Exhibit 99.1

AMERISERV FINANCIAL REPORTS EARNINGS FOR THE THIRD QUARTER AND FIRST NINE MONTHS OF 2014

JOHNSTOWN, PA AmeriServ Financial, Inc. (NASDAQ: ASRV) reported third quarter 2014 net income available to common shareholders of \$312,000, or \$0.02 per diluted common share. This compares to net income available to common shareholders of \$1,173,000, or \$0.06 per diluted common share, reported for the third quarter of 2013. As previously disclosed on September 25, 2014, the Company's third quarter 2014 performance was negatively impacted by a \$669,000 goodwill impairment charge related to its registered investment advisory subsidiary and approximately \$150,000 of non-recurring expenses related to a profitability improvement project. For the nine month period ended September 30, 2014, the Company reported net income available to common shareholders of \$2,116,000, or \$0.11 per diluted share. This represented a 35.3% decline in earnings per share from the same nine month period in 2013 where net income available to common shareholders totaled \$3,195,000 or \$0.17 per diluted common share. The following table highlights the Company's financial performance for both the three and nine month periods ended September 30, 2014 and 2013:

	Third Quarter 2014	Third Quarter 2013	Nine Months Ended September 30, 2014	Nine Months Ended September 30, 2013
Net income	\$365,000	\$1,226,000	\$2,274,000	\$3,352,000
Net income available to common shareholders	\$312,000	\$1,173,000	\$2,116,000	\$3,195,000
Diluted earnings per share	\$ 0.02	\$ 0.06	\$ 0.11	\$ 0.17

Glenn L. Wilson, President and Chief Executive Officer, commented on the third quarter 2014 financial results:

During the third quarter, we continued to thoroughly analyze our business operations and practices in order to improve efficiencies and increase profitability in 2015 and beyond. We plan to accomplish this objective while keeping the positive momentum we have developed on growing our loan portfolio while maintaining strong asset quality. Over the past twelve months, we have increased total loans by \$54 million, or 7.10%, to a record level of \$818 million. This has been an important factor contributing to the growth in net interest income that AmeriServ Financial has achieved in 2014. Additionally, our asset quality metrics continue to be outstanding as non-performing assets are only 0.48% of total loans and our allowance for loan losses provided 298% coverage of non-performing loans at September 30, 2014.

The Company's net interest income in the third quarter of 2014 increased by \$203,000 from the prior year's third quarter and for the first nine months of 2014 increased by \$1,049,000, or 4.3%, when compared to the first nine months of 2013. The Company's net interest margin of 3.48% for the first nine months of 2014 was four basis points lower than the net interest margin of 3.52% for the first nine months of 2013. There was a similar net interest margin decline of four basis points when the third quarter of 2014 is compared to the prior year third quarter. We believe that this performance demonstrates that the recent pace of net interest margin contraction has slowed from the pace of margin decline experienced over the previous two years. The Company has been able to mitigate this net interest margin pressure and to increase net interest income by both growing its earning assets and reducing its cost of funds. Specifically, the earning asset growth has occurred in the loan portfolio as total loans averaged \$797 million in the first nine months of 2014 which is \$60 million, or 8.2%, higher than the \$737 million average for the same period in 2013. This loan growth reflects the successful results of the Company's more intensive sales calling efforts, with an emphasis on generating commercial loans and owner occupied commercial real estate loans, which qualify as Small Business Lending Fund (SBLF) loans. As a result of this growth in SBLF qualified loans, the Company has locked in the lowest preferred dividend rate available under the program of 1% until the first quarter of 2016. Interest income in 2014 has also benefitted from reduced premium amortization on mortgage backed securities due to slower mortgage prepayment speeds. Overall, total interest income has increased by \$957,000 in 2014. Total interest expense for the first nine months of 2014 declined by \$92,000 from the first nine months of 2013 due to the Company's proactive efforts to reduce deposit costs. Even with this reduction in deposit costs, the Company still experienced growth in deposits which reflects the loyalty of our core deposit base and ongoing efforts to cross sell new loan customers into deposit products. Specifically, total deposits averaged a record level of \$870 million for the first nine months of 2014 which is \$26 million, or 3.1%, higher than the \$844 million average in the first nine months of 2013. This decreased interest cost for deposits has been partially offset by a \$132,000 increase in the interest cost for borrowings as the Company has utilized more FHLB term advances to extend borrowings and provide protection against rising interest rates.

