This statement establishes a consistent framework for measuring fair value and expands disclosures on fair value measurements. The impact of the initial adoption of SFAS No. 157 in 2008 had no impact on the consolidated financial statements.

The Company uses significant other observable inputs to value the derivative instruments used to hedge interest rate volatility and net monetary positions. The fair market value of such instruments follows (in thousands):

The decrease in the Americas was driven by weakness in the Contractor Business. Translated at consistent exchange rates, sales in Europe increased 10 percent for both the quarter and year-to-date, and sales in Asia Pacific increased by 11 percent for the quarter and 6 percent year-to-date.

Gross profit margin, expressed as a percentage of sales, was 53.8 percent for the quarter and 54.3 percent year-to-date, versus 52.8 percent and 53.0 percent for the same periods last year, respectively. The increase was due mainly to favorable currency translation rates. The effects of higher material and other manufacturing costs on gross margin rate have been offset by the impact of pricing and the benefits of integrating Lubriquip and consolidating Lubrication Equipment operations in the Company's Anoka facility.

Operating expenses for both the quarter and year-to-date are 13 percent higher than last year. The effects of currency translation contributed approximately 3 percentage points of the increase. Operating expenses in 2008 increased \$3 million from acquired GlasCraft operations. Continued investments in product and market development also contributed to the increase in operating expenses, including expenses related to the introduction of new product lines in the home center channel, new product development teams and additional sales and marketing personnel in developing countries.

Higher operating expenses offset the favorable effects of higher sales and gross profit margins, resulting in flat operating earnings for both the quarter and year-to-date.

Interest expense is \$3 million higher than last year due to borrowings used for the purchase and retirement of Company shares and for the acquisition of GlasCraft. The Company repurchased approximately 2.2 million shares of its common stock for \$80 million in the first half of 2008.

The Company's effective tax rate for the first half was 33 percent, down from 35 percent for the first half last year. The decrease resulted from the completion of the examination of the Company's income tax returns in the first quarter of 2008.

Segment Results

Certain measurements of segment operations compared to last year are summarized below:

The Industrial segment had second quarter sales growth in all regions and in all major product categories. Translated at consistent exchange rates, sales for the quarter were up 12 percent in both the Americas and in Europe and 9 percent in Asia Pacific. Year-to-date sales were up 8 percent in the Americas, 12 percent in Europe and 1 percent in Asia Pacific, all at consistent translation rates. Operating earnings in this segment were affected by an operating loss from GlasCraft, resulting from acquisition and integration related activities.

Contractor

Net sales (in millions)				
Americas	\$ 51.4	\$ 67.2	\$ 93.7	\$ 117.8

Operating earnings as a percentage of net sales	25	%	30	%
			23	%
			28	%

The Contractor segment continued to experience softness in both the North American paint store and home center channels. Year-to-date increases in Europe (18 percent increase, including 12 percentage points from currency translation) and in Asia Pacific (17 percent increase, including 2 percentage points from currency translation) were not enough to offset the 20 percent decrease in the Americas.

Operating earnings in this segment were affected by approximately \$6 million (half in the second quarter) related to the launch and production of new paint sprayer units in the home center channel.

Lubrication

Edgar Filing: GRACO INC - Form 10-Q

	June 27, 2008	June 29, 2007	June 27, 2008	June 29, 2007

Total	\$ 24.1	\$ 22.9	\$ 47.8	\$ 45.6
Operating earnings as a percentage of net sales	19	% 10	% 19	% 12

In the Lubrication segment, second quarter sales increases in Europe and Asia Pacific more than offset a decrease in the Americas. Year-to-date, sales were flat in the Americas and up in Europe and Asia Pacific.

17

The improvement in operating profitability is related to the integration and consolidation of Lubrication operations completed in 2007.

Liquidity and Capital Resources

In the first half of 2008, the Company used cash and borrowings under its long-term line of credit to purchase and retire \$80 million of Company shares. Other significant uses of cash included \$35 million to acquire GlasCraft and \$23 million for payment of dividends. Significant uses of cash in the first half of 2007 included \$78 million for purchases and retirement of Company common stock, \$22 million for capital additions and \$22 million for payment of dividends.

Increases in accounts receivable and inventories since the end of 2007 reflect the acquisition of GlasCraft operations and the higher level of business activity in the second quarter of 2008 compared to the fourth quarter of 2007.

At June 27, 2008, the Company had various lines of credit totaling \$295 million, of which \$90 million was unused. Internally generated funds and unused financing sources provide the Company with the financial flexibility to meet liquidity needs.

Outlook

Management remains cautious about the outlook for the Company's business in the U.S. and will continue to manage accordingly. At the same time, with the gains experienced in the Industrial and international business, management is encouraged that its strategies for achieving product

and market diversification are paying off. The Company will continue to make long-term investments in key growth strategies including new product development, expanding distribution, entering new markets and pursuing strategic acquisitions.
