ROMA FINANCIAL CORPORATION AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
(UNAUDITED)

NOTE A – ORGANIZATION

Roma Financial Corporation (the “Company”) is a federally-chartered corporation organized in January 2005 for the purpose of acquiring all of the capital stock that Roma Bank issued in its mutual holding company reorganization. Roma Financial Corporation’s principal executive offices are located at 2300 Route 33, Robbinsville, New Jersey 08691 and its telephone number at that address is (609) 223-8300.

Roma Financial Corporation, MHC is a federally-chartered mutual holding company that was formed in January 2005 in connection with the mutual holding company reorganization. Roma Financial Corporation, MHC has not engaged in any significant business since its formation. So long as Roma Financial Corporation MHC is in existence, it will at all times own a majority of the outstanding stock of Roma Financial Corporation.

Roma Bank is a federally-chartered stock savings bank. It was originally founded in 1920 and received its federal charter in 1991. Roma Bank’s deposits are federally insured by the Deposit Insurance Fund as administered by the Federal Deposit Insurance Corporation. Roma Bank is regulated by the Office of Thrift Supervision and the Federal Deposit Insurance Corporation. The Office of Thrift Supervision also regulates Roma Financial Corporation, MHC and Roma Financial Corporation as savings and loan holding companies.

RomAsia Bank is a federally-chartered stock savings bank. RomAsia Bank received all regulatory approvals on June 23, 2008 to be a federal savings bank and began operations on that date. The Company invested \$13.4 million in RomAsia Bank and currently holds a 89.55% ownership interest. RomAsia Bank is regulated by the Office of Thrift Supervision. Roma Bank and RomAsia Bank are collectively referred to as (the “Banks”).

The Banks offer traditional retail banking services, one-to four-family residential mortgage loans, multi-family and commercial mortgage loans, construction loans, commercial business loans and consumer loans, including home equity loans and lines of credit. Roma Bank operates from its main office in Robbinsville, New Jersey, and twenty-three branch offices located in Mercer, Burlington, Camden and Ocean Counties, New Jersey. RomAsia Bank operates from two locations in Monmouth Junction, New Jersey. As of September 30, 2010, the Banks had 288 full-time employees and 50 part-time employees. Roma Bank maintains a website at www.romabank.com.

Roma Financial Corporation conducted a minority stock offering during 2006 in which 30% of its outstanding stock was sold to the public in a subscription offering. The offering closed July 11, 2006 and the net proceeds from the offering were approximately \$96.1 million (gross proceeds of \$98.2 million for the issuance of 9,819,562 shares, less offering costs of approximately \$2.1 million). The Company also issued 22,584,995 shares to Roma Financial Corporation, MHC and 327,318 shares to the Roma Bank Community Foundation, Inc., resulting in a total of 32,731,875 shares issued and outstanding after the completion of the offering. A portion of the proceeds were loaned to the Roma Bank Employee Stock Ownership Plan (ESOP) to purchase 811,750 shares of the Company’s stock at a cost of \$8.1 million.

Throughout this document, references to “we,” “us,” or “our” refer to the Banks or the Company, or both, as the context indicates.

NOTE B - BASIS OF PRESENTATION

The consolidated financial statements include the accounts of the Company, its wholly-owned subsidiary, Roma Bank and Roma Bank's wholly-owned subsidiaries, Roma Capital Investment Corp. (the "Investment Co.") and General Abstract and Title Agency (the "Title Co."), and the Company's majority owned investment of 89.55% in RomAsia Bank. The consolidated statements also include the Company's 50% interest in 84 Hopewell, LLC (the "LLC"), a real estate investment which is consolidated according to the requirements of Accounting Standards Codification Topic 810, Variable Interest Entities. All significant inter-company accounts and transactions have been eliminated in consolidation. These statements were prepared in accordance with instructions for Form 10-Q and Rule 10-01 of Regulation S-X and, therefore, do not include all information or footnotes necessary for a complete presentation of financial condition, results of operations, and cash flows in conformity with generally accepted accounting principles in the United States of America.

NOTE B - BASIS OF PRESENTATION (Continued)

In the opinion of management, all adjustments which are necessary for a fair presentation of the consolidated financial statements have been made at and for the three and nine months ended September 30, 2010 and 2009. The results of operations for the three and nine months ended September 30, 2010 are not necessarily indicative of the results which may be expected for the entire fiscal year or other interim periods.

The December 31, 2009 data in the consolidated statements of financial condition was derived from the Company's audited consolidated financial statements for that date. That data, along with the interim financial information presented in the consolidated statements of financial condition, income, changes in stockholders' equity and cash flows should be read in conjunction with the 2009 audited consolidated financial statements for the year ended December 31, 2009, including the notes thereto included in the Company's Annual Report on Form 10-K.

The Investment Co. was incorporated in the State of New Jersey effective September 4, 2004, and began operations October 1, 2004. The Investment Co. is subject to the investment company provisions of the New Jersey Corporation Business Tax Act. The Title Co. was incorporated in the State of New Jersey effective March 7, 2005 and commenced operations April 1, 2005. The Company, together with two individuals, formed a limited liability company, 84 Hopewell, LLC. The LLC was formed to build a commercial office building in which is located the Company's Hopewell branch, corporate offices for the other LLC members construction company and tenant space. The Company invested \$370,000 in the LLC and provided a loan in the amount of \$3.6 million to the LLC. The Company and the other 50% owner's construction company both have signed lease commitments to the LLC.

The consolidated financial statements have been prepared in conformity with accounting principles generally accepted in the United States of America ("GAAP"). In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the consolidated statements of financial condition and revenues and expenses for the periods then ended. Actual results could differ significantly from those estimates.

A material estimate that is particularly susceptible to significant change relates to the determination of the allowance for loan losses. The allowance for loan losses represents management's best estimate of losses known and inherent in the portfolio that are both probable and reasonable to estimate. While management uses the most current information available to estimate losses on loans, actual losses are dependent on future events and, as such, increases in the allowance for loan losses may be necessary.

In addition, various regulatory agencies, as an integral part of their examination process, periodically review the Banks' allowance for loan losses. Such agencies may require the Banks to recognize additions to the allowance based on their judgments about information available to them at the time of their examinations.

Effective April 1, 2009, the Company adopted Financial Accounting Standards Board (FASB) guidance now codified as FASB ASC Topic 855, Subsequent Events. This guidance establishes general standards for accounting and for disclosure of events that occur after the balance sheet date but before financial statements are issued. The subsequent event guidance sets forth the period after the balance sheet date during which management of a reporting entity should evaluate events or transactions that may occur for potential recognition in the financial statements, identifies the circumstances under which an entity should recognize events or transactions occurring after the balance sheet date in the financial statements, and the disclosures that should be made about events or transactions that occur after the balance sheet date. Management evaluated subsequent events until the date of issuance of this report and concluded that no events occurred that were of a material nature.

NOTE C – ACQUISITION

On July 16, 2010, the Company completed its acquisition of Sterling Banks, Inc., the holding company for Sterling Bank. The transaction qualified as a tax-free reorganization for federal income tax purposes. The final consideration paid in the transaction to stockholders of Sterling Banks, Inc. consisted of \$2.52 per share or \$14,725,000, in cash.

The Company accounted for the transaction using the acquisition method pursuant to FASB ASC 805 “Business Combinations”. Accordingly, the Company recorded merger and acquisition expenses totaling \$822 thousand during the nine months ended September 30, 2010. The Company’s results of operations include Sterling Banks, Inc. and Sterling Bank from the date of acquisition. Additionally, ASC 805 “Business Combinations” requires an acquirer to recognize the assets acquired and the liabilities assumed at their fair values as of the acquisition date.

The following table summarizes the estimated fair value of the assets acquired and liabilities assumed as of the date of the acquisition:

Assets:	
Cash and cash equivalents	\$ 30,757
Investments	32,707
Loans	272,313
Real estate owned	2,593
Premises and equipment	7,337
Bank owned life insurance	2,613
Goodwill	1,254
Deferred income taxes	7,100
Other assets	3,791
Total Assets Acquired	360,465
Liabilities	
Deposits	\$ 320,721
Federal Home Loan Bank of New York advances	15,233
Subordinated debentures	5,100
Other liabilities	4,686
Total Liabilities Assumed	345,740
Net Assets Acquired	\$ 14,725

As noted above, the Company acquired loans with a fair value of \$272.3 million. Included in this amount was \$47.4 million of loans with evidence of deterioration of credit quality since origination for which it was probable, at the time of the acquisition, that the Company would be unable to collect all contractually required payments receivable. In accordance with the “Loans and Debt Securities Acquired with Deteriorating Credit Quality” section of FASB ASC 310 “Receivables,” the Company recorded a non accretable credit mark discount of \$13.3 million, which is defined as the loans’ contractually required payments receivable in excess of the amount of its cash flows expected to be collected. The Company considered factors such as payment history, collateral values, and accrual status when determining whether there was evidence of deterioration of a loan’s credit quality at the acquisition date.

