Table of Contents

MERIT MEDICAL SYSTEMS, INC. AND SUBSIDIARIES
 CONDENSED NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 (Unaudited)

1. Basis of Presentation. The interim consolidated financial statements of Merit Medical Systems, Inc. ("Merit," "we" or "us") for the three and six months ended June 30, 2013 and 2012 are not audited. Our consolidated financial statements are prepared in accordance with the requirements for unaudited interim periods, and consequently, do not include all disclosures required to be made in conformity with accounting principles generally accepted in the United States of America. In the opinion of management, the accompanying consolidated financial statements contain all adjustments, consisting of normal recurring accruals, necessary for a fair presentation of our financial position as of June 30, 2013, and our results of operations and cash flows for the three and six-month periods ended June 30, 2013 and 2012. The results of operations for the three and six-month periods ended June 30, 2013 are not necessarily indicative of the results for a full-year period. These interim consolidated financial statements should be read in conjunction with the financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2012 filed with the Securities and Exchange Commission (the "SEC").

2. Inventories. Inventories are stated at the lower of cost or market. Inventories at June 30, 2013 and December 31, 2012, consisted of the following (in thousands):

	June 30, 2013	December 31, 2012
Finished goods	\$38,717	\$48,233
Work-in-process	10,520	6,051
Raw materials	32,323	30,315
Total	\$81,560	\$84,599

3. Stock-based Compensation. Stock-based compensation expense before income taxes for the three and six-month periods ended June 30, 2013 and 2012 consisted of the following (in thousands):

	Three Months Ended June 30,		Six Months Ended June 30,	
	2013	2012	2013	2012
Cost of goods sold	\$26	\$59	\$80	\$141
Research and development	24	35	49	67
Selling, general, and administrative	274	376	654	817
Stock-based compensation expense before income taxes	\$324	\$470	\$783	\$1,025

As of June 30, 2013, the total remaining unrecognized compensation cost related to non-vested stock options, net of expected forfeitures, was approximately \$4.4 million and is expected to be recognized over a weighted average period of 3.4 years.

During the three and six-month periods ended June 30, 2013, we granted awards representing 125,000 and 175,000 shares, respectively, of our common stock. During the three and six-month periods ended June 30, 2012, we granted awards representing 120,000 shares of common stock. We use the Black-Scholes methodology to value the stock-based compensation expense for options. In applying the Black-Scholes methodology to our outstanding option grants, we used the following assumptions:

Six Months Ended

Edgar Filing: MERIT MEDICAL SYSTEMS INC - Form 10-Q

	June 30, 2013	2012
Risk-free interest rate	0.65% - 1.16%	0.95%
Expected option life	4.2 - 6.0 years	6.0 years
Expected dividend yield	—	—
Expected price volatility	40.20% - 41.67%	42.01%

For purposes of the foregoing analysis, the average risk-free interest rate is determined using the U.S. Treasury rate in effect as of the date of grant, based on the expected term of the stock option. The expected term of the stock options is determined using

7

Table of Contents

the historical exercise behavior of employees. The expected price volatility is determined using a weighted average of daily historical volatility of our stock price over the corresponding expected option life and implied volatility based on recent trends of the daily historical volatility. For options with a vesting period, compensation expense is recognized on a straight-line basis over the service period, which corresponds to the vesting period.

4. Earnings Per Common Share (EPS). The computation of weighted average shares outstanding and the basic and diluted earnings per common share for the following periods consisted of the following (in thousands, except per share amounts):

	Three Months			Six Months		
	Net Income	Shares	Per Share Amount	Net Income	Shares	Per Share Amount
Period ended June 30, 2013						
Basic EPS	\$3,752	42,562	\$0.09	\$4,423	42,541	\$0.10
Effect of dilutive stock options and warrants		108			212	
Diluted EPS	\$3,752	42,670	\$0.09	\$4,423	42,753	\$0.10
Stock options excluded from the calculation of common stock equivalents as the impact was anti-dilutive		2,821			2,258	
Period ended June 30, 2012						
Basic EPS	\$6,095	42,048	\$0.14	\$11,843	42,028	\$0.28
Effect of dilutive stock options and warrants		421			429	
Diluted EPS	\$6,095	42,469	\$0.14	\$11,843	42,457	\$0.28
Stock options excluded from the calculation of common stock equivalents as the impact was anti-dilutive		1,658			1,641	

5. Acquisitions. On December 19, 2012, we consummated the transactions contemplated by a Stock Purchase Agreement with Vital Signs, Inc., an affiliate of GE Healthcare (“Vital Signs”), as seller, and purchased all of the issued and outstanding shares of Thomas Medical Products, Inc. (“Thomas Medical”), a Pennsylvania corporation. The primary assets of Thomas Medical are patents, trademarks, other intellectual property and business assets related to introducers, hemostatic valves and sheaths. Using the Thomas Medical splittable hemostatic introducer sheath as an entry product, we intend to develop a portfolio of premium accessories for electrophysiology physicians. We accounted for this acquisition as a business combination. We made an initial payment of \$167.0 million to Vital Signs in December 2012. We also accrued an additional \$445,000 at December 31, 2012, related to a final payment made to Vital Signs in February 2013 for net working capital received in excess of the target net working capital specified. The results of operations related to this acquisition have been included in our cardiovascular segment since the acquisition date. Our consolidated financial statements for the year ended December 31, 2012 include approximately \$1.9 million and \$51,000 of net sales and income before tax, respectively, related to the Thomas Medical acquisition. The total purchase price was preliminarily allocated as follows (in thousands); however, the preliminary allocation is subject to adjustment as we continue to evaluate new information obtained about facts and circumstances that existed as of the acquisition date that, if known, would have affected the measurement amounts recognized as of the acquisition date:

Table of Contents

Assets Acquired	
Trade receivables	\$6,507
Inventories	5,459
Prepaid expenses	340
Property and equipment	2,685
Intangibles	
Developed technology	43,000
Non-compete agreements	500
Customer lists	5,000
Trademarks	1,400
Goodwill	102,407
Total assets acquired	167,298
Liabilities Assumed	
Trade payables	588
Accrued expenses	1,094
Total liabilities assumed	1,682
Net assets acquired, net of cash acquired of \$1,829	\$165,616

The gross amount of trade receivables we acquired in the Thomas Medical transaction was approximately \$6.5 million, of which \$34,000 was expected to be uncollectible at the acquisition date. With respect to the Thomas Medical assets, we intend to amortize developed technology over eight years, customer lists on an accelerated basis over 12 years, and non-compete agreements over three years. While U.S. trademarks can be renewed indefinitely, we currently estimate that we will generate cash flow from the acquired trademarks for a period of 15 years from the acquisition date. The total weighted-average amortization period for these acquired intangible assets is 8.55 years.

In connection with our Thomas Medical acquisition, we paid approximately \$3.7 million in long-term debt issuance costs to Wells Fargo Bank related to our Credit Agreement (see Note 9). These costs consisted primarily of loan origination fees and related legal costs that we intend to amortize over five years, which is the contract term of our Credit Agreement. We also incurred approximately \$27,000 and \$494,000 of acquisition-related costs during the three and six months ended June 30, 2013, respectively, and \$2.7 million for the year ended December 31, 2012, which are included in selling, general and administrative expenses in the accompanying consolidated statements of operations.

On November 19, 2012, we entered into an Asset Purchase Agreement with Janin Group, Inc. (dba MediGroup) ("MediGroup"), an Illinois corporation, to purchase substantially all of the assets of MediGroup. The primary assets of MediGroup are the patented Flex-Neck® Peritoneal Dialysis Catheters and Y-TEC™ Peritoneal Dialysis Implantation Kits. We accounted for this acquisition as a business combination. We made an initial payment to MediGroup of approximately \$4.0 million in November 2012. In addition, we are obligated to make contingent payments of up to \$150,000 per year during 2013, 2014 and 2015. Furthermore, we are obligated to make contingent purchase price payments of \$150,000 per year in 2016 through 2022 if net sales of Medigroup products increase at least 8% in each subsequent year. If net sales of MediGroup products have not increased by the percentage set forth in any year, our obligation to make these contingent payments shall cease. The acquisition-date fair value of the contingent consideration liability of approximately \$403,000 has been included as part of the purchase consideration. Acquisition-related costs during the year ended December 31, 2012, which are included in selling, general, and administrative expenses in the consolidated statements of income included in our Annual Report on Form 10-K for the year ended December 31, 2012, filed with the SEC on March 1, 2013 (the "2012 Form 10-K"), were not material. The results of operations related to this acquisition have been included in our cardiovascular segment since the acquisition date. During the year ended December 31, 2012, our net sales of MediGroup products were approximately \$169,000.

