Forward-Looking Statements

Certain statements contained in this Annual Report on Form 10-K are forward-looking statements. Forward-looking statements typically use words such as believe, anticipate, should, intend, plan, will, expect, estimate, positioned, strategy, and similar expressions. These are based on assumptions and assessments made by our management in light of experience and perception of historical trends, current conditions, expected future developments and other factors that we believe to be appropriate. These forward-looking statements are subject to a number of risks and uncertainties, including without limitation: credit market conditions; the impact of recessionary conditions; competition; product demand; the ability to hire and retain qualified employees; consumer debt levels; inflation; weather; raw material costs of our suppliers; energy prices; war and the prospect of war, including terrorist activity; construction delays; access to available and feasible financing; and changes in laws or regulations. Certain of these risks are discussed in more detail in the Risk Factors section contained in Item 1A under Part I of this Annual Report on Form 10-K for the year ended August 28, 2010, and these Risk Factors should be read carefully. Forward-looking statements are not guarantees of future performance and actual results; developments and business decisions may differ from those contemplated by such forward-looking statements, and events described above and in the Risk Factors could materially and adversely affect our business. Forward-looking statements speak only as of the date made. Except as required by applicable law, we undertake no obligation to update publicly any forward-looking statements, whether as a result of new information, future events or otherwise. Actual results may materially differ from anticipated results.

Table of Contents**PART I****Item 1. Business****Introduction**

AutoZone, Inc. (AutoZone , the Company or we) is the nation's leading retailer and a leading distributor of automotive replacement parts and accessories. We began operations in 1979 and at August 28, 2010 operated 4,389 stores in the United States and Puerto Rico, and 238 in Mexico. Each of our stores carries an extensive product line for cars, sport utility vehicles, vans and light trucks, including new and remanufactured automotive hard parts, maintenance items, accessories and non-automotive products. At August 28, 2010, in 2,424 of our domestic stores and 173 of our Mexico stores, we also have a commercial sales program that provides prompt delivery of parts and other products to local, regional and national repair garages, dealers, service stations and public sector accounts. We also sell the ALLDATA brand automotive diagnostic and repair software through www.alldata.com. Additionally, we sell automotive hard parts, maintenance items, accessories and non-automotive products through www.autozone.com, and as part of our commercial sales program, through www.autozonepro.com. We do not derive revenue from automotive repair or installation services.

At August 28, 2010, our stores were in the following locations:

Marketing and Merchandising Strategy

We are dedicated to providing customers with superior service and quality automotive parts and products at a great value in conveniently located, well-designed stores. Key elements of this strategy are:

Customer Service

Customer service is the most important element in our marketing and merchandising strategy, which is based upon consumer marketing research. We emphasize that our AutoZoners (employees) should always put customers first by providing prompt, courteous service and trustworthy advice. Our electronic parts catalog assists in the selection of parts, and warranties that are offered by us or our vendors on many of the parts that we sell. The wide area network in our stores helps us expedite credit or debit card and check approval processes, locate parts at neighboring AutoZone stores, and in some cases, place special orders directly with our vendors.

Our stores generally open at 7:30 or 8 a.m. and close between 8 and 10 p.m. Monday through Saturday and typically open at 9 a.m. and close between 6 and 9 p.m. on Sunday. However, some stores are open 24 hours, and some have extended hours of 6 or 7 a.m. until midnight seven days a week.

We also provide specialty tools through our Loan-A-Tool® program. Customers can borrow a specialty tool, such as a steering wheel puller, for which a do-it-yourself (DIY) customer or a repair shop would have little or no use other than for a single job. AutoZoners also provide other free services, including check engine light readings where allowed by law, battery charging, the collection of DIY used oil for recycling, and the testing of starters, alternators, batteries, sensors and actuators.

Merchandising

The following tables show some of the types of products that we sell by major category of items:

Failure

A/C Compressors
Batteries & Accessories
Belts & Hoses
Carburetors
Chassis

Table of Contents

We believe that the satisfaction of DIY customers and professional technicians is often impacted by our ability to provide specific automotive products as requested. Each store carries the same basic product lines, but we tailor our parts inventory to the makes and models of the vehicles in each store's trade area. Our hub stores carry a larger assortment of products that can be delivered to commercial customers or to local satellite stores.

We are constantly updating the products we offer to ensure that our inventory matches the products our customers demand.

Pricing

We want to be perceived by our customers as the value leader in our industry, by consistently providing quality merchandise at the right price, backed by a satisfactory warranty and outstanding customer service. On many of our products we offer multiple value choices in a good/better/best assortment, with appropriate price and quality differences from the good products to the better and best products. A key differentiating component versus our competitors is our exclusive line of in-house brands, which includes Valucraft, AutoZone, Duralast and Duralast Gold brands. We believe that our overall value compares favorably to that of our competitors.

Brand: Advertising and Promotions

We believe that targeted advertising and promotions play important roles in succeeding in today's environment. We are constantly working to understand our customers' wants and needs so that we can build long-lasting, loyal relationships. We utilize promotions, advertising, and loyalty card programs primarily to advise customers about the overall importance of vehicle maintenance, our great value and the availability of high quality parts. Broadcast and internet media are our primary advertising methods of driving traffic to our stores. We utilize in-store signage, creative product placement and promotions to help educate customers about products that they need.

Store Design and Visual Merchandising

We design and build stores for high visual impact. The typical AutoZone store utilizes colorful exterior and interior signage, exposed beams and ductwork and brightly lighted interiors. Maintenance products, accessories and non-automotive items are attractively displayed for easy browsing by customers. In-store signage and special displays promote products on floor displays, end caps and shelves.

Commercial

Our commercial sales program operates in a highly fragmented market, and we are one of the leading distributors of automotive parts and other products to local, regional and national repair garages, dealers, service stations and public sector accounts in the United States, Puerto Rico and Mexico. As a part of the program, we offer delivery to our commercial customers, as well as direct commercial sales through www.autozonepro.com. The program operated out of 2,424 domestic stores and 173 of our Mexico stores as of August 28, 2010. Through our hub stores, we offer a greater range of parts and products desired by professional technicians; this additional inventory is available for our DIY customers as well. We have dedicated sales teams focused on national, regional and public sector commercial accounts.

Store Operations

Store Formats

Substantially all AutoZone stores are based on standard store formats, resulting in generally consistent appearance, merchandising and product mix. Approximately 85% to 90% of each store's square footage is selling space, of which approximately 40% to 45% is dedicated to hard parts inventory. The hard parts inventory area is generally fronted by counters or pods that run the depth or length of the store, dividing the hard parts area from the remainder of the store. The remaining selling space contains displays of maintenance, accessories and non-automotive items.

We believe that our stores are destination stores, generating their own traffic rather than relying on traffic created by adjacent stores. Therefore, we situate most stores on major thoroughfares with easy access and good parking.

Table of Contents*Store Personnel and Training*

Each store typically employs from 10 to 16 AutoZoners, including a manager and, in some cases, an assistant manager. AutoZoners typically have prior automotive experience. All AutoZoners are encouraged to complete tests resulting in certifications by the National Institute for Automotive Service Excellence (ASE), which is broadly recognized for training certification in the automotive industry. Although we do on-the-job training, we also provide formal training programs, including an annual national sales meeting, regular store meetings on specific sales and product issues, standardized training manuals and a specialist program that provides training to AutoZoners in several areas of technical expertise from the Company, our vendors and independent certification agencies. Training is supplemented with frequent store visits by management.

Store managers, sales representatives and commercial specialists receive financial incentives through performance-based bonuses. In addition, our growth has provided opportunities for the promotion of qualified AutoZoners. We believe these opportunities are important to attract, motivate and retain high quality AutoZoners. All store support functions are centralized in our store support centers located in Memphis, Tennessee, Monterrey, Mexico and Chihuahua, Mexico. We believe that this centralization enhances consistent execution of our merchandising and marketing strategies at the store level, while reducing expenses and cost of sales.

Store Automation

All of our stores have Z-net, our proprietary electronic catalog that enables our AutoZoners to efficiently look up the parts that our customers need and to provide complete job solutions, advice and information for customer vehicles. Z-net provides parts information based on the year, make, model and engine type of a vehicle and also tracks inventory availability at the store, at other nearby stores and through special order. The Z-net display screens are placed on the hard parts counter or pods, where both the AutoZoner and customer can view the screen. In addition, our wide area network enables the stores to expedite credit or debit card and check approval processes, to access national warranty data, to implement real-time inventory controls and to locate and hold parts at neighboring AutoZone stores. Our stores utilize our computerized proprietary Store Management System, which includes bar code scanning and point-of-sale data collection terminals. The Store Management System provides administrative assistance and improved personnel scheduling at the store level, as well as enhanced merchandising information and improved inventory control. We believe the Store Management System also enhances customer service through faster processing of transactions and simplified warranty and product return procedures.

Store Development

The following table reflects store development during the past five fiscal years:

	Fiscal Year				
	2010	2009	2008	2007	2006
Beginning stores	4,417	4,240	4,056	3,871	3,673
New stores	213	180	185	186	204
Closed stores	3	3	1	1	6
Net new stores	210	177	184	185	198
Relocated stores	3	9	14	18	18
Ending stores	4,627	4,417	4,240	4,056	3,871

We believe that expansion opportunities exist both in markets that we do not currently serve, as well as in markets where we can achieve a larger presence. We attempt to obtain high visibility sites in high traffic locations and undertake substantial research prior to entering new markets. The most important criteria for opening a new store are its projected future profitability and its ability to achieve our required investment hurdle rate. Key factors in selecting new site and market locations include population, demographics, vehicle profile, customer buying trends, commercial businesses, number and strength of competitors stores and the cost of real estate. In reviewing the vehicle profile, we

also consider the number of vehicles that are seven years old and older, our kind of vehicles ; as these are generally no longer under the original manufacturers warranties and require more maintenance and repair than younger vehicles. We generally seek to open new stores within or contiguous to existing market areas and attempt to cluster development in markets in a relatively short period of time. In addition to continuing to lease or develop our own stores, we evaluate and may make strategic acquisitions.

Table of Contents

Purchasing and Supply Chain

Merchandise is selected and purchased for all stores through our store support centers located in Memphis, Tennessee and Monterrey, Mexico. In fiscal 2010, no class of similar products accounted for 10 percent or more of our total sales. Also, during fiscal 2010, one vendor supplied 10 percent of our purchases; no other individual vendor provided more than 10 percent of our total purchases. We generally have few long-term contracts for the purchase of merchandise. We believe that we have good relationships with our suppliers. We also believe that alternative sources of supply exist, at similar cost, for most types of product sold. Most of our merchandise flows through our distribution centers to our stores by our fleet of tractors and trailers or by third-party trucking firms.

Our hub stores have increased our ability to distribute products on a timely basis to many of our stores and to expand our product assortment. A hub store generally has a larger assortment of products as well as regular replenishment items that can be delivered to a store in its coverage area within 24 hours. Additionally, hub stores can provide replenishment of products sold to stores within its network. Hub stores are generally replenished from distribution centers multiple times per week.

Competition

The sale of automotive parts, accessories and maintenance items is highly competitive in many areas, including name recognition, product availability, customer service, store location and price. AutoZone competes in both the retail DIY and commercial do-it-for-me (DIFM) auto parts and products.

Competitors include national, regional and local auto parts chains, independently owned parts stores, on-line parts stores, jobbers, repair shops, car washes and auto dealers, in addition to discount and mass merchandise stores, department stores, hardware stores, supermarkets, drugstores, convenience stores and home stores that sell aftermarket vehicle parts and supplies, chemicals, accessories, tools and maintenance parts. AutoZone competes on the basis of customer service, including the trustworthy advice of our AutoZoners; merchandise quality, selection and availability; price; product warranty; store layouts, location and convenience; and the strength of our AutoZone brand name, trademarks and service marks.

Trademarks and Patents

We have registered several service marks and trademarks in the United States Patent and Trademark office as well as in certain other countries, including our service marks, AutoZone and Get in the Zone, and trademarks, AutoZone,

Duralast, Duralast Gold, Valucraft, ALLDATA, Loan-A-Tool and Z-net. We believe that these service marks and trademarks are important components of our marketing and merchandising strategies.

Employees

As of August 28, 2010, we employed over 63,000 persons, approximately 56 percent of whom were employed full-time. About 91 percent of our AutoZoners were employed in stores or in direct field supervision, approximately 5 percent in distribution centers and approximately 4 percent in store support and other functions. Included in the above numbers are approximately 3,000 persons employed in our Mexico operations.

We have never experienced any material labor disruption and believe that relations with our AutoZoners are generally good.

AutoZone Website

AutoZone's primary website is at <http://www.autozone.com>. We make available, free of charge, at our investor relations website, <http://www.autozoneinc.com>, our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K and amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities and Exchange Act of 1934, as amended, as soon as reasonably feasible after we electronically file such material with, or furnish it to, the Securities and Exchange Commission.

Table of Contents

Executive Officers of the Registrant

The following list describes our executive officers. The title of each executive officer includes the words "Customer Satisfaction" which reflects our commitment to customer service. Officers are elected by and serve at the discretion of the Board of Directors.

William C. Rhodes, III, 45 Chairman, President and Chief Executive Officer, Customer Satisfaction

William C. Rhodes, III, was named Chairman of AutoZone during fiscal 2007 and has been President, Chief Executive Officer and a director since March 2005. Prior to his appointment as President and Chief Executive Officer, Mr. Rhodes was Executive Vice President - Store Operations and Commercial. Previously, he served in various capacities within the Company, including Senior Vice President - Supply Chain and Information Technology, Senior Vice President - Supply Chain, Vice President - Stores, Senior Vice President - Finance and Vice President - Finance and Vice President - Operations Analysis and Support. Prior to 1994, Mr. Rhodes was a manager with Ernst & Young LLP. Mr. Rhodes is currently a member of the Board of Directors for Dollar General Corporation.

William T. Giles, 51 Chief Financial Officer and Executive Vice President - Finance, Information Technology and Store Development, Customer Satisfaction

William T. Giles was elected Chief Financial Officer and Executive Vice President - Finance, Information Technology and Store Development during fiscal 2007. Prior to that, he was Executive Vice President, Chief Financial Officer and Treasurer from June 2006 to December 2006 and Executive Vice President, Chief Financial Officer since May 2006. From 1991 to May 2006, he held several positions with Linens N' Things, Inc., most recently as the Executive Vice President and Chief Financial Officer. Prior to 1991, he was with Melville, Inc. and PricewaterhouseCoopers.

Harry L. Goldsmith, 59 Executive Vice President, Secretary and General Counsel, Customer Satisfaction

Harry L. Goldsmith was elected Executive Vice President, General Counsel and Secretary during fiscal 2006. Previously, he was Senior Vice President, General Counsel and Secretary since 1996 and was Vice President, General Counsel and Secretary from 1993 to 1996.

James A. Shea, 65 Executive Vice President - Merchandising, Marketing and Supply Chain, Customer Satisfaction

James A. Shea was elected Executive Vice President - Merchandising, Marketing and Supply Chain during fiscal 2007 and has served as Executive Vice President - Merchandising and Marketing since fiscal 2005. He was President and Co-founder of Portero during 2004. Prior to 2004, he was Chief Executive Officer of Party City from 1999 to 2003. From 1995 to 1999, he was with Lechters Housewares where he was Senior Vice President, Marketing and Merchandising before being named President in 1997. From 1990 to 1995, he was Senior Vice President of Home for Kaufmanns Department Store, a division of May Company. Mr. Shea announced his plans to retire, effective at the end of October 2010.

Jon A. Bascom, 53 Senior Vice President and Chief Information Officer, Customer Satisfaction

Jon A. Bascom was elected Senior Vice President and Chief Information Officer during fiscal 2008. Previously, he was Vice President - Information Technology since 1996. Since 1989, Mr. Bascom has worked in a variety of leadership roles in applications development, infrastructure, and technology support. Prior to joining AutoZone, Mr. Bascom worked for Malone & Hyde, AutoZone's predecessor company, for 9 years.

Timothy W. Briggs, 49 Senior Vice President - Human Resources, Customer Satisfaction

Timothy W. Briggs was elected Senior Vice President - Human Resources during fiscal 2006. Prior to that, he was Vice President - Field Human Resources since March 2005. From 2002 to 2005, Mr. Briggs was Vice President Organization Development. From 1996 to 2002, Mr. Briggs served in various management capacities at the Limited Inc., including Vice President, Human Resources.

Mark A. Finestone, 49 Senior Vice President - Merchandising, Customer Satisfaction

Mark A. Finestone was elected Senior Vice President - Merchandising during fiscal 2008. Previously, he was Vice President - Merchandising since 2002. Prior to joining AutoZone in 2002, Mr. Finestone worked for May Department Stores for 19 years where he held a variety of leadership roles which included Divisional Vice President, Merchandising.

Table of Contents

William W. Graves, 50 Senior Vice President Supply Chain, Customer Satisfaction

William W. Graves was elected Senior Vice President Supply Chain during fiscal 2006. Prior thereto, he was Vice President Supply Chain since 2000. From 1992 to 2000, Mr. Graves served in various capacities with the Company.

Lisa R. Kranc, 57 Senior Vice President Marketing, Customer Satisfaction

Lisa R. Kranc was elected Senior Vice President Marketing during fiscal 2001. Previously, she was Vice President Marketing for Hannaford Bros. Co., a Maine-based grocery chain, since 1997, and was Senior Vice President Marketing for Bruno's, Inc., from 1996 to 1997. Prior to 1996, she was Vice President-Marketing for Giant Eagle, Inc. since 1992.

Thomas B. Newbern, 48 Senior Vice President Store Operations, Customer Satisfaction

Thomas B. Newbern was elected Senior Vice President Store Operations during fiscal 2007. Previously, Mr. Newbern held the title Vice President Store Operations for AutoZone since 1998. A 25-year AutoZoner, he has held several key management positions with the Company.

Charlie Pleas, III, 45 Senior Vice President and Controller, Customer Satisfaction

Charlie Pleas, III, was elected Senior Vice President and Controller during fiscal 2007. Prior to that, he was Vice President and Controller since 2003. Previously, he was Vice President - Accounting since 2000, and Director of General Accounting since 1996. Prior to joining AutoZone, Mr. Pleas was a Division Controller with Fleming Companies, Inc. where he served in various capacities from 1988.

Larry M. Roesel, 53 Senior Vice President Commercial, Customer Satisfaction

Larry M. Roesel joined AutoZone as Senior Vice President Commercial during fiscal 2007. Mr. Roesel came to AutoZone with more than thirty years of experience with OfficeMax, Inc. and its predecessor, where he served in operations, sales and general management.

