(Mark One)

ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934
For the fiscal year ended December 31, 2018

or

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission file number 000-22117

SILGAN HOLDINGS INC.

(Exact name of Registrant as specified in its charter)

Delaware

06-1269834

(State or other jurisdiction of
incorporation or organization)

(I.R.S. Employer
Identification No.)

4 Landmark Square, Stamford, Connecticut 06901

(Address of principal executive offices) (Zip Code)

Registrant's telephone number, including area code (203) 975-7110

Securities registered pursuant to Section 12(b) of the Act:

Title of each class Name of each exchange on which registered

Common Stock, par value \$0.01 per share Nasdaq Global Select Market

Securities registered pursuant to Section 12(g) of the Act: None

Indicate by check mark if the Registrant is a well-known seasoned issuer, as defined in Rule 405 of the Securities Act. Yes No

Indicate by check mark if the Registrant is not required to file reports pursuant to Section 13 or 15(d) of the Act. Yes No

Indicate by check mark whether the Registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark whether the Registrant has submitted electronically every Interactive Data File required to be submitted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the Registrant was required to submit such files). Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of Registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the Registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, a smaller reporting company, or an emerging growth company. See the definitions of "large accelerated filer," "accelerated filer," "smaller reporting company," and "emerging growth company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer

Non-accelerated filer Smaller reporting company

Emerging growth company

If an emerging growth company, indicate by check mark if the Registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards provided pursuant to Section

13(a) of the Exchange Act.

Indicate by check mark whether the Registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes No

The aggregate market value of the Registrant's Common Stock held by non-affiliates, computed by reference to the price at which the Registrant's Common Stock was last sold as of June 30, 2018, the last business day of the Registrant's most recently completed second fiscal quarter, was approximately \$2.07 billion. Common Stock of the Registrant held by executive officers and directors of the Registrant has been excluded from this computation in that such persons may be deemed to be affiliates. This determination of affiliate status is not a conclusive determination for other purposes.

As of February 1, 2019, the number of shares outstanding of the Registrant's Common Stock, par value \$0.01 per share, was 110,429,596.

Documents Incorporated by Reference:

Portions of the Registrant's Proxy Statement, to be filed with the Securities and Exchange Commission within 120 days after the end of the fiscal year covered by this Annual Report on Form 10-K, for its Annual Meeting of Stockholders to be held in 2019 are incorporated by reference in Part III of this Annual Report on Form 10-K.

PART I

ITEM 1. BUSINESS.

GENERAL

We are a leading manufacturer of rigid packaging for consumer goods products. We had consolidated net sales of approximately \$4.4 billion in 2018. Our products are used for a wide variety of end markets and we operate 100 manufacturing plants in North America, Europe, Asia and South America. Our products include:

- steel and aluminum containers for human and pet food and general line products;

- metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products; and

- custom designed plastic containers for personal care, food, health care, pharmaceutical, household and industrial chemical, pet food and care, agricultural, automotive and marine chemical products.

We are a leading manufacturer of metal containers in North America and Europe, and in North America we are the largest manufacturer of metal food containers with a unit volume market share in the United States in 2018 of slightly more than half of the market. Our leadership in these markets is driven by our high levels of quality, service and technological support, our low cost producer position, our strong long-term customer relationships and our proximity to customers through our widespread geographic presence. We have 44 metal container manufacturing facilities located in the United States, Europe and Asia, serving over 50 countries throughout the world. Additionally, we believe that we have the most comprehensive equipment capabilities in the industry. For 2018, our metal container business had net sales of \$2.38 billion (approximately 53.5 percent of our consolidated net sales) and income from operations of \$198.8 million (approximately 46.1 percent of our consolidated income from operations excluding corporate expense).

We are also a leading worldwide manufacturer of metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products. Our leadership position in closures is a result of our ability to provide customers with high levels of quality, service and technological support. Our closures business provides customers with an extensive variety of proprietary metal and plastic closures and innovative dispensing system solutions that ensure closure quality and safety, as well as state-of-the-art capping/sealing equipment and detection systems to complement our closures product offering. We have 33 closure manufacturing facilities located in North America, Europe, Asia and South America, from which we serve over 70 countries throughout the world. In addition, we license our technology to five other manufacturers for various international markets we do not serve directly. For 2018, our closures business had net sales of \$1.46 billion (approximately 32.7 percent of our consolidated net sales) and income from operations of \$189.9 million (approximately 44.0 percent of our consolidated income from operations excluding corporate expense).

Additionally, we are a leading manufacturer of plastic containers in North America for a variety of markets, including the personal care, food, health care and household and industrial chemical markets. Our success in the plastic packaging market is largely due to our demonstrated ability to provide our customers with high levels of quality, service and technological support, along with our value-added design-focused products and our extensive geographic presence with 23 manufacturing facilities in the United States and Canada. We produce plastic containers from a full range of resin materials and offer a comprehensive array of molding and decorating capabilities. For 2018, our plastic container business had net sales of \$614.1 million (approximately 13.8 percent of our consolidated net sales) and income from operations of \$42.6 million (approximately 9.9 percent of our consolidated income from operations excluding corporate expense).

Our customer base includes some of the world's best-known branded consumer products companies. Our philosophy has been to develop long-term customer relationships by acting in partnership with our customers by providing reliable quality, service and technological support and utilizing our low cost producer position. The strength of our customer relationships is evidenced by our large number of multi-year supply arrangements, our high retention of customers' business and our continued recognition from customers, as demonstrated by the many quality and service awards we have received. We estimate that in 2019 approximately 90 percent of our projected metal container sales and a majority of our projected closures and plastic container sales will be under multi-year customer supply arrangements.

Our objective is to increase shareholder value by efficiently deploying capital and management resources to grow our business, reduce operating costs and build sustainable competitive positions, or franchises, and to complete acquisitions that generate attractive cash returns. We believe that we will accomplish this goal because of

1

our leading market positions and management expertise in acquiring, financing, integrating and efficiently operating consumer goods packaging businesses.

OUR HISTORY

We are a Delaware corporation. We were founded in 1987 by our Non-Executive Co-Chairmen of the Board, R. Philip Silver and D. Greg Horrigan. Since our inception, we have acquired thirty-five businesses. As a result of the benefits of acquisitions and organic growth, we have become a leading manufacturer of metal containers in North America and Europe, with net sales of \$2.38 billion in 2018, and have increased our overall share of the metal food container market in the United States from approximately ten percent in 1987 to slightly more than half of the market in 2018. Through acquisitions, we have become a leading worldwide manufacturer of closures for food, beverage, health care, garden, personal care, home and beauty products, with net sales of \$1.46 billion in 2018, a sevenfold increase since our acquisition of the White Cap closures operations in the United States in 2003. We have also grown our market position in the plastic container business since 1987, with net sales increasing sevenfold to \$614.1 million in 2018. The following chart shows our acquisitions since our inception:

Acquired Business	Year	Products
Nestlé Food Company's metal container manufacturing division	1987	Metal food containers
Monsanto Company's plastic container business	1987	Plastic containers
Fort Madison Can Company of The Dial Corporation	1988	Metal food containers
Seaboard Carton Division of Nestlé Food Company	1988	Paperboard containers
Aim Packaging, Inc.	1989	Plastic containers
Fortune Plastics Inc.	1989	Plastic containers
Express Plastic Containers Limited	1989	Plastic containers
Amoco Container Company	1989	Plastic containers
Del Monte Corporation's U.S. can manufacturing operations	1993	Metal food containers
Food Metal and Specialty business of American National Can Company	1995	Metal food containers and metal closures
Finger Lakes Packaging Company, Inc., a subsidiary of Birds Eye Foods, Inc.	1996	Metal food containers
Alcoa Inc.'s North American aluminum roll-on closures business	1997	Aluminum roll-on closures
Rexam PLC's North American plastic container business	1997	Plastic containers and closures
Winn Packaging Co.	1998	Plastic containers
Campbell Soup Company's steel container manufacturing business	1998	Metal food containers
Clearglass Containers, Inc.	1998	Plastic containers
RXI Holdings, Inc.	2000	Plastic containers and plastic closures, caps, sifters and fitments
Thatcher Tubes LLC	2003	Plastic tubes
Amcor White Cap, LLC	2003	Metal, composite and plastic vacuum closures
Pacific Coast Producers' can manufacturing operations	2003	Metal food containers
Amcor White Cap (Europe, Asia and South America)	2006 - 2008	Metal, composite and plastic vacuum closures
Cousins-Currie Limited	2006	Plastic containers

Acquired Business	Year	Products
Grup Vemsa 1857, S.L.'s metal vacuum closures operations in Spain and China	2008	Metal vacuum closures
IPEC Global, Inc. and its subsidiaries	2010	Plastic closures
Vogel & Noot Holding AG's metal container operations	2011	Metal containers
DGS S.A.'s twist-off metal closures operations	2011	Metal vacuum closures
Nestlé Purina PetCare's metal container manufacturing operations	2011	Metal containers
Öntaş Öner Teneke Ambalaj Sanayi ve Ticaret A.S.	2012	Metal containers and metal vacuum closures
Rexam High Barrier Food Containers, Inc., Rexam PLC's plastic food container operations	2012	Plastic food containers
Amcor Packaging (Australia) Pty Ltd's metal vacuum closures operations in Australia	2013	Metal vacuum closures
Portola Packaging, Inc. and its subsidiaries	2013	Plastic closures
Tecnocap S.p.A.'s and Tecnocap LLC's metal vacuum closures operations in the U.S.	2013	Metal vacuum closures
Van Can Company's metal container manufacturing assets	2014	Metal containers
Injected Plastics Co.'s plastic closures operations	2015	Plastic closures
WestRock Company's specialty closures and dispensing systems business	2017	Specialty closures and dispensing systems

On April 6, 2017, we acquired the specialty closures and dispensing systems operations of WestRock Company, now operating under the name Silgan Dispensing Systems, or SDS. SDS is a leading global supplier of highly engineered triggers, pumps, sprayers and dispensing closure solutions for health care, garden, personal care, home, beauty and food products. SDS represents a strategically important acquisition for us, providing us with an opportunity to expand our closures franchise.

OUR STRATEGY

We intend to enhance our position as a leading manufacturer of consumer goods packaging products by continuing to aggressively pursue a strategy designed to achieve future growth and increase shareholder value by focusing on the following key elements:

SUPPLY “BEST VALUE” PACKAGING PRODUCTS WITH HIGH LEVELS OF QUALITY, SERVICE AND TECHNOLOGICAL SUPPORT

Since our inception, we have been, and intend to continue to be, devoted to consistently supplying our products with the combination of quality, price and service that our customers consider to be “best value.” In our metal container business, we focus on providing high quality and high levels of service and utilizing our low cost producer position. We have made and are continuing to make significant capital investments to offer our customers value-added features such as our family of Quick Top® easy-open ends for our metal food containers, shaped metal food containers and alternative color offerings for metal food containers. In addition, we have made and continue to make investments to enhance the competitive advantages of metal packaging for food, including a new manufacturing facility in the United States completed in 2016 to better optimize the logistical footprint of our metal containers business. Additionally, in 2018 we commercialized a smaller, near-site manufacturing facility in the United States to support growth of certain customers. In our closures business, we emphasize high levels of quality, service and technological support. We believe our closures business is the premier innovative closures and dispensing systems solutions provider to the food, beverage, health care, garden, personal care, home and beauty industries. We offer customers an extensive variety of metal and plastic closures for food and beverage products, as well as proprietary equipment solutions such as cap feeders, cappers and detection systems, to ensure high quality package safety. We also manufacture throughout the world a wide range of highly engineered dispensing systems for health care, garden, personal care, home, beauty and food products. In our plastic container business, we provide high levels of quality and service and focus on value-added, custom designed plastic containers to meet changing product and packaging demands of our customers. We believe that we are one of the few plastic

packaging businesses that can custom design, manufacture and decorate a wide variety of plastic containers, providing the customer with the ability to satisfy more of its plastic packaging needs through one supplier. We will continue to supply customized products that can be delivered quickly to our customers with superior levels of design, development and technological support. We have made strategic investments to enhance the competitive position of our plastic container business, including the construction of two new plastic container manufacturing facilities in the United States that were completed in 2016, one of which is a near-site facility to a major customer and the other of which is to meet the growing needs of our customers and allow us to further reduce costs of our plastic container business. Additionally, in 2018 we commercialized a new thermoformed plastic container manufacturing facility in the United States in support of continued growth.

MAINTAIN LOW COST PRODUCER POSITION

We will continue pursuing opportunities to strengthen our low cost position in our business by:

- maintaining a flat, efficient organizational structure, resulting in low selling, general and administrative expenses as a percentage of consolidated net sales;
- achieving and maintaining economies of scale;
- prudently investing in new technologies to increase manufacturing and production efficiency;
- rationalizing our existing plant structure; and
- serving our customers from our strategically located plants.

Through our metal container facilities, we believe that we provide the most comprehensive manufacturing capabilities in the industry. Through our closures business, we manufacture an extensive variety of metal and plastic closures and highly engineered dispensing systems for the food, beverage, health care, garden, personal care, home and beauty industries throughout the world utilizing state-of-the-art technology and equipment, and we also provide our customers for our closures with state-of-the-art capping/sealing equipment and detection systems. Through our plastic container facilities, we have the capacity to manufacture customized products across the entire spectrum of resin materials, decorating techniques and molding processes required by our customers. We intend to leverage our manufacturing, design and engineering capabilities to continue to create cost-effective manufacturing systems that will drive our improvements in product quality, operating efficiency and customer support.

In 2016, we completed optimization plans in each of our businesses that reduced manufacturing and logistical costs and provided productivity improvements and manufacturing efficiencies, thereby resulting in a lower cost manufacturing network for our businesses and strengthening the competitive position of each of our businesses in their respective markets. In conjunction with these optimization plans, we completed the construction of a new metal food container manufacturing facility and two new plastic container manufacturing facilities in the United States, the relocation of various equipment lines to facilities where we can better serve our customers and the rationalization of several existing manufacturing facilities. The three new manufacturing facilities are strategically located to meet the unique needs of our customers.

In 2018, we commercialized a new metal container manufacturing facility and a new thermoformed plastic container manufacturing facility, in each case to support continued growth in key markets.

MAINTAIN AN OPTIMAL CAPITAL STRUCTURE TO SUPPORT GROWTH AND INCREASE SHAREHOLDER VALUE

Our financial strategy is to use reasonable leverage to support our growth and increase shareholder returns. Our stable and predictable cash flow, generated largely as a result of our long-term customer relationships and generally recession resistant business, supports our financial strategy. We intend to continue using reasonable leverage, supported by our stable cash flows, to make value enhancing acquisitions. In determining reasonable leverage, we evaluate our cost of capital and manage our level of debt to maintain an optimal cost of capital based on current market conditions. If acquisition opportunities are not identified over a longer period of time, we may use our cash flow to repay debt, repurchase shares of our common stock or increase dividends to our stockholders or for other permitted purposes. In 2016, we used cash on hand and revolving loan borrowings under our then existing senior secured credit facility, or our 2014 Credit Facility, to fund repurchases of our common stock for \$277.3 million (which included \$269.4 million of our common stock purchased pursuant to a "modified Dutch auction" tender offer that was completed in November 2016). In February 2017, we issued \$300 million of our 4¾% Senior Notes due 2025, or the 4¾% Notes, and €650 million of our 3¼% Senior Notes due 2025, or the 3¼% Notes. We used the net

proceeds from the 4¾% Notes to prepay a portion of our outstanding U.S. dollar term loans and repay a portion of our outstanding revolving loans under our 2014 Credit Facility. We used the net proceeds

4

from the 3¼% Notes to prepay all outstanding Euro term loans and repay all remaining outstanding revolving loans under our 2014 Credit Facility, to repay certain foreign bank revolving and term loans of certain of our non-U.S. subsidiaries and to redeem \$220 million of our outstanding 5% Senior Notes due 2020, or the 5% Notes. In March 2017, we completed an amendment and restatement of our 2014 Credit Facility and entered into an amended and restated senior secured credit facility, which extended the maturity dates of our senior secured credit facility, provides additional borrowing capacity for us and provides us with greater flexibility with regard to our strategic initiatives. In May 2018, we entered into an amendment to our amended and restated senior secured credit facility, as so amended, our Credit Agreement, which further extended maturity dates, lowered the margin on borrowings thereunder and provides additional flexibility with regard to strategic initiatives. Our Credit Agreement provides us with revolving loans, consisting of a multicurrency revolving loan facility of approximately \$1.19 billion and a Canadian revolving loan facility of Cdn \$15.0 million. Additionally, our Credit Agreement provided us with term loans, consisting of (i) U.S. \$800 million of term loans designated U.S. A term loans and (ii) Cdn \$45.5 million of term loans designated Canadian A term loans. In April 2017, we funded the purchase price for SDS with the \$800 million of U.S. A term loans and revolving loan borrowings under our Credit Agreement. In April 2018, we redeemed all of our remaining outstanding 5% Notes (\$280.0 million aggregate principal amount) with revolving loan borrowings under our Credit Agreement and cash on hand. You should also read Notes 3 and 9 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report.

EXPAND THROUGH ACQUISITIONS AND INTERNAL GROWTH

We intend to continue to increase our market share in our current business lines and related business lines through acquisitions and internal growth. We use a disciplined approach to make acquisitions and investments that generate attractive cash returns. As a result, we expect to continue to expand and diversify our customer base, geographic presence and product lines. This strategy has enabled us to increase our net sales and income from operations over the last ten years.

We are a leading manufacturer of metal containers in North America and Europe, primarily as a result of our acquisitions but also as a result of growth with existing customers. During the past 30 years, the metal food container market in North America has experienced significant consolidation primarily due to the desire by food processors to reduce costs and focus resources on their core operations rather than self-manufacture their metal food containers. Our acquisitions of the metal food container manufacturing operations of Nestlé Food Company, or Nestlé, The Dial Corporation, or Dial, Del Monte Corporation, or Del Monte, Birds Eye Foods, Inc., or Birds Eye, Campbell Soup Company, or Campbell, Pacific Coast Producers, or Pacific Coast, and Nestlé Purina PetCare's steel container self-manufacturing assets, or Purina Steel Can, reflect this trend. We estimate that approximately seven percent of the market for metal food containers in the United States is still served by self-manufacturers.

While we have expanded our metal container business and increased our market share of metal containers primarily through acquisitions and growth with existing customers, we have also made over the last several years, and are continuing to make, significant capital investments in our metal container business to enhance our business and offer our customers value-added features, such as our family of Quick Top® easy-open ends for metal food containers, shaped metal food containers and alternative color offerings for metal food containers. In 2018, approximately 70 percent of our metal food containers sold had an easy-open end. In addition, we have made and continue to make investments to enhance the competitive advantages of metal packaging for food. In 2016, we completed the construction of a new metal food container manufacturing facility in Burlington, Iowa to better optimize the logistical footprint of our metal container operations in North America, allowing us to further reduce costs of our metal container business. Additionally, in 2018 we commercialized a smaller, near-site manufacturing facility in Breinigsville, Pennsylvania to support growth of certain customers.