It is not practical to separately report the earnings related to the MediGroup acquisition, as we cannot split out sales costs related to MediGroup products, principally because our sales representatives are selling multiple products (including MediGroup products) in the cardiovascular business segment. The total purchase price, which includes the contingent consideration liability described above, was preliminarily allocated as follows (in thousands):

9

Table of Contents

Assets Acquired	
Inventories	\$263
Property and equipment	79
Intangibles	
Developed technology	2,000
Non-compete agreements	210
Customer lists	110
Trademarks	80
Goodwill	1,697
 Total assets acquired	 \$4,439

With respect to the MediGroup assets, we intend to amortize developed technology over eight years, customer lists on an accelerated basis over eight years, and non-compete agreements over seven years. While U.S. trademarks can be renewed indefinitely, we currently estimate that we will generate cash flow from the acquired trademarks for a period of 15 years from the acquisition date. The total weighted-average amortization period for these acquired intangible assets is 8.15 years.

On January 31, 2012, we consummated the transactions contemplated by an Asset Purchase Agreement with Ostial Solutions, LLC ("Ostial"), a Michigan limited liability company, to purchase substantially all of the assets of Ostial. The primary asset of Ostial is the patented Ostial PRO Stent Positioning System, which is designed to facilitate precise stent implantation in coronary and renal aorto-ostial lesions. We accounted for this acquisition as a business combination. We made an initial payment of \$10.0 million to Ostial in January 2012 and an additional payment of \$6.5 million to Ostial in August 2012. In addition, we are obligated to make contingent purchase price payments of up to \$13.5 million based on a percentage of future sales of products utilizing the Ostial PRO Stent Positioning System. The acquisition-date fair value of this contingent consideration liability of \$4.3 million has been included as part of the purchase consideration and was determined using a discounted cash flow model based upon the expected timing and amount of these future contingent payments. Acquisition-related costs during the year ended December 31, 2012, which are included in selling, general, and administrative expenses in the consolidated statements of income included in our 2012 Form 10-K, were not material. The results of operations related to this acquisition have been included in our cardiovascular segment since the acquisition date. During the year ended December 31, 2012, our net sales of products utilizing the Ostial PRO Stent Positioning System were approximately \$457,000. It is not practical to separately report the earnings related to the Ostial acquisition, as we cannot split out sales costs related to Ostial products, principally because our sales representatives are selling multiple products (including Ostial products) in the cardiovascular business segment. The total purchase price, which includes the contingent consideration liability described above, was allocated as follows (in thousands):

Assets Acquired	
Intangibles	
Developed technology	\$10,500
Customer lists	600
Trademark	110
Non-compete agreements	10
Goodwill	9,580
 Total assets acquired	 \$20,800

With respect to the Ostial assets, we intend to amortize developed technology over 15 years, customer lists on an accelerated basis over eight years, and non-compete agreements over five years. While U.S. trademarks can be

renewed indefinitely, we currently estimate that we will generate cash flow from the acquired trademarks for a period of 15 years from the acquisition date. The total weighted-average amortization period for these acquired intangible assets is 14.6 years.

The following table summarizes our unaudited consolidated results of operations for the three and six-month periods ended June 30, 2012, as well as unaudited pro forma consolidated results of operations as though the Thomas Medical and MediGroup acquisitions had occurred on January 1, 2012 (in thousands, except per common share amounts):

Table of Contents

	Three Months Ended		Six Months Ended	
	June 30, 2012		June 30, 2012	
	As Reported	Pro Forma	As Reported	Pro Forma
Net sales	\$ 100,532	\$ 110,227	\$ 196,150	\$ 214,242
Net income	6,095	7,028	11,843	13,303
Earnings per common share:				
Basic	\$ 0.14	\$ 0.17	\$ 0.28	\$ 0.32
Diluted	\$ 0.14	\$ 0.17	\$ 0.28	\$ 0.31

The unaudited pro forma information set forth above is for informational purposes only and includes adjustments related to amortization expense related to acquired intangible assets and interest expense on long-term debt. The pro forma information should not be considered indicative of actual results that would have been achieved if Thomas Medical and the MediGroup assets had been acquired at the beginning of 2012 or results that may be obtained in any future period. The pro forma consolidated results of operations do not include the Ostial acquisition, as we do not deem the pro forma effect of that transaction to be material.

On December 15, 2011, we acquired the intellectual property rights to certain support guide catheter technology. We made an initial payment of \$2.0 million in December 2011 and a payment of \$1.0 million in May 2012 based on a certain obligation set forth in the acquisition agreement having been met. In January 2013, we made a payment of \$1.0 million based on a milestone set forth in the acquisition agreement related to the clearance of the support guide catheter with the U.S. Food and Drug Administration under Section 510(k) of the U.S. Food Drug and Cosmetic Act.

The goodwill arising from the acquisitions discussed above consists largely of the synergies and economies of scale we hope to achieve from combining the acquired assets and operations with our historical operations (see Note 12). The goodwill recognized from these acquisitions is expected to be deductible for income tax purposes.

6. Segment Reporting. We report our operations in two operating segments: cardiovascular and endoscopy. Our cardiovascular segment consists of cardiology and radiology medical device products which assist in diagnosing and treating coronary artery disease, peripheral vascular disease and other non-vascular diseases and includes our embolotherapeutic products. Our endoscopy segment consists of gastroenterology and pulmonary medical device products which assist in the palliative treatment of expanding esophageal, tracheobronchial and biliary strictures caused by malignant tumors. We evaluate the performance of our operating segments based on operating income (loss). Financial information relating to our reportable operating segments and reconciliations to the consolidated totals is as follows (in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Revenues				
Cardiovascular	\$ 105,953	\$ 96,560	\$ 205,707	\$ 188,230
Endoscopy	3,922	3,972	8,116	7,920
Total revenues	109,875	100,532	213,823	196,150
Operating income (loss)				
Cardiovascular	6,649	8,499	8,277	16,836
Endoscopy	131	(277)) 260	(607)
Total operating income	\$ 6,780	\$ 8,222	\$ 8,537	\$ 16,229

7. Recent Accounting Pronouncements. In February 2013, the Financial Accounting Standards Board (“FASB”) issued amendments to disclosure requirements for presentation of comprehensive income. The standard requires presentation

(either in a single note or parenthetically on the face of the financial statements) of the effect of significant amounts reclassified from each component of accumulated other comprehensive income based on its source and the income statement line items affected by the reclassification. If a component is not required to be reclassified to net income in its entirety, a cross reference to the related footnote for additional information is required. The amendments are effective prospectively for reporting periods beginning after December 15, 2012. The adoption of this guidance did not have a material effect on our consolidated financial statements.

In March 2013, the FASB issued amendments to address the accounting for the cumulative translation adjustment when a parent either sells a part or all of its investment in a foreign entity or no longer holds a controlling financial interest in a subsidiary or

Table of Contents

group of assets that is a nonprofit activity or a business within a foreign entity. The amendments are effective prospectively for fiscal years (and interim reporting periods within those years) beginning after December 15, 2013 (early adoption is permitted). The adoption of this guidance is not expected to have a material effect on our consolidated financial position or results of operations.

In July 2012, the FASB issued authoritative guidance related to testing indefinite-lived intangible assets for impairment. This guidance simplifies how entities test indefinite-lived intangible assets for impairment and permits an entity to first assess qualitative factors to determine whether it is more likely than not that the indefinite-lived intangible asset is impaired. This guidance is effective for annual and interim impairment tests performed for fiscal years beginning after September 15, 2012, with early adoption permitted. The adoption of this guidance did not have a material effect on our consolidated financial statements.

8. Income Taxes. Our overall effective tax rate for the three months ended June 30, 2013 was 25.0%, compared to 30.8% for the corresponding period of 2012. For the six months ended June 30, 2013, our effective tax rate was 15.2%, compared to 29.2% for the corresponding period of 2012. The effective income tax rates for the three and six-month periods ended June 30, 2013, when compared to the corresponding periods of 2012, were lower as a result of a higher mix of earnings from our foreign operations, which are taxed at a lower rate than our U.S. operations. In addition, the effective tax rate for the six months ended June 30, 2013 was lower than the corresponding prior year period due to the reinstatement of the federal research and development credit for the 2012 tax year. The credit was reinstated by the American Taxpayer Relief Act of 2012, which was signed on January 2, 2013. We recognized the federal research and development credit as a discrete benefit in the first quarter of 2013, the period in which the reinstatement was enacted.

