Number 27/06

**BHP BILLITON PRODUCTION REPORT FOR THE QUARTER ENDED 30 SEPTEMBER 2006**

BHP Billiton today released its production report for the quarter ended 30 September 2006. Throughout this report, unless otherwise stated, production volumes refer to BHP Billiton share.

- Record quarterly production of aluminium from continuing operations.
- Iron ore production in line with the record production in the June 2006 quarter (excluding the Goldsworthy (Australia) suspension).
- Record quarterly production of manganese ore in response to stronger customer demand.
- Record quarterly production was achieved at Mozal (Mozambique), GEMCO (Australia), Zamzama (Pakistan), Paranam (Suriname) and Bayside (South Africa).
- Copper production negatively impacted by an industrial stoppage at Escondida (Chile).

	SEPT	SEPT Q06	SEPT Q06
	2006	vs	vs
PETROLEUM	QTR	SEPT Q05	JUNE Q06
Crude Oil & Condensate and Natural Gas Liquid ('000 bbl)	15,216	-2%	4%
Natural Gas (bcf)	91.83	-6%	-7%
Total Petroleum Products (million boe)	30.52	-4%	-2%

Total Petroleum Production

- Production was in line with both comparative periods.

## Crude Oil, Condensate and Natural Gas Liquid

- Production from continuing operations was higher than the previous quarter. Successful infill drilling at North West Shelf (Australia) and Bass Strait (Australia) and reduced downtime at North West Shelf increased production during the quarter. This was partly offset by planned maintenance at Liverpool Bay (UK) and cessation of production from Typhoon / Boris (USA) in September 2005.

## Natural Gas

- Scheduled and unscheduled maintenance in the UK and lower customer demand in Australia contributed to reduced production for the period. Record quarterly production was achieved at Zamzama in response to strong demand. Typhoon / Boris and the Moranbah Coal Bed Methane (Australia) operations have been sold and consequently production will be impacted in future periods.

	SEPT	SEPT Q06	SEPT Q06
	2006	vs	vs
ALUMINIUM	QTR	SEPT Q05	JUNE Q06
Alumina ('000 tonnes)	1,078	5%	1%
Aluminium ('000 tonnes)	337	1%	-2%

## Alumina -

Production for the quarter ended September 2006 was higher than the September 2005 quarter. Ramp up of the Worsley Development Capital Project (Australia) and record production at Paranam contributed to the increased result. Stockpiled hydrate from the calciner outages at Alumar (Brazil) and Worsley decreased the current quarter's production.

## Aluminium

- Quarterly production from continuing operations (excluding Valesul (Brazil)) was an all time record. Mozal, Bayside and Hillside (South Africa) continued to deliver strong production. Mozal and Bayside achieved quarterly production records and Hillside production equalled the previous record results in the December 2005 and June 2006 quarters.

	SEPT	SEPT Q06	SEPT Q06
	2006	vs	vs
BASE METALS	QTR	SEPT Q05	JUNE Q06
Copper ('000 tonnes)	249.9	-19%	-20%
Silver ('000 ounces)	7,349	-35%	-23%
Lead (tonnes)	48,977	-25%	-12%
Zinc (tonnes)	24,011	-18%	-13%

Uranium Oxide Concentrate (Uranium) (tonnes)	793	-27%	-8%
--	-----	------	-----

## Copper

- Production during the quarter was positively impacted by the successful commencement of the Sulphide Leach Project at Escondida (Chile) and strong production at Cerro Colorado (Chile). Production for the quarter was impacted by scheduled maintenance at Olympic Dam (Australia), strike action at Escondida and the sale of Tintaya (Peru) in June 2006.

## Silver / Lead

- Production was in line with expectations, as we continue to progress the rehabilitation of ground support at Cannington (Australia).

## Zinc

- In addition to the temporary partial closure at Cannington, production for the quarter was impacted by lower head grades at Cannington and Antamina (Peru).

## Uranium

- Planned maintenance at the Olympic Dam smelter also impacted uranium production for the quarter.

