May 08, 2009

UNITED STATES
SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-Q

(Mark One)

QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the quarterly period ended April 4, 2009

OR

TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934

For the transition period from _____ to _____

Commission File Number 1-3390

Seaboard Corporation
(Exact name of registrant as specified in its charter)

Delaware 04-2260388
(State or other jurisdiction of (I.R.S. Employer Identification No.)
incorporation or organization)

9000 W. 67th Street, Shawnee Mission, Kansas 66202
(Address of principal executive offices) (Zip Code)

(913) 676-8800
(Registrant's telephone number, including area code)

Not Applicable
(Former name, former address and former fiscal year, if changed
since last report.)

Indicate by check mark whether the registrant (1) has filed
all reports required to be filed by Section 13 or 15(d) of the
Securities Exchange Act of 1934 during the preceding 12 months
(or for such shorter period that the registrant was required to
file such reports), and (2) has been subject to such filing
requirements for the past 90 days. Yes No

Indicate by check mark whether the registrant has submitted
electronically and posted on its corporate Web site, if any, every
Interactive Data File required to be submitted and posted pursuant
to Rule 405 of Regulation S-T (232.405 of this chapter) during the
preceding 12 months (or for such shorter period that the registrant
was required to submit and post such files). Yes No

Indicate by check mark whether the registrant is a large
accelerated filer, an accelerated filer, a non-accelerated filer or
a smaller reporting company. See the definitions of "large
accelerated filer," "accelerated filer" and "smaller reporting

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

company" in Rule 12b-2 of the Exchange Act.

Large accelerated filer Accelerated filer
 Non-accelerated filer (Do not check if a smaller reporting company)
 Smaller reporting company

Indicate by check mark whether the registrant is a shell company
 (as defined in Rule 12b-2 of the Exchange Act). Yes No .

There were 1,237,193 shares of common stock, \$1.00 par value per
 share, outstanding on April 27, 2009.

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

Notes to Condensed Consolidated Financial Statements (Unaudited)

Note 1 - Accounting Policies and Basis of Presentation

The condensed consolidated financial statements include the accounts of Seaboard Corporation and its domestic and foreign subsidiaries ("Seaboard"). All significant intercompany balances and transactions have been eliminated in consolidation. Seaboard's investments in non-controlled affiliates are accounted for by the equity method. The unaudited condensed consolidated financial statements should be read in conjunction with the consolidated financial statements of Seaboard for the year ended December 31, 2008 as filed in its Annual Report on Form 10-K. Seaboard's first three quarterly periods include approximately 13 weekly periods ending on the Saturday closest to the end of March, June and September. Seaboard's year-end is December 31.

The accompanying unaudited condensed consolidated financial statements include all adjustments (consisting only of normal recurring accruals) which, in the opinion of management, are necessary for a fair presentation of financial position, results of operations and cash flows. Results of operations for interim periods are not necessarily indicative of results to be expected for a full year. As Seaboard conducts its commodity trading business with third parties, consolidated subsidiaries and foreign affiliates on an interrelated basis, gross margin on foreign affiliates cannot be clearly distinguished without making numerous assumptions primarily with respect to mark-to-market accounting for commodity derivatives.

Use of Estimates

The preparation of the consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Recently Adopted Accounting Standards

Seaboard adopted Financial Accounting Standard (FAS) No. 160, "Noncontrolling Interests in Consolidated Financial Statements- an amendment of ARB No. 51" as of January 1, 2009. This statement changed the accounting and reporting for minority interests, which are now recharacterized as noncontrolling interests. The noncontrolling interests are now classified as a component of equity. This statement did not have an impact on Seaboard's financial position or net earnings.

Note 2 - Inventories

The following is a summary of inventories at April 4, 2009 and December 31, 2008:

(Thousands of dollars)	April 4, 2009	December 31, 2008
At lower of LIFO cost or market:		
Live hogs and materials	\$191,513	\$201,654

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

Fresh pork and materials	26,537	26,480
	218,050	228,134
LIFO adjustment	(35,540)	(40,672)
Total inventories at lower of LIFO cost or market	182,510	187,462
At lower of FIFO cost or market:		
Grains and oilseeds	139,852	179,774
Sugar produced and in process	42,661	56,259
Other	35,462	36,964
Total inventories at lower of FIFO cost or market	217,975	272,997
Grain, flour and feed at lower of weighted average cost or market		
	45,492	48,536
Total inventories	\$445,977	\$508,995

As of April 4, 2009, Seaboard had \$13,349,000 recorded in grain inventories related to its commodity trading business that are either committed primarily to one customer in a foreign country for which contract performance

5

is an ongoing concern, considered unsold as a result of a customer default during the first quarter of 2009 or considered other on hand unsold inventory in the same markets which are at risk of lower of cost or market adjustments. During the first quarter of 2009, grain inventory values were written down \$8,801,000 (with no tax benefit currently recognized), or \$7.10 per share, based on management's estimate of net realizable value considering all of the facts and circumstances at this time. However, if Seaboard is successful in realizing more value from this inventory than what is currently estimated, it is possible that Seaboard could recover previous write-offs. Conversely, if Seaboard is unable to collect amounts primarily from the one customer as currently estimated, is forced to find other customers for a portion of this inventory or market prices decrease, it is possible that Seaboard could incur an additional material write-down in value of this inventory.

Note 3 - Income Taxes

Seaboard's tax returns are regularly audited by federal, state and foreign tax authorities, which may result in adjustments. Seaboard's U.S. federal income tax returns have been reviewed through the 2004 tax year. There have not been any material changes in unrecognized income tax benefits since December 31, 2008. Interest related to unrecognized tax benefits and penalties was not material for the three months ended April 4, 2009.

Note 4 - Derivatives and Fair Value of Financial Instruments

Seaboard adopted Statement of Financial Accounting Standards No. 157 (FAS 157), "Fair Value Measurements" on January 1, 2008 with the exception of nonfinancial assets and nonfinancial liabilities that were deferred by the Financial Accounting Standards Board (FASB) Staff Position FAS 157-2. Seaboard adopted FAS 157 for these nonfinancial assets and nonfinancial liabilities as of January 1, 2009. The adoption of FAS 157 deferral provisions did not have a material impact on Seaboard's financial position or net earnings.

