PART I. FINANCIAL INFORMATION

ITEM 1. FINANCIAL STATEMENTS

The condensed consolidated financial statements of Blue Dolphin Energy Company and its subsidiaries (referred to herein, with its predecessors and subsidiaries, as Blue Dolphin, we, us and our) included herein have been prepared by us, without audit, pursuant to the rules and regulations of the Securities and Exchange Commission (the SEC) and, in the opinion of management, reflect all adjustments necessary to present a fair statement of operations, financial position and cash flows. We follow the full-cost method of accounting for oil and gas properties, wherein costs incurred in the acquisition, exploration and development of oil and gas reserves are capitalized. We believe that the disclosures are adequate and the information presented is not misleading, although certain information and footnote disclosures normally included in financial statements prepared in accordance with U.S. generally accepted accounting principles have been condensed or omitted pursuant to such rules and regulations.

Our accompanying condensed consolidated financial statements should be read in conjunction with the consolidated financial statements and notes thereto included in our annual report on Form 10-KSB for the year ended December 31, 2006.

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS UNAUDITED
SEPTEMBER 30, 2007

1. Liquidity

At September 30, 2007, our available working capital was approximately \$5.6 million, a decrease of \$1.1 million from approximately \$6.7 million of working capital at December 31, 2006. The decrease in working capital at the end of the first three quarters of 2007 reflects the impact of significantly reduced revenues from sales of oil and gas partially offset by increased revenues from our pipeline operations. Without the revenues and resulting cash inflows we receive from oil and gas sales, we may not be able to generate sufficient cash from operations to cover our operating and general and administrative expenses.

The Blue Dolphin System is currently transporting an aggregate of approximately 27 MMcf of gas per day from ten shippers and the GA 350 Pipeline is currently transporting an aggregate of approximately 35 MMcf of gas per day from six shippers. Throughput on the Blue Dolphin System and the GA 350 Pipeline increased significantly during 2006 and 2007 as a result of the production of seven shippers commencing deliveries from a total of eight wells. Four of these shippers are delivering production into the Blue Dolphin System and three of the shippers are delivering production into the GA 350 Pipeline. In 2006, one shipper began deliveries into the Blue Dolphin System in each of May, June and November, and in 2007, a shipper began deliveries from two wells in July. On the GA 350 Pipeline, shippers began deliveries in December 2006, and in June and September of 2007. Additionally, in July 2006, an existing shipper successfully recompleted a well, resulting in an increase of daily production from that well. In June 2007, another existing shipper drilled a well, also resulting in an increase of daily production. As a result, the Blue Dolphin System transported an average of 22.4 MMcf of gas per day during the first three quarters of 2007 as compared to 15.3 MMcf of gas per day during the first three quarters of 2006. The GA 350 Pipeline transported an average of 20.3 MMcf of gas per day during the first three quarters of 2007 as compared to 8.3 MMcf of gas per day during the first three quarters of 2006.

The revenues from our working interest in High Island Block 37 are declining as the rate of production declines as expected from the remaining producing well. Daily production from High Island Block 37 has declined by approximately 55% since September 30, 2006 to approximately 2.5 MMcf of gas per day currently. We believe that production from the remaining High Island Block 37 well could continue into early 2008, however, the well could deplete faster than currently anticipated or could develop production problems resulting in the cessation of production. The High Island Block A-7 well is currently shut in and may have reached the end of its productive life. During the second quarter of 2007, a well in which we had previously earned a 2.5% working interest was drilled successfully in the High Island area. We do not yet know the level of production to expect from this well. We expect production to commence late in the fourth quarter 2007.

The net cash provided by or used in operating, investing and financing activities is summarized below:

	Nine Months Ended September 30, 2007 2006 (\$ in thousands)	
Net cash provided by (used in):		
Operating activities	\$ (408)	\$ 1,033
Investing activities	(24)	(287)
Financing activities		3,308
Net increase (decrease) in cash	\$ (432)	\$ 4,054

2. Commitments and Contingencies

Pursuant to the terms of an employment agreement effective May 1, 2007, we are obligated to pay a base salary of \$175,000 per year for the three-year term of the agreement.