With our acquisitions of our closures operations in North America, Europe, Asia and South America, we established ourselves as a leading worldwide manufacturer of metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products. In 2017, we broadened our closures portfolio to include dispensing systems with our acquisition of SDS. Since 2003, following our acquisition of the White Cap closures operations in the United States, net sales of our closures business have increased sevenfold to \$1.46 billion in 2018 as a result of acquisitions and internal growth. We may pursue further consolidation opportunities in the closures markets in which we operate, including in dispensing systems, or in adjacent closures markets. Additionally, we

expect to continue to generate internal growth in our closures business, particularly in plastic closures and dispensing systems. In making investments to pursue internal growth, we use a disciplined approach to generate attractive cash returns.

5

We have grown our market position for our plastic container business since 1987, with net sales increasing sevenfold to \$614.1 million in 2018. We achieved this improvement primarily through strategic acquisitions as well as through internal growth. In 2016, we completed construction of two new plastic container manufacturing facilities, including a near-site facility to a major customer and another facility to meet the growing needs of our customers and allow us to further reduce costs of our plastic container business. These new facilities are located in North East, Pennsylvania and Hazelwood, Missouri. Additionally, in 2018 we commercialized a new thermoformed plastic container manufacturing facility in Fort Smith, Arkansas in support of continued growth. The plastic containers segment of the consumer goods packaging industry continues to be highly fragmented, and we intend to pursue further consolidation opportunities in this market. We also expect to continue to generate internal growth in our plastic container business. As with acquisitions, we use a disciplined approach to pursue internal growth to generate attractive cash returns. Through a combination of these efforts, we intend to continue to expand our customer base in the markets that we serve, such as the personal care, food, health care, pharmaceutical, household and industrial chemical, pet food and care, agricultural, automotive and marine chemical markets.

ENHANCE PROFITABILITY THROUGH PRODUCTIVITY IMPROVEMENTS AND COST REDUCTIONS

We intend to continue to enhance profitability through investment of capital for productivity improvements, manufacturing efficiencies, manufacturing cost reductions, and the optimization of our manufacturing facilities footprints. The additional sales and production capacity provided through acquisitions and investments have enabled us to rationalize plant operations and decrease overhead costs through plant closings and downsizings. From 2014, we have closed four metal container manufacturing facilities, one closure manufacturing facility and four plastic container manufacturing facilities in connection with our continuing efforts to streamline our plant operations, reduce operating costs and better match supply with geographic demand.

We expect that most future acquisitions will continue to enable us to realize manufacturing efficiencies as a result of optimizing production scheduling and other benefits from economies of scale and the elimination of redundant selling and administrative functions. In addition to the benefits realized through the integration of acquired businesses, we have improved and expect to continue to improve the operating performance of our plant facilities by investing capital for productivity improvements, manufacturing efficiencies and manufacturing cost reductions. While we have made some of these investments in certain of our plants, more opportunities still exist throughout our system. We will continue to use a disciplined approach to identify these opportunities to generate attractive cash returns.

In 2016, we completed optimization plans in each of our businesses that reduced manufacturing and logistical costs and provided productivity improvements and manufacturing efficiencies, thereby resulting in a lower cost manufacturing network for our businesses and strengthening the competitive position of each of our businesses in their respective markets. In conjunction with these optimization plans, we completed the construction of a new metal food container manufacturing facility and two new plastic container manufacturing facilities, the relocation of various equipment lines to facilities where we can better serve our customers and the rationalization of several existing manufacturing facilities. The three new manufacturing facilities are strategically located to meet the unique needs of our customers.

In 2018, we commercialized a new metal container manufacturing facility and a new thermoformed plastic container manufacturing facility, in each case to support continued growth in key markets.

BUSINESS SEGMENTS

We are a holding company that conducts our business through various operating subsidiaries. We operate three businesses, our metal container business, our closures business and our plastic container business.

METAL CONTAINERS—53.5 PERCENT OF OUR CONSOLIDATED NET SALES IN 2018

We are a leading manufacturer of metal containers in North America and Europe, and in North America we are the largest manufacturer of metal food containers with a unit volume market share in the United States in 2018 of slightly more than half of the market. Our metal container business is engaged in the manufacture and sale of steel and aluminum containers that are used primarily by processors and packagers for food products, such as pet food, vegetables, soup, proteins (e.g., meat, chicken and seafood), tomato based products, adult nutritional drinks, fruit and other miscellaneous food products, as well as general line metal containers primarily for chemicals. We have 44 metal container manufacturing facilities located in the United States, Europe and Asia, serving over 50 countries throughout the world. For 2018, our metal container business had net sales of \$2.38 billion (approximately 53.5 percent of our

consolidated net sales) and income from operations of \$198.8 million (approximately 46.1 percent of

6

our consolidated income from operations excluding corporate expense). We estimate that approximately 90 percent of our projected metal container sales in 2019 will be pursuant to multi-year customer supply arrangements.

Although metal containers face competition from plastic, paper, glass and composite containers, we believe metal containers are superior to plastic, paper and composite containers in applications where the contents are prepared at high temperatures, or packaged in larger consumer or institutional quantities, or where the long-term storage of the product is desirable while maintaining the product's quality. We also believe that metal containers are generally more desirable than glass containers because metal containers are more durable and less costly to transport. In addition, metal containers are one of the most recycled packages in the world and are infinitely recyclable. While the market for metal food containers in the United States has experienced little or no growth over the last ten years, we have increased our market share of metal food containers in the United States primarily through acquisitions and growth with existing customers, and have enhanced our business by focusing on providing customers with high quality, high levels of service and value-added features such as our family of Quick Top® easy-open ends, shaped metal food containers and alternative color offerings for metal food containers. In addition, we have made and continue to make investments to enhance the competitive advantages of metal packaging for food. In 2016, we completed the construction of a new metal food container manufacturing facility in the United States to better optimize the logistical footprint of our metal container business in North America, allowing us to further reduce costs of our metal container business. Additionally, in 2018 we commercialized a smaller, near-site manufacturing facility in the United States to support growth of certain customers.

CLOSURES—32.7 PERCENT OF OUR CONSOLIDATED NET SALES IN 2018

We are a leading worldwide manufacturer of metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products. Our closures business provides customers with an extensive variety of proprietary metal and plastic closures and innovative dispensing system solutions that ensure closure quality and safety, as well as state-of-the-art capping/sealing equipment and detection systems to complement our closures product offering. We have 33 closure manufacturing facilities located in North America, Europe, Asia and South America, from which we serve over 70 countries throughout the world. In addition, we license our technology to five other manufacturers for various markets we do not serve directly. For 2018, our closures business had net sales of \$1.46 billion (approximately 32.7 percent of our consolidated net sales) and income from operations of \$189.9 million (approximately 44.0 percent of our consolidated income from operations excluding corporate expense). Since 2003, following our acquisition of the White Cap closures operations in the United States, we have grown our closures business through acquisitions and internal growth, with net sales increasing sevenfold.

We manufacture metal and plastic closures for food and beverage products, such as ready-to-drink teas, sports drinks, dairy products, tomato sauce, salsa, pickles, baby food, juice drinks, ketchup, preserves, soup, cooking sauces, gravies, fruits, vegetables and infant formula products. With our acquisition in 2017 of SDS, we broadened our closures portfolio to manufacture dispensing systems for health care, garden, personal care, home, beauty and food products, such as health care nasal spray and topical applications, lawn and garden products, hard surface cleaning products, professional cleaning products, air and fabric care products, perfume and fragrance products, skin care products, lotions, cosmetics, soaps, hair care products and other bath and body products and condiments. We provide customers of our closures business with custom formulations of sealing/lining materials, designed either to minimize removal torques and enhance openability of our closures or to maintain sealability of our closures, in each case to meet the unique needs of our customers while also meeting applicable regulatory requirements. We offer our customers an extensive range of decorating options for our closures for product differentiation. We also provide customers with sealing/capping equipment and detection systems to complement our closures product offering. As a result of our extensive range of closures, our geographic presence and our focus on providing high levels of quality, service and technological support, we believe that we are uniquely positioned to serve food, beverage, health care, garden, personal care, home and beauty product companies for their closure needs.

PLASTIC CONTAINERS—13.8 PERCENT OF OUR CONSOLIDATED NET SALES IN 2018

We produce plastic containers from a full range of resin materials and offer a comprehensive array of molding and decorating capabilities. We are one of the leading manufacturers of custom designed high density polyethylene, or HDPE, and polyethylene terephthalate, or PET, containers in North America for the markets that we serve. We are also a leading manufacturer in North America of plastic thermoformed barrier and non-barrier bowls and trays for

shelf-stable food products. We operate 23 plastic container manufacturing facilities in the United States and Canada. For 2018, our plastic container business had net sales of \$614.1 million (approximately 13.8

7

percent of our consolidated net sales) and income from operations of \$42.6 million (approximately 9.9 percent of our consolidated income from operations excluding corporate expense). Since 1987, we have improved our market position for our plastic container business, with net sales increasing sevenfold.

We manufacture custom designed and stock plastic containers for personal care and health care products, including containers for mouthwash, shampoos, conditioners, hand creams, lotions, liquid soap, respiratory and gastrointestinal products, cosmetics and toiletries; food and beverage products, including peanut butter, salad dressings, condiments, dairy products and liquor; household and industrial chemical products, including containers for lawn, garden and agricultural products, scouring cleaners and cleaning agents; and pharmaceutical products, including containers for tablets and antacids. In addition, we manufacture plastic thermoformed barrier and non-barrier bowls and trays for food products, such as soups and other ready-to-eat meals and pet food, as well as thermoformed plastic tubs for food, household and personal care products, including soft fabric wipes. We also manufacture plastic closures, caps, sifters and fitments for food and household products, including salad dressings, condiments, peanut butter, spices, liquid margarine, powdered drink mixes and arts and crafts supplies.

Our leading position in the plastic container market is largely driven by our rapid response to our customers' design, development and technology support needs and our value-added, diverse product line. This product line is the result of our ability to produce plastic containers from a full range of resin materials using a broad array of manufacturing, molding and decorating capabilities. We also strive to remain current with and, to some extent, anticipate innovations in resin composition and applications and changes in the technology for the manufacturing of plastic containers. We benefit from our large scale and nationwide presence, as significant consolidation is occurring in many of our customers' markets. Through these capabilities, we are well-positioned to serve our customers, who demand customized solutions as they continue to seek innovative means to differentiate their products in the marketplace using packaging. In 2016, we completed the construction of two new plastic container manufacturing facilities in the United States, including a near-site facility to a major customer and another facility to meet the growing needs of our customers and allow us to further reduce costs of our plastic container business. Additionally, in 2018 we commercialized a new thermoformed plastic container manufacturing facility in the United States in support of continued growth.

MANUFACTURING AND PRODUCTION

As is the practice in the industry, most of our customers provide us with periodic estimates of products and quantities pursuant to which commitments are given. These estimates enable us to effectively manage production and control working capital requirements. We schedule our production to meet customers' requirements. Because the production time for our products is short, the backlog of customer orders in relation to our sales is not material.

As of February 1, 2019, we operated a total of 100 manufacturing facilities in 19 different countries throughout the world that serve the needs of our customers.

METAL CONTAINER BUSINESS

The manufacturing operations of our metal container business include cutting, coating, lithographing, fabricating, assembling and packaging finished cans. We use three basic processes to produce cans. The traditional three-piece method requires three pieces of flat metal to form a cylindrical body with a welded side seam, a bottom and a top. High integrity of the side seam is assured by the use of sophisticated electronic weld monitors and coatings that are thermally cured by induction and convection processes. The other two methods of producing cans start by forming a shallow cup that is then formed into the desired height using either the draw and iron process or the draw and redraw process. Using the draw and redraw process, we manufacture steel and aluminum two-piece cans, the height of which generally does not exceed the diameter. For cans the height of which is greater than the diameter, we manufacture steel two-piece cans by using a drawing and ironing process. We manufacture can bodies and ends from thin, high-strength aluminum alloys and steels by utilizing proprietary tool and die designs and selected can making equipment. We also manufacture our Quick Top® easy-open ends from both steel and aluminum alloys in a sophisticated precision progressive die process. We regularly review our Quick Top® easy-open end designs for improvements for optimum consumer preference through consumer studies and feedback.

CLOSURES BUSINESS

The manufacturing operations for metal closures include cutting, coating, lithographing, fabricating and lining. We manufacture twist-off, lug style and press-on, twist-off steel closures and aluminum roll-on closures for glass, metal

and plastic containers, ranging in size from 18 to 110 millimeters in diameter. We employ state-of-the-art

8

multi-die presses to manufacture metal closures, offering a low-cost, high quality means of production. We also provide customers of our closures business with custom formulations of sealing/lining materials, designed to minimize torque removal and enhance the openability of our closures while meeting applicable regulatory requirements. We utilize two basic processes to produce plastic closures and dispensing systems. In the compression molded process, pellets of plastic resin are heated, extruded and then compressed to form a plastic closure shell. The plastic closure shell can include a molded linerless seal or a custom formulated, compression molded sealing system. The plastic closure shell can then be slit and printed depending on its end use. In the injection molded process, pellets of plastic resin are heated and injected into a mold, forming either a plastic closure shell or other dispensing systems component, such as a trigger, decorative shroud, actuator, valve or overcap. The plastic closure shell can include a molded linerless seal or a custom formulated sealing system. The plastic closure shell can then be slit and printed depending on its end use. In the case of a dispensing system, the dispensing system components are assembled into the dispensing system and can be printed depending on the end use of the dispensing system.

PLASTIC CONTAINER BUSINESS

We utilize two basic processes to produce plastic containers. In the extrusion blowmolding process, pellets of plastic resin are heated and extruded into a tube of plastic. A two-piece metal mold is then closed around the plastic tube and high pressure air is blown into it causing a bottle to form in the mold's shape. In the injection and injection stretch blowmolding processes, pellets of plastic resin are heated and injected into a mold, forming a plastic preform. The plastic preform is then blown into a bottle-shaped metal mold, creating a plastic bottle.

Our plastic thermoformed bowls, trays and tubs are manufactured by melting pellets of plastic resin into an extruded plastic sheet. The plastic sheet is then formed in a mold to make the plastic bowl, tray or tub.

We have state-of-the-art decorating equipment, including several of the largest sophisticated decorating facilities in the United States. Our decorating methods for plastic containers are in-mold labeling, which applies a plastic film label to the bottle during the blowing process, and post-mold decoration. Post-mold decoration includes:

- silk screen decoration which enables the applications of images in multiple colors to the bottle;
- pressure sensitive decoration which uses a plastic film or paper label with an adhesive;
- heat transfer decoration which uses a plastic coated label applied by heat; and
- shrink sleeve labeling.

RAW MATERIALS

Based upon our existing arrangements with suppliers and our current and anticipated requirements, we believe that we have made adequate provisions for acquiring our raw materials for the foreseeable future. As a result of significant consolidation of suppliers, we are, however, dependent upon a limited number of suppliers for our steel, aluminum, coatings and compound raw materials. Increases in the prices of raw materials have generally been passed along to our customers in accordance with our multi-year customer supply arrangements and through general price increases.

METAL CONTAINER BUSINESS

We use tinplated and chromium plated steel, aluminum, copper wire, organic coatings, lining compound and inks in the manufacture and decoration of our metal container products. Our material requirements are supplied through agreements and purchase orders with suppliers with whom we have long-term relationships. If our suppliers fail to deliver under their arrangements, we would be forced to purchase raw materials on the open market, and no assurances can be given that we would be able to purchase such raw materials or, if we are so able, that we would be able to purchase such raw materials at comparable prices or terms. Although there has been significant consolidation of suppliers, we believe that we have made adequate provisions to purchase sufficient quantities of these raw materials to meet our customers' requirements for the foreseeable future.

Our metal container supply agreements with our customers provide for the pass through of changes in our metal costs. For our metal container customers without long-term agreements, we have also generally increased prices to pass through increases in our metal costs.

CLOSURES BUSINESS

We use tinned and chromium plated steel, aluminum, organic coatings, low-metallic inks and pulpboard, plastic and organic lining materials in the manufacture of metal closures. We use resins in pellet form, such as homopolymer polypropylene, copolymer polypropylene and HDPE, thermoplastic elastomer lining materials, processing additives and colorants in the manufacture of plastic closures and dispensing systems. Although no assurances can be given, we believe we have made adequate provisions to purchase sufficient quantities of these raw materials to meet our customers' requirements for the foreseeable future, despite the significant consolidation of suppliers.

Our closures supply agreements with our customers generally provide for the pass through of changes in our metal and resin costs, subject in many cases with respect to resin to a lag in the timing of such pass through. For our closures customers without long-term agreements, our closures business has also generally passed through changes in our metal and resin costs.

PLASTIC CONTAINER BUSINESS

The raw materials we use in our plastic container business are primarily resins in pellet form such as virgin HDPE, virgin PET, recycled HDPE, recycled PET, polypropylene and, to a lesser extent, polystyrene, low density polyethylene, polyethylene terephthalate glycol, polyvinyl chloride, polycarbonate and medium density polyethylene. Our resin requirements are acquired through multi-year arrangements for specific quantities of resins with several major suppliers of resins. The price that we pay for resin raw materials is not fixed and is subject to market pricing, which has fluctuated significantly in the past few years. Our plastic container supply agreements with our customers provide for the pass through of changes in our resin costs, subject in many cases to a lag in the timing of such pass through. For our plastic container customers without long-term agreements, our plastic container business has also generally passed through changes in our resin costs.

We believe that we have made adequate provisions to purchase sufficient quantities of resins to meet our customers' requirements for the foreseeable future, absent unforeseen events such as significant hurricanes.

SALES AND MARKETING

Our philosophy has been to develop long-term customer relationships by acting in partnership with our customers, providing reliable quality and service. We market our products primarily by a direct sales force, including manufacturer's representatives, and for our plastic container business, in part, through a network of distributors.

Because of the high cost of transporting empty containers, our metal container business generally sells to customers within a 300 mile radius of its manufacturing plants.

Approximately 11 percent, 11 percent and 13 percent of our consolidated net sales were to Nestlé in 2018, 2017 and 2016, respectively. No other customer accounted for more than 10 percent of our total consolidated net sales during those years.

You should also read "Risk Factors—We face competition from many companies and we may lose sales or experience lower margins on sales as a result of such competition" included elsewhere in this Annual Report.

