by 0.21% over one year. In order to reduce the exposure to interest rate fluctuations and

to manage liquidity, we have developed sale procedures for several types of interest-sensitive assets. Primarily all long-term, fixed rate single family residential mortgage loans underwritten according to Federal Home Loan Mortgage Corporation guidelines are sold for cash upon origination or originated under terms where they could be sold. Periodically, additional assets such as commercial loans are also sold. In 2016 and 2015, \$81.4 million and \$80.6 million, respectively, were realized on the sale of fixed rate residential mortgages. We focus our efforts on consistent net interest revenue and net interest margin growth through each of the retail and wholesale business lines. We do not currently engage in trading activities.

The preceding analysis was prepared using a rate ramp analysis which attempts to spread changes evenly over a specified time period as opposed to a rate shock which measures the impact of an immediate change. Had these measurements been prepared using the rate shock method, the results would vary.

Our Static Repricing GAP as of December 31, 2016 is presented below. In the 12 month repricing GAP, rate sensitive liabilities (“RSL”) exceeded rate sensitive assets (“RSA”) by \$158.7 million.

(dollars in thousands)	1-3 Months	4-6 Months	7-9 Months	10-12 Months	2-3 Years	4-5 Years	> 5 Years
Assets	\$1,435,324	\$227,194	\$193,639	\$215,660	\$756,883	\$469,905	\$633,565
Liabilities and Equity	871,530	341,950	421,541	595,465	1,075,805	92,109	533,769
Repricing difference	563,794	(114,756)	(227,902)	(379,805)	(318,921)	377,795	99,795
Cumulative GAP	563,794	449,038	221,136	(158,669)	(477,590)	(99,795)	0
RSA/RSL	1.65	x 0.66	x 0.46	x 0.36	x 0.70	x 5.10	x 1.19
Cumulative GAP to total assets	14.34	% 11.42	% 5.62	% (4.04)	% (12.15)	% (2.54)	% 0.00

Capital Resources

We continue to grow our shareholders’ equity while also providing an annual dividend yield for the year 2016 of 2.54% to shareholders. Shareholders’ equity increased 5.3% from December 31, 2015 to \$500.6 million at December 31, 2016. Our primary source of capital growth is the retention of earnings. Cash dividends were \$1.260 per share for 2016 and \$1.220 per share for 2015. We retained 53.3% of our earnings in 2016 compared to 54.1% in 2015.

Regulatory guidelines require bank holding companies, commercial banks, and savings banks to maintain certain minimum capital ratios and define companies as “well-capitalized” that sufficiently exceed the minimum ratios. The banking regulators may alter minimum capital requirements as a result of revising their internal policies and their ratings of individual institutions. To be “well-capitalized” banks and bank holding companies must maintain a Tier 1 leverage ratio of no less than 5%, a common equity Tier 1 capital ratio of no less than 6.5%, a Tier 1 risk based ratio of no less than 8%, and a total risk based ratio of no less than 10%. Our ratios as of December 31, 2016 were 12.75%, 15.18%, 17.25%, and 18.50%, respectively, all exceeding the threshold for meeting the definition of “well-capitalized.” See note 21 to the consolidated financial statements for further information.

As of December 31, 2016, we are not aware of any current recommendations by banking regulatory authorities which, if they were to be implemented, would have, or are reasonably likely to have, a material adverse impact on our

liquidity, capital resources, or operations. However, based on a recent discussion with a regulatory agency representative concerning the status of an ongoing review of two CTB deposit add-on products, CTBI believes it is likely that it will be cited for two violations based on alleged unfair and deceptive practices with respect to such products. CTBI has evaluated the possible violations and their potential financial impact. Based upon this analysis, management established an accrual in 2014 for possible customer reimbursements. We have not received a final written notice citing such violations and have not been informed as to the amount of, or relevant time period for, related reimbursement. The actual amount of reimbursement may materially vary from the amount management has evaluated as most likely at December 31, 2016.

Basel III

On July 2, 2013, the Federal Reserve approved final rules that substantially amend the regulatory risk-based capital rules applicable to CTBI and CTB. The FDIC subsequently approved these rules. The final rules implement the “Basel III” regulatory capital reforms and changes required by the Dodd-Frank Act.

The rules include new risk-based capital and leverage ratios, which are being phased in from 2015 to 2019, and refine the definition of what constitutes “capital” for purposes of calculating those ratios. The new minimum capital level requirements applicable to CTBI and CTB under the final rules are: (i) a new common equity Tier 1 capital ratio of 4.5%; (ii) a Tier 1 capital ratio of 6% (increased from 4%); (iii) a total capital ratio of 8% (unchanged from current rules); and (iv) a Tier 1 leverage ratio of 4% for all institutions. The final rules also establish a “capital conservation buffer” above the new regulatory minimum capital requirements, which must consist entirely of common equity Tier 1 capital. The capital conservation buffer began to be phased in on January 1, 2016 at 0.625% of risk-weighted assets and will increase by 0.625% annually until fully implemented in January 2019. An institution is subject to limitations on certain activities including payment of dividends, share repurchases, and discretionary bonuses to executive officers if its capital level is below the capital conservation buffer amount.

The final rules also implement revisions and clarifications consistent with Basel III regarding the various components of Tier 1 capital, including common equity, unrealized gains and losses, as well as certain instruments that will no longer qualify as Tier 1 capital, some of which will be phased out over time. However, the final rules provide that small depository institution holding companies with less than \$15 billion in total assets as of December 31, 2009 (which includes CTBI) will be able to permanently include non-qualifying instruments that were issued and included in Tier 1 or Tier 2 capital prior to May 19, 2010 in additional Tier 1 or Tier 2 capital until they redeem such instruments or until the instruments mature.

The final rules also contain revisions to the prompt corrective action framework, which is designed to place restrictions on insured depository institutions, including the Bank, if their capital levels begin to show signs of weakness. These revisions took effect January 1, 2015. Under the prompt corrective action requirements, which are designed to complement the capital conservation buffer, insured depository institutions are required to meet the following increased capital level requirements in order to qualify as “well capitalized:” (i) a new common equity Tier 1 capital ratio of 6.5%; (ii) a Tier 1 capital ratio of 8% (increased from 6%); (iii) a total capital ratio of 10% (unchanged from previous rules); and (iv) a Tier 1 leverage ratio of 5% (unchanged from previous rules).

The final rules set forth certain changes for the calculation of risk-weighted assets, which we were required to utilize beginning January 1, 2015. The standardized approach final rule utilizes an increased number of credit risk exposure categories and risk weights, and also addresses: (i) an alternative standard of creditworthiness consistent with Section 939A of the Dodd-Frank Act; (ii) revisions to recognition of credit risk mitigation; (iii) rules for risk weighting of equity exposures and past due loans; (iv) revised capital treatment for derivatives and repo-style transactions; and (v) disclosure requirements for top-tier banking organizations with \$50 billion or more in total assets that are not subject to the “advance approach rules” that apply to banks with greater than \$250 billion in consolidated assets. We currently satisfy the well-capitalized and the capital conservation standards, and based on our current capital composition and levels, we anticipate that our capital ratios, on a Basel III basis, will continue to exceed the well-capitalized minimum

capital requirements and capital conservation buffer standards.

Impact of Inflation, Changing Prices, and Economic Conditions

The majority of our assets and liabilities are monetary in nature. Therefore, CTBI differs greatly from most commercial and industrial companies that have significant investment in nonmonetary assets, such as fixed assets and inventories. However, inflation does have an important impact on the growth of assets in the banking industry and on the resulting need to increase equity capital at higher than normal rates in order to maintain an appropriate equity to assets ratio. Inflation also affects other expenses, which tend to rise during periods of general inflation.

We believe one of the most significant impacts on financial and operating results is our ability to react to changes in interest rates. We seek to maintain an essentially balanced position between interest rate sensitive assets and liabilities in order to protect against the effects of wide interest rate fluctuations.

Beginning in 2008, the U.S. economy faced a severe economic crisis including a major recession from which it is recovering. Commerce and business growth in certain regions in the U.S. remains reduced and local governments and many businesses continue to experience financial difficulty. In some areas of the U.S., including certain parts of our service area, unemployment levels remain elevated. There can be no assurance that these conditions will continue to improve and these conditions could worsen. In addition, the level of U.S. debt, the Federal Open Market Committee's plan for economic stabilization, potential volatility in oil prices, potential U.S. tax law modifications, and the repeal of the Patient Protection and Affordable Care Act and the implementation of replacement healthcare legislation may have a destabilizing effect on financial markets or a negative effect on the economy.

Our financial performance generally, and in particular the ability of borrowers to pay interest on and repay principal of outstanding loans and the value of collateral securing those loans, as well as demand for loans and other products and services we offer, is highly dependent upon the business environment in the markets where we operate, in the states of Kentucky, West Virginia, and Tennessee and in the United States as a whole. While unemployment rates have improved in many areas of the United States, unemployment rates remain elevated in certain markets in which we operate. A favorable business environment is generally characterized by, among other factors, economic growth, efficient capital markets, low inflation, low unemployment, high business and investor confidence, and strong business earnings. Unfavorable or uncertain economic and market conditions can be caused by declines in economic growth, business activity, or investor or business confidence; limitations on the availability or increases in the cost of credit and capital; increases in inflation or interest rates; high unemployment; natural disasters; or a combination of these or other factors.

Overall, during recent years, the business environment has been adverse for many households and businesses in the United States and worldwide. While economic conditions in the United States and worldwide have improved since the recession, there can be no assurance that this improvement will continue or that another recession will not occur. Economic pressure on consumers and uncertainty regarding continuing economic improvement may result in changes in consumer and business spending, borrowing, and savings habits. Such conditions could adversely affect the credit quality of our loans and our business, financial condition, and results of operations.

Stock Repurchase Program

CTBI's stock repurchase program began in December 1998 with the authorization to acquire up to 500,000 shares and was increased by an additional 1,000,000 shares in July 2000 and in May 2003. We have not repurchased any shares of our common stock since February 2008. There are currently 67,371 shares remaining under CTBI's current repurchase authorization. As of December 31, 2016, a total of 2,432,629 shares have been repurchased through this program. The following table shows Board authorizations and repurchases made through the stock repurchase program for the years 1998 through 2016:

Board Authorizations	Repurchases*		Shares Available for Repurchase
	Average Price (\$)	# of Shares	
1998 500,000	-	0	
1999 0	14.45	144,669	
2000 1,000,000	10.25	763,470	
2001 0	13.35	489,440	
2002 0	17.71	396,316	
2003 1,000,000	19.62	259,235	
2004 0	23.14	60,500	
2005 0	-	0	
2006 0	-	0	
2007 0	28.56	216,150	
2008 0	25.53	102,850	
2009 0	-	0	
2010 0	-	0	
2011 0	-	0	
2012 0	-	0	
2013 0	-	0	
2014 0	-	0	
2015 0	-	0	
2016 0	-	0	
Total 2,500,000	15.93	2,432,629	67,371

*Repurchased shares and average prices have been restated to reflect stock dividends that have occurred; however, board authorized shares have not been adjusted.

Critical Accounting Policies and Estimates

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States of America requires the appropriate application of certain accounting policies, many of which require us to make estimates and assumptions about future events and their impact on amounts reported in our consolidated financial statements and related notes. Since future events and their impact cannot be determined with certainty, the actual results will inevitably differ from our estimates. Such differences could be material to the consolidated financial statements.

We believe the application of accounting policies and the estimates required therein are reasonable. These accounting policies and estimates are constantly reevaluated, and adjustments are made when facts and circumstances dictate a change. Historically, we have found our application of accounting policies to be appropriate, and actual results have not differed materially from those determined using necessary estimates.

Our accounting policies are described in note 1 to the consolidated financial statements. We have identified the following critical accounting policies:

Investments – Management determines the classification of securities at purchase. We classify securities into held-to-maturity, trading, or available-for-sale categories. Held-to-maturity securities are those which we have the positive intent and ability to hold to maturity and are reported at amortized cost. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 320, Investment Securities, investments in debt securities that are not classified as held-to-maturity and equity securities that have readily determinable fair values shall be classified in one of the following categories and measured at fair value in the statement of financial position:

a. Trading securities. Securities that are bought and held principally for the purpose of selling them in the near term (thus held for only a short period of time) shall be classified as trading securities. Trading generally reflects active and frequent buying and selling, and trading securities are generally used with the objective of generating profits on short-term differences in price.

b. Available-for-sale securities. Investments not classified as trading securities (nor as held-to-maturity securities) shall be classified as available-for-sale securities.

