Dear  
SHAREHOLDER

I am pleased to report that over the period covered by this report, your Nuveen New York Fund has continued to provide you with attractive tax-free monthly income and a solid total return. For specific information about the performance of your Fund, please read the Portfolio Manager's Comments and Performance Overview sections of this report.

With interest rates at historically low levels, many have begun to wonder how fixed-income investments will perform if interest rates begin to rise. No one knows what the future will bring, which is why we think a well-balanced portfolio that is structured and carefully monitored with the help of an investment professional is an important component in achieving your long-term financial goals. A well-diversified portfolio may actually help to reduce your overall investment risk, and we believe that municipal bond investments like your Nuveen Fund can be important building blocks in a portfolio crafted to perform well through a variety of market conditions.

I'd also like to direct your attention to the inside front cover of this report, which explains the quick and easy process to begin receiving Fund reports like this via e-mail and the internet. Thousands of Nuveen Fund shareholders already have signed-up, and they are getting their Fund information faster and more conveniently than ever. I urge you to consider joining them.

Since 1898, Nuveen Investments has offered financial products and solutions that incorporate careful research, diversification, and the application of conservative risk-management principles. We are grateful that you have chosen us as a partner as you pursue your financial goals. We look forward to continuing to earn your trust in the months and years ahead.

Nuveen New York Municipal Closed-End Exchange-Traded Funds (NQN, NVN, NUN, NNF, NKO, NRK)

Portfolio Manager's  
COMMENTS

Portfolio manager Paul Brennan reviews U.S. and state economic conditions, key investment strategies, and the recent performance of the Funds. With twelve years of investment experience, Paul assumed portfolio management responsibility for most of these New York Funds in 1999, adding NKO and NRK upon their inception in March 2002 and November 2002, respectively.

WHAT WERE THE MAJOR FACTORS AFFECTING THE U.S. ECONOMY AND THE MUNICIPAL MARKET DURING THIS REPORTING PERIOD?

In a number of ways, underlying economic and market conditions have not changed significantly since our last shareholder report dated September 30, 2002. We believe the most influential factors affecting the performance of the U.S. economy and the municipal market continued to be the slow pace of economic growth and interest rates that remained at 40-year lows. In addition, continued geopolitical concerns, centering on Iraq and the ongoing threat of terrorism, also had an impact during this reporting period.

In the municipal market, the sluggish economic recovery and a general lack of inflationary pressures created conditions that helped many bonds perform well

during the period ended March 31, 2003. After record issuance of \$357 billion in calendar year 2002, municipal bond new issue supply nationwide remained strong during the first quarter of 2003. More than \$83 billion in new municipal bonds were issued in January, February and March 2003, up 22% over the same period in 2002. Demand for municipal bonds also remained strong over most of this reporting period, as many individual investors continued to seek tax-free income and increased diversification for their portfolios. Institutional investors, including traditional municipal bond purchasers such as property/casualty insurance companies as well as non-traditional purchasers such as hedge funds, arbitrage accounts, and pension funds, also were active municipal buyers over this reporting period.

HOW WERE ECONOMIC AND MARKET CONDITIONS IN NEW YORK?

Despite a diverse economic base and per capita income levels that rank among the highest in the nation, the economies of both New York state and New York City have been significantly impacted by anemic growth, continued declines in the financial sector, the national recession in manufacturing, and a decline in tourism.

Like many other government entities, New York state and city are grappling with budget deficits stemming largely from a decline in tax revenues. Although the state managed to close a \$5.8 billion shortfall in its fiscal 2003 budget by cutting expenses and drawing on rainy day reserves, it was unsuccessful in plugging a gap that subsequently appeared and ended fiscal 2003 with a \$2 billion deficit. The state's proposed \$90.8 billion fiscal 2004 budget includes a gap of \$11.5 billion, and the state has indicated that without some form of special financing it may face a cash crisis as 2003 unfolds. Although a balanced budget was scheduled to be enacted by April 1, negotiations were still underway at the end of this reporting period, and - for the 19th consecutive year - the state was temporarily operating without a budget.