FAS 157 discusses valuation techniques, such as the market approach (prices and other relevant information generated by market conditions involving identical or comparable assets or liabilities),

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

the income approach (techniques to convert future amounts to single present amounts based on market expectations including present value techniques and option-pricing), and the cost approach (amount that would be required to replace the service capacity of an asset which is often referred to as replacement cost). FAS 157 utilizes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value into three broad levels. The following is a brief description of those three levels:

Level 1: Observable inputs such as unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access at the measurement date.

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. These include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active.

Level 3: Unobservable inputs that reflect the reporting entity's own assumptions.

The following table shows assets and liabilities measured at fair value on a recurring basis as of April 4, 2009 and also the level within the fair value hierarchy used to measure each category of assets.

(Thousands of dollars)	Quoted Prices In Active Significant Markets for Other Significant			
	Balance April 4, 2009	Identical Assets (Level 1)	Observable Inputs (Level 2)	Unobservable Inputs (Level 3)
Assets:				
Available-for-sale securities	\$265,090	\$ 60,666	\$204,424	\$ -
Trading securities - short term investments	23,203	-	23,203	-
Trading securities - other current assets	22,852	15,320	7,532	-
Derivatives	15,679	14,400	1,279	-
Total Assets	\$326,824	\$ 90,386	\$236,438	\$ -
Total Liabilities - Derivatives	\$ 20,712	\$ 11,180	\$ 9,532	\$ -

6

In April 2009, the FASB issued FASB Staff Position (FSP) FAS 157-4 "Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly". This FSP provides additional guidance for estimating fair value when the volume and level of activity for the asset or liability have significantly decreased. Seaboard will be required to adopt this FSP in the second quarter of 2009. Management believes the adoption of this FSP will not have an impact on Seaboard's financial position or net earnings.

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2 "Recognition and Presentation of Other-Than-Temporary Impairments". This FSP amends the other-than-temporary guidance for debt securities to make the guidance more operational. This FSP also expands the disclosures required in FAS 115 "Accounting for Certain Investments in Debt and Equity Securities" to interim periods. Seaboard will be required to adopt this FSP in the second quarter of 2009. Management believes the adoption of this FSP will not have an impact on Seaboard's financial position or net earnings.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1 "Interim Disclosures about Fair Value of Financial Instruments". This FSP expands the fair value disclosures required for all financial instruments within the scope of FAS 107 to interim periods. Seaboard will be required to adopt this FSP in the second quarter of 2009. Management believes the adoption of this FSP will not have an impact on Seaboard's financial position or net earnings.

In March 2008, the FASB issued FAS No. 161, "Disclosures about Derivative Instruments and Hedging Activities—an amendment of FASB Statement No. 133." This statement changed the disclosure requirements for derivative instruments and hedging activities. Entities are required to provide enhanced disclosures about how and why an entity uses derivative instruments, how derivative instruments and related hedged items are accounted for under Statement 133 and its related interpretations, and how derivative instruments and related hedged items affect an entity's financial position, net earnings, and cash flows. Seaboard adopted this statement as of January 1, 2009. This statement did not have an impact on Seaboard's financial position or net earnings. While management believes its derivatives are primarily economic hedges of its firm purchase and sales contracts or anticipated sales contracts, Seaboard does not perform the extensive record-keeping required to account for these types of transactions as hedges for accounting purposes.

Commodity Instruments

Seaboard uses various grain, meal, hog, pork bellies and energy resource related futures and options to manage its exposure to price fluctuations for raw materials and other inventories, finished product sales and firm sales commitments. From time to time, Seaboard may enter into speculative derivative transactions not directly related to its raw material requirements. The nature of Seaboard's market risk exposure has not changed materially since December 31, 2008. Commodity derivatives are recorded at fair value with any changes in fair value being marked to market as a component of cost of sales on the Condensed Consolidated Statements of Earnings. Since these derivatives are not accounted for as hedges, fluctuations in the related commodity prices could have a material impact on earnings in any given year.

At April 4, 2009, Seaboard had open net contracts to purchase and (sell) (10,312,000) bushels of grain, 42,000 tons of soybean meal and (1,806,000) gallons of heating oil.

Foreign currency exchange agreements

Seaboard enters into foreign currency exchange agreements to manage the foreign currency exchange rate risk with respect to certain transactions denominated in foreign currencies. These foreign exchange agreements are recorded at fair value with changes in value

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

marked to market as a component of cost of sales on the Condensed Consolidated Statements of Earnings as management believes these primarily related to the underlying commodity transaction with the exception of the Yen foreign exchange agreement. The change in value of the Yen foreign exchange agreement is marked to market as a component of foreign currency gain (loss) on the Condensed Consolidated Statements of Earnings. Since these agreements are not accounted for as hedges, fluctuations in the related currency exchange rates could have a material impact on earnings in any given year.

At April 4, 2009, Seaboard had trading foreign exchange contracts to cover its firm sales and purchase commitments and trade receivables and payables with notional amounts of \$106,612,000 primarily related to the South African Rand and the Euro. At April 4, 2009, Seaboard had trading foreign exchange contracts to cover various foreign currency working capital needs related to the South African Rand for notional amounts of \$4,930,000. At April 4, 2009, Seaboard had a trading foreign exchange contract to cover a note payable borrowing for a term note denominated in Japanese Yen for a notional amount of \$58,781,000.

7

Forward Freight Agreements

The Commodity Trading and Milling segment enters into certain forward freight agreements, viewed as taking long positions in the freight market as well as covering short freight sales, which may or may not result in actual losses when future trades are executed. These forward freight agreements, which expire in the fourth quarter of 2009, are not accounted for as hedges but are viewed by management as an economic hedge against the potential of future rising charter hire rates to be incurred by this segment for bulk cargo shipping while conducting its business of delivering grains to customers in many international locations. At April 4, 2009, Seaboard had agreements to pay \$41,500 and receive \$47,750 per day during 2009. Since these agreements are not accounted for as hedges, the change in value related to these agreements is recorded in cost of sales on the Condensed Consolidated Statements of Earnings.

Interest Rate Exchange Agreements

In December 2008 and again in March 2009, Seaboard entered into ten-year interest rate exchange agreements which involve the exchange of fixed-rate and variable-rate interest payments over the life of the agreements without the exchange of the underlying notional amounts to mitigate the effects of fluctuations in interest rates on variable rate debt. Seaboard pays a fixed rate and receives a variable rate of interest on two notional amounts of \$25,000,000 each. Since these interest rate exchange agreements are not accounted for as hedges, the change in value related to these agreements is recorded in Miscellaneous, net in the Condensed Consolidated Statements of Earnings.