We do not have any securities that are classified as trading securities. Available-for-sale securities are reported at fair value, with unrealized gains and losses included as a separate component of shareholders' equity, net of tax. If declines in fair value are other than temporary, the carrying value of the securities is written down to fair value as a realized loss with a charge to income for the portion attributable to credit losses and a charge to other comprehensive income for the portion that is not credit related.

Gains or losses on disposition of securities are computed by specific identification for all securities except for shares in mutual funds, which are computed by average cost. Interest and dividend income, adjusted by amortization of purchase premium or discount, is included in earnings.

When the fair value of a security is below its amortized cost, and depending on the length of time the condition exists and the extent the fair market value is below amortized cost, additional analysis is performed to determine whether an other than temporary impairment condition exists. Available-for-sale and held-to-maturity securities are analyzed quarterly for possible other than temporary impairment. The analysis considers (i) whether we have the intent to sell our securities prior to recovery and/or maturity and (ii) whether it is more likely than not that we will not have to sell our securities prior to recovery and/or maturity. Often, the information available to conduct these assessments is limited and rapidly changing, making estimates of fair value subject to judgment. If actual information or conditions are different than estimated, the extent of the impairment of the security may be different than previously estimated, which could have a material effect on the CTBI's results of operations and financial condition.

Loans – Loans with the ability and the intent to be held until maturity and/or payoff are reported at the carrying value of unpaid principal reduced by unearned interest, an allowance for loan and lease losses, and unamortized deferred fees or costs. Income is recorded on the level yield basis. Interest accrual is discontinued when management believes, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful. Any loan greater than 90 days past due must be well secured and in the process of collection to continue accruing interest. Cash payments received on nonaccrual loans generally are applied against principal, and interest income is only recorded once principal recovery is reasonably assured. Loans are not reclassified as accruing until principal and interest payments remain current for a period of time, generally six months, and future payments appear reasonably certain. Included in certain loan categories of impaired loans are troubled debt restructurings that were classified as impaired. A restructuring of a debt constitutes a troubled debt restructuring if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider.

Loan origination and commitment fees and certain direct loan origination costs are deferred and the net amount amortized over the estimated life of the related loans, leases, or commitments as a yield adjustment.

Allowance for Loan and Lease Losses – We maintain an allowance for loan and lease losses (“ALLL”) at a level that is appropriate to cover estimated credit losses on individually evaluated loans determined to be impaired, as well as estimated credit losses inherent in the remainder of the loan and lease portfolio. Credit losses are charged and recoveries are credited to the ALLL.

We utilize an internal risk grading system for commercial credits. Those larger commercial credits that exhibit probable or observed credit weaknesses are subject to individual review. The borrower's cash flow, adequacy of collateral coverage, and other options available to CTBI, including legal remedies, are evaluated. The review of individual loans includes those loans that are impaired as defined by ASC 310-10-35, Impairment of a Loan. We

evaluate the collectability of both principal and interest when assessing the need for loss provision. Historical loss rates are analyzed and applied to other commercial loans not subject to specific allocations. The ALLL allocation for this pool of commercial loans is established based on the historical average, maximum, minimum, and median loss ratios.

A loan is considered impaired when, based on current information and events, it is probable that CTBI will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Homogenous loans, such as consumer installment, residential mortgages, and home equity lines are not individually risk graded. The associated ALLL for these loans is measured under ASC 450, Contingencies.

When any secured commercial loan is considered uncollectable, whether past due or not, a current assessment of the value of the underlying collateral is made. If the balance of the loan exceeds the fair value of the collateral, the loan is placed on nonaccrual and the loan is charged down to the value of the collateral less estimated cost to sell or a specific reserve equal to the difference between book value of the loan and the fair value assigned to the collateral is created until such time as the loan is foreclosed. When the foreclosed collateral has been legally assigned to CTBI, a charge off is taken, if necessary, in order that the remaining balance reflects the fair value estimated less costs to sell of the collateral then transferred to other real estate owned or other repossessed assets. Any unsecured commercial loan is charged off when it is considered uncollectable or no later than at 90 days past due.

All closed-end consumer loans (excluding conventional 1-4 family residential loans and installment and revolving loans secured by real estate) are charged off no later than 120 days (5 monthly payments) delinquent. If a loan is considered uncollectable, it is charged off earlier than 120 days delinquent. For conventional 1-4 family residential loans and installment and revolving loans secured by real estate, when a loan is 90 days past due, a current assessment of the value of the real estate is made. If the balance of the loan exceeds the fair value of the property, the loan is placed on nonaccrual. Foreclosure proceedings are normally initiated after 120 days. When the foreclosed property has been legally assigned to CTBI, the fair value less estimated costs to sell is transferred to other real estate owned and the remaining balance is taken as a charge-off.

Historical loss rates for loans are adjusted for significant factors that, in management's judgment, reflect the impact of any current conditions on loss recognition. We use twelve rolling quarters for our historical loss rate analysis. Factors that we consider include delinquency trends, current economic conditions and trends, strength of supervision and administration of the loan portfolio, levels of underperforming loans, level of recoveries to prior year's charge-offs, trends in loan losses, industry concentrations and their relative strengths, amount of unsecured loans, and underwriting exceptions. Management continually reevaluates the other subjective factors included in its ALLL analysis.

Other Real Estate Owned – When foreclosed properties are acquired, appraisals are obtained and the properties are booked at the current market value less expected sales costs. Additionally, periodic updated appraisals are obtained on unsold foreclosed properties. When an updated appraisal reflects a market value below the current book value, a charge is booked to current earnings to reduce the property to its new market value less expected sales costs. Our policy for determining the frequency of periodic reviews is based upon consideration of the specific properties and the known or perceived market fluctuations in a particular market and is typically between 12 and 18 months but

generally not more than 24 months. All revenues and expenses related to the carrying of other real estate owned are recognized through the income statement.

Income Taxes – Income tax expense is based on the taxes due on the consolidated tax return plus deferred taxes based on the expected future tax benefits and consequences of temporary differences between carrying amounts and tax bases of assets and liabilities, using enacted tax rates. Any interest and penalties incurred in connection with income taxes are recorded as a component of income tax expense in the consolidated financial statements. During the years ended December 31, 2016, 2015, and 2014, CTBI has not recognized a significant amount of interest expense or penalties in connection with income taxes.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

CTBI currently does not engage in any hedging activity or any derivative activity which management considers material. Analysis of CTBI's interest rate sensitivity can be found in the Interest Rate Risk section of Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations.

Item 8. Financial Statements and Supplementary Data

Community Trust Bancorp, Inc. Consolidated Balance Sheets

Notes to Consolidated Financial Statements

1. Accounting Policies

Basis of Presentation – The consolidated financial statements include Community Trust Bancorp, Inc. (“CTBI”) and its subsidiaries, including its principal subsidiary, Community Trust Bank, Inc. (“CTB”). Intercompany transactions and accounts have been eliminated in consolidation.

Nature of Operations – Substantially all assets, liabilities, revenues, and expenses are related to banking operations, including lending, investing of funds, obtaining of deposits, trust and wealth management operations, full service brokerage operations, and other financing activities. All of our business offices and the majority of our business are located in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee.

Use of Estimates – In preparing the consolidated financial statements, management must make certain estimates and assumptions. These estimates and assumptions affect the amounts reported for assets, liabilities, revenues, and expenses, as well as affecting the disclosures provided. Future results could differ from the current estimates. Such estimates include, but are not limited to, the allowance for loan and lease losses, valuation of other real estate owned, fair value of securities and mortgage servicing rights, goodwill, and valuation of deferred tax assets.

The accompanying financial statements have been prepared using values and information currently available to CTBI.

Given the volatility of current economic conditions, the values of assets and liabilities recorded in the financial statements could change rapidly, resulting in material future adjustments in asset values, the allowance for loan and lease losses, and capital.

Cash and Cash Equivalents – CTBI considers all liquid investments with original maturities of three months or less to be cash equivalents. Cash and cash equivalents include cash on hand, amounts due from banks, interest bearing deposits in other financial institutions, and federal funds sold. Generally, federal funds are sold for one-day periods.

Certificates of Deposit in Other Banks – Certificates of deposit in other banks generally mature within 18 months and are carried at cost.

Investments – Management determines the classification of securities at purchase. We classify securities into held-to-maturity, trading, or available-for-sale categories. Held-to-maturity securities are those which we have the positive intent and ability to hold to maturity and are reported at amortized cost. In accordance with Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 320, Investment Securities, investments in debt securities that are not classified as held-to-maturity and equity securities that have readily determinable fair values shall be classified in one of the following categories and measured at fair value in the statement of financial position:

- a. **Trading securities.** Securities that are bought and held principally for the purpose of selling them in the near term (thus held for only a short period of time) shall be classified as trading securities. Trading generally reflects active and frequent buying and selling, and trading securities are generally used with the objective of generating profits on short-term differences in price.
- b. **Available-for-sale securities.** Investments not classified as trading securities (nor as held-to-maturity securities) shall be classified as available-for-sale securities.

We do not have any securities that are classified as trading securities. Available-for-sale securities are reported at fair value, with unrealized gains and losses included as a separate component of shareholders’ equity, net of tax. If declines in fair value are other than temporary, the carrying value of the securities is written down to fair value as a

realized loss with a charge to income for the portion attributable to credit losses and a charge to other comprehensive income for the portion that is not credit related.

Gains or losses on disposition of securities are computed by specific identification for all securities except for shares in mutual funds, which are computed by average cost. Interest and dividend income, adjusted by amortization of purchase premium or discount, is included in earnings.

When the fair value of a security is below its amortized cost, and depending on the length of time the condition exists and the extent the fair market value is below amortized cost, additional analysis is performed to determine whether an other than temporary impairment condition exists. Available-for-sale and held-to-maturity securities are analyzed quarterly for possible other than temporary impairment. The analysis considers (i) whether we have the intent to sell our securities prior to recovery and/or maturity and (ii) whether it is more likely than not that we will not have to sell our securities prior to recovery and/or maturity. Often, the information available to conduct these assessments is limited and rapidly changing, making estimates of fair value subject to judgment. If actual information or conditions are different than estimated, the extent of the impairment of the security may be different than previously estimated, which could have a material effect on the CTBI's results of operations and financial condition.

Loans – Loans with the ability and the intent to be held until maturity and/or payoff are reported at the carrying value of unpaid principal reduced by unearned interest, an allowance for loan and lease losses, and unamortized deferred fees or costs. Income is recorded on the level yield basis. Interest accrual is discontinued when management believes, after considering economic and business conditions, collateral value, and collection efforts, that the borrower's financial condition is such that collection of interest is doubtful. Any loan greater than 90 days past due must be well secured and in the process of collection to continue accruing interest. Cash payments received on nonaccrual loans generally are applied against principal, and interest income is only recorded once principal recovery is reasonably assured. Loans are not reclassified as accruing until principal and interest payments remain current for a period of time, generally six months, and future payments appear reasonably certain. Included in certain loan categories of impaired loans are troubled debt restructurings that were classified as impaired. A restructuring of a debt constitutes a troubled debt restructuring if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider.

Loan origination and commitment fees and certain direct loan origination costs are deferred and the net amount amortized over the estimated life of the related loans, leases, or commitments as a yield adjustment.

Allowance for Loan and Lease Losses – We maintain an allowance for loan and lease losses (“ALLL”) at a level that is appropriate to cover estimated credit losses on individually evaluated loans determined to be impaired, as well as estimated credit losses inherent in the remainder of the loan and lease portfolio. Credit losses are charged and recoveries are credited to the ALLL.

We utilize an internal risk grading system for commercial credits. Those larger commercial credits that exhibit probable or observed credit weaknesses are subject to individual review. The borrower's cash flow, adequacy of collateral coverage, and other options available to CTBI, including legal remedies, are evaluated. The review of individual loans includes those loans that are impaired as defined by ASC 310-10-35, Impairment of a Loan. We evaluate the collectability of both principal and interest when assessing the need for loss provision. Historical loss rates are analyzed and applied to other commercial loans not subject to specific allocations. The ALLL allocation for this pool of commercial loans is established based on the historical average, maximum, minimum, and median loss ratios.