In New York City, the budgetary impact of the tax revenue decline was compounded by soaring public security costs. However, through expenditure reductions, federal and state aid, and Transitional Finance Authority (TFA) borrowing, the city was successful in balancing its fiscal 2003 budget. A subsequent shortfall was closed with further

2

spending cuts and the largest property tax increase (18.5%) in New York City history, enabling the city to end fiscal 2003 with a projected \$900 million surplus. Despite this surplus and \$2.6 billion in spending cuts over the past 16 months, the city is again facing a deficit of about \$3.8 billion in its fiscal 2004 budget. One proposal under study would reinstate the tax on the city's 800,000 commuters, which could raise as much as \$1.4 billion, but which requires approval from the state government. If the commuter tax is not approved, a contingency plan that includes the layoff of 15,000 city employees is being evaluated. To date, New York City has taken the steps, no matter how difficult, to keep its budget balanced. This has been motivated in part by the state-mandated control and review processes that grew out of the city's fiscal problems in the 1970s.

In March 2003, Moody's reconfirmed its A2 and Standard & Poor's its AA credit ratings for the state. Moody's currently rates New York City A2 with a declining outlook, while S&P has assigned the city an A rating with a negative outlook. Municipal issuance in New York continued to be very robust, with \$49 billion of new bonds in calendar year 2002, an increase of 117% over 2001, and \$9 billion

in the first quarter of 2003, up 91% over January-March 2002.

For additional information, see the individual Performance Overview for your Fund in this report.

For the twelve months ended March 31, 2003, all of the Funds in this report with at least one year of history outperformed the unleveraged, unmanaged Lehman Brothers New York Insured Tax-Free Bond Index, as well as their Lipper fund peer group average. Much of the Funds' outperformance of the Lehman Index is attributable to the leveraged structure of these Funds. Leverage is a strategy that can provide the opportunity for additional common shareholder income by accepting some additional price risk and volatility.

In addition to leverage, the relative performances of these Funds were influenced by other factors, including call exposure, portfolio trading activity and the price movement of specific sectors and holdings. For example, these insured Funds benefited from the fact that, over the one-year period, insured New York bonds tended to outperform many other sectors of the municipal bond market.

HOW DID THE MARKET ENVIRONMENT AFFECT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As short-term interest rates remained at historically low levels, the Funds' use of leverage also enhanced their dividend-paying capabilities. The amount of this benefit is tied in part to the short-term rates these Funds pay their MuniPreferred(R) shareholders. Low short-term rates can enable the Funds to reduce the amount of income they pay MuniPreferred shareholders, which can potentially leave more earnings to support common share dividends. During the twelve months ended March 31, 2003, the continued low level of short-term interest rates enabled us to implement four dividend increases in NQN and three in NVN, NUN, and NNF. NKO has continued to pay an attractive monthly dividend

since its first distribution in May 2002, and NRK, which was introduced in November 2002, declared its first monthly dividend in January 2003.

Over the course of the twelve-month period, the share prices of the four older Funds rose, while those of NKO and NRK declined slightly from their initial offering prices. As of March 31, 2003, the four older Funds and NKO were all trading at a discount to their common share net asset values,

- 1 The total annual returns on common share net asset value (NAV) for these Nuveen Funds are compared with the total annual return of the Lehman Brothers New York Insured Tax-Exempt Bond Index, an unleveraged index comprising a broad range of insured New York municipal bonds. Results for the Lehman index do not reflect any expenses.
- 2 The total returns of the Nuveen New York Insured Funds are compared with the average annualized return of the nine funds in the Lipper New York Insured Municipal Debt Funds category. Fund and Lipper returns assume reinvestment of dividends.
- 3 The taxable-equivalent yield represents the yield that must be earned on a taxable investment in order to equal the yield of the Nuveen Fund on an after-tax basis. The taxable-equivalent yield is based on the Fund's market yield on the indicated date and a combined federal and state income tax rate of 35%.

