QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended June 30, 2013

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15 (d) OF THE
SECURITIES EXCHANGE ACT OF 1934

Commission File No. 0-28190

CAMDEN NATIONAL CORPORATION
(Exact name of registrant as specified in its charter)

MAINE (State or other jurisdiction of incorporation or organization)	01-0413282 (I.R.S. Employer Identification No.)
--	---

2 ELM STREET, CAMDEN, ME (Address of principal executive offices)	04843 (Zip Code)
--	---------------------

Registrant's telephone number, including area code: (207) 236-8821

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter periods that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files).

Yes No

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer or a smaller reporting company. See the definitions of "large accelerated filer," "accelerated filer" and "smaller reporting company" in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer <input type="checkbox"/>	Accelerated filer <input checked="" type="checkbox"/>
Non-accelerated filer <input type="checkbox"/>	Smaller reporting company <input type="checkbox"/>

(Do not check if a smaller reporting company)

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock, as of the latest practical date:

Outstanding at August 1, 2013: Common stock (no par value) 7,640,712 shares.

PART I. FINANCIAL INFORMATION
ITEM 1. FINANCIAL STATEMENTS

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Shareholders and Board of Directors
Camden National Corporation

We have reviewed the accompanying interim consolidated financial information of Camden National Corporation (the "Company") and Subsidiaries as of June 30, 2013, and for the three and six-month periods ended June 30, 2013 and 2012. These financial statements are the responsibility of the Company's management.

We conducted our reviews in accordance with standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures to financial data and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit in accordance with standards of the Public Company Accounting Oversight Board (United States), the objective of which is to express an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the accompanying financial statements for them to be in conformity with accounting principles generally accepted in the United States of America.

CAMDEN NATIONAL CORPORATION AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(Amounts in Tables Expressed in Thousands, Except Number of Shares and per Share Data)

NOTE 1 - BASIS OF PRESENTATION

The accompanying unaudited consolidated financial statements were prepared in accordance with instructions for Form 10-Q and, therefore, do not include all disclosures required by accounting principles generally accepted in the United States of America ("GAAP") for complete presentation of financial statements. In the opinion of management, the consolidated financial statements contain all adjustments (consisting only of normal recurring accruals) necessary to present fairly the consolidated statements of condition of Camden National Corporation (the "Company") as of June 30, 2013 and December 31, 2012, the consolidated statements of income for the three and six months ended June 30, 2013 and 2012, the consolidated statements of comprehensive income (loss) for the three and six months ended June 30, 2013 and 2012, the consolidated statements of changes in shareholders' equity for the six months ended June 30, 2013 and 2012, and the consolidated statements of cash flows for the six months ended ended June 30, 2013 and 2012. All significant intercompany transactions and balances are eliminated in consolidation. Certain items from the prior year were reclassified to conform to the current year presentation. The income reported for the three and six months period ended June 30, 2013 is not necessarily indicative of the results that may be expected for the full year. The information in this report should be read in conjunction with the consolidated financial statements and accompanying notes included in the Annual Report for the year ended December 31, 2012, Form 10-K.

NOTE 2 – EARNINGS PER SHARE

The following is an analysis of basic and diluted earnings per share ("EPS"), reflecting the application of the two-class method, as described below:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net income	\$6,331	\$6,412	\$11,993	\$12,995
Dividends and undistributed earnings allocated to participating securities ⁽¹⁾	(20) (18) (30) (30
Net income available to common shareholders	\$6,311	\$6,394	\$11,963	\$12,965
Weighted-average common shares outstanding for basic EPS	7,637,433	7,675,819	7,632,586	7,673,927
Dilutive effect of stock-based awards ⁽²⁾	14,766	11,801	14,156	12,820
Weighted-average common and potential common shares for diluted EPS	7,652,199	7,687,620	7,646,742	7,686,747
Earnings per common share:				
Basic EPS	\$0.83	\$0.84	\$1.57	\$1.69
Diluted EPS	\$0.82	\$0.83	\$1.56	\$1.69

(1) Represents dividends paid and undistributed earnings allocated to nonvested restricted stock awards.

(2) Represents the effect of the assumed exercise of stock options, vesting of restricted shares, and vesting of restricted stock units, based on the treasury stock method.

Nonvested stock-based payment awards that contain non-forfeitable rights to dividends are participating securities and are included in the computation of earnings per share pursuant to the two-class method. The two-class method is an

earnings allocation formula that determines earnings per share for each class of common stock and participating security according to dividends declared (or accumulated) and participation rights in undistributed earnings. Certain of the Company's nonvested restricted stock awards qualify as participating securities.

Net income, less any preferred dividends accumulated for the period (whether or not declared), is allocated between the common stock and participating securities pursuant to the two-class method. Basic EPS is computed by dividing net income

available to common shareholders by the weighted average number of common shares outstanding during the period, excluding participating nonvested restricted shares.

Diluted EPS is computed in a similar manner, except that first the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares were issued using the treasury stock method.

For both the three and six month periods ended June 30, 2013, options to purchase 48,000 shares of common stock were not considered in the computation of potential common shares for purposes of diluted EPS, since the exercise prices of the options were greater than the average market price of the common stock for the respective periods. For the three month and six month periods ended June 30, 2012, options to purchase 75,000 and 50,000 shares, respectively, of common stock were not considered in the computation of potential common shares for purposes of diluted EPS, since the exercise prices of the options were greater than the average market price of the common stock for the respective periods.

NOTE 3 – SECURITIES

The following tables summarize the amortized costs and estimated fair values of securities available-for-sale (“AFS”), as of June 30, 2013 and December 31, 2012:

	Amortized Cost	Unrealized Gains	Unrealized Losses	Fair Value
June 30, 2013				
Obligations of states and political subdivisions	\$29,079	\$1,410	\$—	\$30,489
Mortgage-backed securities issued or guaranteed by U.S. government sponsored enterprises	347,342	6,837	(5,401)	348,778
Collateralized mortgage obligations issued or guaranteed by U.S. government sponsored enterprises	408,826	1,271	(7,840)	402,257
Private issue collateralized mortgage obligations	8,106	12	(273)	7,845
Total securities available-for-sale	\$793,353	\$9,530	\$(13,514)	\$789,369
December 31, 2012				
Obligations of states and political subdivisions	\$31,112	\$1,928	\$—	\$33,040
Mortgage-backed securities issued or guaranteed by U.S. government sponsored enterprises	345,528	12,699	(79)	358,148
Collateralized mortgage obligations issued or guaranteed by U.S. government sponsored enterprises	375,627	6,181	(120)	381,688
Private issue collateralized mortgage obligations	8,871	—	(697)	8,174
Total securities available-for-sale	\$761,138	\$20,808	\$(896)	\$781,050

Net unrealized gains (losses) on securities AFS at June 30, 2013 and December 31, 2012 and included in accumulated other comprehensive income (loss) amounted to \$(2.6) million and \$12.9 million, net of deferred taxes of \$(1.4) million and \$7.0 million, respectively.

Impaired Securities

Management periodically reviews the Company’s investment portfolio to determine the cause, magnitude and duration of declines in the fair value of each security. Thorough evaluations of the causes of the unrealized losses are performed to determine whether the impairment is temporary or other-than-temporary in nature. Considerations such as the ability of the securities to meet cash flow requirements, levels of credit enhancements, risk of curtailment, recoverability of invested amount over a reasonable period of time and the length of time the security is in a loss

position, for example, are applied in determining other-than-temporary impairment (“OTTI”). Once a decline in value is determined to be other-than-temporary, the value of the security is reduced and a corresponding charge to earnings is recognized.

The following table presents the estimated fair values and gross unrealized losses of investment securities that were in a continuous loss position at June 30, 2013 and December 31, 2012, by length of time that individual securities in each category have been in a continuous loss position:

	Less Than 12 Months		12 Months or More		Total	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
June 30, 2013						
Mortgage-backed securities	\$ 171,566	\$(5,401)	\$—	\$—	\$ 171,566	\$(5,401)
Collateralized mortgage obligations	298,708	(7,840)	—	—	298,708	(7,840)
Private issue collateralized mortgage obligations	139	(5)	5,985	(268)	6,124	(273)
Total	\$470,413	\$(13,246)	\$5,985	\$(268)	\$476,398	\$(13,514)
December 31, 2012						
Mortgage-backed securities	\$42,782	\$(79)	\$—	\$—	\$42,782	\$(79)
Collateralized mortgage obligations	73,098	(120)	—	—	73,098	(120)
Private issue collateralized mortgage obligations	—	—	8,174	(697)	8,174	(697)
Total	\$ 115,880	\$(199)	\$ 8,174	\$(697)	\$ 124,054	\$(896)

At June 30, 2013, the Company held \$476.4 million in investment securities with unrealized losses that are considered temporary. Included in the unrealized losses were non-agency private issue collateralized mortgage obligations (“non-agency”). At June 30, 2013, the Company held \$7.8 million in non-agencies of which \$6.0 million had unrealized losses for twelve months or longer. Management believes the unrealized losses for the non-agencies are the result of current market conditions and the underestimation of their value in the market. Management currently has the intent and ability to retain these investment securities with unrealized losses until the decline in value has been recovered. Stress tests are performed monthly on the non-agencies, which are higher risk bonds, within the investment portfolio using current statistical data to determine expected cash flows and forecast potential losses. The results of the stress tests during the first six months of 2013 indicated potential future credit losses that were lower than previously recorded OTTI and as such no additional OTTI was recorded during the second quarter of 2013.

Security Gains and Losses and Other-Than-Temporary Impairment of Securities

The following tables details the Company’s sales of investment securities, the gross realized gains and losses, and impairment of securities:

	Three Months Ended		Six Months Ended June	
	June 30, 2013	2012	2013	2012
Available-for-sale				
Proceeds from sales of securities	\$—	\$18,324	\$4,875	\$31,364
Gross realized gains	—	951	138	1,104
Gross realized (losses)	—	(200)	—	(203)
Other-than-temporary impairment of securities	—	—	—	(29)

During the first six months of 2013, the Company sold certain investment securities with a total carrying value of \$4.9 million in order to manage its liquidity and interest rate risk. The securities that were sold were primarily selected based on an assessment of their prepayment speed and did not have any recorded OTTI.

Securities Pledged

At June 30, 2013 and December 31, 2012, securities with an amortized cost of \$440.1 million and \$465.0 million and a fair value of \$443.1 million and \$482.4 million, respectively, were pledged to secure Federal Home Loan Bank (“FHLB”)

advances, public deposits, and securities sold under agreements to repurchase and for other purposes required or permitted by law.

Contractual Maturities

The amortized cost and estimated fair values of debt securities by contractual maturity at June 30, 2013, are shown below. Expected maturities will differ from contractual maturities because borrowers may have the right to call or prepay obligations with or without call or prepayment penalties.

Available-for-sale	Amortized Cost	Fair Value
Due in one year or less	\$1,881	\$1,924
Due after one year through five years	25,541	26,278
Due after five years through ten years	129,625	130,554
Due after ten years	636,306	630,613
	\$793,353	\$789,369

NOTE 4 – LOANS AND ALLOWANCE FOR LOAN LOSSES

The composition of the Company's loan portfolio, excluding residential loans held for sale, at June 30, 2013 and December 31, 2012 was as follows:

	June 30, 2013	December 31, 2012
Residential real estate loans	\$570,011	\$572,768
Commercial real estate loans	522,987	506,231
Commercial loans	190,068	190,454
Home equity loans	301,868	278,375
Consumer loans	18,115	16,633
Deferred loan fees net of costs	(490)	(595)
Total loans	\$1,602,559	\$1,563,866

The Company's lending activities are primarily conducted in Maine. The Company originates single family and multi-family residential loans, commercial real estate loans, business loans, municipal loans and a variety of consumer loans. In addition, the Company makes loans for the construction of residential homes, multi-family properties and commercial real estate properties. The ability and willingness of borrowers to honor their repayment commitments is generally dependent on the level of overall economic activity within the geographic area and the general economy. During the first six months of 2013 and 2012, the Company sold \$19.8 million and \$18.8 million, respectively, of fixed-rate residential mortgage loans on the secondary market that resulted in net gains on the sale of loans of \$652,000 and \$268,000, respectively.

In connection with a branch acquisition in 2012, the Company acquired \$6.0 million in performing commercial loans. The loans were recorded at fair value, which was determined by estimating the amount and timing of principal and interest cash flows expected to be collected on the loans and discounting those cash flows at a market rate of interest. As a result of this analysis, the Company recorded a fair value mark of \$317,000, which will amortize over the estimated lives of the loans. Additionally, the acquired loans did not have any related allowance for loan losses ("ALL") as they were recorded at fair value; however, an ALL will be established should the credit quality of these loans deteriorate subsequent to the acquisition. Based on the immateriality of the acquired loans and fair value mark, additional disclosures related to the acquired loans are not required.

The ALL is management's best estimate of the inherent risk of loss in the Company's loan portfolio as of the statement of condition date. Management makes various assumptions and judgments about the collectability of the loan portfolio and provides an allowance for potential losses based on a number of factors including historical losses. If those assumptions are incorrect, the ALL may not be sufficient to cover losses and may cause an increase in the allowance in the future. Among the factors that could affect the Company's ability to collect loans and require an increase to the ALL in the future are: general real

estate and economic conditions; regional credit concentration; industry concentration, for example in the hospitality, tourism and recreation industries; and a requirement by federal and state regulators to increase the provision for loan losses or recognize additional charge-offs.