From time to time we are involved in various claims and legal actions arising in the ordinary course of business. In our opinion, the ultimate disposition of these matters will not have a material adverse effect on our financial position, results of operations or cash flows.

3. Earnings per Share

We apply the provisions of Statement of Financial Accounting Standards No. 128, *Earnings per Share* (SFAS 128). SFAS 128 requires the presentation of basic earnings per share (EPS) which excludes the dilutive effect of securities or contracts to issue common stock, and is computed by dividing net income (loss) available to common stockholders by the weighted-average number of shares of common stock outstanding for the period. SFAS 128 requires dual presentation of basic EPS and diluted EPS on the face of the income statement and requires a reconciliation of the numerators and denominators of basic EPS and diluted EPS. Diluted EPS is computed by dividing net income (loss) available to common stockholders by the diluted weighted average number of shares of common stock outstanding, which includes the potential dilution that could occur if securities or other contracts to issue common stock were converted to common stock that then shared in the earnings of the entity.

Employee stock options and stock warrants outstanding were not included in the computation of diluted earnings per share for the three and nine months ended September 30, 2007 because their assumed exercise and conversion would have an antidilutive effect on the computation of diluted loss per share.

5. Stock-Based Compensation

Effective April 14, 2000, after approval by our stockholders, we adopted the 2000 Stock Incentive Plan (the "2000 Plan"). Under the 2000 Plan, we are able to make awards of stock-based compensation. The number of shares of common stock reserved for grants of incentive stock options ("ISOs") and other stock based awards was increased from 650,000 shares to 1,200,000 shares after approval by our stockholders at the 2007 Annual Meeting of Stockholders, which was held on May 30, 2007. As of September 30, 2007, we had granted 750,460 stock options under the 2000 Plan since its adoption. In October 2007, we granted 178,500 stock options, leaving 271,040 shares of common stock remaining available for future grants. Options granted under the 2000 Plan have contractual terms from six to ten years. The exercise price of ISOs cannot be less than 100% of the fair market value of a share of our common stock determined on the grant date. All ISO awards granted in previous years vested immediately, however, 200,000 ISOs granted in 2007 have a three year vesting period and 150,000 ISOs also granted in October 2007 have a two year vesting period. Although the 2000 Plan provides for the granting of other incentive awards, only ISOs and non-statutory stock options have been issued under the 2000 Plan. The 2000 Plan is administered by the Compensation Committee of our Board of Directors.

Effective January 1, 2006, we adopted Statement of Financial Accounting Standards No. 123 (Revised), *Share-Based Payments* ("SFAS 123(R)") utilizing the modified prospective approach. Prior to the adoption of SFAS 123(R) we accounted for stock option grants in accordance with APB Opinion No. 25, *Accounting for Stock Issued to Employees* (the intrinsic value method), and accordingly, recognized no compensation expense when stock options were granted with an exercise price equal to the fair market value of a share of our common stock on the grant date.

Under the modified prospective approach, SFAS 123(R) applies to new awards and to awards that were outstanding on January 1, 2006 that are subsequently modified, repurchased, or cancelled. Under the modified prospective approach, had there been any awards granted during 2006, and had there been awards granted prior to January 1, 2006 which were not yet fully vested, compensation expense recognized in 2006 would have included compensation cost for all share-based payments granted prior to, but not yet vested, based on the grant date fair value estimated in accordance with the original provisions of Statement of Financial Accounting Standards No. 123, *Accounting for Stock-Based Compensation*, and

Table of Contents

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS UNAUDITED
SEPTEMBER 30, 2007
CONTINUED

compensation cost for all share-based payments granted subsequent to January 1, 2006, based on the grant date fair value estimated in accordance with the provisions of SFAS 123(R). Prior periods were not restated to reflect the impact of adopting the new standard.