9. Long-Term Debt. We entered into an Amended and Restated Credit Agreement, dated as of December 19, 2012 (the "Credit Agreement"), with the lenders who are or may become party thereto (the "Lenders") and Wells Fargo Bank, National Association ("Wells Fargo"), as administrative agent for the Lenders. Pursuant to the terms of the Credit Agreement, the Lenders have agreed to make revolving credit loans up to an aggregate amount of \$175 million. The Lenders also made a term loan in the amount of \$100 million, repayable in quarterly installments of \$2.5 million until the maturity date of December 19, 2017, at which time the term loan and revolving credit loans, together with accrued interest thereon, will be due and payable. In addition, certain mandatory prepayments are required to be made upon the occurrence of certain events described in the Credit Agreement. Wells Fargo has agreed to make swingline loans from time to time through the maturity date of December 19, 2017 in amounts equal to the difference between the amounts actually loaned by the Lenders and the aggregate revolving credit commitment. The Credit Agreement is collateralized by substantially all of our assets. As of June 30, 2013, Wells Fargo was the sole Lender under the Credit Agreement.

On December 19, 2017, all principal, interest and other amounts outstanding under the Credit Agreement are payable in full. At any time prior to the maturity date, we may repay any amounts owing under all revolving credit loans, term loans, and all swingline loans in whole or in part, subject to certain minimum thresholds, without premium or penalty, other than breakage costs.

The term loan and any revolving credit loans made under the Credit Agreement bear interest, at our election, at either (i) the base rate (described below) plus 0.25% (subject to adjustment if the Consolidated Total Leverage Ratio, as defined in the Credit Agreement, is at or greater than 2.25% to 1), (ii) the London Inter-Bank Offered Rate ("LIBOR") Market Index Rate (as defined in the Credit Agreement) plus 1.25% (subject to adjustment if the Consolidated Total Leverage Ratio, as defined in the Credit Agreement, is at or greater than 2.25% to 1), or (iii) the LIBOR Rate (as defined in the Credit Agreement) plus 1.25% (subject to adjustment if the Consolidated Total Leverage Ratio, as defined in the Credit Agreement, is at or greater than 2.25% to 1). Currently, the term loan and revolving credit loans under the Credit Agreement bear interest, at our election, at either (x) the base rate plus 1.25%, (y) the LIBOR Market

Index Rate, plus 2.25%, or (z) the LIBOR Rate plus 2.25%. Swingline loans bear interest at the LIBOR Market Index Rate plus 1.25% (subject to adjustment if the Consolidated Total Leverage Ratio, as defined in the Credit Agreement, is at or greater than 2.25% to 1). Currently, swingline loans bear interest at the LIBOR Market Index Rate plus 2.25%. Interest on each loan featuring the base rate or the LIBOR Market Index Rate is due and payable on the last business day of each calendar month; interest on each loan featuring the LIBOR Rate is due and payable on the last day of each interest period selected by us when selecting the LIBOR Rate as the benchmark for interest calculation. For purposes of the Credit Agreement, the base rate means the highest of (i) the prime rate (as announced by Wells Fargo), (ii) the federal funds rate plus 0.50%, and (iii) LIBOR for an interest period of one month plus 1.00%. Our obligations under the Credit Agreement and all loans made thereunder are fully secured by a security interest in our assets pursuant to a separate collateral agreement entered into in conjunction with the Credit Agreement.

The Credit Agreement contains customary covenants, representations and warranties and other terms customary for revolving credit loans of this nature. In this regard, the Credit Agreement requires us to not, among other things, (a) permit the Consolidated Total Leverage Ratio (as defined in the Credit Agreement) to be greater than 3.5 to 1 as of any fiscal quarter ending during 2013, greater than 3.35 to 1 as of any fiscal quarter ending during 2014, greater than 3 to 1 as of any fiscal quarter ending during 2015, greater than 2.75 to 1 as of any fiscal quarter ending during 2016, and greater than 2.5 to 1 as of any fiscal quarter ending thereafter; (b) for any period of four consecutive fiscal quarters, permit the ratio of Consolidated EBITDA (as defined in the Credit Agreement

Table of Contents

and subject to certain adjustments) to Consolidated Fixed Charges (as defined in the Credit Agreement) to be less than 1.75 to 1; (c) subject to certain adjustments, permit Consolidated Net Income (as defined in the Credit Agreement) for certain periods to be less than \$0; or (d) subject to certain conditions and adjustments, permit the aggregate amount of all Facility Capital Expenditures (as defined in the Credit Agreement) in any fiscal year beginning in 2013 to exceed \$30 million. Additionally, the Credit Agreement contains various negative covenants with which we must comply, including, but not limited to, limitations respecting: the incurrence of indebtedness, the creation of liens or pledges on our assets, mergers or similar combinations or liquidations, asset dispositions, the repurchase or redemption of equity interests and debt, the issuance of equity, the payment of dividends and certain distributions, the entrance into related party transactions and other provisions customary in similar types of agreements. As of June 30, 2013, we failed to comply with the Consolidated Total Leverage Ratio under our Credit Agreement (the "Leverage Covenant"), as our actual ratio was 3.97 to 1; however, Wells Fargo subsequently granted to us a waiver with respect to the Leverage Covenant as of June 30, 2013. With the exception of our failure to comply with the Leverage Covenant as of June 30, 2013, which failure has been waived by Wells Fargo, we were in compliance with all other covenants under the Credit Agreement as of June 30, 2013.

We had originally entered into an unsecured credit agreement, dated September 30, 2010, with certain lenders who were or became party thereto and Wells Fargo, as administrative agent for the lenders. Pursuant to the terms of that credit agreement, the lenders agreed to make revolving credit loans up to an aggregate amount of \$125 million. Wells Fargo also agreed to make swingline loans from time to time through the maturity date of September 10, 2015 in amounts equal to the difference between the amount actually loaned by the lenders and the aggregate credit agreement. The unsecured credit agreement was amended and restated as of December 19, 2012, as the Credit Agreement.

In summary, principal balances under our long-term debt as of June 30, 2013 and December 31, 2012, consisted of the following (in thousands):

	June 30, 2013	December 31, 2012
Term loan	\$97,500	\$100,000
Revolving credit loans	159,328	137,566
Total long-term debt	256,828	237,566
Less current portion	10,000	10,000
Long-term portion	\$246,828	\$227,566

Future minimum principal payments on our long-term debt as of June 30, 2013, were as follows (in thousands):

Years Ending	Future Minimum Principal Payments
December 31	
Remaining 2013	\$7,500
2014	10,000
2015	10,000
2016	10,000
2017	219,328
Total future minimum principal payments	\$256,828

As of June 30, 2013, we had available borrowings under the Credit Agreement of approximately \$15.7 million. Our interest rate under the Credit Agreement as of June 30, 2013 was a fixed rate of 3.23% on \$150.0 million as a result of an interest rate swap, a variable floating rate of 2.45% on \$97.5 million and a variable floating rate of 2.49% on approximately \$9.3 million. Our interest rate as of December 31, 2012 was a fixed rate of 2.98% on \$150.0 million, a

fixed rate of 2.22% on \$87.0 million and a variable floating rate of 2.31% on approximately \$566,000.

10. Derivatives.

Interest Rate Swap. On December 19, 2012, we entered into a \$150.0 million pay-fixed, receive-variable interest rate swap with Wells Fargo to fix the one-month LIBOR rate at 0.98%. The variable portion of the interest rate swap is tied to the one-month LIBOR rate (the benchmark interest rate for the Credit Agreement). The interest rates under both the interest rate swap and the underlying debt are reset, the swap is settled with the counterparty, and interest is paid, on a monthly basis. The interest rate swap is scheduled to expire on December 19, 2017. As of June 30, 2013, this interest rate swap qualified as a cash flow hedge. During the three and six-month periods ended June 30, 2013, the amount reclassified from accumulated other comprehensive income to

Table of Contents

earnings due to hedge effectiveness was not material. The fair value of our cash flow hedge at June 30, 2013 was an asset of approximately \$1.5 million, which was offset by approximately \$570,000 of deferred tax liability.

