Timberland Bancorp, Inc. Announces Increased Second Quarter Earnings

- * **Earnings Per Share Increases by 11%**
- * **Quarterly Cash Dividend of \$0.15 Per Share Declared**
- * **Loan Portfolio Increases by \$17.1 Million During Quarter**

HOQUIAM, Wash. - April 26, 2005 - Timberland Bancorp, Inc. (Nasdaq: TSBK), ("Company") the holding company for Timberland Bank, ("Bank"), today reported net income of \$1.45 million, or \$0.40 per diluted share, for the quarter ended March 31, 2005. This compares to net income of \$1.42 million, or \$0.36 per diluted share that the Company earned for the quarter ended March 31, 2004. The increased earnings per share was primarily a result of increased net interest income, increased non-interest income and a reduction in the number of weighted average shares outstanding.

The Company also announced that it has declared a quarterly cash dividend of \$0.15 per share of common stock for shareholders of record May 10, 2005, payable on May 24, 2005. This will be the 29th consecutive quarter that Timberland has paid a cash dividend.

"Loan demand in our primary market areas has been strong. This has facilitated the investment of deposit proceeds obtained in the October 2004 acquisition of seven branch offices into mortgage and consumer loans. Loan originations of \$110.4 million for the first six months of our fiscal year are \$23.7 million above the same period in the prior fiscal year. Net loans outstanding increased \$17.1 million for the most recent quarter after an increase of \$16.0 million in the prior quarter. The process of integrating and consolidating the acquired branch offices into Timberland's branch system is complete and we are pleased with the opportunities for growth in the new locations," stated Timberland's President, Michael Sand.

During the quarter Timberland's twelfth stock repurchase plan was completed and an additional five percent repurchase plan was announced on April 7, 2005. "We continue to believe our investment in Timberland shares continues to be a beneficial use of our excess capital," stated Sand.

The Company expects to incur additional expenses associated with Sarbanes-Oxley requirements. We are projecting additional costs of approximately \$75,000 for the balance of the fiscal year in addition to the costs associated with hiring an additional employee to assist with the implementation and testing requirements.

Disclaimer

This report contains certain "forward-looking statements." The Company desires to take advantage of the "safe harbor" provisions of the Private Securities Litigation Reform Act of 1995 and is including this statement for the express purpose of availing itself of the protection of such safe harbor with forward looking statements. These forward-looking statements may describe future plans or strategies and include the Company's expectations of future financial results. Forward-looking statements are subject to a number of risks and uncertainties that might cause actual results to differ materially from stated objectives. These risk factors include but are not limited to the effect of interest rate changes,

<PAGE>

Comparison of Financial Condition at March 31, 2005 and September 30, 2004

Total Assets: Total assets increased \$74.45 million to \$534.87 million at March 31, 2005 from \$460.42 million at September 30, 2004 primarily due to a \$33.10 million increase in net loans receivable, a \$33.06 million increase in investment securities, a \$7.67 million increase in goodwill and core deposit intangible, and a \$1.97 million increase in premises and equipment. This growth was primarily funded by the net cash received in connection with the acquisition of seven branch offices and related deposits in October 2004.

Investments: Investment securities increased by \$33.06 million to \$93.12 million at March 31, 2005 from \$60.06 million at September 30, 2004, as a portion of the funds received in connection with the acquisition of deposits was placed into investment securities.

Loans: Net loans receivable increased by \$33.10 million to \$377.69 million at March 31, 2005 from \$344.59 million at September 30, 2004. The increase in the portfolio was primarily a result of a \$16.76 million increase in commercial real estate loans, a \$4.78 million increase in one-to-four family mortgage loans, a \$5.27 million increase in construction loans (net of undisbursed portion), a \$3.66 million increase in consumer loans, a \$1.89 million increase in land loans, and a \$746,000 increase in commercial business loans. These increases were partially offset by a \$610,000 decrease in loans held for sale and a \$601,000 decrease in multi-family loans.

Loan originations totaled \$48.94 million and \$110.38 million for the three and six months ended March 31, 2005 compared to \$32.40 million and \$86.72 million for the same periods a year earlier. The Bank sold loans totaling \$4.63 million and \$9.45 million (\$7.96 million in fixed rate one-to-four family mortgage loans and \$1.52 million in credit card loans) during the three and six months ended March 31, 2005, compared to \$12.62 million and \$22.87 million in fixed rate one-to-four family mortgage loans sold for the same periods a year earlier.

Deposits: Deposits increased by \$80.37 million to \$399.94 million at March 31, 2005 from \$319.57 million at September 30, 2004, primarily due to the acquisition of \$86.30 million in deposits in October 2004. The \$80.37 million deposit increase is comprised of a \$33.55 million increase in certificate of deposit accounts, an \$18.67 million increase in N.O.W. checking accounts, a \$14.38 million increase in savings accounts, a \$7.05 million increase in money market accounts, and a \$6.72 million increase in non-interest bearing accounts.

