Table of Contents**II. BUSINESS****1. Business Overview****A. Industry Characteristics**

As of June 30, 2010, the number of domestic mobile phone subscribers reached 49.61 million and, with more than 100% penetration rate, the Korean mobile communication market can be considered to have reached its maturation stage. However, the penetration rate is expected to increase further due to increased use of mobile phones by corporate users resulting from the rapid growth of smart phone markets, as well as the increasing popularity of high-tech mobile devices based on wireless data services such as tablet PC.

The Korean mobile communications market continues to improve in the quality of services with the help of advances in network-related technology evidenced by the world's first commercialization of CDMA2000 1x, CDMA 1x EV-DO, and the development of highly advanced handsets, including various smart phones, that enable the provision of convergence services for multimedia contents, mobile commerce, telematics, satellite Digital Multimedia Broadcasting (DMB), digital home services, connected workforce services and other related services. In addition, through HSPA+ network to be commercialized within this year and the LTE network to be introduced from the next year, the industry productivity enhancement (IPE) business directly resulting in the enhancement of productivity, such as the corporate connected workforce business, is expected to grow rapidly.

C. Domestic and Overseas Market Conditions

The Korean mobile communication market includes the entire population of Korea with mobile communication service needs, and almost every Korean is considered a potential user. Although

Table of Contents

demand has primarily been in the domestic market, as the business territory expands to overseas market, the size of overseas sales is expected to grow in the near future. In addition, sales revenue related to data services is expected to increase due to the increasing popularity of smart phones and wireless Internet. Business-to-business segment that creates added values by adding additional solutions and applications is also growing. Seasonal and economic fluctuations have much less impact on the Korean mobile communication market compared to other industries. Historical market share of the Company:

D. Business Overview and Competitive Strengths

The Company's revenue in the first half of 2010 amounted to Won 6,106.8 billion, an increase of Won 162.5 billion compared to the first half of 2009. This increase in revenue was meaningful since it was achieved despite a number of negative factors, including the charging of voice calls on a per-second basis from March 2010 and the reduction of sign-up fees by 28% from December 2009. Operating income in the first half of 2010 amounted to Won 1,062.5 billion, which was lower than the same period of 2009, due among others to the increase in marketing and depreciation expenses. In the first half of 2010, however, the Company achieved meaningful business performance such as securing 25 million subscribers in May 2010 for the first time. Net income in the first half of 2010 amounted to Won 685.7 billion, an increase of Won 57.3 billion from the same period of 2009.

In June 2010, the Company met the guideline set by the Korea Communications Commission that limits marketing expenses of mobile communication business operators to 22% of their revenue. The Company will comply with the guideline going forward, which will help stabilize the competition in the mobile service markets, while maintaining its competitive advantage based on fundamental

Table of Contents

strengths deriving from handsets, price plans, networks and contents. In addition, the Galaxy S handset introduced in the end of June 2010 has acquired over 500,000 subscribers in 33 days from its debut, due to the Company's marketing superiority, and broke all historical record of Korea handset sales, which reconfirmed the competitive edge of the Company in the field of smart phones. Wide penetration of smart phones has led to the vitalization of the Company's T-Store, which has grown rapidly in the numbers of subscribers, contents and downloads, enhancing the Company's competitiveness in the wireless data market.

As of June 30, 2010, the Company reached a subscriber number of approximately 25,150,000 and a 50.7% market share of the wireless market in Korea in terms of the number of subscribers. The Company plans to establish its leadership among users of smart phones by introducing various mobile platforms and streamlining the subscription process and pricing structures to enable subscribers to easily access their mobile content from multiple devices. The Company also plans to maintain its leadership in wireless Internet market by providing innovative user interface for content access and through investment in data networks, network sharing and support of the content production. In 2010, the Company intends to continue its efforts to seek growth in business-to-business markets, such as industry productivity enhancement (IPE) business in domestic and foreign markets. As IPE business creates added values by adding additional solutions and applications to the existing infrastructure, it is more cost effective compared to traditional business-to-business model. The Company's business-to-business sales in the first half of 2010 increased meaningfully from the same period of 2009.