Foreign Currency Forward Contracts. On May 31, 2013, we forecasted a net exposure for June 30, 2013 (representing the difference between Euro and GBP-denominated receivables and Euro-denominated payables) of approximately 23,000 Euros and 155,000 GBPs. In order to partially offset such risks at May 31, 2013, we entered into a 30-day forward contract for the Euro and GBP with a notional amount of approximately 23,000 Euros and notional amount of 155,000 GBPs. We enter into similar transactions at various times to partially offset exchange rate risks we bear. These contracts are marked to market at each month-end. The effect on our consolidated statements of income for the three and six-month periods ended June 30, 2013 and 2012 of all forward contracts, and the fair value of our open positions as of June 30, 2013, were not material.

11. Fair Value Measurements. Our financial liabilities carried at fair value measured on a recurring basis as of June 30, 2013 and December 31, 2012, consisted of the following (in thousands):

Description	Total Fair Value at June 30, 2013	Fair Value Measurements Using		
		Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant Unobservable inputs (Level 3)
Interest rate swap (1)	\$1,466	\$—	\$1,466	\$ —

Description	Total Fair Value at December 31, 2012	Fair Value Measurements Using		
		Quoted prices in active markets (Level 1)	Significant other observable inputs (Level 2)	Significant Unobservable inputs (Level 3)
Interest rate swap (1)	\$(1,788)	\$—	\$(1,788)	\$ —

(1) The fair value of the interest rate swap is determined based on forward yield curves.

Certain of our business combinations involve the potential for the payment of future contingent consideration, generally based on a percentage of future product sales or upon attaining specified future revenue milestones. See Note 5 for further information regarding these acquisitions. The contingent consideration liability is re-measured at the estimated fair value at each reporting period with the change in fair value recognized within selling, general, and administrative expenses in the accompanying consolidated statements of income. We measure the initial liability and re-measure the liability on a recurring basis using Level 3 inputs as defined under authoritative guidance for fair value measurements. Changes in the fair value of our contingent liability during the three and six-month periods ended June 30, 2013, were as follows (in thousands):

	Three Months Ended June 30, 2013	Six Months Ended June 30, 2013
Beginning balance	\$6,694	\$6,697
Fair value adjustments recorded to expense during the period	17	33
Contingent payments made	(19)	(38)

Ending balance	\$6,692	\$6,692
----------------	---------	---------

14

Table of Contents

The recurring Level 3 measurement of our contingent consideration liability includes the following significant unobservable inputs (amount in thousands):

Contingent consideration liability	Fair value at June 30, 2013	Valuation technique	Unobservable inputs	Range
Revenue-based payments	\$6,361	Discounted Cash Flow	Discount rate	10.0% - 14.0%
			Probability of milestone payment	90%
			Projected year of payments	2013-2028
Other payments	331	Discounted cash flow	Discount rate	5.4%
			Probability of milestone payment	100%
			Projected year of payments	2013-2015

The contingent consideration liability is re-measured to fair value each reporting period using projected revenues, discount rates, probabilities of payment, and projected payment dates. Projected contingent payment amounts are discounted back to the current period using a discounted cash flow model. Projected revenues are based on our most recent internal operational budgets and long-range strategic plans. Increases (decreases) in discount rates and the time to payment may result in lower (higher) fair value measurements. A decrease in the probability of any milestone payment may result in lower fair value measurements. An increase (decrease) in either the discount rate or the time to payment, in isolation, may result in a significantly lower (higher) fair value measurement.

Our determination of the fair value of the contingent consideration liability could change in future periods based upon our ongoing evaluation of these significant unobservable inputs. We intend to record any such change in fair value to selling, general, and administrative expenses in our consolidated statements of income. As of June 30, 2013, approximately \$6.2 million was reflected in other long-term obligations and \$480,000 was reflected in accrued expenses in our consolidated balance sheet. As of December 31, 2012, approximately \$5.9 million was reflected in other long-term obligations and \$723,000 was reflected in accrued expenses in our consolidated balance sheet. The cash paid to settle the contingent consideration liability recognized at fair value as of the acquisition date (including measurement-period adjustments) has been reflected as a cash outflow from financing activities in the accompanying consolidated statements of cash flows.

During both the three and six-month periods ended June 30, 2013, we had losses of approximately \$2,000 and \$53,000, respectively, compared to \$10,000 for the corresponding three and six-month periods ended June 30, 2012, related to the measurement of non-financial assets at fair value on a non-recurring basis subsequent to their initial recognition.

The carrying amount of cash and cash equivalents, trade receivables, and trade payables approximates fair value because of the immediate, short-term maturity of these financial instruments. The carrying amount of long-term debt approximates fair value, as determined by borrowing rates estimated to be available to us for debt with similar terms and conditions. The fair value of assets and liabilities whose carrying value approximates fair value is determined using Level 2 inputs, with the exception of cash and cash equivalents (Level 1).

Table of Contents

12. Goodwill and Intangible Assets. There were no changes in the carrying amount of goodwill for the six months ended June 30, 2013.

Other intangible assets at June 30, 2013 and December 31, 2012, consisted of the following (in thousands):

	June 30, 2013		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Patents	\$8,451	\$(2,249)) \$6,202
Distribution agreement	5,176	(1,540)) 3,636
License agreements	2,733	(1,057)) 1,676
Trademark	7,305	(1,598)) 5,707
Covenant not to compete	1,035	(279)) 756
Customer lists	20,460	(9,483)) 10,977
Royalty agreements	267	(267)) —
Total	\$45,427	\$(16,473)) \$28,954

	December 31, 2012		
	Gross Carrying Amount	Accumulated Amortization	Net Carrying Amount
Patents	\$7,843	\$(2,045)) \$5,798
Distribution agreement	5,176	(1,301)) 3,875
License agreements	2,733	(861)) 1,872
Trademark	7,311	(1,362)) 5,949
Covenant not to compete	1,035	(160)) 875
Customer lists	20,468	(8,038)) 12,430
Royalty agreements	267	(267)) —
Total	\$44,833	\$(14,034)) \$30,799

Aggregate amortization expense was approximately \$3.5 million and \$7.0 million for the three and six-month periods ended June 30, 2013, respectively, and approximately \$1.9 million and \$3.8 million for the three and six-month periods ended June 30, 2012, respectively.

Estimated amortization expense for intangible assets for the next five years consisted of the following as of June 30, 2013 (in thousands):

Year Ending December 31	
Remaining 2013	\$6,952
2014	13,291
2015	12,747
2016	12,126
2017	11,763

13. Commitments and Contingencies.

Litigation. In the ordinary course of business, we are involved in various claims and litigation matters. These claims and litigation matters may include actions involving product liability, intellectual property, contractual disputes and

employment matters. We do not believe that any such actions are likely to be, individually or in the aggregate, material to our business, financial condition, results of operations or liquidity. However, in the event of unexpected further developments, it is possible that the ultimate resolution of these matters, or other similar matters, if unfavorable, may be materially adverse to our business, financial condition, results

Table of Contents

of operations or liquidity. Legal costs for these matters, such as outside counsel fees and expenses, are charged to expense in the period incurred.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