A loan is considered impaired when, based on current information and events, it is probable that CTBI will be unable to collect the scheduled payments of principal or interest when due according to the contractual terms of the loan agreement. Factors considered by management in determining impairment include payment status, collateral value, and the probability of collecting scheduled principal and interest payments when due. Loans that experience

insignificant payment delays and payment shortfalls generally are not classified as impaired. Management determines the significance of payment delays and payment shortfalls on a case-by-case basis, taking into consideration all of the circumstances surrounding the loan and the borrower, including the length of the delay, the reasons for the delay, the borrower's prior payment record, and the amount of the shortfall in relation to the principal and interest owed. Impairment is measured on a loan-by-loan basis for commercial and construction loans by either the present value of expected future cash flows discounted at the loan's effective interest rate, the loan's obtainable market price, or the fair value of the collateral if the loan is collateral dependent.

Homogenous loans, such as consumer installment, residential mortgages, and home equity lines are not individually risk graded. The associated ALLL for these loans is measured under ASC 450, Contingencies.

When any secured commercial loan is considered uncollectable, whether past due or not, a current assessment of the value of the underlying collateral is made. If the balance of the loan exceeds the fair value of the collateral, the loan is placed on nonaccrual and the loan is charged down to the value of the collateral less estimated cost to sell or a specific reserve equal to the difference between book value of the loan and the fair value assigned to the collateral is created until such time as the loan is foreclosed. When the foreclosed collateral has been legally assigned to CTBI, a charge off is taken, if necessary, in order that the remaining balance reflects the fair value estimated less costs to sell of the collateral then transferred to other real estate owned or other repossessed assets. When any unsecured commercial loan is considered uncollectable the loan is charged off no later than at 90 days past due.

All closed-end consumer loans (excluding conventional 1-4 family residential loans and installment and revolving loans secured by real estate) are charged off no later than 120 days (5 monthly payments) delinquent. If a loan is considered uncollectable, it is charged off earlier than 120 days delinquent. For conventional 1-4 family residential loans and installment and revolving loans secured by real estate, when a loan is 90 days past due, a current assessment of the value of the real estate is made. If the balance of the loan exceeds the fair value of the property, the loan is placed on nonaccrual. Foreclosure proceedings are normally initiated after 120 days. When the foreclosed property has been legally assigned to CTBI, the fair value less estimated costs to sell is transferred to other real estate owned and the remaining balance is taken as a charge-off.

Historical loss rates for loans are adjusted for significant factors that, in management's judgment, reflect the impact of any current conditions on loss recognition. We use twelve rolling quarters for our historical loss rate analysis. Factors that we consider include delinquency trends, current economic conditions and trends, strength of supervision and administration of the loan portfolio, levels of underperforming loans, level of recoveries to prior year's charge-offs, trends in loan losses, industry concentrations and their relative strengths, amount of unsecured loans, and underwriting exceptions. Management continually reevaluates the other subjective factors included in its ALLL analysis.

Loans Held for Sale – Mortgage loans originated and intended for sale in the secondary market are carried at the lower of cost or estimated market value in the aggregate. Net unrealized losses, if any, are recognized by charges to income. Gains and losses on loan sales are recorded in noninterest income.

Premises and Equipment – Premises and equipment are stated at cost less accumulated depreciation and amortization. Capital leases are included in premises and equipment at the capitalized amount less accumulated amortization. Premises and equipment are evaluated for impairment on a quarterly basis.

Depreciation and amortization are computed primarily using the straight-line method. Estimated useful lives range up to 40 years for buildings, 2 to 10 years for furniture, fixtures, and equipment, and up to the lease term for leasehold improvements. Capitalized leased assets are amortized on a straight-line basis over the lives of the respective leases.

Federal Home Loan Bank and Federal Reserve Stock – CTB is a member of the Federal Home Loan Bank ("FHLB") system. Members are required to own a certain amount of stock based on the level of borrowings and other factors and may invest additional amounts. FHLB stock is carried at cost, classified as a restricted security, and periodically

evaluated for impairment based on the ultimate recovery par value. Both cash and stock dividends are reported as income.

CTB is also a member of its regional Federal Reserve Bank. Federal Reserve Bank stock is carried at cost, classified as a restricted security, and periodically evaluated for impairment based on the ultimate recovery par value. Both cash and stock dividends are reported as income.

Other Real Estate Owned – When foreclosed properties are acquired, appraisals are obtained and the properties are booked at the current market value less expected sales costs. Additionally, periodic updated appraisals are obtained on unsold foreclosed properties. When an updated appraisal reflects a market value below the current book value, a charge is booked to current earnings to reduce the property to its new market value less expected sales costs. Our policy for determining the frequency of periodic reviews is based upon consideration of the specific properties and the known or perceived market fluctuations in a particular market and is typically between 12 and 18 months but generally not more than 24 months. All revenues and expenses related to the carrying of other real estate owned are recognized through the income statement.

Goodwill and Core Deposit Intangible – We evaluate total goodwill and core deposit intangible for impairment, based upon ASC 350, Intangibles-Goodwill and Other, using fair value techniques including multiples of price/equity. Goodwill and core deposit intangible are evaluated for impairment on an annual basis or as other events may warrant.

The balance of goodwill, at \$65.5 million, has not changed since January 1, 2014. The activity to core deposit intangible for the years ended December 31, 2016, 2015, and 2014 is shown below.

Core Deposit Intangible:

(in thousands)	2016	2015	2014
Beginning balance, January 1	\$291	\$477	\$690
Amortization	(158)	(186)	(213)
Ending balance, December 31	\$133	\$291	\$477

Amortization of core deposit intangible is estimated at approximately \$0.1 million for year one, at which time core deposit intangible will be fully amortized.

Transfers of Financial Assets – Transfers of financial assets are accounted for as sales, when control over the assets has been surrendered. Control over transferred assets is deemed to be surrendered when (1) the assets have been isolated from CTBI—put presumptively beyond the reach of the transferor and its creditors, even in bankruptcy or other receivership, (2) the transferee obtains the right (free of conditions that constrain it from taking advantage of that right) to pledge or exchange the transferred assets, and (3) CTBI does not maintain effective control over the transferred assets through an agreement to repurchase them before their maturity or the ability to unilaterally cause the holder to return specific assets.

Income Taxes – Income tax expense is based on the taxes due on the consolidated tax return plus deferred taxes based on the expected future tax benefits and consequences of temporary differences between carrying amounts and tax bases of assets and liabilities, using enacted tax rates. Any interest and penalties incurred in connection with income taxes are recorded as a component of income tax expense in the consolidated financial statements. During the years ended December 31, 2016, 2015, and 2014, CTBI has not recognized a significant amount of interest expense or penalties in connection with income taxes.

Earnings Per Share (“EPS”) – Basic EPS is calculated by dividing net income available to common shareholders by the weighted average number of common shares outstanding, excluding restricted shares.

Diluted EPS adjusts the number of weighted average shares of common stock outstanding by the dilutive effect of stock options, including restricted shares, as prescribed in ASC 718, Share-Based Payment.

Segments – Management analyzes the operation of CTBI assuming one operating segment, community banking services. CTBI, through its operating subsidiaries, offers a wide range of consumer and commercial community banking services. These services include: (i) residential and commercial real estate loans; (ii) checking accounts; (iii) regular and term savings accounts and savings certificates; (iv) full service securities brokerage services; (v) consumer loans; (vi) debit cards; (vii) annuity and life insurance products; (viii) Individual Retirement Accounts and Keogh plans; (ix) commercial loans; (x) trust and wealth management services; (xi) commercial demand deposit accounts; and (xii) repurchase agreements.

Bank Owned Life Insurance – CTBI’s bank owned life insurance policies are carried at their cash surrender value. We recognize tax-free income from the periodic increases in cash surrender value of these policies and from death benefits.

Mortgage Servicing Rights – Mortgage servicing rights (“MSRs”) are carried at fair market value following the accounting guidance in ASC 860-50, Servicing Assets and Liabilities. MSRs are valued using Level 3 inputs as defined in ASC 820, Fair Value Measurements. The fair value is determined quarterly based on an independent third-party valuation using a discounted cash flow analysis and calculated using a computer pricing model. The system used in this evaluation, Compass Point, attempts to quantify loan level idiosyncratic risk by calculating a risk derived value. As a result, each loan’s unique characteristics determine the valuation assumptions ascribed to that loan. Additionally, the computer valuation is based on key economic assumptions including the prepayment speeds of the underlying loans generated using the Andrew Davidson Prepayment Model, FHLMC/FNMA guidelines, the weighted-average life of the loan, the discount rate, the weighted-average coupon, and the weighted-average default rate, as applicable. Along with the gains received from the sale of loans, fees are received for servicing loans. These fees include late fees, which are recorded in interest income, and ancillary fees and monthly servicing fees, which are recorded in noninterest income. Costs of servicing loans are charged to expense as incurred. Changes in fair market value of the MSRs are reported as an increase or decrease to mortgage banking income.

Share-Based Compensation – CTBI has a share-based employee compensation plan, which is described more fully in note 15 to the consolidated financial statements. CTBI accounts for this plan under the recognition and measurement principles of ASC 718, Share-Based Payment.

Comprehensive Income – Comprehensive income consists of net income and other comprehensive income, net of applicable income taxes. Other comprehensive income includes unrealized appreciation (depreciation) on available-for-sale securities and unrealized appreciation (depreciation) on available-for-sale securities for which a portion of an other than temporary impairment has been recognized in income.

Transfers between Fair Value Hierarchy Levels – Transfers in and out of Level 1 (quoted market prices), Level 2 (other significant observable inputs), and Level 3 (significant unobservable inputs) are recognized on the period ending date.

Reclassifications – Certain reclassifications considered to be immaterial have been made in the prior year consolidated financial statements to conform to current year classifications. These reclassifications had no effect on net income.

New Accounting Standards –

Ø Elimination of Extraordinary Reporting – In January 2015, the FASB issued Accounting Standards Update (“ASU”) No. 2015-01, Income Statement – Extraordinary and Unusual Items (Subtopic 225-20): Simplifying Income Statement Presentation by Eliminating the Concept of Extraordinary Items. ASU No. 2015-01 eliminated from U.S. GAAP the concept of an extraordinary item. The FASB issued this ASU as part of its initiative to reduce complexity in accounting standards. The objective of the simplification initiative was to identify, evaluate, and improve areas of

U.S. GAAP for which cost and complexity could be reduced while maintaining or improving the usefulness of the information provided to the users of financial statements. The amendments in this ASU were effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. The adoption of this ASU did not have an impact on CTBI's consolidated financial statements as no extraordinary items have been presented.

Ø Intangibles – Goodwill and Other – Internal-Use Software – In April 2015, the FASB issued ASU No. 2015-05, Intangibles – Goodwill and Other – Internal-Use Software (Subtopic 350-40). The amendments in this update provided guidance to customers about whether a cloud computing arrangement includes a software license. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance did not change GAAP for a customer's accounting for service contracts. In addition, the guidance in this update supersedes paragraph 350-40-25-16. Consequently, all software licenses within the scope of Subtopic 350-40 are accounted for consistent with other licenses of intangible assets. For public business entities, the amendments were effective for annual periods, including interim periods within those annual periods, beginning after December 15, 2015. The adoption of this ASU did not have a material effect on CTBI's consolidated financial statements.

Ø Income Taxes – In November 2015, the FASB issued ASU No. 2015-17, Income Taxes (Topic 740). Topic 740 requires an entity to separate deferred income tax liabilities and assets into current and noncurrent amounts in a classified statement of financial position. Deferred tax liabilities and assets are classified as current or noncurrent based on the classification of the related asset or liability for financial reporting. Deferred tax liabilities and assets that are not related to an asset or liability for financial reporting are classified according to the expected reversal date of the temporary difference. To simplify the presentation of deferred income taxes, the amendments in this Update require that deferred income tax liabilities and assets be classified as noncurrent in a classified statement of financial position. The amendments in this Update apply to all entities that present a classified statement of financial position. The previous requirement that deferred tax liabilities and assets of a tax-paying component of an entity be offset and presented as a single amount was not affected by the amendments in this Update. For public business entities, the amendments in this Update are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. This ASU has been implemented with no material impact on CTBI's consolidated financial statements.