SFAS 123(R) states that a tax deduction is permitted for stock options exercised during the period, generally for the excess of the price at which stock issued from exercise of the options are sold over the exercise price of the options. Tax benefits are to be shown on the Statement of Cash Flows as financing cash inflows. Any tax deductions we receive from the exercise of stock options for the foreseeable future will be applied to the valuation allowance in determining our net operating loss carryforward.

Additionally, we utilized the alternate transition method (simplified method) for calculating the beginning balance in the pool of excess tax benefits in accordance with FASB Staff Position FAS123(R)-3, *Transition Election Related to Accounting for the Tax Effects of Share-Based Payment Awards*.

Pursuant to SFAS 123(R), we estimate the fair value of stock options granted on the date of grant using the Black-Scholes-Merton option-pricing model. The following assumptions were used to determine the fair value of stock options granted during the nine months ended September 30, 2007. There were no stock options granted during the nine months ended September 30, 2006.

	Nine Months Ended September 30,	
	2007	2006
Stock options granted	200,000	0
Risk-free interest rate	4.80%	N/A
Expected term, in years	5.97	N/A
Expected volatility	92.4%	N/A
Dividend yield	0.00%	0.00%

Expected volatility used in the model is based on the historical volatility of our common stock and is weighted 50% for the historical volatility over a period equal to the expected term and 50% for the historical volatility over the past two years prior to the grant date. This weighting method was chosen to account for the significant changes in our financial condition beginning approximately two years ago. These changes include the improvement in our working capital, improved pipeline throughput and the reduction and ultimate elimination of our outstanding debt.

The expected term of options granted used in the model represents the period of time that options granted are expected to be outstanding. The method used to estimate the expected term is the simplified method as allowed under the provisions of the Securities and Exchange Commission's Staff Accounting Bulletin No. 107. This number is calculated by taking the average of the sum of the vesting period and the original contract term. The risk-free interest rate for periods within the contractual life of the option is based on the U.S. Treasury yield curve in effect at the date of the grant. As we have not declared dividends on our common stock since we became a public entity, no dividend yield was used. No forfeiture rate was assumed due to the forfeiture history for this type of award. Actual value realized, if any, is dependent on the future performance of our common stock and overall stock market conditions. There is no assurance that the value realized by an optionee will be at or near the value estimated by the Black-Scholes-Merton option-pricing model.

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS UNAUDITED
SEPTEMBER 30, 2007
CONTINUED

At September 30, 2007, there were a total of 343,997 shares of common stock reserved for issuance upon exercise of outstanding options under the 2000 Plan. A summary of the status of our stock options granted to key employees, officers and directors, for the purchase of shares of common stock, is as follows:

	Shares	Nine Months Ended September 30, 2007		
		Weighted Average Exercise Price	Weighted Average Remaining Contractual Life	Aggregate Intrinsic Value
Options outstanding at the beginning of the period	143,997	\$ 1.56		
Options granted	200,000	\$ 3.03		
Options exercised		\$ 0.00		
Options expired or cancelled		\$ 0.00		
Options outstanding at the end of the period	343,997	\$ 2.41	7.8	\$318,843
Options exercisable at the end of the period	143,997	\$ 1.56	5.3	\$292,843

The following summarizes the net change in non-vested stock options for the nine months ended September 30, 2007:

	Shares	Weighted Average Grant Date Fair Value
Nonvested at January 1, 2007		\$0.00
Granted	200,000	\$2.35
Canceled or expired		\$0.00
Vested		\$0.00
Nonvested at September 30, 2007	200,000	\$2.35

As of September 30, 2007, there was \$416,640 of unrecognized compensation cost related to 200,000 nonvested stock options granted in 2007 under the existing stock incentive plan, the 2000 Plan. This cost is expected to be recognized on a straight line basis over a period of 31 months, which is the remaining vesting period. Stock options granted in October 2007 resulted in additional unrecognized compensation cost of \$310,818 to be recognized beginning in the fourth quarter of 2007. Unrecognized compensation cost of \$254,910 will be recognized on a straight line basis over a vesting period of 24 months for 150,000 of the stock options granted and \$55,908 will be recognized in the fourth

quarter of 2007 due to immediate vesting of 28,500 of the stock options granted.