METAL CONTAINER BUSINESS

We are a leading manufacturer of metal containers in North America and Europe, and in North America we are the largest manufacturer of metal food containers with a unit volume market share in the United States in 2018 of slightly more than half of the market. We have 44 metal container manufacturing facilities located in the United States, Europe and Asia, serving over 50 countries throughout the world. Our largest customers for these products include Bonduelle Group, Campbell, Conagra Brands, Inc., Crider Foods, Inc., Del Monte, General Mills, Inc., Hill's Pet Nutrition, Inc., Hormel Foods Corporation, The Kraft Heinz Company, Mars, Incorporated, Nestlé, Pacific Coast, Stanislaus Food Products Company and Teasdale Quality Foods, Inc.

We have entered into multi-year supply arrangements with most of our customers for our metal container business. We estimate that approximately 90 percent of our projected metal container sales in 2019 will be pursuant to multi-year customer supply arrangements. Historically, we have been successful in continuing these multi-year customer supply arrangements. In Europe, our metal container business has had long-term relationships with many of its customers, although, as is common practice, many supply arrangements are negotiated on a year-by-year basis.

Since our inception in 1987, we have supplied Nestlé with substantially all of its U.S. metal food container requirements. Our net sales of metal food containers to Nestlé in 2018 were \$462.2 million. We also supply Nestlé with closures in North America and Europe and plastic containers in North America. In 2018, we entered into long-term supply agreements with Nestlé that run through 2025 for the supply of all of Nestlé's North American metal food container requirements for pet food and other food products and to support growth initiatives of Nestlé. These long-term supply agreements replaced previous supply agreements with Nestlé. Each of these long-term supply agreements provide for certain prices and specify that those prices will be increased or decreased based upon price change formulas.

Our metal container business' sales and income from operations are dependent, in part, upon the vegetable and fruit harvests in the midwest and western regions of the United States and, to a lesser extent, in a variety of national growing regions in Europe. The size and quality of these harvests varies from year to year, depending in large part upon the weather conditions in those regions. Because of the seasonality of the harvests, we have historically experienced higher unit sales volume in the third quarter of our fiscal year and generated a disproportionate amount of our annual income from operations during that quarter. You should also read "Risk Factors—The seasonality of the fruit and vegetable packing industry causes us to incur short-term debt" included elsewhere in this Annual Report.

CLOSURES BUSINESS

We are a leading worldwide manufacturer of metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products. We have 33 closure manufacturing facilities located in North America, Europe, Asia and South America, from which we serve over 70 countries throughout the world. Our largest customers of our closures business include Campbell, The Coca-Cola Company, Colgate-Palmolive Company, Dean Foods Company, Hipp GmbH & Co Vertrieb KG, The Kraft Heinz Company, Johnson & Johnson, Molson Coors Brewing Company, Mizkan Holdings Co., Ltd., Nestlé, PepsiCo Inc., The Procter & Gamble Company, Puig S.L., S. C. Johnson & Son, Inc., The Scotts Company LLC, Spectrum Brands Holdings, Inc. and its affiliated entities, including United Industries Corporation, and Unilever, N.V. We have multi-year supply arrangements with many of our customers in the United States. Outside of the United States, the closures business has had long-term relationships with most of its customers. While we have multi-year supply arrangements with some of our closures customers outside of the United States, as is common practice, many supply arrangements with customers outside of the United States are negotiated on a year-by-year basis.

In addition, we license our technology to five other manufacturers who supply products in India, Israel, South Korea, Malaysia, Maldives, South Africa, Sri Lanka, Taiwan and Thailand.

PLASTIC CONTAINER BUSINESS

We are one of the leading manufacturers of custom designed and stock plastic containers sold in North America for a variety of markets, including the personal care, food, health care and household and industrial chemical markets. We are also a leading manufacturer in North America of plastic thermoformed barrier and non-barrier bowls and trays for shelf-stable food products and pet food products. We market our plastic containers in most areas of North America through a direct sales force and a large network of distributors. We also market certain stock plastic containers through an on-line shopping catalog.

Our largest customers for our plastic container business include Bayer AG, Berlin Packaging LLC, Campbell, General Mills, Inc., Henkel AG & Co. KGaA, Johnson & Johnson, The Kraft Heinz Company, Mars, Incorporated, McCormick & Company, Inc., Perrigo Company plc, The Procter & Gamble Company, The Scotts Company LLC, TreeHouse Foods Inc., TricorBraun, Inc. and Vi-Jon Laboratories, Inc.

We have arrangements to sell some of our plastic containers to distributors, who in turn resell those products primarily to regional customers. Plastic containers sold to distributors are generally manufactured by using generic and custom molds with decoration added to meet the end users' requirements. The distributors' warehouses and their sales personnel enable us to market and inventory a wide range of such products to a variety of customers.

We have multi-year supply arrangements with the majority of our customers for our plastic container business. In addition, many of our supply arrangements with our customers are for custom plastic containers made from proprietary molds.

COMPETITION

The packaging industry is highly competitive. We compete in this industry with manufacturers of similar and other types of packaging, as well as fillers, food processors and packers who manufacture containers for their own use and for sale to others. We attempt to compete effectively through the quality of our products, competitive pricing and our ability to meet customer requirements for delivery, performance and technical assistance.

METAL CONTAINER BUSINESS

Of the commercial metal container manufacturers, Ardagh Group, Ball Metalpack, LLC and Crown Holdings, Inc. are our most significant competitors. Our competitors also include other regional suppliers. As an alternative to purchasing containers from commercial can manufacturers, customers have the ability to invest in equipment to self-manufacture their containers.

Because of the high cost of transporting empty containers, our metal container business generally sells to customers within a 300 mile radius of its manufacturing plants. Strategically located existing plants give us an advantage over competitors from other areas, but we could be potentially disadvantaged by the relocation of a major customer. Although metal containers face competition from plastic, paper, glass and composite containers, we believe that metal containers are superior to plastic, composite and paper containers in applications, where the contents are prepared at high temperatures or packaged in larger consumer or institutional quantities or where long-term storage of the product is desirable while maintaining the product's quality. We also believe that metal containers are more desirable generally than glass containers because metal containers are more durable and less costly to transport. In addition, metal containers are one of the most recycled packages in the world and are infinitely recyclable.

CLOSURES BUSINESS

Our closures business competes primarily with Albéa Beauty Holdings S.A., AptarGroup, Inc., Bericap Holding GmbH, Berry Global Group, Inc., Closures Systems International, Inc. (part of Rank Group Limited), Crown Holdings, Inc., Global Closure Systems, Groupe Massilly, Guala Dispensing Mexico, S.A. de C.V. and Tecnocap S.p.A. With our ability to manufacture an extensive range of metal and plastic closures and dispensing systems that ensure closure quality and safety, as well as state-of-the-art capping/sealing equipment and detection systems to complement our closures product offering, and our geographic presence, we believe we are uniquely positioned to serve food, beverage, health care, garden, personal care, home and beauty product companies for their closure needs.

PLASTIC CONTAINER BUSINESS

Our plastic container business competes with a number of large national producers of plastic containers for personal care, food, health care, pharmaceutical, household and industrial chemical, pet food and care, agricultural, automotive and marine chemical products. These competitors include Alpha Packaging, Inc., Alpha-Werke Alwin Lehner GmbH & Co. KG, Amcor Limited, Berry Global Group, Inc., Cebal Americas, Consolidated Container Company LLC, Graham Packaging Company (part of Rank Group Limited) and Plastipak Holdings, Inc. In addition to our rapid response to our customers' design, development and technology support needs and our value-added, diverse product line, we strive to remain current with and, to some extent, anticipate innovations in resin composition and applications and changes in the technology for the manufacturing of plastic containers and closures.

EMPLOYEES

As of December 31, 2018, we employed approximately 3,200 salaried and 9,900 hourly employees on a full-time basis. Approximately 37 percent of our hourly plant employees in the United States and Canada as of that date were represented by a variety of unions, and most of our hourly employees in Europe, Asia, South America and Central America were represented by a variety of unions or other labor organizations. In addition, as of December 31, 2018, Campbell provided us with approximately 120 hourly employees on a full-time basis at one of the facilities that we lease from Campbell.

Our labor contracts expire at various times between 2019 and 2022. As of December 31, 2018, contracts covering approximately 12 percent of our hourly employees in the United States and Canada will expire during 2019. We expect no significant changes in our relations with these unions.

ENVIRONMENTAL AND OTHER REGULATIONS

We are subject to federal, foreign, state and local environmental laws and regulations. In general, these laws and regulations limit the discharge of pollutants into the environment and establish standards for the treatment, storage, and disposal of solid and hazardous waste. We believe that we are either in compliance in all material respects with all presently applicable environmental laws and regulations or are operating in accordance with appropriate variances, schedules under compliance orders or similar arrangements.

In addition to costs associated with regulatory compliance, we may be held liable for alleged environmental damage associated with the past disposal of hazardous substances. Those that generate hazardous substances that are disposed of at sites at which environmental problems are alleged to exist, as well as the owners of those sites and other classes of persons, are subject to claims for clean up and natural resource damages under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, or CERCLA, regardless of fault or the legality of the original disposal. CERCLA and many similar state and foreign statutes may hold a responsible party liable for the entire cleanup cost at a particular site even though that party may not have caused the entire problem. Other state statutes may impose proportionate rather than joint and several liability. The federal Environmental Protection Agency or a state or foreign agency may also issue orders requiring responsible parties to undertake removal or remedial actions at sites.

We are also subject to the Occupational Safety and Health Act and other federal, foreign, state and local laws regulating noise exposure levels and other safety and health concerns in the production areas of our plants. While management does not believe that any of the regulatory matters described above, individually or in the aggregate, will have a material effect on our capital expenditures, earnings, financial position or competitive position, we cannot assure you that a material environmental or other regulatory claim will not arise in the future.

RESEARCH AND PRODUCT DEVELOPMENT

Our research, product development and product engineering efforts relating to our metal container business are conducted at our research facilities in Oconomowoc, Wisconsin. Our research, product development and product engineering efforts relating to our closures business are conducted at our research facilities in Downers Grove, Illinois, Grandview, Missouri, Hannover, Germany and Waalwijk, Netherlands. Our research, product development and product engineering efforts with respect to our plastic container business are performed by our manufacturing and engineering personnel located at our plastic container manufacturing facilities. In addition to research, product development and product engineering, these sites also provide technical support to our customers. The amounts we have spent on research and development during the last three fiscal years are not material.

We rely on a combination of patents, trade secrets, unpatented know-how, technological innovation, trademarks and other intellectual property rights, nondisclosure agreements and other protective measures to protect our intellectual property. We do not believe that any individual item of our intellectual property portfolio is material to our business. We employ various methods, including confidentiality agreements and nondisclosure agreements, with third parties, employees and consultants to protect our trade secrets and know-how. However, others could obtain knowledge of our trade secrets and know-how through independent development or other means.

AVAILABLE INFORMATION

We file annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K, proxy statements and other information with the Securities and Exchange Commission, or the SEC. The SEC maintains a website that contains annual, quarterly and current reports, proxy statements and other information that issuers (including the Company) file electronically with the SEC. The Internet address of the SEC's website is <http://www.sec.gov>.

We maintain a website, the Internet address of which is <http://www.silganholdings.com>. Information contained on our website is not part of this Annual Report. We make available free of charge on or through our website our annual reports on Form 10-K, quarterly reports on Form 10-Q and current reports on Form 8-K (and any amendments to those reports) and Forms 3, 4 and 5 filed on behalf of our directors and executive officers as soon as reasonably practicable after such documents are electronically filed with, or furnished to, the SEC.

ITEM 1A. RISK FACTORS.

The following are certain risk factors that could materially and adversely affect our business, financial condition or results of operations. Additional risks and uncertainties not currently known to us or that we currently view as immaterial may also materially and adversely affect our business, financial condition or results of operations.

OUR INDEBTEDNESS COULD ADVERSELY AFFECT OUR CASH FLOW.

At December 31, 2018, we had \$2,317.7 million of total consolidated indebtedness. We incurred much of this indebtedness as a result of financing acquisitions and refinancing our previously outstanding debt. In addition, at December 31, 2018, after taking into account outstanding letters of credit of \$18.2 million, we had up to \$1.17 billion and Cdn \$15.0 million of revolving loans that we may borrow under our Credit Agreement. We also have available to us under our Credit Agreement an uncommitted multicurrency incremental loan facility in an amount of up to an additional \$1.25 billion (which amount may be increased as provided under our Credit Agreement), and we may incur additional indebtedness as permitted by our Credit Agreement and our other instruments governing our indebtedness. A significant portion of our cash flow must be used to service our indebtedness and is therefore not available to be used in our business. In 2018, we repaid \$3.0 million in mandatory principal and paid \$118.4 million in interest on our indebtedness. Starting in December 2019, we will be required to begin principal installment repayments for the term loans under our Credit Agreement, starting at 5 percent of the outstanding principal amount in December 2019 and increasing to 10 percent of the outstanding principal amount annually thereafter, with a final repayment of the remaining principal amount due on the maturity date of such term loans. Our ability to generate cash flow is subject to general economic, financial, competitive, legislative, regulatory and other factors that may be beyond our control. In addition, a significant portion of our indebtedness bears interest at floating rates, and therefore a substantial increase in interest rates could adversely impact our results of operations. Based on the average outstanding amount of our variable rate indebtedness in 2018, a one percentage point change in the interest rates for our variable rate indebtedness would have impacted our 2018 interest expense by an aggregate amount of approximately \$14.3 million. Our indebtedness could have important consequences. For example, it could:

- increase our vulnerability to general adverse economic and industry conditions;
- require us to dedicate a significant portion of our cash flow from operations to payments on our indebtedness, thereby reducing the availability of our cash flow to fund working capital, acquisitions and capital expenditures, and for other general corporate purposes;
- limit our flexibility in planning for, or reacting to, changes in our business and the industry in which we operate;
- restrict us from making strategic acquisitions or exploiting business opportunities; and
- limit, along with the financial and other restrictive covenants in our indebtedness, among other things, our ability to borrow additional funds.

DESPITE OUR CURRENT LEVELS OF INDEBTEDNESS, WE MAY INCUR ADDITIONAL DEBT IN THE FUTURE, WHICH COULD INCREASE THE RISKS ASSOCIATED WITH OUR LEVERAGE.

We are continually evaluating and pursuing acquisition opportunities in the consumer goods packaging market and may incur additional indebtedness, including indebtedness under our Credit Agreement, to finance any such acquisitions and to fund any resulting increased operating needs. In 2017, for example, we funded the purchase price for our acquisition of SDS through term loan and revolving loan borrowings under our Credit Agreement in the aggregate amount of \$1,023.8 million. If new debt is added to our current debt levels, the related risks we now face could increase. We will have to effect any new financing in compliance with the agreements governing our then existing indebtedness. The indentures governing the 5½% Notes and the 4¾% Notes and the 3¼% Notes do not prohibit us from incurring additional indebtedness.

THE TERMS OF OUR DEBT INSTRUMENTS RESTRICT THE MANNER IN WHICH WE CONDUCT OUR BUSINESS AND MAY LIMIT OUR ABILITY TO IMPLEMENT ELEMENTS OF OUR GROWTH STRATEGY.

Our Credit Agreement contains numerous covenants, including financial and operating covenants, some of which are quite restrictive. These covenants affect, and in many respects limit, among other things, our ability to:

• incur additional indebtedness;

• create liens;

• consolidate, merge or sell assets;

• make certain advances, investments and loans;

• enter into certain transactions with affiliates; and

• engage in any business other than the packaging business and certain related businesses.

The indentures governing the 5½% Notes and the 4¾% Notes and the 3¼% Notes contain certain covenants that also restrict our ability to create liens, issue guarantees, engage in sale and leaseback transactions and consolidate, merge or sell assets. These covenants could restrict us in the pursuit of our growth strategy.

WE FACE COMPETITION FROM MANY COMPANIES AND WE MAY LOSE SALES OR EXPERIENCE LOWER MARGINS ON SALES AS A RESULT OF SUCH COMPETITION.

The manufacture and sale of metal and plastic containers and closures is highly competitive. We compete with other manufacturers of metal and plastic containers and closures and manufacturers of alternative packaging products, as well as packaged goods companies who manufacture containers and closures for their own use and for sale to others. We compete primarily on the basis of price, quality and service. To the extent that any of our competitors is able to offer better prices, quality and/or services, we could lose customers and our sales and margins may decline.

In 2018, approximately 90 percent of our metal container sales and a majority of our closures and plastic container sales were pursuant to multi-year supply arrangements. Although no assurances can be given, we have been successful historically in continuing these multi-year customer supply arrangements. Additionally, in general, many of these arrangements provide that during the term the customer may receive competitive proposals for all or up to a portion of the products we furnish to the customer. We have the right to retain the business subject to the terms and conditions of the competitive proposal. If we match a competitive proposal, it may result in reduced sales prices for the products that are the subject of the proposal. If we choose not to match a competitive proposal, we may lose the sales that were the subject of the proposal.

The loss of any major customer, a significant reduction in the purchasing levels of any major customer or a significant adverse change in the terms of our supply agreement with any major customer could adversely affect our results of operations.

DEMAND FOR OUR PRODUCTS COULD BE AFFECTED BY CHANGES IN LAWS AND REGULATIONS APPLICABLE TO FOOD AND BEVERAGES AND CHANGES IN CONSUMER PREFERENCES.

We manufacture and sell metal and plastic rigid packaging for consumer goods products. Many of our products are used to package food and beverages, and therefore they come into direct contact with these products. Accordingly, such products must comply with various laws and regulations for food and beverages applicable to our customers. Changes in such laws and regulations could negatively impact our customers' demand for our products as they comply with such changes and/or require us to make changes to our products. Such changes to our products could include modifications relating to the inclusion of bisphenol A in the coatings and compounds that we use, possibly resulting in the incurrence by us of additional costs. Additionally, because our products are used to package consumer goods, we are subject to a variety of risks that could influence consumer behavior and negatively impact demand for our products, including changes in consumer preferences driven by various health-related and environmental concerns and perceptions.

OUR FINANCIAL RESULTS COULD BE ADVERSELY AFFECTED IF WE ARE NOT ABLE TO OBTAIN SUFFICIENT QUANTITIES OF RAW MATERIALS OR MAINTAIN OUR ABILITY TO PASS RAW MATERIAL PRICE INCREASES THROUGH TO OUR CUSTOMERS.

We purchase steel, aluminum, plastic resins and other raw materials from various suppliers. Sufficient quantities of these raw materials may not be available in the future, whether due to reductions in capacity because

of, among other things, significant consolidation of suppliers, increased demand in excess of available supply, unforeseen events such as significant hurricanes, government imposed quotas or other reasons. In addition, such materials are subject to price fluctuations due to a number of factors, including increases in demand for the same raw materials, the availability of other substitute materials, tariffs and general economic conditions that are beyond our control.

