Chairman's

LETTER TO SHAREHOLDERS

I am pleased to report that over the six-month period covered by this semiannual
report your Fund continued to provide you with monthly income free from federal,
state, and in some cases, local taxes, as well as an attractive total return.
For more details about the management strategy and performance of your Fund,
please see the Portfolio Managers' Comments and Performance Overview sections of
this report.

As I noted in my last letter to you, our conversations with financial advisors
and investors suggest that many of you may be wondering whether interest rates
will soon begin to rise, how high they might go, and whether that makes this a
good time to adjust your holdings of fixed-income investments. We can't answer
that question for you - no one knows what the future will bring.

"OUR MISSION CONTINUES TO BE TO ASSIST YOU AND YOUR FINANCIAL ADVISOR BY
OFFERING INVESTMENT SERVICES AND PRODUCTS THAT CAN HELP YOU TO SECURE YOUR
FINANCIAL OBJECTIVES."

From our experience, what we do know is that a well-balanced portfolio,
structured and carefully monitored with the help of a trusted investment
professional, can be an important component in achieving your long-term
financial goals. In fact, a well-diversified portfolio may actually help to
reduce your overall investment risk. That is one reason why we believe that a
municipal bond investment like your Nuveen Fund can be an important building
block in a comprehensive investment program designed to perform well in a
variety of market conditions.

As in past reports, I'd also like to direct your attention to the inside front cover, which explains the quick and easy process to begin receiving these Fund reports via e-mail and the internet. Thousands of Nuveen Fund shareholders already have signed-up, and they are getting their Fund information faster and more conveniently than ever. I urge you to consider joining them.

At Nuveen Investments, our mission continues to be to assist you and your financial advisor by offering investment services and products that can help you to secure your financial objectives. We are grateful that you have chosen us as a partner as you pursue your financial goals, and we look forward to continuing to earn your trust in the months and years ahead.

Sincerely,

/s/ Timothy R. Schwertfeger

Portfolio Managers'
COMMENTS

Portfolio managers Paul Brennan, Dan Solender and Scott Romans discuss the key investment strategies and semiannual performance of these Nuveen Funds. Paul, who has 13 years of investment experience, has managed NTC since 1999, NFC since 2001, NGK and NGO since 2002, and NMT and NMB since 2003. With 12 years of investment experience, Dan assumed portfolio management responsibility for NGX in May 2004. Scott, who joined Nuveen in 2000, has managed NOM since 2003.

WHAT KEY STRATEGIES WERE USED TO MANAGE THESE FUNDS DURING THE SIX MONTHS ENDED NOVEMBER 30, 2004?

As the market continued to anticipate an eventual increase in interest rates, our focus during this reporting period centered on finding bonds that we thought had the potential to add value immediately and also perform well under a variety of future market scenarios. This included purchasing bonds that would tend to shorten the Funds' yield curve positioning, and thereby help to mitigate their interest rate risk. (Interest rate risk is the risk that the value of a Fund's portfolio will decline if market interest rates rise, since bond prices move in the opposite direction of interest rates).

Given the individual portfolios of each Fund and the characteristics of each state, we looked at different maturity ranges when making new purchases for these Funds. In general, purchase activity in the Connecticut Funds emphasized securities that mature between 2011 and 2014, as we found the majority of the attractive opportunities in the Connecticut market in this part of the yield curve. At the same time, the Massachusetts and Missouri Funds were investing in bonds with 15 to 25 years to maturity, since we thought these bonds offered the best risk-return profiles in these states. We also focused on adding higher-coupon bonds that can help to position the Funds more defensively and mitigate interest rate risk if rates rise from their current levels.

Over this six-month reporting period, municipal issuance in Connecticut declined from the previous six-month period. This reduced supply was easily absorbed by market demand. As a result, turnover in the Connecticut Funds was relatively

light, ranging from 3% to 9% during the period. When we found them, we took advantage of opportunities to selectively trim some of our more concentrated positions of BBB bonds, especially in NFC, and add new holdings in both the AAA and AA credit categories. We believe this enhanced the overall diversification and credit quality of the portfolios.