Counterparty Credit Risk

Seaboard is subject to counterparty credit risk related to its foreign currency exchange agreements, forward freight agreements and interest rate exchange agreements. The maximum amount of loss due to the credit risk of the counterparties for these agreements,

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

should the counterparties fail to perform according to the terms of the contracts, is \$11,402,000 as of April 4, 2009. Seaboard's foreign currency exchange agreements have a maximum amount of loss due to credit risk in the amount of \$131,000 with several counterparties. Seaboard's forward freight agreements have a maximum amount of loss in the amount of \$10,123,000 with one counterparty. Seaboard's interest rate exchange agreements have a maximum amount of loss in the amount of \$1,148,000 with two counterparties. Seaboard does not hold any collateral related to these agreements.

The following table provides the amount of gain or (loss) recognized for each type of derivative and where it was recognized in the Condensed Consolidated Statement of Earnings for the three months ended April 4, 2009.

(Thousands of dollars)

	April 4, 2009	
	Location of Gain or (Loss) Recognized in Income on Derivative	Amount of Gain or (Loss) Recognized in Income on Derivative
Commodities	Cost of sales	\$ 3,641
Foreign currencies	Cost of sales	1,828
Foreign currencies	Foreign currency loss	(5,732)
Forward freight agreements	Cost of sales	-
Interest rate	Miscellaneous, net	2,479

The following table provides the fair value of each type of derivative held as of April 4, 2009 and where each derivative is included on the Condensed Consolidated Balance Sheets.

(Thousands of dollars)

	Asset Derivatives		Liability Derivatives	
	April 4, 2009			
	Balance Sheet Location	Fair Value	Balance Sheet Location	Fair Value
Commodities	Other current assets	\$ 4,277	Other current liabilities	\$2,757
Foreign currencies	Other current assets	131	Other current liabilities	9,532
Forward freight agreements	Other current assets	10,123	Other current liabilities	8,423
Interest rate	Other current assets	1,148	Other current liabilities	-

8

Note 5 - Employee Benefits

Seaboard maintains a defined benefit pension plan ("the Plan") for its domestic salaried and clerical employees. As a result of significant investment losses incurred in the Plan during the fourth quarter of 2008, management is currently evaluating the amount of an additional contribution to be made for the 2008 plan year during fiscal 2009. Although no final decision is expected until sometime late in the second quarter, it is expected a contribution will be made in the range of \$2,000,000 to \$15,000,000. As a result of this

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

contribution, at this time management does not anticipate making a contribution for the 2009 plan year. Seaboard also sponsors non-qualified, unfunded supplemental executive plans, and unfunded supplemental retirement agreements with certain executive employees. Management has no plans to provide funding for these supplemental plans in advance of when the benefits are paid.

The net periodic benefit cost of these plans was as follows:

(Thousands of dollars)	Three Months Ended	
	April 4, 2009	March 29, 2008
Components of net periodic benefit cost:		
Service cost	\$ 1,486	\$ 1,395
Interest cost	2,024	1,960
Expected return on plan assets	(1,060)	(1,681)
Amortization and other	1,206	369
Net periodic benefit cost	\$ 3,656	\$ 2,043

The accumulated unrecognized losses for 2008 in the Plan as of December 31, 2008 exceeded the 10% deferral threshold as permitted under FAS No. 87, "Employers' Accounting for Pensions" as a result of the significant investment losses incurred during 2008. Accordingly, Seaboard's pension expense for the Plan will increase by approximately \$3,000,000 for 2009 as compared to 2008 as a result of loss amortization. In addition, pension expense for the Plan is expected to increase an additional \$1,739,000 as a result of reduced expected return on assets, from the decline of assets in the Plan during 2008.

In December 2008, the FASB issued FSP FAS 132(R)-1, "Employers' Disclosures about Postretirement Benefit Plan Assets," amending FASB Statement No. 132(R), "Employers' Disclosures about Pensions and Other Postretirement Benefits". Seaboard will be required to adopt this statement effective for the fiscal year ending December 31, 2009. This FSP will require more detailed disclosures regarding defined benefit pension plan assets, including investment policies and strategies, major categories of plan assets, valuation techniques used to measure the fair value of plan assets and significant concentration of risk within plan assets. Management believes the adoption of this FSP will not have a material impact on Seaboard's financial position or net earnings.

Note 6 - Commitments and Contingencies

Seaboard is subject to various legal proceedings related to the normal conduct of its business, including various environmental related actions. In the opinion of management, none of these actions is expected to result in a judgment having a materially adverse effect on the consolidated financial statements of Seaboard.

Contingent Obligations

Certain of the non-consolidated affiliates and third party contractors who perform services for Seaboard have bank debt supporting their underlying operations. From time to time, Seaboard will provide guarantees of that debt allowing a lower borrowing rate or facilitating third party financing in order to further Seaboard's business objectives. Seaboard does not issue guarantees of third parties for compensation. As of April 4, 2009, Seaboard had

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

guarantees outstanding to two third parties with a total maximum exposure of \$1,978,000. Seaboard has not accrued a liability for any of the third party or affiliate guarantees as management considers the likelihood of loss to be remote.

As of April 4, 2009, Seaboard had outstanding letters of credit ("LCs") with various banks which reduced its borrowing capacity under its committed and uncommitted credit facilities by \$58,121,000 and \$1,924,000, respectively. Included in these amounts are LCs totaling \$42,688,000, which support the Industrial Development Revenue Bonds included as long-term debt and \$15,208,000 of LCs related to insurance coverages.