Over the last few years, there has been significant consolidation of suppliers of steel worldwide. In addition, tariffs, quotas and court cases have negatively impacted the ability and desire of steel suppliers to competitively supply steel outside of their countries. More recently, the United States began imposing new tariffs on steel supply into the United States from certain foreign countries starting in June 2018, which has increased the cost of steel imported into the United States as well as ultimately steel manufactured in the United States. Additionally, exemptions from tariffs granted by the United States have been inconsistent and unpredictable. In Europe, recently enacted quotas on foreign steel supply has negatively impacted the ability of foreign steel suppliers to supply steel into Europe. Additional tariffs and/or quotas or other limitations on steel supply could further negatively impact the ability and desire of steel suppliers to competitively supply steel outside of their countries. Our metal container and metal closures supply agreements with our customers provide for the pass through of changes in our metal costs. For our customers without long-term agreements, we also generally increase prices to pass through increases in our metal costs. However, the impact of tariffs and quotas creates volatility in the applicable markets and therefore creates challenges for us and our customers in passing through costs related to such tariffs and quotas.

Our resin requirements are primarily acquired through multi-year arrangements for specific quantities of resins with several major suppliers of resins. The prices that we pay for resins are not fixed and are subject to market pricing, which has fluctuated significantly in the past few years. Our plastic container, plastic closures and dispensing systems supply agreements with our customers generally provide for the pass through of changes in resin costs, subject in many cases to a lag in the timing of such pass through. For customers without long-term agreements, we also generally pass through changes in resin costs.

Although no assurances can be given, we expect to be able to purchase sufficient quantities of raw materials to timely meet all of our customers' requirements in 2019. Additionally, although no assurances can be given, we generally have been able to pass raw material cost increases through to our customers. The loss of our ability to pass those cost increases through to our customers or the inability of our suppliers to meet our raw material requirements, however, could have a materially adverse impact on our business, financial condition or results of operations.

GLOBAL ECONOMIC CONDITIONS, DISRUPTIONS IN THE CREDIT MARKETS AND THE INSTABILITY OF THE EURO COULD ADVERSELY AFFECT OUR BUSINESS, FINANCIAL CONDITION OR RESULTS OF OPERATIONS.

In the past, the global financial markets have experienced substantial disruption, including, among other things, volatility in securities prices, diminished liquidity and credit availability, rating downgrades of certain investments and declining valuations of others. Additionally, the global economy experienced a recession, and economic uncertainty has generally continued in European markets and in China. If such economic conditions, disruption of global financial markets and tightening of credit in the financial markets were to occur again, then, among other risks we face, our business, financial condition, results of operations and ability to obtain additional financing in the future, including on terms satisfactory to us, could be adversely affected.

Economic conditions and disruptions in the credit markets could also harm the liquidity or financial position of our customers or suppliers, which could in turn cause such parties to fail to meet their contractual or other obligations to us or reduce our customers' purchases from us, any of which could negatively affect our business, financial condition or results of operations. Additionally, under such circumstances, the creditworthiness of the counterparties to our interest rate and commodity pricing transactions could deteriorate, thereby increasing the risk that such counterparties fail to meet their contractual obligations to us.

There has been concern regarding the overall stability of the Euro and the future of the Euro as a single currency given the diverse economic and political circumstances in individual Eurozone countries. Potential developments and market perceptions related to the Euro could adversely affect the value of our Euro-denominated assets, reduce the amount of our translated amounts of U.S. dollar revenue and income, negatively impact our indebtedness in any such Eurozone country (including our ability to refinance such indebtedness) and otherwise negatively affect our business,

financial condition or results of operations. For example, in June 2016, the United Kingdom voted to leave the European Union (commonly referred to as Brexit). The implementation and effects of Brexit have been marked by political unpredictability and lack of clarity around the future economic relationship

between the United Kingdom and the European Union. Although our revenue and income related to the United Kingdom is less than one percent of our overall revenue and income, Brexit could potentially disrupt and create uncertainty surrounding our business related to the United Kingdom, including our relationships with existing and future customers, suppliers and employees. We cannot predict the long-term economic, financial, trade and legal implications that the withdrawal of the United Kingdom from the European Union would have and how such withdrawal would affect our business globally and in the region. In addition, Brexit may lead other European Union member countries to consider referendums regarding their European Union membership.

A SUBSTANTIALLY LOWER THAN NORMAL CROP YIELD MAY REDUCE DEMAND FOR OUR METAL CONTAINERS AND CLOSURES FOR FOOD PRODUCTS.

Our metal container business' sales and income from operations are dependent, in part, upon the vegetable and fruit harvests in the midwest and western regions of the United States and, to a lesser extent, in a variety of national growing regions in Europe. Our closures business is also dependent, in part, upon the vegetable and fruit harvests. The size and quality of these harvests varies from year to year, depending in large part upon the weather conditions in applicable regions, and our results of operations could be impacted accordingly. Our sales, income from operations and net income could be materially adversely affected in a year in which crop yields are substantially lower than normal.

THE SEASONALITY OF THE FRUIT AND VEGETABLE PACKING INDUSTRY CAUSES US TO INCUR SHORT-TERM DEBT.

We sell metal containers and closures used to package fruits and vegetables, which is a seasonal process. As a result, we have historically generated a disproportionate amount of our annual income from operations in our third quarter. Additionally, as is common in the packaging industry, we must access working capital to build inventory ahead of the fruit and vegetable packing process. We also provide extended payment terms to some of our customers due to the seasonality of the fruit and vegetable packing process and, accordingly, carry accounts receivable for some customers beyond the end of the packing season. Due to our seasonal requirements, we may incur short-term indebtedness to finance our working capital requirements.

THE COST OF PRODUCING OUR PRODUCTS MAY BE ADVERSELY AFFECTED BY VARIOUS FACTORS.

The cost of producing our products is affected by many factors, some of which can be volatile and some of which may be challenging. For example, the cost of producing our products is sensitive to our energy costs, such as natural gas and electricity. We have, from time to time, entered into contracts to hedge a portion of our natural gas costs. Energy prices, in particular oil and natural gas prices, have been volatile in recent years, with a corresponding effect on our production costs.

Many countries, including most recently the United States, have imposed tariffs on imported products from certain other countries, including products and components supplied cross border within a company. Although we engage in limited cross border supply within our businesses, tariffs or quotas imposed on any cross border supplies within our businesses would increase the cost of our products and could adversely impact our results of operations. Additionally, local suppliers tend to increase prices for their products due to the protection offered by tariffs. Any such increases would increase the cost of our products and could adversely impact our results of operations.

WE MAY NOT BE ABLE TO PURSUE OUR GROWTH STRATEGY BY ACQUISITION.

Historically, we have grown predominantly through acquisitions. Our future growth will depend in large part on additional acquisitions of consumer goods packaging businesses. We may not be able to locate or acquire other suitable acquisition candidates consistent with our strategy, and we may not be able to fund future acquisitions because of limitations under our indebtedness or otherwise, including due to the limited availability of funds if the financial markets are impaired.

FUTURE ACQUISITIONS MAY CREATE RISKS AND UNCERTAINTIES THAT COULD ADVERSELY AFFECT OUR OPERATING RESULTS AND DIVERT OUR MANAGEMENT'S ATTENTION.

In pursuing our strategy of growth through acquisitions, we will face risks commonly encountered with an acquisition strategy. These risks include:

- failing to identify material problems and liabilities in our due diligence review of acquisition targets;
- failing to obtain sufficient indemnification rights to fully offset possible liabilities associated with acquired businesses;

- failing to assimilate the operations and personnel of the acquired businesses;
- difficulties in identifying or retaining employees for the acquired businesses;
- disrupting our ongoing business;
- diluting our limited management resources;
- operating in new geographic regions; and
- impairing relationships with employees and customers of the acquired business as a result of changes in ownership and management.

Through our experience integrating our acquisitions, we have learned that, depending upon the size of the acquisition, it can take us up to two to three years to completely integrate an acquired business into our operations and systems and realize the full benefit of the integration. During the early part of this integration period, the operating results of an acquired business may decrease from results attained prior to the acquisition due to costs, delays or other challenges that arise when integrating the acquired business. In addition, we may not be able to achieve potential synergies or maintain the levels of revenue, earnings or operating efficiency that each business had achieved or might achieve separately. Moreover, indebtedness incurred to fund acquisitions could adversely affect our liquidity and financial stability.

WE MAY BE UNABLE TO ACHIEVE, OR MAY BE DELAYED IN ACHIEVING, ADEQUATE RETURNS FROM OUR EFFORTS TO OPTIMIZE OUR OPERATIONS, WHICH COULD ADVERSELY AFFECT OUR RESULTS OF OPERATIONS AND FINANCIAL CONDITION.

We continually strive to improve our operating performance and further enhance our franchise positions in our businesses through the investment of capital for productivity improvements, manufacturing efficiencies, manufacturing cost reductions and the rationalization of our manufacturing facilities footprints. Our operations include complex manufacturing systems as well as intricate scheduling and numerous geographic and logistical complexities associated with our facilities and our customers' facilities. Accordingly, our efforts to achieve productivity improvements, manufacturing efficiencies and manufacturing cost reductions and to rationalize our manufacturing facilities footprints are subject to a number of risks and uncertainties that could impact our ability to achieve adequate returns from our efforts as planned. These risks and uncertainties include, among others, completing any such efforts on time and as planned and retaining customers impacted thereby.

IF WE ARE UNABLE TO RETAIN KEY MANAGEMENT, WE MAY BE ADVERSELY AFFECTED.

We believe that our future success depends, in large part, on our experienced management team. Losing the services of key members of our current management team could make it difficult for us to manage our business and meet our objectives.

PROLONGED WORK STOPPAGES AT OUR FACILITIES WITH UNIONIZED LABOR COULD JEOPARDIZE OUR FINANCIAL CONDITION.

As of December 31, 2018, we employed approximately 9,900 hourly employees on a full-time basis. Approximately 37 percent of our hourly plant employees in the United States and Canada as of that date were represented by a variety of unions, and most of our hourly employees in Europe, Asia, South America and Central America were represented by a variety of unions or other labor organizations. Our labor contracts expire at various times between 2019 and 2022. We cannot assure you that, upon expiration of existing collective bargaining agreements, new agreements will be reached without union action or that any such new agreements will be on terms no less favorable to us than current agreements. Disputes with the unions representing our employees could result in strikes or other labor protests that could disrupt our operations and divert the attention of management from operating our business. A strike or work stoppage could make it difficult for us to find a sufficient number of people with the necessary skills to replace those employees. Prolonged work stoppages at our facilities could have a material adverse effect on our business, financial condition or results of operations.

WE ARE SUBJECT TO COSTS AND LIABILITIES RELATED TO ENVIRONMENTAL AND HEALTH AND SAFETY LAWS AND REGULATIONS AND RISKS RELATED TO LEGAL PROCEEDINGS.

We continually review our compliance with environmental and other laws, such as the Occupational Safety and Health Act and other laws regulating noise exposure levels and other safety and health concerns in the production areas of our plants in the United States and environmental protection, health and safety laws and regulations abroad.

We may incur liabilities for noncompliance, or substantial expenditures to achieve compliance, with environmental and other laws or changes thereto in the future or as a result of the application of additional laws

and regulations to our business, including those limiting greenhouse gas emissions and those requiring compliance with the European Commission's registration, evaluation and authorization of chemicals (REACH) procedures. In addition, stricter regulations, or stricter interpretations of existing laws or regulations, may impose new liabilities on us, and we may become obligated in the future to incur costs associated with the investigation and/or remediation of contamination at our facilities or other locations. Additionally, many of our products come into contact with the food and beverages that they package, and therefore we may be subject to risks and liabilities related to health and safety matters in connection with our products. Changes in or additional health and safety laws and regulations in connection with our products may also impose new requirements and costs on us. Such requirements, liabilities and costs could have a material adverse effect on our capital expenditures, results of operations, financial condition or competitive position.

We are involved in various legal proceedings, contract disputes and claims arising in the ordinary course of our business. Additionally, a competition authority in Germany commenced an antitrust investigation in 2015 involving the industry association for metal packaging in Germany and its members, including our metal container and closures subsidiaries in Germany. At the end of April 2018, the European Commission commenced an antitrust investigation involving the metal packaging industry in Europe including our metal container and closures subsidiaries, which should effectively close out the investigation in Germany. Although we are not able to predict the outcome of such proceedings, investigations, disputes and claims, any payments in respect thereof, including pursuant to any settlements, will reduce our available cash flows and could adversely impact our results of operations.

OUR INTERNATIONAL OPERATIONS ARE SUBJECT TO VARIOUS RISKS THAT MAY ADVERSELY AFFECT OUR FINANCIAL RESULTS.

Our international operations generated approximately \$1,115.2 million, or approximately 25 percent, of our consolidated net sales in 2018. As of February 1, 2019, we have a total of 42 manufacturing facilities in a total of 18 countries outside of the United States, including Canada, Mexico and countries located in Europe, Asia and South America, serving customers in approximately 90 countries worldwide. Our business strategy may include continued expansion of international activities. Accordingly, the risks associated with operating in foreign countries, including Canada, Mexico and countries located in Europe, Asia and South America, may have a negative impact on our liquidity and net income. For example, the current economic uncertainty in Europe and China and the geopolitical disruptions in Russia and the Middle East and related adverse economic conditions and the current trade uncertainty throughout the world may have an adverse effect on our results of operations and financial condition. Since 2016, we ceased operations at our metal container manufacturing facilities in the Ukraine and Jordan because of the geopolitical environment in those areas.

Risks associated with operating in foreign countries include, but are not limited to:

- political, social and economic instability;
- inconsistent product regulation or policy changes by foreign agencies or governments;
- war, civil disturbance or acts of terrorism;
- compliance with and changes in applicable foreign laws;
- loss or non-renewal of treaties or similar agreements with foreign tax authorities;
- difficulties in enforcement of contractual obligations and intellectual property rights;
- high social benefits for labor;
- national and regional labor strikes;
- imposition of limitations on conversions of foreign currencies into U.S. dollars or payment of dividends and other payments by non-U.S. subsidiaries;
- foreign exchange rate risks;
- difficulties in expatriating cash generated or held by non-U.S. subsidiaries;
- uncertainties arising from local business practices and cultural considerations;
- changes in tax laws, or the interpretation thereof, affecting foreign tax credits or tax deductions relating to our non-U.S. earnings or operations;
- hyperinflation, currency devaluation or defaults in certain foreign countries;

- duties, taxes or government royalties, including the imposition or increase of withholding and other taxes on remittances and other payments by non-U.S. subsidiaries;
- customs, import/export and other trade compliance regulations or policies;
- non-tariff barriers and higher duty rates;
- difficulty in collecting international accounts receivable and potentially longer payment cycles;
- application of the Foreign Corrupt Practices Act and similar laws;
- increased costs in maintaining international manufacturing and marketing efforts; and
- taking of property by nationalization or expropriation without fair compensation.

WE ARE SUBJECT TO THE EFFECTS OF FLUCTUATIONS IN FOREIGN CURRENCY EXCHANGE RATES.

Our reporting currency is the U.S. dollar. As a result of our international operations, a portion of our consolidated net sales, and some of our costs, assets and liabilities, are denominated in currencies other than the U.S. dollar. As a result, we must translate local currency financial results into U.S. dollars based on average exchange rates prevailing during a reporting period for the preparation of our consolidated financial statements. Consequently, changes in exchange rates may unpredictably and adversely affect our consolidated operating results. For example, during times of a strengthening U.S. dollar, our reported international revenue and earnings will be reduced because the local currency will translate into fewer U.S. dollars. Conversely, a weakening U.S. dollar will effectively increase the dollar-equivalent of our expenses denominated in foreign currencies. Although we may use currency exchange rate protection agreements from time to time to reduce our exposure to currency exchange rate fluctuations in some cases, these hedges may not eliminate or reduce the effect of currency fluctuations.

IF THE INVESTMENTS IN OUR PENSION BENEFIT PLANS DO NOT PERFORM AS EXPECTED, WE MAY HAVE TO CONTRIBUTE ADDITIONAL AMOUNTS TO THESE PLANS, WHICH WOULD OTHERWISE BE AVAILABLE TO COVER OPERATING AND OTHER EXPENSES.

We maintain noncontributory, defined benefit pension plans covering a substantial number of our employees, which we fund based on certain actuarial assumptions. The plans' assets consist primarily of common stocks and fixed income securities. If the investments of the plans do not perform at expected levels, then we may have to contribute additional funds to ensure that the plans will be able to pay out benefits as scheduled. Such an increase in funding would result in a decrease in our available cash flow. In addition, any such investment performance significantly below our expected levels could adversely impact our results of operations. For example, the significant market declines in investment values at the end of 2018 as compared to our assumed rate of return for the plans for the year will have a non-cash unfavorable impact of approximately \$20 million on our results of operations in 2019.

WE PARTICIPATE IN MULTIEMPLOYER PENSION PLANS UNDER WHICH, IN THE EVENT OF CERTAIN CIRCUMSTANCES, WE COULD INCUR ADDITIONAL LIABILITIES WHICH MAY BE MATERIAL AND MAY NEGATIVELY AFFECT OUR FINANCIAL RESULTS.

We participate in four multiemployer pension plans which provide defined benefits to certain of our union employees. Because of the nature of multiemployer pension plans, there are risks associated with participating in such plans that differ from single-employer pension plans. Amounts contributed by an employer to a multiemployer pension plan are not segregated into a separate account and are not restricted to provide benefits only to employees of that contributing employer. In the event that another participating employer to a multiemployer pension plan in which we participate no longer contributes to such plan, the unfunded obligations of such plan may be borne by the remaining participating employers, including us. In such event, our required contributions to such plan could increase, which could negatively affect our financial condition and results of operations. In the event that we withdraw from participation in a multiemployer pension plan in which we participate or otherwise cease to make contributions to such a plan or in the event of the termination of such a plan, we potentially could be required under applicable law to make additional contributions to such plan in respect of the unfunded accrued benefits of such plan, which unfunded accrued benefits could be significant. Such additional contributions could be material and could negatively affect our financial condition and results of operations. As further discussed in Note 12 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report, two of the multiemployer pension plans in which we participate have a funded status of less than 65 percent.

IF WE WERE REQUIRED TO WRITE-DOWN ALL OR PART OF OUR GOODWILL OR TRADE NAMES, OUR NET INCOME AND NET WORTH COULD BE MATERIALLY ADVERSELY AFFECTED.