The following summarizes the unaudited pro forma results of operations for the nine months ended September 30, 2010 and 2009, as if the Company acquired Sterling Banks, Inc. and Sterling Bank on January 1, 2009. The pro forma results for 2009 include merger costs net of tax of \$529 thousand or \$.02 per diluted share.

	09/30/10	09/30/09
	\$ 43,652	\$ 31,310

Edgar Filing: ROMA FINANCIAL CORP - Form 10-Q

Net interest income before provision for loan losses		
Net income (loss)	\$ (8,176)	\$ (9,627)
Earnings per share –basic and diluted	\$ (0.27)	\$ (0.31)

The unaudited proforma results for the three months ended September 30, 2010 and 2009, as if the Company acquired Sterling Banks Inc. and Sterling Bank on January 1, 2009 are as follows:

	09/30/10	09/30/09
Net interest income before provision for loan losses	\$ 12,982	\$ 11,442
Net income (loss)	\$ (3,161)	\$ (2,438)
Earnings per share –basic and diluted	\$ (.10)	\$ (.08)

NOTE D - CONTINGENCIES

The Company, from time to time, is a party to routine litigation that arises in the normal course of business. In the opinion of management, the resolution of such litigation, if any, would not have a material adverse effect, as of September 30, 2010, on the Company's consolidated financial position or results of operations.

NOTE E – EARNINGS PER SHARE

Basic earnings per share is based on the weighted average number of common shares actually outstanding adjusted for Employee Stock Ownership Plan (“ESOP”) shares not yet committed to be released. Diluted EPS is calculated by adjusting the weighted average number of shares of common stock outstanding to include the effect of outstanding stock options and unvested stock awards, if dilutive, using the treasury stock method. Shares issued and reacquired during any period are weighted for the portion of the period they were outstanding.

Outstanding stock options and restricted stock grants for the three and nine months ended September 30, 2010 and September 30, 2009, were not considered in the calculation of diluted earnings per share because they were antidilutive.

NOTE F – STOCK BASED COMPENSATION

Equity Incentive Plan

At the Annual Meeting held on April 23, 2008, stockholders of the Company approved the Roma Financial Corporation 2008 Equity Incentive Plan. On June 25, 2008, directors, senior officers and certain employees of the Company were granted, in the aggregate, 820,000 stock options and awarded 222,000 shares of restricted stock.

The 2008 Plan enables the Board of Directors to grant stock options to executives, other key employees and nonemployee directors. The options granted under the Plan may be either incentive stock options or non-qualified stock options. The Company has reserved 1,292,909 shares of common stock for issuance upon the exercise of options granted under the 2008 Plan and 517,164 shares for grants of restricted stock. The Plan will terminate in ten years from the grant date. Options will be granted with an exercise price not less than the Fair Market Value of a share of Common Stock on the date of the grant. Options may not be granted for a term greater than ten years. Stock options granted under the Incentive Plan are subject to limitations under Section 422 of the Internal Revenue Code. The number of shares available under the 2008 Plan, the number of shares subject to outstanding options and the exercise price of outstanding options will be adjusted to reflect any stock dividend, stock split, merger, reorganization or other event generally affecting the number of Company's outstanding shares. At September 30, 2010, there were 472,909 shares available for option grants under the 2008 Plan and 295,164 shares available for grants of restricted stock.

The Company accounts for stock based compensation under FASB ASC Topic 718, “Compensation-Stock Compensation”. ASC Topic 718 covers a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans. ASC Topic 718 requires that compensation cost relating to share-based payment transactions be recognized in the financial statements. The cost is measured based on the fair value of the equity or liability instruments issued.

ASC Topic 718 also requires the Company to realize as a financing cash flow rather than an operating cash flow, as previously required, the benefits of realized tax deductions in excess of previously recognized tax benefits on compensation expense. In accordance with SEC Staff Accounting Bulletin (“SAB”) No. 107, the Company classified share-based compensation for employees and outside directors within “salaries and employee benefits” in the

consolidated statement of income to correspond with the same line item as the cash compensation paid.

The stock options will vest over a five year service period and are exercisable within ten years. Compensation expense for all option grants is recognized over the awards' respective requisite service period.

Restricted shares, granted on June 25, 2008, vest over a five year service period. Management recognizes compensation expense for the fair value of restricted shares on a straight-line basis over the requisite service period of the awards of five years. The number of shares granted and the grant date market price of the Company's common stock determines the fair value of the restricted shares under the Company's restricted stock plan.

NOTE F – STOCK BASED COMPENSATION (Continued)

The following is a summary of the status of the Company's stock option activity and related information for the nine months ended September 30, 2010:

	Number of Stock Options	Weighted Avg. Exercise Price	Weighted Avg. Remaining Contractual Life	Aggregate Intrinsic Value
Balance at January 1, 2010	820,000	\$ 13.67		
Granted	-	-		
Exercised	-	-		
Forfeited	-	-		
Balance at September 30, 2010	820,000	\$ 13.67	7.75 years	\$ 0.00
Exercisable at September 30, 2010	328,000	\$ 13.67		

The following is a summary of the status of the Company's restricted shares as of September 30, 2010 and changes during the nine months ended September 30, 2010.

	Number of Restricted Shares	Weighted Average Grant Date Fair Value
Non-vested restricted shares at January 1, 2010	177,600	\$ 13.67
Granted	-	-
Forfeited	-	-
Vested	44,400	13.67
Non-vested restricted shares at September 30, 2010	133,200	\$ 13.67

Stock option and stock award expenses included in compensation expense were \$300,000 and \$900,000, respectively, for the three and nine months ended September 30, 2010 with a respective tax benefit of \$120,000 and \$360,000, and \$300,000 and \$911,000, respectively for the three and nine months ended September 30, 2009, with a respective tax benefit of \$121,000 and \$364,000. At September 30, 2010, approximately \$3.3 million of unrecognized cost, related to outstanding stock options and restricted shares, will be recognized over a period of approximately 2.75 years.

Equity Incentive Plan – RomAsia Bank

The stockholders of RomAsia Bank approved an equity incentive plan in 2009. On January 6, 2010, directors, senior officers and certain employees of the RomAsia Bank were granted, in the aggregate, options to purchase 75,500 shares of RomAsia common stock.

The Plan enables the Board of Directors of RomAsia Bank to grant stock options to executives, other key employees and nonemployee directors. The options granted under the Plan may be either incentive stock options or non-qualified stock options. RomAsia has reserved 225,000 shares of its common stock for issuance upon the exercise of options granted under the Plan. The Plan will terminate in ten years from the grant date. Options will be granted with an exercise price not less than the Fair Market Value of a share of RomAsia's Common Stock on the date of the grant. Options may not be granted for a term greater than ten years. Stock options granted under the Incentive Plan are subject to limitations under Section 422 of the Internal Revenue Code. The number of shares available under the Plan, the number of shares subject to outstanding options and the exercise price of outstanding options will be adjusted to reflect any stock dividend, stock split, merger, reorganization or other event generally affecting the number of

NOTE F – STOCK BASED COMPENSATION (Continued)

Company's outstanding shares. At September 30, 2010, there were 149,500 shares available for option grants under the Plan.

The stock options will vest over a five year service period and are exercisable within ten years. Compensation expense for all option grants is recognized over the awards' respective requisite service period. The fair value of stock options granted in the nine months ended September 30, 2010 was:

Expected life	6.5 years
Risk-free rate	3.33%
Volatility	25.76%
Dividend yield	0.0%
Fair Value	\$2.89

The following is a summary of the status of RomAsia's stock option activity and related information for the nine months ended September 30, 2010:

	Number of Stock Options	Weighted Avg. Exercise Price	Weighted Avg. Remaining Contractual Life	Aggregate Intrinsic Value
Balance at January 1, 2010	-	\$ -		
Granted	75,500	8.47		
Exercised	-	-		
Forfeited	-	-		
Balance at September 30, 2010	75,500	\$ 8.47	9.25 years	\$ 0.00
Exercisable at September 30, 2010	-			

Stock option expense, related to the RomAsia plan included with compensation expense was \$11,000 and \$32,000 for the three and nine months ended September 30, 2010, and zero for three and nine months ended September 30, 2009, with a related tax benefit of \$5,000 and \$14,000 for the three and nine months ended September 30, 2010, and zero in 2009. At September 30, 2010, approximately \$192,000 of unrecognized cost, related to outstanding stock options, will be recognized over a period of approximately 4.25 years.

Employee Stock Ownership Plan

Roma Bank has an Employee Stock Ownership Plan ("ESOP") for the benefit of employees who meet the eligibility requirements defined in the Plan. The ESOP trust purchased 811,750 shares of common stock as part of the stock offering using proceeds from a loan from the Company. The total cost of the shares purchased by the ESOP trust was \$8.1 million, reflecting a cost of \$10 per share. Roma Bank makes cash contributions to the ESOP on a quarterly

basis sufficient to enable the ESOP to make the required loan payments to the Company. The loan bears an interest rate of 8.25% with principal and interest payable in equal quarterly installments over a fifteen year period. The loan is secured by the shares of the stock purchased.