9

Note 7 - Stockholders' Equity and Accumulated Other Comprehensive Loss

Components of total comprehensive income, net of related taxes, are summarized as follows:

(Thousands of dollars)	Three Months Ended	
	April 4, 2009	March 29, 2008
Net earnings	\$15,973	\$70,027
Other comprehensive income net of applicable taxes:		
Foreign currency translation adjustment	(5,866)	430
Unrealized gain on investments	921	299
Unrecognized pension cost	836	227
Total comprehensive income	\$11,864	\$70,983

The components of and changes in accumulated other comprehensive loss for the three months ended April 4, 2009 are as follows:

(Thousands of dollars)	Balance December 31, 2008	Period Change	Balance April 4, 2009
Foreign currency translation adjustment	\$ (68,211)	\$ (5,866)	\$ (74,077)
Unrealized gain on investments	1,781	921	2,702
Unrecognized pension cost	(45,273)	836	(44,437)
Accumulated other comprehensive loss	\$ (111,703)	\$ (4,109)	\$ (115,812)

The foreign currency translation adjustment primarily represents the effect of the Argentine peso currency exchange fluctuation on the net assets of the Sugar segment. At April 4, 2009, the Sugar segment had \$159,217,000 in net assets denominated in Argentine pesos, \$17,834,000 in net assets denominated in U.S. dollars and \$51,324,000 of liabilities denominated in Japanese Yen in Argentina.

With the exception of the foreign currency translation adjustment to which a 35% federal tax rate is applied, income taxes for components of accumulated other comprehensive loss were recorded using a 39% effective tax rate. In addition, the unrecognized pension cost includes \$15,484,000 related to employees at certain subsidiaries for which no tax benefit has been recorded.

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

On August 7, 2007, the Board of Directors authorized Seaboard to repurchase from time to time prior to August 31, 2009 up to \$50,000,000 market value of its Common Stock in open market or privately negotiated purchases, of which \$11,562,000 remained available at April 4, 2009. For the three months ended April 4, 2009, Seaboard repurchased 3,233 shares of common stock at a cost of \$2,938,000. Shares repurchased are retired and resume the status of authorized and unissued shares.

Stockholders approved an amendment to decrease the number of authorized shares of common stock from 4,000,000 shares to 1,250,000 shares at the annual meeting on April 27, 2009.

Note 8 - Segment Information

As of April 4, 2009, the Pork segment had \$28,372,000 of goodwill and \$17,000,000 of other intangibles not subject to amortization in connection with its acquisition of Daily's. During the fourth quarter of 2008, the Pork segment incurred an impairment charge of \$7,000,000 related to the Daily's trade name. Seaboard will conduct its annual evaluation for impairment of this goodwill and other intangible assets as of July 4, 2009. If future market conditions do not produce projected sales price increases or additional processed meats sales volumes, and related levels of estimated operating margins, there remains the possibility that some additional amount of either this goodwill or the remaining amount of recorded other intangible assets not subject to amortization, or

10

both, could be deemed impaired during some future period including fiscal 2009, which may result in a material charge to earnings.

During the first half of 2008, Seaboard started operations at its processing plant to produce biodiesel. The ongoing profitability of this plant is primarily based on future sales prices, the price of alternative inputs, government usage mandates and the continuation of a federal tax credit, which is set to expire at the end of 2009. During the fourth quarter of 2008, a combination of continued start-up expenses, a decrease in fuel prices and relatively high input prices resulted in an operating loss. Seaboard performed an impairment evaluation of this plant as of December 31, 2008 but determined there was no impairment based on management's current assumptions of future production volumes, sales prices, cost inputs and the probabilities of the combination of federal usage mandates and tax credits extensions. However, if future market conditions do not produce projected sale prices or expected cost inputs or there is a material change in the government usage mandates or available tax credits, there is a possibility that some amount of the recorded value of this processing plant could be deemed impaired during some future period including 2009, which may result in a charge to earnings. The recorded value of these assets as of April 4, 2009 was \$44,976,000.

Prior to the first quarter of 2009, the Sugar segment was named Sugar and Citrus reflecting the citrus and related juice operations of this business. During the first quarter of 2009, management reviewed its strategic options for the citrus business in light of a continually difficult operating environment. In March 2009, management decided not to process, package or market the 2009 harvest for the citrus and related juice operations. As a result,

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

during the first quarter of 2009, a charge to earnings of \$2,803,000 was recorded primarily to write-down the value of related citrus and juice inventories to net realizable value, considering such remaining inventory will not be marketed similar to prior years but instead liquidated. In the second quarter of 2009, management decided to integrate and transform the land previously used for citrus production into sugar cane production and thus it is anticipated that Seaboard will incur an additional charge to earnings of approximately \$1,400,000 during the second quarter of 2009 in connection with this change in business. In addition, management is evaluating the use of the remaining fixed assets, primarily buildings and equipment, to determine the best alternative use of these assets in the future. Management is considering various alternatives, including leasing, selling, or integrating the fixed assets into the existing sugar business. Accordingly, depending on the final disposition of these fixed assets, additional charges to earnings could be incurred for potential write-down of these fixed assets in future quarters if such plans do not fully recover the existing net book value of such fixed assets. The net book value of these assets was \$3,684,000 as of April 4, 2009. Management anticipates finalizing its plans for these fixed assets by the end of 2009.

Included in the "All Other" segment is the Power division. The Power division sells approximately 34% of its power generation to a government-owned distribution company under a short-term contract for which Seaboard bears a concentrated credit risk as this customer, from time to time, has significant past due balances. As of April 4, 2009, this customer had total billings outstanding of \$26,337,000 of which \$20,000,000 was classified as long-term based on collection negotiations. In early May 2009, Seaboard received sovereign government bonds of the Dominican Republic with a par value of \$20,000,000 denominated in U.S. dollars to satisfy the outstanding billings Seaboard had classified as long-term. The bonds have maturities of June 30, 2010, 2011 and 2012.

On March 2, 2009, an agreement became effective under which Seaboard agreed to sell its two power barges in the Dominican Republic for \$70,000,000. The agreement calls for the sale to occur on or around January 1, 2011. During March 2009, \$15,000,000 was paid to Seaboard (recorded as long-term deferred revenue) and the \$55,000,000 balance of the purchase price was paid into escrow and will be paid to Seaboard at the closing of the sale. The book value of the two barges was \$22,935,000 as of April 4, 2009. Seaboard will continue to operate these two barges until the closing date of the sale, with an estimated annual depreciation cost of approximately \$3,600,000. Seaboard will be responsible for the wind down and decommissioning costs of the barges. Completion of the sale is dependent upon several issues, including meeting certain baseline performance and emission tests. Failure to satisfy or cure any deficiencies could result in the agreement being terminated and the sale abandoned. Seaboard could be responsible to pay liquidated damages of up to approximately \$15,000,000 should it fail to perform its obligations under the agreement, after expiration of applicable cure and grace periods. Seaboard will retain all other physical properties of this business and is considering options to continue its power business in the Dominican Republic after the sale of these assets is completed.