The board of directors monitors credit risk management through the Directors' Loan Committee and the Corporate Risk Management group. The Directors' Loan Committee reviews large exposure credit requests, monitors asset quality on a regular basis and has approval authority for credit granting policies. The Corporate Risk Management group oversees management's systems and procedures to monitor the credit quality of the loan portfolio, conduct a loan review program, maintain the integrity of the loan rating system and determine the adequacy of the ALL. The Company's practice is to identify problem credits early and take charge-offs as promptly as practicable. In addition, management continuously reassesses its underwriting standards in response to credit risk posed by changes in economic conditions. For purposes of determining the ALL, the Company disaggregates its portfolio loans into portfolio segments, which include residential real estate, commercial real estate, commercial, home equity, and consumer.

The following table presents activity in the ALL for the three months ended June 30, 2013:

	Residential Real Estate	Commercial Real Estate	Commercial	Home Equity	Consumer	Unallocated	Total
ALL:							
Beginning balance	\$7,269	\$ 3,602	\$ 6,200	\$3,358	\$222	\$2,718	\$23,369

The ALL for the Company's portfolio segments is determined based on loan balances and the historical performance factor of each portfolio segment. The significant changes in the ALL for the first six months ended June 30, 2013, compared to the year ended December 31, 2012, were within the home equity and commercial real estate portfolio segments. The increase in the

allocation of ALL for home equity was primarily due to the 8.4% increase in loan balances and its historical performance, while the decrease in commercial real estate allocation was due to the improvement in that segment's performance factor.

The Company focuses on maintaining a well-balanced and diversified loan portfolio. Despite such efforts, it is recognized that credit concentrations may occasionally emerge as a result of economic conditions, changes in local demand, natural loan growth and runoff. To ensure that credit concentrations can be effectively identified, all commercial and commercial real estate loans are assigned Standard Industrial Classification codes, North American Industry Classification System codes, and state and county codes. Shifts in portfolio concentrations are monitored by the Credit Risk Policy Committee. As of June 30, 2013, the two most significant industry exposures within the commercial real estate loan portfolio were non-residential building operators (operators of commercial and industrial buildings, retail establishments, theaters, banks and insurance buildings) and lodging (inns, bed & breakfasts, ski lodges, tourist cabins, hotels and motels). At June 30, 2013, exposure to these two industries as a percentage of total commercial real estate loans, was 29% and 23%, respectively.

To further identify loans with similar risk profiles, the Company categorizes each portfolio segment into classes by credit risk characteristic and applies a credit quality indicator to each portfolio segment. The indicators for commercial, commercial real estate and residential real estate loans are represented by Grades 1 through 10 as outlined below. In general, risk ratings are adjusted periodically throughout the year as updated analysis and review warrants. This process may include, but is not limited to, annual credit and loan reviews, periodic reviews of loan performance metrics, such as delinquency rates, and quarterly reviews of adversely risk rated loans. The Company uses the following definitions when assessing grades for the purpose of evaluating the risk and adequacy of the ALL:

Grade 1 through 6 — Grades 1 through 6 represent groups of loans that are not subject to adverse criticism as defined in regulatory guidance. Loans in these groups exhibit characteristics that represent low to moderate risks, which is measured using a variety of credit risk criteria, such as cash flow coverage, debt service coverage, balance sheet leverage, liquidity, management experience, industry position, prevailing economic conditions, support from secondary sources of repayment and other credit factors that may be relevant to a specific loan. In general, these loans are supported by properly margined collateral and guarantees of principal parties.

Grade 7 — Loans with potential weakness (Special Mention). Loans in this category are currently protected based on collateral and repayment capacity and do not constitute undesirable credit risk, but have potential weakness that may result in deterioration of the repayment process at some future date. This classification is used if a negative trend is evident in the obligor's financial situation. Special mention loans do not sufficiently expose the Company to warrant adverse classification.

Grade 8 — Loans with definite weakness (Substandard). Loans classified as substandard are inadequately protected by the current sound worth and paying capacity of the obligor or by collateral pledged. This classification is used if borrowers experience difficulty in meeting debt repayment requirements. Deterioration is sufficient to cause the Company to look to the sale of collateral.

Grade 9 — Loans with potential loss (Doubtful). Loans classified as doubtful have all the weaknesses inherent in the substandard grade with the added characteristic that the weaknesses make collection or liquidation of the loan in full highly questionable and improbable. The possibility of some loss is extremely high, but because of specific pending factors that may work to the advantage and strengthening of the asset, its classification as an estimated loss is deferred until its more exact status may be determined.

Grade 10 — Loans with definite loss (Loss). Loans classified as loss are considered uncollectible. The loss classification does not mean that the asset has absolutely no recovery or salvage value, but rather that it is not practical or desirable to defer writing off the asset because recovery and collection time may be protracted.

Asset quality indicators are periodically reassessed to appropriately reflect the risk composition of the Company's loan portfolio. Home equity and consumer loans are not individually risk rated, but rather analyzed as groups taking into

account delinquency rates and other economic conditions which may affect the ability of borrowers to meet debt service requirements, including interest rates and energy costs. Performing loans include loans that are current and loans that are past due less than 90 days. Loans that are past due over 90 days and non-accrual loans are considered non-performing.

The following table summarizes credit risk exposure indicators by portfolio segment as of the following dates:

	Residential Real Estate	Commercial Real Estate	Commercial	Home Equity	Consumer
June 30, 2013					
Pass (Grades 1-6)	\$553,040	\$465,947	\$169,208	\$—	\$—
Performing	—	—	—	300,343	17,695
Special Mention (Grade 7)	2,771	13,400	7,919	—	—
Substandard (Grade 8)	13,710	43,640	12,941	—	—
Non-performing	—	—	—	1,525	420
Total	\$569,521	\$522,987	\$190,068	\$301,868	\$18,115
December 31, 2012					
Pass (Grades 1-6)	\$555,444	\$440,610	\$165,460	\$—	\$—
Performing	—	—	—	276,742	16,376
Special Mention (Grade 7)	1,291	17,069	7,449	—	—
Substandard (Grade 8)	15,438	48,552	17,545	—	—
Non-performing	—	—	—	1,633	257
Total	\$572,173	\$506,231	\$190,454	\$278,375	\$16,633

The Company closely monitors the performance of its loan portfolio. Loans past due 30 days or more are considered delinquent. In general, consumer loans will be charged off if the loan is delinquent for 90 consecutive days. Commercial and real estate loans may be charged off in part or in full if they appear uncollectible. A loan is placed on non-accrual status when the financial condition of the borrower is deteriorating, payment in full of both principal and interest is not expected as scheduled or principal or interest has been in default for 90 days or more. Exceptions may be made if the asset is well-secured by collateral sufficient to satisfy both the principal and accrued interest in full and collection is assured by a specific event, such as the closing of a pending sale contract. When one loan to a borrower is placed on non-accrual status, generally all other loans to the borrower are re-evaluated to determine if they should also be placed on non-accrual status. All previously accrued and unpaid interest is reversed at this time. Interest payments received on non-accrual loans (including impaired loans) are applied as a reduction of principal. A loan remains on non-accrual status until all principal and interest amounts contractually due are brought current and future payments are reasonably assured. A loan may be returned to accrual status when collection of principal and interest is assured and the borrower has demonstrated timely payments of principal and interest for a reasonable period. Unsecured loans, however, are not normally placed on non-accrual status because they are charged-off once their collectability is in doubt.

The following is a loan aging analysis by portfolio segment (including loans past due over 90 days and non-accrual loans) and a summary of non-accrual loans, which include troubled debt restructured loans (“TDRs”), and loans past due over 90 days and accruing as of the following dates:

	30-59 Days Past Due	60-89 Days Past Due	Greater than 90 Days	Total Past Due	Current	Total Loans Outstanding	Loans > 90 Days Past Due and Accruing	Non-Accrual Loans
June 30, 2013

	342	199	259	800	15,833	16,633	2	257
Total	\$6,006	\$3,699	\$18,123	\$27,828	\$1,536,038	\$1,563,866	\$611	\$22,483

The Company takes a conservative approach in credit risk management and remains focused on community lending and reinvesting. The Company’s Credit Administration group works closely with borrowers experiencing credit problems to assist in loan repayment or term modifications. TDRs consist of loans where the Company, for economic or legal reasons related to the borrower’s financial difficulties, granted a concession to the borrower that it would not otherwise consider. TDRs involve term modifications or a reduction of either interest or principal. Once such an obligation has been restructured, it will continue to remain in a restructured status until paid in full.

At June 30, 2013 and December 31, 2012, the allowance related to TDRs was \$552,000 and \$494,000, respectively. The specific reserve component was determined by discounting the total expected future cash flows from the borrower, or if the loan is currently collateral-dependent, using the fair value of the underlying collateral, which was obtained through independent appraisals and internal evaluations. At June 30, 2013, the Company did not have any commitments to lend additional funds to borrowers with loans classified as TDRs.

During the first six months of 2013, the Company modified seven loans as TDRs, which had current balances of \$872,000 at June 30, 2013. During the first six months of 2012, the Company did not modify any loans as TDRs. The modification of these loans as TDRs did not have a material financial effect on the Company. Loans restructured due to credit difficulties that are now performing were \$5.7 million at June 30, 2013 and \$4.7 million at December 31, 2012. The Company did not have any TDRs that subsequently defaulted during the first six months of 2013 and 2012.

The following is a summary of accruing and non-accruing TDRs by portfolio segment as of the following dates:

	Number of Contracts	Pre-Modification Outstanding Recorded Investment	Post-Modification Outstanding Recorded Investment	Current Balance
June 30, 2013				
Residential real estate	22	\$471	\$471	\$412
Commercial real estate	9	2,844	2,897	2,714
Commercial	6	3,581	3,719	3,540
Consumer	1	3	3	1
Total	38	\$6,899	\$7,090	\$6,667
December 31, 2012

NOTE 5 – GOODWILL, CORE DEPOSIT AND TRUST RELATIONSHIP INTANGIBLES

The Company has recognized goodwill and certain identifiable intangible assets in connection with certain acquisitions of other businesses in prior years. The changes in goodwill, core deposit intangible and trust relationship intangible for the six months ended June 30, 2013 are shown in the table below:

	Goodwill					
	Banking		Financial Services		Total	
Balance at December 31, 2012	\$40,902		\$6,734		\$47,636	
2013 activity	—		—		—	
Balance at June 30, 2013	\$40,902		\$6,734		\$47,636	

	Core Deposit Intangible			Trust Relationship Intangible		
	Total	Accumulated Amortization	Net	Total	Accumulated Amortization	Net
Balance at December 31, 2012	\$17,300	\$(12,014)	\$5,286	\$753	\$(376)	\$377
2013 amortization	—	(536)	(536)	—	(38)	(38)
Balance at June 30, 2013	\$17,300	\$(12,550)	\$4,750	\$753	\$(414)	\$339

The following table reflects the expected amortization schedule for intangible assets at June 30, 2013:

	Core Deposit Intangible	Trust Relationship Intangible
2013	\$788	\$38
2014	1,073	75
2015	1,073	75
2016	1,073	75
2017	743	76
Total unamortized intangible assets	\$4,750	\$339

NOTE 6 – EMPLOYEE BENEFIT PLANS

The Company maintains an unfunded, non-qualified supplemental executive retirement plan for certain officers and provides medical and life insurance to certain eligible retired employees. The components of net period benefit cost for the periods ended June 30, 2013 and 2012 were as follows:

Supplemental Executive Retirement Plan

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net period benefit cost				
Service cost	\$82	\$67	\$164	\$134
Interest cost	94	102	188	204
Recognized net actuarial loss	56	29	112	58
Recognized prior service cost	5	5	10	10
Net period benefit cost	\$237	\$203	\$474	\$406

Other Postretirement Benefit Plan

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net period benefit cost				
Service cost	\$19	\$17	\$38	\$34
Interest cost	35	37	70	74
Recognized net actuarial loss	11	8	22	16
Net period benefit cost	\$65	\$62	\$130	\$124

NOTE 7 – STOCK-BASED COMPENSATION PLANS

On February 26, 2013, the Company granted 6,325 restricted stock awards to certain officers of the Company and its subsidiaries under the 2012 Equity and Incentive Plan. The holders of these awards participate fully in the rewards of stock ownership of the Company, including voting and dividend rights. The restricted stock awards have been determined to have a fair value of \$33.72 per unit, based on the market price of the Company's common stock on the date of grant. The restricted stock awards vest over a three-year period.

Under the Long-term Performance Share Plan, 6,797 shares vested upon the achievement of certain revenue and expense goals under the 2010-2012 Long-term Performance Share Plan metrics and 4,352 shares, net of taxes, were issued to participants.

20

Under the Management Stock Purchase Plan, 7,801 shares were purchased by employees at a discount in lieu of the management employees' annual incentive bonus during the first three months of 2013. During the first quarter of 2013, the Company granted 2,304 deferred stock awards under the Defined Contribution Retirement Plan.