Shares purchased with the loan proceeds were initially pledged as collateral for the term loan and are held in a suspense account for future allocation among participants. Shares released from the suspense account will be allocated among the participants on the basis of compensation, as described by the Plan, in the year of allocation. As shares are committed to be released from collateral, the Company reports compensation expense equal to the current market price of the shares, and the shares become outstanding for earnings per share computations. As of September 30, 2010 there were 581,757 unearned shares. The Company's ESOP compensation expense was \$146 thousand and \$468 thousand, and \$171 thousand and \$502 thousand, respectively, for the three and nine months ended September 30, 2010 and 2009.

NOTE G – REAL ESTATE OWNED VIA EQUITY INVESTMENTS

In 2008, Roma Bank, together with two individuals, formed 84 Hopewell, LLC. The LLC was formed to build a commercial office building which includes Roma Bank's Hopewell branch, corporate offices for the other 50% owners' construction company and tenant space. Roma Bank made a cash investment of approximately \$360,000 in the LLC and provided a loan to the LLC in the amount of \$3.6 million. Roma Bank and the construction company both have signed lease commitments to the LLC. With the adoption of guidance in regards to variable interest entities now codified in FASB ASC Topic 810, "Consolidation", the Company is required to perform an analysis to determine whether such an investment meets the criteria for consolidation into the Company's financial statements. As of September 30, 2010 and December 31, 2009, this variable interest entity met the requirements of ASC Topic 810 for consolidation based on Roma Bank being the primary financial beneficiary. This was determined based on the amount invested by the Bank compared to the other partners to the LLC and the lack of personal guarantees. As of September 30, 2010, the LLC had \$4.0 million in fixed assets and a loan from Roma Bank for \$3.5 million, which was eliminated in consolidation. The LLC had accrued interest payable to the Bank of \$11 thousand at September 30, 2010 and during the three and nine months then ended the Bank paid \$26 thousand and \$76 thousand in rent to the LLC. Both of these amounts were eliminated in consolidation. Roma Bank's 50% share of the LLC's net income for the nine months ended September 30, 2010 was \$35 thousand.

Proceeds from the sale of securities available for sale amounted to \$1.3 million and \$3.4 million for the three and nine months ended September 30, 2010 with a realized gain of \$56 thousand and \$107 thousand, respectively. Proceeds from the sale of securities available for sale amounted to \$3.5 million and \$6.7 million for the three and nine months ended September 30, 2009 with a realized gain of \$67 thousand and \$104 thousand, respectively.

Management evaluates securities for other-than-temporary-impairment (“OTTI”) at least on a quarterly basis, and more frequently when economic or market conditions warrant such an evaluation.

In determining OTTI under the ASC Topic 320, management considers many factors, including: (1) the length of time and the extent to which the fair value has been less than amortized cost; (2) the financial condition and near term prospects of the issuer; (3) whether the market decline was affected by macroeconomic conditions, and (4) whether

the entity has the intent to sell the debt security or more likely than not will be required to sell the debt security before its anticipated recovery. The assessment of whether an other-than-temporary-impairment decline exists involves a high degree of subjectivity and judgment and is based on information available to management at a point in time. An OTTI is deemed to have occurred if there has been an adverse change in the remaining expected future cash flows.

NOTE H – INVESTMENT SECURITIES (Continued)

When OTTI for debt securities, occurs under the model, the amount of the OTTI recognized in earnings depends on whether an entity intends to sell the security or more likely than not will be required to sell the security before recovery of its amortized cost basis. If an entity intends to sell or more likely than not will be required to sell the security before recovery of its amortized cost basis, the OTTI shall be recognized in earnings equal to the entire difference between the investment's amortized cost basis and its fair value at the balance sheet date. If any entity does not intend to sell the security and it is not more likely than not that the entity will be required to sell the security before recovery of its amortized cost basis, the OTTI shall be separated into the amount representing the credit loss and the amount related to all other factors. The amount of the total OTTI related to the credit loss is determined based on the present value of cash flows expected to be collected and is recognized in earnings. The amount of the total OTTI related to other factors shall be recognized in other comprehensive income, net of applicable tax benefit. The previous amortized cost basis less the OTTI recognized in earnings shall become the new amortized cost basis of the investment.

At September 30, 2010, the Company's available for sale and held to maturity debt securities portfolio consisted of approximately 222 securities, of which 27 were in an unrealized loss position for less than twelve months and none were in a loss position for more than twelve months. No OTTI charges were recorded for the three or nine months ended September 30, 2010. The Company does not intend to sell these securities and it is not more likely than not that we will be required to sell these securities. Unrealized losses primarily relate to interest rate fluctuations and not credit concerns.

The available for sale mutual funds consists of CRA investments and currently have an unrealized loss of approximately \$64 thousand. They have been in a loss position for the last two years with the greatest unrealized loss being approximately \$184 thousand. Management does not believe the mutual fund securities available for sale are OTTI due to reasons of credit quality. Accordingly, as of September 30, 2010, management believes the impairments are temporary and no impairment loss has been realized in the Company's consolidated income statement.

Approximately \$124.4 million of securities held to maturity are pledged as collateral for Federal Home Loan Bank of New York ("FHLB NY") advances, borrowings, and deposits at September 30, 2010.

The following tables set forth the composition of our mortgage-backed securities portfolio as of September 30, 2010 and December 31, 2009:

NOTE H – INVESTMENT SECURITIES (Continued)

The amortized cost and estimated fair value of mortgage backed securities held to maturity at September 30, 2010 by contractual maturity are shown below. Expected maturities will differ from contractual maturities as borrowers may have the right to call or prepay obligations with or without call or prepayment penalties:

	Amortized Cost	Fair Value
	(In Thousands)	
One year or less	\$ 146	\$ 145
After one to five years	19,987	21,064
After five to ten years	27,374	29,113
After ten years	253,664	264,927
Total	\$301,171	\$ 315,249

As of September 30, 2010, there were 3 Government National Mortgage Association securities, 16 Federal Home Loan Mortgage Corporation securities, 9 Federal National Mortgage Association securities, in unrealized loss positions. Management does not believe that any of the individual unrealized losses represent an other-than-temporary impairment. The unrealized losses on mortgage-backed securities relate primarily to fixed interest rate and, to a lesser extent, adjustable interest rate securities. Such losses are the result of changes in interest rates and not credit concerns. The Bank, the Investment Co. and RomAsia Bank do not intend to sell these securities and it is not more likely than not that they will be required to sell these securities, therefore, no OTTI is required.

NOTE I - LOANS RECEIVABLE, NET

Equity and second mortgages	204,119	133,199
Other	1,828	1,024
	205,947	134,223
Commercial	41,072	12,302
 Total loans	 900,945	 596,958
Less:		
Allowance for loan losses	6,857	5,243
Deferred loan fees	580	432
Loans in process	4,841	5,524
	12,278	11,199
Total loans receivable, net	\$ 888,667	\$ 585,759

Impaired loans and related amounts recorded in the allowance for loan losses are summarized as follows:

	September 30, 2010	December 31, 2009
	(In Thousands)	
Recorded investment in impaired loans without specific allowance	\$ 68,403	\$16,842
Recorded investment in impaired loans with specific allowance	13,292	7,783
Related allowance for loan losses	(3,605)	(2,483)
	\$ 78,090	\$22,142

Impaired loans before the related allowance for loan losses at September 30, 2010 totaled \$81.7 million, \$13.3 million of which had a related allowance for loan loss of \$3.6 million. The remaining \$68.4 million of impaired loans included \$42.2 million of loans, net of credit marks of \$13.3 million, which were acquired in the merger. Loans totaling \$23.4 million, which are performing, are also included in this total and classified as impaired because they are

a troubled debt restructure, have related loans that are not performing, or which are considered impaired because at merger there was evidence of deterioration of credit quality, since origination, primarily collateral related.

NOTE J - DEPOSITS

A summary of deposits by type of account as of September 30, 2010 and December 31, 2009 is as follows (dollars in thousands):

	September 30, 2010		December 31, 2009	
	Amount	Weighted Avg. Int. Rate	Amount	Weighted Avg. Int. Rate
Demand:				
Non-interest				
bearing checking	\$ 64,739	0.00%	\$ 32,481	0.00%
Interest bearing				
checking	172,834	0.31%	129,505	0.44%
	237,573	0.22%	161,986	0.35%
Savings and club	419,522	0.77%	275,990	0.91%
Certificates of deposit	827,110	1.94%	577,779	2.47%
Total	\$ 1,484,205	1.32%	\$ 1,015,755	1.71%

At September 30, 2010, the Company had contractual obligations for certificates of deposit that mature as follows (in thousands):

One year or less	\$ 543,027
After one to three years	235,330
After three years	48,753
Total	\$ 827,110

NOTE K – PREMISES AND EQUIPMENT

Premises and equipment consisted of the following as of September 30, 2010 and December 31, 2009 (in thousands):

	Estimated	September 30,	December
	Useful	2010	31,
	Lives		2009
Land for future development	-	\$ 1,054	\$ 1,054
Construction in progress	-	150	220
Land and land improvements	-	5,428	5,428
Buildings and improvements	20-50 yrs	44,552	35,299
Furnishings and equipment	3-10 yrs.	11,526	9,543
Total premises and equipment		62,710	51,544
Accumulated depreciation		(13,932)	(12,415)
Total		\$ 48,778	\$ 39,129