6. Warrants

In March and April 2006, we completed private placements for shares of our common stock and we issued warrants to purchase an aggregate of 32,572 shares of common stock. These warrants were immediately exercisable upon issuance.

These issuances were accounted for pursuant to SFAS 123(R) and Emerging Issues Task Force No. 00-18, *Accounting Recognition for Certain Transactions Involving Equity Instruments Granted to Other Than Employees* using the Black-Scholes-Merton option-pricing model. A fair value of approximately \$69,000 was netted against the gross proceeds of the private placements as a direct offering cost.

At September 30, 2007, the range of warrant prices for shares of common stock underlying the warrants and the weighted-average remaining contractual life was as follows:

Warrants Outstanding, Fully Vested and Exercisable at
September 30, 2007

Number Outstanding	Weighted Average Exercise Price	Weighted Average Remaining Contractual Life in Years
16,440	\$5.88	1.4

The 8,572 warrants issued in March 2006 with the first private placement were exercised in 2006 at a price of \$1.93 per share. The warrants outstanding represent the unexercised portion of 24,000 warrants issued in the second private placement in April 2006, of which 7,560 of the warrants were exercised in 2006 at an exercise price of \$5.39 per share. The exercise price varies based on the following conditions: (i) until the later of the registration of the warrants or one year from the issue date, 110% of the purchase price of \$4.90 per share; (ii) from the later of (x) the registration of the warrants or (y) one year, until two years from the issue date, 120% of the purchase price of \$4.90 per share; and (iii) after the expiration of two years from the issue date of the warrants, 130% of the purchase price of \$4.90 per share.

7. Recent Accounting Developments

In February 2007, the Financial Accounting Standards Board (the FASB) issued FASB Statement No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115* (SFAS 159). This standard permits an entity to choose to measure many financial instruments and certain other items at fair value. Most of the provisions in SFAS 159 are elective; however, the amendment to FASB Statement No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, applies to all entities with available-for-sale and trading securities. The FASB's stated objective in issuing this standard is as follows: to improve financial reporting by providing entities with the opportunity to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions.

Table of Contents

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS UNAUDITED
SEPTEMBER 30, 2007
CONTINUED

The fair value option established by SFAS 159 permits all entities to choose to measure eligible items at fair value at specified election dates. A business entity will report unrealized gains and losses on items for which the fair value option has been elected in earnings (or another performance indicator if the business entity does not report earnings) at each subsequent reporting date. The fair value option: (i) may be applied instrument by instrument, with a few exceptions, such as investments otherwise accounted for by the equity method; (ii) is irrevocable (unless a new election date occurs); and (iii) is applied only to instruments and not to portions of instruments.

SFAS 159 is effective as of the beginning of an entity's first fiscal year that begins after November 15, 2007. Early adoption is permitted as of the beginning of the previous fiscal year provided that the entity makes that choice in the first 120 days of that fiscal year and also elects to apply the provisions of FASB Statement No. 157, *Fair Value Measurements* (SFAS 157). We are currently assessing the impact of SFAS 159 on our consolidated financial statements.

In September 2006, SFAS 157 was issued by the FASB. This new standard provides guidance for using fair value to measure assets and liabilities. The FASB believes the standard also responds to investors' requests for expanded information about the extent to which companies measure assets and liabilities at fair value, the information used to measure fair value and the effect of fair value measurements on earnings. SFAS 157 applies whenever other standards require (or permit) assets or liabilities to be measured at fair value but does not expand the use of fair value in any new circumstances.

Currently, over 40 accounting standards within GAAP require (or permit) entities to measure assets and liabilities at fair value. Prior to SFAS 157, the methods for measuring fair value were diverse and inconsistent, especially for items that are not actively traded. The standard clarifies that for items that are not actively traded, such as certain kinds of derivatives, fair value should reflect the price in a transaction with a market participant, including an adjustment for risk, not just the company's mark-to-model value. SFAS 157 also requires expanded disclosure of the effect on earnings for items measured using unobservable data.