As a result of our acquisitions, we have \$1.1 billion of goodwill and \$32.1 million of indefinite-lived trade names recorded on our consolidated balance sheet at December 31, 2018. We are required to periodically determine if our goodwill and trade names have become impaired, in which case we would write-down the impaired portion. If we were required to write-down all or part of our goodwill or trade names, our net income and net worth could be materially adversely affected.

INCREASED INFORMATION TECHNOLOGY SECURITY THREATS AND MORE SOPHISTICATED AND TARGETED COMPUTER CRIME COULD POSE A RISK TO OUR SYSTEMS, NETWORKS, PRODUCTS, SOLUTIONS AND SERVICES.

In order to conduct our business, we rely on information technology systems, networks and services, some of which are managed, hosted and provided by third-party service providers. Although we have not experienced any material breaches or material losses related to cyberattacks to date, increased global security threats and more sophisticated and targeted computer crime pose a risk to the security of our systems and networks and those of our third-party service providers and the confidentiality, availability and integrity of our data. Depending on their nature and scope, such threats could potentially lead to the compromise of confidential information, including, but not limited to, confidential information relating to our employees, improper use of our systems and networks, manipulation and destruction of data, defective products, production downtimes and operational disruptions, which in turn could adversely affect our reputation, competitiveness and results of operations. A cyberattack or other disruption may also result in a financial loss, including potential fines for failure to safeguard data.

We have taken steps and incurred costs to further strengthen the security of our computer systems and continue to assess, maintain and enhance the ongoing effectiveness of our information security systems. While we attempt to mitigate these risks by employing a number of measures, including development and implementation of cybersecurity policies and procedures, employee training, comprehensive monitoring of our networks and systems and maintenance of backup and protective systems, our systems, networks, products, solutions and services remain potentially vulnerable to advanced persistent threats. The techniques used by criminals to obtain unauthorized access to sensitive data change frequently and often are not recognizable until launched against a target. Accordingly, we may be unable to anticipate these techniques or implement adequate preventative measures. It is therefore possible that in the future we may suffer a criminal attack where unauthorized parties gain access to personal information in our possession, and we may not be able to identify any such incident in a timely manner.

In addition, the interpretation and application of data protection laws, including federal, state and international laws, relating to the collection, use, retention, disclosure, security and transfer of personally identifiable data in the United States, Europe (including but not limited to the European Union's General Data Protection Regulation) and elsewhere, are uncertain and evolving.

As a result of potential cyberattack threats and existing and new data protection requirements, we have incurred and expect to continue to incur ongoing operating costs as part of our efforts to protect and safeguard our sensitive data and personal information. These efforts also may divert management and employee attention from other business and growth initiatives. A breach in information privacy could result in legal or reputational risks and could have a materially adverse impact on our business, financial condition and results of operations.

OUR PRINCIPAL STOCKHOLDERS HAVE SUBSTANTIAL INFLUENCE OVER US AND THEIR EXERCISE OF THAT INFLUENCE COULD BE ADVERSE TO YOUR INTERESTS.

As of December 31, 2018, Messrs. Silver and Horrigan beneficially owned an aggregate of 32,370,030 shares of our common stock, or approximately 29 percent of our outstanding common stock, which excludes certain shares of our common stock owned by affiliates and related family transferees of Messrs. Silver and Horrigan that are not deemed to be beneficially owned by Messrs. Silver or Horrigan. Accordingly, if they act together, they will be able to exercise substantial influence over all matters submitted to the stockholders for a vote, including the election of directors. In addition, we and Messrs. Silver and Horrigan have entered into an amended and restated principal stockholders agreement, or the Stockholders Agreement, that provides for certain director nomination rights. Under the Stockholders Agreement, the Group (as defined in the Stockholders Agreement and generally including Messrs. Silver

and Horrigan and their affiliates and related family transferees and estates) has the right to nominate for election all of our directors until the Group holds less than one-half of the number of shares of our common stock held by it in the aggregate on February 14, 1997. At least one of the Group's nominees must be either Mr. Silver or Mr. Horrigan during the three-year period covering the staggered terms of our three classes of directors. On February 14, 1997, the Group held 57,224,720 shares of our common stock in the aggregate (as adjusted for our

two-for-one stock splits in 2005, 2010 and 2017). Additionally, the Group has the right to nominate for election either Mr. Silver or Mr. Horrigan as a member of our Board of Directors when the Group no longer holds at least one-half of the number of shares of our common stock held by it in the aggregate on February 14, 1997 but beneficially owns at least 5 percent of our common stock. The Stockholders Agreement continues until the death or disability of both of Messrs. Silver and Horrigan. The provisions of the Stockholders Agreement could have the effect of delaying, deferring or preventing a change of control of Silgan Holdings Inc. and preventing our stockholders from receiving a premium for their shares of our common stock in any proposed acquisition of Silgan Holdings Inc.

ANTI-TAKEOVER PROVISIONS IN OUR AMENDED AND RESTATED CERTIFICATE OF INCORPORATION AND OUR AMENDED AND RESTATED BY-LAWS COULD HAVE THE EFFECT OF DISCOURAGING, DELAYING OR PREVENTING A MERGER OR ACQUISITION. ANY OF THESE EFFECTS COULD ADVERSELY AFFECT THE MARKET PRICE OF OUR COMMON STOCK.

Provisions of our amended and restated certificate of incorporation and our amended and restated by-laws may have the effect of delaying or preventing transactions involving a change of control of Silgan Holdings Inc., including transactions in which stockholders might otherwise receive a substantial premium for their shares over then current market prices, and may limit the ability of stockholders to approve transactions that they may deem to be in their best interests.

In particular, our amended and restated certificate of incorporation provides that:

- the Board of Directors is authorized to issue one or more classes of preferred stock having such designations, rights and preferences as may be determined by the Board;
- the Board of Directors is divided into three classes, and each year approximately one-third of the directors are elected for a term of three years;

- the Board of Directors is fixed at seven members, subject to the ability of the Board of Directors to increase the size of the Board of Directors to up to nine members for a period of time; and

- action taken by the holders of common stock must be taken at a meeting and may not be taken by consent in writing. Additionally, our amended and restated by-laws provide that a special meeting of the stockholders may only be called by either of our Co-Chairmen of the Board on their own initiative or at the request of a majority of the Board of Directors, and may not be called by the holders of common stock.

UPON THE OCCURRENCE OF CERTAIN CHANGE OF CONTROL EVENTS, WE MAY NOT BE ABLE TO SATISFY ALL OF OUR OBLIGATIONS UNDER OUR CREDIT AGREEMENT AND INDENTURES.

Under our Credit Agreement, the occurrence of a change of control (as defined in our Credit Agreement) constitutes an event of default, permitting, among other things, the acceleration of amounts owed thereunder. Additionally, upon the occurrence of a change of control as defined in the indentures governing the 5½% Notes and the 4¾% Notes and the 3¼% Notes, we must make an offer to repurchase the 5½% Notes and the 4¾% Notes and the 3¼% Notes at a purchase price equal to 101% of the principal amount thereof, plus accrued interest to the date of purchase. We may not have sufficient funds or be able to obtain sufficient financing to meet such obligations under our Credit Agreement and such indentures. In addition, even if we were able to finance such obligations, such financing may be on terms that are unfavorable to us or less favorable to us than the terms of our existing indebtedness.

ITEM 1B. UNRESOLVED STAFF COMMENTS.

None.

ITEM 2. PROPERTIES.

Our principal executive offices are located at 4 Landmark Square, Suite 400, Stamford, Connecticut 06901. The administrative headquarters and principal places of business for our metal container business are located at 21600 Oxnard Street, Woodland Hills, California 91367 and Landskrongasse 5/1, 1010 Vienna, Austria; the administrative headquarters and principal places of business for our closures business are located at 1140 31st Street, Downers Grove, Illinois 60515, 501 South 5th Street, Richmond, Virginia 23219 and North 88, Riesstrasse 16, 80992 Munich, Germany; and the administrative headquarters and principal place of business for our plastic container business is located at 14515 N. Outer Forty, Chesterfield, Missouri 63017. We lease all of these offices.

We own and lease properties for use in the ordinary course of business. The properties consist primarily of 44 operating facilities for the metal container business, 33 operating facilities for the closures business and 23 operating facilities for the plastic container business. We own 57 of these facilities and lease 43. The leases expire at various times through 2040. Some of these leases provide renewal options as well as various purchase options.

Below is a list of our operating facilities, including attached warehouses, as of February 1, 2019 for our metal container business:

Location	Approximate Building Area (square feet)
Antioch, CA	144,500 (leased)
Modesto, CA	37,800 (leased)
Modesto, CA	128,000 (leased)
Modesto, CA	150,000 (leased)
Riverbank, CA	167,000
Sacramento, CA	217,600 (leased)
Hoopeston, IL	323,600
Rochelle, IL	295,900 (75,000 leased)
Hammond, IN	158,000 (leased)
Burlington, IA	414,400
Ft. Dodge, IA	232,400 (leased)
Ft. Madison, IA	150,700 (56,000 leased)
Savage, MN	160,000
Mt. Vernon, MO	100,000
St. Joseph, MO	206,500
Edison, NJ	265,500
Lyons, NY	149,700
Maxton, NC	225,700 (leased)
Napoleon, OH	302,100 (leased)
Breinigsville, PA	187,500 (leased)
Lancaster, SC	58,100
Trenton, TN	96,300 (leased)
Paris, TX	266,300 (leased)
Toppenish, WA	217,700
Menomonee Falls, WI	116,000
Menomonie, WI	129,400 (leased)
Oconomowoc, WI	114,600
Plover, WI	86,800 (leased)
Waupun, WI	212,000
Las Piedras, Puerto Rico	26,800 (leased)
Mitterdorf im Murtzal, Austria	192,000
Leipzig, Germany	190,000
Meissen, Germany	139,000

Agios Ionnis Renti, Greece	309,000
Skydra, Greece	200,000
Bitola, Macedonia	120,000

We lease our research facilities in Oconomowoc, Wisconsin, Downers Grove, Illinois, Grandview, Missouri, Hannover, Germany and Waalwijk, Netherlands. We also own and lease other warehouse facilities that are detached from our manufacturing facilities. Additionally, we may sublease other facilities that we previously operated. We believe that our plants, warehouses and other facilities are in good operating condition, adequately maintained, and suitable to meet our present needs and future plans. We believe that we have sufficient capacity to satisfy the demand for our products in the foreseeable future. To the extent that we need additional capacity, we believe that we can convert certain facilities to continuous operation or make the appropriate capital expenditures to increase capacity.

ITEM 3. LEGAL PROCEEDINGS.

We are a party to routine legal proceedings, contract disputes and claims arising in the ordinary course of our business. We are not a party to, and none of our properties are subject to, any pending legal proceedings which could have a material adverse effect on our business or financial condition.

A competition authority in Germany commenced an antitrust investigation in 2015 involving the industry association for metal packaging in Germany and its members, including our metal container and closures subsidiaries in Germany. At the end of April 2018, the European Commission commenced an antitrust investigation involving the metal packaging industry in Europe including our metal container and closures subsidiaries, which should effectively close out the investigation in Germany. Given the early stage of the investigation, we cannot reasonably assess what actions may result from these investigations or estimate what costs we may incur as a result thereof.

ITEM 4. MINE SAFETY DISCLOSURES.

Not applicable.

26

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES.

Our common stock is quoted on the Nasdaq Global Select Market System under the symbol SLGN. As of January 31, 2019, we had 40 holders of record of our common stock.

On May 3, 2017, our Board of Directors declared a two-for-one stock split of our issued common stock, which was effected in the form of a stock dividend. Our stockholders of record at the close of business on May 15, 2017 were issued one additional share of our common stock for each share of our common stock owned by them on that date. Such additional shares were issued on May 26, 2017.

We began paying quarterly cash dividends on our common stock in 2004, and have increased the amount of the quarterly cash dividend payable on our common stock each year since then. The payment of future dividends is at the discretion of our Board of Directors and will be dependent upon our consolidated results of operations and financial condition, federal tax policies and other factors deemed relevant by our Board of Directors.

ISSUER PURCHASES OF EQUITY SECURITIES

On October 17, 2016, our Board of Directors authorized the repurchase by us of up to \$300.0 million of our common stock by various means from time to time through and including December 31, 2021, of which we repurchased approximately \$170.6 million of our common stock prior to the fourth quarter of 2018. Pursuant to this authorization, we also repurchased \$4.8 million of our common stock through open market purchases in the fourth quarter of 2018. Accordingly, at December 31, 2018, we had approximately \$124.6 million remaining for the repurchase of our common stock under this authorization.

The following table provides information about shares of our common stock that we repurchased during the fourth quarter of 2018:

	(a) Total Number of Shares Purchased	(b) Average Price Paid per Share	(c) Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	(d) Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs (in millions)
October 1-31, 2018	—	—	—	\$129.4
November 1-30, 2018	—	—	—	\$129.4
December 1-31, 2018	188,300	\$25.31	188,300	\$124.6
Total	188,300	\$25.31	188,300	\$124.6

ITEM 6. SELECTED FINANCIAL DATA.

In the table that follows, we provide you with selected financial data of Silgan Holdings Inc. We have derived this data from our consolidated financial statements for the five years ended December 31, 2018. Our consolidated financial statements for the five years ended December 31, 2018 have been audited by Ernst & Young LLP, our independent registered public accounting firm.

You should read this selected financial data along with the consolidated financial statements and accompanying notes included elsewhere in this Annual Report, as well as the section of this Annual Report titled "Management's Discussion and Analysis of Financial Condition and Results of Operations."

Stockholders' equity	881.3	766.1	469.4	639.2	710.0
Notes to Selected Financial Data					

- (a) In April 2017, we acquired SDS, the specialty closures and dispensing systems operations of WestRock Company. In September 2014, we acquired the metal container assets of Van Can Company. In 2018, we retrospectively adopted new accounting guidance regarding certain classifications related to other components of net periodic benefit costs. As a result, cost of goods sold was increased by \$26.6 million, \$21.7 million, \$23.7 million and \$21.5 million in 2017, 2016, 2015 and 2014, respectively; selling, general and administrative expenses were increased by \$6.8 million, \$5.2 million, \$6.5 million and \$5.9 million in 2017, 2016, 2015 and 2014, respectively; and we reported other pension and postretirement income of \$33.4 million, \$26.9 million, \$30.2 million and \$27.4 million in 2017, 2016, 2015 and 2014, respectively.
- (b) Selling, general and administrative expenses include costs attributed to announced acquisitions of \$24.7 million and \$1.4 million in 2017 and 2016, respectively.
- (c) The effective tax rate for 2017 was favorably impacted by the benefit from effective tax rate adjustments totaling \$110.9 million primarily related to the revaluation of net deferred tax liabilities to reflect lower future cash tax obligations as a result of the reduction in the U.S. corporate income tax rate under the legislation commonly referred to as the Tax Cuts and Jobs Act enacted in December 2017.
- (d) Per share amounts have been retroactively adjusted for the two-for-one stock split of our common stock that occurred on May 26, 2017.
- (e) Segment income of the metal container business includes rationalization charges (credits) of \$5.3 million, \$3.3 million, \$12.1 million and \$(0.4) million in 2018, 2017, 2016 and 2014, respectively. Segment income of the metal container business also includes a \$3.0 million charge related to the resolution of a past non-commercial legal dispute in 2017.
- (f) Segment income of the closures business includes rationalization charges of \$0.2 million, \$1.0 million, \$0.6 million, \$1.7 million and \$12.2 million in 2018, 2017, 2016, 2015 and 2014, respectively, and loss from operations in Venezuela of \$3.1 million in 2014.
- (g) Segment income of the plastic container business includes rationalization charges of \$0.8 million, \$1.5 million, \$6.4 million, \$12.7 million and \$2.7 million in 2018, 2017, 2016, 2015 and 2014, respectively.
- (h) Depreciation and amortization excludes amortization of debt discount and issuance costs.
- (i) In 2016, we retrospectively adopted new accounting guidance regarding certain classifications on the statement of cash flows related to excess tax benefits and shares repurchased from employees for tax withholding purposes. As a result, net cash provided by operating activities was increased by \$0.3 million and \$3.2 million in 2015 and 2014, respectively, and net cash (used in) provided by financing activities was decreased by \$0.3 million and \$3.2 million in 2015 and 2014, respectively.
- (j)

(k) In 2015, we retrospectively adopted new accounting guidance regarding the classification of certain debt issuance costs. As a result, each of total assets and total debt were decreased by \$14.9 million in 2014.

(l) In 2015, we retrospectively adopted new accounting guidance regarding the classification of deferred taxes. As a result, each of total assets and total liabilities were decreased by \$14.9 million in 2014.

30

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

The following discussion and analysis is intended to assist you in understanding our consolidated financial condition and results of operations for the three-year period ended December 31, 2018. Our consolidated financial statements and the accompanying notes included elsewhere in this Annual Report contain detailed information that you should refer to in conjunction with the following discussion and analysis.

GENERAL

We are a leading manufacturer of rigid packaging for consumer goods products. We currently produce steel and aluminum containers for human and pet food and general line products; metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products; and custom designed plastic containers for personal care, food, health care, pharmaceutical, household and industrial chemical, pet food and care, agricultural, automotive and marine chemical products. We are a leading manufacturer of metal containers in North America and Europe, the largest manufacturer of metal food containers in North America with a unit volume market share in the United States for the year ended December 31, 2018 of slightly more than half of the market, a leading worldwide manufacturer of metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products, and a leading manufacturer of plastic containers in North America for a variety of markets, including the personal care, food, health care and household and industrial chemical markets. Our objective is to increase shareholder value by efficiently deploying capital and management resources to grow our business, reduce operating costs, build sustainable competitive positions, or franchises, and to complete acquisitions that generate attractive cash returns. We have grown our net sales and income from operations largely through acquisitions but also through internal growth, and we continue to evaluate acquisition opportunities in the consumer goods packaging market.

SALES GROWTH

We have increased net sales and market share in our metal container, closures and plastic container businesses through both acquisitions and internal growth. As a result, we have expanded and diversified our customer base, geographic presence and product lines.