The Company will also continue its efforts to become a global leader in information and communication technology. It plans to actively respond to secular changes such as the growing popularity of smart phones and wireless Internet, as well as gaining competitive strengths in the IPE business. In particular, the Company intends to pursue opportunities to grow the wireless broadband and IPE businesses in Korea and abroad. In case of overseas businesses, the Company will maintain its disciplined approach under its "Start Small Scale Fast" principle.

5. Derivative Transactions

In order to hedge risks related to fluctuations in currency exchange rates and interest rates, the Company enters into currency swap contracts and interest rate swap contracts. The gain or loss generated from the derivatives contracts is recognized as the gains/losses for the current period or other comprehensive income/loss, in accordance with Korean GAAP. Fair value of the Company's derivatives is calculated using the Company's valuation models. In accordance with the derivatives contracts, the Company's estimated gain/loss on the date of expiration is zero.

3. Status of sanctions, etc.

A. Status of sanctions

The Company was sanctioned with a fine of Won 50 million on December 30, 2008 for a violation of Telecommunications Law involving its mismanagement of privacy policy. The Company continues to improve related system security and is implementing system enhancements, such as introduction of scanning devices, to avoid unnecessary keeping of applications at the distributor level.

Due to the Company's ineffective measures taken with respect to phone numbers that are used for sending illegal unsolicited bulk messages, the Korea Communications Commission, on April 23, 2009, ordered the Company to improve its work procedures. The Company completed the upgrade of the related computer system to prevent illegal messages on October 10, 2009.

On September 2, 2009, the Korea Communications Commission ordered the Company to improve its work procedures in a case relating to the obstruction of subscribers' utilization of wireless internet services. The Company completed the improvement of the procedures in consultation with the Korea Communications Commission by December 8, 2009.

On October 13, 2009, the Korea Communications Commission imposed on the Company a fine of Won 140 million and a newspaper notice order in a case relating to the subscription for mobile telephone services using national identification numbers of the deceased and the Company's failure to verify the required documents. The Company implemented the improved work procedures to strengthen identification process at the time of subscription for mobile telephone services in January 2010.

In addition, on January 21, 2009, the Company was sanctioned for unfair business practices with a fine of Won 1,268 million by the Fair Trade Commission of Korea along with a correctional order of its policy of restricting certain rate plan subscribers from using third party portal contents. The Company has paid the fine and has taken efforts to educate applicable divisions of the issue and to improve the level of the voluntary compliance program to comply with fair trade laws to prevent a repeat of the same violation.

Also on February 3, 2009, the Company received a correctional order and a fine of Won 500 million from the Fair Trade Commission of Korea involving an unfair trade interference practice including refusal of applications for subscription for certain PDA phones distributed by third party manufacturers. The Company filed a suit at the Seoul High Court, which found in favor of the

Independent Accountants' Review Report

English Translation of a Report Originally Issued in Korean

To the Stockholders and Board of Directors of

SK Telecom Co., Ltd.

We have reviewed the accompanying non-consolidated statement of financial position of SK Telecom Co., Ltd. (the Company) as of June 30, 2010, the related non-consolidated statements of income for the three months and six months ended June 30, 2010 and 2009, and non-consolidated statements of changes in stockholders' equity and cash flows for the six months ended June 30, 2010 and 2009, all expressed in Korean won. These non-consolidated financial statements are the responsibility of the Company's management. Our responsibility is to issue a report on these non-consolidated financial statements based on our reviews.

We conducted our reviews in accordance with standards for review of interim financial statements in the Republic of Korea. Those standards require that we plan and perform the review to obtain moderate assurance as to whether the non-consolidated financial statements are free of material misstatement. A review is limited primarily to inquiries of company personnel and analytical procedures applied to financial data, and this provides less assurance than an audit. We have not performed an audit and, accordingly, we do not express an audit opinion.

Based on our reviews, nothing has come to our attention that causes us to believe that the non-consolidated financial statements referred to above are not presented fairly, in all material respects, in conformity with accounting principles generally accepted in the Republic of Korea.