4

In Massachusetts, municipal supply also was down over this period, and the turnover in these Funds also was below recent historical averages. As with the Connecticut Funds, we modestly trimmed some of our BBB rated holdings in the two noninsured Funds, particularly NMB, and reinvested the proceeds in higher quality AAA and AA bonds. Because BBB bonds performed well in 2004, demand for these bonds was strong and we were able to obtain attractive prices for the bonds we sold. We also continued to work to improve the diversification of NGX, which was introduced in late 2002, although our efforts were somewhat constrained by the limited availability of appropriate issues in the Massachusetts market.

Missouri saw the most substantial decline in issuance among these three states during this reporting period, and this restricted the availability of bonds offering the premium coupons that we sought. As in the other Funds, we worked to reduce the Fund's credit risk by scaling back concentrated positions in individual BBB and nonrated holdings. As in Connecticut and Massachusetts, we tried to sell these lower-rated bonds at attractive prices. We continued to balance our efforts in risk reduction against the goal of building and maintaining income streams.

One of our longer-term goals is to position all of these Funds so that they provide return variability and interest rate risk roughly comparable to the variability and risk of the bond markets in which the Funds invest. As one strategy to reach this goal, we attempted to reduce some of the interest rate risk of NFC, NGK, NGO and NGX by hedging in the derivatives market. Our only objective with these hedges was to reduce the duration of these Funds without having a negative impact on their dividends. These hedges do not affect the Funds' income streams or dividend-paying capabilities over the short-term. Instead, the costs of the hedges are reflected as an addition or subtraction from each Fund's net asset value as the value of the hedge fluctuates. Each of the hedges had a negative impact on its Fund's NAV as of November 30, 2004, because interest rates fell and bond prices rose during the period in which the hedges were in place. In each case, this loss in value was at least partly offset by the fact that the Fund's portfolio, because it had longer-than-target duration, increased in value by more as a result of these interest rate decreases than if the Fund had maintained a portfolio with the targeted duration. (NMB also instituted a similar hedging program after the conclusion of this reporting period.)

For additional information, see the individual Performance Overview for each Fund in this report.

For the six months ended November 30, 2004, the cumulative returns on net asset value (NAV) for all seven noninsured Funds in this report outperformed the return on the Lehman Brothers Municipal Bond Index, while the insured Massachusetts NGX outperformed the return on the Lehman Brothers Insured Municipal Bond Index. NMB also outperformed the average return for its Lipper Other State Municipal Debt Funds Category Average for this period, while the other seven Funds trailed this measure. It should be noted that the performance of the Lipper Other States category represents the overall average of returns for Funds from 10 different states with a wide variety of municipal market conditions, making direct comparisons between these Funds and that average less meaningful.

1 The Lehman Brothers Municipal Bond Index is an unleveraged, unmanaged national index comprising a broad range of investment-grade municipal bonds, while the Lehman Brothers Insured Municipal Bond Index is an unleveraged, unmanaged national index containing a broad range of insured municipal bonds. Results for the Lehman indexes do not reflect any expenses.

2 The Lipper Other States Municipal Debt Funds category average is calculated using the returns of all closed-end exchange-traded funds in this category for each period as follows: 6 months, 44 funds; 1 year, 44 funds; 5 years, 19 funds; and 10 years, 17 funds. Fund and Lipper returns assume reinvestment of dividends.

6

One of the primary factors benefiting the six-month performances of these Funds relative to those of the two unmanaged Lehman Brothers indexes was the Funds' use of financial leverage. While leveraging can add volatility to the Funds' NAVs and share prices, especially during periods of rising interest rates, this strategy can also provide opportunities for additional income and total returns for common shareholders when short-term interest rates remain relatively low and long-term rates fall or remain relatively constant, as they did during this reporting period.