Ø Financial Instruments – Overall – In January 2016, the FASB issued ASU No. 2016-01, Financial Instruments – Overall (Subtopic 825-10). The amendments in this Update require all equity investments to be measured at fair value with changes in the fair value recognized through net income (other than those accounted for under equity method of accounting or those that result in consolidation of the investee). The amendments in this Update also require an entity to present separately in other comprehensive income the portion of the total change in the fair value of a liability resulting from a change in the instrument-specific credit risk when the entity has elected to measure the liability at fair value in accordance with the fair value option for financial instruments. In addition, the amendments in this Update eliminate the requirement to disclose the method(s) and significant assumptions used to estimate the fair value that is required to be disclosed for financial instruments measured at amortized cost on the balance sheet for public business entities. Public business entities will be required to use the exit price notion when measuring the fair value of financial instruments for disclosure purposes. This Update is the final version of Proposed ASU 2013-220—Financial Instruments—Overall (Subtopic 825-10) and Proposed ASU 2013-221—Financial Instruments—Overall (Subtopic 825-10). For public business entities, the amendments in this Update are effective for fiscal years beginning after December 15, 2017, including interim periods within those fiscal years. The amendments should be applied by means of a cumulative-effect adjustment to the balance sheet as of the beginning of the year of adoption. The amendments related to equity securities without readily determinable fair values (including disclosure requirements) should be applied prospectively to equity investments that exist as of the date of adoption. Management does not expect an impact on CTBI's accounting for equity investments as a result of this ASU. At this time, we cannot quantify the change in the fair value disclosures since we are currently evaluating the full impact of this ASU and are in the planning stages of developing appropriate procedures and processes to comply with the disclosure requirements

of such amendments.

Ø Leases – In February 2016, the FASB issued ASU No. 2016-02, Leases (Topic 842). ASU 2016-02 establishes a right of use model that requires a lessee to record a right of use asset and a lease liability for all leases with terms longer than 12 months. Leases will be classified as either finance or operating, with classification affecting the pattern of expense recognition in the income statement. For lessors, the guidance modifies the classification criteria and the accounting for sales-type and direct financing leases. A lease will be treated as a sale if it transfers all of the risks and rewards, as well as control of the underlying asset, to the lessee. If risks and rewards are conveyed without the transfer of control, the lease is treated as a financing. If the lessor does not convey risks and rewards or control, an operating lease results. The amendments are effective for fiscal years beginning after December 15, 2018, including interim periods within those fiscal years for public business entities. Entities are required to use a modified retrospective approach for leases that exist or are entered into after the beginning of the earliest comparative period in the financial statements, with certain practical expedients available. Early adoption is permitted. CTBI has an implementation team working through the provisions of ASU 2016-02 including reviewing all leases to assess the impact on its accounting and disclosures. CTBI does not anticipate a significant increase in leasing activity between now and the date of adoption. While we expect the impact of this ASU to be significant, we have not finalized our calculation of the estimated amounts as we are currently evaluating certain significant variables within the calculation including the impact of individual renewal options and applicable discount rates for each individual lease.

Ø Investments—Equity Method and Joint Ventures: Simplifying the Transition to the Equity Method of Accounting – In March 2016, the FASB issued ASU No. 2016-07, Investments - Equity Method and Joint Ventures (Topic 323): Simplifying the Transition to the Equity Method of Accounting. The amendments affect all entities that have an investment that becomes qualified for the equity method of accounting as a result of an increase in the level of ownership interest or degree of influence.

The amendments eliminate the requirement that when an investment qualifies for use of the equity method as a result of an increase in the level of ownership interest or degree of influence, an investor must adjust the investment, results of operations, and retained earnings retroactively on a step-by-step basis as if the equity method had been in effect during all previous periods that the investment had been held. The amendments require that the equity method investor add the cost of acquiring the additional interest in the investee to the current basis of the investor's previously held interest and adopt the equity method of accounting as of the date the investment becomes qualified for equity method accounting. Therefore, upon qualifying for the equity method of accounting, no retroactive adjustment of the investment is required.

The amendments require that an entity that has an available-for-sale equity security that becomes qualified for the equity method of accounting recognize through earnings the unrealized holding gain or loss in accumulated other comprehensive income at the date the investment becomes qualified for use of the equity method. The amendments should be applied prospectively upon their effective date to increases in the level of ownership interest or degree of influence that result in the adoption of the equity method.

The amendments became effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2016 and will not have a material impact on CTBI's consolidated financial statements.

Ø Compensation—Stock Compensation: Improvements to Employee Share-Based Payment Accounting – In April 2016, the FASB issued Accounting Standards Update (ASU) No. 2016-09, Compensation - Stock Compensation (Topic 718): Improvements to Employee Share-Based Payment Accounting. The amendments are intended to improve the accounting for employee share-based payments and affect all organizations that issue share-based payment awards to their employees.

Several aspects of the accounting for share-based payment award transactions are simplified, including: (a) income tax consequences; (b) classification of awards as either equity or liabilities; and (c) classification on the statement of cash

flows.

For public companies, the amendments are effective for annual periods beginning after December 15, 2016, and interim periods within those annual periods. CTBI adopted this ASU effective January 1, 2017, and it will not have a material impact on our consolidated financial statements.

Ø Revenue from Contracts with Customers – In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers. The core principle of ASU 2014-09 is that an entity should recognize revenue to depict the transfer of promised goods or services to customers in an amount that reflects the consideration to which the entity expects to be entitled in exchange for those goods or services. The guidance also specifies the accounting for some costs to obtain or fulfill a contract with a customer, as well as enhanced disclosure requirements. In August 2015, the FASB issued ASU 2015-14 which deferred the effective date of ASU 2014-09 to fiscal years, and interim reporting periods within those fiscal years, beginning after December 15, 2017. In March 2016, the FASB issued ASU 2016-08 which clarified the revenue recognition implementation guidance on principal versus agent considerations and is effective during the same period as ASU 2014-09. In April 2016, the FASB issued ASU 2016-10 which clarified the revenue recognition guidance regarding the identification of performance obligations and the licensing implementation and is effective during the same period as ASU 2014-09. In May 2016, the FASB issued ASU 2016-12 which narrowly amended the revenue recognition guidance regarding collectability, noncash consideration, presentation of sales tax, and transition. ASU 2016-12 is effective during the same period as ASU 2014-09. Management is currently evaluating the effects of these ASUs on its financial statements and disclosures but does not expect a material impact on CTBI's consolidated financial statements, as we have determined the majority of the revenues earned by CTBI are not within the scope of ASU 2014-09.

Ø Accounting for Credit Losses – In June 2016, the FASB issued ASU No. 2016-13, Financial Instruments—Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments. The provisions of ASU 2016-13 were issued to provide financial statement users with more decision-useful information about the expected credit losses on financial instruments that are not accounted for at fair value through net income, including loans held for investment, held-to-maturity debt securities, trade and other receivables, net investment in leases and other commitments to extend credit held by a reporting entity at each reporting date. This ASU requires that financial assets measured at amortized cost be presented at the net amount expected to be collected, through an allowance for credit losses that is deducted from the amortized cost basis. The amendments in ASU 2016-13 eliminate the probable incurred loss recognition in current GAAP and reflect an entity's current estimate of all expected credit losses. The measurement of expected credit losses is based upon historical experience, current conditions, and reasonable and supportable forecasts that affect the collectability of the financial assets.

For purchased financial assets with a more-than-insignificant amount of credit deterioration since origination ("PCD assets") that are measured at amortized cost, the initial allowance for credit losses is added to the purchase price rather than being reported as a credit loss expense. Subsequent changes in the allowance for credit losses on PCD assets are recognized through the statement of income as a credit loss expense.

Credit losses relating to available-for-sale debt securities will be recorded through an allowance for credit losses rather than as a direct write-down to the security.

ASU 2016-13 is effective for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2019. Early adoption is permitted for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2018. CTBI has an implementation team working through the provisions of ASU 2016-13 including assessing the impact on its accounting and disclosures.

Ø Statement of Cash Flows – In August 2016, the FASB issued ASU No. 2016-15, Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments. Stakeholders indicated that there is diversity in practice in how certain cash receipts and cash payments are presented and classified in the statement of cash flows

under Topic 230, Statement of Cash Flows, and other Topics. This ASU addresses the following eight specific cash flow issues: Debt prepayment or debt extinguishment costs; settlement of zero-coupon debt instruments or other debt instruments with coupon interest rates that are insignificant in relation to the effective interest rate of the borrowing; contingent consideration payments made after a business combination; proceeds from the settlement of insurance claims; proceeds from the settlement of corporate-owned life insurance policies (COLIs) (including bank-owned life insurance policies (BOLIs)); distributions received from equity method investees; beneficial interests in securitization transactions; and separately identifiable cash flows and application of the predominance principle. The amendments in this Update apply to all entities that are required to present a statement of cash flows under Topic 230. This Update is the final version of Proposed Accounting Standards Update EITF-15F—Statement of Cash Flows—Classification of Certain Cash Receipts and Cash Payments (Topic 230), which has been deleted. The amendments in this Update are effective for public business entities for fiscal years beginning after December 15, 2017, and interim periods within those fiscal years. The amendments in this Update should be applied using a retrospective transition method to each period presented. If it is impracticable to apply the amendments retrospectively for some of the issues, the amendments for those issues would be applied prospectively as of the earliest date practicable. Management intends to adopt this ASU effective January 1, 2018, and we do not expect a material impact on CTBI's consolidated financial statements.

Ø Simplifying the Test for Goodwill Impairment – In January 2017, the FASB issued ASU No. 2017-04, Intangibles – Goodwill and Other (Topic 350) – Simplifying the Test for Goodwill Impairment. These amendments eliminate Step 2 from the goodwill impairment test. The amendments also eliminate the requirements from any reporting unit with a zero or negative carrying amount to perform a qualitative assessment and, if it fails that qualitative test, to perform Step 2 of the goodwill impairment test. An entity still has the option to perform the qualitative assessment for a reporting unit to determine if the quantitative impairment test is necessary. The guidance is effective for fiscal years beginning after December 15, 2019, and interim periods with those fiscal years. ASU 2017-04 should be implemented on a prospective basis. Management does not expect ASU 2017-04 to have an impact on CTBI's consolidated financial statements.

Ø Accounting Changes and Error Correction and Investments – Equity Method and Joint Ventures – In January 2017, the FASB issued ASU No. 2017-03, Accounting Changes and Error Corrections (Topic 250) and Investments -Equity Method and Joint Ventures (Topic 323): Amendments to SEC Paragraphs Pursuant to Staff Announcements at the September 22, 2016 and November 17, 2016 EITF Meetings. ASU 2017-03 provides amendments that add paragraph 250-10-S99-6 which includes the text of "SEC Staff Announcement: Disclosure of the Impact That Recently Issued Accounting Standards Will Have on the Financial Statements of a Registrant When Such Standards Are Adopted in a Future Period (in accordance with Staff Accounting Bulletin (SAB) Topic 11.M). This announcement applies to ASU No. 2014-09, Revenue from Contracts with Customers (Topic 606); ASU No. 2016-02, Leases (Topic 842); and ASU 2016-03, Financial Instruments - Credit Losses (Topic 326): Measurement of Credit Losses on Financial Instruments, and subsequent amendments. CTBI has enhanced its disclosures regarding the impact of recently issued accounting standards adopted in a future period will have on its accounting and disclosures in this footnote.

2. Cash and Due from Banks and Interest Bearing Deposits

Included in cash and due from banks and interest bearing deposits are amounts required to be held at the Federal Reserve or maintained in vault cash in accordance with regulatory reserve requirements. The balance requirements were \$74.1 million and \$69.4 million at December 31, 2016 and 2015, respectively.

At December 31, 2016, CTBI had cash accounts which exceeded federally insured limits, and therefore are not subject to FDIC insurance, with \$93.4 million in deposits with the Federal Reserve, \$23.3 million in deposits with Fifth Third Bank, and \$2.2 million in deposits with the Federal Home Loan Bank.

3. Securities

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

Securities are classified into held-to-maturity and available-for-sale categories. Held-to-maturity (HTM) securities are those that CTBI has the positive intent and ability to hold to maturity and are reported at amortized cost. Available-for-sale (AFS) securities are those that CTBI may decide to sell if needed for liquidity, asset-liability management or other reasons. Available-for-sale securities are reported at fair value, with unrealized gains or losses included as a separate component of equity, net of tax.