Shareholders' Equity: Total shareholders' equity decreased by \$1.13 million to \$71.69 million at March 31, 2005

from \$72.82 million at September 30, 2004, primarily due to the repurchase of 146,584 shares of the Company's stock for \$3.42 million, the payment of \$1.15 million in dividends to shareholders, and a \$592,000 increase in accumulated other comprehensive loss. Partially offsetting these decreases to equity, were net income of \$2.95 million and a \$506,000 increase to additional paid in capital from the exercise of stock options and the vesting of shares associated with the Bank's benefit plans. Also increasing shareholders' equity were decreases of \$322,000 and \$264,000 in the equity components related to unearned shares issued to the Management Recognition and Development Plan and the Employee Stock Ownership Plan, respectively.

On March 15, 2005 the Company announced that it had completed its 12th stock repurchase program and repurchased 360,670 shares, at an average price of \$23.04 per share. Cumulatively the Company has now repurchased 3,339,271 (50.5%) of the 6,612,500 shares that were issued when the Company went public in January 1998 at an average price of \$15.32 per share.

On April 7, 2005, the Company announced a plan to repurchase up to 5% of the Company's outstanding shares, or 187,955 shares. This is the Company's 13th stock repurchase plan. Share repurchases are scheduled to commence on April 28, 2005, subject to market conditions.

Comparison of Operating Results for the Three and Six Months Ended March 31, 2005 and 2004

Net Income: Net income for the quarter ended March 31, 2005 increased to \$1.45 million, or \$0.40 per diluted share (\$0.42 per basic share) from \$1.42 million, or \$0.36 per diluted share (\$0.38 per basic share) for the quarter ended March 31, 2004. The \$.04 increase in diluted earnings per share for the quarter ended March 31, 2005 was primarily a result of a \$706,000 (\$466,000 net of income tax - \$0.13 per diluted share) increase in net interest income after provision for loan losses, a \$127,000 (\$84,000 net of income tax - \$0.02 per diluted share) increase in non-interest income, and a lower number of weighted average shares outstanding which increased diluted earnings per share by approximately \$0.03. These items were partially offset by an \$828,000 (\$546,000 net of income tax - \$0.14 per diluted share) increase in non-interest expense.

Net income for the six months ended March 31, 2005 increased to \$2.95 million, or \$0.80 per diluted share (\$0.84 per basic share) from \$2.81 million, or \$0.71 per diluted share (\$0.74 per basic share) for the six months ended March 31, 2004. The \$.09 increase in diluted earnings per share for the six months ended March 31, 2005 was primarily the result of a \$1.36 million (\$900,000 net of income tax - \$0.23 per diluted share) increase in net interest income after provision for loan losses, a \$553,000 (\$365,000 net of income tax - \$0.09 per diluted share) increase in non-interest income, and a lower number of weighted average shares outstanding which increased diluted earnings per share by approximately \$0.06. These items were partially offset by a \$1.76 million (\$1.16 million net of income tax - \$0.29 per diluted share) increase in non-interest expense.

Net Interest Income: Net interest income increased \$696,000 to \$5.52 million for the quarter ended March 31, 2005 from \$4.83 million for the quarter ended March 31, 2004, primarily due to increased interest income from a larger interest earning asset base. Total interest income increased \$808,000 to \$7.53 million for the quarter ended March 31, 2005 from \$6.72 million for the quarter ended March 31, 2004 as average total interest earning assets increased by

\$59.93 million. The increased interest earning asset balances were a result of investing the funds received in connection with the acquisition of deposits. Partially offsetting the increased interest earning balances, was a reduction in the yield on assets. The yield on earning assets was 6.30% for the quarter ended March 31, 2005 compared to 6.43% for the quarter ended March 31, 2004. Total interest expense increased by \$112,000 to \$2.00 million for the quarter ended March 31, 2005 from \$1.89 million for the quarter ended March 31, 2004 as average interest bearing liabilities increased \$67.84 million. Partially offsetting the increased interest bearing liability levels was a decrease in the average rate paid for these funding sources to 1.94% for the quarter ended March 31, 2005 from 2.20% for the quarter ended March 31, 2004. The net interest margin remained level at 4.62% for the quarters ended March 31, 2005 and 2004.

Net interest income increased \$1.30 million to \$10.99 million for the six months ended March 31, 2005 from \$9.69 million for the six months ended March 31, 2004, primarily due to increased interest income from a larger interest earning asset base. Total interest income increased \$1.37 million to \$14.93 million for the six months ended March 31, 2005 from \$13.56 million for the six months ended March 31, 2004 as average total interest earning assets increased by \$55.50 million. The increased interest earning asset balances were a result of investing the funds received in connection with the acquisition of deposits. Partially offsetting the increased interest earning balances, was a reduction in the yield on assets. The yield on earning assets was 6.30% for the six months ended March 31, 2005 compared to 6.48% for the six months ended March 31, 2004. Total interest expense increased by \$67,000 to \$3.94 million for the six months ended March 31, 2005 from \$3.87 million for the six months ended March 31, 2004 as average interest bearing liabilities increased \$63.62 million. Partially offsetting the increased interest bearing liability levels was a decrease in the average rate paid for these funding sources to 1.93% for the six months ended March 31, 2005 from 2.25% for the six months ended March 31, 2004. As a result of these changes the net interest margin increased to 4.64% for the six months ended March 31, 2005 from 4.63% for the six months ended March 31, 2004.