11

The following tables set forth specific financial information about

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

each segment as reviewed by Seaboard's management. Operating income for segment reporting is prepared on the same basis as that used for consolidated operating income. Operating income, along with income or losses from foreign affiliates for the Commodity Trading and Milling segment, is used as the measure of evaluating segment performance because management does not consider interest, other investment income and income tax expense on a segment basis.

Sales to External Customers:

(Thousands of dollars)	Three Months Ended

Administrative services provided by the corporate office allocated to the individual segments represent corporate services rendered to and costs incurred for each specific division with no allocation to individual segments of general corporate management oversight costs. Corporate assets include short-term investments, other current assets related to deferred compensation plans, fixed assets, deferred tax amounts and other miscellaneous items. Corporate operating losses represent certain operating costs not specifically allocated to individual segments.

13

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

LIQUIDITY AND CAPITAL RESOURCES

Summary of Sources and Uses of Cash

Cash and short-term investments as of April 4, 2009 decreased \$43.0 million to \$330.3 million from December 31, 2008. The decrease was the result of using cash generated by operating activities of \$58.1 million and \$15.0 million received for the potential sale of power barges, as discussed below, to reduce notes payable by \$98.7 million, to spend \$15.7 million on capital expenditures and to repurchase common stock for \$2.9 million. Cash from operating activities increased \$73.3 million for the three months ended April 4, 2009 compared to the same period in 2008, primarily as the result of decreases in working capital in the Commodity Trading and Milling segment, primarily as a result of decreased amounts of inventory, partially offset by lower net earnings for the first quarter of 2009 compared to the first quarter of 2008.

Acquisitions, Capital Expenditures and Other Investing Activities

During the three months ended April 4, 2009, Seaboard invested \$15.7 million in property, plant and equipment, of which \$6.9 million was expended in the Pork segment, \$5.8 million in the Marine segment, and \$2.1 million in the Sugar segment. The Pork segment expenditures were primarily for upgrades to the Guymon pork processing plant, improvements to existing hog facilities and the ham-boning and processing plant being built in Mexico. This plant is currently expected to be completed in the second quarter of 2009. The Marine segment expenditures were primarily for purchases of cargo carrying and handling equipment. In the Sugar segment, the capital expenditures were primarily for expansion of cane growing operations and development of the cogeneration plant. All other capital expenditures are of a normal recurring nature and primarily include replacements of machinery and equipment, and general facility modernizations and upgrades.

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

For the remainder of 2009 management has budgeted capital expenditures totaling \$79.2 million. The Pork segment plans to spend \$13.0 million for improvements to existing hog facilities, upgrades to the Guymon pork processing plant, additional facility upgrades and related equipment and completion of the plant in Mexico discussed above. The Marine segment has budgeted \$37.8 million primarily for the purchase of additional cargo carrying and handling equipment, and the expansion of existing port facilities. In addition, management will be evaluating whether to purchase additional containerized cargo vessels for the Marine segment during 2009. The Sugar segment plans to spend a total of \$22.8 million consisting of \$14.2 million for the development of a 40 megawatt cogeneration plant, with the remaining amount primarily for the expansion of cane growing operations and harvesting equipment. The cogeneration plant is expected to be operational by the second quarter of 2010 with an additional \$10.0 million anticipated to be spent during 2010. The balance of \$5.6 million is planned to be spent in all other businesses. Management anticipates paying for these capital expenditures from available cash, the use of available short-term investments or Seaboard's available borrowing capacity.

On March 2, 2009, an agreement became effective under which Seaboard agreed to sell its two power barges in the Dominican Republic on or around January 1, 2011 for \$70.0 million. During March 2009, \$15.0 million was paid to Seaboard and the \$55.0 million balance of the purchase price was paid into escrow and will be paid to Seaboard at the closing of the sale. See Note 8 to the Condensed Consolidated Financial Statements for further discussion.

Financing Activities and Debt

As of April 4, 2009, Seaboard had committed lines of credit totaling \$300.0 million and uncommitted lines totaling \$132.9 million. As of April 4, 2009, there were no borrowings outstanding under the committed lines of credit and borrowings under the uncommitted lines of credit totaled \$21.7 million. Outstanding standby letters of credit reduced Seaboard's borrowing capacity under its committed and uncommitted credit lines by \$58.1 million and \$1.9 million, respectively, primarily representing \$42.7 million for Seaboard's outstanding Industrial Development Revenue Bonds and \$15.2 million related to insurance coverages. Also included in notes payable as of April 4, 2009 was a term note of \$51.3 million denominated in Japanese Yen.

Seaboard's remaining 2009 scheduled long-term debt maturities total \$46.2 million. Although the current global liquidity crisis and worldwide economic downturn could affect Seaboard's ability to fund operations, management believes Seaboard's current combination of internally generated cash, liquidity, capital resources and borrowing capabilities will be adequate for its existing operations and any currently known potential plans for expansion of existing operations or business segments for 2009. In July 2008, Seaboard secured a \$300.0 million line of credit for five years and as of April 4, 2009, has cash and short-term investments of \$330.3 million with total net working capital of \$806.0 million. In management's view, the primary liquidity issues for 2009 pertain to its

14

customers' and suppliers' liquidity, financing capabilities and overall financial health, which could affect Seaboard's sales volumes or customer contract performance, procurement of or access

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

to needed inventory, supplies and equipment, and the timely collection of receivables along with related potential deterioration in the receivables aging. Management periodically reviews various alternatives for future financing to provide additional liquidity for future operating plans. Despite the current global business climate, management intends to continue seeking opportunities for expansion in industries in which Seaboard operates, utilizing existing liquidity and available borrowing capacity, and currently does not plan to pursue other financing alternatives.

On August 7, 2007, the Board of Directors authorized Seaboard to repurchase from time to time prior to August 31, 2009 up to \$50.0 million market value of its common stock in open market or privately negotiated purchases, of which \$11.6 million remained available at April 4, 2009. For the three months ended April 4, 2009, Seaboard used cash to repurchase 3,233 shares of common stock at a total price of \$2.9 million. It is anticipated that any future stock repurchases will be funded by cash on hand or short-term investments. Shares repurchased are retired and resume status of authorized and unissued shares. The Board's stock repurchase authorization does not obligate Seaboard to acquire a specific amount of common stock and the stock repurchase program may be modified or suspended at any time at Seaboard's discretion.