All of these Funds benefited from their holdings of lower-quality bonds, which generally outperformed other credit quality sectors as the economy improved during the reporting period. Among the lower-rated bonds making positive contributions to the Funds' total returns during this period were those issued by the healthcare sector, especially hospital bonds. All of the Connecticut Funds' returns also were boosted by the strong performance of their holdings of bonds backed by the 1998 master tobacco settlement agreement. The price performance of these bonds was favorably affected by an improved litigation environment and the lack of supply combined with continued demand. Over this period, NFC and NGO maintained exposures of approximately 3% to tobacco bonds, while NTC and NGK continued to allocate slightly more than 1% to this sector.

At the high end of the credit spectrum, each of the four Connecticut Funds had a number of credits that were prerefunded or escrowed to maturity as of November 30, 2004. Generally, these bonds performed well during this period.

The two noninsured Massachusetts Funds benefited from their holdings of resource recovery bonds issued by the Massachusetts Industrial Finance Agency for the Ogden Haverhill project. This credit, which was negatively impacted when Ogden Haverhill's parent company declared bankruptcy in 2002, has continued its recovery and was one of the best performing holdings in NMT and NMB during this period. During the period we trimmed our position in these bonds to take advantage of their improved valuation. The performances of both NMT and NMB were also helped by prerefundings during this period, one of which involved Massachusetts general obligation debt. NMB also saw strong performance from its holdings of higher education credits, and NGX's position in revenue bonds rated A1 issued for Middlesex School was a top performer for the Fund.

7

In NOM, in addition to hospital bonds, we also had a significant position in bonds issued in the long-term care sector. One holding that performed particularly well was the \$1.75 million of nonrated bonds issued by Cole County for Lutheran Senior Living, which we purchased in July 2004.

One area of the market that did not perform well during this reporting period was structured finance bonds, which includes the housing sector as well as student loan bonds. While these types of bonds generally provide higher yields and help to reduce volatility in a rising interest rate environment, their

underperformance during this six months stemmed largely from lower demand due to concerns about prepayments and increased bond calls as interest rates remained low. NGK's performance, in particular, was negatively affected during this period by a number of calls on its holdings of higher-coupon housing bonds. The six-month performance of all of the Connecticut Funds was impacted to some degree by their housing exposure, which ranged from 1% in NGK to 4% in NTC and NGO as of November 30, 2004. Among the Massachusetts Funds, NMT held a significant position in student loan bonds, which detracted from this Fund's performance, and all of the Massachusetts Funds had weightings in housing bonds, ranging from 9% in NGX to 11% in NMT and NMB. In Missouri, where the single-family housing market in particular did not perform well, NOM had a 6% allocation to housing, approximately one-quarter of which was in single-family housing bonds.

HOW ABOUT THE FUNDS' DIVIDENDS AND SHARE PRICES?

As short-term interest rates remained relatively low throughout this reporting period, the leveraged structures of these eight Funds continued to support their dividend-paying capabilities. The extent of this benefit is tied in part to the short-term rates these Funds pay their MuniPreferred(R) shareholders. During periods of low short-term rates, leveraged Funds generally pay lower dividends to their MuniPreferred shareholders, which can leave more earnings to support common share dividends. This strategy helped to maintain the dividends of these Funds throughout the reporting period.

All of these Funds seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment

income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of November 30, 2004, NTC, NFC, NGK, NGO, NMT, NMB and NOM had positive UNII balances for both financial statement and tax purposes. NGX had a negative UNII balance for financial statement purposes and a positive UNII balance for tax purposes.

As of November 30, 2004, the Funds were trading at premiums or discounts to their net asset values as shown in the accompanying chart.

HOW WERE THE FUNDS POSITIONED IN TERMS OF CREDIT QUALITY AND BOND CALLS AS OF NOVEMBER 30, 2004?