Disclosure Regarding Forward-Looking Statements

This Report includes “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). All statements in this Report, other than statements of historical fact, are forward-looking statements for purposes of these provisions, including any projections of earnings, revenues or other financial items, any statements of the plans and objectives of our management for future operations, any statements concerning proposed new products or services, any statements regarding the integration, development or commercialization of the business or assets acquired from other parties, any statements regarding future economic conditions or performance, and any statements of assumptions underlying any of the foregoing. All forward-looking statements included in this Report are made as of the date hereof and are based on information available to us as of such date. We assume no obligation to update any forward-looking statement. In some cases, forward-looking statements can be identified by the use of terminology such as “may,” “will,” “expects,” “plans,” “anticipates,” “intends,” “believes,” “estimates,” “potential,” or “continue,” or the negative thereof or other comparable terminology. Although we believe that the expectations reflected in the forward-looking statements contained herein are reasonable, there can be no assurance that any such expectation or any forward-looking statement will prove to be correct. Our actual results will vary, and may vary materially, from those projected or assumed in the forward-looking statements. Our financial condition and results of operations, as well as any forward-looking statements, are subject to inherent risks and uncertainties, including risks relating to product recalls and product liability claims; potential restrictions on our liquidity or our ability to operate our business by the Credit Agreement, and the consequences of any default under that agreement; possible infringement of our technology or the assertion that our technology infringes the rights of other parties; the potential imposition of fines, penalties, or other adverse consequences if our employees or agents violate the U.S. Foreign Corrupt Practices Act or other laws or regulations; expenditures relating to research, development, testing and regulatory approval or clearance of our products and the risk that such products may not be developed successfully or approved for commercial use; greater governmental scrutiny and regulation of the medical device industry; reforms to the 510(k) process administered by the U.S. Food and Drug Administration (the “FDA”); laws targeting fraud and abuse in the healthcare industry; potential for significant adverse changes in, or our failure to comply with, governing regulations; increases in the price of commodity components; negative changes in economic and industry conditions in the United States and other countries; termination or interruption of relationships with our suppliers, or failure of such suppliers to perform; our potential inability to successfully manage growth through acquisitions, including the inability to commercialize technology acquired through recent, proposed or future acquisitions; fluctuations in Euro and GBP exchange rates; our need to generate sufficient cash flow to fund our debt obligations, capital expenditures, and ongoing operations; concentration of a substantial portion of our revenues among a few products and procedures; development of new products and technology that could render our existing products obsolete; market acceptance of new products; volatility in the market price of our common stock; modification or limitation of governmental or private insurance reimbursement policies; changes in health care markets related to health care reform initiatives; failures to comply with applicable environmental laws; changes in key personnel; work stoppage or transportation risks; uncertainties associated with potential healthcare policy changes which may have a material adverse effect on our operations or financial condition; introduction of products in a timely fashion; price and product competition; availability of labor and materials; cost increases; fluctuations in and obsolescence of inventory; and other factors referred to in our Annual Report on Form 10-K for the year ended December 31, 2012 and other materials filed with the Securities and Exchange Commission. All subsequent forward-looking statements attributable to us or persons acting on our behalf are expressly qualified in their entirety by these cautionary statements. Actual results will differ, and may differ materially, from anticipated results. Financial

estimates are subject to change and are not intended to be relied upon as predictions of future operating results, and we assume no obligation to update or disclose revisions to those estimates. Additional factors that may have a direct bearing on our operating results are discussed in Part I, Item 1A “Risk Factors” in our Annual Report on Form 10-K for the year ended December 31, 2012.

OVERVIEW

The following discussion and analysis of our financial condition and results of operation should be read in conjunction with the consolidated financial statements and related condensed notes thereto, which are included in Part I of this Report.

We design, develop, manufacture and market single-use medical products for interventional and diagnostic procedures. For financial reporting purposes, we report our operations in two operating segments: cardiovascular and endoscopy. Our cardiovascular segment consists of cardiology and radiology devices which assist in diagnosing and treating coronary arterial disease, peripheral vascular disease and other non-vascular diseases and includes our embolotherapeutic products. Our endoscopy segment consists of

Table of Contents

gastroenterology and pulmonology medical devices which assist in the palliative treatment of expanding esophageal, tracheobronchial and biliary strictures caused by malignant tumors.

For the quarter ended June 30, 2013, we reported record revenues of \$109.9 million, up 9.3% from the three months ended June 30, 2012 of \$100.5 million. Revenues for the six months ended June 30, 2013 were a record \$213.8 million, compared to \$196.1 million for the first six months of 2012, an increase of 9.0%.

Gross profit as a percentage of sales decreased to 42.8% and 42.1% for three and six-month periods ended June 30, 2013, respectively, compared to 46.8% and 46.5% for the three and six-month periods ended June 30, 2012, respectively. This decrease in gross profit for both periods was due to higher costs of approximately 1.4% and 1.8% of sales, respectively, resulting from lower production volumes for the first three and six months of 2013, amortization of developed technology costs of approximately 1.2% and 1.3% of sales, respectively, associated with the purchase of Thomas Medical, and the newly initiated Medical Device Excise Tax ("MDET") of approximately 1.0% of sales for both periods of 2013, which was part of the Affordable Care Act of 2010. During the six months ended June 30, 2013, we also had a non-recurring finished goods inventory mark-up costs of 0.3% of sales related to the Thomas Medical acquisition. Excluding the non-recurring Thomas Medical finished goods inventory mark-up costs, gross margins would have been 42.4% of sales for the six months ended June 30, 2013. Our gross profit for the second quarter of 2013 improved 140 basis points from the first quarter of 2013. This improvement was largely the result of higher production volumes in the second quarter of 2013, when compared to the first quarter 2013.

Net income for the three months ended June 30, 2013 was \$3.8 million, or \$.09 per share, compared to \$6.1 million, or \$.14 per share, for the three months ended June 30, 2012, a decrease of 38.4%. Net income for the six-month period ended June 30, 2013 was \$4.4 million, or \$.10 per share, compared to \$11.8 million, or \$0.28 per share, for the corresponding period of 2012. The decrease was primarily attributable to lower gross margins, increased investments in research and development and higher interest expense included in other expenses.

Our endoscopy segment made significant progress and generated an operating income of approximately \$260,000 for the six months ended June 30, 2013, when compared to an operating loss of approximately \$607,000 for the corresponding period of 2012. This increase in operating income for the six months ended June 30, 2013 was largely driven by lower operating expenses.

Several factors negatively affected our financial results for the three and six-month periods ended June 30, 2013. We experienced reduced U.S. medical procedure counts utilizing our products in the three and six-month periods ended June 30, 2013, as our overall U.S. direct sales growth was only up 2.3% and 2.6%, respectively (excluding Thomas Medical sales), when compared to the comparable periods of 2012. Our gross profit was negatively affected by higher costs from lower production volumes for three and six-month periods ended June 30, 2013, which increased our product costs, amortization of developed technology costs associated with the purchase of Thomas Medical, and the initiation of the MDET.

We expect to launch a number of new products in 2013, including the TIO™ Three-in-One Oral Airway Bite Block, the One Snare™ Single-Loop Device, the basixTOUCH™ Inflation Device, the PHD™ Hemostasis Valve, the PreludeEASE™ Hydrophilic Radial Sheath, the ASAP LP™ Aspiration Catheter, the Worley™ Snare System, the Bearing™ NS PVA Embolization Particles, Steerable EP Sheath, the DialEase™ Splittable Sheath, the EndoMAXX EDT™ Esophageal Stent and the ConcierGE® Guiding Catheter. We believe our earnings will grow going forward if we are successful with the release of new products and the implementation of cost-cutting initiatives. During the second quarter of 2013, we began cost-cutting initiatives related to selling, general and administrative expenses of approximately \$4.5 million, which we believe positively impacted our performance in the second quarter of 2013. We also believe these initiatives will increase our net income during the remainder of 2013. Our selling, general and administrative expenses decreased to 28.7% and 29.8% of sales for the three and six-month periods ended June 30, 2013, respectively, compared to

30.1% and 30.5% for the three and six-month periods ended June 30, 2012, respectively. We also intend to review certain of our planned research and development expenses in an effort to identify opportunities to cut expenses or delay certain projects to reduce our research and development expenses as a percentage of overall sales.