3

while NRK was trading at a premium (see charts on individual Performance Overview pages).

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE YEAR ENDED MARCH 31, 2003?

Over this period, our strategic focus across all of these Funds continued to be on diversifying their portfolios, enhancing call protection and positioning the Funds more defensively in anticipation of potential changes in the interest rate environment. Given the recent steepness of the municipal yield curve, we sought value in long-intermediate securities (i.e., bonds that mature in 15 to 20 years). In many cases, securities in this part of the yield curve were offering yields similar to those of longer-term bonds but, in our opinion, with less interest rate risk. The purchase of these long-intermediate bonds helped to moderate the durations of these Funds, making their portfolios less sensitive to interest rate changes while still allowing them to provide competitive yields and returns.

As the economic recovery continued to be sluggish and growth remained slow, we also tried to be ready for a scenario in which interest rates might stay relatively low over a longer period of time than some are now suggesting. We believe that structuring the portfolios with bonds offering maturities of 15 to 20 years helps to position the Funds for this environment as well.

During 2002, the Metropolitan Transportation Authority (MTA), which includes the Triborough Bridge and Tunnel Authority, restructured its debt program by issuing \$15 billion in new bonds. As the new MTA issues came to market, all of the previous debt was either advance refunded or escrowed to maturity. Since we had accumulated large positions in MTA bonds in anticipation of the restructuring, the advance refunding increased our allocations of pre-refunded bonds in each of

these Funds, benefiting the Funds' performance through significant price appreciation as well as enhanced credit quality.

The heavy issuance in the New York market over the past year provided us with increased opportunities to purchase the types of bond structures that we favor, especially as we worked to shorten the Funds' durations to help guard against the risk of rising interest rates. We also continued to look for individual issues that we believed would perform well regardless of the future direction of interest rates. From a sector perspective, our portfolios remained heavily weighted in education bonds, which was one of the top performing groups among the Lehman revenue sectors for the twelve-month period.

Given the current geopolitical and economic climate, we also believed that maintaining strong credit quality remained a vital requirement for our Funds. As of March 31, 2003, the four older Funds were 100% invested in U.S. guaranteed and/or insured bonds, while NKO and NRK held 87% and 86%, respectively, of their portfolios in U.S. guaranteed or insured bonds. Although both NKO and NRK are predominantly invested in insured bonds, these two Funds are allowed to invest up to 20% in uninsured investment-grade (rated BBB or higher) securities. In addition, NRK cannot hold any bonds whose income is subject to the federal alternative minimum tax (AMT). As noted earlier, NRK declared its first dividend in January 2003, and we believe the portfolio is well invested and the Fund is in a good position to pay attractive monthly dividends going forward.

As part of their allocations of uninsured, investment-grade quality bonds, NKO and NRK currently hold modest positions in bonds backed by the master

4

tobacco settlement agreement of 1998. Recently, the increased issuance of tobacco bonds by states with budget problems similar to New York's, as well as pending court cases against the tobacco companies, have weakened the prices of such bonds. However, the prices of New York tobacco bonds, especially those issued by New York City, generally have held up better than many issued in other states due to their more comprehensive debt service coverage. At the present time, our strategy is to maintain our current tobacco holdings while we continue to regularly evaluate the situation.

WHAT IS YOUR OUTLOOK FOR THE MUNICIPAL MARKET IN GENERAL AND THE FUNDS IN PARTICULAR?

In the municipal market, new issuance volume nationally should remain strong, as issuers continue to take advantage of the low rate environment. Given the current budget deficits in both New York City and state and their continued need for spending on infrastructure, education, and healthcare, we expect to see significant issuance of new municipal debt in New York. We think demand for tax-exempt municipal bonds should also remain solid, as investors continue to look for ways to rebalance their portfolios and reduce overall investment risk. Over the coming months, we will continue to closely monitor the budgetary situation in New York and watch for any impact on the state's credit rating.