On March 26, 2013, the Company approved the Amended and Restated Long-Term Performance Share Plan for the 2013 – 2015 performance period (the “2013 – 2015 LTIP”). Pursuant to the 2013 – 2015 LTIP, certain executive officers of the Company are eligible to receive equity compensation based on the attainment of certain performance goals set forth in the 2013 – 2015 LTIP. Performance goals under the 2013-2015 LTIP include specific revenue growth and efficiency ratio goals for threshold, target and superior levels of performance, and a minimum level of performance for the Company's non-performing asset to total asset ratio at December 31, 2015 and a minimum level of net income growth for the three-year period ending December 31, 2015.

NOTE 8 – FAIR VALUE MEASUREMENT AND DISCLOSURE

Fair value is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. Fair value is best determined using quoted market prices. However, in many instances, quoted market prices are not available. In such instances, fair values are determined using various valuation techniques. Various assumptions and observable inputs must be relied upon in applying these techniques. GAAP establishes a fair value hierarchy for valuation inputs that gives the highest priority to quoted prices in active markets for identical assets or liabilities and the lowest priority to unobservable inputs.

GAAP permits an entity to choose to measure eligible financial instruments and other items at fair value. The Company has elected the fair value option for its loans held for sale. Electing the fair value option for loans held for sale enables the Company's financial position to more clearly align with the economic value of the actively traded asset.

The fair value hierarchy for valuation of an asset or liability is as follows:

Level 1: Valuation is based upon unadjusted quoted prices in active markets for identical assets and liabilities that the entity has the ability to access as of the measurement date.

Level 2: Valuation is determined from quoted prices for similar assets or liabilities in active markets, from quoted prices for identical or similar instruments in markets that are not active or by model-based techniques in which all significant inputs are observable in the market.

Level 3: Valuation is derived from model-based and other techniques in which at least one significant input is unobservable and which may be based on the Company's own estimates about the assumptions that market participants would use to value the asset or liability.

In general, fair value is based upon quoted market prices, where available. If such quoted market prices are not available, fair value is based upon model-based techniques incorporating various assumptions including interest rates, prepayment speeds and credit losses. Assets and liabilities valued using model-based techniques are classified as either Level 2 or Level 3, depending on the lowest level classification of an input that is considered significant to the overall valuation. A description of the valuation methodologies used for instruments measured at fair value, as well as the general classification of such instruments pursuant to the valuation hierarchy, is set forth below.

Financial Instruments Recorded at Fair Value on a Recurring Basis

Securities Available-for-sale: The fair value of debt securities available-for-sale is reported utilizing prices provided by an independent pricing service based on recent trading activity and other observable information including, but not limited to, dealer quotes, market spreads, cash flows, market interest rate curves, market consensus prepayment speeds, credit information, and the bond's terms and conditions. The fair value of equity securities available-for-sale was calculated using a discounted cash flow analysis using observable information including, but not limited to, cash flows, risk-adjusted discount rates and market spreads. The fair values of debt and equity securities are classified as Level 2.

Trading Account Assets: Trading account assets are invested in mutual funds and classified as Level 1 based upon quoted prices.

Loans Held for Sale: The fair value of loans held for sale is determined using quoted secondary market prices or executed sales agreements and classified as Level 2.

Derivatives: The fair value of interest rate swaps is determined using inputs that are observable in the market place obtained from third parties including yield curves, publicly available volatilities, and floating indexes and, accordingly, are classified as Level 2 inputs. The credit value adjustments associated with derivatives utilize Level 3 inputs, such as estimates of current credit spreads to evaluate the likelihood of default by the Company and its counterparties. As of June 30, 2013 and December 31, 2012, the Company has assessed the significance of the impact of the credit valuation adjustments on the overall valuation of its derivative positions and has determined that the credit valuation adjustments are not significant to the overall valuation of its derivatives due to collateral postings.

The following table summarizes financial assets and financial liabilities measured at fair value on a recurring basis as of June 30, 2013 and December 31, 2012, segregated by the level of the valuation inputs within the fair value hierarchy utilized to measure fair value:

	Readily Available Market Prices (Level 1)	Observable Market Data (Level 2)	Company Determined Fair Value (Level 3)	Total
June 30, 2013				
Financial Assets:				
Available-for-sale debt securities:				
Obligations of states and political subdivisions	\$—	\$30,489	\$—	\$30,489
Mortgage-backed securities issued or guaranteed by U.S. government sponsored enterprises	—	348,778	—	348,778
Collateralized mortgage obligations issued or guaranteed by U.S. government sponsored enterprises	—	402,257	—	402,257
Private issue collateralized mortgage obligations	—	7,845	—	7,845
Trading account assets	2,281	—	—	2,281
Loans held for sale	—	2,826	—	2,826
Customer interest rate swap agreements	—	193	—	193
Financial Liabilities:				
Interest rate swap agreements	—	6,437	—	6,437
December 31, 2012				
Financial Assets:				
Available-for-sale debt securities:				
Obligations of states and political subdivisions	\$—	\$33,040	\$—	\$33,040
Mortgage-backed securities issued or guaranteed by U.S. government sponsored enterprises	—	358,148	—	358,148
Collateralized mortgage obligations issued or guaranteed by U.S. government sponsored enterprises	—	381,688	—	381,688
Private issue collateralized mortgage obligations	—	8,174	—	8,174
Trading account assets	2,300	—	—	2,300
Customer interest rate swap agreements	—	496	—	496
Financial Liabilities:				
Interest rate swap agreements	—	11,580	—	11,580

The Company did not have any transfers between Level 1 and Level 2 of the fair value hierarchy during the six months ended June 30, 2013. The Company's policy for determining transfers between levels occurs at the end of the reporting period when circumstances in the underlying valuation criteria change and result in transfer between levels.

Financial Instruments Recorded at Fair Value on a Nonrecurring Basis

The Company may be required, from time to time, to measure certain financial assets and financial liabilities at fair value on a nonrecurring basis in accordance with GAAP. These include assets that are measured at the lower of cost or market value that were recognized at fair value below cost at the end of the period.

Collateral-Dependent Impaired Loans: Loans for which it is probable that payment of interest and principal will not be made in accordance with the contractual terms of the loan agreement are considered impaired. Once a loan is identified as individually impaired, the Company measures impairment in accordance with GAAP. Impaired loans are measured using one of three methods: the present value of expected future cash flows discounted at the loan's effective interest rate; the loan's observable market price; or the fair value of the collateral if the loan is collateral dependent. If the measure is less than an impaired loan's recorded investment, an impairment loss is recognized as part of the ALL. Accordingly, certain impaired loans may be subject to measurement at fair value on a non-recurring basis. Management has estimated the fair values of these assets using Level 2 inputs, such as the fair value of collateral based on independent third-party market approach appraisals for collateral-dependent loans, and level 3 inputs where circumstances warrant an adjustment to the appraised value based on the age of the appraisal and/or comparable sales, condition of the collateral, and market conditions.

Mortgage Servicing Rights: The Company accounts for mortgage servicing assets at cost, subject to impairment testing. When the carrying value exceeds fair value, a valuation allowance is established to reduce the carrying cost to fair value. Fair value is based on a valuation model that calculates the present value of estimated net servicing income. The Company obtains a third-party valuation based upon loan level data including note rate, type and term of the underlying loans. The model utilizes a variety of observable inputs for its assumptions, the most significant of which are loan prepayment assumptions and the discount rate used to discount future cash flows. Other assumptions include delinquency rates, servicing cost inflation and annual unit loan cost. Mortgage servicing rights are classified within Level 2 of the fair value hierarchy.

Non-Financial Assets and Non-Financial Liabilities Recorded at Fair Value

The Company has no non-financial assets or non-financial liabilities measured at fair value on a recurring basis. Non-financial assets measured at fair value on a non-recurring basis consist of other real estate owned ("OREO").

OREO properties acquired through foreclosure or deed in lieu of foreclosure are recorded at the fair value of the real estate, less costs to sell. Any write-down of the recorded investment in the related loan is charged to the allowance for loan losses upon transfer to OREO. Upon acquisition of a property, a current appraisal or a broker's opinion is used to substantiate fair value for the property. After foreclosure, management periodically obtains updated valuations of the OREO assets and, if additional impairments are deemed necessary, the subsequent write-downs for declines in value are recorded through a valuation allowance and a provision for losses charged to other non-interest expense. Certain assets require assumptions, such as expected future cash flows, that are not observable in an active market in determination of fair value and are classified as Level 3.

Assets measured at fair value on a non-recurring basis as of June 30, 2013 and December 31, 2012 are included below:

	Readily Available Market Prices (Level 1)	Observable Market Data (Level 2)	Company Determined Fair Value (Level 3)	Total
June 30, 2013				
Assets:				
Collateral-dependent impaired loans	\$—	\$—	\$7,998	\$7,998
Other real estate owned	—	—	2,155	2,155
Mortgage servicing rights	—	1,316	—	1,316
December 31, 2012				
Assets:				
Collateral-dependent impaired loans	\$—	\$—	\$9,183	\$9,183
Other real estate owned	—	—	1,313	1,313
Mortgage servicing rights	—	879	—	879

The following table presents the valuation methodology and unobservable inputs for Level 3 assets measured at fair value on a non-recurring basis at June 30, 2013:

	Fair Value	Valuation Methodology	Unobservable input	Discount Range
June 30, 2013				
Collateral-dependent impaired loans: (1)				
Partially charged-off	\$3,378	Market approach appraisal of collateral	Management adjustment of appraisal	10 – 30 %
Specifically reserved	\$4,620	Market approach appraisal of collateral	Management adjustment of appraisal	— (2)
Other real estate owned	\$2,155	Market approach appraisal of collateral	Management adjustment of appraisal	10 – 30 %
			Estimated selling cost	6 – 10 %
December 31, 2012				
Collateral-dependent impaired loans:(1)				
Partially charged-off	\$3,524	Market approach appraisal of collateral	Management adjustment of appraisal	10 – 30 %
Specifically reserved	\$5,659	Market approach appraisal of collateral	Management adjustment of appraisal	— (2)
Other real estate owned	\$1,313	Market approach appraisal of collateral	Management adjustment of appraisal	10 – 30 %
			Estimated selling cost	6 – 10 %

(1) Does not include impaired loans that are measured by the present value of expected future cash flows discounted at the loan's effective interest rate.

(2) The specific reserve for collateral-dependent impaired loans is determined by any deficit of 75% of collateral value over the recorded investment.

GAAP requires disclosure of the fair value of financial assets and financial liabilities, including those financial assets and financial liabilities that are not measured and reported at fair value on a recurring basis or non-recurring basis. The

methodologies for estimating the fair value of financial assets and financial liabilities that are measured at fair value on a

24

recurring or non-recurring basis are discussed above. The following methods and assumptions were used by the Company in estimating the fair values of its other financial instruments.

Cash and Due from Banks: The carrying amounts reported in the consolidated statement of condition approximate fair value.

FHLB and Federal Reserve Bank Stock and Investments in Trust Preferred Securities Affiliates: The carrying amounts reported in the consolidated statements of condition approximate fair value.

Loans: For variable rate loans that reprice frequently and have no significant change in credit risk, fair values are based on carrying values. The fair value of other loans is estimated by discounting the future cash flows using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining maturities.

Interest Receivable and Payable: The carrying amounts reported in the consolidated statements of condition approximate fair value.

Deposits: The fair value of deposits with no stated maturity is equal to the carrying amount. The fair value of certificates of deposit is estimated using a discounted cash flow calculation that applies interest rates and remaining maturities for currently offered certificates of deposit.

Borrowings: The carrying amounts of short-term borrowings from the FHLB, securities sold under repurchase agreements, notes payable and other short-term borrowings approximate fair value. The fair values of long-term borrowings and commercial repurchase agreements are based on the discounted cash flows using current rates for advances of similar remaining maturities.

Junior Subordinated Debentures: The carrying amounts reported in the consolidated statements of condition approximate fair value.

The following table presents the carrying amounts and estimated fair value for financial instrument assets and liabilities measured at June 30, 2013:

	Carrying Amount	Fair Value	Readily Available Market Prices (Level 1)	Observable Market Prices (Level 2)	Company Determined Market Prices (Level 3)
Financial assets:					
Cash and due from banks	\$44,896	\$44,896	\$44,896	\$—	\$—
Securities available-for-sale	789,369	789,369	—	789,369	—

NOTE 9 – COMMITMENTS AND CONTINGENCIES

Legal Contingencies

In the normal course of business, the Company and its subsidiaries are subject to pending and threatened legal actions. Although the Company is not able to predict the outcome of such actions, after reviewing pending and threatened actions with counsel, management believes that based on the information currently available the outcome of such actions, individually or in the aggregate, will not have a material adverse effect on the Company's consolidated financial position as a whole.

Reserves are established for legal claims only when losses associated with the claims are judged to be probable and the loss can be reasonably estimated. In many lawsuits and arbitrations, it is not possible to determine whether a liability has been incurred or to estimate the ultimate or minimum amount of that liability until the case is close to resolution, in which case a reserve will not be recognized until that time.

As of June 30, 2013, the Company did not have any loss contingencies that were both probable and estimable and, therefore, no accrued liability has been recognized.

Financial Instruments

In the normal course of business, the Company is a party to both on-balance sheet and off-balance sheet financial instruments involving, to varying degrees, elements of credit risk and interest rate risk in addition to the amounts recognized in the consolidated statements of condition.