18

Results of Operations

The following table sets forth certain operational data as a percentage of sales for the three and six-month periods ended June 30, 2013 and 2012:

	Three Months Ended		Six Months Ended	
	June 30,		June 30,	
	2013	2012	2013	2012
Net sales	100%	100%	100%	100%
Gross profit	42.8	46.8	42.1	46.5
Selling, general, and administrative expenses	28.7	30.1	29.8	30.5
Research and development expenses	7.9	6.6	8.3	6.6
Acquired in-process research and development	-	2.0	-	1.1
Income from operations	6.2	8.2	4.0	8.3
Other income (expense) - net	(1.6)	0.6	(1.6)	0.3
Income before income tax expense	4.6	8.8	2.4	8.5
Net income	3.4	6.1	2.1	6.0

Sales. Sales for the three months ended June 30, 2013 increased by 9.3%, or approximately \$9.3 million, compared to the corresponding period of 2012. Sales for the six months ended June 30, 2013 increased by 9.0%, or approximately \$17.7 million, compared to the corresponding period of 2012. Listed below are the sales by business segment for the three and six-month periods ended June 30, 2013 and 2012 (in thousands):

	% Change	Three Months Ended		% Change	Six Months Ended	
		June 30,	2012		June 30,	2012
		2013	2012		2013	2012
Cardiovascular						
Stand-alone devices	3%	\$30,286	\$29,495	2%	\$59,786	\$58,341
Custom kits and procedure trays	8%	26,277	24,224	8%	50,774	47,044
Inflation devices	(13)%	15,953	18,385	(9)%	31,562	34,858
Catheters	18%	18,939	16,017	14%	36,234	31,730
Embolization devices	(12)%	7,431	8,439	(9)%	14,842	16,257
CRM/EP	—%	7,067	—	—%	12,509	—
Total	10%	105,953	96,560	9%	205,707	188,230
Endoscopy						
Endoscopy devices	(1)%	3,922	3,972	2%	8,116	7,920
Total	9%	\$109,875	\$100,532	9%	\$213,823	\$196,150

Our cardiovascular sales growth of 9.7% for the three months ended June 30, 2013, and 9.3% for the six months ended June 30, 2013, when compared to the corresponding periods of 2012, was largely the result of increased sales of our cardiac rhythm management ("CRM") and electrophysiology ("EP") products acquired from Thomas Medical (\$7.1 million and \$12.5 million for the three and six-month periods ended June 30, 2013, respectively), catheters (particularly our peritoneal dialysis catheter acquired from MediGroup, aspiration catheter product line, micro catheter product line and micro catheter product line) and custom kits and procedure trays.

Our endoscopy sales decreased 1.3% for the three months ended June 30, 2013, and increased 2.5% for the six months ended June 30, 2013, when compared to the corresponding periods of 2012. The decrease in sales for the second quarter of 2013, when compared to the second quarter of 2012, was primarily the result of lower sales of OEM bipolar

coagulation probes. The increase in sales for the six months ended June 30, 2013, when compared to the corresponding period in 2012, was primarily related to an increase in our sales of the EndoMAXX™ fully covered esophageal stent.

Gross Profit. Gross profit as a percentage of sales decreased to 42.8% and 42.1% for three and six-month periods ended June 30, 2013, respectively, compared to 46.8% and 46.5% for the three and six-month periods ended June 30, 2012, respectively. This decrease in gross profit for both periods was due primarily to higher costs of approximately 1.4% and 1.8% of sales, respectively, resulting principally from lower production volumes for the first three and six months of 2013, amortization of developed technology costs of approximately 1.2% and 1.3% of sales, respectively, associated with the purchase of Thomas Medical, and the newly-

Table of Contents

initiated MDET of approximately 1.0% of sales for both periods in 2013. During the six months ended June 30, 2013, we also had non-recurring finished goods inventory mark-up costs of 0.3% of sales related to the Thomas Medical acquisition. Excluding the non-recurring Thomas Medical finished goods inventory mark-up costs, gross margins would have been 42.4% of sales for the six months ended June 30, 2013.

Operating Expenses. Selling, general and administrative expenses decreased to 28.7% of sales for the three months ended June 30, 2013, from 30.1% of sales for the three months ended June 30, 2012. Selling, general and administrative expenses decreased to 29.8% of sales for the six months ended June 30, 2013, compared with 30.5% of sales for the six months ended June 30, 2012. The decrease in both periods was primarily due to the implementation of cost-cutting initiatives in expenses such as reduced headcount, shows and conventions, 401(k) employer match, and bonuses.

Research and Development Expenses. Research and development expenses increased to 7.9% of sales for the three months ended June 30, 2013, compared with 6.6% of sales for the three months ended June 30, 2012. Research and development expenses increased to 8.3% of sales for the six months ended June 30, 2013, compared to 6.6% of sales for the six months ended June 30, 2012. The increase in research and development expenses for both periods was primarily due to headcount additions for research and development to support new products, personnel increases in the regulatory department to support registrations in foreign countries to expand international product offerings, and research and development costs associated with the acquisition of Thomas Medical.

During the three and six months ended June 30, 2013, we did not record any charges for acquired in-process research and development.

Operating Income (Loss). The following table sets forth our operating income or loss by business segment for the three and six-month periods ended June 30, 2013 and 2012, respectively (in thousands):

	Three Months Ended		Six Months Ended	
	June 30, 2013	2012	June 30, 2013	2012
Operating Income (Loss)				
Cardiovascular	\$6,649	\$8,499	\$8,277	\$16,836
Endoscopy	131	(277)	260	(607)
Total operating income	\$6,780	\$8,222	\$8,537	\$16,229

Cardiovascular Operating Income. During the three months ended June 30, 2013, we reported income from operations of approximately \$6.6 million from our cardiovascular business segment, compared to income from operations of approximately \$8.5 million for the corresponding period of 2012. For the six months ended June 30, 2013, we reported income from operations of approximately \$8.3 million from our cardiovascular business segment, compared to income from operations of approximately \$16.8 million for the corresponding period of 2012. When compared to the prior year periods, operating income for the three and six-month periods ended June 30, 2013 was unfavorably affected by lower gross margins and increases in research and development expenses.

Endoscopy Operating Income (Loss). During the three months ended June 30, 2013, we reported income from operations of approximately \$131,000 from our endoscopy business segment, compared to a loss from operations of approximately \$277,000 for the corresponding period of 2012. For the six months ended June 30, 2013, we reported income from operations of approximately \$260,000 from our endoscopy business segment, compared to a loss from operations of approximately \$607,000 for the corresponding period of 2012. The improvement in operating income (loss) for the three and six-month periods ended June 30, 2013, when compared to the corresponding periods of 2012, was largely driven by lower operating expenses.

Other Income (Expense) - Net. Other expense for the three months ended June 30, 2013 was approximately \$1.8 million, compared to other income of approximately \$592,000 for the corresponding period in 2012. Other expense for the six months ended June 30, 2013 was approximately \$3.3 million, compared to other income of approximately \$502,000 for the corresponding period in 2012. The net increase in other expense for both periods was principally the result of higher average outstanding debt balances and the corresponding increase in interest expense and the absence of any gain on sales of marketable securities, compared to approximately \$648,000 of gains on sales of marketable securities recognized during the three and six-month periods ended June 30, 2012.

Income Taxes. Our overall effective tax rate for the three months ended June 30, 2013 was 25.0%, compared to 30.8% for the corresponding period of 2012. For the six months ended June 30, 2013, our effective tax rate was 15.2%, compared to 29.2% for

Table of Contents

the corresponding period of 2012. The effective income tax rates for the three and six-month periods ended June 30, 2013, when compared to the corresponding periods of 2012, were lower, primarily as a result of a higher mix of earnings from our foreign operations, which are taxed at a lower rate than our U.S. operations. In addition, the effective tax rate for the six months ended June 30, 2013, relative to the tax rate for the corresponding period of 2012, was favorably affected by the reinstatement of the federal research and development credit for the 2012 tax year. The credit was reinstated by the American Taxpayer Relief Act of 2012, which was signed on January 2, 2013. We recognized the research and development credit for 2012 as a discrete benefit in the first quarter of 2013, the period in which the reinstatement was enacted.

Net Income. During the three months ended June 30, 2013, we reported net income of approximately \$3.8 million, compared to net income of approximately \$6.1 million for the corresponding period of 2012. For the six months ended June 30, 2013, we reported net income of approximately \$4.4 million, compared to net income of approximately \$11.8 million for the corresponding period of 2012. The decrease in net income for the three and six-month periods ended June 30, 2013 was primarily attributable to lower gross margins, and higher operating costs, principally higher investments in research and development and higher interest expense included in other expenses.

Liquidity and Capital Resources

Our working capital as of June 30, 2013 and December 31, 2012 was \$97.5 million and \$89.0 million, respectively. The increase in working capital during the six months ended June 30, 2013 was primarily the result of increases in cash and cash equivalents and trade receivables and decreases in accrued expenses, which were partially offset by decreases in inventories. As of June 30, 2013, we had a current ratio of 2.40 to 1.

At June 30, 2013 and December 31, 2012, we had cash and cash equivalents of approximately \$13.1 million and \$9.7 million respectively, of which approximately \$11.0 million and \$8.1 million, respectively, were held by foreign subsidiaries. For each of our foreign subsidiaries, we make an assertion as to whether the earnings are intended to be repatriated to the United States or held by the foreign subsidiary for permanent reinvestment. The cash held by our foreign subsidiaries for permanent reinvestment is generally used to fund the operating activities of our foreign subsidiaries and for further investment in foreign operations. We have accrued a deferred tax liability on our consolidated financial statements for the portion of our foreign earnings that are available to be repatriated to the United States.