NOTE L –FEDERAL HOME LOAN BANK ADVANCES AND SECURITIES SOLD UNDER AGREEMENTS TO REPURCHASE AND SUBORDINATED DEBENTURES

At September 30, 2010 and December 31, 2009, the Banks had outstanding amortizing Federal Home Bank of New York (FHLB NY) advances as follows (dollars in thousands):

	September 30, 2010		December 31, 2009	
	Amount	Interest Rate	Amount	Interest Rate
Maturing:				
September 30, 2010	\$0	4.49%	\$ 1,826	4.49%

At September 30, 2010 and December 31, 2009, Roma Bank and RomAsia Bank also had outstanding FHLB NY advances totaling \$29.5 million and \$23.0 million, respectively. The borrowings are as follow (in thousands):

09/30/2010	12/31/2009	Interest Rate	Maturity Date	Call Date
\$ 23,000	\$23,000	3.90%	10/29/2017	10/29/2010
1,500	-	0.90%	03/21/2011	-
3,500	-	1.47%	03/19/2012	-
1,500	-	2.09%	03/19/2013	-
\$ 29,500	\$ 23,000			

Securities sold under agreements to repurchase are treated as financings and are reflected as a liability in the consolidated statements of financial condition. Securities sold under an agreement to repurchase amounted to \$40.0 million at September 30, 2010 and December 31, 2009. The maturities and respective interest rates are as follows: \$10.0 million maturing in 2015, at 3.22%; \$20.0 million maturing in 2018, callable at 08/22/11, at 3.51%; and \$10.0 million maturing in 2018, callable at 08/22/13, at 3.955%. The repurchase agreement is collateralized by securities described in the underlying agreement which are held in safekeeping by the FHLB NY. At September 30, 2010, the fair value of the mortgage-backed securities used as collateral under the repurchase agreement was approximately \$50 million.

On May 1, 2007, Sterling Banks Capital Trust I, a Delaware statutory business trust and a wholly-owned subsidiary of the Company (the "Trust"), issued \$6.2 million of variable rate capital trust pass-through securities ("capital securities") to investors. The variable interest rate reprices quarterly at the three month LIBOR plus 1.7%. The Trust purchased \$6.2 million of variable rate junior subordinated debentures from Sterling Banks, Inc. The debentures are the sole asset of the Trust. The fair value of the subordinated debentures at acquisition of Sterling Banks, Inc. was \$5.1 million. The terms of the junior subordinated debentures are the same as the terms of the capital securities. The Company has also fully and unconditionally guaranteed the obligations of the Trust under the capital securities. The capital securities are redeemable by the Company on or after May 1, 2012 at par, or earlier if the deduction of related interest for federal income taxes is prohibited, classification as Tier I Capital is no longer allowed, or certain other contingencies arise. The capital securities must be redeemed upon final maturity of the subordinated debentures on May 1, 2037. On October 22, 2010, the Company repurchased \$4.0 million of these capital securities (with a market value of \$3.2 million).

NOTE M – RETIREMENT PLANS

Components of net periodic pension cost for the three and nine months ended September 30, 2010 and 2009 were as follows (in thousands):

	Three Months Ended		Nine Months Ended	
	September 30, 2010	2009	September 30, 2010	2009
Service cost	\$ 96	\$ 98	\$ 288	\$ 292
Interest cost	155	147	465	442
Expected return on plan assets	(144)	(123)	(432)	(369)
Amortization of unrecognized net loss	61	89	183	267
Amortization of unrecognized past service liability	4	4	12	9
Net periodic benefit expense	\$ 172	\$ 215	\$ 516	\$ 641

NOTE N – CONTRACTUAL OBLIGATIONS AND OFF-BALANCE SHEET ARRANGEMENTS

In the normal course of business, the Company enters into off-balance sheet arrangements consisting of commitments to fund residential and commercial loans and lines of credit. Outstanding loan commitments at September 30, 2010 were as follows (in thousands):

	September 30, 2010
Residential mortgage and equity loans	\$ 8,319
Commercial loans committed not closed	16,839
Commercial lines of credit	35,271
Consumer unused lines of credit	52,925
Commercial standby letters of credit	3,919
	\$ 117,273

In the ordinary course of business to meet the financial needs of the Company's customers, the Company is party to financial instruments with off-balance-sheet risk. These financial instruments include unused lines of credit and involve, to varying degrees, elements of credit risk in excess of the amount recognized in the consolidated financial statements. The contract or notional amounts of these instruments express the extent of involvement the Company has in each category of financial instruments.

The Company's exposure to credit loss from nonperformance by the other party to the above-mentioned financial instruments is represented by the contractual amount of those instruments. The Company uses the same credit policies in making commitments and conditional obligations as it does for on-balance sheet instruments. The contract or notional amount of financial instruments which represent credit risk at September 30, 2010 and December 31, 2009 is as follows (in thousands):

	September 30, 2010	December 31, 2009
Standby letters of credit	\$ 3,919	\$ 4,210
Outstanding loan and credit line commitments	\$ 113,354	\$ 67,791

Standby letters of credit are conditional commitments issued by the Company which guarantee performance by a customer to a third party. The credit risk and underwriting procedures involved in issuing letters of credit are essentially the same as that involved in extending loan facilities to customers. These are irrevocable undertakings by the Company, as guarantor, to make payments in the event a specified third party fails to perform under a non-financial contractual obligation. Most of the Company's performance standby letters of credit arise in connection with lending relationships and have terms of one year or less. The current amount of the liability related to guarantees under standby letters of credit issued is not material as of September 30, 2010.

Outstanding loan commitments represent the unused portion of loan commitments available to individuals and companies as long as there is no violation of any condition established in the contract. Outstanding loan commitments generally have a fixed expiration date of one year or less, except for home equity loan commitments which generally have an expiration date of up to 15 years. The Company evaluates each customer's creditworthiness on a case-by-case basis. The amount of collateral, if any, obtained, upon extension of credit is based upon management's credit evaluation of the customer. While various types of collateral may be held, property is primarily obtained as security. The credit risk involved in these financial instruments is essentially the same as that involved in extending loan

facilities to customers.

24

NOTE N – CONTRACTUAL OBLIGATIONS AND OFF-BALANCE SHEET ARRANGEMENTS (Continued)

The Banks have non-cancelable operating leases for branch offices. The following is a schedule by years of future minimum rental payments required under operating leases that have initial or remaining non-cancelable lease terms in excess of one year at September 30, 2010: (In thousands)

Year Ended June 30:

2011	\$ 1,253
2012	1,131
2013	1,116
2014	970
2015	825
Thereafter	9,670
Total Minimum Payments Required	\$14,965

Included in the total required minimum lease payments is \$1,780,000 of payments to the LLC. The Company eliminates these payments in consolidation.

NOTE O – FAIR VALUE MEASUREMENTS AND DISCLOSURES

The Company follows the guidance on fair value measurements now codified as FASB ASC Topic 820, “Fair Value Measurements and Disclosures”. Fair value measurements are not adjusted for transaction costs. ASC Topic 820 establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value.

Management uses its best judgment in estimating the fair value of the Company’s financial instruments; however, there are inherent weaknesses in any estimation technique. Therefore, for substantially all financial instruments, the fair value estimates herein are not necessarily indicative of the amounts the Company could have realized in a sales transaction on the dates indicated. The estimated fair value amounts have been measured as of their respective period ends and have not been re-evaluated or updated for purposes of these financial statements subsequent to those respective dates. As such, the estimated fair values of these financial instruments subsequent to the respective reporting dates may be different than the amounts reported at each period-end.

The fair value measurement hierarchy gives the highest priority to unadjusted quoted prices in active markets for identical assets or liabilities (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements). The three levels of the fair value hierarchy are as follows:

Level 1: Unadjusted quoted prices in active markets that are accessible at the measurement date for identical, unrestricted assets or liabilities.

Level 2: Quoted prices in markets that are not active, or inputs that are observable either directly or indirectly, for substantially the full term of the asset or liability.

Level 3: Prices or valuation techniques that require inputs that are both significant to the fair value measurement and unobservable (i.e., supported with little or no market activity).

An asset's or liability's level within the fair value hierarchy is based on the lowest level of input that is significant to the fair value measurement.