27

A summary of the contractual and notional amounts of the Company's financial instruments follows:

	June 30, 2013	December 31, 2012
Lending-Related Instruments:		
Loan origination commitments and unadvanced lines of credit:		
Home equity	\$306,168	\$277,373
Commercial and commercial real estate	13,795	20,016
Residential	12,102	9,497
Letters of credit	2,076	1,836
Other commitments	17,880	16,845
Derivative Financial Instruments:		
Forward mortgage loan sale commitments	7,301	—
Derivative mortgage loan commitments	4,501	—
Customer loan swaps	15,933	16,093
Interest rate swaps	43,000	43,000

Lending-Related Instruments

The contractual amounts of the Company's lending-related financial instruments do not necessarily represent future cash requirements since certain of these instruments may expire without being funded and others may not be fully drawn upon. These instruments are subject to the Company's credit approval process, including an evaluation of the customer's creditworthiness and related collateral requirements. Commitments generally have fixed expiration dates or other termination clauses.

Derivative Financial Instruments

The Company uses derivative financial instruments for risk management purposes (primarily interest rate risk) and not for trading or speculative purposes. The Company controls the credit risk of these instruments through collateral, credit approvals and monitoring procedures.

The Company's derivative contracts contain provisions that require the Company to post cash collateral with the counterparties for contracts that are in a net liability position based on their fair values and the Company's credit rating. The Company had a notional amount of \$43.0 million in interest rate swap agreements on its junior subordinated debentures and \$6.7 million in cash held as collateral. The Company swapped the variable cost for a fixed cost and the terms of the interest rate swap agreements are as follows:

Notional Amount	Fixed Cost	Maturity Date
\$10,000	5.09%	June 30, 2021
10,000	5.84%	June 30, 2029
10,000	5.71%	June 30, 2030
5,000	4.35%	March 30, 2031
8,000	4.14%	July 7, 2031

The fair value of the swap agreements on the junior subordinated debentures at June 30, 2013 was a liability of \$6.2 million and, as this instrument qualifies as a highly effective cash flow hedge, the \$3.1 million increase in fair value during the first six months of 2013, net of tax, was recorded in other comprehensive income and other liabilities. Net payments under the swap transactions were \$829,000 in the first six months of 2013, and have been classified as cash flows from operating activities in the statement of cash flows.

Customer Derivatives

The Company has a notional amount of \$8.0 million in an interest rate swap agreements with commercial customers and interest rate swap agreements of equal notional amounts with a dealer bank related to the Company's commercial loan level

28

derivative program. As the swap agreements have substantially equivalent and offsetting terms, they do not materially change the Company's interest rate risk.

Forward Commitments to Sell Residential Mortgage Loans

The Company enters into forward commitments to sell residential mortgages in order to reduce the market risk associated with originating loans for sale in the secondary market. At June 30, 2013 the Company had \$7.3 million of forward commitments to sell residential mortgages with positive fair value of \$66,000. At December 31, 2012, the Company had no outstanding commitments to sell mortgages.

As part of originating residential mortgage and commercial loans, the Company may enter into rate lock agreements with customers, and may issue commitment letters to customers, which are considered interest rate lock or forward commitments. At June 30, 2013 the Company had \$4.5 million of mortgage loans with rate lock commitments with a positive fair value of \$40,000 in a pipeline.

NOTE 10 – RECENT ACCOUNTING PRONOUNCEMENTS

In July 2012, the Financial Accounting Standards Board (“FASB”) issued Accounting Standards Update (“ASU”) No. 2012-02, Intangibles-Goodwill and Other (Topic 350): Testing Indefinite-Lived Assets for Impairment. This ASU reduces the cost and complexity of performing an impairment test for indefinite-lived intangible assets by simplifying how an entity tests those assets for impairment and to improve consistency in impairment testing guidance among long-lived asset categories. The amendments permit an entity first to assess qualitative factors to determine whether it is more likely than not that an indefinite-lived intangible asset is impaired as a basis for determining whether it is necessary to perform the quantitative impairment test in accordance with Subtopic 350-30, Intangibles — Goodwill and Other — General Intangibles Other than Goodwill. The more-likely-than-not threshold is defined as having a likelihood of more than 50 percent. This guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012. Early adoption is permitted, including for annual and interim impairment tests performed as of a date before July 27, 2012, if a public entity's financial statements for the most recent annual or interim period have not yet been issued or, for nonpublic entities, have not yet been made available for issuance. The adoption of this new guidance did not have a material effect on the Company's consolidated financial statements.

In January 2013, the FASB issued ASU No. 2013-01, Balance Sheet (Topic 210): Clarifying the Scope of Disclosures about Offsetting Assets and Liabilities. This ASU clarifies that the scope of Update 2011-11 applies to derivatives accounted for in accordance with Topic 815, Derivatives and Hedging, including bifurcated embedded derivatives, repurchase agreements and reverse repurchase agreements, and securities borrowing and securities lending transactions that are either offset in accordance with Section 210-20-45 or Section 815-10-45 or subject to an enforceable master netting arrangement or similar agreement. This guidance is effective for fiscal years beginning on or after January 1, 2013, and interim periods within those annual periods. The clarifications provided in ASU No. 2013-01 did not have a material effect on the Company's consolidated financial statements.

In February 2013, the FASB issued ASU No. 2013-02, Comprehensive Income (Topic 220): Reporting of Amounts Reclassified out of Accumulated Other Comprehensive Income. This ASU improves the reporting of reclassifications out of accumulated other comprehensive income. The amendments in the ASU seek to attain that objective by requiring an entity to report the effect of significant reclassifications out of accumulated other comprehensive income on the respective line items in net income if the amount being reclassified is required under U.S. generally accepted accounting principles (“GAAP”) to be reclassified in its entirety to net income. For other amounts that are not required under GAAP to be reclassified in their entirety to net income in the same reporting period, an entity is required to cross-reference other disclosures required under GAAP that provide additional detail about those amounts. This guidance is effective for reporting periods beginning after December 15, 2012, with early adoption permitted. Other than matters of presentation, the adoption of this new guidance did not have a material effect on the Company's

consolidated financial statements.

In February 2013, the FASB issued ASU No. 2013-04, Liabilities (Topic 405): Obligations Resulting from Joint and Several Liability Arrangements for Which the Total Amount of the Obligation Is Fixed at the Reporting Date. This ASU provides guidance for the recognition, measurement, and disclosure of obligations resulting from joint and several liability arrangements for which the total amount of the obligation within the scope of this guidance is fixed at the reporting date, except for obligations addressed within existing guidance in GAAP. This guidance is effective for reporting periods beginning after December 15, 2013, with early adoption permitted. The amendments in this ASU should be applied retrospectively to all prior

29

periods presented for those obligations resulting from joint and several liability arrangements. The adoption of this new guidance is not expected to have a material effect on the Company's consolidated financial statements.

In April 2013, the FASB issued ASU No. 2013-07, Presentation of Financial Statements (Topic 205): Liquidation Basis of Accounting. This ASU require an entity to prepare its financial statements using the liquidation basis of accounting when liquidation is imminent. This guidance is effective for reporting periods beginning after December 15, 2013, with early adoption permitted. The amendments are effective for entities that determine liquidation is imminent during annual reporting periods beginning after December 15, 2013, and interim reporting periods therein. The adoption of this new guidance is not expected to have a material effect on the Company's consolidated financial statements.

NOTE 11 – PENDING BRANCH DIVESTITURE

On May 29, 2013, Camden National Bank (the "Bank"), a subsidiary of Camden National Corporation, entered into a definitive agreement for Skowhegan Savings Bank to purchase the Bank's Farmington, Kingfield, Phillips, Rangeley and Stratton branches. Included in the transaction are the branch deposits of approximately \$86.9 million, business loans and certain consumer loans of \$43.7 million and real estate and equipment of \$600,000. The purchase price represents a 3.5% premium on deposits, par value on the loan portfolio and book value for the real estate. The sale is expected to be completed in the fourth quarter of 2013, subject to regulatory approval.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

FORWARD-LOOKING STATEMENTS

The discussions set forth below and in the documents we incorporate by reference herein contain certain statements that may be considered forward-looking statements under the Private Securities Litigation Reform Act of 1995, including certain plans, exceptions, goals, projections, and statements, which are subject to numerous risks, assumptions, and uncertainties. Forward-looking statements can be identified by the use of the words "believe," "expect," "anticipate," "intend," "estimate," "assume," "plan," "target," or "goal" or future or conditional verbs such as "will," "may," "should," "could" and other expressions which predict or indicate future events or trends and which do not relate to historical matters. Forward-looking statements should not be relied on, because they involve known and unknown risks, uncertainties and other factors, some of which are beyond the control of the Company. These risks, uncertainties and other factors may cause the actual results, performance or achievements of the Company to be materially different from the anticipated future results, performance or achievements expressed or implied by the forward-looking statements.

Although the Company believes that the expectations reflected in the Company's forward-looking statements are reasonable, these statements involve risks and uncertainties that are subject to change based on various important factors (some of which are beyond the Company's control). The following factors, among others, could cause the Company's financial performance to differ materially from the Company's goals, plans, objectives, intentions, expectations and other forward-looking statements:

- continued weakness in the United States economy in general and the regional and local economies within the New England region and Maine, which could result in a deterioration of credit quality, a change in the allowance for loan losses or a reduced demand for the Company's credit or fee-based products and services;
- adverse changes in the local real estate market could result in a deterioration of credit quality and an increase in the allowance for loan loss, as most of the Company's loans are concentrated in Maine, and a substantial portion of these loans have real estate as collateral;
- changes in trade, monetary and fiscal policies and laws, including interest rate policies of the Board of Governors of the Federal Reserve System;
- inflation, interest rate, market and monetary fluctuations;
- competitive pressures, including continued industry consolidation, the increased financial services provided by non-banks and banking reform;
- volatility in the securities markets that could adversely affect the value or credit quality of the Company's assets;
- impairment of goodwill, the availability and terms of funding necessary to meet the Company's liquidity needs and the Company's ability to originate loans;
 - changes in information technology that require increased capital spending;
- changes in consumer spending and savings habits;
- changes in laws and regulations, including new laws and regulations concerning taxes, banking, securities and insurance; and
- changes in accounting policies, practices and standards, as may be adopted by the regulatory agencies as well as the Public Company Accounting Oversight Board, the Financial Accounting Standards Board ("FASB"), and other accounting standard setters.

You should carefully review all of these factors, and be aware that there may be other factors that could cause differences, including the risk factors listed in Part II, Item 1A, "Risk Factors," and in our Annual Report on Form 10-K for the year ended December 31, 2012. Readers should carefully review the risk factors described therein and should

not place undue reliance on our forward-looking statements.

These forward-looking statements were based on information, plans and estimates at the date of this report, and we do not promise to update any forward-looking statements to reflect changes in underlying assumptions or factors, new information, future events or other changes.

CRITICAL ACCOUNTING POLICIES

In preparing the Company's consolidated financial statements, management is required to make significant estimates and assumptions that affect the reported amounts of assets, liabilities, revenues and expenses. Actual results could differ from our current estimates, as a result of changing conditions and future events. Several estimates are particularly critical and are susceptible to significant near-term change, including the allowance for credit losses, accounting for acquisitions and our review of goodwill and other identifiable intangible assets for impairment, valuation of other real estate owned, other-than-temporary impairment ("OTTI") of investments, accounting for postretirement plans and income taxes. Our significant accounting policies and critical estimates are summarized in Note 1 to the consolidated financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2012.

Loans and Allowance for Credit Losses. Loans past due 30 days or more are considered delinquent. In general, consumer loans will be charged off if the loan is delinquent for 90 consecutive days. Commercial and real estate loans may be charged off in part or in full if they appear uncollectible. A loan is classified as non-accrual generally when it becomes 90 days past due as to interest or principal payments. All previously accrued but unpaid interest on non-accrual loans is reversed from interest income in the current period. Interest payments received on non-accrual loans (including impaired loans) are applied as a reduction of principal. A loan remains on non-accrual status until all principal and interest amounts contractually due are brought current and future payments are reasonably assured.

Management is committed to maintaining an allowance for loan losses ("ALL") that is appropriate to absorb likely loss exposure in the loan portfolio. Evaluating the appropriateness of the ALL is a key management function, one that requires the most significant amount of management estimates and assumptions. The ALL, which is established through a charge to the provision for credit losses, consists of two components: (1) a contra to total gross loans in the asset section of the balance sheet, and (2) the reserve for unfunded commitments included in other liabilities on the balance sheet. We regularly evaluate the ALL for adequacy by taking into consideration, among other factors, historical trends in charge-offs and delinquencies, overall risk characteristics and size of the portfolios, ongoing review of significant individual loans, trends in levels of watched or criticized assets, business and economic conditions, local industry trends, evaluation of results of examinations by regulatory authorities and other third parties, and other relevant factors.

In determining the appropriate level of the ALL, we use a methodology to systematically measure the amount of estimated loan loss exposure inherent in the loan portfolio. The methodology focuses on four key elements: (1) identification of loss allocations for specific loans, (2) loss allocation factors for certain loan types based on credit grade and loss experience, (3) general loss allocations for other environmental factors, and (4) the unallocated portion of the allowance. The specific loan component relates to loans that are impaired. For such impaired loans, an allowance is established when the discounted cash flows (or collateral value or observable market price) of the impaired loan is lower than the carrying value of that loan. This methodology is in accordance with accounting principles generally accepted in the United States of America ("GAAP").