We have previously audited, in accordance with auditing standards generally accepted in the Republic of Korea, the non-consolidated statement of financial position of the Company as of December 31, 2009, and the related non-consolidated statements of income, appropriations of retained earnings, changes in stockholders' equity and cash flows for the year then ended (not presented herein); and in our report dated February 17, 2010, we expressed an unqualified opinion on those non-consolidated financial statements. The accompanying non-consolidated statement of financial position as of December 31, 2009, which is comparatively presented, does not differ in material respects from such audited non-consolidated statement of financial position.

Our reviews also comprehended the translation of the Korean won amounts into U.S. dollar amounts and nothing has come to our attention that causes us to believe that such translation has not been made in conformity with the basis stated in Note 2. Such U.S. dollar amounts are presented solely for the convenience of readers of financial statements.

Accounting principles and review standards and their application in practice vary among countries. The accompanying financial statements are not intended to present the financial position, results of operations, changes in stockholders equity and cash flows in accordance with accounting principles and practices generally accepted in countries other than the Republic of Korea. In addition, the procedures and practices utilized in the Republic of Korea to review such financial statements may differ from those generally accepted and applied in other countries. Accordingly, this report and the accompanying non-consolidated financial statements are for use by those knowledgeable about Korean accounting procedures and review standards and their application in practice.

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The accompanying non-consolidated financial statements of the Company have been prepared in conformity with accounting principles generally accepted in the Republic of Korea (Korean GAAP) and with the accounting policies for annual financial statements for the year ended December 31, 2009.

The Company maintains its official accounting records in Korean won and prepares statutory non-consolidated financial statements in Korean language (Hangul) in conformity with Korean GAAP. Certain accounting principles applied by the Company that conform with financial accounting standards and accounting principles in the Republic of Korea may not conform with accounting principles generally accepted in other countries. Accordingly, these financial statements are intended for use by those who are informed about Korean accounting principles and practices. The accompanying financial statements have been condensed, restructured and translated into English with certain expanded descriptions from the Korean language financial statements. Certain information included in the Korean language financial statements, but not required for a fair presentation of the Company's financial position, results of operations, changes in stockholders' equity or cash flows, is not presented in the accompanying financial statements.

The accompanying non-consolidated financial statements are stated in Korean won, the currency of the country in which the Company is incorporated and operates. The translation of Korean won amounts into U.S. dollar amounts is included solely for the convenience of readers of financial statements and has been made at the rate of ₩1,220.85 to US\$1.00, the Noon Buying Rate in the City of New York for cable transfers in Korean won as certified for customs purposes by the Federal Reserve Bank of New York on the last business day of the period ended June 30, 2010. Such translations into U.S. dollars should not be construed as representations that the Korean won amounts could be converted into U.S. dollars at that, or any other rate.

Table of Contents

On April 7, 2009, the Company issued convertible bonds with a maturity of five years in the principal amount of US\$332,528,000 for US\$326,397,463 with an initial conversion price of ₩221,370 per share of the Company's common stock, which was greater than market value at the date of issuance. The Company may redeem the principal amount after 3 years from the issuance date if the market price exceeds 130% of the conversion price during a predetermined period. On the other hand, the bond holders may redeem their notes at 100% of the principal amount on April 7, 2012 (3 years from the issuance date). The conversion right may be exercised during the period from May 18, 2009 to March 24, 2014 and the number of common shares to be converted as of June 30, 2010 is 2,078,055 shares.

Conversion of notes to common shares may be prohibited under the Telecommunications Law or other legal restrictions which restrains foreign governments, individuals and entities from owning more than 49% of the Company's voting stock, if this 49% ownership limitation is violated due to the exercise of conversion rights. In this case, the Company will pay a bond holder as cash settlement determined at the average price of one day after a holder exercises its conversion right or the weighted average price for the following five or twenty business days. The Company intends to sell treasury shares held in trust by the Company that corresponds to the number of shares of common stock that would have been delivered in the absence of the 49% foreign shareholding restrictions. Unless either previously redeemed or converted, the notes are redeemable at 100% of the principal amount at maturity.

During the six months ended June 30, 2010, no conversion was made.