We continued to believe that, given the current geopolitical and economic climate, maintaining strong credit quality was an important requirement. As of November 30, 2004, the seven noninsured Funds continued to offer excellent credit quality, with allocations of bonds rated AAA/U.S. Guaranteed and AA in the Connecticut Funds ranging from 80% in NFC to 86% in NGO, 88% in NGK and NTC. In the Massachusetts Funds, NMT and NMB had AAA/U.S. Guaranteed and AA allocations of 82% and 88%, respectively, while NGX, which can invest up to 20% of its assets in uninsured investment-grade quality securities, held 83% of its portfolio in insured or U.S. Guaranteed bonds as of November 30, 2004. As of that date, NOM's allocation of AAA/U.S. Guaranteed and AA bonds accounted for 81% of its portfolio.

9

As of November 30, 2004, potential call exposure during 2005 and 2006 ranged from 0% in NMB to 2% in NGK, NGO, and NGX, and 5% in NFC. NOM's call exposure was 6% over 2005-2006 as of the end of November 30, 2004, while NTC faced a call exposure of 14% in 2005 - 2006, and NMT had 16% exposure. The number of actual bond calls in all of these Funds depends largely on future market interest rates.

At least 80% of the Fund's net assets are invested in municipal securities that are either covered by Original Issue Insurance, Secondary Market Insurance or

Portfolio Insurance which ensures the timely payment of principal and interest. Up to 20% of the Fund's net assets may be invested in municipal securities that are (i) either backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities (also ensuring the timely payment of principal and interest), or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to Common shares unless otherwise noted.
- (2) Effective date represents the date on which both the Fund and counterparty commence interest payment accruals on each forward swap contract.
- * Optional Call Provisions: Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates.
- ** Ratings: Using the higher of Standard & Poor's or Moody's rating.
- *** Securities are backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities which ensures the timely payment of principal and interest.
- (PLG) Portion of security, with an aggregate market value of \$332,700 has been pledged to collateralize the net payment obligations under forward swap contracts.

FINANCIAL STATEMENTS (Unaudited)

1. GENERAL INFORMATION AND SIGNIFICANT ACCOUNTING POLICIES

The funds (the "Funds") covered in this report and their corresponding Common share stock exchange symbols are Nuveen Connecticut Premium Income Municipal Fund (NTC), Nuveen Connecticut Dividend Advantage Municipal Fund (NFC), Nuveen Connecticut Dividend Advantage Municipal Fund 2 (NGK), Nuveen Connecticut Dividend Advantage Municipal Fund 3 (NGO), Nuveen Massachusetts Premium Income Municipal Fund (NMT), Nuveen Massachusetts Dividend Advantage Municipal Fund (NMB), Nuveen Insured Massachusetts Tax-Free Advantage Municipal Fund (NGX) and Nuveen Missouri Premium Income Municipal Fund (NOM). Common shares of Connecticut Premium Income (NTC) and Massachusetts Premium Income (NMT) are traded on the New York Stock Exchange while Common shares of Connecticut Dividend Advantage (NFC), Connecticut Dividend Advantage 2 (NGK), Connecticut Dividend Advantage 3 (NGO), Massachusetts Dividend Advantage (NMB), Insured Massachusetts Tax-Free Advantage (NGX) and Missouri Premium Income (NOM) are traded on the American Stock Exchange. The Funds are registered under the Investment Company Act of 1940, as amended, as closed-end management investment companies.

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, by investing primarily in a diversified portfolio of municipal obligations issued by state and local government authorities within a single state.

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles.

Securities Valuation

The prices of municipal bonds in each Fund's investment portfolio are provided by a pricing service approved by the Fund's Board of Trustees. When price quotes are not readily available (which is usually the case for municipal securities), the pricing service establishes fair market value based on yields or prices of municipal bonds of comparable quality, type of issue, coupon, maturity and rating, indications of value from securities dealers, evaluations of anticipated cash flows or collateral and general market conditions. If it is determined that market prices for a security are unavailable or inappropriate, the Board of Trustees of the Funds, or its designee, may establish a fair value for the security. Temporary investments in securities that have variable rate and demand features qualifying them as short-term securities are valued at amortized cost, which approximates market value.