Robert D. Olsen, 57 Corporate Development Officer, Customer Satisfaction

Robert D. Olsen was elected Corporate Development Officer as of November 1, 2009, with primary responsibility for Mexico, ALLDATA, and other strategic initiatives. Previously, he was Executive Vice President Store Operations, Commercial, ALLDATA, and Mexico since fiscal 2007. Prior to that time, he was Executive Vice President Supply Chain, Information Technology, Mexico and Store Development since fiscal 2006 and before that, Senior Vice President since fiscal 2000 with primary responsibility for store development and Mexico operations. From 1993 to 2000, Mr. Olsen was Executive Vice President and Chief Financial Officer of Leslie's Poolmart. From 1985 to 1989, Mr. Olsen held several positions with AutoZone, including Senior Vice President and Chief Financial Officer and Vice President Finance and Controller.

Item 1A. Risk Factors

Our business is subject to a variety of risks. Set forth below are certain of the important risks that we face and that could cause actual results to differ materially from historical results. These risks are not the only ones we face. Our business could also be affected by additional factors that are presently unknown to us or that we currently believe to be immaterial to our business.

If demand for our products slows, then our business may be materially affected.

Demand for products sold by our stores depends on many factors, including:

- the number of miles vehicles are driven annually. Higher vehicle mileage increases the need for maintenance and repair. Mileage levels may be affected by gas prices and other factors.
- the number of vehicles in current service that are seven years old and older. These vehicles are generally no longer under the original vehicle manufacturers' warranties and tend to need more maintenance and repair than younger vehicles.
- technological advances. Advances in automotive technology and parts design could result in cars needing maintenance less frequently and parts lasting longer.
- the weather. Inclement weather may cause vehicle maintenance to be deferred.

Table of Contents

the economy. In periods of rapidly declining economic conditions, both retail DIY and commercial DIFM customers may defer vehicle maintenance or repair. Additionally, such conditions may affect our customers credit availability. During periods of expansionary economic conditions, more of our DIY customers may pay others to repair and maintain their cars instead of working on their own vehicles or they may purchase new vehicles.

rising energy prices. Increases in energy prices may cause our customers to defer purchases of certain of our products as they use a higher percentage of their income to pay for gasoline and other energy costs.

For the long term, demand for our products may be affected by:

the quality of the vehicles manufactured by the original vehicle manufacturers and the length of the warranties or maintenance offered on new vehicles; and
restrictions on access to diagnostic tools and repair information imposed by the original vehicle manufacturers or by governmental regulation.

All of these factors could result in immediate and longer term declines in the demand for our products, which could adversely affect our sales, cash flows and overall financial condition.

If we are unable to compete successfully against other businesses that sell the products that we sell, we could lose customers and our sales and profits may decline.

The sale of automotive parts, accessories and maintenance items is highly competitive and is based on many factors, including name recognition, product availability, customer service, store location and price. Competitors are opening locations near our existing stores. AutoZone competes as a provider in both the DIY and DIFM auto parts and accessories markets.

Competitors include national, regional and local auto parts chains, independently owned parts stores, on-line parts stores, jobbers, repair shops, car washes and auto dealers, in addition to discount and mass merchandise stores, department stores, hardware stores, supermarkets, drugstores, convenience stores and home stores that sell aftermarket vehicle parts and supplies, chemicals, accessories, tools and maintenance parts. Although we believe we compete effectively on the basis of customer service, including the knowledge and expertise of our AutoZoners; merchandise quality, selection and availability; product warranty; store layout, location and convenience; price; and the strength of our AutoZone brand name, trademarks and service marks; some competitors may gain competitive advantages, such as greater financial and marketing resources allowing them to sell automotive products at lower prices, larger stores with more merchandise, longer operating histories, more frequent customer visits and more effective advertising. If we are unable to continue to develop successful competitive strategies, or if our competitors develop more effective strategies, we could lose customers and our sales and profits may decline.

We may not be able to sustain our recent rate of sales growth.

We have increased our store count in the past five fiscal years, growing from 3,673 stores at August 27, 2005, to 4,627 stores at August 28, 2010, an average store count increase per year of 5%. Additionally, we have increased annual revenues in the past five fiscal years from \$5.711 billion in fiscal 2005 to \$7.363 billion in fiscal 2010, an average increase per year of 6%. Annual revenue growth is driven by the opening of new stores and increases in same-store sales. We open new stores only after evaluating customer buying trends and market demand/needs, all of which could be adversely affected by continued job losses, wage cuts, small business failures and microeconomic conditions unique to the automotive industry. Same store sales are impacted both by customer demand levels and by the prices we are able to charge for our products, which can also be negatively impacted by continued recessionary pressures. We cannot provide any assurance that we will continue to open stores at historical rates or achieve increases in same-store sales.

Table of Contents

If we cannot profitably increase our market share in the commercial auto parts business, our sales growth may be limited.

Although we are one of the largest sellers of auto parts in the commercial market, to increase commercial sales we must compete against national and regional auto parts chains, independently owned parts stores, wholesalers and jobbers and auto dealers. Although we believe we compete effectively on the basis of customer service, merchandise quality, selection and availability, price, product warranty, distribution locations, and the strength of our AutoZone brand name, trademarks and service marks, some automotive aftermarket jobbers have been in business for substantially longer periods of time than we have, have developed long-term customer relationships and have large available inventories. If we are unable to profitably develop new commercial customers, our sales growth may be limited.

Deterioration in the global credit markets, changes in our credit ratings and macroeconomic factors could adversely affect our financial condition and results of operations.

Our short-term and long-term debt is rated investment grade by the major rating agencies. These investment-grade credit ratings have historically allowed us to take advantage of lower interest rates and other favorable terms on our short-term credit lines, in our senior debt offerings and in the commercial paper markets. To maintain our investment-grade ratings, we are required to meet certain financial performance ratios. An increase in our debt and/or a decline in our earnings could result in downgrades in our credit ratings. A downgrade in our credit ratings could result in an increase in interest rates and more restrictive terms on certain of our senior debt and our commercial paper, could limit our access to public debt markets, could limit the institutions willing to provide credit facilities to us and could significantly increase the interest rates on such facilities from current levels.

Moreover, significant deterioration in the financial condition of large financial institutions in calendar years 2008 and 2009 resulted in a severe loss of liquidity and availability of credit in global credit markets and in more stringent borrowing terms. During brief time intervals in the fourth quarter of calendar 2008 and the first quarter of calendar 2009, there was no liquidity in the commercial paper markets, resulting in an absence of commercial paper buyers and extraordinarily high interest rates on commercial paper. We can provide no assurance that credit market events such as those that occurred in the fourth quarter of 2008 and the first quarter of 2009 will not occur again in the foreseeable future. Conditions and events in the global credit market could have a material adverse effect on our access to short-term debt and the terms and cost of that debt.

Macroeconomic conditions also impact both our customers and our suppliers. Continued recessionary conditions could result in additional job losses and business failures, which could result in our loss of certain small business customers and curtailment of spending by our retail customers. In addition, continued distress in global credit markets, business failures and other recessionary conditions could have a material adverse effect on the ability of our suppliers to obtain necessary short and long-term financing to meet our inventory demands. Moreover, rising energy prices could impact our merchandise distribution, commercial delivery, utility and product costs. All of these macroeconomic conditions could adversely affect our sales growth, margins and overhead, which could adversely affect our financial condition and operations.

Our business depends upon hiring and retaining qualified employees.

We believe that much of our brand value lies in the quality of our over 63,000 AutoZoners employed in our stores, distribution centers, store support centers and ALLDATA. We cannot be assured that we can continue to hire and retain qualified employees at current wage rates. If we are unable to hire, properly train and/or retain qualified employees, we could experience higher employment costs, reduced sales, losses of customers and diminution of our brand, which could adversely affect our earnings. If we do not maintain competitive wages, our customer service could suffer due to a declining quality of our workforce or, alternatively, our earnings could decrease if we increase our wage rates.

Inability to acquire and provide quality merchandise could adversely affect our sales and results of operations.

We are dependent upon our vendors continuing to supply us with quality merchandise. If our merchandise offerings do not meet our customers' expectations regarding quality and safety, we could experience lost sales, experience increased costs and be exposed to legal and reputational risk. All of our vendors must comply with applicable product safety laws, and we are dependent on them to ensure that the products we buy comply with all safety and quality

standards. Events that give rise to actual, potential or perceived product safety concerns could expose us to government enforcement action or private litigation and result in costly product recalls and other liabilities. In addition, negative customer perceptions regarding the safety or quality of the products we sell could cause our customers to seek alternative sources for their needs, resulting in lost sales. In those circumstances, it may be difficult and costly for us to regain the confidence of our customers. Moreover, if any of our significant vendors experiences financial difficulties or otherwise is unable to deliver merchandise to us on a timely basis, or at all, we could have product shortages in our stores that could adversely affect customers' perceptions of us and cause us to lose customers and sales.

Table of Contents

Our largest stockholder, as a result of its voting ownership, may have the ability to exert substantial influence over actions to be taken or approved by our stockholders.

As of October 18, 2010, ESL Investments, Inc. and certain of its affiliates (together, "ESL") beneficially owned approximately 34.7% of our outstanding common stock. As a result, ESL may have the ability to exert substantial influence over actions to be taken or approved by our stockholders, including the election of directors and potential change of control transactions. In the future, ESL may acquire or sell shares of common stock and thereby increase or decrease its ownership stake in us. Significant fluctuations in their level of ownership could have an impact on our share price.

In June 2008, we entered into an agreement with ESL (the "ESL Agreement"), in which ESL has agreed to vote shares of our common stock owned by ESL in excess of 37.5% in the same proportion as all non-ESL-owned shares are voted. Additionally, under the terms of the ESL Agreement, the Company added two directors in August 2008 that were identified by ESL. William C. Crowley, one of the two directors identified by ESL, is the President and Chief Operating Officer of ESL Investments, Inc.

Consolidation among our competitors may negatively impact our business.

Recently some of our competitors have merged. Consolidation among our competitors could enhance their financial position, provide them with the ability to achieve better purchasing terms allowing them to provide more competitive prices to customers for whom we compete, and allow them to achieve efficiencies in their mergers that allow for more effective use of advertising and marketing dollars and allow them to more effectively compete for customers. These consolidated competitors could take sales volume away from us in certain markets and could cause us to change our pricing with a negative impact on our margins or could cause us to spend more money to maintain customers or seek new customers, all of which could negatively impact our business.

Our ability to grow depends in part on new store openings, existing store remodels and expansions and effective utilization of our existing supply chain and hub network.

Our continued growth and success will depend in part on our ability to open and operate new stores and expand and remodel existing stores to meet customers' needs on a timely and profitable basis. Accomplishing our new and existing store expansion goals will depend upon a number of factors, including the ability to partner with developers and landlords to obtain suitable sites for new and expanded stores at acceptable costs, the hiring and training of qualified personnel, particularly at the store management level, and the integration of new stores into existing operations. There can be no assurance we will be able to achieve our store expansion goals, manage our growth effectively, successfully integrate the planned new stores into our operations or operate our new, remodeled and expanded stores profitably. In addition, we extensively utilize hub stores, our supply chains and logistics management techniques to efficiently stock our stores. If we fail to effectively utilize our existing distribution hubs and/or supply chains, we could experience inappropriate inventory levels in our stores, which could adversely affect our sales volume and/or our margins.

Our failure to protect our reputation could have a material adverse effect on our brand name.

Our ability to maintain our reputation is critical to our brand name. Our reputation could be jeopardized if we fail to maintain high standards for merchandise safety, quality and integrity. Any negative publicity about these types of concerns may reduce demand for our merchandise. Failure to comply with ethical, social, product, labor and environmental standards, or related political considerations, could also jeopardize our reputation and potentially lead to various adverse consumer actions. Failure to comply with local laws and regulations, to maintain an effective system of internal controls or to provide accurate and timely financial statement information could also hurt our reputation. Damage to our reputation or loss of consumer confidence for any of these or other reasons could have a material adverse effect on our results of operations and financial condition, as well as require additional resources to rebuild our reputation.

Table of Contents**Business interruptions may negatively impact our store hours, operability of our computer and other systems, availability of merchandise and otherwise have a material negative effect on our sales and our business.**

War or acts of terrorism, political unrest, hurricanes, windstorms, fires, earthquakes and other natural or other disasters or the threat of any of them, may result in certain of our stores being closed for a period of time or permanently or have a negative impact on our ability to obtain merchandise available for sale in our stores. Some of our merchandise is imported from other countries. If imported goods become difficult or impossible to bring into the United States, and if we cannot obtain such merchandise from other sources at similar costs, our sales and profit margins may be negatively affected.

In the event that commercial transportation is curtailed or substantially delayed, our business may be adversely impacted, as we may have difficulty shipping merchandise to our distribution centers and stores resulting in lost sales, canceled purchase orders and/or a potential loss of customer loyalty.

We rely extensively on our computer systems to manage inventory, process transactions and summarize results. Our systems are subject to damage or interruption from power outages, telecommunications failures, computer viruses, security breaches and catastrophic events. If our systems are damaged or fail to function properly, we may incur substantial costs to repair or replace them, and may experience loss of critical data and interruptions or delays in our ability to manage inventories or process transactions, which could result in lost sales, inability to process purchase orders and/or a potential loss of customer loyalty, which could adversely affect our results of operations.

Healthcare reform legislation could have a negative impact on our business.

The recently enacted Patient Protection and Affordable Care Act (the Patient Act) as well as other healthcare reform legislation being considered by Congress and state legislatures may have an impact on our business. While we are currently evaluating the potential effects of the Patient Act on our business, the impact could be extensive and will most likely increase our employee healthcare-related costs. While the significant costs of the recent healthcare legislation enacted will occur after 2013 due to provisions of the legislation being phased in over time, changes to our healthcare costs structure could have a significant, negative impact on our business.

Item 1B. Unresolved Staff Comments

None.

Item 2. Properties

The following table reflects the square footage and number of leased and owned properties for our stores as of August 28, 2010:

	No. of Stores	Square Footage
Leased	2,319	14,540,910
Owned	2,308	15,486,198
Total	4,627	30,027,108

We have approximately 4.0 million square feet in distribution centers servicing our stores, of which approximately 1.3 million square feet is leased and the remainder is owned. Our distribution centers are located in Arizona, California, Georgia, Illinois, Ohio, Pennsylvania, Tennessee, Texas and Mexico. Our primary store support center is located in Memphis, Tennessee, and consists of approximately 260,000 square feet. We also have two additional store support centers located in Monterrey, Mexico and Chihuahua, Mexico and own or lease other properties that are not material in the aggregate.

Table of Contents

Item 3. Legal Proceedings

We are a defendant in a lawsuit entitled *Coalition for a Level Playing Field, L.L.C., et al., v. AutoZone, Inc. et al.*, filed in the U.S. District Court for the Southern District of New York in October 2004. The case was filed by more than 200 plaintiffs, which are principally automotive aftermarket warehouse distributors and jobbers, against a number of defendants, including automotive aftermarket retailers and aftermarket automotive parts manufacturers. In the amended complaint, the plaintiffs allege, *inter alia*, that some or all of the automotive aftermarket retailer defendants have knowingly received, in violation of the Robinson-Patman Act (the *Act*), from various of the manufacturer defendants benefits such as volume discounts, rebates, early buy allowances and other allowances, fees, inventory without payment, sham advertising and promotional payments, a share in the manufacturers' profits, benefits of pay on scan purchases, implementation of radio frequency identification technology, and excessive payments for services purportedly performed for the manufacturers. Additionally, a subset of plaintiffs alleges a claim of fraud against the automotive aftermarket retailer defendants based on discovery issues in a prior litigation involving similar claims under the Act. In the prior litigation, the discovery dispute, as well as the underlying claims, was decided in favor of AutoZone and the other automotive aftermarket retailer defendants who proceeded to trial, pursuant to a unanimous jury verdict which was affirmed by the Second Circuit Court of Appeals. In the current litigation, the plaintiffs seek an unspecified amount of damages (including statutory trebling), attorneys' fees, and a permanent injunction prohibiting the aftermarket retailer defendants from inducing and/or knowingly receiving discriminatory prices from any of the aftermarket manufacturer defendants and from opening up any further stores to compete with the plaintiffs as long as the defendants allegedly continue to violate the Act.

In an order dated September 7, 2010 and issued on September 16, 2010, the court granted motions to dismiss all claims against AutoZone and its co-defendant competitors and suppliers. Based on the record in the prior litigation, the court dismissed with prejudice all overlapping claims—that is, those covering the same time periods covered by the prior litigation and brought by the judgment plaintiffs in the prior litigation. The court also dismissed with prejudice the plaintiffs' attempt to revisit discovery disputes from the prior litigation. Further, with respect to the other claims under the Act, the court found that the factual statements contained in the complaint fall short of what would be necessary to support a plausible inference of unlawful price discrimination. Finally, the court held that the AutoZone pay-on-scan program is a difference in non-price terms that are not governed by the Act. The court ordered the case closed, but also stated that—in an abundance of caution the Court [was] defer[ring] decision on whether to grant leave to amend to allow plaintiff an opportunity to propose curative amendments. Without moving for leave to amend their complaint for a third time, four plaintiffs filed a Third Amended and Supplemental Complaint (the *Third Amended Complaint*) on October 18, 2010. The Third Amended Complaint repeats and expands certain allegations from previous complaints, asserting two claims under the Act, but states that all other plaintiffs have withdrawn their claims, and that, *inter alia*, Chief Auto Parts, Inc. has been dismissed as a defendant. The court set no specific procedure for further response or motion by the defendants. We anticipate that the defendants, including AutoZone, will request that the court reject the Third Amended Complaint and/or will seek to have it dismissed.

We believe this suit to be without merit and are vigorously defending against it. We are unable to estimate a loss or possible range of loss.

We are involved in various legal proceedings incidental to the conduct of our business. Although the amount of liability that may result from these other proceedings cannot be ascertained, we do not currently believe that, in the aggregate, they will result in liabilities material to our financial condition, results of operations, or cash flows.

Item 4. Reserved

Table of Contents**PART II****Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities**

Our common stock is listed on the New York Stock Exchange under the symbol AZO. On October 18, 2010, there were 3,182 stockholders of record, which does not include the number of beneficial owners whose shares were represented by security position listings.

We currently do not pay a dividend on our common stock. Our ability to pay dividends is subject to limitations imposed by Nevada law. Any payment of dividends in the future would be dependent upon our financial condition, capital requirements, earnings, cash flow and other factors.

The following table sets forth the high and low sales prices per share of common stock, as reported by the New York Stock Exchange, for the periods indicated:

	Price Range of Common Stock	
	High	Low
Fiscal Year Ended August 28, 2010:		
Fourth quarter	\$ 215.21	\$ 177.66
Third quarter	\$ 187.94	\$ 160.20
Second quarter	\$ 161.33	\$ 146.17
First quarter	\$ 154.69	\$ 135.13
Fiscal Year Ended August 29, 2009:		
Fourth quarter	\$ 164.38	\$ 141.00
Third quarter	\$ 169.99	\$ 129.21
Second quarter	\$ 145.77	\$ 92.52
First quarter	\$ 143.80	\$ 84.66

During 1998, the Company announced a program permitting the Company to repurchase a portion of its outstanding shares not to exceed a dollar maximum established by the Company's Board of Directors. The program was most recently amended on September 28, 2010, to increase the repurchase authorization to \$9.4 billion from \$8.9 billion. The program does not have an expiration date.