In addition, cash held by our subsidiary in China is subject to local laws and regulations that require government approval for the transfer of such funds to entities located outside of China. As of June 30, 2013 and December 31, 2012, we had cash and cash equivalents of approximately \$8.9 million and \$6.4 million, respectively, held by our subsidiary in China.

During the six months ended June 30, 2013, our inventory balances decreased by approximately \$3.0 million, from \$84.6 million at December 31, 2012 to \$81.6 million at June 30, 2013. The decrease was primarily the result of an effort to improve inventory turns company wide.

Pursuant to the terms of the Credit Agreement, the Lenders have agreed to make revolving credit loans up to an aggregate amount of \$175 million. The Lenders also made a term loan in the amount of \$100 million, repayable in quarterly installments of \$2.5 million until the maturity date of December 19, 2017, at which time the term loan and revolving credit loans, together with accrued interest thereon, will be due and payable. In addition, certain mandatory prepayments are required to be made upon the occurrence of certain events described in the Credit Agreement. Wells Fargo has agreed to make swingline loans from time to time through the maturity date of December 19, 2017 in amounts equal to the difference between the amounts actually loaned by the Lenders and the aggregate revolving credit commitment. The Credit Agreement is collateralized by substantially all of our assets. As of June 30, 2013,

Wells Fargo was the sole Lender under the Credit Agreement.

On December 19, 2017, all principal, interest and other amounts outstanding under the Credit Agreement are payable in full. At any time prior to the maturity date, we may repay any amounts owing under all revolving credit loans, term loans, and all swingline loans in whole or in part, subject to certain minimum thresholds, without premium or penalty, other than breakage costs.

The Credit Agreement contains customary covenants, representations and warranties and other terms customary for revolving credit loans of this nature. In this regard, the Credit Agreement requires us to not, among other things, (a) permit the Consolidated Total Leverage Ratio (as defined in the Credit Agreement) to be greater than 3.5 to 1 as of any fiscal quarter ending during 2013, greater than 3.35 to 1 as of any fiscal quarter ending during 2014, greater than 3 to 1 as of any fiscal quarter ending during 2015, greater than 2.75 to 1 as of any fiscal quarter ending during 2016, and greater than 2.5 to 1 as of any fiscal quarter ending thereafter; (b) for any period of four consecutive fiscal quarters, permit the ratio of Consolidated EBITDA (as defined in the Credit Agreement and subject to certain adjustments) to Consolidated Fixed Charges (as defined in the Credit Agreement) to be less than 1.75 to 1; (c) subject to certain adjustments, permit Consolidated Net Income (as defined in the Credit Agreement) for certain periods to be

Table of Contents

less than \$0; or (d) subject to certain conditions and adjustments, permit the aggregate amount of all Facility Capital Expenditures (as defined in the Credit Agreement) in any fiscal year beginning in 2013 to exceed \$30 million. Additionally, the Credit Agreement contains various negative covenants with which we must comply, including, but not limited to, limitations respecting: the incurrence of indebtedness, the creation of liens or pledges on our assets, mergers or similar combinations or liquidations, asset dispositions, the repurchase or redemption of equity interests and debt, the issuance of equity, the payment of dividends and certain distributions, the entrance into related party transactions and other provisions customary in similar types of agreements. As of June 30, 2013, we failed to comply with the Consolidated Total Leverage Ratio under our Credit Agreement (the "Leverage Covenant"), as our actual ratio was 3.97 to 1; however, Wells Fargo subsequently granted to us a waiver with respect to the Leverage Covenant as of June 30, 2013. Our failure to comply with the Leverage Covenant as of June 30, 2013 was due primarily to several factors that negatively affected our financial results for the three and six-months ended June 30, 2013. We experienced reduced U.S. medical procedure counts utilizing our products in the three and six-months ended June 30, 2013, as our overall U.S. direct sales growth was only up 2.3% and 2.6%, respectively (excluding Thomas Medical sales), when compared to the comparable periods in 2012. Our gross profit was negatively affected by higher costs from lower production volumes for the three and six-months ended June 30, 2013, which increased our product costs, amortization of developed technology costs associated with the purchase of Thomas Medical, and the initiation of the MDET. We continue to make significant investments in research and development in an effort to launch new products with higher gross margins. With the exception of our failure to comply with the Leverage Covenant as of June 30, 2013, which has been waived by Wells Fargo, we were in compliance with all other covenants under the Credit Agreement as of June 30, 2013.

As of June 30, 2013, we had available borrowings under the Credit Agreement of approximately \$15.7 million. Our interest rate under the Credit Agreement as of June 30, 2013 was a fixed rate of 3.23% on \$150.0 million as a result of an interest rate swap, a variable floating rate of 2.45% on \$97.5 million and a variable floating rate of 2.49% on approximately \$9.3 million.

Capital expenditures for property and equipment were approximately \$30.4 million and \$34.7 million, respectively, for the six months ended June 30, 2013 and 2012.

Currently, our primary sources of liquidity are cash flows from operations, borrowings under our Credit Agreement (approximately \$15.7 million of borrowing availability as of June 30, 2013) and a potential sale/leaseback arrangement involving our Pearland, Texas facility of approximately \$24 million. We are currently in discussions with Wells Fargo regarding a possible amendment to our Credit Agreement in order to provide us with greater flexibility in the application of the Leverage Covenant. These discussions are intended to reduce the possibility of future defaults under the Leverage Covenant. We currently believe that our existing cash balances, anticipated future cash flows from operations, borrowings under the Credit Agreement and potential building sales leaseback will be adequate to fund our current and currently planned future operations for the next twelve months and the foreseeable future.

Table of Contents

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Critical Accounting Policies

The SEC has requested that all registrants address their most critical accounting policies. The SEC has indicated that a “critical accounting policy” is one which is both important to the representation of the registrant’s financial condition and results and requires management’s most difficult, subjective or complex judgments, often as a result of the need to make estimates about the effect of matters that are inherently uncertain. We base our estimates on past experience and on various other assumptions our management believes to be reasonable under the circumstances, the results of which form the basis for making judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results will differ, and may differ materially from these estimates under different assumptions or conditions. Additionally, changes in accounting estimates could occur in the future from period to period. Our management has discussed the development and selection of our most critical financial estimates with the audit committee of our Board of Directors. The following paragraphs identify our most critical accounting policies:

Inventory Obsolescence. Our management reviews on a quarterly basis inventory quantities on hand for unmarketable and/or slow-moving products that may expire prior to being sold. This review includes quantities on hand for both raw materials and finished goods. Based on this review, we provide adjustments for any slow-moving finished good products or raw materials that we believe will expire prior to being sold or used to produce a finished good and any products that are unmarketable. This review of inventory quantities for unmarketable and/or slow moving products is based on forecasted product demand prior to expiration lives.

Forecasted unit demand is derived from our historical experience of product sales and production raw material usage. If market conditions become less favorable than those projected by our management, additional inventory write-downs may be required. During the years ended December 31, 2012, 2011 and 2010, we recorded obsolescence expense of approximately \$2.3 million, \$1.5 million, and \$1.9 million, respectively, and wrote off approximately \$1.5 million, \$1.1 million, and \$1.1 million, respectively. Based on this historical trend, we believe that our inventory balances as of June 30, 2013 have been accurately adjusted for any unmarketable and/or slow moving products that may expire prior to being sold.

Allowance for Doubtful Accounts. A majority of our receivables are with hospitals which, over our history, have demonstrated favorable collection rates. Therefore, we have experienced relatively minimal bad debts from hospital customers. In limited circumstances, we have written off bad debts as the result of the termination of our business relationships with foreign distributors. The most significant write-offs over our history have come from U.S. custom procedure tray manufacturers who bundle our products in surgical trays.

We maintain allowances for doubtful accounts relating to estimated losses resulting from the inability of our customers to make required payments. The allowance is based upon historical experience and a review of individual customer balances. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Stock-Based Compensation. We measure stock-based compensation cost at the grant date based on the value of the award and recognize the cost as an expense over the term of the vesting period. Judgment is required in estimating the fair value of share-based awards granted and their expected forfeiture rate. If actual results differ significantly from these estimates, stock-based compensation expense and our results of operations could be materially impacted.