The amortized cost and fair value of securities at December 31, 2016 are summarized as follows:

Available-for-Sale

(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. Treasury and government agencies	\$ 223,014	\$ 193	\$ (743)	\$ 222,464
State and political subdivisions	133,351	1,957	(1,792)	133,516
U.S. government sponsored agency mortgage-backed securities	227,574	1,008	(3,526)	225,056
Total debt securities	583,939	3,158	(6,061)	581,036
CRA investment funds	25,000	76	(718)	24,358
Total available-for-sale securities	\$ 608,939	\$ 3,234	\$ (6,779)	\$ 605,394

Held-to-Maturity

(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. Treasury and government agencies	\$ 0	\$ 0	\$ 0	\$ 0
State and political subdivisions	866	1	0	867
Total held-to-maturity securities	\$ 866	\$ 1	\$ 0	\$ 867

The amortized cost and fair value of securities at December 31, 2015 are summarized as follows:

Available-for-Sale

(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. Treasury and government agencies	\$ 240,434	\$ 311	\$ (1,351)	\$ 239,394
State and political subdivisions	125,665	3,707	(157)	129,215
U.S. government sponsored agency mortgage-backed securities	202,282	1,564	(2,270)	201,576
Total debt securities	568,381	5,582	(3,778)	570,185
CRA investment funds	25,000	132	(381)	24,751
Total available-for-sale securities	\$ 593,381	\$ 5,714	\$ (4,159)	\$ 594,936

Held-to-Maturity

(in thousands)	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value
U.S. Treasury and government agencies	\$ 480	\$ 0	\$ (12)	\$ 468
State and political subdivisions	1,181	2	0	1,183
Total held-to-maturity securities	\$ 1,661	\$ 2	\$ (12)	\$ 1,651

The amortized cost and fair value of securities at December 31, 2016 by contractual maturity are shown below. Expected maturities will differ from contractual maturities because issuers may have the right to call or prepay obligations with or without call or prepayment penalties.

(in thousands)	Available-for-Sale		Held-to-Maturity	
	Amortized Cost	Fair Value	Amortized Cost	Fair Value
Due in one year or less	\$ 104,396	\$ 104,383	\$ 0	\$ 0
Due after one through five years	101,799	102,135	866	867
Due after five through ten years	60,047	60,358	0	0
Due after ten years	90,123	89,104	0	0
U.S. government sponsored agency mortgage-backed securities	227,574	225,056	0	0
Total debt securities	583,939	581,036	866	867
CRA investment funds	25,000	24,358	0	0
Total securities	\$ 608,939	\$ 605,394	\$ 866	\$ 867

In 2016, there was a net gain of \$522 thousand realized on sales and calls of AFS securities, consisting of a pre-tax gain of \$529 thousand and a pre-tax loss of \$7 thousand. There was a net loss of \$106 thousand realized in 2015 and a net loss of \$211 thousand realized in 2014.

The amortized cost of securities pledged as collateral, to secure public deposits and for other purposes, was \$221.2 million at December 31, 2016 and \$228.2 million at December 31, 2015.

The amortized cost of securities sold under agreements to repurchase amounted to \$303.5 million at December 31, 2016 and \$285.5 million at December 31, 2015.

CTBI evaluates its investment portfolio on a quarterly basis for impairment. The analysis performed as of December 31, 2016 indicates that all impairment is considered temporary, market and interest rate driven, and not credit-related. The percentage of total investments with unrealized losses as of December 31, 2016 was 65.6% compared to 61.1% as of December 31, 2015. The following tables provide the amortized cost, gross unrealized losses, and fair market value, aggregated by investment category and length of time the individual securities have been in a continuous unrealized loss position as of December 31, 2016 that are not deemed to be other-than-temporarily impaired.

U.S. Treasury and government agencies	\$ 0	\$ 0	\$ 0
Total temporarily impaired HTM securities	\$ 0	\$ 0	\$ 0

U.S. Treasury and Government Agencies

The unrealized losses in U.S. Treasury and government agencies were caused by interest rate increases. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than par which will equal amortized cost at maturity. CTBI does not consider those investments to be other-than-temporarily impaired at December 31, 2016, because CTBI does not intend to sell the investments and it is not more likely than not that we will be required to sell the investments before recovery of their amortized cost, which may be maturity.

State and Political Subdivisions

The unrealized losses in securities of state and political subdivisions were caused by interest rate increases. The contractual terms of those investments do not permit the issuer to settle the securities at a price less than par which will equal amortized cost at maturity. CTBI does not consider those investments to be other-than-temporarily impaired at December 31, 2016, because CTBI does not intend to sell the investments before recovery of their amortized cost and it is not more likely than not that we will be required to sell the investments before recovery of their amortized cost, which may be maturity.

U.S. Government Sponsored Agency Mortgage-Backed Securities

The unrealized losses in U.S. government sponsored agency mortgage-backed securities were caused by interest rate increases. CTBI expects to recover the amortized cost basis over the term of the securities. CTBI does not consider those investments to be other-than-temporarily impaired at December 31, 2016, because (i) the decline in market value is attributable to changes in interest rates and not credit quality, (ii) CTBI does not intend to sell the investments, and (iii) it is not more likely than not we will be required to sell the investments before recovery of their amortized cost, which may be maturity.

CRA Investment Funds

CTBI's CRA investment funds consist of investments in fixed income mutual funds (\$24.4 million of the total fair value and \$718 thousand of the total unrealized losses in common stock investments). The severity of the impairment

(fair value is approximately 2.9% less than cost) and the duration of the impairment correlates with the decline in long-term interest rates in 2016. CTBI evaluated the near-term prospects of these funds in relation to the severity and duration of the impairment. Based on that evaluation, CTBI does not consider those investments to be other-than-temporarily impaired at December 31, 2016.

The analysis performed as of December 31, 2015 indicated that all impairment was considered temporary, market and interest rate driven, and not credit-related. The following tables provide the amortized cost, gross unrealized losses, and fair market value, aggregated by investment category and length of time the individual securities have been in a continuous unrealized loss position as of December 31, 2015 that are not deemed to be other-than-temporarily impaired.

4. Loans

Major classifications of loans, net of unearned income, deferred loan origination costs, and net premiums on acquired loans, are summarized as follows:

	December 31 2016	December 31 2015
(in thousands)		
Commercial construction	\$66,998	\$78,020
Commercial secured by real estate	1,085,428	1,052,919
Equipment lease financing	5,512	8,514
Commercial other	350,159	358,898
Real estate construction	57,966	61,750
Real estate mortgage	702,969	707,874
Home equity	91,511	89,450
Consumer direct	133,093	126,406
Consumer indirect	444,735	390,130
Total loans	\$2,938,371	\$2,873,961

CTBI has segregated and evaluates its loan portfolio through nine portfolio segments. CTBI serves customers in small and mid-sized communities in eastern, northeastern, central, and south central Kentucky, southern West Virginia, and northeastern Tennessee. Therefore, CTBI's exposure to credit risk is significantly affected by changes in these communities.

Commercial construction loans are for the purpose of erecting or rehabilitating buildings or other structures for commercial purposes, including any infrastructure necessary for development. Included in this category are improved property, land development, and tract development loans. The terms of these loans are generally short-term with permanent financing upon completion.

Commercial real estate loans include loans secured by nonfarm, nonresidential properties, 1-4 family/multi-family properties, farmland, and other commercial real estate. These loans are originated based on the borrower's ability to service the debt and secondarily based on the fair value of the underlying collateral.

Equipment lease financing loans are fixed, variable, and tax exempt leases for commercial purposes.

Commercial other loans consist of commercial check loans, agricultural loans, receivable financing, floorplans, loans to financial institutions, loans for purchasing or carrying securities, and other commercial purpose loans. Commercial loans are underwritten based on the borrower's ability to service debt from the business's underlying cash flows. As a general practice, we obtain collateral such as real estate, equipment, or other assets, although such loans may be uncollateralized but guaranteed.

Real estate construction loans are typically for owner-occupied properties. The terms of these loans are generally short-term with permanent financing upon completion.

Residential real estate loans are a mixture of fixed rate and adjustable rate first and second lien residential mortgage loans. As a policy, CTBI holds adjustable rate loans and sells the majority of its fixed rate first lien mortgage loans into the secondary market. Changes in interest rates or market conditions may impact a borrower's ability to meet contractual principal and interest payments. Residential real estate loans are secured by real property.

Home equity lines are revolving adjustable rate credit lines secured by real property.

Consumer direct loans are fixed rate products comprised of unsecured loans, consumer revolving credit lines, deposit secured loans, and all other consumer purpose loans.

Consumer indirect loans are fixed rate loans secured by automobiles, trucks, vans, and recreational vehicles originated at the selling dealership underwritten and purchased by CTBI's indirect lending department. Both new and used products are financed. Only dealers who have executed dealer agreements with CTBI participate in the indirect lending program.

Not included in the loan balances above were loans held for sale in the amount of \$1.2 million at December 31, 2016 and 2015.

Refer to note 1 to the condensed consolidated financial statements for further information regarding our nonaccrual policy. Nonaccrual loans segregated by class of loans were as follows:

*90+ and Accruing are also included in 90+ Days Past Due column.

The risk characteristics of CTBI's material portfolio segments are as follows:

Commercial construction loans generally are made to customers for the purpose of building income-producing properties. Personal guarantees of the principals are generally required. Such loans are made on a projected cash flow basis and are secured by the project being constructed. Construction loan draw procedures are included in each specific loan agreement, including required documentation items and inspection requirements. Construction loans may convert to term loans at the end of the construction period, or may be repaid by the take-out commitment from another financing source. If the loan is to convert to a term loan, the repayment ability is based on the borrower's projected cash flow. Risk is mitigated during the construction phase by requiring proper documentation and inspections whenever a draw is requested. Loans in amounts greater than \$500,000 generally require a performance bond to be posted by the general contractor to assure completion of the project.

Commercial real estate loans are viewed primarily as cash flow loans and secondarily as loans secured by real estate. Commercial real estate lending typically involves higher loan principal amounts and the repayment of these loans is generally dependent on the successful operation of the property securing the loan or the business conducted on the property securing the loan. Commercial real estate loans may be more adversely affected by conditions in the real estate markets or in the general economy. Management monitors and evaluates commercial real estate loans based on collateral and risk grade criteria.

Equipment lease financing is underwritten by our commercial lenders using the same underwriting standards as would be applied to a secured commercial loan requesting 100% financing. The pricing for equipment lease financing is comparable to that of borrowers with similar quality commercial credits with similar collateral. Maximum terms of equipment leasing are determined by the type and expected life of the equipment to be leased. Residual values are determined by appraisals or opinion letters from industry experts. Leases must be in conformity with our consolidated annual tax plan. As we underwrite our equipment lease financing in a manner similar to our commercial loan portfolio described below, the risk characteristics for this portfolio mirror that of the commercial loan portfolio.

Commercial loans are primarily based on the identified cash flows of the borrower and secondarily on the underlying collateral provided by the borrower. The cash flows of borrowers, however, may not be as expected and the collateral securing these loans may fluctuate in value. Most commercial loans are secured by the assets being financed or other business assets such as accounts receivable or inventory and may incorporate a personal guarantee; however, some

short-term loans may be made on an unsecured basis. In the case of loans secured by accounts receivable, the availability of funds for the repayment of these loans may be substantially dependent on the ability of the borrower to collect amounts due from its customers.

With respect to residential loans that are secured by 1-4 family residences and are generally owner occupied, CTBI generally establishes a maximum loan-to-value ratio and requires private mortgage insurance if that ratio is exceeded. Home equity loans are typically secured by a subordinate interest in 1-4 family residences. Residential construction loans are handled through the home mortgage area of the bank. The repayment ability of the borrower and the maximum loan-to-value ratio are calculated using the normal mortgage lending criteria. Draws are processed based on percentage of completion stages including normal inspection procedures. Such loans generally convert to term loans after the completion of construction.

Consumer loans are secured by consumer assets such as automobiles or recreational vehicles. Some consumer loans are unsecured such as small installment loans and certain lines of credit. Our determination of a borrower's ability to repay these loans is primarily dependent on the personal income and credit rating of the borrowers, which can be impacted by economic conditions in their market areas such as unemployment levels. Repayment can also be impacted by changes in property values on residential properties. Risk is mitigated by the fact that the loans are of smaller individual amounts and spread over a large number of borrowers.