Shares of common stock repurchased by the Company during the quarter ended August 28, 2010, were as follows:

	Total		Total Number of	Maximum
	Number of	Average	Shares	Dollar
Period	Shares	Price Paid	Purchased	Value that May
	Purchased	per Share	as Part of	Yet Be
			Publicly	Purchased
			Announced	
			Plans	Under the Plans
			or Programs	or Programs
May 9, 2010, to June 5, 2010	143,300	\$ 187.00	143,300	\$ 724,016,859
June 6, 2010, to July 3, 2010	1,129,590	191.26	1,129,590	507,976,727
July 4, 2010, to July 31, 2010	700,401	201.69	700,401	366,710,411
August 1, 2010, to August 28, 2010	869,716	208.44	869,716	185,428,381
Total	2,843,007	\$ 198.87	2,843,007	\$ 185,428,381

The Company also repurchased, at fair value, an additional 30,617 shares in fiscal 2010, 37,190 shares in fiscal 2009, and 39,235 shares in fiscal 2008 from employees electing to sell their stock under the Company's Third Amended and

Restated Employee Stock Purchase Plan, qualified under Section 423 of the Internal Revenue Code, under which all eligible employees may purchase AutoZone's common stock at 85% of the lower of the market price of the common stock on the first day or last day of each calendar quarter through payroll deductions. Maximum permitted annual purchases are \$15,000 per employee or 10 percent of compensation, whichever is less. Under the plan, 26,620 shares were sold to employees in fiscal 2010, 29,147 shares were sold to employees in fiscal 2009, and 36,147 shares were sold to employees in fiscal 2008. At August 28, 2010, 293,983 shares of common stock were reserved for future issuance under this plan. Under the Amended and Restated Executive Stock Purchase Plan all eligible executives are permitted to purchase AutoZone's common stock up to 25 percent of his or her annual salary and bonus. Purchases by executives under this plan were 1,480 shares in fiscal 2010, 1,705 shares in fiscal 2009, and 1,793 shares in fiscal 2008. At August 28, 2010, 250,575 shares of common stock were reserved for future issuance under this plan.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

We are the nation's leading retailer and a leading distributor of automotive replacement parts and accessories. We began operations in 1979 and at August 28, 2010, operated 4,389 stores in the United States and Puerto Rico, and 238 in Mexico. Each of our stores carries an extensive product line for cars, sport utility vehicles, vans and light trucks, including new and remanufactured automotive hard parts, maintenance items, accessories and non-automotive products. At August 28, 2010, in 2,424 of our domestic stores and 173 of our Mexico stores, we also have a commercial sales program that provides prompt delivery of parts and other products to local, regional and national repair garages, dealers, service stations and public sector accounts. We also sell the ALLDATA brand automotive diagnostic and repair software through www.alldata.com. Additionally, we sell automotive hard parts, maintenance items, accessories and non-automotive products through www.autozone.com, and as part of our commercial sales program, through www.autozonepro.com. We do not derive revenue from automotive repair or installation services.

Executive Summary

We achieved a strong performance in fiscal 2010, delivering record earnings of \$738 million and sales growth of \$546 million over the prior year. We completed the year with strong growth in our commercial and retail businesses. We are excited about our retail business opportunities and encouraged by the increase in our commercial business, where we continue to build our internal sales force and to refine our parts assortment. There are various factors occurring within the current economy that affect both our customers and our industry, including the impact of the recent recession, the credit crisis and higher unemployment. As consumers' cash flows have decreased due to these factors, we believe consumers have become more likely to keep their current vehicles longer and perform repair and maintenance in order to keep those vehicles well maintained. Our belief is supported by industry data showing an increase in the average age of vehicles on the road and recent declines in new car sales, which we believe have led to an increase in demand for the products that we sell. Given the nature of these macroeconomic factors, we cannot predict whether or for how long these trends will continue, nor can we predict to what degree these trends will impact us in the future. Our primary response to fluctuations in the demand for the products we sell is to adjust our advertising message, store staffing, and product assortment. We continue to believe we are well positioned to help our customers save money and meet their needs in a challenging macro economic environment.

Also, we believe changes in gas prices impact our customers' behavior with respect to driving and maintaining their cars. With approximately ten billion gallons of unleaded gas consumed each month across the United States, each \$1 dollar decrease at the pump contributes approximately \$10 billion of additional spending capacity to consumers each month. Given the unpredictability of gas prices, we cannot predict whether gas prices will increase or decrease in the future, nor can we predict how any future changes in gas prices will impact our sales in future periods.

The two statistics we believe have the closest correlation to our market growth over the long-term are miles driven and the number of seven year old or older vehicles on the road.

Table of Contents*Miles Driven*

We believe that as the number of miles driven increases, consumers' vehicles are more likely to need service and maintenance, resulting in an increase in the need for automotive hard parts and maintenance items. Prior to the recession, we had seen a close correlation between annual miles driven and our annual net sales; however, this correlation has not existed in the recent short-term recessionary period. Since the beginning of the fiscal year and through July 2010 (latest publicly available information), miles driven were relatively flat as compared to the comparable prior year period. Throughout this period and contrary to the correlation experienced prior to the recession, sales have grown at an increased rate, while miles driven have grown at a slower rate than what we have historically experienced. We believe that the impact of changes in other factors, primarily an increase in seven year old or older vehicles, more than offset the impact of miles driven. As the economy continues to recover, we believe that annual miles driven will return to pre-recession low single digit growth rates, and the correlation between annual miles driven and the annual sales growth of our industry should return.

Seven Year Old or Older Vehicles

Since 2008, new vehicle sales have been significantly lower than historical levels, which we believe contributed to an increasing number of seven year old or older vehicles on the road. We estimate vehicles are driven an average of approximately 12,500 miles each year. In seven years, the average miles driven equates to approximately 87,500 miles. Our experience is that at this point in a vehicle's life, most vehicles are not covered by warranties and increased maintenance is needed to keep the vehicle operating. According to data provided by the Automotive Aftermarket Industry Association, the number of seven year old or older vehicles increased by approximately 2.2% during the 2009 calendar year as compared to the 2008 calendar year. As the number of seven year old or older vehicles on the road increases, we expect an increase in demand for the products that we sell. In the near term, we expect this trend to continue, as consumers keep their cars longer in an effort to save money during this uncertain economy.

Results of Operations*Fiscal 2010 Compared with Fiscal 2009*

For the fiscal year ended August 28, 2010, we reported net sales of \$7.363 billion compared with \$6.817 billion for the year ended August 29, 2009, an 8.0% increase from fiscal 2009. This growth was driven primarily by an increase in domestic same store sales of 5.4% and sales from new stores of \$203.4 million. The improvement in same store sales was driven by an improvement in transaction count trends, while increases in average transaction value remained generally consistent with our long-term trends. Higher transaction value is attributable to product inflation due to both more complex, costly products and commodity price increases.

At August 28, 2010, we operated 4,389 domestic stores and 238 stores in Mexico, compared with 4,229 domestic stores and 188 stores in Mexico at August 29, 2009. We reported a domestic retail sales increase of 6.9% and a domestic commercial sales increase of 13.8% for fiscal 2010.

Gross profit for fiscal 2010 was \$3.712 billion, or 50.4% of net sales, compared with \$3.416 billion, or 50.1% of net sales for fiscal 2009. The improvement in gross margin was primarily attributable to leveraging distribution costs due to higher sales and operating efficiencies (19 basis points).

Operating, selling, general and administrative expenses for fiscal 2010 increased to \$2.392 billion, or 32.5% of net sales, from \$2.240 billion, or 32.9% of net sales for fiscal 2009. The reduction in operating expenses, as a percentage of sales, reflected leverage of store operating expenses due to higher sales, partially offset by higher pension expense (17 basis points) and the continued investment in the hub store initiative (16 basis points).

Interest expense, net for fiscal 2010 was \$158.9 million compared with \$142.3 million during fiscal 2009. This increase was due to higher average borrowing levels over the comparable prior year period. Average borrowings for fiscal 2010 were \$2.752 billion, compared with \$2.460 billion for fiscal 2009 and weighted average borrowing rates were 5.3% for fiscal 2010, compared to 5.4% for fiscal 2009.

Our effective income tax rate was 36.4% of pre-tax income for fiscal 2010 compared to 36.4% for fiscal 2009.

Net income for fiscal 2010 increased by 12.4% to \$738.3 million, and diluted earnings per share increased 27.6% to \$14.97 from \$11.73 in fiscal 2009. The impact of the fiscal 2010 stock repurchases on diluted earnings per share in fiscal 2010 was an increase of approximately \$0.74.

Table of Contents

Fiscal 2009 Compared with Fiscal 2008

For the year ended August 29, 2009, we reported net sales of \$6.817 billion compared with \$6.523 billion for the year ended August 30, 2008, a 4.5% increase from fiscal 2008. Excluding \$125.9 million of sales from the 53rd week included in the prior year, total company net sales increased 6.6%. This growth was driven primarily by an increase in domestic same store sales of 4.4% and sales from new stores of \$165.5 million. The improvement in same store sales was driven by an improvement in transaction count trends, while increases in average transaction value remained generally consistent with our long-term trends. Higher transaction value is attributable to product inflation due to both more complex, costly products and commodity price increases.

At August 29, 2009, we operated 4,229 domestic stores and 188 stores in Mexico, compared with 4,092 domestic stores and 148 stores in Mexico at August 30, 2008. Excluding the sales from the 53rd week in the prior year, domestic retail sales increased 7.1% and domestic commercial sales increased 4.3%.

Gross profit for fiscal 2009 was \$3.416 billion, or 50.1% of net sales, compared with \$3.268 billion, or 50.1% of net sales, for fiscal 2008. Gross profit as a percent of net sales was positively impacted by favorable distribution costs from improved efficiencies and lower fuel costs. However, this favorability was largely offset by a shift in mix to lower margin products.

Operating, selling, general and administrative expenses for fiscal 2009 increased to \$2.240 billion, or 32.9% of net sales, from \$2.144 billion, or 32.9% of net sales for fiscal 2008. Leverage from increased sales was largely offset by expenses associated with our continued enhancements to our hub stores (17 basis points), an acceleration of our store maintenance program (9 basis points), and a continued expansion of our commercial sales force (7 basis points).

Interest expense, net for fiscal 2009 was \$142.3 million compared with \$116.7 million during fiscal 2008. This increase was due to higher average borrowing levels over the comparable prior year period and a higher percentage of fixed rate debt. Average borrowings for fiscal 2009 were \$2.460 billion, compared with \$2.024 billion for fiscal 2008 and weighted average borrowing rates were 5.4% for fiscal 2009, compared to 5.2% for fiscal 2008.

Our effective income tax rate was 36.4% of pre-tax income for fiscal 2009 compared to 36.3% for fiscal 2008.

Net income for fiscal 2009 increased by 2.4% to \$657.0 million, and diluted earnings per share increased 16.8% to \$11.73 from \$10.04 in fiscal 2008. The impact of the fiscal 2009 stock repurchases on diluted earnings per share in fiscal 2009 was an increase of approximately \$0.78. Excluding the additional week in the prior year, net income for the year increased 5.0% over the previous year, while diluted earnings per share increased 19.7%.

Seasonality and Quarterly Periods

Our business is somewhat seasonal in nature, with the highest sales typically occurring in the spring and summer months of February through September, in which average weekly per-store sales historically have been about 15% to 25% higher than in the slower months of December and January. During short periods of time, a store's sales can be affected by weather conditions. Extremely hot or extremely cold weather may enhance sales by causing parts to fail and spurring sales of seasonal products. Mild or rainy weather tends to soften sales, as parts failure rates are lower in mild weather, with elective maintenance deferred during periods of rainy weather. Over the longer term, the effects of weather balance out, as we have stores throughout the United States, Puerto Rico and Mexico.

Each of the first three quarters of our fiscal year consisted of 12 weeks, and the fourth quarter consisted of 16 weeks in 2010, 16 weeks in 2009, and 17 weeks in 2008. Because the fourth quarter contains the seasonally high sales volume and consists of 16 or 17 weeks, compared with 12 weeks for each of the first three quarters, our fourth quarter represents a disproportionate share of the annual net sales and net income. The fourth quarter of fiscal year 2010, containing 16 weeks, represented 33.2% of annual sales and 36.4% of net income; the fourth quarter of fiscal 2009, containing 16 weeks, represented 32.7% of annual sales and 35.9% of net income; and the fourth quarter of fiscal 2008, containing 17 weeks, represented 33.9% of annual sales and 38.0% of net income.

Table of Contents**Liquidity and Capital Resources**

The primary source of our liquidity is our cash flows realized through the sale of automotive parts and accessories. Net cash provided by operating activities was \$1,196.3 million in fiscal 2010, \$923.8 million in fiscal 2009, and \$921.1 million in fiscal 2008. The increase over prior year was primarily due to higher net income of \$81.3 million and improvements in accounts payable as our cash flows from operating activities continue to benefit from our inventory purchases being largely financed by our vendors. The increase in fiscal 2009 as compared to fiscal 2008 was due primarily to the growth in net income, timing of income tax payments and deductions, and improvements in our accounts payable to inventory ratio as our vendors finance a large portion of our inventory. Partially offsetting this increase were higher accounts receivable and the 53rd week of income in fiscal 2008. We had an accounts payable to inventory ratio of 106% at August 28, 2010, 96% at August 29, 2009, and 95% at August 30, 2008. Our inventory increases are primarily attributable to an increased number of stores and to a lesser extent, our efforts to update product assortment in all of our stores. Many of our vendors have supported our initiative to update our product assortment by providing extended payment terms. These extended payment terms have allowed us to continue to grow accounts payable at a faster rate than inventory.

Our primary capital requirement has been the funding of our continued new-store development program. From the beginning of fiscal 2008 to August 28, 2010, we have opened 578 new stores. Net cash flows used in investing activities were \$307.4 million in fiscal 2010, compared to \$263.7 million in fiscal 2009, and \$243.2 million in fiscal 2008. We invested \$315.4 million in capital assets in fiscal 2010, compared to \$272.2 million in capital assets in fiscal 2009, and \$243.6 million in capital assets in fiscal 2008. The increase in capital expenditures during this time was primarily attributable to the number and types of stores opened and increased investment in our existing stores. New store openings were 213 for fiscal 2010, 180 for fiscal 2009, and 185 for fiscal 2008. We invest a portion of our assets held by the Company's wholly owned insurance captive in marketable securities. We acquired \$56.2 million of marketable securities in fiscal 2010, \$48.4 million in fiscal 2009, and \$54.3 million in fiscal 2008. We had proceeds from marketable securities of \$52.6 million in fiscal 2010, \$46.3 million in fiscal 2009, and \$50.7 million in fiscal 2008. Capital asset disposals provided \$11.5 million in fiscal 2010, \$10.7 million in fiscal 2009, and \$4.0 million in fiscal 2008.

Net cash used in financing activities was \$883.5 million in fiscal 2010, \$806.9 million in fiscal 2009, and \$522.7 million in fiscal 2008. The net cash used in financing activities reflected purchases of treasury stock which totaled \$1.1 billion for fiscal 2010, \$1.3 billion for fiscal 2009, and \$849.2 million for fiscal 2008. The treasury stock purchases in fiscal 2010, 2009 and 2008 were primarily funded by cash flow from operations, and at times, by increases in debt levels. Proceeds from issuance of debt were \$26.2 million for fiscal 2010, \$500.0 million for fiscal 2009, and \$750.0 million for fiscal 2008. There were no debt repayments for fiscal 2010; debt repayments were \$300.7 million for fiscal 2009, and \$229.8 million for fiscal 2008. In fiscal 2009, we used the proceeds from the issuance of debt to repay outstanding commercial paper indebtedness, to prepay our \$300 million term loan in August 2009 and for general corporate purposes, including for working capital requirements, capital expenditures, store openings and stock repurchases. Proceeds from the debt issuance in fiscal 2008 were used to repay outstanding commercial paper indebtedness and for general corporate purposes, including for working capital requirements, capital expenditures, store openings and stock repurchases. Net proceeds from the issuance of commercial paper were \$155.4 million for fiscal 2010 and \$277.6 million for fiscal 2009. For fiscal 2008, net repayments of commercial paper were \$206.7 million.

We expect to invest in our business consistent with historical rates during fiscal 2011, with our investment being directed primarily to our new-store development program and enhancements to existing stores and infrastructure. The amount of our investments in our new-store program is impacted by different factors, including such factors as whether the building and land are purchased (requiring higher investment) or leased (generally lower investment), located in the United States or Mexico, or located in urban or rural areas. During fiscal 2010, fiscal 2009, and fiscal 2008, our capital expenditures have increased by approximately 16%, 12% and 9%, respectively, as compared to the prior year. Our mix of store openings has moved away from build-to-suit leases (lower cost) to ground leases and land purchases (higher cost), resulting in increased capital expenditures during the previous three years, and we expect this trend to continue during the fiscal year ending August 27, 2011.

In addition to the building and land costs, our new-store development program requires working capital, predominantly for inventories. Historically, we have negotiated extended payment terms from suppliers, reducing the working capital required and resulting in a high accounts payable to inventory ratio. We plan to continue leveraging our inventory purchases; however, our ability to do so may be limited by our vendors' capacity to factor their receivables from us. Certain vendors participate in financing arrangements with financial institutions whereby they factor their receivables from us, allowing them to receive payment on our invoices at a discounted rate.

Table of Contents

Depending on the timing and magnitude of our future investments (either in the form of leased or purchased properties or acquisitions), we anticipate that we will rely primarily on internally generated funds and available borrowing capacity to support a majority of our capital expenditures, working capital requirements and stock repurchases. The balance may be funded through new borrowings. We anticipate that we will be able to obtain such financing in view of our credit ratings and favorable experiences in the debt markets in the past.

For the fiscal year ended August 28, 2010, our after-tax return on invested capital (ROIC) was 27.6% as compared to 24.4% for the comparable prior year period. ROIC is calculated as after-tax operating profit (excluding rent charges) divided by average invested capital (which includes a factor to capitalize operating leases). ROIC increased primarily due to increased after-tax operating profit. We use ROIC to evaluate whether we are effectively using our capital resources and believe it is an important indicator of our overall operating performance.