Income Taxes. Under our accounting policies, we initially recognize a tax position in our financial statements when it becomes more likely than not that the position will be sustained upon examination by the tax authorities. Such tax positions are initially and subsequently measured as the largest amount of tax positions that has a greater than 50%

likelihood of being realized upon ultimate settlement with the tax authorities assuming full knowledge of the position and all relevant facts. Although we believe our provisions for unrecognized tax positions are reasonable, we can make no assurance that the final tax outcome of these matters will not be different from that which we have reflected in our income tax provisions and accruals. The tax law is subject to varied interpretations, and we have taken positions related to certain matters where the law is subject to interpretation. Such differences could have a material impact on our income tax provisions and operating results in the period(s) in which we make such determination.

Goodwill and Intangible Assets Impairment and Contingent Consideration. We test our goodwill balances for impairment as of July 1 of each year, or whenever impairment indicators arise. Over the last several years we have completed a significant number of acquisitions that have increased the value of our goodwill balance, intangible assets and contingent consideration. If we are unable to realize competitive advantages, synergies, forecasted projections or other benefits anticipated in connection with any of

Table of Contents

these acquisitions, we may be required to adjust the carrying amount of these assets. We utilize several reporting units in evaluating goodwill for impairment. We assess the estimated fair value of reporting units based on discounted future cash flows. If the carrying amount of a reporting unit exceeds the fair value of the reporting unit, an impairment charge is recognized in an amount equal to the excess of the carrying amount of the reporting unit goodwill over implied fair value of that goodwill. This analysis requires significant judgments, including estimation of future cash flows and the length of time they will occur, which is based on internal forecasts, and a determination of a discount rate based on our weighted average cost of capital. During our annual test of goodwill balances in 2012, which was completed during the third quarter of 2012, we determined that the fair value of each reporting unit with goodwill exceeded the carrying amount by a significant amount.

We evaluate the recoverability of intangible assets whenever events or changes in circumstances indicate that its carrying amount may not be recoverable. This analysis requires similar significant judgments as those discussed above regarding goodwill, except that undiscounted cash flows are compared to the carrying amount of intangible assets to determine if impairment exists. All of our intangible assets are subject to amortization.

Contingent consideration is an obligation by the buyer to transfer additional assets or equity interests to the former owner upon reaching certain performance targets. Certain of our business combinations involve the potential for the payment of future contingent consideration, generally based on a percentage of future product sales or upon attaining specified future revenue milestones. In connection with a business combination, any contingent consideration is recorded on the acquisition date based upon the consideration expected to be transferred in the future. We utilize a discounted cash flow method, which includes a probability factor for milestone payments, in valuing the contingent consideration liability. We re-measure the estimated liability each quarter and record changes in the estimated fair value through operating expense in our consolidated statements of income. Significant increases or decreases in our estimates could result in the estimated fair value of our contingent consideration liability, as the result of changes in the timing and amount of revenue estimates, as well as changes in the discount rate or periods.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Our principal market risk relates to changes in the value of the Euro and Great Britain Pound ("GBP") relative to the value of the U.S. Dollar. We also have a limited market risk relating to the Chinese Yuan, Hong Kong Dollar and the Swedish and Danish Kroner. Our consolidated financial statements are denominated in, and our principal currency is, the U.S. Dollar. For the quarter ended June 30, 2013, a portion of our revenues (approximately \$18.3 million, representing approximately 16.7% of our aggregate revenues), was attributable to sales that were denominated in foreign currencies. All other international sales were denominated in U.S. Dollars. Certain of our expenses for the quarter ended June 30, 2013 were also denominated in foreign currencies, which partially offset risks associated with fluctuations of exchange rates between foreign currencies on the one hand, and the U.S. Dollar on the other hand. During the quarter ended June 30, 2013, fluctuations in the exchange rate between our foreign currencies against the U.S. Dollar resulted in a decrease in our gross revenues of approximately \$38,000, or .03%, and gross profit remained unchanged.

On May 31, 2013, we forecasted a net exposure for June 30, 2013 (representing the difference between Euro and GBP-denominated receivables and Euro-denominated payables) of approximately 23,000 Euros and 155,000 GBPs. In order to partially offset such risks at May 31, 2013, we entered into a 30-day forward contract for the Euro and GBP with a notional amount of approximately 23,000 Euros and notional amount of 155,000 GBPs. We enter into similar transactions at various times during the year to partially offset exchange rate risks we bear throughout the year. These contracts are marked to market at each month-end. The effect on our consolidated statements of income for the three months ended June 30, 2013 and 2012 of all forward contracts, and the fair value of our open positions as of June 30, 2013, were not material.

As discussed in Note 9 to our consolidated financial statements, as of June 30, 2013, we had outstanding borrowings of approximately \$256.8 million under the Credit Agreement. As part of our efforts to mitigate interest rate risk, on December 19, 2012, we entered into a \$150.0 million pay-fixed, receive-variable interest rate swap with Wells Fargo to fix the one-month LIBOR rate at 0.98%. The variable portion of the interest rate swap is tied to the one-month LIBOR rate (the benchmark interest rate for the Credit Agreement). This instrument is intended to reduce our exposure to interest rate fluctuations and was not entered into for speculative purposes. Excluding the \$150.0 million that is subject to a fixed rate under the interest rate swap and assuming the current level of borrowings remained the same, it is estimated that our interest expense and income before income taxes would change by approximately \$1.1 million annually for each one percentage point change in the average interest rate under these borrowings.

In the event of an adverse change in interest rates, our management would likely take actions to mitigate our exposure. However, due to the uncertainty of the actions that would be taken and their possible effects, additional analysis is not possible at this time. Further, such analysis would not consider the effects of the change in the level of overall economic activity that could exist in such an environment.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management, with the participation of our chief executive officer and chief financial officer, evaluated the effectiveness of our disclosure controls and procedures pursuant to Rule 13a-15 under the Securities Exchange Act of 1934, as amended (the "Exchange Act"), as of June 30, 2013. In designing and evaluating the disclosure controls and procedures, management recognized that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives. In addition, the design of disclosure controls and procedures must reflect the fact that there are resource constraints and that management is required to apply its judgment in evaluating the benefits of possible controls and procedures relative to their costs.

Based on that evaluation, our chief executive officer and chief financial officer concluded that our disclosure controls and procedures are designed at a reasonable assurance level and are effective to provide reasonable assurance that information we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and that such information is accumulated and communicated to our management, including our chief executive officer and chief financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

Except as set forth below, during the quarter ended June 30, 2013, there were no changes in our internal control over financial reporting that materially affected, or are reasonably likely to materially affect, our internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934).

On December 19, 2012, we completed our acquisition of Thomas Medical. We are currently integrating policies, processes, employees, technology and operations of Thomas Medical. Management will continue to evaluate our internal control over financial reporting as we execute acquisition integration activities.

PART II - OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

In the ordinary course of business we are involved in litigation and claims which management believes will not have a material effect on our financial position or results of operations.

ITEM 1A. RISK FACTORS

In addition to other information set forth in this Report, you should carefully consider the factors discussed in Part I, Item 1A. "Risk Factors" of our Annual Report on Form 10-K for the year ended December 31, 2012, which could materially affect our business, financial condition or future results. The risks described in our Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us or that we currently deem to be immaterial also may materially and adversely affect our business, financial condition and/or operating results.

ITEM 3. DEFAULTS UPON SENIOR SECURITIES

As discussed in Part I, Item 2. “Management's Discussion and Analysis of Financial Condition and Results of Operations” above, our Credit Agreement contains various negative covenants with which we must comply, including, but not limited to, limitations respecting the incurrence of indebtedness, the creation of liens or pledges on our assets, mergers or similar combinations or liquidations, asset dispositions, the repurchase or redemption of equity interests and debt, the issuance of equity, the payment of dividends and certain distributions, the entrance into related party transactions and other provisions customary in similar types of agreements. As of June 30, 2013, we failed to comply with the Leverage Covenant under our Credit Agreement, as our Consolidated Total Leverage Ratio was 3.97 to 1, rather than 3.50 to 1 as currently required by the Credit Agreement. Subsequent to June 30, 2013, Wells Fargo granted to us a waiver with respect to the Leverage Covenant as of June 30, 2013. With the exception of our failure to comply with the Leverage Covenant as of June 30, 2013, which failure has been waived by Wells Fargo, we were in compliance with all other covenants under the Credit Agreement as of June 30, 2013.