The Company did not record a provision for loan losses in either the third quarter of 2014 or the third quarter of 2013. For the nine month period during 2014, the Company also did not record a provision for loan losses compared to a \$100,000 negative provision in the first nine months of 2013. The Company continued to maintain outstanding asset quality in 2014. At September 30, 2014, non-performing assets totaled \$3.9 million, or 0.48% of total loans, which represents the second time that our non-performing assets have been under \$4 million in the past seven quarters. The Company experienced net loan charge-offs of \$567,000, or 0.28% of total loans, in the third quarter of 2014 compared to net loan recoveries of \$39,000, or 0.02% of total loans, in the third quarter of 2013. However, for the first nine months of 2014 actual credit losses realized through net charge-offs totaled \$522,000, or 0.09% of total loans, which represents a decrease from the first nine months of 2013 when net charge-offs totaled \$1.3 million, or 0.23% of total loans. When determining the provision for loan losses, the Company considers a number of factors, some of which include periodic credit reviews, non-performing assets, loan delinquency and charge-off trends, concentrations of credit, loan volume trends and broader local and national economic trends. In summary, the allowance for loan losses provided a strong 298% coverage of non-performing loans, and 1.17% of total loans, at September 30, 2014, compared to 327% coverage of non-performing loans, and 1.29% of total loans, at December 31, 2013.

Total non-interest income in the third quarter of 2014 decreased by \$393,000 from the prior year's third quarter and for the first nine months of 2014 decreased by \$1.1 million, or 9.4%, when compared to the first nine months of 2013. The primary factors causing the third quarter 2014 decline were a \$140,000 decrease in other income and an \$86,000 decrease in trust and investment advisory fees. The other income drop was due to reduced gains on the sale of other real estate owned and lower financial services commission revenue. The decline in trust and investment advisory fees

was caused by the loss of certain clients at our investment advisory subsidiary due to the departure of the former chief executive officer of that business earlier in 2014. The largest factor contributing to the \$1.1 million decline in non-interest income for the nine month period in 2014 was reduced revenue from residential mortgage banking activities due to lower refinance activity as a result of higher mortgage rates and reduced purchase activity, particularly in the first quarter of 2014. This caused gains realized on residential mortgage loan sales into the secondary market and other mortgage related fees to decrease by a total of \$539,000 for the first nine months of 2014.

Other factors contributing to the non-interest income decline in the first nine months of 2014 included a \$233,000 decrease in bank owned life insurance revenue due largely to the receipt of a death claim in the prior year and a net unfavorable swing of \$136,000 on other real estate owned property transactions.

Total non-interest expense in the third quarter of 2014 increased by \$830,000 from the prior year's third quarter and for the first nine months of 2014 increased by \$1.1 million, or 3.6%, when compared to the first nine months of 2013. As previously disclosed, the Company recorded a \$669,000 goodwill impairment charge and approximately \$150,000 of professional fees related to a profitability improvement project in the third quarter of 2014. The facts and circumstances that led to an impairment of goodwill included a recent loss of clients and a reduction in the projected earnings capacity of our investment advisory subsidiary. The Company expects to achieve a significant payback on the costs related to the profitability improvement project as we evaluate and prioritize recommendations for implementation beginning in the fourth quarter of 2014 and continuing into 2015. For the nine month period, salaries and employee benefits were down by \$198,000 due to lower pension expense and incentive compensation expense in 2014. Professional fees increased by \$913,000 for the nine month period due to higher legal costs related to litigation against the former CEO of our investment advisory subsidiary, the consulting costs associated with our profitability improvement project and new recurring costs related to outsourcing our computer operations and statement processing to a third party vendor. The overall cost savings benefit from outsourcing these services is captured in lower personnel costs in these departments and reduced software expense, which is a key factor contributing to the decline in other expenses of \$436,000 for the nine month period in 2014. Finally, the Company recorded an income tax expense of \$1.2 million, or an effective tax rate of 34.5%, in the first nine months of 2014 compared to income tax expense of \$1.4 million, or an effective tax rate of 29.6%, for the first nine months of 2013. The higher effective tax rate in 2014 was primarily due to the non-deductibility of the goodwill impairment charge for tax purposes. This was the factor responsible for the unusually high effective tax rate of 51.5% for the third quarter of 2014 as the impact of the goodwill impairment charge was more pronounced on the quarterly results.

The Company had total assets of \$1.07 billion, shareholders' equity of \$116 million, a book value of \$5.06 per common share and a tangible book value of \$4.43 per common share at September 30, 2014. The Company has increased its tangible book value per share by 8.3% over the past twelve months. The Company continued to maintain strong capital ratios that exceed the regulatory defined well capitalized status with a risk based capital ratio of 15.00%, an asset leverage ratio of 11.44% and a tangible common equity to tangible assets ratio of 7.86% at September 30, 2014.