We use a risk rating system to determine the credit quality of our loans and apply the related loss allocation factors. In assessing the risk rating of a particular loan, we consider, among other factors, the obligor's debt capacity, financial condition, the level of the obligor's earnings, the amount and sources of repayment, the performance with respect to loan terms, the adequacy of collateral, the level and nature of contingent liabilities, management strength, and the industry in which the obligor operates. These factors are based on an evaluation of historical information, as well as a subjective assessment and interpretation of current conditions. Emphasizing one factor over another, or considering additional factors that may be relevant in determining the risk rating of a particular loan but which are not currently an explicit part of our methodology, could impact the risk rating assigned to that loan.

Three times annually, management conducts a thorough review of adversely risk rated commercial and commercial real estate exposures exceeding certain thresholds to re-evaluate the risk rating and identify impaired loans. This extensive review takes into account the obligor's repayment history and financial condition, collateral value, guarantor support, local economic and industry trends, and other factors relevant to the particular loan relationship. Allocations for impaired loans are based upon discounted cash flows or collateral values and are made in accordance with GAAP.

We periodically reassess and revise the loss allocation factors used in the assignment of loss exposure to appropriately reflect our analysis of loss experience. Portfolios of more homogeneous populations of loans including home equity and consumer loans are analyzed as groups, taking into account delinquency rates and other economic conditions which may affect the ability of borrowers to meet debt service requirements, including interest rates and energy costs. An additional allocation is determined based on a judgmental process whereby management considers qualitative and quantitative assessments of other environmental

factors. Finally, an unallocated portion of the total allowance is maintained to allow for measurement imprecision attributable to uncertainty in the economic environment.

Because the methodology is based upon historical experience and trends as well as management's judgment, factors may arise that result in different estimations. Significant factors that could give rise to changes in these estimates may include, but are not limited to, changes in economic conditions in our market area, concentration of risk, declines in local property values, and the results of regulatory examinations. While management's evaluation of the ALL as of June 30, 2013 determined the allowance to be appropriate, under adversely different conditions or assumptions, we may need to increase the allowance. The Corporate Risk Management group reviews the ALL with the Bank's board of directors on a monthly basis. A more comprehensive review of the ALL is reviewed with the Company's board of directors, as well as the Bank's board of directors, on a quarterly basis.

The adequacy of the reserve for unfunded commitments is determined in a similar manner as the ALL, with the exception that management must also estimate the likelihood of these commitments being funded and becoming loans. This is accomplished by evaluating the historical utilization of each type of unfunded commitment and estimating the likelihood that the historical utilization rates could change in the future.

Goodwill and Identifiable Intangible Assets for Impairment. We record all assets and liabilities acquired in purchase acquisitions at fair value, which is an estimate determined by the use of internal or other valuation techniques. These valuation estimates result in goodwill and other intangible assets and are subject to ongoing periodic impairment tests and are evaluated using various fair value techniques. Goodwill impairment evaluations are required to be performed annually and may be required more frequently if certain conditions indicating potential impairment exist. Identifiable intangible assets are amortized over their estimated useful lives and are subject to impairment tests if events or circumstances indicate a possible inability to realize the carrying amount. If we were to determine that our goodwill was impaired, the recognition of an impairment charge could have an adverse impact on our results of operations in the period that the impairment occurred or on our financial position. Goodwill is evaluated for impairment using several standard valuation techniques including discounted cash flow analysis, as well as an estimation of the impact of business conditions. The use of different estimates or assumptions could produce different estimates of carrying value.

Valuation of Other Real Estate Owned ("OREO"). Periodically, we acquire property in connection with foreclosures or in satisfaction of debt previously contracted. The valuation of this property is accounted for individually based on its fair value on the date of acquisition. At the acquisition date, if the fair value of the property less the costs to sell is less than the book value of the loan, a charge or reduction in the ALL is recorded. If the value of the property becomes permanently impaired, as determined by an appraisal or an evaluation in accordance with our appraisal policy, we will record the decrease in value by charging against current earnings. Upon acquisition of a property, we use a current appraisal or broker's opinion to substantiate fair value for the property.

Other-Than-Temporary Impairment ("OTTI") of Investments. We record an investment impairment charge at the point we believe an investment has experienced a decrease in value that is other-than-temporary. In determining whether an OTTI has occurred, we review information about the underlying investment that is publicly available, analysts' reports, applicable industry data and other pertinent information, and assess our ability to hold the securities for the foreseeable future. The investment is written down to its current market value at the time the impairment is deemed to have occurred. Future adverse changes in market conditions, continued poor operating results of underlying investments or other factors could result in further losses that may not be reflected in an investment's current carrying value, possibly requiring an additional impairment charge in the future.

Effectiveness of Hedging Derivatives. The Company maintains an overall interest rate risk management strategy that incorporates the use of interest rate contracts, which are generally non-leveraged generic interest rate and basis swaps,

to minimize significant fluctuations in earnings that are caused by interest rate volatility. Interest rate contracts are used by the Company in the management of its interest rate risk position. The Company's goal is to manage interest rate sensitivity so that movements in interest rates do not significantly adversely affect earnings. When interest rates fluctuate, hedged assets and liabilities appreciate or depreciate in fair value or cash flows. Gains or losses on the derivative instruments that are linked to the hedged assets and liabilities are expected to substantially offset this unrealized appreciation or depreciation or changes in cash flows. The Company utilizes a third-party service to evaluate the effectiveness of its cash flow hedges on a quarterly basis. The effective portion of a gain or loss on a cash flow hedge is recorded in other comprehensive income, net of tax, and other assets or other liabilities on the consolidated statements of condition. The ineffective portions of cash flow hedging transactions are included in "other income" in the consolidated statements of income, if material.

Accounting for Postretirement Plans. We use a December 31 measurement date to determine the expenses for our postretirement plans and related financial disclosure information. Postretirement plan expense is sensitive to changes in the

number of eligible employees (and their related demographics) and to changes in the discount rate and other expected rates, such as medical cost trends rates. As with the computations on plan expense, cash contribution requirements are also sensitive to such changes.

Stock-Based Compensation. The fair value of restricted stock and stock options is determined on the date of grant and amortized to compensation expense, with a corresponding increase in common stock, over the longer of the service period or performance period, but in no event beyond an employee's retirement date. For performance-based restricted stock, we estimate the degree to which performance conditions will be met to determine the number of shares that will vest and the related compensation expense. Compensation expense is adjusted in the period such estimates change. Non-forfeitable dividends, if any, paid on shares of restricted stock are recorded to retained earnings for shares that are expected to vest and to compensation expense for shares that are not expected to vest.

Income Taxes. We account for income taxes by deferring income taxes based on the estimated future tax effects of differences between the tax and book bases of assets and liabilities considering the provisions of enacted tax laws. These differences result in deferred tax assets and liabilities, which are included in the consolidated statements of condition. We must also assess the likelihood that any deferred tax assets will be recovered from future taxable income and establish a valuation allowance for those assets determined not likely to be recoverable. Judgment is required in determining the amount and timing of recognition of the resulting deferred tax assets and liabilities, including projections of future taxable income. Although we have determined a valuation allowance is not required for all deferred tax assets, there is no guarantee that these assets will be realized. Although not currently under review, income tax returns for the years ended December 31, 2009 through 2011 are open to audit by federal and Maine authorities. If we, as a result of an audit, were assessed interest and penalties, the amounts would be recorded through other non-interest expense.

Non-Generally Accepted Accounting Principles ("GAAP") Financial Measures and Reconciliation to GAAP

In addition to evaluating the Company's results of operations in accordance with GAAP, management supplements this evaluation with an analysis of certain non-GAAP financial measures, such as the efficiency and tangible equity ratios, and tax equivalent net interest income. We believe these non-GAAP financial measures help investors in understanding the Company's operating performance and trends and allow for better performance comparisons to other banks. In addition, these non-GAAP financial measures remove the impact of unusual items that may obscure trends in the Company's underlying performance. These disclosures should not be viewed as a substitute for GAAP operating results, nor are they necessarily comparable to non-GAAP performance measures that may be presented by other financial institutions.

Efficiency Ratio. The efficiency ratio, which represents an approximate measure of the cost required for the Company to generate a dollar of revenue, is the ratio of (i) total non-interest expense excluding prepayment penalties and branch acquisition costs (the numerator) to (ii) net interest income on a fully taxable equivalent basis plus total non-interest income excluding net gains or losses on sale of securities and OTTI (the denominator).

	Three Months Ended June 30,		Six Months Ended June 30,	
(Dollars in Thousands)	2013	2012	2013	2012

Tax Equivalent Net Interest Income. Tax-equivalent net interest income is net interest income plus the taxes that would have been paid had tax-exempt securities been taxable. This number attempts to enhance the comparability of the performance of assets that have different tax liabilities. The following table provides a reconciliation of tax equivalent net interest income to GAAP net interest income using a 35% tax rate.

(Dollars in Thousands)	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Net interest income, as presented	\$ 19,250	\$ 18,366	\$ 38,418	\$ 36,737
Effect of tax-exempt income	205	253	415	510
Net interest income, tax equivalent	\$ 19,455	\$ 18,619	\$ 38,833	\$ 37,247

Return on Average Tangible Equity. Return on tangible equity is the ratio of (i) net income (the numerator) to (ii) average shareholders' equity less average goodwill and other intangibles. The following table reconciles return on average tangible equity to return on average equity.

(Dollars in Thousands)	Three Months Ended June 30,		Six Months Ended June 30,

Return on average equity (annualized)	10.71	% 11.48	% 10.26	% 11.74	%	%

EXECUTIVE OVERVIEW

During the second quarter of 2013, we recorded net income of \$6.3 million, down slightly from \$6.4 million recorded during the same period a year ago, and year-to-date earnings totaled \$12.0 million, representing an 8% decline compared to the first six months of 2012. Earnings reflected the impact of costs associated with the 14 branches acquired during the fourth quarter of 2012 and the ramping up of loan volumes in these new locations.

On May 29, 2013, Camden National Bank (the "Bank"), a subsidiary of Camden National Corporation, entered into a definitive agreement for Skowhegan Savings Bank to purchase the Bank's Farmington, Kingfield, Phillips, Rangeley and Stratton branches. Included in the transaction are the branch deposits of approximately \$86.9 million, business loans and certain consumer loans of \$43.7 million and real estate and equipment of \$600,000. The purchase price represents a 3.5% premium on deposits, par value on the loan portfolio and book value for the real estate. The sale is expected to be completed in the fourth quarter of 2013, subject to regulatory approval.

For the six months ended June 30, 2013:

Net income of \$12.0 million for the six months ended June 30, 2013, decreased \$1.0 million, or 8%, compared to the same period of 2012. Net income per diluted share decreased \$0.13 to \$1.56, compared to the first six months of 2012. For the first six months of 2013, the Company achieved a return on assets of 0.94%, a return on tangible equity of 13.24%, a net interest margin of 3.25%, and an efficiency ratio of 62.08%. The following were major factors contributing to the results of the first six months of 2013 compared to the same period in 2012:

Non-interest expense increased \$5.3 million primarily due to incremental operating expenses related to the branch acquisition, including compensation costs, facilities expenses, data processing costs and other expenses associated with 35% more deposit accounts, 24% additional employees and 12 additional branches.

Net interest income on a fully-taxable equivalent basis of \$38.8 million for the first six months ended June 30, 2013, increased \$1.6 million, or 4%, primarily due to the 31 basis point reduction in the average cost of funds, as a result of lower interest rates and the addition of \$287.6 million in lower cost deposits acquired with the branch acquisition in 2012.

The provision for credit losses decreased \$471,000 to \$1.4 million due to lower charge-offs and improved credit quality factors.

Non-interest income increased \$1.7 million, or 16%, primarily due to the growth in deposit-related service fees associated with the acquired deposit accounts. In addition, mortgage banking income increased \$690,000, and net gain on sale of securities and other-than-temporary impairment of securities decreased \$734,000 due to fewer sales of securities.

For the three months ended June 30, 2013:

Net income of \$6.3 million for the three month period ended June 30, 2013, decreased \$81,000, or 1%, compared to the three-month period ended June 30, 2012. Net income per diluted share decreased one cent to \$0.82, compared to the second quarter of 2012. The following were major factors contributing to the results of the three months ended June 30, 2013 compared to the same period a year ago:

Net interest income on a fully-taxable equivalent basis of \$19.5 million increased \$836,000, or 4%, compared to the same period of 2012 primarily due to the reduction in average cost of funds as a result of lower interest rates and the addition of \$287.6 million in lower cost deposits acquired with the branch acquisition in 2012.

The provision for credit losses decreased \$140,000 to \$695,000 due to improved asset quality measures.

- Non-interest income increased \$622,000, or 11%, compared to the same period of 2012 primarily due to the growth in deposit-related service fees associated with the acquired deposit accounts and a mortgage banking income increase of \$452,000, partially offset by a reduction in net security gains of \$751,000.

Non-interest expense increased \$1.7 million, or 12%, compared to the same period of 2012 primarily due to incremental operating expenses of \$2.3 million related to the branch acquisition, partially offset by a decrease in prepayment fees on borrowings of \$728,000.