Provision for Loan Losses: The provision for loan losses decreased to \$20,000 for the quarter ended March 31, 2005 from \$30,000 for the quarter ended March 31, 2004. The provision for the six months ended March 31, 2005 decreased to \$20,000 from \$80,000 for the six months ended March 31, 2004. The sale of the Bank's credit card portfolio in December 2004 reduced the amount of the provision for the six months ended March 31, 2005 according to the Bank's comprehensive analysis. Management deemed the allowance for loan losses of \$4.01 million at March 31, 2005 (1.05% of loans receivable and 130.99% of non-performing loans) adequate to provide for probable losses based on an evaluation

of known and inherent risks in the loan portfolio at that date. The allowance for loan losses was \$3.93 million (1.16% of loans receivable and 99.2% of non-performing loans) at March 31, 2004. The Company had a net charge-off of \$7,000 for the current quarter compared to a net charge-off of \$29,000 in the same quarter of 2004. For the six months ended March 31, 2005 and 2004, net charge-offs were \$4,000 and \$44,000, respectively.

The Company's non-performing assets to total assets ratio decreased to 0.64% at March 31, 2005 from 1.00% at March 31, 2004. The non-performing loan total of \$3.06 million at March 31, 2005 consisted of \$2.20 million in commercial real estate loans, \$405,000 in one-to-four family loans, \$348,000 in commercial business loans, and \$109,000 in land loans.

Non-interest Income: Total non-interest income increased \$127,000 to \$1.24 million for the quarter ended March 31, 2005 from \$1.12 million for the quarter ended March 31, 2004, primarily due to \$192,000 increase in service charges on deposits, a \$69,000 distribution from one of the Bank's ATM network associations, and a \$66,000 increase in ATM transaction fees. The increased service charges on deposits and the increased ATM transaction fees were primarily a result of the increased transaction account base acquired through the branch acquisition. The ATM network association distribution of \$69,000 was cash consideration paid to network association members in connection with the association's recent merger. These increases were partially offset by a \$233,000 decrease in income from loan sales (gain on sale of loans and servicing income (expense) on loans sold) as fewer loans were sold. The Bank sold \$4.63 million in fixed rate one-to-four family mortgages during the quarter ended March 31, 2005 compared to \$12.62 million for the same period a year ago.

Total non-interest income increased by \$553,000 to \$2.68 million for the six months ended March 31, 2005 from \$2.13 million for the six months ended March 31, 2004, primarily due to a \$440,000 increase in service charges on deposits, a \$114,000 increase in ATM transaction fees, and a \$69,000 distribution from one of the Bank's ATM network associations as discussed above. These increases were partially offset by a \$99,000 net decrease in income from loan sales (gain on sale of loans and servicing income (expense) on loans sold.)

Non-interest Expense: Total non-interest expense increased by \$828,000 to \$4.67 million for the quarter ended March 31, 2005 from \$3.84 million for the quarter ended March 31, 2004, as the Bank operated with a larger branch network due to the acquisition of seven branch offices and the associated employees in October 2004. The increase was primarily a result of a \$314,000 increase in salaries and employee benefits, a \$101,000 increase in premises and equipment expenses, a \$94,000 core deposit intangible amortization expense, and a \$49,000 increase in postage and courier expense. Also impacting the quarterly comparison was an \$87,000 reduction in gains from the sale of real estate owned properties. The Bank had income of \$90,000 associated with the disposition of real estate owned properties during the quarter ended March 31, 2004. The increased employee expenses were primarily due to the larger employee base resulting from the branch acquisition, annual salary adjustments, and increased medical insurance costs.

Total non-interest expense increased by \$1.76 million to \$9.43 million for the six months ended March 31, 2005 from \$7.67 million for the six months ended March 31, 2004. The increase was primarily a result of a \$792,000 increase in salaries and employee benefits, \$183,000 in expenses associated with the branch acquisition, a \$179,000 core deposit intangible amortization expense, a \$150,000 increase in premises and equipment expenses, a \$115,000 increase in postage and courier expense, and a \$46,000 increase in professional and consulting fees.

The Company's efficiency ratio increased to 69.04% and 68.98% for the three and six months ended March 31, 2005 from 64.66% and 64.90% for the three and six months ended March 31, 2004. Directly impacting the current period's higher ratios was the acquisition of seven branches as discussed above.

LOANS RECEIVABLE BREAKDOWN

(Dollars in thousands)

The following table sets forth the composition of the Company's loan portfolio by type of loan.

	At March 31, 2005		At September 30, 2004	
	Amount	Percent	Amount	Percent
Mortgage Loans:				
One-to-four family (1)	\$105,220	24.74%	\$99,835	25.25%