We are a leading manufacturer of metal containers in North America and Europe, primarily as a result of our acquisitions but also as a result of growth with existing customers. During the past 30 years, the metal food container market has experienced significant consolidation primarily due to the desire by food processors to reduce costs and focus resources on their core operations rather than self-manufacture their metal food containers. Our acquisitions of the metal food container manufacturing operations of Nestlé, Dial, Del Monte, Birds Eye, Campbell, Pacific Coast and Purina Steel Can reflect this trend. We estimate that approximately seven percent of the market for metal food containers in the United States is still served by self-manufacturers. In addition, the metal food container market in North America has been relatively flat during this period, despite losing market share as a result of more dining out, fresh produce and competing materials. However, we increased our share of the market for metal food containers in the United States primarily through acquisitions and growth with existing customers, and we have enhanced our business by focusing on providing customers with high levels of quality and service and value-added features such as our Quick Top® easy-open ends, shaped metal food containers and alternative color offerings for metal food containers. We anticipate that the market will be relatively flat in the future, but will continue to increase in areas of consumer convenience products such as easy-open ends. In 2018, approximately 70 percent of our metal food containers sold had an easy-open end. We have further enhanced our metal container business through optimization measures, which included a new manufacturing facility in the United States that was completed in 2016. This new metal food container manufacturing facility allowed us to better optimize the logistical footprint of our metal container business in North America and to further reduce costs of our metal container business. Additionally, in 2018 we commercialized a smaller, near-site manufacturing facility in the United States to support growth of certain customers.

With our acquisitions of our closures operations in North America, Europe, Asia and South America, we established ourselves as a leading worldwide manufacturer of metal and plastic closures and dispensing systems for food, beverage, health care, garden, personal care, home and beauty products. In 2017, we broadened our closures portfolio to include dispensing systems with our acquisition of SDS. Since 2003, following our acquisition of the White Cap

closures operations in the United States, net sales of our closures business have increased sevenfold to \$1.46 billion in 2018 as a result of acquisitions and internal growth. We may pursue further consolidation opportunities in the closures markets in which we operate, including in dispensing systems, or in

adjacent closures markets. Additionally, we expect to continue to generate internal growth in our closures business, particularly in plastic closures and dispensing systems.

We have improved the market position of our plastic container business since 1987, with net sales increasing sevenfold to \$614.1 million in 2018. We achieved this improved market position primarily through strategic acquisitions as well as through internal growth. In 2016, we completed the construction of two new plastic container manufacturing facilities in the United States, including a near-site facility to a major customer and another facility to meet the growing needs of our customers and allow us to further reduce costs of our plastic container business. Additionally, in 2018 we commercialized a new thermoformed plastic container manufacturing facility in the United States in support of continued growth. The plastic container market of the consumer goods packaging industry continues to be highly fragmented, with growth rates in excess of population expansion due to substitution of plastic for other materials. We have focused on the segment of this market where custom design and decoration allows customers to differentiate their products such as in personal care. We intend to pursue further acquisition opportunities in markets where we believe that we can successfully apply our acquisition and value-added operating expertise and strategy.

OPERATING PERFORMANCE

We operate in a competitive industry where it is necessary to realize cost reduction opportunities to offset continued competitive pricing pressure. We have improved the operating performance of our plant facilities through the investment of capital for productivity improvements, manufacturing efficiencies, manufacturing cost reductions and the optimization of our manufacturing facilities footprints. Our acquisitions and investments have enabled us to rationalize plant operations and decrease overhead costs through plant closings and downsizings and to realize manufacturing efficiencies as a result of optimizing production scheduling. From 2014, we have closed four metal container manufacturing facilities, one closure manufacturing facility and four plastic container manufacturing facilities in connection with our continuing efforts to streamline our plant operations, reduce operating costs and better match supply with geographic demand.

We have also invested substantial capital in the past several years for new market opportunities and value-added products such as Quick Top[®] easy-open ends for metal food containers, shaped metal food containers and alternative color offerings for metal food containers. In addition, we have made and continue to make investments to enhance the competitive advantages of metal packaging for food. In 2016, we completed optimization plans in each of our businesses that reduced manufacturing and logistical costs and provided productivity improvements and manufacturing efficiencies, thereby resulting in a lower cost manufacturing network for our businesses and strengthening the competitive position of each of our businesses in their respective markets. In conjunction with these optimization plans, we completed the construction of a new metal food container manufacturing facility and two new plastic container manufacturing facilities, the relocation of various equipment lines to facilities where we can better serve our customers and the rationalization of several existing manufacturing facilities. The three new manufacturing facilities are strategically located to meet the unique needs of our customers. In addition to optimizing freight and logistical costs, these three new facilities allowed us to further reduce costs and rationalize our manufacturing footprint. Additionally, in 2018 we commercialized a new metal container manufacturing facility and a new thermoformed plastic container manufacturing facility, in each case to support continued growth in key markets. Historically, we have been successful in renewing our multi-year supply arrangements with our customers. We estimate that in 2019 approximately 90 percent of our projected metal container sales and a majority of our projected closures and plastic containers sales will be under multi-year arrangements.

Many of our multi-year customer supply arrangements generally provide for the pass through of changes in raw material, labor and other manufacturing costs, thereby significantly reducing the exposure of our results of operations to the volatility of these costs. Our metal container and metal closure supply agreements with our customers provide for the pass through of changes in our metal costs. For our metal container and metal closure customers without long-term contracts, we have also generally increased prices to pass through increases in our metal costs. Our plastic closure, dispensing systems and plastic container supply agreements with our customers provide for the pass through of changes in our resin costs, subject in many cases to a lag in the timing of such pass through. For our plastic closure, dispensing systems and plastic container customers without long-term contracts, we have also generally passed through changes in our resin costs.

Our metal container business' sales and income from operations are dependent, in part, upon the vegetable and fruit harvests in the midwest and western regions of the United States and, to a lesser extent, in a variety of

32

national growing regions in Europe. Our closures business is also dependent, in part, upon vegetable and fruit harvests. The size and quality of these harvests varies from year to year, depending in large part upon the weather conditions in applicable regions. Because of the seasonality of the harvests, we have historically experienced higher unit sales volume in the third quarter of our fiscal year and generated a disproportionate amount of our annual income from operations during that quarter. Additionally, as is common in the packaging industry, we provide extended payment terms to some of our customers in our metal container business due to the seasonality of the vegetable and fruit packing process.

USE OF CAPITAL

Historically, we have used leverage to support our growth and increase shareholder returns. Our stable and predictable cash flow, generated largely as a result of our long-term customer relationships and generally recession resistant business, supports our financial strategy. We intend to continue using reasonable leverage, supported by our stable cash flows, to make value enhancing acquisitions. In determining reasonable leverage, we evaluate our cost of capital and manage our level of debt to maintain an optimal cost of capital based on current market conditions. If acquisition opportunities are not identified over a longer period of time, we may use our cash flow to repay debt, repurchase shares of our common stock or increase dividends to our stockholders or for other permitted purposes. In 2016, we used cash on hand and revolving loan borrowings under our 2014 Credit Facility to fund repurchases of our common stock for \$277.3 million (which included \$269.4 million of our common stock purchased pursuant to a "modified Dutch auction" tender offer that was completed in November 2016). In February 2017, we issued \$300 million of the 4¾% Notes and €650 million of the 3¼% Notes. We used the net proceeds from the 4¾% Notes to prepay a portion of our outstanding U.S. dollar term loans and repay a portion of our outstanding revolving loans under our 2014 Credit Facility. We used the net proceeds from the 3¼% Notes to prepay all outstanding Euro term loans and repay all remaining outstanding revolving loans under our 2014 Credit Facility, to repay certain foreign bank revolving and term loans of certain of our non-U.S. subsidiaries and to redeem \$220 million of our outstanding 5% Notes. In March 2017, we refinanced our 2014 Credit Facility and entered into our Credit Agreement, which extended the maturity dates of our senior secured credit facility, provides additional borrowing capacity for us and provides us with greater flexibility with regard to our strategic initiatives. In May 2018, we entered into an amendment to our Credit Agreement which further extended maturity dates, lowered the margin on borrowings thereunder and provides additional flexibility with regard to our strategic initiatives. Our Credit Agreement provides us with revolving loans, consisting of a multicurrency revolving loan facility of approximately \$1.19 billion and a Canadian revolving loan facility of Cdn \$15.0 million. Additionally, our Credit Agreement provided us with term loans, consisting of (i) U.S. \$800 million of term loans designated U.S. A term loans, which were used to fund a portion of the purchase price for SDS, and (ii) Cdn \$45.5 million of term loans designated Canadian A term loans. In April 2017, we funded the purchase price for SDS with term and revolving loan borrowings under our Credit Agreement in the aggregate amount of \$1,023.8 million. In April 2018, we redeemed all of our remaining outstanding 5% Notes (\$280.0 million aggregate principal amount) with revolving loan borrowings under our Credit Agreement and cash on hand. You should also read Notes 3 and 9 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report.

To the extent we utilize debt for acquisitions or other permitted purposes in future periods, our interest expense may increase. Further, since the revolving loan and term loan borrowings under our Credit Agreement bear interest at floating rates, our interest expense is sensitive to changes in prevailing rates of interest and, accordingly, our interest expense may vary from period to period. At December 31, 2018 we had \$947.5 million of indebtedness, or approximately 41 percent of our total outstanding indebtedness, which bore interest at floating rates. Over the course of the year, we also borrow revolving loans under our revolving loan facilities which bear interest at floating rates to fund our seasonal working capital needs. Accordingly, during 2018 our average outstanding variable rate debt was approximately 50 percent of our total outstanding indebtedness.

In light of our strategy to use leverage to support our growth and optimize shareholder returns, we have incurred and will continue to incur significant interest expense. For 2018, 2017 and 2016, our aggregate interest and other debt expense before loss on early extinguishment of debt as a percentage of our income before interest and income taxes was 28.2 percent, 30.9 percent and 22.6 percent, respectively.

RESULTS OF OPERATIONS

The following table sets forth certain income statement data expressed as a percentage of net sales for each of the periods presented. You should read this table in conjunction with our Consolidated Financial Statements for the year ended December 31, 2018 and the accompanying notes included elsewhere in this Annual Report.

	Year Ended December 31,		
	2018	2017	2016
Operating Data:			
Net sales:			
Metal containers	53.5 %	55.7 %	62.9 %
Closures	32.7	30.5	22.1
Plastic containers	13.8	13.8	15.0
Consolidated	100.0	100.0	100.0
Cost of goods sold	84.5	84.5	85.8
Gross profit	15.5	15.5	14.2
Selling, general and administrative expenses	6.9	7.5	6.1
Rationalization charges	0.1	0.1	0.5
Other pension and postretirement income	(0.8)	(0.8)	(0.7)
Income before interest and income taxes	9.3	8.7	8.3
Interest and other debt expense	2.7	2.8	1.9
Income before income taxes	6.6	5.9	6.4
Provision (benefit) for income taxes	1.6	(0.7)	2.2
Net income	5.0 %	6.6 %	4.2 %

Summary results for our business segments for the years ended December 31, 2018, 2017 and 2016 are provided below.

	Year Ended December 31,		
	2018	2017	2016
	(Dollars in millions)		
Net sales:			
Metal containers	\$2,378.0	\$2,278.1	\$2,271.9
Closures	1,456.8	1,246.7	797.1
Plastic containers	614.1	565.1	543.9
Consolidated	\$4,448.9	\$4,089.9	\$3,612.9
Segment income:			
Metal containers ⁽¹⁾	\$198.8	\$230.2	\$214.7
Closures ⁽²⁾	189.9	142.0	99.8
Plastic containers ⁽³⁾	42.6	27.8	5.2
Corporate ⁽⁴⁾	(19.2)	(43.0)	(20.0)
Consolidated	\$412.1	\$357.0	\$299.7

(1) Includes rationalization charges of \$5.3 million, \$3.3 million and \$12.1 million in 2018, 2017 and 2016, respectively.

(2) Includes rationalization charges of \$0.2 million, \$1.0 million and \$0.6 million in 2018, 2017 and 2016, respectively.

(3) Includes rationalization charges of \$0.8 million, \$1.5 million and \$6.4 million in 2018, 2017 and 2016, respectively.

(4) Includes costs attributed to announced acquisitions of \$24.7 million and \$1.4 million in 2017 and 2016, respectively.

YEAR ENDED DECEMBER 31, 2018 COMPARED WITH YEAR ENDED DECEMBER 31, 2017

Overview. Consolidated net sales were \$4.45 billion in 2018, representing an 8.8 percent increase as compared to 2017 primarily as a result of the pass through of higher raw material and other manufacturing costs in each of our businesses, the inclusion of a full year of SDS, the impact from favorable foreign currency translation and higher volumes in the plastic container business, partially offset by lower unit volumes in the metal container business and legacy closures operations. Income before interest and income taxes for 2018 increased by \$55.1 million, or 15.4 percent, as compared to 2017 primarily as a result of the inclusion in the prior year of acquisition related costs of \$24.7 million related to SDS, the benefit from the inclusion of a full year of operations of SDS, the unfavorable impact in the prior year of the write-up of inventory of SDS for purchase accounting, lower manufacturing costs in each of our businesses, higher volumes in the plastic container business, the favorable impact from the contractual pass through to customers in the metal container business of indexed inflation on non-metal costs in the current year as compared to the unfavorable impact in the prior year from the contractual pass through of indexed deflation on non-metal costs, a charge of \$3.0 million in the prior year related to the resolution of a past non-commercial legal dispute in the metal container business and foreign currency transaction losses in the prior year. These increases were partially offset by the unfavorable overhead absorption in the metal container business due to the reduction of finished goods inventory, lower volumes in the metal container business and the legacy closures operations, higher freight expense and costs associated with the start-up of two new manufacturing facilities. Rationalization charges were \$6.3 million and \$5.8 million for the years ended 2018 and 2017, respectively. Results for 2018 and 2017 also included a loss on early extinguishment of debt of \$2.5 million and \$7.1 million, respectively. Results for 2017 also included the benefit from effective tax rate adjustments totaling \$110.9 million primarily related to the revaluation of net deferred tax liabilities to reflect lower future cash tax obligations as a result of the reduction in the U.S. corporate income tax rate under the Tax Cuts and Jobs Act enacted in December 2017, or the 2017 Tax Act. Net income in 2018 was \$224.0 million as compared to \$269.7 million in 2017.

Net Sales. The \$359.0 million increase in consolidated net sales in 2018 as compared to 2017 was due to higher net sales across all businesses.

Net sales for the metal container business increased \$99.9 million, or 4.4 percent, in 2018 as compared to 2017. This increase was primarily a result of the pass through of higher raw material and other manufacturing costs and the impact of favorable foreign currency translation of approximately \$12 million, partially offset by lower unit volumes of approximately four percent. The decrease in unit volumes was principally the result of a seasonal customer reducing inventory levels, a customer plant shutdown in the fruit market, the competitive loss of a smaller, lower margin customer and a less favorable fruit and vegetable pack in Europe, partially offset by higher pet food volumes and an incremental buy ahead by customers in 2018 as compared to 2017 in anticipation of significant steel inflation in 2019.

Net sales for the closures business in 2018 increased \$210.1 million, or 16.9 percent, as compared to 2017. This increase was primarily the result of the inclusion of a full year of SDS, the pass through of higher raw material and other manufacturing costs and the impact of favorable foreign currency translation of approximately \$18 million, partially offset by lower unit volumes of approximately two percent in the legacy closures operations primarily due to a less favorable fruit and vegetable pack in Europe as a result of weather conditions.

Net sales for the plastic container business in 2018 increased \$49.0 million, or 8.7 percent, as compared to 2017. This increase was principally due to the pass through of higher raw material costs and higher volumes of approximately four percent.

Gross Profit. Gross profit margin remained constant at 15.5 percent in 2018 and 2017, for the reasons discussed below in "Income before Interest and Income Taxes."

Selling, General and Administrative Expenses. Selling, general and administrative expenses as a percentage of consolidated net sales decreased 0.6 percentage points to 6.9 percent for 2018 as compared to 7.5 percent in 2017.

Selling, general and administrative expenses increased \$3.2 million in 2018 as compared to 2017. The increase in selling, general and administrative expenses was primarily due to the inclusion of a full year of SDS, which generally incurs such expenses at a higher percentage of its net sales, and increases in certain other expenses, largely offset by the inclusion in the prior year of \$24.7 million of costs attributed to the acquisition of SDS and a \$3.0 million charge

related to the resolution of a past non-commercial legal dispute.

35

Income before Interest and Income Taxes. Income before interest and income taxes for 2018 increased by \$55.1 million as compared to 2017, and margin increased to 9.3 percent from 8.7 percent over the same periods. The increase in segment income was principally due to higher segment income in the closures and plastic container businesses as well as the inclusion in the prior year of acquisition related costs of \$24.7 million, partially offset by a decrease in segment income in the metal container business. Segment income in 2018 and 2017 included rationalization charges of \$6.3 million and \$5.8 million, respectively.

Segment income of the metal container business for 2018 decreased \$31.4 million as compared to 2017, and segment income margin decreased to 8.4 percent from 10.1 percent over the same periods. The decrease in segment income was primarily attributable to the unfavorable overhead absorption of approximately \$18 million due to the reduction of finished goods inventory by approximately \$65 million in 2018, lower unit volumes, higher freight expense and higher rationalization charges, partially offset by the favorable impact from the contractual pass through to customers of indexed inflation on non-metal costs in 2018 as compared to the unfavorable impact in the prior year from the contractual pass through of indexed deflation on non-metal costs, lower manufacturing costs and a \$3.0 million charge in the prior year related to the resolution of a past non-commercial legal dispute. Rationalization charges were \$5.3 million and \$3.3 million in 2018 and 2017, respectively.

Segment income of the closures business for 2018 increased \$47.9 million as compared to 2017, and segment income margin increased to 13.0 percent from 11.4 percent over the same periods. The increase in segment income was primarily due to the inclusion of a full year of the SDS operations, the unfavorable impact in the prior year of a charge of \$11.9 million for the write-up of inventory of SDS for purchase accounting, lower manufacturing costs and foreign currency transaction losses in the prior year, partially offset by the volume impact from a less favorable fruit and vegetable pack in Europe.

Segment income of the plastic container business for 2018 increased \$14.8 million as compared to 2017, and segment income margin increased to 6.9 percent from 4.9 percent over the same periods. The increase in segment income was primarily attributable to higher volumes and lower manufacturing costs, partially offset by costs associated with the start-up of the new manufacturing facility in Fort Smith, Arkansas.

Interest and Other Debt Expense. Interest and other debt expense before loss on early extinguishment of debt for 2018 was \$116.3 million, an increase of \$6.0 million as compared to \$110.3 million for 2017 due primarily to higher weighted average outstanding borrowings largely as a result of borrowings for the acquisition of SDS and higher weighted average interest rates. Loss on early extinguishment of debt of \$2.5 million in 2018 was the result of the redemption of all remaining outstanding 5% Notes in April 2018 and the amendment to our Credit Agreement in May 2018. Loss on early extinguishment of debt of \$7.1 million in 2017 was a result of the prepayment of outstanding U.S. term loans and Euro term loans under our 2014 Credit Facility and the partial redemption of the 5% Notes in April 2017.