See Note 6 to the Condensed Consolidated Financial Statements for a summary of Seaboard's contingent obligations, including guarantees issued to support certain activities of non-consolidated affiliates or third parties who provide services for Seaboard.

RESULTS OF OPERATIONS

Net sales decreased to \$917.6 million for the first quarter of 2009 compared to \$993.7 million for the first quarter of 2008, primarily reflecting price decreases for commodities sold by the commodity trading business and decreased commodity trading volumes. Partially offsetting the decrease was higher volumes of pork products sold.

Operating income decreased to \$16.0 million in 2009, compared to \$59.4 million during the first quarter of 2008. The decrease for the quarter is primarily the result of lower commodity trading margins, including a \$13.6 million fluctuation of marking to market Commodity Trading and Milling derivative contracts, as discussed below. The decrease is also the result of lower sale prices for pork products and increases in the cost of production of live hogs and plant operations. The decreases were partially offset by higher margins on marine cargo services primarily as a result of higher cargo rates during 2009 compared to 2008.

Pork Segment

(Dollars in millions)	Three Months Ended	
	April 4, 2009	March 29, 2008
Net sales	\$ 262.8	\$ 238.9
Operating loss	\$ (17.1)	\$ (4.8)

Net sales for the Pork segment increased \$23.9 million in the first quarter of 2009 compared to the first quarter of 2008. The increase for the quarter is primarily the result of higher volumes of pork products sold, primarily export sales, and, to a lesser extent, sales of biodiesel related to the start-up of the new biodiesel

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

processing plant during the second quarter of 2008. The increased volumes were made possible by the expansion in daily capacity at the Guymon processing plant during the first quarter of 2008. The increase was partially offset by lower sale prices for pork products.

Operating income for the Pork segment decreased \$12.3 million in the first quarter of 2009 compared to the first quarter of 2008. The decrease primarily related to lower sale prices for pork products noted above, increased costs of third party hogs, and various increases in the cost of production of live hogs and plant operations. Increased costs for internally raised hogs processed during the quarter, primarily the result of previous increases in the price of corn and, to a lesser extent, soybean meal, along with related commodity derivative losses were offset by decreases in LIFO. LIFO increased operating income by \$5.1 million in 2009 compared to a decrease of \$7.1 million in the first quarter of 2008, primarily as a result of lower costs to purchase corn and soybean meal during the first quarter of 2009. Commodity derivative losses were \$1.6 million for the first quarter of 2009 compared to gains of \$5.7 million for the first quarter of 2008.

Management is unable to predict future market prices for pork products or the cost of feed and hogs purchased from third parties. As market volatility for commodity prices has continued during the first quarter of 2009,

15

management cannot predict future operating results but currently anticipates that this segment will become profitable during the second half of 2009. However, in April 2009, reports of a new flu strain believed to originate in Mexico rapidly received wide-spread public attention. Despite confirmations that people could not catch this strain of influenza by eating or handling pork products, early reports labeled this strain as "swine flu." In late April, U.S. officials re-named this strain as "2009 H1N1 flu", recognizing that this strain had not been found in any pigs, and therefore it cannot be contracted from pork products. In response to initial reports, certain countries banned U.S. pork exports and Seaboard's pork segment noted a decrease in demand and overall market prices for certain of its pork products. Management is currently unable to estimate the extent of the impact of these flu related concerns on the profitability of this segment or on Seaboard's results of operations, but believes the impact could be material depending on how quickly the general public disassociates the incident from eating pork products.

In addition, as discussed in Note 8 to the Condensed Consolidated Financial Statements, there is a possibility that some amount of either goodwill or other intangible assets not subject to amortization, or both, related to Daily's and some amount of the biodiesel plant could be deemed impaired during some future period including fiscal 2009, which may result in a charge to earnings if current projections are not met.

Commodity Trading and Milling Segment

(Dollars in millions)	Three Months Ended	
	April 4, 2009	March 29, 2008
Net sales	\$ 380.9	\$ 479.9

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

Operating income	\$ 13.1	\$ 49.1
Income from foreign affiliates	\$ 3.7	\$ 3.9

Net sales for the Commodity Trading and Milling segment decreased \$99.0 million in the first quarter of 2009 compared to the first quarter of 2008. The decrease is primarily the result of price decreases for commodities sold by the commodity trading business, especially for wheat, and decreased commodity trading volumes.

Operating income for this segment decreased \$36.0 million in the first quarter of 2009 compared to the first quarter of 2008. The decrease reflects the \$13.6 million fluctuation of marking to market the derivative contracts as discussed below and write-downs of \$8.8 million for certain grain inventories during the first quarter of 2009 for customer contract performance issues and related lower of cost or market adjustments as discussed further in Note 2 to the Condensed Consolidated Financial Statements. The decrease also reflects certain long inventory positions, especially wheat, taken by Seaboard which provided higher than average commodity trading margins during the first quarter of 2008 as the price of these commodities significantly increased to historic highs at the time of sale in 2008 and, to a lesser extent, the decreased commodity trading volumes noted above.

Due to the uncertain political and economic conditions in the countries in which Seaboard operates and the current volatility in the commodity markets, management is unable to predict future sales and operating results. However, management anticipates positive operating income for the remainder of 2009 although materially lower than 2008, excluding the potential effects of marking to market derivative contracts. It should be noted the unprecedented high level of grain prices during the first half of 2008 and the significant decrease in grain prices during the second half of 2008 and early 2009 increase certain business risks for each of the commodity trading, consolidated milling and foreign affiliate operations in this segment. Those risks, including holding high priced inventory or the potential for reduced sales volumes, can increase if governments impose sales price controls, grain prices remain volatile and/or competitors hold lower priced positions, or customers default, which could result in write-downs of inventory values and an increase in bad debt expense. In addition, see Note 2 to the Condensed Consolidated Financial Statements for discussion regarding certain grain inventories. If any one or more of these conditions develop, the result may materially lower operating income and could result in operating losses for any one or all of the commodity trading, consolidated milling and foreign affiliate operations.