NOTE O –FAIR VALUE MEASUREMENTS AND DISCLOSURES (Continued)

For financial assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy used at September 30, 2010, were as follows:

Description	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs (In Thousands)	(Level 3) Significant Unobservable Inputs	Total Fair Value September 30, 2010
Securities available for sale	\$ -	\$56,857	\$ -	\$56,857

For financial assets measured at fair value on a recurring basis, the fair value measurements by level within the fair value hierarchy, used at December 31, 2009 were as follows:

Description	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs (In Thousands)	(Level 3) Significant Unobservable Inputs	Total Fair Value December 31, 2009
Securities available for sale	\$ -	\$30,144	\$ -	\$30,144

For assets measured at fair value on a nonrecurring basis, the fair value measurements by level within the fair value hierarchy used at September 30, 2010, were as follows:

Description	(Level 1) Quoted Prices in Active Markets for Identical Assets	(Level 2) Significant Other Observable Inputs (In Thousands)	(Level 3) Significant Unobservable Inputs	Total Fair Value September 30, 2010
Impaired loans	\$ -	\$ -	\$9,687	\$9,687
Real estate and other assets owned	\$ -	\$ -	\$2,107	\$2,107

NOTE O –FAIR VALUE MEASUREMENTS AND DISCLOSURES (Continued)

For assets measured at fair value on a nonrecurring basis, the fair value measurements by level within the fair value hierarchy used at December 31, 2009, were as follows:

Description	(Level 1)	(Level 2)	(Level 3)	Total Fair Value December 31, 2009
	Quoted Prices in Active Markets for Identical Assets	Significant Other Observable Inputs (In Thousands)	Significant Unobservable Inputs	
Impaired loans	\$ -	\$ -	\$ 5,300	\$5,300
Real estate owned	\$ -	\$ -	\$ 1,928	\$1,928

Other Real Estate Owned

Real estate owned assets are adjusted to fair value less estimated selling costs upon transfer of the loans to real estate owned. Subsequently, real estate owned assets are carried at the lower of carrying value or fair value. Fair value is based upon independent market prices, appraised values of the collateral or management's estimation of the value of the collateral. These assets are included as Level 3 fair values.

Real estate and other repossessed assets owned increased from December 31, 2009 and September 30, 2010 by the addition of \$911 thousand in repossessed real estate and other assets, which was offset by the reduction in collateral value or impairment of \$706 thousand.

The following information should not be interpreted as an estimate of the fair value of the Company since a fair value calculation is only provided for a limited portion of the Company assets and liabilities. Due to a wide range of valuation techniques and the degree of subjectivity used in making the estimates, comparisons between the Company disclosures and those of other companies may not be meaningful. The following methods and assumptions were used to estimate the fair values of the Company's financial instruments at September 30, 2010, and December 31, 2009.

Cash and Cash Equivalents (Carried at Cost)

The carrying amounts reported in the balance sheet for cash and short-term instruments approximate those assets' fair values.

Securities

The fair value of securities available for sale (carried at fair value) and held to maturity (carried at amortized cost) are determined by obtaining quoted market prices on nationally recognized securities exchanges (Level 1), or matrix pricing (Level 2), which is a mathematical technique used widely in the industry to value debt securities without relying exclusively on quoted market prices for the specific securities but rather by relying on the securities' relationship to other benchmark quoted prices.

Loans Receivable (Carried at Cost)

The fair values of loans are estimated using discounted cash flow analyses, using market rates at the balance sheet date that reflect the credit and interest rate-risk inherent in the loans. Projected future cash flows are calculated based upon contractual maturity or call dates, projected repayments and prepayments of principal. Generally, for variable rate loans that reprice frequently and with no significant change in credit risk, fair values are based on carrying values.

NOTE O –FAIR VALUE MEASUREMENTS AND DISCLOSURES (Continued)

Impaired Loans (Generally Carried at Fair Value)

Impaired loans carried at fair value are those impaired loans in which the Company has measured impairment generally based on the fair value of the loan's collateral. Fair value is generally determined based upon independent third-party appraisals of the properties, or discounted cash flows based upon the expected proceeds. These assets are included as Level 3 fair values, based upon the lowest level of input that is significant to the fair value measurements. The fair value at September 30, 2010 consists of the loan balances of \$13.3 million, net of a valuation allowance of \$3.6 million. The fair value at December 31, 2009 consists of the loan balances of \$7.8 million, net of a valuation allowance of \$2.5 million.

Federal Home Loan Bank Stock and ACBB Stock (Carried at Cost)

The carrying amount of this restricted investment in bank stock approximates fair value, and considers the limited marketability of such securities.

Accrued Interest Receivable and Payable (Carried at Cost)

The carrying amount of accrued interest receivable and accrued interest payable approximates its fair value.

Deposit Liabilities (Carried at Cost)

The fair values disclosed for demand deposits (e.g., interest and noninterest checking, passbook savings and money market accounts) are, by definition, equal to the amount payable on demand at the reporting date (i.e., their carrying amounts). Fair values for fixed-rate certificates of deposit are estimated using a discounted cash flow calculation that applies interest rates currently being offered in the market on certificates to a schedule of aggregated expected monthly maturities on time deposits.

Federal Home Loan Bank of New York Advances and Securities Sold Under Agreements to Repurchase (Carried at Cost)

Fair values of FHLB advances are determined by discounting the anticipated future cash payments by using the rates currently available to the Company for debt with similar terms and remaining maturities. Securities sold under agreements to repurchase are estimated using discounted cash flow analysis, based on quoted prices for available borrowings with similar credit risk characteristics, terms and remaining maturity. These prices obtained from this active market represent a market value that is deemed to represent the transfer price if the liability were assumed by a third party.

Subordinated Debentures

The fair value estimate of subordinated debentures is determined by discounting future cash payments by using the rates currently available to the Company for debt with similar terms and remaining maturities.

Off-Balance Sheet Financial Instruments (Disclosed at Cost)

Fair values for the Company's off-balance sheet financial instruments (lending commitments and letters of credit) are based on fees currently charged in the market to enter into similar agreements, taking into account, the remaining terms of the agreements and the counterparties' credit standing. The fair value of these off-balance sheet financial instruments are not considered material as of September 30, 2010 and December 31, 2009.

NOTE O –FAIR VALUE MEASUREMENTS AND DISCLOSURES (Continued)

The carrying amounts and estimated fair values of financial instruments are as follows:

	September 30, 2010		December 31, 2009	
	Carrying Value	Estimated Fair Value	Carrying Value	Estimated Fair Value
	(In Thousands)			
Financial assets:				
Cash and cash equivalents	\$ 147,356	\$ 147,356	\$ 50,895	\$ 50,895
Securities available for sale	56,857	56,857	30,144	30,144
Investment securities held to maturity	314,064	316,927	305,349	301,673
Mortgage-backed securities held to maturity	301,171	315,249	248,426	258,758
Loans receivable, net	888,667	904,194	585,759	594,853
Federal Home Loan Bank of New York Stock and ACBB stock	4,296	4,296	3,045	3,045
Accrued interest receivable	7,924	7,924	6,468	6,468
Financial liabilities:				
Deposits	1,484,205	1,494,224	1,015,755	1,032,497
Federal Home Loan Bank of New York				
Advances	29,500	32,964	24,826	27,097
Securities sold under agreements to repurchase	40,000	45,058	40,000	42,737
Subordinated debentures	5,100	5,100	-	-
Accrued interest payable	763	763	1,226	1,226

Limitations

The fair value estimates are made at a discrete point in time based on relevant market information and information about the financial instruments. Fair value estimates are based on judgments regarding future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates are subjective in nature and involve uncertainties and matters of significant judgment and, therefore, cannot be determined with precision. Changes in assumptions could significantly affect the estimates. Further, the foregoing estimates may not reflect the actual amount that could be realized if all or substantially all of the financial instruments were offered for sale. This is due to the fact that no market exists for a sizable portion of the loan, deposit and off balance sheet instruments.

In addition, the fair value estimates are based on existing on-and-off balance sheet financial instruments without attempting to value anticipated future business and the value of assets and liabilities that are not considered financial instruments. Other significant assets that are not considered financial assets include premises and equipment. In addition, the tax ramifications related to the realization of the unrealized gains and losses can have a significant effect on fair value estimates and have not been considered in any of the estimates.

Finally, reasonable comparability between financial institutions may not be likely due to the wide range of permitted valuation techniques and numerous estimates which must be made given the absence of active secondary markets for many of the financial instruments. This lack of uniform valuation methodologies introduces a greater degree of subjectivity to these estimated fair values.

NOTE P –OTHER COMPREHENSIVE INCOME

Components of accumulated other comprehensive income (loss) at September 30, 2010 and December 31, 2009 were as follows (in thousands):

	September 30, 2010	December 31, 2009
	(In Thousands)	
Net unrealized gain (loss) on securities available for sale	\$ 2,576	\$ (127)
Tax effect	(1,065)	56
Net of tax amount	1,511	(71)
Minimum pension liability	(3,745)	(3,745)
Tax effect	1,503	1,503
Net of tax amount	(2,242)	(2,242)
Accumulated other comprehensive (loss)	\$ (731)	\$(2,313)

The components of other comprehensive income (loss) for the nine months ended September 30, 2010 and 2009 and their related tax effects are presented in the following table:

	September 30, 2010	September 30, 2009
	(In Thousands)	
Unrealized holding gains on available for sale securities:		
Unrealized holding gains (losses) arising during the year	\$ 2,811	\$ 347

ITEM 2 – Management’s Discussion and Analysis of Financial Condition and Results of Operations

This Form 10-Q contains forward-looking statements, which can be identified by the use of words such as “believes,” “expects,” “anticipates,” “estimates” or similar expressions. Forward – looking statements include:

- Statements of our goals, intentions and expectations;
- Statements regarding our business plans, prospects, growth and operating strategies;
 - Statements regarding the quality of our loan and investment portfolios; and
 - Estimates of our risks and future costs and benefits.