Provision for Income Taxes. The effective tax rate for 2018 was a provision of 23.6 percent as compared to a negative 12.5 percent for 2017. The effective tax rate for 2017 was favorably impacted by the benefit from effective tax rate adjustments totaling \$110.9 million, primarily related to the revaluation of net deferred tax liabilities to reflect lower future cash tax obligations as a result of the reduction in the U.S. corporate income tax rate under the 2017 Tax Act. The effective tax rate in 2017, exclusive of these effective tax rate adjustments, would have been a provision of 33.8 percent.

YEAR ENDED DECEMBER 31, 2017 COMPARED WITH YEAR ENDED DECEMBER 31, 2016

Overview. Consolidated net sales were \$4.09 billion in 2017, representing a 13.2 percent increase as compared to 2016 primarily as a result of the acquisition of SDS in April 2017, the pass through of higher raw material costs in each of our businesses, the impact from favorable foreign currency translation and higher volumes in the plastic container business, partially offset by lower unit volumes in the metal container business and legacy closures operations and a less favorable mix of products sold in the plastic container business. Income before interest and income taxes for 2017 increased by \$57.3 million, or 19.1 percent, as compared to 2016 primarily as a result of the benefit from the acquisition of SDS, lower manufacturing costs in each of our businesses, lower rationalization charges, the favorable impact in the metal container business from an increase in inventories in 2017 as compared to a

decrease in inventories in 2016 and higher volumes in the plastic container business. These

36

increases were partially offset by higher costs attributed to announced acquisitions, lower unit volumes in the metal container business and legacy closures operations, higher depreciation expense, the unfavorable impact in the metal container business from the contractual pass through to customers of indexed deflation and from a charge related to the resolution of a past non-commercial legal dispute, the unfavorable impact from the lagged pass through of changes in resin costs in the plastic container business and foreign currency transaction losses in 2017 as compared to foreign currency transaction gains in 2016. Rationalization charges were \$5.8 million and \$19.1 million for the years ended 2017 and 2016, respectively. Results for 2017 and 2016 also included costs attributed to announced acquisitions of \$24.7 million and \$1.4 million, respectively. Results for 2017 also included a loss on early extinguishment of debt of \$7.1 million and the benefit from effective tax rate adjustments totaling \$110.9 million primarily related to the revaluation of net deferred tax liabilities to reflect lower future cash tax obligations as a result of the reduction in the U.S. corporate income tax rate under the 2017 Tax Act. Net income in 2017 was \$269.7 million as compared to \$153.4 million in 2016.

Net Sales. The \$477.0 million increase in consolidated net sales in 2017 as compared to 2016 was due to the acquisition of SDS and higher net sales across all businesses.

Net sales for the metal container business increased \$6.2 million, or 0.3 percent, in 2017 as compared to 2016. This increase was primarily a result of the pass through of higher raw material costs and the impact of favorable foreign currency translation of approximately \$6 million, partially offset by lower unit volumes of approximately two percent principally attributable to lower soup volumes and a less favorable fruit and tomato pack on the west coast of the United States.

Net sales for the closures business in 2017 increased \$449.6 million, or 56.4 percent, as compared to 2016. This increase was primarily the result of the inclusion of net sales of \$445.6 million from the SDS operations, the pass through of higher raw material costs and the impact of favorable foreign currency translation of approximately \$6 million, partially offset by lower unit volumes of approximately three percent in the legacy closures operations as compared to record volumes in the prior year period principally as a result of a decline in single-serve beverages due to cooler weather conditions in our major markets.

Net sales for the plastic container business in 2017 increased \$21.2 million, or 3.9 percent, as compared to 2016. This increase was primarily due to the pass through of higher raw material costs, higher volumes of approximately two percent and the impact of favorable foreign currency translation of approximately \$2 million, partially offset by a less favorable mix of products sold.

Gross Profit. Gross profit margin increased 1.3 percentage points to 15.5 percent in 2017 as compared to 14.2 percent in 2016 for the reasons discussed below in "Income before Interest and Income Taxes."

Selling, General and Administrative Expenses. Selling, general and administrative expenses as a percentage of consolidated net sales increased 1.4 percentage points to 7.5 percent for 2017 as compared to 6.1 percent in 2016. Selling, general and administrative expenses increased \$85.3 million in 2017 as compared to 2016 primarily due to the inclusion of the SDS operations, acquisition related costs of \$24.7 million and a \$3.0 million charge related to the resolution of a past non-commercial legal dispute.

Income before Interest and Income Taxes. Income before interest and income taxes for 2017 increased by \$57.3 million as compared to 2016, and margin increased to 8.7 percent from 8.3 percent over the same periods. The increase in income before interest and income taxes was principally due to higher segment income in the closures business due to the acquisition of SDS and higher segment income in the metal and plastic container businesses. Income before interest and income taxes in 2017 and 2016 included rationalization charges of \$5.8 million and \$19.1 million, respectively, and costs attributed to announced acquisitions of \$24.7 million and \$1.4 million, respectively. Segment income of the metal container business for 2017 increased \$15.5 million as compared to 2016, and segment income margin increased to 10.1 percent from 9.5 percent over the same periods. The increase in segment income was primarily due to lower manufacturing costs, lower rationalization charges and the favorable impact from an increase in inventories in 2017 as compared to a decrease in inventories in 2016, partially offset by the impact of lower unit volumes, the unfavorable impact from the contractual pass through to customers of indexed deflation, an increase in depreciation expense, the unfavorable impact of a \$3.0 million charge related to the resolution of a past non-commercial legal dispute and foreign currency transaction losses in 2017 as compared to foreign currency transaction gains in 2016. Rationalization charges were \$3.3 million and \$12.1 million in 2017 and 2016, respectively.

Segment income of the closures business for 2017 increased \$42.2 million as compared to 2016, while segment income margin decreased to 11.4 percent from 12.5 percent over the same periods. The increase in segment income was primarily due to the inclusion of \$47.3 million of income from operations from the SDS operations and lower manufacturing costs, partially offset by the impact from a decrease in unit volumes in the legacy closures operations. The decrease in segment income margin was primarily due to the unfavorable impact from the \$11.9 million write-up of inventory of SDS for purchase accounting.

Segment income of the plastic container business for 2017 increased \$22.6 million as compared to 2016, and segment income margin increased to 4.9 percent from 1.0 percent over the same periods. The increase in segment income was primarily attributable to lower manufacturing costs, higher volumes and lower rationalization charges, partially offset by higher depreciation expense and the unfavorable impact from the lagged pass through to customers of higher resin costs. Rationalization charges were \$1.5 million and \$6.4 million in 2017 and 2016, respectively.

Interest and Other Debt Expense. Interest and other debt expense before loss on early extinguishment of debt for 2017 was \$110.3 million, an increase of \$42.5 million as compared to \$67.8 million for 2016 due primarily to higher average outstanding borrowings principally as a result of additional borrowings for the acquisition of SDS and higher weighted average interest rates, including the impact from increasing long-term fixed rate debt through the issuance in February 2017 of the 4¾% Notes and the 3¼% Notes. Loss on early extinguishment of debt of \$7.1 million in 2017 was a result of the prepayment of outstanding U.S. term loans and Euro term loans under our 2014 Credit Facility and the partial redemption of the 5% Notes in April 2017.

Provision for Income Taxes. The effective tax rate for 2017 was a negative 12.5 percent as compared to a provision of 33.9 percent for 2016. The effective tax rate for 2017 was favorably impacted by the benefit from the effective tax rate adjustments totaling \$110.9 million, primarily related to the revaluation of net deferred tax liabilities to reflect lower future cash tax obligations as a result of the reduction in the U.S. corporate income tax rate under the 2017 Tax Act. The effective tax rate in 2017, exclusive of these effective tax rate adjustments, would have been a provision of 33.8 percent.

CAPITAL RESOURCES AND LIQUIDITY

Our principal sources of liquidity have been net cash from operating activities and borrowings under our debt instruments, including our senior secured credit facility. Our liquidity requirements arise primarily from our obligations under the indebtedness incurred in connection with our acquisitions and the refinancing of that indebtedness, capital investment in new and existing equipment and the funding of our seasonal working capital needs.

On March 24, 2017, we refinanced our 2014 Credit Facility and entered into our Credit Agreement, which extended the maturity dates of our senior secured credit facility, provides additional borrowing capacity for us and provides us with greater flexibility with regard to our strategic initiatives. On May 30, 2018, we amended our Credit Agreement to further extend maturity dates, lower the margin on borrowings thereunder and provide additional flexibility with regard to our strategic initiatives. Our Credit Agreement provides us with revolving loans, consisting of a multicurrency revolving loan facility of approximately \$1.19 billion and a Canadian revolving loan facility of Cdn \$15.0 million. Additionally, our Credit Agreement provided us with term loans, consisting of (i) U.S. \$800 million of term loans designated U.S. A term loans, which were used to fund a portion of the purchase price for SDS and (ii) Cdn \$45.5 million of term loans designated Canadian A term loans. On April 6, 2017, we funded the purchase price for SDS with term and revolving loan borrowings under our Credit Agreement totaling \$1,023.8 million. As a result of entering into our Credit Agreement in 2017, we recorded a pre-tax charge for the loss on early extinguishment of debt of \$0.6 million in 2017. As a result of the 2018 amendment to our Credit Agreement, we recorded a pre-tax charge for the loss on early extinguishment of debt of \$1.1 million in 2018.

On April 16, 2018, we redeemed all of our remaining outstanding 5% Notes (\$280.0 million aggregate principal amount) at a redemption price of 100 percent of their principal amount plus accrued and unpaid interest up to the redemption date. We funded this redemption with revolving loan borrowings under our Credit Agreement and cash on hand. As a result of this redemption, we recorded a pre-tax charge for the loss on early extinguishment of debt of \$1.4 million in 2018 for the write-off of unamortized debt issuance costs.

On February 13, 2017, we issued \$300 million aggregate principal amount of the 4¾% Notes and €650 million aggregate principal amount of the 3¼% Notes. We used the net proceeds from the sale of the 4¾% Notes to prepay \$212.3 million of our outstanding U.S. term loans and repay a portion of our outstanding revolving loans under our 2014 Credit Facility. We used the net proceeds from the sale of the 3¼% Notes to prepay €187.0 million of Euro term loans under our 2014 Credit Facility, to repay the remaining outstanding revolving loans under our 2014 Credit Facility, to repay approximately €34.0 million of certain other foreign bank revolving and term loans of certain of our non U.S. subsidiaries and to redeem \$220.0 million aggregate principal amount of the 5% Notes at a redemption price of 101.25 percent of their principal amount plus accrued and unpaid interest up to the redemption date. During the first quarter of 2017, we also prepaid \$98.0 million of our outstanding U.S. term loans and Cdn \$14.0 million of our outstanding Canadian term loans under our 2014 Credit Facility. As a result of the aggregate prepayments of our outstanding term loans under our 2014 Credit Facility and the partial redemption of the 5% Notes, we recorded a pre-tax charge for the loss on early extinguishment of debt of \$6.5 million in 2017.

You should also read Note 9 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report with regard to our debt.

In 2018, we used cash provided by operating activities of \$506.5 million and net borrowings of revolving loans of \$52.3 million to fund repayments of long-term debt of \$286.2 million, net capital expenditures and other investing activities of \$189.9 million, dividends paid on our common stock of \$44.5 million, repurchases of our common stock of \$7.8 million, decreases in outstanding checks of \$4.1 million and debt issuance costs of \$3.3 million and to increase cash and cash equivalents (including the negative effect of exchange rate changes of \$3.7 million) by \$19.3 million. In 2017, we used aggregate debt proceeds of \$1,789.2 million primarily from the issuance of the 4¾% Notes and the 3¼% Notes and term loan borrowings under our Credit Agreement, cash provided by operating activities of \$389.8 million and increases in outstanding checks of \$8.8 million to fund the acquisition of SDS for \$1,023.8 million, the repayment of long-term debt of \$755.0 million, net capital expenditures and other investing activities of \$173.8 million, the net repayment of revolving loans of \$144.8 million, dividends paid on our common stock of \$40.5 million, debt issuance costs of \$17.0 million and repurchases of our common stock of \$4.1 million and to increase cash and cash equivalents by \$28.8 million.

In 2016, we used cash provided by operating activities of \$394.6 million, net borrowings of revolving loans of \$122.3 million and cash and cash equivalents of \$75.2 million to fund repurchases of our common stock of \$280.7 million, net capital expenditures and other investing activities of \$180.3 million, the repayment of long-term debt of \$67.4 million, dividends paid on our common stock of \$40.9 million and decreases in outstanding checks of \$22.8 million. At December 31, 2018, we had \$2,317.7 million of total consolidated indebtedness and cash and cash equivalents on hand of \$72.8 million. In addition, at December 31, 2018, we had outstanding letters of credit of \$18.2 million and no outstanding revolving loan borrowings under our Credit Agreement.

Under our Credit Agreement, we have available to us \$1.19 billion of revolving loans under a multicurrency revolving loan facility and Cdn \$15.0 million under a Canadian revolving loan facility. Revolving loans under our Credit Agreement may be used for working capital and other general corporate purposes, including acquisitions, capital expenditures, dividends, stock repurchases and refinancing of other debt. Revolving loans may be borrowed, repaid and reborrowed under the revolving loan facilities from time to time until March 24, 2023. At December 31, 2018, after taking into account outstanding letters of credit of \$18.2 million, borrowings available under the revolving loan facilities of our Credit Agreement were \$1.17 billion and Cdn \$15.0 million. Under our Credit Agreement, we also have available to us an uncommitted multicurrency incremental loan facility in an amount of up to an additional \$1.25 billion (which amount may be increased as provided in our Credit Agreement), and we may incur additional indebtedness as permitted by our Credit Agreement and our other instruments governing our indebtedness. You should also read Note 9 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report.

Because we sell metal containers and closures used in fruit and vegetable pack processing, we have seasonal sales. As is common in the packaging industry, we must utilize working capital to build inventory and then carry accounts receivable for some customers beyond the end of the packing season. Due to our seasonal requirements, which generally peak sometime in the summer or early fall, we may incur short-term indebtedness to finance our working

capital requirements. Our peak seasonal working capital requirements have historically averaged approximately \$350 million and were generally funded with revolving loans under our senior secured

credit facility, other foreign bank loans and cash on hand. For 2019, we expect to fund our seasonal working capital requirements with cash on hand, revolving loans under our Credit Agreement and foreign bank loans. We may use the available portion of revolving loans under our Credit Agreement, after taking into account our seasonal needs and outstanding letters of credit, for other general corporate purposes, including acquisitions, capital expenditures, dividends, stock repurchases and refinancing and repayments of other debt.

We have entered into various supply chain financing arrangements with financial intermediaries pursuant to which (i) we sell receivables of certain customers without recourse to such financial intermediaries and pursuant to such arrangements accelerate payment in respect of such receivables sooner than provided in the applicable supply agreements with such customers and (ii) we have effectively extended our payment terms on certain of our payables. For 2018, as a result of such supply chain financing arrangements, we reduced our days sales outstanding by approximately three days and extended our days purchases payable outstanding by approximately twenty-one days, effectively reducing our net working capital and our financing requirements for our working capital. If such supply chain financing arrangements ended, our net working capital would likely increase, and it would be necessary for us to finance such net working capital increase using cash on hand or revolving loans under our Credit Agreement or other indebtedness.

On December 22, 2017, the 2017 Tax Act was signed into law, making significant changes to the Internal Revenue Code. Changes include, but are not limited to, a federal corporate tax rate decrease from 35 percent to 21 percent for tax years beginning after December 31, 2017, the transition of U.S. international taxation from a worldwide to a territorial tax system and a one-time transition tax on the mandatory deemed repatriation of cumulative foreign earnings. As a result of the 2017 Tax Act, we revalued our net deferred tax liabilities at the lower corporate tax rate under the 2017 Tax Act and estimated, based on our understanding of the 2017 Tax Act, a significant reduction in our net deferred tax liabilities, effectively lowering our future cash tax obligations for deferred taxes. Accordingly, we recorded an income tax benefit of \$110.9 million in the fourth quarter of 2017 primarily related to the revaluation of our net deferred tax liabilities to reflect lower future cash tax obligations as a result of the reduction in the federal corporate tax rate under the 2017 Tax Act.

On October 17, 2016, our Board of Directors authorized the repurchase by us of up to \$300.0 million of our common stock by various means from time to time through and including December 31, 2021. Pursuant to this authorization, we repurchased a total of 188,300 shares of our common stock in 2018 at an average price of \$25.31, for a total purchase price of \$4.8 million. In 2016, pursuant to this authorization and the remaining amount from a prior authorization, we repurchased a total of 294,930 shares of our common stock at an average price of \$24.40, for a total purchase price of \$7.2 million, and we completed a "modified Dutch auction" tender offer pursuant to which we purchased 10,617,810 shares of our common stock from our stockholders at a price of \$25.38 per share, for a total purchase price of \$269.4 million, exclusive of \$0.7 million of fees and expenses. Accordingly, at December 31, 2018, we had approximately \$124.6 million remaining for the repurchase of our common stock under the October 17, 2016 Board of Directors authorization.

In addition to our operating cash needs and excluding any impact from acquisitions, we believe our cash requirements over the next few years will consist primarily of:

- capital expenditures of approximately \$200 million in 2019, and thereafter annual capital expenditures of approximately \$175 million to \$200 million which may increase as a result of specific growth or specific cost savings projects;

- principal payments of bank term loans and revolving loans under our Credit Agreement and other outstanding debt agreements and obligations of \$170.2 million in 2019, \$84.5 million in 2020, \$83.2 million in 2021, \$383.3 million in 2022, \$83.3 million in 2023, \$468.8 million in 2024 and \$1,044.4 million in 2025;

- cash payments for quarterly dividends on our common stock as approved by our Board of Directors;

- annual payments to satisfy employee withholding tax requirements resulting from certain restricted stock units becoming vested, which payments are dependent upon the price of our common stock at the time of vesting and the number of restricted stock units that vest, none of which is estimable at this time (payments in 2018 were not significant);

- our interest requirements, including interest on revolving loans (the principal amount of which will vary depending upon seasonal requirements) and term loans under our Credit Agreement, which bear fluctuating rates of interest, the

5½% Notes, the 4¾% Notes and the 3¼% Notes;

40

payments of approximately \$50 million to \$70 million for federal, state and foreign tax liabilities in 2019, which may increase annually thereafter; and

- payments for pension benefit plan contributions, which are not expected to be significant based on the fact that our domestic pension plans were more than 100 percent funded at December 31, 2018.

We believe that cash generated from operations and funds from borrowings available under our Credit Agreement will be sufficient to meet our expected operating needs, planned capital expenditures, debt service requirements (both principal and interest), tax obligations, pension benefit plan contributions, share repurchases required under our Amended and Restated 2004 Stock Incentive Plan and common stock dividends for the foreseeable future. We continue to evaluate acquisition opportunities in the consumer goods packaging market and may incur additional indebtedness, including indebtedness under our Credit Agreement, to finance any such acquisition.