The indirect lending area of the bank generally deals with purchasing/funding consumer contracts with new and used automobile dealers. The dealers generate consumer loan applications which are forwarded to the indirect loan processing area for approval or denial. Loan approvals or denials are based on the creditworthiness and repayment ability of the borrower, and on the collateral value. The dealers may have recourse agreements with CTB.

Credit Quality Indicators:

CTBI categorizes loans into risk categories based on relevant information about the ability of borrowers to service their debt such as: current financial information, historical payment experience, credit documentation, public information, and current economic trends, among other factors. CTBI also considers the fair value of the underlying collateral and the strength and willingness of the guarantor(s). CTBI analyzes commercial loans individually by classifying the loans as to credit risk. Loans classified as loss, doubtful, substandard, or special mention are reviewed quarterly by CTBI for further deterioration or improvement to determine if appropriately classified and valued if deemed impaired. All other commercial loan reviews are completed every 12 to 18 months. In addition, during the renewal process of any loan, as well as if a loan becomes past due or if other information becomes available, CTBI will evaluate the loan grade. CTBI uses the following definitions for risk ratings:

Pass grades include investment grade, low risk, moderate risk, and acceptable risk loans. The loans range from Ø loans that have no chance of resulting in a loss to loans that have a limited chance of resulting in a loss. Customers in this grade have excellent to fair credit ratings. The cash flows are adequate to meet required debt repayments.

Watch graded loans are loans that warrant extra management attention but are not currently criticized. Loans on the Ø watch list may be potential troubled credits or may warrant "watch" status for a reason not directly related to the asset quality of the credit. The watch grade is a management tool to identify credits which may be candidates for future classification or may temporarily warrant extra management monitoring.

Other assets especially mentioned (OAEM) reflects loans that are currently protected but are potentially weak. These loans constitute an undue and unwarranted credit risk but not to the point of justifying a classification of Ø substandard. The credit risk may be relatively minor yet constitute an unwarranted risk in light of circumstances surrounding a specific asset. Loans in this grade display potential weaknesses which may, if unchecked or uncorrected, inadequately protect CTBI's credit position at some future date. The loans may be adversely affected by economic or market conditions.

Substandard grading indicates that the loan is inadequately protected by the current sound worth and paying capacity of the obligor or of the collateral pledged. These loans have a well-defined weakness or weaknesses that jeopardize the orderly liquidation of the debt with the distinct possibility that CTBI will sustain some loss if the deficiencies are not corrected.

Doubtful graded loans have the weaknesses inherent in the substandard grading with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable. The probability of loss is extremely high, but because of certain important and reasonably specific pending factors which may work to CTBI's advantage or strengthen the asset(s), its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral, and refinancing plans.

The following tables present the credit risk profile of CTBI's commercial loan portfolio based on rating category and payment activity, segregated by class of loans, as of December 31, 2016 and 2015:

Total	\$ 61,750	\$707,874	\$89,450	\$126,406	\$390,130	\$1,375,610

(1) A loan is considered nonperforming if it is 90 days or more past due or on nonaccrual.

The total of consumer mortgage loans secured by real estate properties for which formal foreclosure proceedings are in process totaled \$3.5 million at December 31, 2016 compared to \$4.4 million at December 31, 2015.

A loan is considered impaired, in accordance with the impairment accounting guidance (ASC 310-10-35-16), when based on current information and events, it is probable CTBI will be unable to collect all amounts due from the borrower in accordance with the contractual terms of the loan. Impaired loans include nonperforming commercial loans but also include loans modified in troubled debt restructurings where concessions have been granted to borrowers experiencing financial difficulties. These concessions could include a reduction in the interest rate on the loan, payment extensions, forgiveness of principal, forbearance, or other actions intended to maximize collection.

The following table presents impaired loans, the average investment in impaired loans, and interest income recognized on impaired loans for the years ended December 31, 2016, 2015, and 2014:

*Cash basis interest is substantially the same as interest income recognized.

Included in certain loan categories of impaired loans are certain loans and leases that have been modified in a troubled debt restructuring, where economic concessions have been granted to borrowers who have experienced financial difficulties. These concessions typically result from our loss mitigation activities and could include reductions in the interest rate, payment extensions, forgiveness of principal, forbearance or other actions. Modifications of terms for our loans and their inclusion as troubled debt restructurings are based on individual facts and circumstances. Loan modifications that are included as troubled debt restructurings may involve either an increase or reduction of the interest rate, extension of the term of the loan, or deferral of principal and/or interest payments, regardless of the period of the modification. All of the loans identified as troubled debt restructuring were modified due to financial stress of the borrower. In order to determine if a borrower is experiencing financial difficulty, an evaluation is performed to determine the probability that the borrower will be in payment default on any of its debt in the foreseeable future with the modification. This evaluation is performed under CTBI's internal underwriting policy.

When we modify loans and leases in a troubled debt restructuring, we evaluate any possible impairment similar to other impaired loans based on the present value of expected future cash flows, discounted at the contractual interest rate of the original loan or lease agreement, or use the current fair value of the collateral, less selling costs for

collateral dependent loans. If we determined that the value of the modified loan is less than the recorded investment in the loan (net of previous charge-offs, deferred loan fees or costs and unamortized premium or discount), impairment is recognized through an allowance estimate or a charge-off to the allowance. In periods subsequent to modification, we evaluate all troubled debt restructuring, including those that have payment defaults, for possible impairment and recognize impairment through the allowance.

During 2016, certain loans were modified in troubled debt restructurings, where economic concessions were granted to borrowers consisting of reductions in the interest rates, payment extensions, forgiveness of principal, and forbearances. Presented below, segregated by class of loans, are troubled debt restructurings that occurred during the years ended December 31, 2016 and 2015:

(in thousands)	Year Ended December 31, 2016				
	Number of Loans	Term Modification	Rate Modification	Combination	Post-Modification Outstanding Balance
Commercial:					
Commercial construction	1	\$ 1,288	\$ 0	\$ 0	\$ 1,288
Commercial secured by real estate	27	8,827	0	581	9,408
Commercial other	14	5,088	0	87	5,175
Residential:					
Real estate mortgage	1	0	0	281	281
Total troubled debt restructurings	43	\$ 15,203	\$ 0	\$ 949	\$ 16,152

(in thousands)	Year Ended December 31, 2015				
	Number of Loans	Term Modification	Rate Modification	Combination	Post-Modification Outstanding Balance
Commercial:					
Commercial construction	3	\$ 428	\$ 0	\$ 0	\$ 428
Commercial secured by real estate	21	4,244	0	1,760	6,004
Commercial other	7	3,847	0	0	3,847
Residential:					
Real estate mortgage	3	0	0	848	848
Total troubled debt restructurings	34	\$ 8,519	\$ 0	\$ 2,608	\$ 11,127

No charge-offs have resulted from modifications for any of the presented periods. We have commitments to extend additional credit in the amount of \$0.1 million on loans that are considered troubled debt restructurings.

Loans retain their accrual status at the time of their modification. As a result, if a loan is on nonaccrual at the time it is modified, it stays as nonaccrual, and if a loan is on accrual at the time of the modification, it generally stays on accrual. Commercial and consumer loans modified in a troubled debt restructuring are closely monitored for delinquency as an early indicator of possible future default. If loans modified in a troubled debt restructuring subsequently default, CTBI evaluates the loan for possible further impairment. The allowance for loan and lease losses may be increased, adjustments may be made in the allocation of the allowance, or partial charge-offs may be taken to further write-down the carrying value of the loan. Presented below, segregated by class of loans, are loans that were modified as troubled debt restructurings within the past twelve months which have subsequently defaulted. CTBI considers a loan in default when it is 90 days or more past due or transferred to nonaccrual.

(in thousands) Year Ended

	Number of Recorded Loans	Balance
Commercial:		
Commercial secured by real estate	1	\$ 67
Commercial other	1	12
Total defaulted restructured loans	2	\$ 79

	Year Ended December 31, 2015	
(in thousands)	Number of Recorded Loans	Balance
Commercial:		
Commercial secured by real estate	3	\$ 114
Total defaulted restructured loans	3	\$ 114

5. Mortgage Banking and Servicing Rights

Mortgage banking activities primarily include residential mortgage originations and servicing. As discussed in note 1 above, mortgage servicing rights (“MSRs”) are carried at fair market value. The fair value is determined quarterly based on an independent third-party valuation using a discounted cash flow analysis and calculated using a computer pricing model. The system used in this evaluation, Compass Point, attempts to quantify loan level idiosyncratic risk by calculating a risk derived value. As a result, each loan’s unique characteristics determine the valuation assumptions ascribed to that loan. Additionally, the computer valuation is based on key economic assumptions including the prepayment speeds of the underlying loans generated using the Andrew Davidson Prepayment Model, FHLMC/FNMA guidelines, the weighted average life of the loan, the discount rate, the weighted average coupon, and the weighted-average default rate, as applicable. Along with the gains received from the sale of loans, fees are received for servicing loans. These fees include late fees, which are recorded in interest income, and ancillary fees and monthly servicing fees, which are recorded in noninterest income. Costs of servicing loans are charged to expense as incurred. Changes in fair market value of the MSRs are reported as an increase or decrease to mortgage banking income.

The following table presents the components of mortgage banking income:

(in thousands)	2016	2015	2014
Year Ended December 31			
Net gain on sale of loans held for sale	\$1,831	\$1,978	\$1,468
Net loan servicing income (expense)			
Servicing fees	1,239	1,197	1,129
Late fees	78	88	112
Ancillary fees	322	212	149
Fair value adjustments	(324)	(289)	(830)
Net loan servicing income	1,315	1,208	560
Mortgage banking income	\$3,146	\$3,186	\$2,028

Mortgage loans serviced for others are not included in the accompanying balance sheets. Loans serviced for the benefit of others (primarily FHLMC) totaled \$466 million, \$458 million, and \$441 million at December 31, 2016,

2015 and 2014, respectively. Servicing loans for others generally consists of collecting mortgage payments, maintaining escrow accounts, disbursing payments to investors, and processing foreclosures. Custodial escrow balances maintained in connection with the foregoing loan servicing, and included in demand deposits, were approximately \$1.0 million, \$1.0 million, and \$0.9 million at December 31, 2016, 2015, and 2014, respectively.

Activity for capitalized mortgage servicing rights using the fair value method is as follows:

(in thousands)	2016	2015	2014
Fair value of MSRs, beginning of period	\$3,236	\$2,968	\$3,424
New servicing assets created	521	557	374
Change in fair value during the period due to:			
Time decay (1)	(175)	(168)	(162)
Payoffs (2)	(313)	(247)	(202)
Changes in valuation inputs or assumptions (3)	164	126	(466)
Fair value of MSRs, end of period	\$3,433	\$3,236	\$2,968

(1) Represents decrease in value due to regularly scheduled loan principal payments and partial loan paydowns.

(2) Represents decrease in value due to loans that paid off during the period.

(3) Represents change in value resulting from market-driven changes in interest rates.

The fair values of capitalized mortgage servicing rights were \$3.4 million, \$3.2 million, and \$3.0 million at December 31, 2016, 2015, and 2014, respectively. Fair values for the years ended December 31, 2016, 2015, and 2014 were determined by third-party valuations with a resulting 10.1% average discount rate over the last three years, respectively, and weighted average default rates of 3.02%, 2.64%, and 3.61%, respectively. Prepayment speeds generated using the Andrew Davidson Prepayment Model averaged 9.5%, 10.0%, and 11.3% at December 31, 2016, 2015, and 2014, respectively. MSR values are very sensitive to movement in interest rates as expected future net servicing income depends on the projected balance of the underlying loans, which can be greatly impacted by the level of prepayments. CTBI does not currently hedge against changes in the fair value of its MSR portfolio.

6. Related Party Transactions

In the ordinary course of business, CTB has made extensions of credit and had transactions with certain directors and executive officers of CTBI or our subsidiaries, including their associates (as defined by the Securities and Exchange Commission). We believe such extensions of credit and transactions were made on substantially the same terms, including interest rate and collateral, as those prevailing at the same time for comparable transactions with other persons.

Activity for related party extensions of credit during 2016 and 2015 is as follows:

(in thousands)	2016	2015
Related party extensions of credit, beginning of period	\$29,224	\$37,473
New loans and advances on lines of credit	2,456	867
Repayments	(4,599)	(9,116)
Related party extensions of credit, end of period	\$27,081	\$29,224

The aggregate balances of related party deposits at December 31, 2016 and 2015 were \$15.5 million and \$12.5 million, respectively.