These forward-looking statements are subject to significant risks and uncertainties. Actual results may differ materially from those contemplated by the forward-looking statements due to, among others, the following factors:

- General economic conditions, either nationally or in our market area, that are worse than expected;
- Changes in the interest rate environment that reduce our interest margins or reduce the fair value of financial instruments;
- Our ability to enter into new markets and/or expand product offerings successfully and take advantage of growth opportunities;
 - Increased competitive pressures among financial services companies;
 - Changes in consumer spending, borrowing and savings habits;
 - Legislative or regulatory changes that adversely affect our business;
 - Adverse changes in the securities markets;
 - Our ability to successfully manage our growth; and
- Changes in accounting policies and practices, as may be adopted by the bank regulatory agencies, the Financial Accounting Standards Board or the Public Company Accounting Oversight Board.

Any of the forward-looking statements that we make in this report and in other public statements we make may turn out to be wrong because of inaccurate assumptions we might make, because of the factors illustrated above or because of other factors that we cannot foresee. Consequently, no forward-looking statement can be guaranteed.

Comparison of Financial Condition at September 30, 2010 and December 31, 2009

General

Total assets increased by \$512.4 million to \$1.8 billion at September 30, 2010, compared to \$1.3 billion at December 31, 2009. Total liabilities increased \$511.3 million to \$1.6 billion at September 30, 2010, compared to \$1.1 billion at December 31, 2009. Total stockholders’ equity increased \$1.1 million to \$217.3 million at September 30, 2010. The increase in assets and liabilities was primarily a result of the acquisition of Sterling Banks, Inc. ("Sterling") in July 2010. Total assets and liabilities acquired were approximately \$360.5 million, including goodwill, and \$345.7 million, respectively.

Deposits

Total deposits increased \$468.4 million to \$1.5 billion at September 30, 2010, compared to \$1.0 billion at December 31, 2009, of which approximately \$320.0 million were acquired through the acquisition of Sterling Banks, Inc.. Non-interest bearing demand deposits increased \$32.3 million to \$64.7 million at September 30, 2010, and interest bearing demand deposits increased \$43.3 million to \$172.8 million. Savings and club accounts increased \$143.5

million to \$419.5 million, and certificates of deposit increased \$249.3 million to \$827.1 million at September 30, 2010. Total deposits acquired through acquisition were \$320.7 million, including non-interest bearing demand deposits of \$48.3 million.

Investments (Including Mortgage-Backed Securities)

The investment portfolio increased \$88.2 million to \$672.1 million at September 30, 2010, compared to \$583.9 million at December 31, 2009. Securities available for sale increased \$26.7 million to \$56.9 million at September 30, 2010, compared to \$30.1 million at December 31, 2009, primarily due to investments acquired in the merger. Investments held to maturity increased \$8.7 million to \$301.2 million at September 30, 2010, compared to \$305.3 million at December 31, 2009, primarily due to investments made by RomAsia Bank. Mortgage-backed securities increased \$52.7 million to \$301.2 million at September 30, 2010, compared to \$248.4 million at December 31, 2009. The increase in

mortgage-backed securities was primarily related to reinvesting the proceeds from the calls of held to maturity securities and securities acquired in the merger.

Loans

Net loans increased by \$302.9 million to \$888.7 million at September 30, 2010, compared to \$585.8 million at December 31, 2009. Loans totaling approximately \$272.3 million were acquired in the acquisition. Commercial and multi-family real estate mortgages increased \$104.9 million to \$277.3 million at September 30, 2010, compared to \$172.3 million at December 31, 2009. Gross construction loans increased \$14.5 million to \$40.7 million at September 30, 2010, compared to \$26.2 million at December 31, 2009. This increase was primarily related to construction loans acquired in the merger. Residential and consumer loans increased \$155.7 million from December 31, 2009 to September 30, 2010. The poor economy has continued to cause loan demand to be sluggish.

Other Assets

All other asset categories, except cash and cash equivalents, increased by \$24.6 million from December 31, 2009 to September 30, 2010. This increase was primarily caused by an increase of \$9.6 million in premises and equipment, an increase of \$3.5 million in bank owned life insurance, and \$5.3 million in deferred taxes and income tax receivable. Premises and equipment increased primarily because of the Sterling acquisition of \$7.3 million, two major branch renovations, the fit out of unused space at the corporate headquarters, and the new branch opening by RomAsia.

Borrowed Money

The \$4.7 million increase in Federal Home Loan Bank of New York (FHLB NY) advances during the nine months ended September 30, 2010 was due to \$7.0 million in borrowings by RomAsia Bank offset by principal repayments of \$2.3 million on Roma Bank FHLB NY advances. The Company assumed \$14.2 million of FHLB advances in the merger and repaid the borrowings including \$983 thousand in premiums in July 2010. At September 30, 2010, the outstanding FHLB NY borrowings were \$29.5 million, compared to \$24.8 million at December 31, 2009.

Other Liabilities

Other liabilities increased \$38.2 million to \$93.4 million at September 30, 2010. The net increase was primarily due to \$32.6 million liability recorded for securities purchased and not settled at September 30, 2010 and the subordinated debentures of \$5.1 million assumed in the acquisition.

Stockholders' Equity

Stockholders' equity increased \$1.1 million to \$217.3 million at September 30, 2010 compared to \$216.2 million at December 31, 2009. The net increase was primarily due to net income of \$3.9 million, unrealized gains, net of tax on available for sale securities of \$1.6 million, and stock based compensation of \$1.4 million, which was offset by \$1.7 million in dividend payments and \$4.1 million in stock repurchases.

Comparison of Operating Results for the Three Months Ended September 30, 2010 and 2009

General

Net income decreased \$262 thousand to \$823 thousand for the quarter ended September 30, 2010, compared to \$1.1 million for the prior year period. The change from the prior year was primarily due to an increase of \$3.7 million in

net interest income, an increase of \$573 thousand in non-interest income, reduced by an increase of \$565 thousand in provision for loan loss, and, an increase of \$4.0 million in non-interest expense, and an increase of \$28 thousand in income tax expense.

Interest Income

Interest income increased by \$3.8 million to \$18.1 million for the three months ended September 30, 2010 compared to \$14.3 million for the prior year period. Interest income from loans increased \$3.5 million to \$11.6 million for the three months ended September 30, 2010. The increase was primarily due to an increase in the portfolio related to the merger.

Interest income from residential mortgage loans increased \$962 thousand over the comparable quarter ended September 30, 2009, while interest income from consumer loans increased \$729 thousand. The weighted average interest rates for mortgage and consumer loans at September 30, 2010 were 5.63% and 5.39%, respectively, compared to 5.57% and 5.59%, respectively, in the prior year. Interest income from commercial and multifamily mortgage loans and commercial loans increased \$1.8 million from period to period. The weighted average interest rate for commercial and multi-family mortgage loans and commercial loans was 6.0% at September 30, 2010, and 6.03% at September 30, 2009. Interest income from loans was reduced by the amortization of the premium paid on the loans of \$365 thousand.

Interest income from mortgage-backed securities decreased \$104 thousand over the comparable quarter in 2009. The decrease was primarily due to the decrease in the portfolio yield from year to year. Interest income from investments held to maturity increased \$367 thousand for the quarter ended September 30, 2010. As compared to the same period in 2009. This increase was primarily due to an increase in the portfolio from year to year, offset by a decrease in portfolio yield. Interest income on securities available for sale changed minimally from period to period. Interest income from other interest earning assets decreased \$52 thousand for the three months ended September 30, 2010, compared to the same period in 2009. This decrease was primarily due to a slight decrease in the average balance of overnight funds from year to year, and by a decrease in overnight rates during the comparable periods.

Interest Expense

Interest expense increased \$41 thousand for the three month period ended September 30, 2010 to \$5.7 million compared to \$5.6 million for the three months ended September 30, 2009. The increase was all related to interest expense on subordinated debentures acquired in the merger. Total deposits increased \$517.8 million during the twelve month period ended September 30, 2010. The effect of the increased portfolio was offset by a decrease in the weighted average interest rate of 73 basis points to 1.32% at September 30, 2010.

Provision for Loan Losses

The loan loss provision for the three months ended September 30, 2010 increased \$565 thousand to \$1.8 million. The increase is representative of the risk profile of the loan portfolio and loan growth in each period. Impaired loans increased \$56.6 million to \$78.1 million, net of specific reserves, at September 30, 2010, compared to \$22.1 million, net of specific reserves, at December 31, 2009. Included in the increase is \$47.7 million of loans, net of credit marks, acquired in the merger. The \$47.4 million includes \$21.2 million of loans, net of credit marks, that are performing, but are considered impaired because they are either a troubled debt restructure or a specific credit mark had been established. All other loans remain well collateralized and where needed, appropriate specific reserves have been established. The Company is taking a proactive approach in identifying loans at an early stage that may be experiencing cash flow deterioration or collateral weakening even though the loan remains current. The Company obtains new appraisals at least annually on substandard assets.