Debt Facilities

In July 2009, we terminated our \$1.0 billion revolving credit facility, which was scheduled to expire in fiscal 2010, and replaced it with an \$800 million revolving credit facility. This credit facility is available to primarily support commercial paper borrowings, letters of credit and other short-term unsecured bank loans. The credit facility may be increased to \$1.0 billion at our election and subject to bank credit capacity and approval, may include up to \$200 million in letters of credit, and may include up to \$100 million in capital leases each fiscal year. As the available balance is reduced by commercial paper borrowings and certain outstanding letters of credit, we had \$331.1 million in available capacity under this facility at August 28, 2010. Under the revolving credit facility, we may borrow funds consisting of Eurodollar loans or base rate loans. Interest accrues on Eurodollar loans at a defined Eurodollar rate, defined as the London InterBank Offered Rate (LIBOR) plus the applicable percentage, which could range from 150 basis points to 450 basis points, depending upon our senior unsecured (non-credit enhanced) long-term debt rating. Interest accrues on base rate loans at the prime rate. We also have the option to borrow funds under the terms of a swingline loan subfacility. The revolving credit facility expires in July 2012.

The revolving credit facility agreement requires that our consolidated interest coverage ratio as of the last day of each quarter shall be no less than 2.50:1. This ratio is defined as the ratio of (i) consolidated earnings before interest, taxes and rents to (ii) consolidated interest expense plus consolidated rents. Our consolidated interest coverage ratio as of August 28, 2010 was 4.27:1.

In June 2010, we entered into a letter of credit facility that allows us to request the participating bank to issue letters of credit on our behalf up to an aggregate amount of \$100 million. The letter of credit facility is in addition to the letters of credit that may be issued under the revolving credit facility. As of August 28, 2010, we have \$100.0 million in letters of credit outstanding under the letter of credit facility, which expires in June 2013.

During August 2009, we elected to prepay, without penalty, the \$300 million bank term loan entered in December 2004, and subsequently amended. The term loan facility provided for a term loan, which consisted of, at our election, base rate loans, Eurodollar loans or a combination thereof. The entire unpaid principal amount of the term loan would be due and payable in full on December 23, 2009, when the facility was scheduled to terminate. Interest accrued on base rate loans at a base rate per annum equal to the higher of the prime rate or the Federal Funds Rate plus 1/2 of 1%. We entered into an interest rate swap agreement on December 29, 2004, to effectively fix, based on current debt ratings, the interest rate of the term loan at 4.4%. The outstanding liability associated with the interest rate swap totaled \$3.6 million, and was expensed in operating, selling, general and administrative expenses upon termination of the hedge in fiscal 2009.

Table of Contents

On July 2, 2009, we issued \$500 million in 5.75% Senior Notes due 2015 under our shelf registration statement filed with the Securities and Exchange Commission on July 29, 2008 (the "Shelf Registration"). Also, on August 4, 2008, we issued \$500 million in 6.50% Senior Notes due 2014 and \$250 million in 7.125% Senior Notes due 2018 under the Shelf Registration. The Shelf Registration allows us to sell an indeterminate amount in debt securities to fund general corporate purposes, including repaying, redeeming or repurchasing outstanding debt and for working capital, capital expenditures, new store openings, stock repurchases and acquisitions. In fiscal 2009, the Company used the proceeds from the issuance of debt to repay outstanding commercial paper indebtedness, to prepay our \$300 million term loan in August 2009 and for general corporate purposes. Proceeds from the debt issuance in fiscal 2008 were used to repay outstanding commercial paper indebtedness and for general corporate purposes.

The 5.75% Senior Notes issued in July 2009 and the 6.50% and 7.125% Senior Notes issued during August 2008, (collectively, the "Notes"), are subject to an interest rate adjustment if the debt ratings assigned to the Notes are downgraded. They also contain a provision that repayment of the Notes may be accelerated if we experience a change in control (as defined in the agreements). Our borrowings under our other senior notes contain minimal covenants, primarily restrictions on liens. Under our revolving credit facility, covenants include limitations on total indebtedness, restrictions on liens, a minimum fixed charge coverage ratio and a change of control provision that may require acceleration of the repayment obligations under certain circumstances. All of the repayment obligations under our borrowing arrangements may be accelerated and come due prior to the scheduled payment date if covenants are breached or an event of default occurs.

As of August 28, 2010, we were in compliance with all covenants related to our borrowing arrangements and expect to remain in compliance with those covenants in the future.

Our adjusted debt to earnings before interest, taxes, depreciation, amortization, rent and share-based compensation expense ("EBITDAR") ratio was 2.4:1 and 2.5:1 as of August 28, 2010 and August 29, 2009, respectively. We calculate adjusted debt as the sum of total debt, capital lease obligations and rent times six; and we calculate EBITDAR by adding interest, taxes, depreciation, amortization, rent and share-based compensation expense to net income. We target our debt levels to a ratio of adjusted debt to EBITDAR in order to maintain our investment grade credit ratings. We believe this is important information for the management of our debt levels.

Stock Repurchases

During 1998, we announced a program permitting us to repurchase a portion of our outstanding shares not to exceed a dollar maximum established by our Board of Directors. The program was amended in June 2010 to increase the repurchase authorization to \$8.9 billion from \$8.4 billion. From January 1998 to August 28, 2010, we have repurchased a total of 121.7 million shares at an aggregate cost of \$8.7 billion. We repurchased 6.4 million shares of common stock at an aggregate cost of \$1.1 billion during fiscal 2010, 9.3 million shares of common stock at an aggregate cost of \$1.3 billion during fiscal 2009, and 6.8 million shares of common stock at an aggregate cost of \$849.2 million during fiscal 2008. Considering cumulative repurchases as of August 28, 2010, we have \$185.4 million remaining under the Board of Directors' authorization to repurchase our common stock.

On September 28, 2010, the Board of Directors voted to increase the authorization by \$500 million to raise the cumulative share repurchase authorization from \$8.9 billion to \$9.4 billion. We have repurchased approximately 800 thousand shares of our common stock at an aggregate cost of \$185.9 million during fiscal 2011.

Table of Contents*Financial Commitments*

The following table shows our significant contractual obligations as of August 28, 2010:

<i>(in thousands)</i>	Total Contractual Obligations	Less than 1 year	Payment Due by Period		Over 5 years
			Between 1-3 years	Between 4-5 years	
Long-term debt ⁽¹⁾	\$ 2,882,300	\$ 632,300	\$ 500,000	\$ 1,000,000	\$ 750,000
Interest payments ⁽²⁾	617,225	140,600	245,238	155,800	75,587
Operating leases ⁽³⁾	1,740,047	196,291	357,943	284,836	900,977
Capital leases ⁽⁴⁾	92,745	21,947	44,832	25,966	
Self-insurance reserves ⁽⁵⁾	158,384	60,955	43,045	22,688	31,696
Construction commitments	15,757	15,757			
	\$ 5,506,458	\$ 1,067,850	\$ 1,191,058	\$ 1,489,290	\$ 1,758,260

(1) Long-term debt balances represent principal maturities, excluding interest.

(2) Represents obligations for interest payments on long-term debt.

(3) Operating lease obligations are inclusive of amounts accrued within deferred rent and closed store obligations reflected in our consolidated balance sheets.

(4) Capital lease obligations include related interest.

(5) We retain a significant

portion of the risks associated with workers compensation, employee health, general and product liability, property, and vehicle insurance.

These amounts represent estimates based on actuarial calculations.

Although these obligations do not have scheduled maturities, the timing of future payments are predictable based upon historical patterns.

Accordingly, we reflect the net present value of these obligations in our consolidated balance sheets.

We have pension obligations reflected in our consolidated balance sheet that are not reflected in the table above due to the absence of scheduled maturities and the nature of the account. As of August 28, 2010, our pension liability is \$211.5 million and our pension assets are valued at \$117.2 million. Amounts recorded in accumulated other comprehensive loss are \$94.3 million at August 28, 2010. These amounts will be amortized into pension expense in the future, unless they are recovered in future periods through actuarial gains.

Additionally, our tax liability for uncertain tax positions, including interest and penalties, was \$46.5 million at August 28, 2010. Approximately \$28.4 million is classified as current liabilities and \$18.1 million is classified as long-term liabilities. We did not reflect these obligations in the table above as we are unable to make an estimate of the timing of payments due to uncertainties in the timing of the settlement of these tax positions.

Off-Balance Sheet Arrangements

The following table reflects outstanding letters of credit and surety bonds as of August 28, 2010:

	Total Other Commitments
<i>(in thousands)</i>	
Standby letters of credit	\$ 107,554

Surety bonds	23,723
	\$ 131,277

A substantial portion of the outstanding standby letters of credit (which are primarily renewed on an annual basis) and surety bonds are used to cover reimbursement obligations to our workers' compensation carriers. There are no additional contingent liabilities associated with them as the underlying liabilities are already reflected in our consolidated balance sheet. The standby letters of credit and surety bonds arrangements expire within one year, but have automatic renewal clauses.

Reconciliation of Non-GAAP Financial Measures

Selected Financial Data and Management's Discussion and Analysis of Financial Condition and Results of Operations include certain financial measures not derived in accordance with generally accepted accounting principles (GAAP). These non-GAAP financial measures provide additional information for determining our optimum capital structure and are used to assist management in evaluating performance and in making appropriate business decisions to maximize stockholders' value.

Table of Contents

Non-GAAP financial measures should not be used as a substitute for GAAP financial measures, or considered in isolation, for the purpose of analyzing our operating performance, financial position or cash flows. However, we have presented the non-GAAP financial measures, as we believe they provide additional information that is useful to investors as it indicates more clearly our comparative year-to-year operating results. Furthermore, our management and Compensation Committee of the Board of Directors use the above-mentioned non-GAAP financial measures to analyze and compare our underlying operating results and to determine payments of performance-based compensation. We have included a reconciliation of this information to the most comparable GAAP measures in the following reconciliation tables.

Reconciliation of Non-GAAP Financial Measure: Cash Flow Before Share Repurchases and Changes in Debt

The following table reconciles net increase (decrease) in cash and cash equivalents to cash flow before share repurchases and changes in debt, which is presented in Selected Financial Data :

	Fiscal Year Ended August				
(in thousands)	2010	2009	2008	2007	2006
Net increase (decrease) in cash and cash equivalents	\$ 5,574	\$ (149,755)	\$ 155,807	\$ (4,904)	\$ 16,748

Recent Accounting Pronouncements

In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2009-13, *Revenue Arrangements with Multiple Deliverables*, which amends Accounting Standards Codification (ASC) Topic 605 (formerly Emerging Issues Task Force Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*). This ASU addresses the accounting for multiple-deliverable revenue arrangements to enable vendors to account for deliverables separately rather than as a combined unit. This ASU will be effective prospectively for revenue arrangements entered into commencing with our first fiscal quarter beginning August 29, 2010. We do not expect the provisions of ASU 2009-13 to have a material effect on the consolidated financial statements.

Table of Contents

Critical Accounting Policies and Estimates

Preparation of our consolidated financial statements requires us to make estimates and assumptions affecting the reported amounts of assets and liabilities at the date of the financial statements, reported amounts of revenues and expenses during the reporting period and related disclosures of contingent liabilities. In the Notes to Consolidated Financial Statements, we describe our significant accounting policies used in preparing the consolidated financial statements. Our policies are evaluated on an ongoing basis and are drawn from historical experience and other assumptions that we believe to be reasonable under the circumstances. Actual results could differ under different assumptions or conditions. Our senior management has identified the critical accounting policies for the areas that are materially impacted by estimates and assumptions and have discussed such policies with the Audit Committee of our Board of Directors. The following items in our consolidated financial statements represent our critical accounting policies that require significant estimation or judgment by management:

Inventory Reserves and Cost of Sales

LIFO

We state our inventories at the lower of cost or market using the last-in, first-out (LIFO) method for domestic merchandise and the first-in, first out (FIFO) method for Mexico inventories. Due to price deflation on our merchandise purchases, our domestic inventory balances are effectively maintained under the FIFO method. We do not write up inventory for favorable LIFO adjustments, and due to price deflation, LIFO costs of our domestic inventories exceed replacement costs by \$247.3 million at August 28, 2010, calculated using the dollar value method.

Inventory Obsolescence and Shrinkage

Our inventory, primarily hard parts, maintenance items, accessories and non-automotive products, is used on vehicles that have rather long lives; and therefore, the risk of obsolescence is minimal and the majority of excess inventory has historically been returned to our vendors for credit. In the isolated instances where less than full credit will be received for such returns and where we anticipate that items will be sold at retail prices that are less than recorded costs, we record a charge (less than \$20 million in each of the last three years) through cost of sales for the difference. These charges are based on management's judgment, including estimates and assumptions regarding marketability of products and the market value of inventory to be sold in future periods.

Historically, we have not encountered material exposure to inventory obsolescence or excess inventory, nor have we experienced material changes to our estimates. However, we may be exposed to material losses should our vendors alter their policy with regard to accepting excess inventory returns.

Additionally, we reduce inventory for projected losses related to shrinkage, which is estimated based on historical losses and current inventory loss trends resulting from previous physical inventories. Shrinkage may occur due to theft, loss or inaccurate records for the receipt of goods, among other things. Throughout the year, we take physical inventory counts of our stores and distribution centers to verify these estimates. We make assumptions regarding upcoming physical inventory counts that may differ from actual results. Over the last three years, there has been less than a 25 basis point fluctuation in our shrinkage rate.

Each quarter, we evaluate the accrued shrinkage in light of the actual shrink results. To the extent our actual physical inventory count results differ from our estimates, we may experience material adjustments to our financial statements. Historically, we have not experienced material adjustments to our shrinkage estimates and do not believe there is a reasonable likelihood that there will be a material change in the future estimates or assumptions we use.

A 10% difference in our inventory reserves as of August 28, 2010, would have affected net income by approximately \$5 million in fiscal 2010.

Vendor Allowances

We receive various payments and allowances from our vendors through a variety of programs and arrangements, including allowances for warranties, advertising and general promotion of vendor products. Vendor allowances are treated as a reduction of inventory, unless they are provided as a reimbursement of specific, incremental, identifiable costs incurred by the Company in selling the vendor's products. Approximately 85% of the vendor funds received are recorded as a reduction of the cost of inventories and recognized as a reduction to cost of sales as these inventories are sold.

Table of Contents

Based on our vendor agreements, a significant portion of vendor funding we receive is based on our inventory purchases. Therefore, we record receivables for funding earned but not yet received as we purchase inventory. During the year, we regularly review the receivables from vendors to ensure vendors are able to meet their obligations. We generally have not recorded a reserve against these receivables as we have legal right of offset with our vendors for payments owed them. Historically, we have had minimal write-offs (less than \$100 thousand in any of the last three years).

Self-Insurance

We retain a significant portion of the risks associated with workers' compensation, employee health, general and products liability, property and vehicle insurance losses; and we obtain third party insurance to limit the exposure related to certain of these risks. Our self-insurance reserve estimates totaled \$156 million, \$158 million, and \$145 million as of the end of fiscal years 2010, 2009, and 2008, respectively. These changes are primarily reflective of our growing operations, including inflation, increases in vehicles and the number of hours worked, as well as our historical claims experience and changes in our discount rate.

The assumptions made by management in estimating our self-insurance reserves include consideration of historical cost experience, judgments about the present and expected levels of cost per claim and retention levels. We utilize various methods, including analyses of historical trends and actuarial methods, to estimate the cost to settle reported claims, and claims incurred but not yet reported. The actuarial methods develop estimates of the future ultimate claim costs based on the claims incurred as of the balance sheet date. When estimating these liabilities, we consider factors, such as the severity, duration and frequency of claims, legal costs associated with claims, healthcare trends, and projected inflation of related factors. In recent history, we have experienced improvements in frequency and duration of claims; however, medical and wage inflation have partially offset these trends. Throughout this time, our methods for determining our exposure have remained consistent, and these trends have been appropriately factored into our reserve estimates.

Management believes that the various assumptions developed and actuarial methods used to determine our self-insurance reserves are reasonable and provide meaningful data and information that management uses to make its best estimate of our exposure to these risks. Arriving at these estimates, however, requires a significant amount of subjective judgment by management, and as a result these estimates are uncertain and our actual exposure may be different from our estimates. For example, changes in our assumptions about health care costs, the severity of accidents and the incidence of illness, the average size of claims and other factors could cause actual claim costs to vary materially from our assumptions and estimates, causing our reserves to be overstated or understated. For instance, a 10% change in our self-insurance liability would have affected net income by approximately \$10 million for fiscal 2010.

As we obtain additional information and refine our methods regarding the assumptions and estimates we use to recognize liabilities incurred, we will adjust our reserves accordingly. In recent years, we have experienced favorable claims development, particularly related to workers' compensation, and have adjusted our estimates as necessary. We attribute this success to programs, such as return to work and projects aimed at accelerating claims closure. The programs have matured and proven to be successful and are therefore considered in our current and future assumptions regarding claims costs.

Our liabilities for workers' compensation, certain general and product liability, property and vehicle claims do not have scheduled maturities; however, the timing of future payments is predictable based on historical patterns and is relied upon in determining the current portion of these liabilities. Accordingly, we reflect the net present value of the obligations we determine to be long-term using the risk-free interest rate as of the balance sheet date. If the discount rate used to calculate the present value of these reserves changed by 50 basis points, net income would have changed approximately \$2 million for fiscal 2010. Our liability for health benefits is classified as current, as the historical average duration of claims is approximately six weeks.

Table of Contents*Income Taxes*

Our income tax returns are audited by state, federal and foreign tax authorities, and we are typically engaged in various tax examinations at any given time. Tax contingencies often arise due to uncertainty or differing interpretations of the application of tax rules throughout the various jurisdictions in which we operate. The contingencies are influenced by items such as tax audits, changes in tax laws, litigation, appeals and prior experience with similar tax positions. We regularly review our tax reserves for these items and assess the adequacy of the amount we have recorded. As of August 28, 2010, we had approximately \$46.5 million reserved for uncertain tax positions. We evaluate potential exposures associated with our various tax filings in accordance with ASC Topic 740 (formerly Financial Accounting Standards Board Interpretation No. 48, *Accounting for Uncertainty in Income Taxes*) by estimating a liability for uncertain tax positions based on a two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step requires us to estimate and measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement.

We believe our estimates to be reasonable and have not experienced material adjustments to our reserves in the previous three years; however, actual results could differ from our estimates and we may be exposed to gains or losses that could be material. Specifically, management has used judgment and made assumptions to estimate the likely outcome of uncertain tax positions. Additionally, to the extent we prevail in matters for which a liability has been established, or must pay in excess of recognized reserves, our effective tax rate in any particular period could be materially affected.