Over the next two years, we believe that these Funds all offer adequate levels of call protection. The two newer Funds - NKO and NRK - do not face any significant call exposure for several years. In the four older Funds, as of March 31, 2003, the percentage of bonds eligible for calls during 2003 and 2004 ranged from 11% to 14%. The number of actual calls over the next two years will depend largely on market interest rates during this time.

Going forward, we plan to closely watch several areas of the market, including progress toward resolution of New York City and state budget deficits, the overall credit environment, and the direction of interest rates and inflation. Over the next twelve months, we expect to see our allocations of pre-refunded bonds drop, as we try to capture the appreciation in these bonds by selling them at a premium and redeploy the proceeds into other opportunities. In general, we plan to remain focused on strategies that can add value for our shareholders and provide support for the Funds' long-term dividend-paying capabilities.

Municipal bonds have performed well in recent years. However, there is no guarantee this trend will continue, which is why we believe it's important to maintain an appropriate balance of investments. As part of a well-structured, well-balanced portfolio, we believe your Nuveen Fund can continue to play an important role in helping you reach your long-term financial objectives.

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The New York Funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen New York Investment Quality Municipal Fund, Inc. (NQN), Nuveen New York Select Quality Municipal Fund, Inc. (NVN), Nuveen New York Quality Income Municipal Fund, Inc. (NUN), Nuveen Insured New York Premium Income Municipal Fund, Inc. (NNF), Nuveen Insured New York Dividend Advantage Municipal Fund (NKO) and Nuveen Insured New York Tax-Free Advantage Municipal Fund (NRK). All of the Funds' Common shares trade on the New York Stock Exchange, with the exception of Insured New York Dividend Advantage's Common shares (NKO) and Insured New York Tax-Free Advantage's Common shares

## Edgar Filing: NUVEEN INSURED NEW YORK DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-30D

(NRK) which trade on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Prior to the commencement of operations of Insured New York Dividend Advantage (NKO) and Insured New York Tax-Free Advantage (NRK), each Fund had no operations other than those related to organizational matters, the initial capital contribution of \$100,275 by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. (formerly, The John Nuveen Company), and the recording of the organization expenses (\$11,500 per Fund) and their reimbursement by Nuveen Investments, LLC (formerly, Nuveen Investments), also a wholly owned subsidiary of Nuveen Investments, Inc.

Each Fund seeks to provide current income exempt from both regular federal and New York state income taxes, and in the case of Insured New York Tax-Free Advantage (NRK) the alternative minimum tax applicable to individuals, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within the state of New York.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with accounting principles generally accepted in the United States.

### Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Directors/Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Directors/Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

### Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At March 31, 2003, New York Investment Quality (NQN), New York Select Quality (NVN), New York Quality Income (NUN), Insured New York Premium Income (NNF) and Insured New York Dividend Advantage (NKO) had outstanding when-issued purchase commitments of \$2,350,779, \$2,509,259, \$2,535,672, \$1,311,438 and \$1,049,150, respectively. At March 31, 2003, there were no such outstanding purchase commitments in Insured New York Tax-Free Advantage (NRK).

### Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis.

### Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund

intends to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute all of its net investment income to its shareholders. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and New York state income taxes, and in the case of Insured New York Tax-Free Advantage (NRK) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds.

52

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared and paid monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from accounting principles generally accepted in the United States. Accordingly, temporary over-distributions as a result of these differences may occur and will be classified as either distributions in excess of net investment income, distributions in excess of net realized gains and/or distributions in excess of net ordinary taxable income from investment transactions, where applicable.

Preferred Shares

The Funds have issued and outstanding \$25,000 stated value Preferred shares. Each Fund's Preferred shares are issued in one or more Series. The dividend rate on each Series may change every seven days, as set pursuant to a dutch auction process by the auction agent, and is payable at or near the end of each rate period. The number of Preferred shares outstanding, by Series and in total, for each of the Funds is as follows:

Effective January 17, 2003, Insured New York Tax-Free Advantage (NRK) issued 1,080 Series TH \$25,000 stated value Preferred shares.

