Number 30/07

BHP BILLITON PRODUCTION REPORT
FOR THE

QUARTER ENDED 30 SEPTEMBER 2007

BHP Billiton today released its production report for the quarter ended 30 September 2007. Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share and exclude suspended and sold operations.

This report together with the Exploration and Development Report represent the Interim Management Statement for the purposes of the UK Listing Authority's Disclosure and Transparency Rules. There have been no significant changes in the financial position of the Group in the quarter ended 30 September 2007.

- **Quarterly production record achieved for iron ore, underpinned by strong demand. Western Australia Iron Ore's Rapid Growth Project 2 (Australia) achieved nameplate capacity in the current quarter.**
- **Quarterly production records achieved at the Worsley, Western Australia Iron Ore, Illawarra Coal, Hunter Valley Coal (all Australia), Hillside (South Africa), Samarco (Brazil), and Cerrejon Coal (Colombia) operations.**
- **Quarterly production record achieved for natural gas and natural gas liquids at Bass Strait (Australia) and silver at Escondida (Chile) and Antamina (Peru).**
- **Petroleum production was in line with prior periods reflecting strong facility and reservoir performance offsetting natural field decline.**
- **Major operations were impacted by scheduled maintenance and tie-in activity associated with expansion projects.**

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
PETROLEUM	QTR	SEPT Q06	JUNE Q07
Crude Oil, Condensate and Natural Gas Liquids ('000 bbl) (a)	14,394	-5%	0%
Natural Gas (bcf) (a)	95.68	6%	0%
Total Petroleum Products (million boe) (a)	30.34	0%	0%

Total Petroleum Production -

Total production was in line with the quarters ended June 2007 and September 2006 despite natural field decline.

Crude Oil, Condensate and Natural Gas Liquids -

Production was in line with the quarter ended June 2007. Successful development drilling in the Gulf of Mexico, infill drilling at Bass Strait, and higher total volumes of condensate and natural gas liquids production offset natural field decline and the impact of planned maintenance events.

Production was lower than the September 2006 quarter due to natural field decline. This was partially offset by improved operational uptime, successful development drilling and stronger seasonal gas demand which increased condensate production.

Natural Gas -

Production was higher than the September 2006 quarter due to improved facility uptime and stronger demand for gas in Australia and Pakistan.

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
ALUMINIUM	QTR	SEPT Q06	JUNE Q07
Alumina ('000 tonnes)	1,153	7%	1%
Aluminium ('000 tonnes) (b)	337	0%	1%

Alumina -

Production was in line with the December 2006 quarter's record production assisted by the reclaiming of stored hydrate at Worsley (Australia). Offsetting this was lower production at Alumar (Brazil) due to scheduled maintenance.

Aluminium

- Production was in line with the June 2007 and September 2006 quarters. All operations performed at or near record levels.

	SEPT 2007	SEPT Q07 vs	SEPT Q07 vs
BASE METALS	QTR	SEPT Q06	JUNE Q07
Copper ('000 tonnes) (c)	307.8	23%	-10%
Lead (tonnes)	61,073	25%	-2%
Zinc (tonnes)	37,259	55%	-5%
Silver ('000 ounces) (c)	11,124	51%	-4%
Uranium Oxide Concentrate (Uranium) (tonnes)	933	18%	-6%

Copper -

Production was significantly higher than the September 2006 quarter due to the continuing ramp up of Escondida Sulphide Leach and Spence (Chile). The September 2006 quarter was also impacted by an industrial stoppage at Escondida.

Production was lower than the June 2007 quarter as Spence commenced production from ores with a higher mix of sulphide which have a longer leaching time compared to oxide ore. Additionally, Olympic Dam (Australia) was impacted by unplanned smelter maintenance and lower grades. This was in part offset by increased Cerro Colorado (Chile) production due to higher grade.

Lead -

Performance improved versus the September 2006 quarter following the completion of the Cannington (Australia) rehabilitation project. This was partly offset by lower grade.