Pension Obligation

Prior to January 1, 2003, substantially all full-time employees were covered by a qualified defined benefit pension plan. The benefits under the plan were based on years of service and the employee's highest consecutive five-year average compensation. On January 1, 2003, the plan was frozen. Accordingly, pension plan participants will earn no new benefits under the plan formula and no new participants will join the pension plan. On January 1, 2003, our supplemental, unqualified defined benefit pension plan for certain highly compensated employees was also frozen. Accordingly, plan participants will earn no new benefits under the plan formula and no new participants will join the pension plan. As the plan benefits are frozen, the annual pension expense and recorded liabilities are not impacted by increases in future compensation levels, but are impacted by the use of two key assumptions in the calculation of these balances:

Expected long-term rate of return on plan assets: We have assumed an 8% long-term rate of return on our plan assets. This estimate is a judgmental matter in which management considers the composition of our asset portfolio, our historical long-term investment performance and current market conditions. We review the expected long-term rate of return on an annual basis, and revise it accordingly. Additionally, we monitor the mix of investments in our portfolio to ensure alignment with our long-term strategy to manage pension cost and reduce volatility in our assets. At August 28, 2010, our plan assets totaled \$117 million in our qualified plan. Our assets are generally valued using the net asset values, which are determined by valuing investments at the closing price or last trade reported on the major market on which the individual securities are traded. We have no assets in our nonqualified plan. A 50 basis point change in our expected long term rate of return would impact annual pension expense/income by approximately \$600 thousand for the qualified plan.

Discount rate used to determine benefit obligations: This rate is highly sensitive and is adjusted annually based on the interest rate for long-term, high-quality, corporate bonds as of the measurement date using yields for maturities that are in line with the duration of our pension liabilities. This same discount rate is also used to determine pension expense for the following plan year. For fiscal 2010, we assumed a discount rate of 5.25%. A decrease in the discount rate increases our projected benefit obligation and pension expense. A 50 basis point change in the discount rate at August 28, 2010 would impact annual pension expense/income by approximately \$2.2 million for the qualified plan and \$40 thousand for the nonqualified plan.

Item 7A. Quantitative and Qualitative Disclosures about Market Risk

We are exposed to market risk from, among other things, changes in interest rates, foreign exchange rates and fuel prices. From time to time, we use various financial instruments to reduce interest rate and fuel price risks. To date, based upon our current level of foreign operations, no derivative instruments have been utilized to reduce foreign exchange rate risk. All of our hedging activities are governed by guidelines that are authorized by our Board of Directors. Further, we do not buy or sell financial instruments for trading purposes.

Table of Contents

Interest Rate Risk

Our financial market risk results primarily from changes in interest rates. At times, we reduce our exposure to changes in interest rates by entering into various interest rate hedge instruments such as interest rate swap contracts, treasury lock agreements and forward-starting interest rate swaps.

We have historically utilized interest rate swaps to convert variable rate debt to fixed rate debt and to lock in fixed rates on future debt issuances. We reflect the current fair value of all interest rate hedge instruments as a component of either other current assets or accrued expenses and other. Our interest rate hedge instruments are designated as cash flow hedges.

Unrealized gains and losses on interest rate hedges are deferred in stockholders' deficit as a component of accumulated other comprehensive loss. These deferred gains and losses are recognized in income as a decrease or increase to interest expense in the period in which the related cash flows being hedged are recognized in expense. However, to the extent that the change in value of an interest rate hedge instrument does not perfectly offset the change in the value of the cash flow being hedged, that ineffective portion is immediately recognized in earnings.

At August 28, 2010, we held forward starting interest rate swaps with a total notional amount of \$300 million. These agreements, which expire in November of 2010, are used to hedge the exposure to variability in future cash flows resulting from changes in variable interest rates relating to anticipated debt transactions. It is expected that upon settlement of the agreements, the realized gain or loss will be deferred in accumulated other comprehensive loss and reclassified to interest expense over the life of the underlying debt. During fiscal 2009, we terminated an interest rate swap related to a \$300 million term loan that was prepaid. As a result, at August 29, 2009, we had no outstanding interest rate swaps.

The fair value of our debt was estimated at \$3.182 billion as of August 28, 2010, and \$2.853 billion as of August 29, 2009, based on the quoted market prices for the same or similar debt issues or on the current rates available to us for debt having the same remaining maturities. Such fair value is greater than the carrying value of debt by \$273.5 million and \$126.5 million at August 28, 2010 and August 29, 2009, respectively. We had \$459.2 million of variable rate debt outstanding at August 28, 2010, and \$277.6 million of variable rate debt outstanding at August 29, 2009. In fiscal 2010, at this borrowing level for variable rate debt, a one percentage point increase in interest rates would have had an unfavorable impact on our pre-tax earnings and cash flows of \$4.6 million. The primary interest rate exposure on variable rate debt is based on LIBOR. We had outstanding fixed rate debt of \$2.449 billion at August 28, 2010, and August 29, 2009. A one percentage point increase in interest rates would reduce the fair value of our fixed rate debt by \$94.2 million at August 28, 2010.

Fuel Price Risk

Fuel swap contracts that we utilize have not previously been designated as hedging instruments and thus do not qualify for hedge accounting treatment, although the instruments were executed to economically hedge a portion of our diesel and unleaded fuel exposure. We did not enter into any fuel swap contracts during the 2010 fiscal year. During fiscal year 2009, we entered into fuel swaps to economically hedge a portion of our unleaded fuel exposure. As of August 29, 2009, we had an outstanding liability of less than one hundred thousand dollars associated with our unleaded fuel swap which had no significant impact on our results of operations.

Foreign Currency Risk

Foreign currency exposures arising from transactions include firm commitments and anticipated transactions denominated in a currency other than an entity's functional currency. To minimize our risk, we generally enter into transactions denominated in their respective functional currencies. Foreign currency exposures arising from transactions denominated in currencies other than the functional currency are not material.

Our primary foreign currency exposure arises from Mexican peso-denominated revenues and profits and their translation into U.S. dollars. We generally view our investments in the Mexican subsidiaries as long-term. As a result, we generally do not hedge these net investments. The net investment in the Mexican subsidiaries translated into U.S. dollars using the year-end exchange rates was \$254.6 million at August 28, 2010 and \$215.4 million at August 29, 2009. The potential loss in value of our net investment in the Mexican subsidiaries resulting from a hypothetical 10 percent adverse change in quoted foreign currency exchange rates at August 28, 2010 and August 29, 2009, amounted to \$23.1 million and \$19.6 million, respectively. Any changes in our net investment in the Mexican

subsidiaries relating to foreign currency exchange rates would be reflected in the foreign currency translation component of accumulated other comprehensive loss, unless the Mexican subsidiaries are sold or otherwise disposed. During fiscal 2010, exchange rates with respect to the Mexican peso increased by approximately 1.4% with respect to the U.S. dollar. Exchange rates with respect to the Mexican peso decreased by approximately 30% with respect to the U.S. dollar during fiscal 2009.

Management's Report on Internal Control Over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Securities Exchange Act of 1934, as amended). Our internal control over financial reporting includes, among other things, defined policies and procedures for conducting and governing our business, sophisticated information systems for processing transactions and properly trained staff. Mechanisms are in place to monitor the effectiveness of our internal control over financial reporting, including regular testing performed by the Company's internal audit team, which is comprised of both Deloitte & Touche LLP professionals and Company personnel. Actions are taken to correct deficiencies as they are identified. Our procedures for financial reporting include the active involvement of senior management, our Audit Committee and a staff of highly qualified financial and legal professionals.

Management, with the participation of our principal executive and financial officers, assessed our internal control over financial reporting as of August 28, 2010, the end of our fiscal year. Management based its assessment on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

Based on this assessment, management has concluded that our internal control over financial reporting was effective as of August 28, 2010.

Our independent registered public accounting firm, Ernst & Young LLP, audited the effectiveness of our internal control over financial reporting. Ernst & Young LLP has issued its report concurring with management's assessment, which is included in this Annual Report on Form 10-K.

Certifications

Compliance with NYSE Corporate Governance Listing Standards

On January 4, 2010, the Company submitted to the New York Stock Exchange the Annual CEO Certification required pursuant to Section 303A.12(a) of the New York Stock Exchange Listed Company Manual.

Rule 13a-14(a) Certifications of Principal Executive Officer and Principal Financial Officer

The Company has filed, as exhibits to its Annual Report on Form 10-K for the fiscal year ended August 28, 2010, the certifications of its Principal Executive Officer and Principal Financial Officer required pursuant to Section 302 of the Sarbanes-Oxley Act of 2004.

Table of Contents

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of AutoZone, Inc.

We have audited AutoZone, Inc.'s internal control over financial reporting as of August 28, 2010, based on criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission (the COSO criteria). AutoZone, Inc.'s management is responsible for maintaining effective internal control over financial reporting, and for its assessment of the effectiveness of internal control over financial reporting included in the accompanying Management's Report on Internal Control over Financial Reporting. Our responsibility is to express an opinion on AutoZone, Inc.'s internal control over financial reporting based on our audit. We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, testing and evaluating the design and operating effectiveness of internal control based on the assessed risk, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, AutoZone, Inc. maintained, in all material respects, effective internal control over financial reporting as of August 28, 2010, based on the COSO criteria.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of AutoZone, Inc. as of August 28, 2010 and August 29, 2009 and the related consolidated statements of income, stockholders' (deficit) equity, and cash flows for each of the three years in the period ended August 28, 2010 of AutoZone, Inc. and our report dated October 25, 2010 expressed an unqualified opinion thereon.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders of AutoZone, Inc.

We have audited the accompanying consolidated balance sheets of AutoZone, Inc. as of August 28, 2010 and August 29, 2009 and the related consolidated statements of income, stockholders' (deficit) equity, and cash flows for each of the three years in the period ended August 28, 2010. These financial statements are the responsibility of AutoZone, Inc.'s management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of AutoZone, Inc. as of August 28, 2010 and August 29, 2009, and the consolidated results of its operations and its cash flows for each of the three years in the period ended August 28, 2010, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), AutoZone, Inc.'s internal control over financial reporting as of August 28, 2010, based on criteria established in Internal Control Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated October 25, 2010 expressed an unqualified opinion thereon.

Notes to Consolidated Financial Statements

Note A Significant Accounting Policies

Business: AutoZone, Inc. and its wholly owned subsidiaries (AutoZone or the Company) is principally a retailer and distributor of automotive parts and accessories. At the end of fiscal 2010, the Company operated 4,389 domestic stores in the United States (U.S.) and Puerto Rico, and 238 stores in Mexico. Each store carries an extensive product line for cars, sport utility vehicles, vans and light trucks, including new and remanufactured automotive hard parts, maintenance items, accessories and non-automotive products. In 2,424 of the domestic stores and 173 of the Mexico stores at the end of fiscal 2010, the Company had a commercial sales program that provides prompt delivery of parts and other products to local, regional and national repair garages, dealers, service stations, and public sector accounts. The Company also sells the ALLDATA brand automotive diagnostic and repair software through www.alldata.com. Additionally, the Company sells automotive hard parts, maintenance items, accessories, and non-automotive products through www.autozone.com, and as part of our commercial sales program, through www.autozonepro.com.

Fiscal Year: The Company s fiscal year consists of 52 or 53 weeks ending on the last Saturday in August.

Accordingly, fiscal 2010 represented 52 weeks ended on August 28, 2010, fiscal 2009 represented 52 weeks ended on August 29, 2009, and fiscal 2008 represented 53 weeks ended on August 30, 2008.

Basis of Presentation: The consolidated financial statements include the accounts of AutoZone, Inc. and its wholly owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

Use of Estimates: Management of the Company has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent liabilities to prepare these financial statements. Actual results could differ from those estimates.

Cash Equivalents: Cash equivalents consist of investments with original maturities of 90 days or less at the date of purchase. Cash equivalents include proceeds due from credit and debit card transactions with settlement terms of less than 5 days. Credit and debit card receivables included within cash equivalents were \$29.6 million at August 28, 2010 and \$24.3 million at August 29, 2009.

Marketable Securities: The Company invests a portion of its assets held by the Company s wholly owned insurance captive in marketable debt securities and classifies them as available-for-sale. The Company includes these securities within the other current assets and other long-term assets captions in the accompanying Consolidated Balance Sheets and records the amounts at fair market value, which is determined using quoted market prices at the end of the reporting period. A discussion of marketable securities is included in Note E Fair Value Measurements and Note F Marketable Securities .

Accounts Receivable: Accounts receivable consists of receivables from commercial customers and vendors, and are presented net of an allowance for uncollectible accounts. AutoZone routinely grants credit to certain of its commercial customers. The risk of credit loss in its trade receivables is substantially mitigated by the Company s credit evaluation process, short collection terms and sales to a large number of customers, as well as the low revenue per transaction for most of its sales. Allowances for potential credit losses are determined based on historical experience and current evaluation of the composition of accounts receivable. Historically, credit losses have been within management s expectations and the allowances for uncollectible accounts were \$1.4 million at August 28, 2010, and \$2.5 million at August 29, 2009.

Historically, certain receivables were sold to a third party at a discount for cash with limited recourse. At August 30, 2008, the Company had \$55.4 million outstanding under this program. During the second quarter of fiscal 2009, AutoZone terminated its agreement to sell receivables to a third party.

Merchandise Inventories: Inventories are stated at the lower of cost or market using the last-in, first-out method for domestic inventories and the first-in, first out (FIFO) method for Mexico inventories. Included in inventory are related purchasing, storage and handling costs. Due to price deflation on the Company s merchandise purchases, the Company s domestic inventory balances are effectively maintained under the FIFO method. The Company s policy is not to write up inventory in excess of replacement cost. The cumulative balance of this unrecorded adjustment, which will be reduced upon experiencing price inflation on our merchandise purchases, was \$247.3 million at August 28, 2010, and \$223.0 million at August 29, 2009.

Table of Contents

Property and Equipment: Property and equipment is stated at cost. Depreciation and amortization are computed principally using the straight-line method over the following estimated useful lives: buildings, 40 to 50 years; building improvements, 5 to 15 years; equipment, 3 to 10 years; and leasehold improvements, over the shorter of the asset's estimated useful life or the remaining lease term, which includes any reasonably assured renewal periods. Depreciation and amortization include amortization of assets under capital lease.

Impairment of Long-Lived Assets: The Company evaluates the recoverability of its long-lived assets whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. When such an event occurs, the Company compares the sum of the undiscounted expected future cash flows of the asset (asset group) with the carrying amounts of the asset. If the undiscounted expected future cash flows are less than the carrying value of the assets, the Company measures the amount of impairment loss as the amount by which the carrying amount of the assets exceeds the fair value of the assets. No impairment losses were recorded in the three years ended August 28, 2010.

Goodwill: The cost in excess of fair value of identifiable net assets of businesses acquired is recorded as goodwill. Goodwill has not been amortized since fiscal 2001, but an analysis is performed at least annually to compare the fair value of the reporting unit to the carrying amount to determine if any impairment exists. The Company performs its annual impairment assessment in the fourth quarter of each fiscal year, unless circumstances dictate more frequent assessments. No impairment losses were recorded in the three years ended August 28, 2010. Goodwill was \$302.6 million as of August 28, 2010, and August 29, 2009.

Derivative Instruments and Hedging Activities: AutoZone is exposed to market risk from, among other things, changes in interest rates, foreign exchange rates and fuel prices. From time to time, the Company uses various financial instruments to reduce such risks. To date, based upon the Company's current level of foreign operations, no derivative instruments have been utilized to reduce foreign exchange rate risk. All of the Company's hedging activities are governed by guidelines that are authorized by AutoZone's Board of Directors. Further, the Company does not buy or sell financial instruments for trading purposes.

AutoZone's financial market risk results primarily from changes in interest rates. At times, AutoZone reduces its exposure to changes in interest rates by entering into various interest rate hedge instruments such as interest rate swap contracts, treasury lock agreements and forward-starting interest rate swaps. All of the Company's interest rate hedge instruments are designated as cash flow hedges. Refer to Note H Derivative Financial Instruments for additional disclosures regarding the Company's derivative instruments and hedging activities. Cash flows related to these instruments designated as qualifying hedges are reflected in the accompanying consolidated statements of cash flows in the same categories as the cash flows from the items being hedged. Accordingly, cash flows relating to the settlement of interest rate derivatives hedging the forecasted issuance of debt have been reflected upon settlement as a component of financing cash flows. The resulting gain or loss from such settlement is deferred to other comprehensive loss and reclassified to interest expense over the term of the underlying debt. This reclassification of the deferred gains and losses impacts the interest expense recognized on the underlying debt that was hedged and is therefore reflected as a component of operating cash flows in periods subsequent to settlement. The periodic settlement of interest rate derivatives hedging outstanding variable rate debt is recorded as an adjustment to interest expense and is therefore reflected as a component of operating cash flows.

Foreign Currency: The Company accounts for its Mexican operations using the Mexican peso as the functional currency and converts its financial statements from Mexican pesos to U.S. dollars. The cumulative loss on currency translation is recorded as a component of accumulated other comprehensive loss and approximated \$44.7 million at August 28, 2010, and \$45.5 million at August 29, 2009.

Self-Insurance Reserves: The Company retains a significant portion of the risks associated with workers compensation, employee health, general, products liability, property and vehicle insurance. Through various methods, which include analyses of historical trends and utilization of actuaries, the Company estimates the costs of these risks. The costs are accrued based upon the aggregate of the liability for reported claims and an estimated liability for claims incurred but not reported. Estimates are based on calculations that consider historical lag and claim development factors. The long-term portions of these liabilities are recorded at our estimate of their net present value.

Table of Contents

Deferred Rent: The Company recognizes rent expense on a straight-line basis over the course of the lease term, which includes any reasonably assured renewal periods, beginning on the date the Company takes physical possession of the property (see Note M Leases). Differences between this calculated expense and cash payments are recorded as a liability in accrued expenses and other and other long-term liabilities in the accompanying Consolidated Balance Sheets. Deferred rent approximated \$67.6 million as of August 28, 2010, and \$59.2 million as of August 29, 2009.

Financial Instruments: The Company has financial instruments, including cash and cash equivalents, accounts receivable, other current assets and accounts payable. The carrying amounts of these financial instruments approximate fair value because of their short maturities. A discussion of the carrying values and fair values of the Company's debt is included in Note I Financing, marketable securities is included in Note F Marketable Securities, and derivatives is included in Note H Derivative Financial Instruments.

Income Taxes: The Company accounts for income taxes under the liability method. Deferred tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities and are measured using the enacted tax rates and laws that will be in effect when the differences are expected to reverse. Our effective tax rate is based on income by tax jurisdiction, statutory rates, and tax saving initiatives available to us in the various jurisdictions in which we operate.

The Company recognizes liabilities for uncertain income tax positions based on a two-step process. The first step is to evaluate the tax position for recognition by determining if the weight of available evidence indicates that it is more likely than not that the position will be sustained on audit, including resolution of related appeals or litigation processes, if any. The second step requires us to estimate and measure the tax benefit as the largest amount that is more than 50% likely to be realized upon ultimate settlement. It is inherently difficult and subjective to estimate such amounts, as the Company must determine the probability of various possible outcomes. The Company reevaluates these uncertain tax positions on a quarterly basis or when new information becomes available to management. These reevaluations are based on factors including, but not limited to, changes in facts or circumstances, changes in tax law, successfully settled issues under audit, expirations due to statutes, and new audit activity. Such a change in recognition or measurement could result in the recognition of a tax benefit or an increase to the tax accrual.