A director of CTBI is a shareholder in a law firm that provided services to CTBI and its subsidiaries during the years 2016, 2015, and 2014. Approximately \$1.0 million in legal fees and \$0.1 million in expenses paid on behalf of CTBI, \$1.1 million total, were paid to this law firm during 2016. Approximately \$1.2 million in legal fees and \$0.1 million

in expenses, \$1.3 million total, were paid during 2015, and approximately \$1.0 million in legal fees and \$0.1 million in expenses, \$1.1 million in total, were paid during 2014.

7. Allowance for Loan and Lease Losses

The following tables present the balance in the allowance for loan and lease losses (“ALLL”) and the recorded investment in loans based on portfolio segment and impairment method as of December 31, 2016, 2015, and 2014:

2016

(in thousands)	Commercial Construction	Commercial Secured by Real Estate	Equipment Lease Financing	Commercial Other	Real Estate Construction	Real Estate Mortgage	Home Equity	Consumer Direct	Consumer Indirect	Total
ALLL Balance, beginning of year	\$2,199	\$14,434	\$79	\$4,225	\$550	\$6,678	\$839	\$1,594	\$5,496	\$36,094

8. Premises and Equipment

Premises and equipment are summarized as follows:

(in thousands)

December 31	2016	2015
Land and buildings	\$78,086	\$76,709
Leasehold improvements	4,886	4,793
Furniture, fixtures, and equipment	36,831	35,382
Construction in progress	769	196
Total premises and equipment	120,572	117,080
Less accumulated depreciation and amortization	(72,632)	(68,892)
Premises and equipment, net	\$47,940	\$48,188

Depreciation and amortization of premises and equipment for 2016, 2015, and 2014 was \$3.7 million, \$3.7 million, and \$4.1 million, respectively.

9. Other Real Estate Owned

Activity for other real estate owned was as follows:

(in thousands)	2016	2015
Beginning balance of other real estate owned	\$40,674	\$36,776
New assets acquired	5,900	18,850

Capitalized costs	0	85
Fair value adjustments	(1,214)	(1,656)
Sale of assets	(9,504)	(13,381)
Ending balance of other real estate owned	\$35,856	\$40,674

Carrying costs and fair value adjustments associated with foreclosed properties were \$2.9 million, \$3.5 million, and \$3.9 million for 2016, 2015, and 2014, respectively. See note 1 for a description of our accounting policies relative to foreclosed properties and other real estate owned.

The major classifications of foreclosed properties are shown in the following table:

(in thousands)		
December 31	2016	2015
1-4 family	\$6,210	\$7,493
Agricultural/farmland	93	116
Construction/land development/other	20,778	22,570
Multifamily	270	833
Non-farm/non-residential	8,505	9,662
Total foreclosed properties	\$35,856	\$40,674

10. Deposits

Major classifications of deposits are categorized as follows:

(in thousands)		
December 31	2016	2015
Noninterest bearing deposits	\$767,918	\$749,975
NOW accounts	45,872	44,567
Money market deposits	649,917	614,911
Savings	404,558	382,131
Certificates of deposit and other time deposits of \$100,000 or more	651,882	606,859
Certificates of deposit and other time deposits less than \$100,000	561,161	582,339
Total deposits	\$3,081,308	\$2,980,782

Certificates of deposit and other time deposits of \$250,000 or more at December 31, 2016 and 2015 were \$228.6 million and \$190.6 million, respectively.

Maturities of certificates of deposits and other time deposits are presented below:

	Maturities by Period at December 31, 2016						
		Within 1					After
(in thousands)	Total	Year	2 Years	3 Years	4 Years	5 Years	5 Years
Certificates of deposit and other time deposits of \$100,000 or more	\$651,882	\$516,384	\$56,494	\$23,180	\$24,074	\$31,750	\$0
Certificates of deposit and other time deposits less than \$100,000	561,161	471,912	38,109	17,628	13,354	19,830	328
Total maturities	\$1,213,043	\$988,296	\$94,603	\$40,808	\$37,428	\$51,580	\$328

11. Borrowings

Short-term debt is categorized as follows:

(in thousands)

December 31	2016	2015
Repurchase agreements	\$251,065	\$251,225
Federal funds purchased	4,816	3,596
Total short-term debt	\$255,881	\$254,821

All federal funds purchased mature and reprice daily. See note 12 for information regarding the maturities of our repurchase agreements. The average rates paid for federal funds purchased and repurchase agreements on December 31, 2016 were 0.54% and 0.51%, respectively.

The maximum balance for repurchase agreements at any month-end during 2016 occurred at October 31, 2016, with a month-end balance of \$264.5 million. The average balance of repurchase agreements for the year was \$256.6 million.

On October 5, 2016, Community Trust Bancorp, Inc. entered into a revolving credit promissory note for a line of credit in the amount of \$12 million at a floating interest rate of 2.00% in excess of the one-month LIBOR Rate, with an unused commitment fee of 0.15%. Currently, all \$12 million remain available for general corporate purposes. The agreement, which was effective October 5, 2016, replaced the agreement dated November 2, 2015, and will mature on October 31, 2017.

Long-term debt is categorized as follows:

(in thousands)

December 31	2016	2015
Junior subordinated debentures, 2.52%, due 6/1/37	\$61,341	\$61,341

On March 31, 2007, CTBI issued \$61.3 million in junior subordinated debentures to a newly formed unconsolidated Delaware statutory trust subsidiary which in turn issued \$59.5 million of capital securities in a private placement to institutional investors. The debentures, which mature in 30 years but are redeemable at par at CTBI's option after five years, were issued at a rate of 6.52% until June 1, 2012, and thereafter at a floating rate based on the three-month LIBOR plus 1.59%. The underlying capital securities were issued at the equivalent rates and terms. The proceeds of the debentures were used to fund the redemption on April 2, 2007 of all CTBI's outstanding 9.0% and 8.25% junior subordinated debentures in the total amount of \$61.3 million.

On November 29, 2016, the coupon rate was set at 2.52% for the March 1, 2017 distribution date, which was based on the three-month LIBOR rate as of November 29, 2016 of 0.93% plus 1.59%.

12. Repurchase Agreements

We utilize securities sold under agreements to repurchase to facilitate the needs of our customers and provide additional funding to our balance sheet. Repurchase agreements are transactions whereby we offer to sell to a counterparty an undivided interest in an eligible security at an agreed upon purchase price, and which obligates CTBI to repurchase the security on an agreed upon date at an agreed upon repurchase price plus interest at an agreed upon rate. Securities sold under agreements to repurchase are recorded at the amount of cash received in connection with the transaction and are reflected in the accompanying consolidated balance sheets.

We monitor collateral levels on a continuous basis and maintain records of each transaction specifically describing the applicable security and the counterparty's fractional interest in that security, and we segregate the security from its general assets in accordance with regulations governing custodial holdings of securities. The primary risk with our repurchase agreements is market risk associated with the securities securing the transactions, as we may be required to

provide additional collateral based on fair value changes of the underlying securities. Securities pledged as collateral under repurchase agreements are maintained with our safekeeping agents. The carrying value of investment securities available for sale pledged as collateral under repurchase agreements totaled \$302.3 million and \$288.1 million at December 31, 2016 and December 31, 2015, respectively.

The remaining contractual maturity of the securities sold under agreements to repurchase by class of collateral pledged included in the accompanying consolidated balance sheets as of December 31, 2016 and December 31, 2015 is presented in the following tables:

(in thousands)	December 31, 2016				
	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Up to 30 days	30-90 days	Greater Than 90 days	Total
Repurchase agreements and repurchase-to-maturity transactions:					
U.S. Treasury and government agencies	\$17,249	\$ 0	\$14,349	\$73,076	\$104,674
State and political subdivisions	55,354	0	1,998	10,272	67,624
U.S. government sponsored agency mortgage-backed securities	23,386	0	8,003	47,378	78,767
Total	\$95,989	\$ 0	\$24,350	\$130,726	\$251,065

(in thousands)	December 31, 2015				
	Remaining Contractual Maturity of the Agreements				
	Overnight and Continuous	Up to 30 days	30-90 days	Greater Than 90 days	Total
Repurchase agreements and repurchase-to-maturity transactions:					
U.S. Treasury and government agencies	\$19,184	\$0	\$10,401	\$48,695	\$78,280
State and political subdivisions	58,676	494	1,656	9,159	69,985
U.S. government sponsored agency mortgage-backed securities	27,810	6	12,278	62,866	102,960
Total	\$105,670	\$500	\$24,335	\$120,720	\$251,225

13. Advances from Federal Home Loan Bank

Federal Home Loan Bank advances consisted of the following monthly amortizing and term borrowings at December 31:

(in thousands)	2016	2015
Monthly amortizing	\$944	\$1,056
Term	0	100,000
Total FHLB advances	\$944	\$101,056

The advances from the FHLB that require monthly principal payments were due for repayment as follows:

(in thousands)	Principal Payments Due by Period at December 31, 2016						
	Total	Within 1 Year	2 Years	3 Years	4 Years	5 Years	After 5

							Years
Outstanding advances, weighted average interest rate – 1.33%	\$944	\$ 106	\$ 404	\$ 20	\$ 20	\$ 20	\$ 374

At December 31, 2015, CTBI had monthly amortizing FHLB advances totaling \$1.1 million at a weighted average interest rate of 1.53%.

CTBI utilizes the FHLB cash management advance to facilitate any short-term funding needs. These short-term advances typically have a two-week maturity and require the total payment to be made at maturity. At December 31, 2016, there were no short-term advances. At December 31, 2015, CTBI had a \$100.0 million term advance with a fixed interest rate of 0.34% and a maturity date of January 6, 2016.

Advances totaling \$0.9 million at December 31, 2016 were collateralized by FHLB stock of \$17.9 million and a blanket lien on qualifying 1-4 family first mortgage loans. As of December 31, 2016, CTBI had a \$522.8 million FHLB borrowing capacity with \$0.9 million in advances and \$226.1 million in letters of credit used for public fund pledging leaving \$295.8 million available for additional advances. The advances had fixed interest rates ranging from 0.00% to 6.03% with a weighted average rate of 1.33%. The advances are subject to restrictions or penalties in the event of prepayment.

14. Income Taxes

The components of the provision for income taxes, exclusive of tax effect of unrealized securities gains and losses, are as follows:

(in thousands)	2016	2015	2014
Current income tax expense	\$18,417	\$18,416	\$20,194
Deferred income tax expense (benefit)	701	115	(1,048)
Total income tax expense	\$19,118	\$18,531	\$19,146

A reconciliation of income tax expense at the statutory rate to our actual income tax expense is shown below:

(in thousands)	2016		2015		2014	
Computed at the statutory rate	\$23,262	35.00%	\$22,737	35.00%	\$21,839	35.00%
Adjustments resulting from:						
Tax-exempt interest	(1,289)	(1.94)	(1,275)	(1.96)	(1,204)	(1.93)
Housing and new markets credits	(2,680)	(4.03)	(2,692)	(4.14)	(1,076)	(1.72)
Dividends received deduction	(136)	(0.20)	(128)	(0.20)	(178)	(0.29)
Bank owned life insurance	(518)	(0.78)	(549)	(0.84)	(503)	(0.81)
ESOP dividend deduction	(313)	(0.47)	(298)	(0.46)	(284)	(0.46)
Other, net	792	1.18	736	1.13	552	0.89
Total	\$19,118	28.76%	\$18,531	28.53%	\$19,146	30.68%

The components of the net deferred tax liability as of December 31 are as follows:

(in thousands)	2016	2015
Deferred tax assets:		
Allowance for loan and lease losses	\$12,577	\$12,633
Interest on nonperforming loans	806	806
Accrued expenses	1,883	2,087
Allowance for other real estate owned	1,898	2,185
Unrealized losses on available-for-sale securities	1,241	0
Other	282	665

Total deferred tax assets	18,687	18,376
Deferred tax liabilities:		
Depreciation and amortization	(20,287)	(20,150)
FHLB stock dividends	(3,460)	(3,460)
Loan fee income	(536)	(552)
Mortgage servicing rights	(1,202)	(1,133)
Capitalized lease obligations	(65)	(211)
Unrealized gains on AFS securities	0	(544)
Limited partnership investments	(411)	(650)
Other	(562)	(596)
Total deferred tax liabilities	(26,523)	(27,296)
Net deferred tax liability	\$(7,836)	\$(8,920)

CTBI accounts for income taxes in accordance with income tax accounting guidance (ASC 740, Income Taxes). The income tax accounting guidance results in two components of income tax expense: current and deferred. Current income tax expense reflects taxes to be paid or refunded for the current period by applying the provisions of the enacted tax law to the taxable income or excess of deductions over revenues. CTBI determines deferred income taxes using the liability (or balance sheet) method. Under this method, the net deferred tax asset or liability is based on the tax effects of the differences between the book and tax bases of assets and liabilities, and enacted changes in tax rates and laws are recognized in the period in which they occur. Deferred income tax expense results from changes in deferred tax assets and liabilities between periods. Deferred tax assets are reduced by a valuation allowance if, based on the weight of evidence available, it is more likely than not that some portion or all of a deferred tax asset will not be realized.