Securities Transactions

Securities transactions are recorded on a trade date basis. Realized gains and losses from such transactions are determined on the specific identification method. Securities purchased or sold on a when-issued or delayed delivery basis

may have extended settlement periods. The securities so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to segregate assets with a current value at least equal to the amount of the when-issued and delayed delivery purchase commitments. At November 30, 2004, there were no such outstanding purchase commitments in any of the Funds.

Investment Income

Interest income, which includes the amortization of premiums and accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also includes paydown gains and losses, if any.

Income Taxes

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute all net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions which will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, and in the case of Insured Massachusetts Tax-Free Advantage (NGX) the alternative minimum tax applicable to individuals, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

Dividends and Distributions to Common Shareholders

Dividends from tax-exempt net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders not less frequently than annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to Common shareholders of tax-exempt net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. generally accepted accounting principles.

Preferred Shares

The Funds have issued and outstanding Preferred shares, \$25,000 stated value per share, as a means of effecting financial leverage. Each Fund's Preferred shares are issued in one Series. The dividend rate on each Series is determined every seven days, pursuant to a dutch auction process overseen by the auction agent, and is payable weekly at the end of each rate period. The number of Preferred shares outstanding for each Fund is as follows:

Insurance

Insured Massachusetts Tax-Free Advantage (NGX) invests at least 80% of its net assets (including net assets applicable to Preferred shares) in municipal securities that are covered by insurance. The Fund may also invest up to 20% of its net assets (including net assets applicable to Preferred shares) in municipal securities which are either (i) backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, or (ii) municipal bonds that are rated, at the time of investment, within the four highest grades (Baa or BBB or better by Moody's, S&P or Fitch) or unrated but judged to be of comparable quality by the Adviser.

Each insured municipal security is covered by Original Issue Insurance, Secondary Market Insurance or Portfolio Insurance. Such insurance does not guarantee the market value of the municipal securities or the value of the Fund's Common shares. Original Issue Insurance and Secondary Market Insurance remain in effect as long as the municipal securities covered thereby remain outstanding and the insurer remains in business, regardless of whether the Fund ultimately disposes of such municipal securities. Consequently, the market value of the municipal securities covered by Original Issue Insurance or Secondary Market Insurance may reflect value attributable to the insurance. Portfolio Insurance, in contrast, is effective only while the municipal securities are held by the Fund. Accordingly, neither the prices used in determining the market value of the underlying municipal securities nor the Common share net asset value of the Fund includes value, if any, attributable to the Portfolio Insurance. Each policy of the Portfolio Insurance does, however, give the Fund the right to obtain permanent insurance with respect to the municipal security covered by the Portfolio Insurance policy at the time of its sale.

Forward Swap Transactions

The Funds may invest in certain derivative financial instruments. The Funds' use of forward interest rate swap transactions is intended to mitigate the negative impact that an increase in long-term interest rates could have on Common share net asset value. Forward interest rate swap transactions involve each Fund's agreement with the counterparty to pay, in the future, a fixed rate payment in exchange for the counterparty paying the Fund a variable rate payment. The amount of the payment obligation is based on the notional amount of the forward swap contract. The Funds may close out a contract prior to the effective date at which point a realized gain

Notes to
FINANCIAL STATEMENTS (Unaudited) (continued)

or loss would be recognized. When a forward swap is terminated, it does not involve the delivery of securities or other underlying assets or principal, but rather is settled in cash. Each Fund intends, but is not obligated to, terminate its forward swaps before the effective date. Accordingly, the risk of loss with respect to the swap counterparty on such transactions is limited to the credit risk associated with a counterparty failing to honor its commitment to pay any realized gain to the Fund upon termination. To minimize such credit risk, all counterparties are required to pledge collateral daily (based on the daily valuation of each swap) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when any of the Funds have an unrealized loss on a swap contract, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the swap valuations fluctuate, either up or down, by at least the pre-determined threshold amount.