Financial condition at June 30, 2013 compared to December 31, 2012:

Total loans at June 30, 2013 were \$1.6 billion, an increase of \$38.7 million compared to December 31, 2012. The loan portfolio is up 5% on an annualized basis primarily due to growth in the home equity and commercial real estate loan portfolios of \$23.5 million and \$16.8 million, respectively.

Available-for-sale securities increased \$8.3 million at June 30, 2013 compared to December 31, 2012.

Total deposits at June 30, 2013 decreased \$35.4 million to \$1.9 billion since year end as retail certificates of deposit decreased \$25.3 million and core deposits (checking, savings, and money market) decreased \$16.4 million due to our typical seasonal outflow of deposits during the first quarter of each year.

Shareholders' equity declined \$4.2 million, or 2%, primarily due to other comprehensive loss of \$12.3 million and dividends of \$4.1 million, partially offset by net income of \$12.0 million.

RESULTS OF OPERATIONS

Net Interest Income

Net interest income is the interest earned on loans, securities, and other earning assets, plus loan fees, less the interest paid on interest-bearing deposits and borrowings. Net interest income, which is our largest source of revenue and accounts for approximately 75% of total revenues (net interest income and non-interest income), is affected by factors including, but not limited to, changes in interest rates, loan and deposit pricing strategies and competitive conditions, the volume and mix of interest-earning assets and interest-bearing liabilities, and the level of non-performing assets.

Net interest income was \$38.8 million on a fully-taxable equivalent basis for the six months ended June 30, 2013, compared to \$37.2 million for the first six months of 2012, an increase of \$1.6 million, or 4%. The increase in net

interest income was primarily due to the 31 basis point reduction in the average cost of funds. The cost of funds averaged 0.57% for the first six months of 2013, compared to 0.88% in 2012, as a result of lower interest rates, \$287.6 million in lower costing deposits acquired with the branch acquisition in the fourth quarter of 2012, and the continued shifting in deposit mix to lower cost transaction accounts. The tax equivalent net interest margin declined 19 basis points as yields on earning assets declined more than the reductions in funding costs and was 3.25% and 3.44% for the six months ended June 30, 2013 and 2012, respectively. The yield on our earning assets averaged 3.80% for the first six months of 2013, compared to 4.28% for the same period in 2012, a decrease of 48 basis points as amortization and prepayments on loans and investments were reinvested at lower rates, particularly in the investment portfolio.

The following table presents, for the periods noted, average balances, interest income, interest expense, and the corresponding average yields earned and rates paid, as well as net interest income, net interest rate spread and net interest margin:

Provision and Allowance for Loan Losses

The provision for loan losses is a recorded expense determined by management that adjusts the ALL to a level, which, in management's best estimate, is necessary to absorb probable losses within the existing loan portfolio. The provision for loan losses reflects loan quality trends, including, among other factors, the levels of and trends related to non-accrual loans, past due loans, potential problem loans, criticized loans, net charge-offs or recoveries and growth in the loan portfolio. Accordingly, the amount of the provision reflects both the necessary increases in the allowance for loan losses related to newly identified criticized loans, as well as the actions taken related to other loans including, among other things, any necessary increases or decreases in required allowances for specific loans or loan pools. The provision for credit losses for the six months ended June 30, 2013, totaled \$1.4 million, compared with \$1.8 million for the same period of 2012. Please see the caption "Financial Condition—Asset Quality" below for additional discussion regarding the allowance for loan losses.

Non-Interest Income

Non-interest income represents 25% and 23% of total revenues (net interest income and non-interest income) for the six months ended June 30, 2013 and 2012, respectively. Non-interest income of \$12.7 million for the six months ended June 30, 2013 increased by \$1.7 million, or 16%, compared to \$11.0 million for the six month period ended June 30, 2012.

(Dollars in thousands)	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Service charges on deposit accounts	\$1,755	\$1,315	\$3,439	\$2,471
Other service charges and fees	1,513	956	2,942	1,801
Income from fiduciary services	1,275	1,289	2,418	2,728
Mortgage banking income, net	584	132	1,158	468
Brokerage and insurance commissions	409	410	821	749
Bank-owned life insurance	314	342	652	681
Net gain on sale of securities and other-than-temporary impairment of securities	—	751	138	872
Other income	526	559	1,144	1,212
Total non-interest income	\$6,376	\$5,754	\$12,712	\$10,982

The significant changes in non-interest income for the six months ended June 30, 2013 compared to the same period of 2012 include:

- Increase in deposit-related service fees and other service charges and fees of \$2.1 million associated with the acquired deposit accounts;
- Increase in mortgage banking income of \$690,000 primarily due to cash gains and mortgage servicing valuation associated with increased loan sales; and
- Decrease in net gain on sale of securities and other-than-temporary impairment of \$734,000 due to fewer sales.

The significant changes in non-interest income for the three months ended June 30, 2013 compared to the same period of 2012 include:

- Increase in deposit-related service fees and other service charges and fees of \$997,000 associated with the acquired deposit accounts;
- Increase in mortgage banking income of \$452,000 primarily due to cash gains and mortgage servicing valuation associated with increased loan sales; and
- Decrease in net gain on sale of securities and other-than-temporary impairment of \$751,000 due to fewer security sales.

Non-Interest Expenses

Non-interest expenses increased \$5.3 million, or 20%, for the six months ended June 30, 2013 compared to the same period in 2012. The following table presents the components of non-interest expense:

(Dollars in thousands)	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Salaries and employee benefits	\$7,961	\$6,972	\$16,322	\$13,880
Furniture, equipment and data processing	1,931	1,295	3,535	2,518
Net occupancy	1,407	1,020	2,959	2,131
Other real estate owned and collection costs (recoveries), net	(22)	497	866	1,123
Consulting and professional fees	585	608	1,132	1,098
Regulatory assessments	500	432	999	867
Amortization of intangible assets	287	145	574	289
Branch acquisition/divestiture costs	71	—	232	—
Other expenses	2,928	3,010	5,529	4,992
Total Non-Interest Expense	\$15,648	\$13,979	\$32,148	\$26,898

The significant changes in non-interest expense for the six months ended June 30, 2013, compared to 2012 include:

- Increase in salaries and employee benefits of \$2.4 million, or 18%, due to an increase in the average full-time equivalent number of employees of 95, or 23%, primarily due to new positions associated with the branch acquisition;
- Increase in furniture, equipment and data processing of \$1.0 million, or 40%, primarily related to the core operating system conversion for Acadia Trust, N.A. of \$198,000, costs associated with upgrading the ATM network, and the incremental cost of supporting 35% more deposit accounts and additional branches;
- Increase in net occupancy of \$828,000, or 39%, primarily due to the increased costs associated with supporting additional branch facilities, closing one leased facility, and a colder winter resulting in higher heating and snow removal costs; and
- Increase in other expenses of \$537,000 due to increased costs associated with the acquired branches, partially offset by a decrease in prepayment fees on borrowings of \$728,000.

The significant changes in non-interest expense for the three months ended June 30, 2013, compared to 2012 include:

- Increase in salaries and employee benefits of \$989,000, or 14%, due to an increase in the average full-time equivalent number of employees of 84, or 21%, primarily due to new positions associated with the branch acquisition;
- Increase in furniture, equipment and data processing of \$636,000, or 49%, primarily related to the core operating system conversion for Acadia Trust, N.A. of \$182,000, costs associated with upgrading the ATM network, and the incremental cost of supporting 35% more deposit accounts and additional branches; and
- Decrease in other real estate owned and collection costs of \$519,000 due to a recovery on servicing related claims combined with lower levels of foreclosures and OREO expenses.

FINANCIAL CONDITION

Overview

Total assets at June 30, 2013 were \$2.6 billion, an increase of \$37.0 million from December 31, 2012. The growth in total assets was primarily due to an increase in total loans (excluding loans held for sale) of \$38.7 million. Total liabilities increased \$41.2 million since year-end with a net increase in Federal Home Loan Bank (“FHLB”) advances and other borrowings of \$88.1 million and a decrease in total deposits of \$35.4 million. Total shareholders’ equity decreased \$4.2 million since year-end, which was a result of net unrealized losses on securities available for sale,

partially offset by current year earnings.

During the first six months of 2013, average assets increased \$249.8 million, or 11%, compared to the same period in 2012. The growth in total assets was fueled by our average investment and loan balances, which increased \$176.0 million and

39

\$53.6 million, respectively. The increase in the investment portfolio, which accounted for 70% of the average assets growth, was due to the purchase of securities with a portion of the cash from the branch acquisition. Within our loan portfolio, the consumer and commercial real estate portfolios experienced the largest growth with increased average balances of \$24.6 million and \$23.8 million, respectively, followed by the commercial loan portfolio, which grew \$8.8 million. Average residential real estate loan balances declined \$2.4 million due to the sale of 30-year fixed-rate production to manage our interest rate risk profile. Average funding liabilities increased \$236.0 million through the increase in total average deposits of \$331.8 million related to the acquired deposits from the branch acquisition and organic deposit growth of 3%, partially offset by a reduction in total average borrowings of \$95.8 million.

Investment Securities

We purchase and hold investment securities such as U.S. government sponsored enterprises, states and political subdivisions, mortgage-backed securities, FHLB and Federal Reserve Bank (“FRB”) stock, investment grade corporate bonds and equities to diversify our revenues, to provide interest rate and credit risk diversification and to provide for liquidity and funding needs. At June 30, 2013, our total holdings in investment securities were \$809.1 million, an increase of \$7.0 million, or 1%, from December 31, 2012.

Unrealized gains or losses on securities classified as available-for-sale (“AFS”) are recorded as adjustments to shareholders’ equity, net of related deferred income taxes and are a component of other comprehensive income (loss) in the consolidated statement of comprehensive income (loss). At June 30, 2013, we had \$2.6 million of unrealized losses on AFS securities, net of deferred taxes, compared to \$12.9 million of unrealized gains, net of deferred taxes, at December 31, 2012. The fair value of the AFS securities shifted to a loss position as a result of the increase in longer term bond rates during the second quarter of 2013.

Within our AFS portfolio, we held senior tranches of non-agency collateralized mortgage obligations (“non-agency”), which were rated Triple-A by Moody’s, Standard and Poor’s, and/or Fitch at the time of purchase. At June 30, 2013 our non-agencies had a total fair value of \$7.8 million and \$261,000 in net unrealized losses. We believe that the decline in the fair values is temporary and does not reflect deterioration in the credit. The Company has the intent and ability to hold these securities until recovery and will continue to evaluate the unrealized losses within our portfolio each quarter to determine if the impairment is other than temporary.

Each month we determine if a security has OTTI by evaluating the present value of projected credit losses that result from a discounted cash flow analysis. The analyses include several stress tests scenarios, which determine expected cash flows and forecast potential losses. Stress tests, which are performed monthly on higher risk investments (non-investment grade and/or coverage ratio of less than 1.00), use current statistical data to determine expected cash flows and forecast potential losses. Information on the securities is sourced from the Bloomberg and FTN Financial models, which enables management to track loan and performance data for the individual tranche and the entire issue as well as prepayment history. We review the significant inputs of the discounted cash flow analysis to ensure reasonableness and a prudent measure; we compare the Bloomberg assumptions to the assumptions used by FTN Financial, which is a division of First Tennessee Bank. Included in the monthly analyses is a review of the performance of the individual tranches held and the related entire issue, a base case and several stress test scenarios. The base case stress test uses both current data and historical performance and provides a basis for determining if a credit loss is projected during the life of the investment. When deemed appropriate, the significant inputs for the base case stress test are adjusted to better reflect future expected cash flows. Based on the results of this analysis, the Company did not record any OTTI write-down during the second quarter of 2013.

Federal Home Loan Bank Stock

We are required to maintain a level of investment in FHLB of Boston (“FHLBB”) stock based on the level of our FHLBB advances. As of June 30, 2013, our investment in FHLBB stock totaled \$19.7 million. No market exists for shares of the FHLBB. FHLBB stock may be redeemed at par value five years following termination of FHLBB

membership, subject to limitations or restrictions that may be imposed by the FHLBB or its regulator, the Federal Housing Finance Agency, to maintain capital adequacy of the FHLBB. While we currently have no intention to terminate our FHLBB membership, the ability to redeem our investment in FHLBB stock would be subject to the conditions imposed by the FHLBB. During the first quarter of 2013, the FHLBB repurchased \$1.3 million of FHLBB stock from the Company.

Loans

We provide loans primarily to customers located within our geographic market area. At June 30, 2013, total loans of \$1.6 billion (excluding loans held-for-sale) increased \$38.7 million from December 31, 2012. Loan growth centered in our home equity loan portfolio, which increased \$23.5 million, as a result of a ten-year fixed rate home equity promotion. The commercial real estate and consumer portfolios increased \$16.8 million and \$1.5 million, respectively, while the commercial

portfolio declined \$386,000. Residential real estate balances, which decreased \$2.7 million from year end, were reduced through the sale of \$19.8 million in 30-year fixed-rate production to manage our interest rate risk profile.

Asset Quality

Non-Performing Assets. Non-performing assets include non-accrual loans, accruing loans 90 days or more past due, renegotiated loans and property acquired through foreclosure or repossession.