Uncertain tax positions are recognized if it is more likely than not, based on the technical merits, that the tax position will be realized or sustained upon examination. The term more likely than not means a likelihood of more than 50 percent; the terms examined and upon examination also include resolution of the related appeals or litigation processes, if any. A tax position that meets the more-likely-than-not recognition threshold is initially and subsequently measured as the largest amount of tax benefit that has a greater than 50 percent likelihood of being realized upon settlement with a taxing authority that has full knowledge of all relevant information. The determination of whether or not a tax position has met the more-likely-than-not recognition threshold considers the facts, circumstances, and information available at the reporting date and is subject to management's judgment.

With a few exceptions, CTBI is no longer subject to U.S. federal tax examinations by tax authorities for years before 2013, and state and local income tax examinations by tax authorities for years before 2012. For federal tax purposes, CTBI recognizes interest and penalties on income taxes as a component of income tax expense.

CTBI files consolidated income tax returns with its subsidiaries.

15. Employee Benefits

CTBI maintains two separate retirement savings plans, a 401(k) Plan and an Employee Stock Ownership Plan ("ESOP").

The 401(k) Plan is available to all employees (age 21 and over) with one year of service and who work at least 1,000 hours per year. Participants in the plan have the option to contribute from 1% to 20% of their annual compensation. CTBI matches 50% of participant contributions up to 4% of gross pay. CTBI may at its discretion, contribute an additional percentage of covered employees' compensation. CTBI's matching contributions were \$1.0 million for the years ended December 31, 2016, 2015, and 2014. The 401(k) Plan owned 482,426, 515,062, and 503,082 shares of

CTBI's common stock at December 31, 2016, 2015, and 2014, respectively. Substantially all shares owned by the 401(k) were allocated to employee accounts on those dates. The market price of the shares at the date of allocation is essentially the same as the market price at the date of purchase.

The ESOP Plan has the same entrance requirements as the 401(k) Plan above. CTBI currently contributes 4% of covered employees' gross compensation to the ESOP. The ESOP uses the contributions to acquire shares of CTBI's common stock. CTBI's contributions to the ESOP were \$1.5 million for the years ended December 31, 2016, 2015, and 2014. The ESOP owned 788,308, 765,630, and 752,710 shares of CTBI's common stock at December 31, 2016, 2015, and 2014, respectively. Substantially all shares owned by the ESOP were allocated to employee accounts on those dates. The market price of the shares at the date of allocation is essentially the same as the market price at the date of purchase.

Stock-Based Compensation:

As of December 31, 2016, CTBI maintained one active and two inactive incentive stock ownership plans covering key employees. The 2015 Stock Ownership Incentive Plan ("2015 Plan") was approved by the Board of Directors and the Shareholders in 2015. The 2006 Stock Ownership Incentive Plan ("2006 Plan") was approved by the Board of Directors and the Shareholders in 2006. The 2006 Plan was rendered inactive as of April 28, 2015. The 1998 Stock Option Plan ("1998 Plan") was approved by the Board of Directors and the Shareholders in 1998. The 1998 Plan was rendered inactive as of April 26, 2006. The 2015 Plan has 550,000 shares authorized, 540,131 of which were available at December 31, 2016. Shares issuable pursuant to awards which were granted under the prior plans on or before their respective expiration or termination dates will be issued from the remaining shares reserved for issuance under the prior plans. The shares of common stock reserved for issuance under the prior plans in excess of the number of shares as to which options or other benefits are awarded thereunder, and any shares as to which options or other benefits granted under the prior plans may lapse, expire, terminate or be canceled, will not be reserved and available for issuance or reissuance under the 2015 Plan. In January 2016, 18,069 shares were issued under the terms of the 2015 Plan pursuant to awards granted and earned under the 2006 Plan. Accordingly, this issuance did not reduce the shares available under the 2015 Plan. Additional shares will not be issued under the 2015 Plan pursuant to awards granted under the 2006 Plan. The following table provides detail of the number of shares to be issued upon exercise of outstanding stock-based awards and remaining shares available for future issuance under all of CTBI's equity compensation plans as of December 31, 2016:

Plan Category (shares in thousands)	Number of Shares to Be Issued Upon Exercise		Weighted Average Price	Shares Available for Future Issuance	
Equity compensation plans approved by shareholders:					
Stock options	71	\$ 30.36	540	(a)	
Restricted stock	(c)	(b)	(a)		
Performance units	(d)	(b)	(a)		
Stock appreciation rights ("SARs")	(e)	(b)	(a)		
Total			540		

Under the 2015 Plan, 550,000 shares are authorized for issuance; 10,000 have been issued as of December 31, 2016. In January of 2016, 18,069 restricted stock shares were issued under the terms of the 2015 Plan pursuant to awards granted under the 2006 Plan. Additional shares will not be issued pursuant to awards granted from prior plans.

(a) Not applicable

(c)

The maximum number of shares of restricted stock that may be granted is 550,000 shares, and the maximum that may be granted to a participant during any calendar year is 75,000 shares.

- (d) No performance units payable in stock had been issued as of December 31, 2016. The maximum payment that can be made pursuant to performance units granted to any one participant in any calendar year shall be \$1,000,000.
- (e) No SARS have been issued. The maximum number of shares with respect to which SARs may be granted to a participant during any calendar year shall be 100,000 shares.

The following table details the shares available for future issuance under the 2015 Plan at December 31, 2016.

Plan Category	Shares Available for Future Issuance
Shares available at January 1, 2016	550,000
Stock option issuances	(10,000)
Restricted stock issuances	0
Forfeitures	131
Shares available for future issuance	540,131

CTBI uses a Black-Scholes option pricing model with the following weighted average assumptions, which are evaluated and revised as necessary, in estimating the grant-date fair value of each option grant for the year end:

	2016	2015	2014
Expected option life (in years)	7.5	7.5	7.5
Expected volatility	34.34%	43.11%	43.32%
Expected dividend yield	3.70%	3.72%	3.40%
Risk-free interest rate	1.45%	1.54%	2.01%

The expected option life is derived from the “safe-harbor” rules for estimating option life in ASC 718, Share-Based Payment. The expected volatility is based on historical volatility of the stock using a historical look back that approximates the expected life of the option grant. The interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the time of the grant. CTBI's stock-based compensation expense for the years 2016, 2015, and 2014 was \$0.5 million, \$0.8 million, and \$0.9 million, respectively. Included in stock-based compensation expense were dividends paid on restricted stock shares in the amount of \$37 thousand, \$80 thousand, and \$121 thousand, respectively, for the same periods.

The 2015 Plan:

CTBI's stock option activity for the 2015 Plan for the year ended December 31, 2016 is summarized as follows:

December 31	2016	
	Options	Weighted Average Exercise Price
Outstanding at beginning of year	0	--
Granted	10,000	\$ 33.55
Exercised	0	--
Forfeited/expired	0	--
Outstanding at end of year	10,000	\$ 33.55
Exercisable at end of year	0	--

A summary of the status of CTBI's 2015 Plan for nonvested options as of December 31, 2016, and changes during the year ended December 31, 2016, is presented as follows:

	Options	Weighted Average Grant Date Fair Value
Nonvested Options		
Nonvested at January 1, 2016	0	--
Granted	10,000	\$ 6.82
Vested	0	--
Forfeited	0	--
Nonvested at December 31, 2016	10,000	\$ 6.82

The weighted average remaining contractual term in years of the options outstanding at December 31, 2016 was 9.1 years.

The weighted-average fair value of options granted from the 2015 Plan during the year 2016 was \$0.07 million, or \$6.82 per share.

The following table shows the intrinsic values of options exercised, exercisable, and outstanding for the 2015 Plan for the years ended December 31, 2016:

(in thousands)	2016
Options exercised	--
Options exercisable	--
Outstanding options	\$161

The following table shows restricted stock activity for the 2015 Plan for the year ended December 31, 2016:

December 31	2016	Weighted Average Fair Value at Grant
Outstanding at beginning of year	0	\$ --
Granted*	18,069	33.55
Vested	(442)	33.55
Forfeited	(131)	33.55
Outstanding at end of year	17,496	\$ 33.55

* Issued under the terms of the 2015 Plan pursuant to awards granted and earned under the 2006 Plan.

The 2006 Plan:

CTBI's stock option activity for the 2006 Plan for the years ended December 31, 2016, 2015, and 2014 is summarized as follows:

December 31	2016 Options	2015 Options	2014 Options
-------------	-----------------	-----------------	-----------------

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

		Weighted Average Exercise Price		Weighted Average Exercise Price		Weighted Average Exercise Price
Outstanding at beginning of year	118,574	\$ 32.36	98,821	\$ 32.35	97,047	\$ 32.29
Granted	0	--	20,000	32.27	10,000	34.75
Exercised	(57,423)	35.02	(247)	24.12	(5,757)	34.62
Forfeited/expired	(110)	35.41	0	--	(2,469)	34.29
Outstanding at end of year	61,041	\$ 29.84	118,574	\$ 32.36	98,821	\$ 32.35
Exercisable at end of year	30,629	\$ 26.64	87,749	\$ 32.12	86,264	\$ 32.25

A summary of the status of CTBI's 2006 Plan for nonvested options as of December 31, 2016, and changes during the year ended December 31, 2016, is presented as follows:

	Options	Weighted Average Grant Date Fair Value
Nonvested Options		
Nonvested at January 1, 2016	30,825	\$ 7.02
Granted	0	--
Vested	(413)	8.23
Forfeited	0	--
Nonvested at December 31, 2016	30,412	\$ 7.00

The weighted average remaining contractual term in years of the options outstanding at December 31, 2016 was 4.6 years.

There were no options granted from the 2006 Plan for the year 2016. The weighted-average fair value of options granted from the 2006 Plan during the years 2015 and 2014 were \$0.13 million or \$6.60 per share and \$0.08 million or \$7.76 per share; respectively.

The following table shows the intrinsic values of options exercised, exercisable, and outstanding for the 2006 Plan for the years ended December 31, 2016, 2015, and 2014:

(in thousands)	2016	2015	2014
Options exercised	\$139	\$3	\$11
Options exercisable	703	275	376
Outstanding options	1,206	334	421

The following table shows restricted stock activity for the years ended December 31, 2016, 2015, and 2014:

December 31	2016		2015		2014	
		Weighted Average Fair Value at Grants Grant		Weighted Average Fair Value at Grants Grant		Weighted Average Fair Value at Grants Grant
Outstanding at beginning of year	64,735	\$ 28.92	101,309	\$ 26.19	107,511	\$ 25.91
Granted	0	--	10,582	32.27	4,561	37.85

Edgar Filing: COMMUNITY TRUST BANCORP INC /KY/ - Form 10-K

Vested	(52,521)	28.01	(46,482)	23.66	(8,949)	28.35
Forfeited	(225)	32.52	(674)	33.31	(1,814)	28.38
Outstanding at end of year	11,989	\$ 32.85	64,735	\$ 28.92	101,309	\$ 26.19

The 1998 Plan:

CTBI's stock option activity for the 1998 Plan for the years ended December 31, 2016, 2015, and 2014 is summarized as follows:

December 31	2016		2015		2014	
		Weighted Average Exercise		Weighted Average Exercise		Weighted Average Exercise
	Options	Price	Options	Price	Options	Price
Outstanding at beginning of year	2,980	\$ 29.49	43,960	\$ 29.43