Custodian Fee Credit

Each Fund has an arrangement with the custodian bank whereby certain custodian fees and expenses are reduced by credits earned on each Fund's cash on deposit with the bank. Such deposit arrangements are an alternative to overnight investments.

Indemnifications

Under the Funds' organizational documents, its Officers and Trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds' maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to Common shares from operations during the reporting period. Actual results may differ from those estimates.

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to the treatment of paydown gains and losses on investments, timing differences in recognizing income on taxable market discount securities and timing differences in recognizing certain gains and losses on security transactions.

At November 30, 2004, the cost of investments was as follows:

5. MANAGEMENT FEE AND OTHER TRANSACTIONS WITH AFFILIATES

As approved by the Board of Trustees, effective August 1, 2004, a complex-wide management fee structure was adopted for all funds sponsored by Nuveen Advisory Corp. (the "Adviser"), a wholly owned subsidiary of Nuveen Investments, Inc. and its affiliates. This fee structure separates each fund's management fee into two components - a complex-level component, based on the aggregate amount of all funds assets managed by the Adviser and its affiliates, and a specific fund-level component, based only on the amount of assets within each individual fund. This pricing structure enables Nuveen fund shareholders to benefit from growth in the assets within each individual fund as well as from growth in the amount of complex-wide assets managed by the Adviser and its affiliates. Under no circumstances will this pricing structure result in a fund paying management fees at a rate higher than would otherwise have been applicable had the complex-wide management fee structure not been implemented. As a consequence of this new management fee structure, the funds' effective management fees were reduced by approximately .007% as of December 31, 2004.

Effective August 1, 2004, the annual fund-level fee, payable monthly, for each of the Funds is based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

AVERAGE DAILY NET ASSETS (INCLUDING NET ASSETS ATTRIBUTABLE TO PREFERRED SHARES)	CONNECTICUT PREMIUM INCOME (NTC)	MASSACHUSETTS PREMIUM INCOME (NMT)	MISSOURI PREMIUM INCOME (NOM)	FUND-LEVEL FEE RATE

- (1) The complex-level fee component of the management fee for the funds is calculated based upon the aggregate Managed Assets ("Managed Assets" means the average daily net assets of each fund including assets attributable to all types of leverage used by the Nuveen funds) of Nuveen-sponsored funds in the U.S.
- (2) With respect to the complex-wide Managed Assets over \$91 billion, the fee rate or rates that will apply to such assets will be determined at a later date. In the unlikely event that complex-wide Managed Assets reach \$91 billion prior to a determination of the complex-level fee rate or rates to be applied to Managed Assets in excess of \$91 billion, the complex-level fee rate for such complex-wide Managed Assets shall be .1400% until such time as a different rate or rates is determined.

Each Fund paid through July 31, 2004, an annual management fee, payable monthly, at the rates set forth below, which were based upon the average daily net assets (including net assets attributable to Preferred shares) of each Fund as follows:

The management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Funds pay no compensation directly to those of its Trustees who are affiliated with the Adviser or to their officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent Trustees that enables Trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen advised Funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen advised Funds.

For the first ten years of Connecticut Dividend Advantage's (NFC) and Massachusetts Dividend Advantage's (NMB) operations, the Adviser has agreed to reimburse the Funds, as a percentage of average daily net assets (including net assets attributable to Preferred shares), for fees and expenses in the amounts and for the time periods set forth below:

Reinvest Automatically
EASILY AND CONVENIENTLY

Sidebar text: NUVEEN MAKES REINVESTING EASY. A PHONE CALL IS ALL IT TAKES TO SET UP YOUR REINVESTMENT ACCOUNT.