Non-Interest Income

Non-interest income increased \$589 thousand to \$1.9 million for the three months ended September 30, 2010, compared to \$1.3 million for the three months ended September 30, 2009. The net increase was primarily derived from increases in gains on sales of mortgage loans and investments of \$122 thousand and \$82 thousand, respectively, and, an increase in fees and service charges on loans and deposits of \$220 thousand, which was primarily related to volume related to the acquisition. These increases were offset by a decrease in commissions on sales of title policies of \$40 thousand.

Non-Interest Expense

Non-interest expense increased \$4.0 million to \$11.1 million for the three months ended September 30, 2010 compared to \$7.2 million for the three months ended September 30, 2009. Salaries and employee benefits increased \$1.8 million to \$5.9 million for the three months ended September 30, 2010 compared to the same period in the prior year. This increase represents an increase in salaries primarily due to new positions, annual wage adjustments of approximately 3%, \$70 thousand related to the opening of a new branch by RomAsia in June 2010, and approximately \$400 thousand related to merged employees. Other non-interest expenses increased \$759 thousand to \$1.6 million for the three months ended September 30, 2010, primarily caused by real estate and other repossessed assets expenses, including \$315 thousand of impairment on real estate owned. Expenses related to the acquisition of Sterling Banks, Inc. increased non-interest expense by \$357 thousand during the quarter ended September 30, 2010. Federal Deposit Insurance Premium expense increased \$327 thousand because of the higher deposit portfolio. The aggregate increase in occupancy, equipment and data processing of \$800 thousand was primarily related to the merger and the related increase of ten branches.

Provision for Income Taxes

Income tax expense increased by \$28 thousand to \$552 thousand for the three months ended September 30, 2010 compared to \$524 thousand for the three months ended September 30, 2009 primarily as a result of merger expenses that are not tax deductible. Income tax expense, represented an effective rate of – 39.6% for the three months ended September 30, 2010, compared to 32.3% in the prior year quarter. The Company pays a state tax rate of 3.6% on the taxable income of the Investment Company and 9.0 % on the taxable income of the other entities.

Comparison of Operating Results for the Nine Months Ended September 30, 2010 and 2009

General

Net income increased \$1.4 million to \$3.9 million for the nine months ended September 30, 2010, compared to \$2.5 million for the prior year period. The increase was primarily due to an increase of \$7.4 million in net interest income after the provision for loan losses, reduced by an increase of \$5.7 million in non-interest expense.

Interest Income

Interest income increased by \$8.0 million to \$48.2 million for the nine months ended September 30, 2010, compared to \$40.2 million for the prior year period. Interest income from loans increased \$5.3 million to \$28.3 million for the nine months ended September 30, 2010. The increase in interest income from loans was primarily due to growth in the loan portfolio including the loans acquired in the merger, partially offset by a decrease in the weighted average interest rate on loans. Interest income from residential mortgage loans increased \$1.2 million over the comparable nine month period ended September 30, 2010 and 2009, while interest income from consumer loans increased approximately \$659 thousand. The weighted average interest rates for mortgage and equity loans at September 30, 2010 were 5.63% and 5.39%, respectively, compared to 5.57% and 5.59%, respectively, in the prior year. Interest income from commercial and multi-family mortgage loans and commercial loans increased \$3.4 million from year to year. The weighted average interest rate for commercial and multi-family mortgage loans and commercial loans was 6.00% at September 30, 2010 and 6.03% at September 30, 2009. Interest income was reduced by the accretion of the premium paid on loans of \$365 thousand.

Interest income from mortgage-backed securities decreased \$1.1 million over the comparable nine month period in 2009 due to a reduction in the portfolio caused primarily by principal repayments, and lower yield on reinvestments. Interest income from investments held to maturity increased \$4.2 million for the nine months ended September 30, 2010, compared to September 30, 2009. The increase was primarily related to the increase in the held to maturity portfolio. Interest income on securities available for sale decreased \$103 thousand from year to year. Interest income on other interest earning assets decreased \$327 thousand for the nine months ended September 30, 2010, compared to the same period in 2009. This decrease was primarily due to a significant decrease in overnight rates during the period.

Interest Expense

Interest expense decreased \$1.3 million for the nine month period ended September 30, 2010 to \$15.2 million compared to \$16.5 million for the nine months ended September 30, 2009. The decrease was due to a \$1.3 million decrease in interest paid on deposits. The portfolio of interest bearing deposits increased \$517.8 million from year to year. The weighted average interest rate on deposits decreased 73 basis points between September 30, 2009 and September 30, 2010 to 1.32%. Interest expense on borrowed money increased \$39 thousand for the nine month period

ended September 30, 2010, compared to 2009 primarily due to additional borrowings by RomAsia Bank and the addition of the subordinated debt from the merger, offset by repayments.

Provision for Loan Losses

The loan loss provision for the nine months ended September 30, 2010 increased \$1.9 million to \$3.9 million compared to the comparable prior year period. The increase is representative of the risk profile of the loan portfolio and loan growth from period to period. Impaired loans increased \$57.7 million to \$78.1 million, net of specific reserves and credit marks, at September 30, 2010, compared to \$21.1 million, net of specific reserves, at September 30, 2009. The \$57.7 million includes \$21.2 million of loans, net of credit marks, that are performing, but are considered impaired

because they are either a troubled debt restructure or a specific credit mark had been established. All other loans remain well collateralized and where needed, appropriate specific reserves have been recognized. Specific reserves increased \$1.1 million to \$3.6 million at September 30, 2010 compared to \$2.5 million at December 31, 2009.

Non-Interest Income

Non-interest income increased \$828 thousand to \$4.5 million for the nine months ended September 30, 2010, compared to \$3.7 million for the nine months ended September 30, 2009. The net increase was derived from fees and service charges on deposits and loans which increased \$328 thousand from period to period primarily due to an increase in late charges, an increase in gains on sales of mortgage loans of \$233 thousand, and an increase of \$143 thousand in gains on calls of securities. These increases were offset by a decrease of \$164 thousand in commissions on sales of title policies.

Non-Interest Expense

Non-interest expense increased \$5.7 million to \$27.5 million for the nine months ended September 30, 2010, compared to \$21.8 million for the nine months ended September 30, 2009. Salaries and related benefits increased \$2.7 million to \$15.0 million for the nine months ended September 30, 2010, compared to \$12.2 million for the same period in the prior year. This increase represents an increase in salaries primarily due to new positions, annual wage adjustments of 3%, costs related to the opening of a new branch by RomAsia in June 2010, and salaries and related benefits for the personnel retained in the merger, including the personnel for the additional ten branches. Other non-interest expenses increased \$1.6 million to \$3.9 million for the nine months ended September 30, 2010, primarily caused by real estate and other repossessed assets expenses, and the legal and appraisal costs related to impaired loans. Included in this amount is \$706 thousand of impairment on real estate owned. Expenses related to the acquisition of Sterling Banks, Inc. increased non-interest expense by \$882 thousand during the nine months ended September 30, 2010. Occupancy, equipment and data processing expense increased an aggregate of \$836 thousand for the nine months ended September 30, 2010 as compared to the comparable period in 2009, primarily due to the merger.

Provision for Income Taxes

Income tax expense increased by \$1.0 million to \$2.1 million for the nine months ended September 30, 2010, compared to \$1.1 million for the nine months ended September 30, 2009. Income tax expense represented an effective rate of 35.0% for the nine months ended September 30, 2010, compared to an effective rate 30.6% in the prior year. The increase in the effective tax rate is primarily due to the lower percentage of tax free income to taxable income from period to period, and merger related expenses that are not tax deductible. The Company pays a state tax rate of 3.6% on the taxable income of the Investment Company and 9.0% on the taxable income of the other entities.

Critical Accounting Policies

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and could potentially result in materially different results under different assumptions and conditions. We believe that the most critical accounting policy upon which our financial condition and results of operation depend, and which involves the most complex subjective decisions or assessments, is the allowance for loan losses.

The allowance for loan losses is the amount estimated by management as necessary to cover credit losses in the loan portfolio both probable and reasonably estimable at the balance sheet date. The allowance is established through the provision for loan losses which is charged against income. In determining the allowance for loan losses, management makes significant estimates and has identified this policy as one of our most critical. The methodology for determining the allowance for loan losses is considered a critical accounting policy by management due to the high

degree of judgment involved, the subjectivity of the assumptions utilized and the potential for changes in the economic environment that could result in changes to the amount of the recorded allowance for loan losses.

As a substantial amount of our loan portfolio is collateralized by real estate, appraisals of the underlying value of property securing loans is critical in determining the amount of the allowance required for specific loans. Assumptions for appraisals are instrumental in determining the value of properties. Overly optimistic assumptions or negative changes to assumptions could significantly affect the valuation of a property securing a loan and the related allowance determined. The assumptions supporting such appraisals are carefully reviewed by management to determine that the resulting values reasonably reflect amounts realizable on the related loans.