#### Insurance

New York Investment Quality (NQN), New York Select Quality (NVN), New York Quality Income (NUN) and Insured New York Premium Income (NNF) invest in municipal securities which are either covered by insurance or are backed by an escrow or trust account containing sufficient U.S. Government or U.S. Government agency securities, both of which ensure the timely payment of principal and interest.

Insured New York Dividend Advantage (NKO) and Insured New York Tax-Free Advantage (NRK) invest at least 80% of their net assets in municipal securities that are covered by insurance. Each Fund may also invest up to 20% of its net assets in municipal securities which are either (i) backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Such insurance does not guarantee the market value of the municipal securities or the value of the Funds' Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Funds ultimately dispose of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio Insurance is effective only while the municipal securities are held by the Funds. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Funds include value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Funds the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

#### Notes to FINANCIAL STATEMENTS (Unaudited) (continued)

##### Derivative Financial Instruments

The Funds may invest in certain derivative financial instruments including futures, forward, swap and option contracts, and other financial instruments with similar characteristics. Although the Funds are authorized to invest in such financial instruments, and may do so in the future, they did not make any such investments during the period ended March 31, 2003.

##### Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

##### Offering Costs

Edgar Filing: NUVEEN INSURED NEW YORK DIVIDEND ADVANTAGE MUNICIPAL FUND - Form N-30D

Nuveen Investments, LLC has agreed to pay all Common share offering costs (other than the sales load) that exceed \$.03 per Common share for InsuredNew York Dividend Advantage (NKO) and Insured New York Tax-Free Advantage (NRK). InsuredNew York Dividend Advantage's (NKO) and Insured New York Tax-Free Advantage's (NRK) share of Common share offering costs (\$238,500 and \$105,000, respectively) were recorded as a reduction of the proceeds from the sale of Common shares.

Costs incurred by Insured New York Dividend Advantage (NKO) and Insured New York Tax-Free Advantage (NRK) in connection with their offering of Preferred shares (\$757,296 and \$686,800, respectively) were recorded as a reduction to paid-in surplus.

Use of Estimates

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

Build Your Wealth  
AUTOMATICALLY

SIDEBAR TEXT:NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

#### NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

#### EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

#### HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on dividends and distributions awaiting reinvestment. Because the market price of shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### FLEXIBILITY

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants

in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

POLICY CHANGE

On November 14, 2002, the Board adopted a policy that allows these Funds, in addition to investments in municipal bonds, to invest up to 5% of its net assets (including assets attributable to preferred shares, if any) in tax-exempt or taxable fixed-income securities or equity securities for the purpose of acquiring control of an issuer whose municipal bonds (a) the Fund already owns and (b) have deteriorated or are expected shortly to deteriorate significantly in credit quality, provided Nuveen Advisory determines that such investment should enable the Fund to better maximize the value of its existing investment

in such issuer. This policy is a non-fundamental policy of each Fund which means that it can be changed at any time by the Board of Trustees without vote of the shareholders.

GLOSSARY OF TERMS USED IN THIS REPORT

**Average Annual Total Return:** This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return (including change in NAV and reinvested dividends) that would have been necessary on an annual basis to equal the investment's actual performance over the time period being considered.

**Average Effective Maturity:** The average of all the maturities of the bonds in a fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

**Leverage-Adjusted Duration:** Duration is a measure of a bond or bond fund's sensitivity to changes in interest rates. Generally, the longer a bond or fund's duration, the more the price of the bond or fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is generally longer than the duration of the actual portfolio of individual bonds that make up the Fund.

**Market Yield (also known as Dividend Yield or Current Yield):** An investment's current annualized dividend divided by its current market price.

**Net Asset Value (NAV):** A fund's NAV is calculated by subtracting the liabilities of the fund from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

**Taxable-Equivalent Yield:** The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.

-----

Each Fund intends to repurchase shares of its own common or preferred stock in the future at such times and in such amounts as is deemed advisable. No shares were repurchased during the six-month period ended March 31, 2003. Any future repurchases will be reported to shareholders in the next annual or semiannual report.