The Company classifies interest related to income tax liabilities as income tax expense, and if applicable, penalties are recognized as a component of income tax expense. The income tax liabilities and accrued interest and penalties that are due within one year of the balance sheet date are presented as accrued expenses and other in the accompanying Consolidated Balance Sheets. The remaining portion of the income tax liabilities and accrued interest and penalties are presented as other long-term liabilities in the accompanying Consolidated Balance Sheets because payment of cash is not anticipated within one year of the balance sheet date.

Sales and Use Taxes: Governmental authorities assess sales and use taxes on the sale of goods and services. The Company excludes taxes collected from customers in its reported sales results; such amounts are reflected as accrued expenses and other until remitted to the taxing authorities.

Revenue Recognition: The Company recognizes sales at the time the sale is made and the product is delivered to the customer. Revenue from sales are presented net of allowances for estimated sales returns, which are based on historical return rates.

A portion of the Company's transactions include the sale of auto parts that contain a core component. The core component represents the recyclable portion of the auto part. Customers are not charged for the core component of the new part if a used core is returned at the point of sale of the new part; otherwise the Company charges customers a specified amount for the core component. The Company refunds that same amount upon the customer returning a used core to the store at a later date. The Company does not recognize sales or cost of sales for the core component of these transactions when a used part is returned or expected to be returned from the customer.

Vendor Allowances and Advertising Costs: The Company receives various payments and allowances from its vendors through a variety of programs and arrangements. Monies received from vendors include rebates, allowances and promotional funds. The amounts to be received are subject to the terms of the vendor agreements, which generally do not state an expiration date, but are subject to ongoing negotiations that may be impacted in the future based on changes in market conditions, vendor marketing strategies and changes in the profitability or sell-through of the related merchandise.

Table of Contents

Rebates and other miscellaneous incentives are earned based on purchases or product sales and are accrued ratably over the purchase or sale of the related product. These monies are generally recorded as a reduction of inventories and are recognized as a reduction to cost of sales as the related inventories are sold.

For arrangements that provide for reimbursement of specific, incremental, identifiable costs incurred by the Company in selling the vendors' products, the vendor funds are recorded as a reduction to selling, general and administrative expenses in the period in which the specific costs were incurred.

The Company expenses advertising costs as incurred. Advertising expense, net of vendor promotional funds, was \$65.5 million in fiscal 2010, \$72.1 million in fiscal 2009, and \$86.2 million in fiscal 2008. Vendor promotional funds, which reduced advertising expense, amounted to \$19.6 million in fiscal 2010, \$9.7 million in fiscal 2009, and \$2.9 in fiscal 2008.

Cost of Sales and Operating, Selling, General and Administrative Expenses: The following illustrates the primary costs classified in each major expense category:

Cost of Sales

Total cost of merchandise sold, including:

Freight expenses associated with moving merchandise inventories from the Company's vendors to the distribution centers and to the retail stores

Vendor allowances that are not reimbursements for specific, incremental and identifiable costs

Costs associated with operating the Company's supply chain, including payroll and benefit costs, warehouse occupancy costs, transportation costs and depreciation

Inventory shrinkage

Operating, Selling, General and Administrative Expenses

Payroll and benefit costs for store and store support employees;

Occupancy costs of store and store support facilities;

Depreciation related to retail and store support assets;

Transportation costs associated with commercial deliveries;

Advertising;

Self insurance costs; and

Other administrative costs, such as credit card transaction fees, supplies, and travel and lodging

Warranty Costs: The Company or the vendors supplying its products provides the Company's customers limited warranties on certain products that range from 30 days to lifetime. In most cases, the Company's vendors are primarily responsible for warranty claims. Warranty costs relating to merchandise sold under warranty not covered by vendors are estimated and recorded as warranty obligations at the time of sale based on each product's historical return rate. These obligations, which are often funded by vendor allowances, are recorded as a component of accrued expenses. For vendor allowances that are in excess of the related estimated warranty expense for the vendor's products, the excess is recorded in inventory and recognized as a reduction to cost of sales as the related inventory is sold.

Shipping and Handling Costs: The Company does not generally charge customers separately for shipping and handling. Substantially all the costs the Company incurs to ship products to our stores are included in cost of sales.

Pre-opening Expenses: Pre-opening expenses, which consist primarily of payroll and occupancy costs, are expensed as incurred.

Earnings per Share: Basic earnings per share is based on the weighted average outstanding common shares. Diluted earnings per share is based on the weighted average outstanding common shares adjusted for the effect of common stock equivalents, which are primarily stock options. There were no stock options excluded from the diluted earnings per share computation because they would have been anti-dilutive at August 28, 2010. There were approximately 30,000 shares excluded at August 29, 2009, and approximately 31,000 shares excluded at August 30, 2008.

Table of Contents

Share-Based Payments: Share-based payments include stock option grants and certain other transactions under the Company's stock plans. The Company recognizes compensation expense for its share-based payments based on the fair value of the awards. See Note B Share-Based Payments for further discussion.

Recent Accounting Pronouncements: In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2009-13, *Revenue Arrangements with Multiple Deliverables*, which amends Accounting Standards Codification (ASC) Topic 605 (formerly Emerging Issues Task Force Issue No. 00-21, *Revenue Arrangements with Multiple Deliverables*). This ASU addresses the accounting for multiple-deliverable revenue arrangements to enable vendors to account for deliverables separately rather than as a combined unit. This ASU will be effective prospectively for revenue arrangements entered into commencing with the Company's first fiscal quarter beginning August 29, 2010. The Company does not expect the provisions of ASU 2009-13 to have a material effect on the consolidated financial statements.

Note B Share-Based Payments

Total share-based compensation expense (a component of operating, selling, general and administrative expenses) was \$19.1 million related to stock options and share purchase plans for fiscal 2010, \$19.1 million for fiscal 2009, and \$18.4 million for fiscal 2008. As of August 28, 2010, share-based compensation expense for unvested awards not yet recognized in earnings is \$16.9 million and will be recognized over a weighted average period of 2.5 years. Tax deductions in excess of recognized compensation cost are classified as a financing cash inflow.

AutoZone grants options to purchase common stock to certain of its employees and directors under various plans at prices equal to the market value of the stock on the date of grant. Options have a term of 10 years or 10 years and one day from grant date. Director options generally vest three years from grant date. Employee options generally vest in equal annual installments on the first, second, third and fourth anniversaries of the grant date. Employees and directors generally have 30 days after the service relationship ends, or one year after death, to exercise all vested options. The fair value of each option grant is separately estimated for each vesting date. The fair value of each option is amortized into compensation expense on a straight-line basis between the grant date for the award and each vesting date. The Company has estimated the fair value of all stock option awards as of the date of the grant by applying the Black-Scholes-Merton multiple-option pricing valuation model. The application of this valuation model involves assumptions that are judgmental and highly sensitive in the determination of compensation expense.

The following table presents the weighted average for key assumptions used in determining the fair value of options granted and the related share-based compensation expense:

	Year Ended		
	August 28, 2010	August 29, 2009	August 30, 2008
Expected price volatility	31%	28%	24%
Risk-free interest rates	1.8%	2.4%	4.1%
Weighted average expected lives in years	4.3	4.1	4.0
Forfeiture rate	10%	10%	10%
Dividend yield	0%	0%	0%

The following methodologies were applied in developing the assumptions used in determining the fair value of options granted:

Expected price volatility This is a measure of the amount by which a price has fluctuated or is expected to fluctuate. The Company uses actual historical changes in the market value of our stock to calculate the volatility assumption as it is management's belief that this is the best indicator of future volatility. We calculate daily market value changes from the date of grant over a past period representative of the expected life of the options to determine volatility. An increase in the expected volatility will increase compensation expense.

Table of Contents

Risk-free interest rate This is the U.S. Treasury rate for the week of the grant having a term equal to the expected life of the option. An increase in the risk-free interest rate will increase compensation expense.

Expected lives This is the period of time over which the options granted are expected to remain outstanding and is based on historical experience. Separate groups of employees that have similar historical exercise behavior are considered separately for valuation purposes. Options granted have a maximum term of ten years or ten years and one day. An increase in the expected life will increase compensation expense.

Forfeiture rate This is the estimated percentage of options granted that are expected to be forfeited or canceled before becoming fully vested. This estimate is based on historical experience at the time of valuation and reduces expense ratably over the vesting period. An increase in the forfeiture rate will decrease compensation expense. This estimate is evaluated periodically based on the extent to which actual forfeitures differ, or are expected to differ, from the previous estimate.

Dividend yield The Company has not made any dividend payments nor does it have plans to pay dividends in the foreseeable future. An increase in the dividend yield will decrease compensation expense.

The weighted average grant date fair value of options granted was \$40.75 during fiscal 2010, \$34.06 during fiscal 2009, and \$30.28 during fiscal 2008. The intrinsic value of options exercised was \$65 million in fiscal 2010, \$29 million in fiscal 2009, and \$29 million in fiscal 2008. The total fair value of options vested was \$21 million in fiscal 2010, \$16 million in fiscal 2009 and \$18 million in fiscal 2008.

The Company generally issues new shares when options are exercised. The following table summarizes information about stock option activity for the year ended August 28, 2010:

		Number of Shares	Weighted Average Exercise Price	Weighted- Average Remaining Contractual Term (in years)	Aggregate Intrinsic Value (in thousands)
Outstanding	August 29, 2009	3,095,352	\$ 98.73		
Granted		496,580	143.49		
Exercised		(683,548)	79.08		
Canceled		(34,178)	116.49		
Outstanding	August 28, 2010	2,874,206	110.93	6.48	\$ 298,115
Exercisable		1,509,720	94.12	5.08	181,970
Expected to vest		1,228,037	129.53	8.03	104,531
Available for future grants		3,194,942			

Under the AutoZone, Inc. 2003 Director Compensation Plan, a non-employee director may receive no more than one-half of their director fees immediately in cash, and the remainder of the fees must be taken in common stock. The director may elect to receive up to 100% of the fees in stock or defer all or part of the fees in units (Director Units) with value equivalent to the value of shares of common stock as of the grant date. At August 28, 2010, the Company has \$4.1 million accrued related to 19,228 Director Units issued under the current and prior plans with 76,415 shares of common stock reserved for future issuance under the current plan. At August 29, 2009, the Company has \$2.6 million accrued related to 17,506 Director Units issued under the current and prior plans.

Under the AutoZone, Inc. 2003 Director Stock Option Plan (the "Director Stock Option Plan"), each non-employee director receives an option grant on January 1 of each year, and each new non-employee director receives an option to purchase 3,000 shares upon election to the Board of Directors, plus a portion of the annual directors' option grant prorated for the portion of the year actually served in office. Under the Director Compensation Program, each non-employee director may choose between two pay options, and the number of stock options a director receives under the Director Stock Option Plan depends on which pay option the director

Table of Contents

chooses. Directors who elect to be paid only the base retainer receive, on January 1 during their first two years of services as a director, an option to purchase 3,000 shares of AutoZone common stock. After the first two years, such directors receive, on January 1 of each year, an option to purchase 1,500 shares of common stock, and each such director who owns common stock or Director Units worth at least five times the base retainer receive an additional option to purchase 1,500 shares. Directors electing to be paid a supplemental retainer in addition to the base retainer receive, on January 1 during their first two years of service as a director, an option to purchase 2,000 shares of AutoZone common stock. After the first two years, such directors receive an option to purchase 500 shares of common stock, and each such director who owns common stock or Director Units worth at least five times the base retainer receive an additional option to purchase 1,500 shares. These stock option grants are made at the fair market value as of the grant date. At August 28, 2010, there are 137,016 outstanding options with 210,484 shares of common stock reserved for future issuance under this plan.

The Company recognized \$1.0 million in expense related to the discount on the selling of shares to employees and executives under various share purchase plans in fiscal 2010, \$0.9 million in fiscal 2009 and \$0.7 million in fiscal 2008. The employee stock purchase plan, which is qualified under Section 423 of the Internal Revenue Code, permits all eligible employees to purchase AutoZone's common stock at 85% of the lower of the market price of the common stock on the first day or last day of each calendar quarter through payroll deductions. Maximum permitted annual purchases are \$15,000 per employee or 10 percent of compensation, whichever is less. Under the plan, 26,620 shares were sold to employees in fiscal 2010, 29,147 shares were sold to employees in fiscal 2009, and 36,147 shares were sold to employees in fiscal 2008. The Company repurchased 30,617 shares at fair value in fiscal 2010, 37,190 shares at fair value in fiscal 2009, and 39,235 shares at fair value in fiscal 2008 from employees electing to sell their stock. Issuances of shares under the employee stock purchase plans are netted against repurchases and such repurchases are not included in share repurchases disclosed in Note K Stock Repurchase Program. At August 28, 2010, 293,983 shares of common stock were reserved for future issuance under this plan. Once executives have reached the maximum under the employee stock purchase plan, the Amended and Restated Executive Stock Purchase Plan permits all eligible executives to purchase AutoZone's common stock up to 25 percent of his or her annual salary and bonus. Purchases under this plan were 1,483 shares in fiscal 2010, 1,705 shares in fiscal 2009, and 1,793 shares in fiscal 2008. At August 28, 2010, 258,056 shares of common stock were reserved for future issuance under this plan.

Note C Accrued Expenses and Other

Accrued expenses and other consisted of the following:

<i>(in thousands)</i>	August 28, 2010	August 29, 2009
Medical and casualty insurance claims (current portion)	\$ 60,955	\$ 65,024
Accrued compensation, related payroll taxes and benefits	134,830	121,192
Property, sales, and other taxes	102,364	92,065
Accrued interest	31,091	32,448
Accrued gift cards	22,013	16,337
Accrued sales and warranty returns	14,679	12,432
Capital lease obligations	21,947	16,735
Other	44,489	25,038
	\$ 432,368	\$ 381,271

The Company retains a significant portion of the insurance risks associated with workers' compensation, employee health, general, products liability, property and vehicle insurance. A portion of these self-insured losses is managed through a wholly owned insurance captive. The Company maintains certain levels for stop-loss coverage for each self-insured plan in order to limit its liability for large claims. The limits are per claim and are \$1.5 million for workers' compensation and property, \$0.5 million for employee health, and \$1.0 million for general, products liability,

and vehicle.

Table of Contents**Note D Income Taxes**

The provision for income tax expense consisted of the following:

<i>(in thousands)</i>	August 28, 2010	Year Ended August 29, 2009	August 30, 2008
Current:			
Federal	\$ 397,062	\$ 303,929	\$ 285,516
State	34,155	26,450	20,516
	431,217	330,379	306,032
Deferred:			
Federal	(3,831)	46,809	51,997
State	(5,192)	(491)	7,754
	(9,023)	46,318	59,751
Income tax expense	\$ 422,194	\$ 376,697	\$ 365,783

A reconciliation of the provision for income taxes to the amount computed by applying the federal statutory tax rate of 35% to income before income taxes is as follows:

<i>(in thousands)</i>	August 28, 2010	Year Ended August 29, 2009	August 30, 2008
Federal tax at statutory U.S. income tax rate	35.0%	35.0%	35.0%
State income taxes, net	1.6%	1.6%	1.8%
Other	(0.2%)	(0.2%)	(0.5%)
Effective tax rate	36.4%	36.4%	36.3%

Significant components of the Company's deferred tax assets and liabilities were as follows:

<i>(in thousands)</i>	August 28, 2010	August 29, 2009
Deferred tax assets:		
Domestic net operating loss and credit carryforwards	\$ 25,781	\$ 23,119
Foreign net operating loss and credit carryforwards		1,369
Insurance reserves	20,400	14,769
Accrued benefits	50,991	32,976
Pension	34,965	26,273
Other	34,764	35,836
Total deferred tax assets	166,901	134,342
Less: Valuation allowances	(7,085)	(7,116)

	159,816	127,226
Deferred tax liabilities:		
Property and equipment	(35,714)	(36,472)
Inventory	(205,000)	(192,715)
Other	(19,850)	(14,840)
	(260,564)	(244,027)
Net deferred tax liability	\$ (100,748)	\$ (116,801)

Deferred taxes are not provided for temporary differences of approximately \$91.1 million at August 28, 2010, and \$47.1 million of August 29, 2009, representing earnings of non-U.S. subsidiaries that are intended to be permanently reinvested. Computation of the potential deferred tax liability associated with these undistributed earnings and other basis differences is not practicable.

Table of Contents

At August 28, 2010, and August 29, 2009, the Company had deferred tax assets of \$8.2 million and \$8.4 million from federal tax operating losses (NOLs) of \$23.4 million and \$24.0 million, and deferred tax assets of \$1.6 million and \$1.3 million from state tax NOLs of \$35.5 million and \$24.6 million, respectively. At August 28, 2010, the Company had no deferred tax assets from Non-U.S. NOLs. At August 29, 2009, the Company had deferred tax assets of \$1.3 million from Non-U.S. NOLs of \$3.3 million. The federal and state NOLs expire between fiscal 2011 and fiscal 2025. At August 28, 2010 and August 29, 2009, the Company had a valuation allowance of \$6.8 million and \$6.8 million, respectively, for certain federal and state NOLs resulting primarily from annual statutory usage limitations. At August 28, 2010 and August 29, 2009, the Company had deferred tax assets of \$16.0 million and \$13.5 million, respectively, for federal, state, and Non-U.S. income tax credit carryforwards. Certain tax credit carryforwards have no expiration date and others will expire in fiscal 2011 through fiscal 2030. At August 28, 2010 and August 29, 2009, the Company had a valuation allowance of \$0.3 million and \$0.3 million for credits subject to such expiration periods, respectively.

ASC Topic 740 (formerly FASB Statement No. 109, *Accounting for Income Taxes*, and FASB Interpretation No. 48, *Accounting for Uncertain Tax Positions – an Interpretation of FASB Statement No. 109*) prescribes a recognition threshold that a tax position is required to meet before being recognized in the financial statements and provides guidance on derecognition, measurement, classification, interest and penalties, accounting in interim periods, disclosure and transition issues. The adoption of portions of ASC Topic 740 resulted in a decrease to the beginning balance of retained earnings of \$26.9 million during fiscal 2008. Including this cumulative effect amount, the liability recorded for total unrecognized tax benefits upon adoption at August 26, 2007, was \$49.2 million.

A reconciliation of the beginning and ending amount of unrecognized tax benefits is as follows:

<i>(in thousands)</i>	August 28, 2010	August 29, 2009
Beginning balance	\$ 44,192	\$ 40,759
Additions based on tax positions related to the current year	16,802	5,511
Additions for tax positions of prior years	2,125	9,567
Reductions for tax positions of prior years	(6,390)	(5,679)
Reductions due to settlements	(16,354)	(2,519)
Reductions due to statute of limitations	(1,821)	(3,447)
Ending balance	\$ 38,554	\$ 44,192

Included in the August 28, 2010, balance is \$16.7 million of unrecognized tax benefits that, if recognized, would reduce the Company's effective tax rate.