16

Had Seaboard not applied mark-to-market accounting to its derivative instruments, operating income would have been lower by \$3.6 million and \$17.2 million, respectively, for the first quarter of 2009 and 2008. While management believes its commodity futures and options, foreign exchange contracts and forward freight agreements are primarily economic hedges of its firm purchase and sales contracts or anticipated sales contracts, Seaboard does not perform the extensive record-keeping required to account for these types of transactions as hedges for accounting purposes. Accordingly, while the changes in value of the derivative instruments were marked to market, the changes in value of the firm purchase or sales contracts were not. As products are delivered to customers, these mark-to-

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

market adjustments will be primarily offset by realized margins as revenue is recognized. Accordingly, these mark-to-market gains could reverse in future periods, including fiscal 2009.

Income from foreign affiliates in the first quarter of 2009 decreased by \$0.2 million compared to the first quarter of 2008. Based on the uncertainty of local political and economic situations in the countries in which the flour and feed mills operate, management cannot predict future results.

Marine Segment

(Dollars in millions)	Three Months Ended	
	April 4, 2009	March 29, 2008
Net sales	\$ 206.9	\$ 210.9
Operating income	\$ 19.7	\$ 10.9

Net sales for the Marine segment decreased \$4.0 million in the first quarter of 2009 compared to the first quarter of 2008 primarily reflecting lower cargo volumes as a result of economic declines in most markets served by Seaboard. The decrease in net sales was partially offset by higher cargo rates in most market served for the first quarter of 2009 compared to the first quarter of 2008, although most cargo rates were lower than the fourth quarter of 2008.

Operating income for the Marine segment increased \$8.8 million for the first quarter of 2009 compared to the first quarter of 2008. The increase was primarily the result of higher cargo rates discussed above and, to a lesser extent, significantly lower fuel costs for vessels and trucking expenses on a per unit shipped basis. Partially offsetting the increase was higher operating costs on a per unit shipped basis including charter hire and owned-vessel operating costs, port costs and stevedoring. Management cannot predict changes in future cargo volumes and cargo rates or to what extent changes in economic conditions in markets served will continue to affect net sales or operating income during the remainder of 2009. However, given the recent decline in global trade, management anticipates a material decrease in operating income for the remainder of 2009 compared to 2008, although recent trends suggesting lower fuel, trucking and charter hire expenses for the remainder of 2009 could result in better than anticipated operating results.

Sugar Segment

(Dollars in millions)	Three Months Ended	
	April 4, 2009	March 29, 2008
Net sales	\$ 42.0	\$ 31.0
Operating income	\$ 2.3	\$ 3.2
Income from foreign affiliates	\$ 0.2	\$ 0.0

Net sales for the Sugar segment increased \$11.0 million for the first quarter of 2009 compared to the first quarter of 2008. The increase primarily reflects an increase in volumes and, to a lesser extent, higher sugar prices primarily for export sales. Although domestic Argentine sugar prices increased slightly, governmental authorities continue to attempt to control inflation by limiting the

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

price of basic commodities, including sugar. Accordingly, management cannot predict whether sugar prices will continue to increase.

17

Operating income decreased \$0.9 million in the first quarter of 2009 compared to the first quarter of 2008. The decrease primarily reflects a \$2.8 million charge to earnings in 2009 related to write-down of citrus inventories and related costs as discussed below along with higher selling and administrative personnel costs partially offset by higher income from sugar sales as discussed above. Management anticipates this segment to remain profitable for the remainder of 2009. See Note 8 to the Condensed Consolidated Financial Statements for discussion regarding the decision by management in March 2009 to not process, package or market the 2009 harvest for the citrus and related juice operations plus an additional charge to earnings of approximately \$1.4 million anticipated to be incurred in the second quarter of 2009 related to the citrus plantation and potential further write-downs in future quarters related to the remaining fixed assets with a net book value of \$3.7 million as of April 4, 2009.

All Other

(Dollars in millions)	Three Months Ended	
	April 4, 2009	March 29, 2008
Net sales	\$ 25.0	\$ 32.9
Operating income	\$ 1.6	\$ 2.6

Net sales and operating income primarily represents results from the Dominican Republic Power division. Net sales decreased \$7.9 million in the first quarter of 2009 compared to the first quarter of 2008 primarily reflecting lower rates. The lower rates were attributable primarily to lower fuel costs, a component of pricing. Operating income decreased \$1.0 million in the first quarter of 2009 compared to the first quarter of 2008 primarily as a result of rates decreasing more than fuel costs decreased. Management cannot predict future fuel costs or the extent to which rates will fluctuate compared to fuel costs, but anticipates this segment to remain profitable for the remainder of 2009. See Note 8 to the Condensed Consolidated Financial Statements for the potential future sale of certain assets of this business.

Selling, General and Administrative Expenses

Selling, general and administrative ("SG&A") expenses increased by \$5.7 million in the first quarter of 2009 compared to the first quarter of 2008. The increase was primarily due to increased personnel costs. As a percentage of revenues, SG&A increased to 5.2% in the first quarter of 2009 compared to 4.2% for the first quarter of 2008 primarily as a result of decreased sales in the Commodity Trading and Milling segment.

Foreign Currency Loss, Net

The increase in foreign currency loss, net in the first quarter of 2009 compared to the first quarter of 2008 primarily reflects foreign currency losses in the commodity trading and milling segment related to transactions denominated in various African currencies

and the Euro.

Income Tax Expense

The effective tax rate increased in 2009 compared to 2008 resulting in a tax expense for 2009 versus a tax benefit in 2008 primarily based on a projected domestic taxable income for 2009 compared to domestic losses in 2008.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Seaboard is exposed to various types of market risks in its day-to-day operations. Seaboard utilizes derivative instruments to mitigate some of these risks including both purchases and sales of futures and options to hedge inventories, forward purchase and sale contracts, forward purchases, and forward freight agreements. Primary market risk exposures result from changing commodity prices, freight rates, foreign currency exchange rates and interest rates. From time to time, Seaboard may also enter into speculative derivative transactions not directly related to its raw material requirements. The nature of Seaboard's market risk exposure related to these items has not changed materially since December 31, 2008. See Note 4 to the Condensed Consolidated Financial Statements for further discussion.