Zinc -

Production was higher than the September 2006 quarter due to higher grade and an increased proportion of zinc containing ore being processed at Antamina. The completion of the Cannington rehabilitation project also had a positive impact.

Silver -

Production was higher than the September 2006 quarter due to the successful completion of the Cannington rehabilitation project and record performance from Escondida and Antamina.

Uranium -

Production increased versus the September 2006 quarter due to higher ore hoisted and improved recoveries. The September 2006 quarter was also affected by scheduled maintenance at the Olympic Dam smelter which impacted uranium production.

Production was lower than the June 2007 quarter mainly due to a decline in grade and tonnes milled.

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
DIAMONDS & SPECIALTY PRODUCTS	QTR	SEPT Q06	JUNE Q07
Diamonds ('000 carats)	1,022	110%	12%

Diamonds -

Production increased versus the September and June 2007 quarters due to higher recoveries and grade. As Ekati (Canada) transitions from open pit mining to underground mining the mix of ore processed will change from time to time. Although production increased it included a higher proportion of lower value carats.

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
STAINLESS STEEL MATERIALS	QTR	SEPT Q06	JUNE Q07

Edgar Filing: BHP BILLITON LTD - Form 6-K

Nickel ('000 tonnes)	38.6	-13%	-19%
----------------------	------	------	------

Nickel

- The September 2007 quarter's production was impacted by a scheduled statutory maintenance outage at the Kalgoorlie Nickel Smelter (Australia), the duration of which was 15 days. Planned maintenance activities at Yabulu (Australia) also impacted production, with 14 days production outage in July being the most notable.

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
IRON ORE	QTR	SEPT Q06	JUNE Q07
Iron ore ('000 tonnes) (d)	25,867	7%	0%

Iron Ore -

Record production was achieved reflecting the full ramp up of Western Australia Iron Ore's Rapid Growth Project 2 and record performance from Samarco. As planned, tie-in activity for Western Australia Iron Ore's Rapid Growth Project 3 impacted production in the current quarter, and is expected to continue during the next two quarters.

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
MANGANESE	QTR	SEPT Q06	JUNE Q07
Manganese Ore ('000 tonnes)	1,445	-4%	-5%
Manganese Alloy ('000 tonnes)	184	16%	-1%

Manganese Ore -

Production for the quarter was impacted by maintenance activities at Samancor (South Africa).

Manganese Alloy -

Production was higher than the quarter ended September 2006 due to optimisation of product mix and improved facility availability and utilisation at Samancor.

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
METALLURGICAL COAL	QTR	SEPT Q06	JUNE Q07
Metallurgical Coal ('000 tonnes)	9,572	4%	-14%

Metallurgical Coal -

Production was lower than the record June 2007 quarter due to planned maintenance and the impact of unseasonal wet weather experienced at Queensland Coal (Australia). Illawarra Coal achieved record quarterly production due to reduced impact from longwall change outs during the period.

Third party rail and port constraints continue to impact Queensland Coal's sales. These constraints at third party facilities are expected to continue in the near term.

	SEPT	SEPT Q07	SEPT Q07
	2007	vs	vs
ENERGY COAL	QTR	SEPT Q06	JUNE Q07
Energy Coal ('000 tonnes) (e)	19,623	-4%	-8%

Energy Coal -

Scheduled maintenance at Navajo (USA) and poor geological conditions at the longwall operation at San Juan (USA) impacted production. This was offset by record quarterly production at Hunter Valley Coal and Cerrejon Coal.

Third party infrastructure constraints on the east coast of Australia will continue to impact Hunter Valley Coal's export sales.

Edgar Filing: BHP BILLITON LTD - Form 6-K

(a) Excluding Moranbah Coal Bed Methane (sold September 2006 quarter) and Typhoon / Boris (sold December 2006 quarter).

(b) Excluding Valesul which was sold effective 1 July 2006.

(c) Excluding Tintaya which was sold effective 1 June 2006.

(d) Excluding Goldsworthy operations which were suspended mid calendar year 2006.

(e) Excluding Koornfontein operation which was sold effective 1 July 2007.