Management performs a monthly evaluation of the adequacy of the allowance for loan losses. We consider a variety of factors in establishing this estimate including, but not limited to, current economic conditions, delinquency statistics, geographic and industry concentrations, the adequacy of the underlying collateral, the financial strength of the

borrowers, results of internal loan reviews and other relevant factors. This evaluation is inherently subjective as it requires material estimates by management that may be susceptible to significant change based on changes in economic and real estate market conditions.

The evaluation has a specific and general component. The specific component relates to loans that are delinquent or otherwise identified as problem loans through the application of our loan review process. All such loans are evaluated individually, with principal consideration given to the value of the collateral securing the loan. Specific allowances are established as required by this analysis. The general component is determined by segregating the remaining loans by type of loan. We also analyze historical loss experience, delinquency trends, general economic conditions and geographic and industry concentrations.

Actual loan losses may be significantly more than the allowances we have established which could have a material negative effect on our financial results.

The Company uses the asset and liability method of accounting for income taxes. Under this method, deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax basis. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled. If current available information raises doubt as to the realization of the deferred tax assets, a valuation allowance is established. The Company considers the determination of this valuation allowance to be a critical accounting policy because of the need to exercise significant judgment including projections of future taxable income. These judgments and estimates are reviewed on a continual basis as regulatory and business factors change. A valuation allowance for deferred tax assets may be required if the amount of taxes recoverable through loss carry-back declines, or if the Company projects lower levels of future taxable income. Such a valuation allowance would be established through a charge to income tax expense, which would adversely affect the Company's operating results.

Goodwill is measured as the excess of the cost of a business acquisition over the sum of the amounts assigned to identifiable tangible and intangible assets acquired less liabilities assumed. Goodwill is not amortized but is reviewed for impairment annually or more frequently if circumstances warrant. Application of the goodwill impairment test requires significant judgments including estimation of future cash flows, which is dependent on internal forecasts, estimation of the long-term rate of growth, the period over which cash flows will occur, and determination of our cost of capital. Changes in these estimates and assumptions could materially affect the determination of fair value and/or conclusions related to goodwill impairment.

New Accounting Pronouncements

The FASB has issued ASU 2010-06, Fair Value Measurements and Disclosures (Topic 820): Improving Disclosures about Fair Value Measurements. This ASU requires some new disclosures and clarifies some existing disclosure requirements about fair value measurements as set forth in Codification Subtopic 820-10. The FASB's objective is to improve these disclosures and, thus, increase the transparency in financial reporting. Specifically, ASU 2010-06 amends Codification Subtopic 820-10 to now require:

A reporting entity to disclose separately the amounts of significant transfers in and out of Level 1 and Level 2 fair value measurements and describe the reasons for the transfers; and

In the reconciliation for fair value measurements using significant unobservable inputs, a reporting entity should present separately information about purchases, sales, issuances, and settlements.

In addition, ASU 2010-06 clarifies the requirements of the following existing disclosures:

For purposes of reporting fair value measurement for each class of assets and liabilities, a reporting entity needs to use judgment in determining the appropriate classes of assets and liabilities; and A reporting entity should provide disclosures about the valuation techniques and inputs used to measure fair value for both recurring and nonrecurring fair value measurements.

ASU 2010-06 is effective for interim and annual reporting periods beginning after December 15, 2009, except for the disclosures about purchases, sales, issuances, and settlements in the roll forward of activity in Level 3 fair value measurements. Those disclosures are effective for fiscal years beginning after December 15, 2010, and for interim periods within those fiscal years. Early adoption is permitted. The adoption of this standard did not have a material impact on our financial position or results of operation.

New Accounting Pronouncements (Continued)

ASU 2010-20: Receivables (Topic 310): Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses, will help investors assess the credit risk of a company's receivables portfolio and the adequacy of its allowance for credit losses held against the portfolios by expanding credit risk disclosures.

The ASU requires more information about the credit quality of financing receivables in the disclosures to financial statements, such as aging information and credit quality indicators. Both new and existing disclosures must be disaggregated by portfolio segment or class. The disaggregation of information is based on how a company develops its allowance for credit losses and how it manages its credit exposure.

The amendments in this Update apply to all public and nonpublic entities with financing receivables. Financing receivables include loans and trade accounts receivable. However, short-term trade accounts receivable, receivables measured at fair value or lower of cost or fair value, and debt securities are exempt from these disclosure amendments.

The effective date of ASU 2010-20 differs for public and nonpublic companies. For public companies, the amendments that require disclosures as of the end of a reporting period are effective for periods ending on or after December 15, 2010. The amendments that require disclosures about activity that occurs during a reporting period are effective for periods beginning on or after December 15, 2010. The Company does not expect the adoption of these amendments to have a material effect on their financial position or results of operation.

ITEM 3 – Quantitative and Qualitative Disclosures About Market Risk

Asset and Liability Management

The majority of the Company's assets and liabilities are monetary in nature. Consequently, the Company's most significant form of market risk is interest rate risk. The Company's assets, consisting primarily of mortgage loans, have generally longer maturities than the Company's liabilities, consisting primarily of short-term deposits. As a result, a principal part of the Company's business strategy is to manage interest rate risk and reduce the exposure of its net interest income to changes in market interest rates. Management of the Company does not believe that there has been a material adverse change in market risk during the nine months ended September 30, 2010.

Net Portfolio Value

The Company's interest rate sensitivity is monitored by management through the use of the OTS model which estimates the change in the Company's net portfolio value ("NPV") over a range of interest rate scenarios. NPV is the present value of expected cash flows from assets, liabilities, and off-balance sheet contracts. The NPV ratio, under any interest rate scenario, is defined as the NPV in that scenario divided by the market value of assets in the same scenario. The OTS produces its analysis based upon data submitted on the Company's quarterly Thrift Financial Reports. The following table sets forth Roma Bank's NPV as of June 30, 2010, the most recent date the NPV was calculated by the OTS (in thousands):

Change In Interest rates In Basis Points (Rate Shock)	Amount	NPV as Percent of Portfolio Value of Assets			
		NPV Dollar Change	Percent Change	NPV Ratio	Change in Basis Points

Edgar Filing: ROMA FINANCIAL CORP - Form 10-Q

		\$			
+300bp	\$ 166,356	(69,511)	(29)%	12.78%	(412)bp
+200bp	193,807	(42,060)	(18)%	14.50%	(240)bp
+100bp	218,249	(17,618)	(7)%	15.94%	(96)bp
0bp	235,867	- ---	0%	16.9%	-
-100bp	248,608	12,741	5%	17.55%	65bp

The following table sets forth RomAsia Bank's NPV as of June 30, 2010, the most recent date the NPV was calculated by the OTS (in thousands):

Change In Interest rates In Basis Points (Rate Shock)	Amount	NPV		NPV as Percent of Portfolio Value of Assets	
		Dollar Change	Percent Change	NPV Ratio	Change in Basis Points
+300bp	\$ 9,354	\$ (7,698)	(45)%	8.37%	(571)bp
+200bp	12,435	(4,617)	(27)%	10.77%	(330)bp
+100bp	15,134	(1,918)	(11)%	12.76%	(132)bp
0bp	17,052	-	-%	14.08%	-
-100bp	18,726	1,674	10%	15.21%	113bp

Management of the Company believes that there has not been a material adverse change in the market risk during the three months ended September 30, 2010.

ITEM 4 – Controls and Procedures

An evaluation was performed under the supervision, and with the participation of the Company's management, including the Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) promulgated under the Securities Exchange Act of 1934, as amended) as of September 30, 2010. Based on such evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures are effective as of September 30, 2010.

No change in the Company's internal controls over financial reporting (as defined in Rule 13a-15(f) promulgated under the Securities Exchange Act of 1934, as amended) occurred during the most recent fiscal quarter that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

PART II – OTHER INFORMATION

ITEM 1 – Legal Proceedings

There were no material pending legal proceedings at September 30, 2010 to which the Company or its subsidiaries is a party other than ordinary routine litigation incidental to their respective businesses.

ITEM 1A – Risk Factors

Management does not believe there were any material changes to the risk factors presented in the Company's Form 10-K for the year ended December 31, 2009 during the most recent quarter.

ITEM 2 – Unregistered Sales of Equity Securities and Use of Proceeds

On March 18, 2010, the Company announced a five percent open market stock repurchase program, equivalent to 360,680 shares, in open market, based on stock availability, price and the Company's financial performance. The Company completed the repurchase program on September 23, 2010. The following table reports information regarding repurchases of the Company's common stock during the quarter ended September 30, 2010.

On September 17, 2010, the Company announced a five percent open market stock repurchase program, equivalent to 342,646 shares, in open market, based on stock availability, price and the Company's financial performance. This repurchase program began repurchasing shares on October 15, 2010.

Period	Total Number of Shares Repurchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans	Maximum Number of shares that may Yet Be Purchased Under the Plan
July 1-31, 2010	57,000	\$11.30	57,000	107,680
August 1-31, 2010	65,000	\$11.09	65,000	42,680
September 1-23, 2010	42,680	\$10.66	42,680	-
Total	164,680	\$10.89	164,680	-

ITEM 3 – Defaults Upon Senior Securities