18

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures - Seaboard's management evaluated, under the direction of our Chief Executive and Chief Financial Officers, the effectiveness of Seaboard's disclosure controls and procedures as defined in Exchange Act Rule 13a-15(e) as of April 4, 2009. Based upon and as of the date of that evaluation, Seaboard's Chief Executive and Chief Financial Officers concluded that Seaboard's disclosure controls and procedures were effective to ensure that information required to be disclosed in the reports it files and submits under the Securities Exchange Act of 1934 is recorded, processed, summarized and reported as and when required. It should be noted that any system of disclosure controls and procedures, however well designed and operated, can provide only reasonable, and not absolute, assurance that the objectives of the system are met. In addition, the design of any system of disclosure controls and procedures is based in part upon assumptions about the likelihood of future events. Due to these and other inherent limitations of any such system, there can be no assurance that any design will always succeed in achieving its stated goals under all potential future conditions.

Change in Internal Controls - There has been no change in Seaboard's internal control over financial reporting required by Exchange Act Rule 13a-15 that occurred during the fiscal quarter ended April 4, 2009 that has materially affected, or is reasonably likely to materially affect, Seaboard's internal control over financial reporting.

PART II - OTHER INFORMATION

Item 1A. Risk Factors

There have been no material changes in the risk factors as previously disclosed in Seaboard's Annual Report on form 10-K for

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

the year ended December 31, 2008.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table contains information regarding Seaboard's purchase of its common stock during the quarter.

Issuer Purchases of Equity Securities

Period	Total Number of Shares Purchased	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs	Approximate Dollar Value of Shares that May Yet Be Purchased Under the Plans or Programs
January 1 to January 31, 2009	-	n/a	n/a	\$14,500,433
February 1 to February 28, 2009	1,502	\$954.57	1,502	\$13,066,672
March 1 to April 4, 2009	1,731	\$869.26	1,731	\$11,561,979
Total	3,233	\$908.89	3,233	\$11,561,979

All purchases during the quarter were made under the authorization from our Board of Directors to purchase up to \$50.0 million of Seaboard common stock announced on August 8, 2007. An expiration date of August 31, 2009 has been specified for this authorization. All purchases were made through open-market purchases and all the repurchased shares have been retired.

19

Item 4. Submission of Matters to a Vote of Security Holders

The annual meeting of stockholders was held on April 27, 2009 in Auburndale, Massachusetts. Three items were submitted to a vote as described in Seaboard's Proxy Statement dated March 18, 2009. The following table briefly describes the proposals and results of the stockholders' vote.

	Votes in Favor	Votes Withheld	Votes Against	Votes Abstaining
1. To elect the following persons as directors:				
Steven J. Bresky	1,113,012.24	94,382		
David A. Adamsen	1,132,140.24	75,254		
Douglas W. Baena	1,132,138.24	75,256		
Joseph E. Rodrigues	1,131,187.24	76,207		
Edward I. Shifman, Jr.	1,170,450.24	36,944		
2. To ratify selection of KPMG LLP as independent auditors for 2009.	1,204,242.24	2,424	728	
	Votes in Favor	Votes Against	Votes Abstaining	

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

3. To approve a proposed amendment to paragraph 4 of Seaboard's Certificate of Incorporation to decrease the number of authorized shares of common stock from 4,000,000 shares to 1,250,000 shares. 1,184,556.24 21,049 1,789

There were no broker nonvotes on any matter.

Item 6. Exhibits

3.1 Restated Certificate of Incorporation of Seaboard Corporation

31.1 Certification of the Chief Executive Officer Pursuant to Exchange Act Rules 13a-14(a)/15d-14(a), as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

31.2 Certification of the Chief Financial Officer Pursuant to Exchange Act Rules 13a-14(a)/15d-14(a), as Adopted Pursuant to Section 302 of the Sarbanes-Oxley Act of 2002

32.1 Certification of the Chief Executive Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

32.2 Certification of the Chief Financial Officer Pursuant to 18 U.S.C. Section 1350, as Adopted Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002

This Form 10-Q contains forward-looking statements with respect to the financial condition, results of operations, plans, objectives, future performance and business of Seaboard Corporation and its subsidiaries (Seaboard). Forward-looking statements generally may be identified as statements that are not historical in nature; and statements preceded by, followed by or that include the words "believes," "expects," "may," "will," "should," "could," "anticipates," "estimates," "intends," or similar expressions. In more specific terms, forward-looking statements, include, without limitation: statements concerning projection of revenues, income or loss, capital expenditures, capital structure or other financial items, including the impact of mark-to-market accounting on operating income; statements regarding the plans and objectives of management for future operations; statements of future economic performance; statements regarding the intent, belief or current expectations of Seaboard and its management with respect to: (i) Seaboard's ability to obtain adequate financing and liquidity, (ii) the price of feed stocks and other materials used by Seaboard, (iii) the sales price or market conditions for pork, grains, sugar and other products and services, (iv) statements concerning management's expectations of recorded tax effects under existing circumstances, (v) the ability of the Commodity Trading and Milling segment

20

to successfully compete in the markets it serves and the volume of business and working capital requirements associated with the competitive trading environment, (vi) the charter hire rates and fuel prices for vessels, (vii) the stability of the Dominican Republic's economy, fuel costs and related spot market prices and collection of receivables in the Dominican Republic, (viii) the

Edgar Filing: SEABOARD CORP /DE/ - Form 10-Q

ability of Seaboard to sell certain grain inventories in foreign countries at current cost basis and the related contract performance by customers, (ix) the effect of the fluctuation in foreign currency exchange rates, (x) statements concerning profitability or sales volume of any of Seaboard's segments, (xi) the anticipated costs and completion timetable for Seaboard's scheduled capital improvements, (xii) the impact from the flu incident on the demand and overall market prices for pork products, or (xiii) other trends affecting Seaboard's financial condition or results of operations, and statements of the assumptions underlying or relating to any of the foregoing statements.

This list of forward-looking statements is not exclusive. Seaboard undertakes no obligation to publicly update or revise any forward-looking statement, whether as a result of new information, future events, changes in assumptions or otherwise. Forward-looking statements are not guarantees of future performance or results. They involve risks, uncertainties and assumptions. Actual results may differ materially from those contemplated by the forward-looking statements due to a variety of factors. The information contained in this report, including without limitation the information under the headings "Management's Discussion and Analysis of Financial Condition and Results of Operations," identifies important factors which could cause such differences.

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