NUVEEN CLOSED-END EXCHANGE-TRADED FUNDS
DIVIDEND REINVESTMENT PLAN

Your Nuveen Closed-End Exchange-Traded Fund allows you to conveniently reinvest dividends and/or capital gains distributions in additional fund shares.

By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of tax-free compounding. Just like dividends or distributions in cash, there may be times when income or capital gains taxes may be payable on dividends or distributions that are reinvested.

It is important to note that an automatic reinvestment plan does not ensure a

profit, nor does it protect you against loss in a declining market.

EASY AND CONVENIENT

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total dividends and distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

HOW SHARES ARE PURCHASED

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. Dividends and distributions received to purchase shares in the open market will normally be invested shortly after the dividend payment date. No interest will be paid on the dividends or distributions awaiting reinvestment. Because the market price may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the dividend or distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

FLEXIBLE

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. Should you withdraw, you can receive a certificate for all whole shares credited to your reinvestment account and cash payment for fractional shares, or cash payment for all reinvestment account shares, less brokerage commissions and a \$2.50 service fee.

You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan.

The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

Other Useful INFORMATION

Effective Jan. 1, 2005, the asset management services and operations of Nuveen Advisory Corp. (NAC) and Nuveen Institutional Advisory Corp (NIAC) became part of Nuveen Asset Management (NAM). This internal consolidation is intended to simplify the delivery of services to the investment management clients of Nuveen Investments. It does not affect the investment objectives or portfolio management of any Fund.

QUARTERLY PORTFOLIO OF INVESTMENTS AND PROXY VOTING INFORMATION

Each Fund's (i) quarterly portfolio of investments and (ii) information regarding how the Funds voted proxies relating to portfolio securities held during the most recent 12-month period ended June 30, 2004, are available without charge, upon request, by calling Nuveen Investments toll-free at (800) 257-8787 or on Nuveen's web site at www.nuveen.com.

You may also obtain this and other Fund information directly from the Securities and Exchange Commission ("SEC"). The SEC may charge a copying fee for this information. Visit the SEC on-line at <http://www.sec.gov> or in person at the SEC's Public Reference Room in Washington, D.C. Call the SEC at 1-202-942-8090 for room hours and operation. You may also request Fund information by sending an e-mail request to publicinfo@sec.gov or by writing to the SEC's Public References Section at 450 Fifth Street NW, Washington, D.C. 20549.

GLOSSARY OF TERMS USED IN THIS REPORT

AVERAGE ANNUAL TOTAL RETURN: This is a commonly used method to express an investment's performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment's actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

AVERAGE EFFECTIVE MATURITY: The average of all the maturities of the bonds in a Fund's portfolio, computed by weighting each maturity date (the date the security comes due) by the market value of the security. This figure does not account for the likelihood of prepayments or the exercise of call provisions.

LEVERAGE-ADJUSTED DURATION: Duration is a measure of the sensitivity of a bond or bond Fund's value to changes when interest rates change. Generally, the longer a bond or Fund's duration, the more the price of the bond or Fund will change as interest rates change. Leverage-adjusted duration takes into account the leveraging process for a Fund and therefore is longer than the duration of the Fund's portfolio of bonds.

MARKET YIELD (ALSO KNOWN AS DIVIDEND YIELD OR CURRENT YIELD): An investment's current annualized dividend divided by its current market price.

NET ASSET VALUE (NAV): A Fund's common share NAV per share is calculated by subtracting the liabilities of the Fund (including any MuniPreferred shares issued in order to leverage the Fund) from its total assets and then dividing the remainder by the number of shares outstanding. Fund NAVs are calculated at the end of each business day.

TAXABLE-EQUIVALENT YIELD: The yield necessary from a fully taxable investment to equal, on an after-tax basis, the yield of a municipal bond investment.
