**TRANSACTIONS IN FOREIGN CURRENCY AND CONVERSION OF FINANCIAL STATEMENTS OF FOREIGN OPERATIONS
INFORMATION RELATED TO BULLETIN B-15**

CONSOLIDATED

Foreign currency transactions and exchange differences Transactions in foreign currencies are recorded at the exchange rates prevailing at the celebration and liquidation dates. The assets and liabilities in foreign currencies are translated at the exchange rates prevailing at the date of the consolidated balance sheet. The exchange gains or losses incurred in connection with those assets or liabilities are included in the Statement of income, as part of the comprehensive financing cost. Note 3 presents the consolidated position in foreign currencies at the end of each year and the exchange rates used in the translation.

The functional and reporting currency of the Company is the Mexican peso. The financial statements of foreign subsidiaries were translated to Mexican pesos in accordance with the New Mexican Financial Reporting Standard MFRS B-15 "Conversion of foreign currencies" that came into effect on January 1, 2008. Under this Standard, the first step to convert financial information from operations abroad is the determination of the functional currency. The functional currency is the currency of the primary economic environment of the foreign operation or, if different, the currency that mainly impacts its cash flows. The new rule incorporates the concepts of recording currency that is the currency in which the entity maintains its accounting records, whether for legal or information purposes and the reporting currency, which is the currency chosen by the Company to report its financial information.

The U.S. dollar was considered as the functional currency of the subsidiary SimRep, therefore the financial statements of this subsidiary were translated into Mexican pesos by applying: i) the exchange rates at the balance sheet date to all assets and liabilities and (ii) the historical exchange rate at stockholders' equity accounts and revenues, costs and expenses. The difference resulting from the translation or consolidation processes or from applying the equity method, is recognized as a cumulative translation adjustment as part of Translation effect in foreign subsidiaries in Stockholders' equity.

The Mexican Peso was considered the functional currency of the subsidiary Pacific Steel and the U.S. dollar as its recording currency; therefore the financial statements were translated to Mexican pesos as follows: i) monetary assets and liabilities by applying the exchange rates at the balance sheet date; ii) non-monetary assets and liabilities, as well as stockholders' equity accounts, at the historical exchange rate; and iii) revenues, costs and expenses at the historical exchange rate. Translation differences were carried directly to the income statement under the caption Foreign exchange loss, net.