Our Credit Agreement contains restrictive covenants that, among other things, limit our ability to incur debt, sell assets and engage in certain transactions. The indentures governing the 5½% Notes and the 4¾% Notes and the 3¼% Notes contain certain covenants that restrict our ability to create liens, engage in sale and leaseback transactions, issue guarantees and consolidate, merge or sell assets. We do not expect these limitations to have a material effect on our business or our results of operations. We are in compliance with all financial and operating covenants contained in our financing agreements and believe that we will continue to be in compliance during 2019 with all of these covenants. We continually evaluate cost reduction opportunities across each of our businesses, including rationalizations of our existing facilities through plant closings and downsizings. We use a disciplined approach to identify opportunities that generate attractive cash returns. Under our rationalization plans, we made cash payments of \$2.2 million, \$3.6 million and \$10.0 million in 2018, 2017 and 2016, respectively. Additional cash spending under our rationalization plans of approximately \$3.1 million is expected through 2023. You should also read Note 4 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report.

CONTRACTUAL OBLIGATIONS

Our contractual cash obligations at December 31, 2018 are provided below :

	Payment due by period				
	Total	Less than 1 year	1-3 years	3-5 years	More than 5 years
	(Dollars in millions)				
Long-term debt obligations	\$2,317.7	\$ 170.2	\$ 167.7	\$ 466.6	\$ 1,513.2
Interest on fixed rate debt	297.3	56.7	112.9	81.0	46.7
Interest on variable rate debt ⁽¹⁾	142.5	35.3	56.4	43.8	7.0
Operating lease obligations	200.9	41.7	64.2	40.6	54.4
Purchase obligations ⁽²⁾	30.2	30.2	—	—	—
Other postretirement benefit obligations ⁽³⁾	14.6	1.9	3.2	3.0	6.5
Total ⁽⁴⁾	\$3,003.2	\$ 336.0	\$ 404.4	\$ 635.0	\$ 1,627.8

These amounts represent expected cash payments of interest on our variable rate long-term debt under our Credit Agreement, after taking into consideration our interest rate swap agreements, at prevailing interest rates and foreign currency exchange rates at December 31, 2018.

(2) Purchase obligations represent commitments for capital expenditures of \$30.2 million. Obligations that are cancelable without penalty are excluded.

(3) Other postretirement benefit obligations have been actuarially determined through the year 2028.

(4) Based on current legislation and the current funded status of our domestic pension benefit plans, there are no significant minimum required contributions to our pension benefit plans in 2019.

At December 31, 2018, we also had outstanding letters of credit of \$18.2 million that were issued under our Credit Agreement.

You should also read Notes 9, 10, 11 and 12 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report.

OFF-BALANCE SHEET ARRANGEMENTS

We do not have any off-balance sheet arrangements.

EFFECT OF INFLATION AND INTEREST RATE FLUCTUATIONS

Historically, inflation has not had a material effect on us, other than to increase our cost of borrowing. In general, we have been able to increase the sales prices of our products to reflect any increases in the prices of raw materials (subject to contractual lag periods) and to significantly reduce the exposure of our results of operations to increases in other costs, such as labor and other manufacturing costs.

Because we have indebtedness which bears interest at floating rates, our financial results will be sensitive to changes in prevailing market rates of interest. As of December 31, 2018, we had \$2,317.7 million of indebtedness outstanding, of which \$947.5 million bore interest at floating rates. Historically, we have entered into interest rate swap agreements to mitigate the effect of interest rate fluctuations. During 2018, we entered into two U.S. dollar interest rate swap agreements, each for \$50.0 million notional principal amount, that are effective in 2019 and mature in 2023.

Depending upon future market conditions and our level of outstanding variable rate debt, we may enter into additional interest rate swap or hedge agreements (with counterparties that, in our judgment, have sufficient creditworthiness) to hedge our exposure against interest rate volatility.

CRITICAL ACCOUNTING POLICIES

U.S. generally accepted accounting principles require estimates and assumptions that affect the reported amounts in our consolidated financial statements and the accompanying notes. Some of these estimates and assumptions require difficult, subjective and/or complex judgments. Critical accounting policies cover accounting matters that are inherently uncertain because the future resolution of such matters is unknown. We believe that our accounting policies for pension expense and obligations, rationalization charges, income taxes and acquisition reserves and testing goodwill and other intangible assets with indefinite lives for impairment reflect the more significant judgments and estimates in our consolidated financial statements. You should also read our Consolidated Financial Statements for the year ended December 31, 2018 and the accompanying notes included elsewhere in this Annual Report.

Our pension expense and obligations are developed from actuarial valuations. Two critical assumptions in determining pension expense and obligations are the discount rate and expected long-term return on plan assets. We evaluate these assumptions at least annually. Other assumptions reflect demographic factors such as retirement, mortality and turnover and are evaluated periodically and updated to reflect our actual experience. Actual results may differ from actuarial assumptions. The discount rate represents the market rate for non-callable high-quality fixed income investments and is used to calculate the present value of the expected future cash flows for benefit obligations under our pension benefit plans. A decrease in the discount rate increases the present value of benefit obligations and increases pension expense, while an increase in the discount rate decreases the present value of benefit obligations and decreases pension expense. A 25 basis point change in the discount rate would have a countervailing impact on our annual pension expense by approximately \$2.2 million. For 2018, we increased our domestic discount rate to 4.5 percent from 3.8 percent to reflect market interest rate conditions. We consider the current and expected asset allocations of our pension benefit plans, as well as historical and expected long-term rates of return on those types of plan assets, in determining the expected long-term rate of return on plan assets. A 25 basis point change in the expected long-term rate of return on plan assets would have a countervailing impact on our annual pension expense by approximately \$1.8 million. Our expected long-term rate of return on plan assets will remain at 8.5 percent in 2019. Historically, we have maintained a strategy of acquiring businesses and enhancing profitability through productivity and cost reduction opportunities. Acquisitions require us to estimate the fair value of the assets acquired and liabilities assumed in the transactions. These estimates of fair value are based on market participant perspectives when available and our business plans for the acquired entities, which include eliminating operating redundancies, facility closings and rationalizations and assumptions as to the ultimate resolution of liabilities assumed. We also continually evaluate the operating performance of our existing facilities and our business requirements and, when deemed appropriate, we exit or rationalize existing operating facilities. Establishing reserves for acquisition plans and facility rationalizations requires the use of estimates. Although we believe that these estimates accurately reflect the costs of these plans, actual costs incurred may differ from these estimates.

Goodwill and other intangible assets with indefinite lives are reviewed for impairment each year and more frequently if circumstances indicate a possible impairment. Our tests for impairment require us to make assumptions regarding the expected earnings and cash flows of our reporting units. These assumptions are based on our internal forecasts. Developing these assumptions requires the use of significant judgment and estimates. Actual results may differ from these forecasts. If an impairment were to be identified, it could result in additional expense recorded in our consolidated statements of income.

On December 22, 2017, the 2017 Tax Act was signed into law, making significant changes to the Internal Revenue Code. Changes include, but are not limited to, a federal corporate tax rate decrease from 35 percent to 21 percent for tax years beginning after December 31, 2017, the transition of U.S international taxation from a worldwide to a territorial tax system and a one-time transition tax on the mandatory deemed repatriation of cumulative foreign earnings. We estimated our provision for income taxes for 2017 in accordance with the 2017 Tax Act and guidance available at the time and recorded \$110.9 million as an additional income tax benefit in the fourth quarter of 2017. This provisional amount was primarily related to the remeasurement of net deferred tax liabilities to reflect lower future cash tax obligations as a result of the reduction in the federal corporate tax rate under the 2017 Tax Act.

On December 22, 2017, Staff Accounting Bulletin No. 118, or SAB 118, was issued by the staff of the SEC to address the application of U.S. generally accepted accounting principles in situations when a registrant does not have the necessary information available, prepared or analyzed (including computations) in reasonable detail to complete the accounting for certain income tax effects of the 2017 Tax Act. In accordance with SAB 118, we had determined that the \$110.9 million deferred tax benefit recorded in the fourth quarter of 2017 primarily in connection with the remeasurement of net deferred tax liabilities and the computation of no tax expense to be recorded in connection with the transition tax on the mandatory deemed repatriation of cumulative foreign earnings were provisional amounts and a reasonable estimate at December 31, 2017.

As of December 31, 2018, we completed our accounting for all of the enactment date income tax effects of the 2017 Tax Act. During 2018, we recognized insignificant adjustments to the provisional amounts recorded at December 31, 2017 and included these adjustments as a component of income tax expense. The final amount of the income tax benefit from the enactment of the 2017 Tax Act was \$111.6 million, which related primarily to the remeasurement of deferred tax assets and liabilities. We did not incur any income tax expense due to the one-time transition tax on the mandatory deemed repatriation of cumulative foreign earnings.

NEW ACCOUNTING PRONOUNCEMENTS

In February 2016, the Financial Accounting Standards Board, or the FASB, issued an accounting standards update, or ASU, that amends existing guidance for certain leases by lessees. This amendment will require us to recognize assets and liabilities on the balance sheet for the rights and obligations created by long-term leases and to disclose additional quantitative and qualitative information about leasing arrangements. In addition, this amendment clarifies the presentation requirements of the effects of leases in the statement of income and statement of cash flows. We will adopt this amendment on January 1, 2019 using the transition method, which will allow us to recognize the effects of applying this amendment as a cumulative effect to retained earnings as of January 1, 2019, the impact of which is not expected to be material. We will elect certain practical expedients permitted under the transition guidance for this amendment, which, among other things, will not require us to reassess whether other contracts contain leases and will allow us to carryforward our lease classifications determined under the previous guidance. In addition, we will elect not to reassess our previously determined assumptions concerning options to extend or terminate our leases. We anticipate recognizing additional long-term assets and related lease liabilities ranging between \$160 million and \$180 million upon adoption of this amendment and do not expect that this amendment will have a material impact on our results of operations or cash flows.

FORWARD-LOOKING STATEMENTS

The statements we have made in “Risk Factors” and “Management’s Discussion and Analysis of Results of Operations and Financial Condition” and elsewhere in this Annual Report which are not historical facts are “forward-looking

statements” made pursuant to the safe harbor provisions of the Private Securities Litigation Reform Act of 1995 and the Securities Exchange Act of 1934, as amended, or the Exchange Act. These forward-looking statements are made based upon management’s expectations and beliefs concerning future events impacting us

and therefore involve a number of uncertainties and risks. Therefore, the actual results of our operations or our financial condition could differ materially from those expressed or implied in these forward-looking statements. The discussion in our “Risk Factors” and our “Management’s Discussion and Analysis of Results of Operations and Financial Condition” sections highlight some of the more important risks identified by our management, but should not be assumed to be the only factors that could affect future performance. Other factors that could cause the actual results of our operations or our financial condition to differ from those expressed or implied in these forward-looking statements include, but are not necessarily limited to, our ability to satisfy our obligations under our contracts; the impact of customer claims and disputes; compliance by our suppliers with the terms of our arrangements with them; changes in consumer preferences for different packaging products; changes in general economic conditions; the idling or loss of one or more of our significant manufacturing facilities; our ability to finance any increase in our net working capital in the event that our supply chain financing arrangements end; the adoption of, or changes in, new accounting standards or interpretations; changes in income tax provisions; and other factors described elsewhere in this Annual Report or in our other filings with the SEC.

Except to the extent required by the federal securities laws, we undertake no obligation to update or revise any forward-looking statements, whether as a result of new information, future events or otherwise. The foregoing review of factors pursuant to the Private Securities Litigation Reform Act of 1995 should not be construed as exhaustive or as any admission regarding the adequacy of our disclosures. Certain risk factors are detailed from time to time in our various public filings. You are advised, however, to consult any further disclosures we make on related subjects in our filings with the SEC.

You can identify forward-looking statements by the fact that they do not relate strictly to historic or current facts. Forward-looking statements use terms such as “anticipates,” “believes,” “continues,” “could,” “estimates,” “expects,” “intends,” “plans,” “potential,” “predicts,” “will,” “should,” “seeks,” “pro forma” or similar expressions in connection with any disclosure of future operating or financial performance. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks described under “Risk Factors,” that may cause our actual results of operations, financial condition, levels of activity, performance or achievements to be materially different from any future results of operations, financial condition, levels of activity, performance or achievements expressed or implied by such forward-looking statements. You should not place undue reliance on these forward-looking statements.

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK.

Market risks relating to our operations result primarily from changes in interest rates and, with respect to our international metal container and closures operations and our Canadian plastic container operations, from foreign currency exchange rates. In the normal course of business, we also have risk related to commodity price changes for items such as natural gas. We employ established policies and procedures to manage our exposure to these risks. Interest rate, foreign currency and commodity pricing transactions are used only to the extent considered necessary to meet our objectives. We do not utilize derivative financial instruments for trading or other speculative purposes.

INTEREST RATE RISK

Our interest rate risk management objective is to limit the impact of interest rate changes on our net income and cash flow. To achieve our objective, we regularly evaluate the amount of our variable rate debt as a percentage of our aggregate debt. At December 31, 2018, our outstanding variable rate debt was approximately 41 percent of our outstanding total debt, and we had no interest rate swap agreements outstanding. Over the course of the year, we also borrow revolving loans under our revolving loan facilities which bear interest at variable rates to fund our seasonal working capital needs. During 2018, our average outstanding variable rate debt was 50 percent of our average outstanding total debt. From time to time, we manage a portion of our exposure to interest rate fluctuations in our variable rate debt through interest rate swap agreements. During 2018, we entered into two U.S. dollar interest rate swap agreements, each for \$50.0 million notional principal amount, that are effective in 2019 and mature in 2023. These agreements effectively convert interest rate exposure from variable rates to fixed rates of interest. We entered into these agreements with banks under our Credit Agreement, and our obligations under these agreements were guaranteed and secured on a pari passu basis with our obligations under our Credit Agreement. Depending upon future market conditions and our level of outstanding variable rate debt, we may enter into additional interest rate swap or hedge agreements (with counterparties that, in our judgment, have sufficient creditworthiness) to hedge our exposure

against interest rate volatility. You should also read Notes 9 and 10 to our

44

Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report. Based on the average outstanding amount of our variable rate indebtedness in 2018, a one percentage point change in the interest rates for our variable rate indebtedness would have impacted our 2018 interest expense by an aggregate of approximately \$14.3 million.

FOREIGN CURRENCY EXCHANGE RATE RISK

Currently, we conduct a portion of our manufacturing and sales activity outside the United States, primarily in Europe. In an effort to minimize foreign currency exchange risk, we have financed our acquisitions of our European operations primarily with borrowings denominated in Euros. We also have operations in Canada, Mexico, Asia and South America that are not considered significant to our consolidated financial statements. Where available, we have borrowed funds in local currency or implemented certain internal hedging strategies to minimize our foreign currency risk related to foreign operations. In addition, we are exposed to gains and losses from limited transactions of our operations denominated in a currency other than the functional currency of such operations. We are also exposed to possible losses in the event of a currency devaluation in any of the foreign countries where we have operations. We generally do not utilize external derivative financial instruments to manage our foreign currency risk. You should also read Note 10 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report.

COMMODITY PRICING RISK

We purchase raw materials for our products such as metal and resins. These raw materials are generally purchased pursuant to contracts or at market prices established with the vendor. In general, we do not engage in hedging activities for these raw materials due to our ability to pass on price changes to our customers.

We also purchase commodities, such as natural gas and electricity, and are subject to risks on the pricing of these commodities. In general, we purchase these commodities pursuant to contracts or at market prices. We manage a portion of our exposure to natural gas price fluctuations through natural gas swap agreements. These agreements effectively convert pricing exposure for natural gas from market pricing to a fixed price. The total fair value of our natural gas swap agreements in effect at December 31, 2018 and 2017 and during such years was not significant. You should also read Note 10 to our Consolidated Financial Statements for the year ended December 31, 2018 included elsewhere in this Annual Report.

ITEM 8. FINANCIAL STATEMENTS AND SUPPLEMENTARY DATA.

We refer you to Item 15, “Exhibits and Financial Statement Schedules,” below for a listing of financial statements and schedules included in this Annual Report, which are incorporated here in this Annual Report by this reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE.

Not applicable.

ITEM 9A. CONTROLS AND PROCEDURES.

DISCLOSURE CONTROLS AND PROCEDURES

As required by Rule 13a-15(e) of the Exchange Act, we carried out an evaluation, under the supervision and with the participation of management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of our disclosure controls and procedures. Based upon that evaluation, as of the end of the period covered by this Annual Report, our Chief Executive Officer and Chief Financial Officer concluded that the disclosure controls and procedures were effective to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms, and that our disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports we file or submit under the Exchange Act is accumulated and communicated to our management, including the Principal Executive Officer and the Principal Financial Officer, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure.

There were no changes in our internal controls over financial reporting during the period covered by this Annual Report that have materially affected, or are reasonably likely to materially affect, these internal controls.

MANAGEMENT’S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING

Our management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control over financial reporting is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements in accordance with generally accepted accounting principles. Because of inherent limitations, internal control over financial reporting may not prevent or detect misstatements.

Management assessed the effectiveness of our internal control over financial reporting as of December 31, 2018. In making this assessment, management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control—Integrated Framework (2013 Framework). Based on this assessment and those criteria, management believes that we maintained effective internal control over financial reporting as of December 31, 2018.

The effectiveness of our internal control over financial reporting as of December 31, 2018 has been audited by Ernst & Young LLP, our independent registered public accounting firm, and Ernst & Young LLP has issued an attestation report on our internal control over financial reporting which is provided below.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM
TO THE BOARD OF DIRECTORS AND STOCKHOLDERS OF SILGAN HOLDINGS INC.
OPINION ON INTERNAL CONTROL OVER FINANCIAL REPORTING

We have audited Silgan Holdings Inc.'s internal control over financial reporting as of December 31, 2018, based on criteria established in Internal Control—Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (2013 framework) (the COSO criteria). In our opinion, Silgan Holdings Inc. (the Company) maintained, in all material respects, effective internal control over financial reporting as of December 31, 2018, based on the COSO criteria.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States) (PCAOB), the 2018 consolidated financial statements of the Company and our report dated February 28, 2019 expressed an unqualified opinion thereon.

BASIS FOR OPINION

The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control Over Financial Reporting. Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit. We are a public accounting firm registered with the PCAOB and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB. We conducted our audit in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects.

Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

DEFINITION AND LIMITATIONS OF INTERNAL CONTROL OVER FINANCIAL REPORTING

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.