The Company accrues interest on unrecognized tax benefits as a component of income tax expense. Penalties, if incurred, would be recognized as a component of income tax expense. The Company had \$7.9 million and \$12.4 million accrued for the payment of interest and penalties associated with unrecognized tax benefits at August 28, 2010 and August 29, 2009, respectively.

The major jurisdictions where the Company files income tax returns are the U.S. and Mexico. With few exceptions, tax returns filed for tax years 2006 through 2009 remain open and subject to examination by the relevant tax authorities. The Company is typically engaged in various tax examinations at any given time, both by U.S. federal and state taxing jurisdictions and Mexican tax authorities. As of August 28, 2010, the Company estimates that the amount of unrecognized tax benefits could be reduced by approximately \$23.1 million over the next twelve months as a result of tax audit closings, settlements, and the expiration of statutes to examine such returns in various jurisdictions. While the Company believes that it has adequately accrued for possible audit adjustments, the final resolution of these examinations cannot be determined at this time and could result in final settlements that differ from current estimates.

Table of Contents**Note E Fair Value Measurements**

Effective August 31, 2008, the Company adopted ASC Topic 820 (formerly FASB Statement No. 157, *Fair Value Measurements*) which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP) and expands disclosure requirements about fair value measurements. This standard defines fair value as the price received to transfer an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date. ASC Topic 820 establishes a framework for measuring fair value by creating a hierarchy of valuation inputs used to measure fair value, and although it does not require additional fair value measurements, it applies to other accounting pronouncements that require or permit fair value measurements.

The hierarchy prioritizes the inputs into three broad levels:

Level 1 inputs unadjusted quoted prices in active markets for identical assets or liabilities that the Company has the ability to access. An active market for the asset or liability is one in which transactions for the asset or liability occur with sufficient frequency and volume to provide ongoing pricing information.

Level 2 inputs inputs other than quoted market prices included in Level 1 that are observable, either directly or indirectly, for the asset or liability. Level 2 inputs include, but are not limited to, quoted prices for similar assets or liabilities in an active market, quoted prices for identical or similar assets or liabilities in markets that are not active and inputs other than quoted market prices that are observable for the asset or liability, such as interest rate curves and yield curves observable at commonly quoted intervals, volatilities, credit risk and default rates.

Level 3 inputs unobservable inputs for the asset or liability.

The Company's assets and liabilities measured at fair value on a recurring basis were as follows:

(in thousands)	August 28, 2010			
	Level 1	Level 2	Level 3	Fair Value
Other current assets	\$ 11,307	\$ 4,996	\$	\$ 16,303
Other long-term assets	47,725	8,673		56,398
Accrued expenses and other		9,979		9,979
	\$ 59,032	\$ 23,648	\$	\$ 82,680

(in thousands)	August 29, 2009			
	Level 1	Level 2	Level 3	Fair Value
Other current assets	\$ 11,915	\$	\$	\$ 11,915
Other long-term assets	58,123			58,123
	\$ 70,038	\$	\$	\$ 70,038

At August 28, 2010, the fair value measurement amounts for assets and liabilities recorded in the accompanying Consolidated Balance Sheet consisted of short-term marketable securities of \$16.3 million, which are included within other current assets, long-term marketable securities of \$56.4 million, which are included in other long-term assets, and cash flow hedging instruments of \$10.0 million, which are included within accrued expenses and other. The Company's marketable securities are typically valued at the closing price in the principal active market as of the last business day of the quarter or through the use of other market inputs relating to the securities, including benchmark yields and reported trades. Reference Note H Derivative Financial Instruments for further information on how the Company's cash flow hedges are valued.

The fair value of the Company's debt is disclosed in Note I Financing and the fair value of the Company's pension plan assets are disclosed in Note L Pension and Savings Plans .

Table of Contents**Note F Marketable Securities**

The Company's basis for determining the cost of a security sold is the Specific Identification Model. Unrealized gains (losses) on marketable securities are recorded in accumulated other comprehensive loss. The Company's available-for-sale marketable securities consisted of the following:

<i>(in thousands)</i>	Amortized Cost Basis	August 28, 2010		Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Corporate securities	\$ 28,707	\$ 490	\$ (1)	\$ 29,196
Government bonds	24,560	283		24,843
Mortgage-backed securities	8,603	192		8,795
Asset-backed securities and other	9,831	47	(11)	9,867
	\$ 71,701	\$ 1,012	\$ (12)	\$ 72,701

<i>(in thousands)</i>	Amortized Cost Basis	August 29, 2009		Fair Value
		Gross Unrealized Gains	Gross Unrealized Losses	
Corporate securities	\$ 28,302	\$ 654	\$ (5)	\$ 28,951
Government bonds	18,199	283		18,482
Mortgage-backed securities	14,772	366	(119)	15,019
Asset-backed securities and other	7,589	207	(210)	7,586
	\$ 68,862	\$ 1,510	\$ (334)	\$ 70,038

The debt securities held at August 28, 2010, had effective maturities ranging from less than one year to approximately 3 years. The Company did not realize any material gains or losses on its marketable securities during fiscal 2010.

The Company holds two securities that are in an unrealized loss position of approximately \$12 thousand at August 28, 2010. The Company has the intent and ability to hold these investments until recovery of fair value or maturity, and does not deem the investments to be impaired on an other than temporary basis. In evaluating whether the securities are deemed to be impaired on an other than temporary basis, the Company considers factors such as the duration and severity of the loss position, the credit worthiness of the investee, the term to maturity and our intent and ability to hold the investments until maturity or until recovery of fair value.

Note G Accumulated Other Comprehensive Loss

Accumulated other comprehensive loss includes certain adjustments to pension liabilities, foreign currency translation adjustments, certain activity for interest rate swaps that qualify as cash flow hedges and unrealized gains (losses) on available-for-sale securities.

Table of Contents

Changes in accumulated other comprehensive loss consisted of the following:

	Pension	Foreign	Unrealized Loss (Gain)	Net Loss (Gain) on	Reclassification of Net Gains on Derivatives into Earnings, net of	Accumulated Other Comprehensive Loss
	Liability	Currency	on	Outstanding	net of	
	Adjustments, net of taxes	Translation Adjustments	Securities, net of taxes	Derivatives, net of taxes	taxes	
<i>(in thousands)</i>						
Balance at August 30, 2008	\$ 4,270	\$ 1,798	\$ (186)	\$ 2,744	\$ (4,491)	\$ 4,135
Fiscal 2009 activity	46,945	43,655	(568)	(2,744)	612	87,900
Balance at August 29, 2009	51,215	45,453	(754)		(3,879)	92,035
Fiscal 2010 activity	8,144	(705)	104	6,278	612	14,433
Balance at August 28, 2010	\$ 59,359	\$ 44,748	\$ (650)	\$ 6,278	\$ (3,267)	\$ 106,468

The fiscal 2009 pension adjustment of \$46.9 million reflects actuarial losses not yet reflected in the periodic pension cost caused primarily by the significant losses on pension assets in fiscal 2009. The foreign currency translation adjustment of \$43.7 million during fiscal 2009 was attributable to the weakening of the Mexican Peso against the US Dollar, which as of August 29, 2009, had decreased by approximately 30% when compared to August 30, 2008.

Note H Derivative Financial Instruments*Cash Flow Hedges*

The Company periodically uses derivatives to hedge exposures to interest rates. The Company does not hold or issue financial instruments for trading purposes. For transactions that meet the hedge accounting criteria, the Company formally designates and documents the instrument as a hedge at inception and quarterly thereafter assesses the hedges to ensure they are effective in offsetting changes in the cash flows of the underlying exposures. Derivatives are recorded in the Company's Consolidated Balance Sheet at fair value, determined using available market information or other appropriate valuation methodologies. In accordance with ASC Topic 815 (formerly FASB Statement No. 133, *Accounting for Derivative Instruments and Hedging Activities* and FASB Statement No. 161, *Disclosures about Derivative Instruments and Hedging Activities*), the effective portion of a financial instrument's change in fair value is recorded in accumulated other comprehensive loss for derivatives that qualify as cash flow hedges and any ineffective portion of an instrument's change in fair value is recognized in earnings.

At August 28, 2010, the Company held two forward starting swaps, each with a notional amount of \$150 million. These agreements, which expire in November 2010, are cash flow hedges used to hedge the exposure to variability in future cash flows resulting from changes in variable interest rates relating to anticipated debt transactions. The fixed rates of the hedges are 3.15% and 3.13% and are benchmarked based on the 3-month London InterBank Offered Rate (LIBOR). It is expected that upon settlement of the agreements, the realized gain or loss will be deferred in accumulated other comprehensive loss and reclassified to interest expense over the life of the underlying debt. At August 28, 2010, the Company had \$6.3 million, net of tax, recorded in accumulated other comprehensive loss related to net unrealized losses associated with these derivatives. For the fiscal year ended August 28, 2010, the Company's forward starting swaps were determined to be highly effective, and no ineffective portion was recognized.

in earnings. The fair values of the interest rate hedge instruments at August 28, 2010 was a liability of \$10.0 million recorded within the accrued expenses and other caption in the accompanying Consolidated Balance Sheet. During 2009, the Company was party to an interest rate swap agreement related to its \$300 million term floating rate loan, which bore interest based on the three month LIBOR and matured in December 2009. Under this agreement, which was accounted for as a cash flow hedge, the interest rate on the term loan was effectively fixed for its entire term at 4.4% and effectiveness was measured each reporting period. During August 2009, the Company elected to prepay, without penalty, the entire \$300 million term loan. The outstanding liability associated with the interest rate swap totaled \$3.6 million, and was immediately expensed in earnings upon termination. The Company recognized \$5.9 million as increases to interest expense during 2009 related to payments associated with the interest rate swap agreement prior to its termination.

Table of Contents

At August 28, 2010, the Company had \$3.3 million recorded in accumulated other comprehensive loss related to net realized gains associated with terminated interest derivatives, which were designated as hedges. Net gains are amortized into earnings over the remaining life of the associated debt. For the fiscal years ended August 28, 2010, and August 29, 2009, the Company reclassified \$612 thousand of net gains from accumulated other comprehensive loss to interest expense in each year.

Derivatives not designated as Hedging Instruments

The Company is dependent upon diesel fuel to operate its vehicles used in the Company's distribution network to deliver parts to its stores and unleaded fuel for delivery of parts from its stores to its commercial customers or other stores. Fuel is not a material component of the Company's operating costs; however, the Company attempts to secure fuel at the lowest possible cost and to reduce volatility in its operating costs. Because unleaded and diesel fuel include transportation costs and taxes, there are limited opportunities to hedge this exposure directly.

The Company had no fuel hedges during fiscal 2010. During fiscal year 2009, the Company used a derivative financial instrument based on the Reformulated Gasoline Blendstock for Oxygen Blending index to economically hedge the commodity cost associated with its unleaded fuel. The fuel swap did not qualify for hedge accounting treatment and was executed to economically hedge a portion of unleaded fuel purchases. The notional amount of the contract was 2.5 million gallons and terminated August 31, 2009. The loss on the fuel contract for fiscal 2009 was \$2.3 million.

Note I Financing

The Company's long-term debt consisted of the following:

<i>(in thousands)</i>	August 28, 2010	August 29, 2009
4.75% Senior Notes due November 2010, effective interest rate of 4.17%	\$ 199,300	\$ 199,300
5.875% Senior Notes due October 2012, effective interest rate of 6.33%	300,000	300,000
4.375% Senior Notes due June 2013, effective interest rate of 5.65%	200,000	200,000
6.5% Senior Notes due January 2014, effective interest rate of 6.63%	500,000	500,000
5.75% Senior Notes due January 2015, effective interest rate of 5.89%	500,000	500,000
5.5% Senior Notes due November 2015, effective interest rate of 4.86%	300,000	300,000
6.95% Senior Notes due June 2016, effective interest rate of 7.09%	200,000	200,000
7.125% Senior Notes due August 2018, effective interest rate of 7.28%	250,000	250,000
Commercial paper, weighted average interest rate of 0.4% at August 28, 2010, and 0.5% at August 29, 2009	433,000	277,600
	\$ 2,882,300	\$ 2,726,900

As of August 28, 2010, the commercial paper borrowings and the 4.75% Senior Notes due November 2010 mature in the next twelve months but are classified as long-term in the Company's Consolidated Balance Sheets, as the Company has the ability and intent to refinance them on a long-term basis. Specifically, excluding the effect of commercial paper borrowings, the Company had \$792.4 million of availability under its \$800 million revolving credit facility, expiring in July 2012 that would allow it to replace these short-term obligations with long-term financing.

In addition to the long-term debt discussed above, the Company had \$26.2 million of short-term borrowings that are scheduled to mature in the next twelve months as of August 28, 2010. The short-term borrowings are unsecured, peso denominated borrowings and accrue interest at 5.69% as of August 28, 2010.

Table of Contents

In July 2009, the Company terminated its \$1.0 billion revolving credit facility, which was scheduled to expire in fiscal 2010, and replaced it with an \$800 million revolving credit facility. This credit facility is available to primarily support commercial paper borrowings, letters of credit and other short-term unsecured bank loans. This facility expires in July 2012, may be increased to \$1.0 billion at AutoZone's election and subject to bank credit capacity and approval, may include up to \$200 million in letters of credit, and may include up to \$100 million in capital leases each fiscal year. After reducing the available balance by commercial paper borrowings and certain outstanding letters of credit, the Company had \$331.1 million in available capacity under this facility at August 28, 2010. Under the revolving credit facility, the Company may borrow funds consisting of Eurodollar loans or base rate loans. Interest accrues on Eurodollar loans at a defined Eurodollar rate (defined as LIBOR) plus the applicable percentage, which could range from 150 basis points to 450 basis points, depending upon the senior unsecured (non-credit enhanced) long-term debt rating of the Company. Interest accrues on base rate loans at the prime rate. The Company also has the option to borrow funds under the terms of a swingline loan subfacility. The credit facility expires in 2012.

The revolving credit agreement requires that the Company's consolidated interest coverage ratio as of the last day of each quarter shall be no less than 2.50:1. This ratio is defined as the ratio of (i) consolidated earnings before interest, taxes and rents to (ii) consolidated interest expense plus consolidated rents. The Company's consolidated interest coverage ratio as of August 28, 2010 was 4.27:1.

In June 2010, the Company entered into a letter of credit facility that allows the Company to request the participating bank to issue letters of credit on the Company's behalf up to an aggregate amount of \$100 million. The letter of credit facility is in addition to the letters of credit that may be issued under the revolving credit facility. As of August 28, 2010, the Company has \$100.0 million in letters of credit outstanding under the letter of credit facility, which expires in June 2013.

During August 2009, the Company elected to prepay, without penalty, a \$300 million bank term loan entered in December 2004, and subsequently amended. The term loan facility provided for a term loan, which consisted of, at the Company's election, base rate loans, Eurodollar loans or a combination thereof. The entire unpaid principal amount of the term loan would be due and payable in full on December 23, 2009, when the facility was scheduled to terminate. Interest accrued on base rate loans at a base rate per annum equal to the higher of the prime rate or the Federal Funds Rate plus 1/2 of 1%. The Company entered into an interest rate swap agreement on December 29, 2004, to effectively fix, based on current debt ratings, the interest rate of the term loan at 4.4%. The outstanding liability associated with the interest rate swap totaled \$3.6 million, and was expensed in operating, selling, general and administrative expenses upon termination of the hedge in fiscal 2009.

On July 2, 2009, the Company issued \$500 million in 5.75% Senior Notes due 2015 under the Company's shelf registration statement filed with the Securities and Exchange Commission on July 29, 2008 (the "Shelf Registration"). In addition, on August 4, 2008, the Company issued \$500 million in 6.50% Senior Notes due 2014 and \$250 million in 7.125% Senior Notes due 2018 under the Shelf Registration. The Shelf Registration allows the Company to sell an indeterminate amount in debt securities to fund general corporate purposes, including repaying, redeeming or repurchasing outstanding debt and for working capital, capital expenditures, new store openings, stock repurchases and acquisitions. In fiscal 2009, the Company used the proceeds from the issuance of debt to repay outstanding commercial paper indebtedness, to prepay our \$300 million term loan in August 2009 and for general corporate purposes. Proceeds from the debt issuance in fiscal 2008 were used to repay outstanding commercial paper indebtedness and for general corporate purposes.

The 5.75% Senior Notes issued in July, 2009, and the 6.50% and 7.125% Senior Notes issued during August 2008 (collectively, the "Notes"), are subject to an interest rate adjustment if the debt ratings assigned to the Notes are downgraded. They also contain a provision that repayment of the Notes may be accelerated if AutoZone experiences a change in control (as defined in the agreements). The Company's borrowings under the Company's other senior notes arrangements contain minimal covenants, primarily restrictions on liens. Under the Company's revolving credit facility, covenants include limitations on total indebtedness, restrictions on liens, a minimum coverage ratio and a change of control provision that may require acceleration of the repayment obligations under certain circumstances. All of the repayment obligations under the Company's borrowing arrangements may be accelerated and come due prior to the scheduled payment date if covenants are breached or an event of default occurs.

Table of Contents

As of August 28, 2010, the Company was in compliance with all covenants related to its borrowing arrangements. All of the Company's debt is unsecured. Scheduled maturities of long-term debt are as follows:

<i>(in thousands)</i>	Scheduled Maturities
2011	\$ 632,300
2012	
2013	500,000
2014	500,000
2015	500,000
Thereafter	750,000
	\$ 2,882,300

The fair value of the Company's debt was estimated at \$3.182 billion as of August 28, 2010, and \$2.853 billion as of August 29, 2009, based on the quoted market prices for the same or similar issues or on the current rates available to the Company for debt of the same remaining maturities. Such fair value is greater than the carrying value of debt by \$273.5 million and \$126.5 million at August 28, 2010 and August 29, 2009, respectively.

Note J Interest Expense

Net interest expense consisted of the following:

<i>(in thousands)</i>	August 28, 2010	Year Ended August 29, 2009	August 30, 2008
Interest expense	\$ 162,628	\$ 147,504	\$ 121,843
Interest income	(2,626)	(3,887)	(3,785)
Capitalized interest	(1,093)	(1,301)	(1,313)
	\$ 158,909	\$ 142,316	\$ 116,745

Note K Stock Repurchase Program

During 1998, the Company announced a program permitting the Company to repurchase a portion of its outstanding shares not to exceed a dollar maximum established by the Company's Board of Directors. The program was last amended on June 15, 2010 to increase the repurchase authorization to \$8.9 billion from \$8.4 billion. From January 1998 to August 28, 2010, the Company has repurchased a total of 121.7 million shares at an aggregate cost of \$8.7 billion.