	SEPT	SEPT Q06	SEPT Q06
	2006	vs	vs
CARBON STEEL MATERIALS	QTR	SEPT Q05	JUNE Q06
Iron ore ('000 tonnes)	25,003	5%	-4%
Metallurgical Coal ('000 tonnes)	9,247	3%	0%
Manganese Ore ('000 tonnes)	1,509	9%	9%
Manganese Alloy ('000 tonnes)	153	10%	-13%

## Iron Ore

- September 2006 quarterly production was in line with the record June 2006 quarter (excluding Goldsworthy). The ramp up of the Rapid Growth Project 2 (Australia), completed in June 2006, contributed to this strong result. Tie-in activity for Rapid Growth Project 3 (Australia), including the Goldsworthy suspension, contributed to lower overall production. Tie-in activity is expected to continue for the remainder of the year.

## Metallurgical Coal

- Metallurgical coal production was in line with previous periods reflecting increased product differentiation in the market.

## Manganese Ore

- Record quarterly production was achieved at GEMCO in response to stronger customer demand.

## Manganese Alloy

- Production for the quarter was impacted by scheduled maintenance.

	SEPT	SEPT Q06	SEPT Q06
	2006	vs	vs
DIAMONDS & SPECIALTY PRODUCTS	QTR	SEPT Q05	JUNE Q06
Diamonds ('000 carats)	487	-43%	-16%
Fertiliser ('000 tonnes)	84.3	-66%	-40%

## Diamonds

- The volume of ore processed at Ekati (Canada) was four percent higher than the September 2005 quarter. As Ekati transitions from open pit mining to predominantly underground mining the mix of ore processed will change from time to time. This has led to a reduced number of higher value carats recovered during the quarter.

## Fertiliser -

The fertiliser business was sold effective 1 August 2006.

	SEPT	SEPT Q06	SEPT Q06
	2006	vs	vs
ENERGY COAL	QTR	SEPT Q05	JUNE Q06
Energy Coal ('000 tonnes)	21,782	-9%	0%

## Energy Coal

- Production for the September 2006 quarter was in line with the June 2006 quarter. Production at Ingwe (South Africa) was two percent higher than the previous quarter despite unfavourable geological conditions and higher strip ratios. The Australian operations had their highest quarterly production since the record quarter in June 2005. Scheduled maintenance and challenging geological conditions at New Mexico Coal (USA) had a negative impact on production.

	SEPT	SEPT Q06	SEPT Q06
	2006	vs	vs
STAINLESS STEEL MATERIALS	QTR	SEPT Q05	JUNE Q06
Nickel ('000 tonnes)	44.5	1%	7%

## Nickel

Edgar Filing: BHP BILLITON LTD - Form 6-K

- Production for the September 2006 quarter was higher than the June 2006 quarter. The previous quarter was impacted by tie-in activity related to the expansion at Yabulu (Australia).

	(a) LPG and Ethane are now reported as Natural Gas Liquids (NGL), consistent with petroleum industry practice. Product-specific conversions will be made and NGL will be reported in barrels of oil equivalent (boe). Comparative period information has been restated.									
	(b) BHP Billiton completed the sale of Valesul on 1 July 2006.									
	(c) Metal production is reported on the basis of payable metal.									
	(d) BHP Billiton sold Tintaya effective from June 1, 2006.									
	(e) Iron ore production is reported on a wet tonnes basis.									
	(f) From October 1, 2005 Jimblebar production is disclosed on an 85% saleable production basis, prior production is disclosed at 100%.									
	(g) Metallurgical coal production is reported on the basis of saleable product. Production figures include some thermal coal.									
	(h) Shown on 100% basis. BHP Billiton interest in saleable production is 80%.									

Edgar Filing: BHP BILLITON LTD - Form 6-K

	(i)	Shown on 100% basis. BHP Billiton interest in saleable production is 60%.									
	(j)	BHP Billiton completed the sale of Southern Cross Fertiliser operations on 1 August 2006.