The following table sets forth the amount of our non-performing assets as of the dates indicated:

(Dollars in Thousands)	June 30, 2013	December 31, 2012		
Non-accrual loans				
Residential real estate	\$8,624	\$10,584		
Commercial real estate	6,634	6,719		
Commercial	3,233	3,409		
Consumer and home equity loans	1,945	1,771		
Total non-accrual loans	20,436	22,483		
Accruing loans past due 90 days	—	611		
Accruing renegotiated loans not included above	5,701	4,674		
Total non-performing loans	26,137	27,768		
Other real estate owned	2,155	1,313		
Total non-performing assets	\$28,292	\$29,081		
Non-performing loans to total loans	1.63	% 1.78		%
Allowance for credit losses to non-performing loans	89.34	% 83.15		%
Non-performing assets to total assets	1.09	% 1.13		%
Allowance for credit losses to non-performing assets	82.54	% 79.40		%

Potential Problem Loans. Potential problem loans consist of classified accruing commercial and commercial real estate loans that were between 30 and 89 days past due. Such loans are characterized by weaknesses in the financial condition of borrowers or collateral deficiencies. Based on historical experience, the credit quality of some of these loans may improve due to changes in collateral values or the financial condition of the borrowers, while the credit quality of other loans may deteriorate, resulting in some amount of loss. These loans are not included in the above analysis of non-accrual loans. At June 30, 2013, potential problem loans amounted to approximately \$1.3 million, or 0.08% of total loans, compared to \$2.2 million, or 0.14% of total loans, at December 31, 2012.

Past Due Loans. Past due loans consist of accruing loans that were between 30 and 89 days past due. The following table sets forth information concerning the past due loans at the date indicated:

(Dollars in Thousands)	June 30, 2013	December 31, 2012		
Loans 30-89 days past due:				
Residential real estate	\$1,827	\$1,658		
Commercial real estate	1,591	2,618		
Commercial	202	1,043		
Consumer and home equity loans	716	2,721		
Total loans 30-89 days past due	\$4,336	\$8,040		
Loans 30-89 days past due to total loans	0.27	% 0.51		%

Allowance for Loan Losses. We use a methodology to systematically measure the amount of estimated loan loss exposure inherent in the loan portfolio for purposes of establishing a sufficient ALL. The ALL is management's best estimate of the

probable loan losses as of the balance sheet date. The allowance is increased by provisions charged to earnings and by recoveries of amounts previously charged-off, and is reduced by charge-offs on loans. During the first six months of 2013, there were no significant changes to the allowance assessment methodology.

The following table sets forth information concerning the activity in our ALL during the periods indicated.

(Dollars in Thousands)	Six Months Ended	
	June 30,	
	2013	2012
Allowance at the beginning of the period	\$23,044	\$23,011
Provision for loan losses	1,384	1,817
Charge-offs:		
Residential real estate loans	347	446
Commercial real estate	171	209
Commercial loans	444	416
Consumer and home equity loans	470	879
Total loan charge-offs	1,432	1,950
Recoveries:		
Residential real estate loans	5	68
Commercial real estate loans	92	166
Commercial loans	198	120
Consumer and home equity loans	30	30
Total loan recoveries	325	384
Net charge-offs	(1,107)	(1,566)
Allowance at the end of the period	\$23,321	\$23,262
Components of allowance for credit losses:		
Allowance for loan losses	\$23,321	\$23,262
Liability for unfunded credit commitments	30	43
Balance of allowance for credit losses at end of the period	\$23,351	\$23,305
Average loans outstanding	\$1,580,194	\$1,526,600
Net charge-offs (annualized) to average loans outstanding	0.14	% 0.21
Provision for credit losses (annualized) to average loans outstanding	0.17	% 0.24
Allowance for credit losses to total loans	1.45	% 1.52
Allowance for credit losses to net charge-offs (annualized)	1,054.44	% 744.29
Allowance for credit losses to non-performing loans	89.34	% 83.09
Allowance for credit losses to non-performing assets	82.54	% 78.35

The determination of an appropriate level of ALL, and subsequent provision for loan losses, which affects earnings, is based on our analysis of various economic factors and our review of the loan portfolio, which may change due to numerous factors including, but not limited to, loan growth, payoffs of lower quality loans, recoveries on previously charged-off loans, improvement in the financial condition of the borrowers, risk rating downgrades/upgrades and charge-offs. We utilize a comprehensive approach toward determining the ALL, which includes an expanded risk rating system to assist us in identifying the risks being undertaken, as well as migration within the overall loan portfolio. During the first six months of 2013, the Company provided \$1.4 million of expense to the ALL compared to \$1.8 million for the same period in 2012. The decrease in the provision for loan losses was primarily due to lower net charge-offs. Annualized net charge-offs to average loans decreased to 0.14% at June 30, 2013 compared to 0.24% for 2012, and were lower than the June 30, 2012 six months of 0.21%.

Overall, economic conditions in Maine experienced minimal change during the second quarter of 2013, with modest gains in the unemployment rate and real estate values. Weaknesses in the real estate markets persist, particularly in the

residential real estate market, where consumers face employment uncertainty and income pressures related to food and energy prices. Economic forecasts for Maine continue to push the state's recovery out past 2015, lagging the national recovery by one to two years. However, the Company has seen improved asset quality and lower losses during the second quarter of 2013. As updated

financial statements are being collected and analyzed on the heels of this year's tax season, the early indications are of a slightly improved general financial condition among commercial customers. Auction activity has increased, resulting in more sales than transfers into OREO. We believe the ALL of \$23.3 million, or 1.45% of total loans outstanding and 89.34% of total non-performing loans at June 30, 2013, was appropriate given the current economic conditions in our service area and the condition of the loan portfolio. If conditions deteriorate, however, the provision will likely be increased. The ALL was 1.52% of total loans outstanding and 83.09% of total non-performing loans at June 30, 2012, and 1.48% of total loans outstanding and 83.15% of total non-performing loans at December 31, 2012.

Liabilities and Shareholders' Equity

Total liabilities increased \$41.2 million since December 31, 2012 to \$2.4 billion at June 30, 2013. Total deposits, including brokered deposits, decreased \$35.4 million since December 31, 2012, primarily due to retail certificates of deposit, which decreased \$25.3 million. Core deposits (demand deposit, interest checking, savings and money market accounts) declined \$16.4 million since December 31, 2012, primarily due to our typical seasonal outflow of transaction deposits during the first quarter of each year. Short-term brokered deposits increased \$6.3 million since December 31, 2012 due to a more favorable cost than other funding alternatives. Borrowings increased \$88.1 million since December 31, 2012 supporting the increase in earning assets and seasonal outflow of transaction deposits.

Total shareholders' equity decreased \$4.2 million, or 2%, since December 31, 2012, which was primarily the result of an other comprehensive loss of \$12.3 million and dividends declared to shareholders of \$4.1 million, partially offset by current year earnings of \$12.0 million.

The following table presents certain information regarding shareholders' equity as of or for the periods indicated:

	June 30, 2013	December 31, 2012		
Return on average equity	10.26	% 10.31		%
Average equity to average assets	9.16	% 9.48		%
Dividend payout ratio	33.19	% 32.73		%
Dividends declared per share	\$0.54	\$1.00		
Book value per share	\$30.05	\$30.67		

LIQUIDITY

Our liquidity needs require the availability of cash to meet the withdrawal demands of depositors and credit commitments to borrowers. Liquidity is defined as our ability to maintain availability of funds to meet customer needs, as well as to support our asset base. The primary objective of liquidity management is to maintain a balance between sources and uses of funds to meet our cash flow needs in the most economical and expedient manner. Due to the potential for unexpected fluctuations in both deposits and loans, active management of liquidity is necessary. We maintain various sources of funding and levels of liquid assets in excess of regulatory guidelines in order to satisfy their varied liquidity demands. We monitor liquidity in accordance with internal guidelines and all applicable regulatory requirements. As of June 30, 2013 and 2012, our level of liquidity exceeded target levels. We believe that we currently have appropriate liquidity available to respond to liquidity demands. Sources of funds that we utilize consist of deposits, borrowings from the FHLBB and other sources, cash flows from operations, prepayments and maturities of outstanding loans, investments and mortgage-backed securities and the sales of mortgage loans.

Deposits continue to represent our primary source of funds. For the first six months of 2013, average deposits (excluding brokered deposits) of \$1.8 billion increased \$331.8 million, compared to the same period in 2012, primarily due to the branch acquisition in the fourth quarter of 2012. We experienced growth in average balances of

demand deposits and interest checking accounts of \$162.9 million, money market accounts of \$97.8 million, savings accounts of \$48.3 million, and retail certificates of deposit of \$22.8 million. Included in the money market and interest checking deposit categories are deposits from our wealth management subsidiary, Acadia Trust, N.A. (“Acadia Trust”), which represent client funds. The deposits in the Acadia Trust client accounts, which totaled \$111.7 million at June 30, 2013, fluctuate with changes in the portfolios of the clients of Acadia Trust.

Borrowings are used to supplement deposits as a source of liquidity. In addition to borrowings from the FHLBB, we purchase federal funds and sell securities under agreements to repurchase. Our average total borrowings, which include long-term debt, totaled \$511.8 million for the first six months of 2013, a decrease of \$95.8 million or 16%, from the same period in 2012, primarily due to the reduction in FHLBB borrowings of \$50.7 million as result of using proceeds from the branch acquisition to reduce borrowings and commercial repurchase agreements of \$33.3 million. We secure borrowings from the FHLBB, whose advances remain the largest non-deposit-related funding source, with qualified residential real estate loans, certain investment securities and certain other assets available to be pledged. The carrying value of loans pledged as collateral at the FHLBB was \$685.4 million and \$667.2 million at June 30, 2013 and 2012, respectively. The carrying value of securities pledged as collateral at the FHLBB was \$4.0 million and \$7.8 million at June 30, 2013 and 2012, respectively. Through the Bank, we had an available line of credit with the FHLBB of \$9.9 million at June 30, 2013 and 2012. We had no outstanding balance on the line of credit with the FHLBB at June 30, 2013. Long-term borrowings represent securities sold under repurchase agreements with major brokerage firms and a note payable with a maturity date over one year. Both wholesale and retail repurchase agreements are secured by mortgage-backed securities and government sponsored enterprises. The Company has \$10.0 million in other lines of credit with a maturity date of December 20, 2013. We had no outstanding balance on these lines of credit at June 30, 2013.

We believe the investment portfolio and residential loan portfolio provide a significant amount of contingent liquidity that could be accessed in a reasonable time period through sales of those portfolios. We also believe that we have additional untapped access to the brokered deposit market, commercial reverse repurchase transaction market and the FRB discount window. These sources are considered as liquidity alternatives in our contingent liquidity plan. We believe that the level of liquidity is sufficient to meet current and future funding requirements; however, changes in economic conditions, including consumer saving habits and the availability or access to the national brokered deposit and commercial repurchase markets, could significantly impact our liquidity position.

CAPITAL RESOURCES

Under FRB guidelines, we are required to maintain capital based on risk-adjusted assets. These capital requirements represent quantitative measures of our assets, liabilities and certain off-balance sheet items as calculated under regulatory accounting practices. Our capital classification is also subject to qualitative judgments by our regulators about components, risk weightings and other factors. Quantitative measures established by regulation to ensure capital adequacy require us to maintain minimum amounts and ratios of total and Tier 1 capital (as defined in the applicable regulations) to risk-weighted assets (as defined in the applicable regulations), and of Tier 1 capital to average assets (as defined in the applicable regulations). These guidelines apply to us on a consolidated basis. Under the current guidelines, banking organizations must maintain a risk-based capital ratio of 8.0%, of which at least 4.0% must be in the form of core capital (as defined in the applicable regulations). In addition to risk-based capital requirements, the FRB requires bank holding companies to maintain a minimum leverage capital ratio of core capital to total assets of 4.0%. Total assets for this purpose do not include goodwill and any other intangible assets and investments that the FRB determines should be deducted. Our risk-based ratios and those of the Camden National Bank (the "Bank"), exceeded regulatory guidelines at June 30, 2013, December 31, 2012 and June 30, 2012. The following table presents the Company's regulatory capital ratios at the periods indicated:

	June 30, 2013	December 31, 2012	June 30, 2012	
Tier 1 capital to risk-weighted assets	14.57	% 14.31	% 14.97	%
Total capital to risk-weighted assets	15.82	% 15.56	% 16.22	%
Tier 1 leverage capital ratio	9.05	% 8.94	% 9.64	%

Although the junior subordinated debentures are recorded as a liability on our consolidated statements of condition, we are permitted, in accordance with regulatory guidelines, to include, subject to certain limits, the trust preferred securities in our calculation of risk-based capital. At June 30, 2013, \$43.0 million of the trust preferred securities were included in Tier 1 and total risk-based capital.

As part of our goal to operate a safe, sound and profitable financial organization, we are committed to maintaining a strong capital base. Shareholders' equity totaled \$229.6 million, \$233.8 million and \$226.1 million at June 30, 2013, December 31, 2012 and June 30, 2012, respectively, which amounted to 8.8%, 9.1% and 9.4% of total assets for the respective periods. Total

shareholders' equity increased \$3.5 million, or 2%, from June 30, 2012 and decreased \$4.2 million, or 2%, from December 31, 2012, which was primarily the result of an other comprehensive loss of \$12.3 million and dividends declared to shareholders of \$3.9 million, partially offset by current year earnings of \$12.0 million. The other comprehensive loss was due to the change in fair value of our AFS securities, which experienced a decline due to the increase in long-term bond rates during the second quarter of 2013.