The following table summarizes our share repurchase activity for the following fiscal years:

<i>(in thousands)</i>	August 28, 2010	Year Ended August 29, 2009	August 30, 2008
Amount	\$ 1,123,655	\$ 1,300,002	\$ 849,196
Shares	6,376	9,313	6,802

On September 28, 2010, the Board of Directors voted to increase the authorization by \$500 million to raise the cumulative share repurchase authorization from \$8.9 billion to \$9.4 billion. From August 29, 2010 to October 25, 2010, the Company repurchased approximately 800 thousand shares for \$185.9 million.

Table of Contents**Note L Pension and Savings Plans**

Prior to January 1, 2003, substantially all full-time employees were covered by a defined benefit pension plan. The benefits under the plan were based on years of service and the employee's highest consecutive five-year average compensation. On January 1, 2003, the plan was frozen. Accordingly, pension plan participants will earn no new benefits under the plan formula and no new participants will join the pension plan.

On January 1, 2003, the Company's supplemental defined benefit pension plan for certain highly compensated employees was also frozen. Accordingly, plan participants will earn no new benefits under the plan formula and no new participants will join the pension plan.

ASC Topic 715 (formerly SFAS No. 158, *Employers' Accounting for Defined Benefit Pension and Other Postretirement Plans*, an amendment of FASB Statements No. 87, 88, 106, and 132(R)) requires plan sponsors of defined benefit pension and other postretirement benefit plans to recognize the funded status of their postretirement benefit plans in the statement of financial position, measure the fair value of plan assets and benefit obligations as of the date of the fiscal year-end statement of financial position, and provide additional disclosures. The Company adopted the recognition and disclosure provisions of ASC Topic 715 on August 25, 2007 and adopted the measurement provisions of the standard on August 31, 2008.

The Company has recognized the unfunded status of the defined pension plans in its Consolidated Balance Sheets, which represents the difference between the fair value of pension plan assets and the projected benefit obligations of its defined benefit pension plans. The net unrecognized actuarial losses and unrecognized prior service costs are recorded in accumulated other comprehensive loss. These amounts will be subsequently recognized as net periodic pension expense pursuant to the Company's historical accounting policy for amortizing such amounts. Further, actuarial gains and losses that arise in subsequent periods and are not recognized as net periodic pension expense in the same periods will be recognized as a component of other comprehensive income. Those amounts will be subsequently recognized as a component of net periodic pension expense on the same basis as the amounts previously recognized in accumulated other comprehensive loss.

The Company's investment strategy for pension plan assets is to utilize a diversified mix of domestic and international equity and fixed income portfolios to earn a long-term investment return that meets the Company's pension plan obligations. The pension plan assets are invested primarily in listed securities, and the pension plans hold only a minimal investment in AutoZone common stock that is entirely at the discretion of third-party pension fund investment managers. The Company's largest holding classes, U.S. equities and fixed income bonds, are each invested with multiple managers, each holding diversified portfolios with complementary styles and holdings. Accordingly, the Company does not have any significant concentrations of risk in particular securities, issuers, sectors, industries or geographic regions. Alternative investment strategies, including private real estate, are in the process of being liquidated and constitute less than 10% of the pension plan assets. The Company's investment managers are prohibited from using derivatives for speculative purposes and are not permitted to use derivatives to leverage a portfolio. Following is a description of the valuation methodologies used for investments measured at fair value:

U.S., international, emerging, and high yield equities These investments are commingled funds and are valued using the net asset values, which are determined by valuing investments at the closing price or last trade reported on the major market on which the individual securities are traded. These investments are subject to annual audits.

Alternative investments This category represents a hedge fund of funds made up of 17 different hedge fund managers diversified over 9 different hedge strategies. The fair value of the hedge fund of funds is determined using valuations provided by the third party administrator for each of the underlying funds.

Real estate The valuation of these investments requires significant judgment due to the absence of quoted market prices, the inherent lack of liquidity and the long-term nature of such assets. These investments are valued based upon recommendations of our investment manager incorporating factors such as contributions and distributions, market transactions, and market comparables.

Table of Contents

Fixed income securities The fair values of corporate, U.S. government securities and other fixed income securities are estimated by using bid evaluation pricing models or quoted prices of securities with similar characteristics.

Cash and cash equivalents These investments include cash equivalents valued using exchange rates provided by an industry pricing vendor and commingled funds valued using the net asset value. These investments also include cash. The fair values of investments by level and asset category and the weighted-average asset allocations of the Company's pension plans at the measurement date are presented in the following table:

(in thousands)	Fair Value	August 28, 2010		Fair Value Hierarchy		
		Asset Allocation Actual	Target	Level 1	Level 2	Level 3
U.S. equities	\$ 33,445	28.5%	35.0%	\$ 33,445	\$	\$
International equities	24,049	20.5	25.0	24,049		
Emerging equities	10,431	8.9	10.0	10,431		
High yield equities	10,604	9.0	10.0	10,604		
Alternative investments	4,348	3.7				4,348
Real estate	7,348	6.3				7,348
Fixed income securities	22,131	18.9	20.0	22,131		
Cash and cash equivalents	4,887	4.2		4,887		
	\$ 117,243	100.0%	100.0%	\$ 105,547	\$	\$ 11,696

(in thousands)	Fair Value	August 29, 2009		Fair Value Hierarchy		
		Asset Allocation Actual	Target	Level 1	Level 2	Level 3
U.S. equities	\$ 20,321	17.6%	22.5%	\$ 20,321	\$	\$
International equities	41,959	36.4	28.0	28,678	13,281	
Emerging equities	6,765	5.9	6.0	6,765		
High yield equities						
Alternative investments	27,314	23.7	30.5			27,314
Real estate	9,457	8.2	11.0			9,457
Fixed income securities						
Cash and cash equivalents	9,497	8.2	2.0	9,497		
	\$ 115,313	100.0%	100.0%	\$ 65,261	\$ 13,281	\$ 36,771

The change in fair value of Level 3 assets that use significant unobservable inputs is presented in the following table:

(in thousands)	Level 3 Assets
Beginning balance August 29, 2009	\$ 36,771
Actual return on plan assets:	
Assets held at August 28, 2010	367
Assets sold during the year	1,446
Sales and settlements	(26,888)

Ending balance	August 28, 2010	\$	11,696
----------------	-----------------	----	--------

Table of Contents

The following table sets forth the plans' funded status and amounts recognized in the Company's Consolidated Balance Sheets:

<i>(in thousands)</i>	August 28, 2010	August 29, 2009
Change in Projected Benefit Obligation:		
Projected benefit obligation at beginning of year	\$ 185,590	\$ 156,674
Interest cost	11,315	10,647
Actuarial losses	18,986	23,637
Benefits paid	(4,355)	(5,368)
Benefit obligations at end of year	\$ 211,536	\$ 185,590
Change in Plan Assets:		
Fair value of plan assets at beginning of year	\$ 115,313	\$ 160,898
Actual return on plan assets	6,273	(40,235)
Employer contributions	12	18
Benefits paid	(4,355)	(5,368)
Fair value of plan assets at end of year	\$ 117,243	\$ 115,313
Amount Recognized in the Statement of Financial Position:		
Current liabilities	\$ (12)	\$ (17)
Long-term liabilities	(94,281)	(70,260)
Net amount recognized	\$ (94,293)	\$ (70,277)
Amount Recognized in Accumulated Other Comprehensive Loss and not yet reflected in Net Periodic Benefit Cost:		
Net actuarial loss	\$ (94,293)	\$ (70,277)
Accumulated other comprehensive loss	\$ (94,293)	\$ (70,277)
Amount Recognized in Accumulated Other Comprehensive Loss and not yet reflected in Net Periodic Benefit Cost and expected to be amortized in next year's Net Periodic Benefit Cost:		
Net actuarial loss	\$ (10,252)	\$ (8,354)
Amount recognized	\$ (10,252)	\$ (8,354)

Net periodic benefit expense (income) consisted of the following:

August 28,	Year Ended August 29,	August 30,
-------------------	----------------------------------	-------------------

<i>(in thousands)</i>	2010	2009	2008
Interest cost	\$ 11,315	\$ 10,647	\$ 9,962
Expected return on plan assets	(9,045)	(12,683)	(13,036)
Amortization of prior service cost		60	99
Recognized net actuarial losses	8,135	73	97
Net periodic benefit expense (income)	\$ 10,405	\$ (1,903)	\$ (2,878)

The actuarial assumptions used in determining the projected benefit obligation include the following:

	August 28, 2010	Year Ended August 29, 2009	August 30, 2008
Weighted average discount rate	5.25%	6.24%	6.90%
Expected long-term rate of return on plan assets	8.00%	8.00%	8.00%

Table of Contents

As the plan benefits are frozen, increases in future compensation levels no longer impact the calculation and there is no service cost. The discount rate is determined as of the measurement date and is based on the calculated yield of a portfolio of high-grade corporate bonds with cash flows that generally match the Company's expected benefit payments in future years. The expected long-term rate of return on plan assets is based on the historical relationships between the investment classes and the capital markets, updated for current conditions.

The Company makes annual contributions in amounts at least equal to the minimum funding requirements of the Employee Retirement Income Security Act of 1974. The Company contributed approximately \$12 thousand to the plans in fiscal 2010, \$18 thousand to the plans in fiscal 2009 and \$1.3 million to the plans in fiscal 2008. The Company expects to contribute approximately \$3 million to the plan in fiscal 2011; however, a change to the expected cash funding may be impacted by a change in interest rates or a change in the actual or expected return on plan assets. Based on current assumptions about future events, benefit payments are expected to be paid as follows for each of the following fiscal years. Actual benefit payments may vary significantly from the following estimates:

<i>(in thousands)</i>	Benefit Payments
2011	\$ 5,907
2012	6,581
2013	7,281
2014	7,910
2015	8,544
2016 – 2020	52,047

The Company has a 401(k) plan that covers all domestic employees who meet the plan's participation requirements. The plan features include Company matching contributions, immediate 100% vesting of Company contributions and a savings option up to 25% of qualified earnings. The Company makes matching contributions, per pay period, up to a specified percentage of employees' contributions as approved by the Board of Directors. The Company made matching contributions to employee accounts in connection with the 401(k) plan of \$11.7 million in fiscal 2010, \$11.0 million in fiscal 2009 and \$10.8 million in fiscal 2008.

Note M Leases

The Company leases some of its retail stores, distribution centers, facilities, land and equipment, including vehicles. Most of these leases are operating leases and include renewal options, at the Company's election, and some include options to purchase and provisions for percentage rent based on sales. Rental expense was \$195.6 million in fiscal 2010, \$181.3 million in fiscal 2009, and \$165.1 million in fiscal 2008. Percentage rentals were insignificant.

The Company has a fleet of vehicles used for delivery to its commercial customers and travel for members of field management. The majority of these vehicles are held under capital lease. At August 28, 2010, the Company had capital lease assets of \$85.8 million, net of accumulated amortization of \$20.4 million, and capital lease obligations of \$88.3 million, of which \$21.9 million is classified as accrued expenses and other as it represents the current portion of these obligations. At August 29, 2009, the Company had capital lease assets of \$53.9 million, net of accumulated amortization of \$25.4 million, and capital lease obligations of \$54.8 million, of which \$16.7 million was classified as accrued expenses and other.

The Company records rent for all operating leases on a straight-line basis over the lease term, including any reasonably assured renewal periods and the period of time prior to the lease term that the Company is in possession of the leased space for the purpose of installing leasehold improvements. Differences between recorded rent expense and cash payments are recorded as a liability in accrued expenses and other and other long-term liabilities in the accompanying Consolidated Balance Sheets. The deferred rent approximated \$67.6 million on August 28, 2010, and \$59.5 million on August 29, 2009.

Table of Contents

Future minimum annual rental commitments under non-cancelable operating leases and capital leases were as follows at the end of fiscal 2010:

<i>(in thousands)</i>	Operating Leases	Capital Leases
2011	\$ 196,291	\$ 21,947
2012	187,085	24,013
2013	170,858	20,819
2014	151,287	16,971
2015	133,549	8,995
Thereafter	900,977	
Total minimum payments required	\$ 1,740,047	92,745
Less: Interest		(4,465)
Present value of minimum capital lease payments		\$ 88,280

In connection with the Company's December 2001 sale of the TruckPro business, the Company subleased some properties to the purchaser for an initial term of not less than 20 years. The Company's remaining aggregate rental obligation at August 28, 2010 of \$20.5 million is included in the above table, but the obligation is entirely offset by the sublease rental agreement.

Note N Commitments and Contingencies

Construction commitments, primarily for new stores, totaled approximately \$15.8 million at August 28, 2010. The Company had \$107.6 million in outstanding standby letters of credit and \$23.7 million in surety bonds as of August 28, 2010, which all have expiration periods of less than one year. A substantial portion of the outstanding standby letters of credit (which are primarily renewed on an annual basis) and surety bonds are used to cover reimbursement obligations to our workers' compensation carriers. There are no additional contingent liabilities associated with these instruments as the underlying liabilities are already reflected in the consolidated balance sheet. The standby letters of credit and surety bonds arrangements have automatic renewal clauses.

Note O Litigation

AutoZone, Inc. is a defendant in a lawsuit entitled *Coalition for a Level Playing Field, L.L.C., et al., v. AutoZone, Inc. et al.*, filed in the U.S. District Court for the Southern District of New York in October 2004. The case was filed by more than 200 plaintiffs, which are principally automotive aftermarket warehouse distributors and jobbers, against a number of defendants, including automotive aftermarket retailers and aftermarket automotive parts manufacturers. In the amended complaint, the plaintiffs allege, *inter alia*, that some or all of the automotive aftermarket retailer defendants have knowingly received, in violation of the Robinson-Patman Act (the Act), from various of the manufacturer defendants benefits such as volume discounts, rebates, early buy allowances and other allowances, fees, inventory without payment, sham advertising and promotional payments, a share in the manufacturers' profits, benefits of pay on scan purchases, implementation of radio frequency identification technology, and excessive payments for services purportedly performed for the manufacturers. Additionally, a subset of plaintiffs alleges a claim of fraud against the automotive aftermarket retailer defendants based on discovery issues in a prior litigation involving similar claims under the Act. In the prior litigation, the discovery dispute, as well as the underlying claims, was decided in favor of AutoZone and the other automotive aftermarket retailer defendants who proceeded to trial, pursuant to a unanimous jury verdict which was affirmed by the Second Circuit Court of Appeals. In the current litigation, plaintiffs seek an unspecified amount of damages (including statutory trebling), attorneys' fees, and a permanent injunction prohibiting the aftermarket retailer defendants from inducing and/or knowingly receiving discriminatory prices from any of the aftermarket manufacturer defendants and from opening up any further stores to compete with plaintiffs as

long as defendants allegedly continue to violate the Act.

Table of Contents

In an order dated September 7, 2010 and issued on September 16, 2010, the court granted motions to dismiss all claims against AutoZone and its co-defendant competitors and suppliers. Based on the record in the prior litigation, the court dismissed with prejudice all overlapping claims—that is, those covering the same time periods covered by the prior litigation and brought by the judgment plaintiffs in the prior litigation. The court also dismissed with prejudice the plaintiffs' attempt to revisit discovery disputes from the prior litigation. Further, with respect to the other claims under the Act, the Court found that the factual statements contained in the complaint fall short of what would be necessary to support a plausible inference of unlawful price discrimination. Finally, the court held that the AutoZone pay-on-scan program is a difference in non-price terms that are not governed by the Act. The court ordered the case closed, but also stated that—in an abundance of caution the Court [was] defer[ring] decision on whether to grant leave to amend to allow plaintiff an opportunity to propose curative amendments. Without moving for leave to amend their complaint for a third time, four plaintiffs filed a Third Amended and Supplemental Complaint (the Third Amended Complaint) on October 18, 2010. The Third Amended Complaint repeats and expands certain allegations from previous complaints, asserting two claims under the Act, but states that all other plaintiffs have withdrawn their claims, and that, *inter alia*, Chief Auto Parts, Inc. has been dismissed as a defendant. The court set no specific procedure for further response or motion by the defendants. The Company anticipates that the defendants, including AutoZone, will request that the court reject the Third Amended Complaint and/or will seek to have it dismissed. The Company believes this suit to be without merit and is vigorously defending against it. The Company is unable to estimate a loss or possible range of loss.

The Company currently, and from time to time, is involved in various other legal proceedings incidental to the conduct of its business. Although the amount of liability that may result from these other proceedings cannot be ascertained, the Company does not currently believe that, in the aggregate, these matters will result in liabilities material to the Company's financial condition, results of operations or cash flows.

Note P Segment Reporting

The Company's two operating segments (Domestic Auto Parts and Mexico) have been aggregated as one reportable segment: Auto Parts Stores. The criteria the Company used to identify the reportable segment are primarily the nature of the products the Company sells and the operating results that are regularly reviewed by the Company's chief operating decision maker to make decisions about the resources to be allocated to the business units and to assess performance. The accounting policies of the Company's reportable segment are the same as those described in Note A. The Auto Parts Stores segment is a retailer and distributor of automotive parts and accessories through the Company's 4,627 stores in the United States, including Puerto Rico, and Mexico. Each store carries an extensive product line for cars, sport utility vehicles, vans and light trucks, including new and remanufactured automotive hard parts, maintenance items, accessories and non-automotive products.

The Other category reflects business activities that are not separately reportable, including ALLDATA which produces, sells and maintains diagnostic and repair information software used in the automotive repair industry, and e-Commerce, which includes direct sales to customers through www.autozone.com.

The Company evaluates its reportable segment primarily on the basis of net sales and segment profit, which is defined as gross profit. During fiscal 2009, the Company reassessed and revised its reportable segment to exclude ALLDATA and e-Commerce from the newly designated Auto Parts Stores reporting segment. Previously, these immaterial business activities had been combined with Auto Parts Stores.

Table of Contents

(1) The sum of quarterly amounts may not equal the annual amounts reported due to rounding and due to per share amounts being computed independently for each quarter while the full year is based on the annual weighted average shares outstanding.

(2) The fourth quarter for fiscal 2010 and fiscal 2009 are based on a 16-week period. All other quarters presented are based on a 12-week period.

Item 9. Changes In and Disagreements with Accountants on Accounting and Financial Disclosure

Not applicable.

Item 9A. Controls and Procedures

As of August 28, 2010, an evaluation was performed under the supervision and with the participation of AutoZone's management, including the Chief Executive Officer and the Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act, as amended. Based on that evaluation, our management, including the Chief Executive Officer and the Chief Financial Officer, concluded that our disclosure controls and procedures were effective. During our fiscal fourth quarter ended August 28, 2010, there were no changes in our internal controls that have materially affected or are reasonably likely to materially affect internal controls over financial reporting.

Item 9B. Other Information

Not applicable.