Our principal cash requirement is the payment of dividends on our common stock, as and when declared by the board of directors. We paid dividends to shareholders in the aggregate amount of \$4.1 million and \$3.9 million for the six month period ended June 30, 2013 and 2012 respectively. Our board of directors approves cash dividends on a quarterly basis after careful analysis and consideration of various factors, including the following: (i) capital position relative to total assets, (ii) risk-based assets, (iii) total classified assets, (iv) economic conditions, (v) growth rates for total assets and total liabilities, (vi) earnings performance and projections and (vii) strategic initiatives and related capital requirements. All dividends declared and distributed by the Company will be in compliance with applicable state corporate law and regulatory requirements.

We are primarily dependent upon the payment of cash dividends by our subsidiaries to service our commitments. We, as the sole shareholder of our subsidiaries, are entitled to dividends, when and as declared by each subsidiary's board of directors from legally available funds. The Bank declared dividends in the aggregate amount of \$6.3 million and \$6.5 million for the first six months of 2013 and 2012, respectively. Under regulations prescribed by the Office of the Comptroller of the Currency (the "OCC"), without prior OCC approval, the Bank may not declare dividends in any year in excess of the Bank's (i) net income for the current year, (ii) plus its retained net income for the prior two years. If we are required to use dividends from the Bank to service unforeseen commitments in the future, we may be required to reduce the dividends paid to our shareholders going forward.

On September 25, 2012, the board of directors authorized the 2012 Common Stock Repurchase Program ("Repurchase Program"). The Repurchase Program will allow for the repurchase of up to 500,000 shares, or approximately 6.5%, of the Company's outstanding common stock during the term of the Repurchase Program. No shares have been repurchased yet under the Repurchase Program, which expires on October 1, 2013.

CONTRACTUAL OBLIGATIONS AND COMMITMENTS

In the normal course of business, we are a party to credit related financial instruments with off-balance sheet risk, which are not reflected in the consolidated statements of condition. These financial instruments include lending commitments and letters of credit. Those instruments involve varying degrees of credit risk in excess of the amount recognized in the consolidated statements of condition. We follow the same credit policies in making commitments to extend credit and conditional obligations as we do for on-balance sheet instruments, including requiring similar collateral or other security to support financial instruments with credit risk. Our exposure to credit loss in the event of nonperformance by the customer is represented by the contractual amount of those instruments. Since many of the commitments are expected to expire without being drawn upon, the total amount does not necessarily represent future cash requirements. At June 30, 2013, we had the following levels of commitments to extend credit:

(Dollars in Thousands)	Total Amount Committed	Commitment Expires in:			
		<1 Year	1 – 3 Years	4 – 5 Years	>5 Years
Letters of Credit	\$2,076	\$2,076	\$—	\$—	\$—
Commercial Commitment Letters	13,795	13,795	—	—	—
Residential Loan Origination	12,102	12,102	—	—	—
Home Equity Line of Credit Commitments	306,168	99,746	5,690	6,629	194,103

Edgar Filing: CAMDEN NATIONAL CORP - Form 10-Q

Other Commitments to Extend Credit	17,880	17,880	—	—	—
Total	\$352,021	\$145,599	\$5,690	\$6,629	\$194,103

45

We are a party to several off-balance sheet contractual obligations through lease agreements on a number of branch facilities. We have an obligation and commitment to make future payments under these contracts. At June 30, 2013, we had the following levels of contractual obligations:

(Dollars in Thousands)	Total Amount of Obligations	Payments Due per Period			
		<1 Year	1 – 3 Years	4 – 5 Years	>5 Years
Operating Leases	\$5,521	\$1,137	\$1,763	\$1,287	\$1,334
Capital Leases	1,072	58	124	134	756
FHLBB Borrowings – Overnight	59,600	59,600	—	—	—
FHLBB Borrowings – Advances	186,147	130,000	21,147	35,000	—
Commercial Repurchase Agreements	30,165	—	—	30,165	—
Other Borrowed Funds	127,436	127,436	—	—	—
Junior Subordinated Debentures	43,870	—	—	—	43,870
Note Payable	44	35	9	—	—
Other Contractual Obligations	1,118	1,118	—	—	—
Total	\$454,973	\$319,384	\$23,043	\$66,586	\$45,960

(1) Excludes contingent rentals, which are based on the Consumer Price Index and reset every five years. Total contingent rentals for year one through year five are \$21,000.

Borrowings from the FHLBB consist of short- and long-term fixed- and variable-rate borrowings and are collateralized by all stock in the FHLBB and a blanket lien on qualified collateral consisting primarily of loans with first mortgages secured by one- to four-family properties, certain pledged investment securities and other qualified assets. Other borrowed funds include federal funds purchased and securities sold under repurchase agreements. We have an obligation and commitment to repay all borrowings and debentures. These commitments, borrowings, junior subordinated debentures and the related payments are made during the normal course of business.

We may use derivative instruments as partial hedges against large fluctuations in interest rates. We may also use fixed-rate interest rate swap and floor instruments to partially hedge against potentially lower yields on the variable prime rate loan category in a declining rate environment. If rates were to decline, resulting in reduced income on the adjustable rate loans, there would be an increased income flow from the interest rate swap and floor instruments. We may also use variable-rate interest rate swap and cap instruments to partially hedge against increases in short-term borrowing rates. If rates were to rise, resulting in an increased interest cost, there would be an increased income flow from the interest rate swap and cap instruments. These financial instruments are factored into our overall interest rate risk position. We regularly review the credit quality of the counterparty from which the instruments have been purchased. At June 30, 2013, the Company had the following interest rate swaps related to the junior subordinated debentures:

Notional Amount	Fixed Cost	Maturity Date
\$10,000	5.09%	June 30, 2021
10,000	5.84%	June 30, 2029
10,000	5.71%	June 30, 2030
5,000	4.35%	March 30, 2031
8,000	4.14%	July 7, 2031

At June 30, 2013, the Company had a notional amount of \$8.0 million in interest rate swap agreements with commercial customers and equal notional amount with a dealer bank related to the Company's commercial loan level derivative program. This program allows the Company to retain variable-rate commercial loans while allowing the

customer to synthetically fix the loan rate by entering into a variable-to-fixed interest rate swap. It is anticipated that, over time, customer interest rate derivatives will reduce the interest rate risk inherent in the longer-term, fixed-rate commercial business.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURE ABOUT MARKET RISK

MARKET RISK

Market risk is the risk of loss in a financial instrument arising from adverse changes in market rates/prices, such as interest rates, foreign currency exchange rates, commodity prices and equity prices. Our primary market risk exposure is interest rate risk. The ongoing monitoring and management of this risk is an important component of our asset/liability management process, which is governed by policies established by the Bank's board of directors, and are reviewed and approved annually. The Bank's board of directors' Asset/Liability Committee ("Board ALCO") delegates responsibility for carrying out the asset/liability management policies to the Management Asset/Liability Committee ("Management ALCO"). In this capacity, Management ALCO develops guidelines and strategies impacting our asset/liability management-related activities based upon estimated market risk sensitivity, policy limits and overall market interest rate levels/trends. Management ALCO and Board ALCO jointly meet on a quarterly basis to review strategies, policies, economic conditions and various activities as part of the management of these risks.

Interest Rate Risk

Interest rate risk represents the sensitivity of earnings to changes in market interest rates. As interest rates change, the interest income and expense streams associated with our financial instruments also change, thereby impacting net interest income ("NII"), the primary component of our earnings. Board and Management ALCOs utilize the results of a detailed and dynamic simulation model to quantify the estimated exposure of NII to sustained interest rate changes. While Board and Management ALCOs routinely monitor simulated NII sensitivity over a rolling two-year horizon, they also utilize additional tools to monitor potential longer-term interest rate risk.

The simulation model captures the impact of changing interest rates on the interest income received and interest expense paid on all interest-earning assets and interest-bearing liabilities reflected on our consolidated statements of condition, as well as for derivative financial instruments, if any. None of the assets used in the simulation were held for trading purposes. This sensitivity analysis is compared to Board ALCO policy limits, which specify a maximum tolerance level for NII exposure over a one-year horizon, assuming no balance sheet growth, given a 200 basis point ("bp") upward and 200 bp downward shift in interest rates. Although our policy specifies a downward shift of 200 bp, this could result in negative rates as many benchmark rates are currently below 2.00%. A parallel and pro rata shift in rates over a 12-month period is assumed. Using this approach, we are able to produce reports that illustrate the effect that both a gradual change of rates (Year 1) and a "rate shock" (Year 2 and beyond) have on margin expectations. In the down 100 bp scenario, Federal Funds and Treasury yields are floored at .01% while Prime is floored at 3.00%. All other market rates are floored at 0.25%.

During the first six months of 2013 and 2012, our NII sensitivity analysis reflected the following changes to NII assuming no balance sheet growth and a parallel shift in interest rates over a one-year horizon. All rate changes were "ramped" over the first 12-month period and then maintained at those levels over the remainder of the ALCO simulation horizon.

Rate Change from Year 1 - Base	Estimated Changes in NII			
	June 30, 2013		June 30, 2012	
Year 1				
+400 bp	(3.65)%	(2.87)%
+200 bp	(3.67)%	(2.87)%
-100 bp	(0.59)%	(0.16)%
Year 2				

Edgar Filing: CAMDEN NATIONAL CORP - Form 10-Q

+400 bp	(7.40)%	(6.99)%
+200 bp	(4.04)%	(5.34)%
-100 bp	(5.91)%	(8.81)%

The preceding sensitivity analysis does not represent a forecast and should not be relied upon as being indicative of expected operating results. These hypothetical estimates are based upon numerous assumptions including, among others, the nature and timing of interest rate levels, yield curve shape, prepayments on loans and securities, deposit decay rates, pricing decisions on loans and deposits and reinvestment/replacement of asset and liability cash flows. While assumptions are developed based upon

current economic and local market conditions, we cannot make any assurances as to the predictive nature of these assumptions, including how customer preferences or competitor influences might change.

The most significant factors affecting the changes in market risk exposure during the first six months of 2013 was the accumulation of longer term assets funded primarily with shorter-term borrowings plus the continued repricing/replacement of assets' cash flows at today's lower rate levels at a faster pace than the decline in overall funding costs. If rates remain at or near current levels and the balance sheet mix remains similar, net interest income is projected to trend downward as the continual low rate environment drives asset yields lower with insufficient offsets from funding cost reductions. This downward pressure is less severe when compared to the March 2013 review resulting from the recent steepening of the yield curve due to the bond market sell-off, improving asset replacement rates. If rates decline further, resulting in a flattening of the yield curve, net interest income remains close to the current rates scenario. However, the acceleration of asset cash flow would quickly outpace limited reductions in funding costs and drive a sustained downward trend in net interest income. In a rising interest rate environment (up 200 bps/12 months), net interest income trends below the current rates scenario as cost increase on the larger short term funding base and non-maturity deposits materialize more quickly than increases to asset yields. As market rates and funding cost increases stabilize, asset cash flows continue to reset higher, driving a sustained upward trend in net interest income. If rates were to increase more aggressively and/or the yield curve were to flatten, near-term net interest income exposure is projected to increase and prolong the recovery period as incremental increases to funding costs outpace the asset cash flow resetting higher. Greater benefit to net interest income is expected once loan repricings begin and funding costs have all cycled through (relative to the Up 200bp scenario).

Periodically, if deemed appropriate, we use interest rate swaps, floors and caps, which are common derivative financial instruments, to hedge our interest rate risk position. The Company's board of directors has approved hedging policy statements governing the use of these instruments. At June 30, 2013, we had a notional principal amount of \$43.0 million in interest rate swap agreements related to the junior subordinated debentures, and \$8.0 million interest rate swaps related to the Company's commercial loan level derivative program. The Board and Management ALCOs monitor derivative activities relative to their expectations and our hedging policies.

ITEM 4. CONTROLS AND PROCEDURES

As required by Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), the Company's management conducted an evaluation with the participation of the Company's Chief Executive Officer and Chief Financial Officer (Principal Financial & Accounting Officer), regarding the effectiveness of the Company's disclosure controls and procedures, as of the end of the last fiscal quarter covered by this report. In designing and evaluating the Company's disclosure controls and procedures, the Company and its management recognize that any controls and procedures, no matter how well designed and operated, can provide only a reasonable assurance of achieving the desired control objectives, and management necessarily was required to apply its judgment in evaluating and implementing possible controls and procedures. Based upon that evaluation, the Chief Executive Officer and Chief Financial Officer (Principal Financial & Accounting Officer) concluded that they believe the Company's disclosure controls and procedures are effective to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms.

There was no change in the internal control over financial reporting that occurred during the period covered by this Quarterly Report on Form 10-Q that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the normal course of business, the Company and its subsidiaries are subject to pending and threatened legal actions. Although the Company is not able to predict the outcome of such actions, after reviewing pending and threatened actions with counsel, management believes that based on the information currently available the outcome of such actions, individually or in the aggregate, will not have a material adverse effect on the Company's consolidated financial position as a whole.

ITEM 1A. RISK FACTORS

There have been no material changes in the Risk Factors described in Item 1A. of the Company's Annual Report on Form 10-K for the year ended December 31, 2012.

ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS

None.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

None.

ITEM 4. MINE SAFETY DISCLOSURES

Not applicable.

ITEM 5. OTHER INFORMATION

None.