Under SFAS 157, fair value refers to the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants in the market in which the reporting entity transacts. In this standard, FASB clarifies the principle that fair value should be based on the assumptions market participants would use when pricing the asset or liability. In support of this principle, SFAS 157 establishes a fair value hierarchy that prioritizes the information used to develop those assumptions. The fair value hierarchy gives the highest priority to quoted prices in active markets and the lowest priority to unobservable data, for example, the reporting entity's own data. Under the standard, fair value measurements would be separately disclosed by level within the fair value hierarchy.

The provisions of SFAS 157 are effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. Earlier application is encouraged, provided that the reporting entity has not yet issued financial statements for that fiscal year, including any financial statements for an interim period within that fiscal year. We are currently assessing the impact of SFAS 157 on our financial statements.

In July 2006, FASB Interpretation No. 48, *Accounting for Uncertainty in Income Taxes-An Interpretation of FASB Statement No. 109* (FIN 48), was issued. FIN 48 clarifies the accounting for uncertainty in income taxes recognized in an enterprise's financial statements in accordance with FASB Statement No. 109, *Accounting for Income Taxes* (SFAS 109). FIN 48 also prescribes a recognition threshold and measurement attribute for the financial statement recognition and measurement of a tax position taken or

Table of Contents

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS UNAUDITED
SEPTEMBER 30, 2007
CONTINUED

expected to be taken in a tax return. The new FASB standard also provides guidance on derecognition, classification, interest and penalties, accounting in interim periods, disclosure, and transition.

The evaluation of a tax position in accordance with FIN 48 is a two-step process. The first step is a recognition process whereby the enterprise determines whether it is more likely than not that a tax position will be sustained upon examination, including resolution of any related appeals or litigation processes, based on the technical merits of the position. In evaluating whether a tax position has met the more-likely-than-not recognition threshold, the enterprise should presume that the position will be examined by the appropriate taxing authority that has full knowledge of all relevant information. The second step is a measurement process whereby a tax position that meets the more-likely-than-not recognition threshold is calculated to determine the amount of benefit to recognize in the financial statements. The tax position is measured at the largest amount of benefit that is greater than 50% likely of being realized upon ultimate settlement.

The provisions of FIN 48 are effective for fiscal years beginning after December 15, 2006. Earlier application is permitted as long as the enterprise has not yet issued financial statements, including interim financial statements, in the period of adoption. The provisions of FIN 48 are to be applied to all tax positions upon initial adoption of this standard. Only tax positions that meet the more-likely-than-not recognition threshold at the effective date may be recognized or continue to be recognized upon adoption of FIN 48. The cumulative effect of applying the provisions of FIN 48 should be reported as an adjustment to the opening balance of retained earnings (or other appropriate components of equity or net assets in the statement of financial position) for that fiscal year.

The provisions of FIN 48 have been applied to all of our material tax positions taken through the date of adoption and during the interim quarterly period ended September 30, 2007. We have determined that all of our material tax positions taken in our income tax returns and the positions we expect to take in our future income tax filings meet the more likely-than-not recognition threshold prescribed by FIN 48. In addition, we have determined that, based on our judgment, none of these tax positions meet the definition of uncertain tax positions that are subject to the non-recognition criteria set forth in the new pronouncement.

In May 2006, the State of Texas enacted a new business tax that is imposed on gross revenues to replace the State's current franchise tax regime. The new legislation's effective date is January 1, 2008, which means that our first Texas margins tax (TMT) return will not become due until May 15, 2008 and will be based on our 2007 operations. Although the TMT is imposed on an entity's gross revenues rather than on its net income, certain aspects of the tax make it similar to an income tax. In accordance with the guidance provided in SFAS 109, we have properly determined the impact of the newly-enacted legislation in the determination of our reported state current and deferred income tax liability.

On September 13, 2006, the SEC staff issued Staff Accounting Bulletin No. 108, which adds Section N to Topic 1, Financial Statements *Considering the Effects of Prior Year Misstatements when Quantifying Misstatements in Current Year Financial Statements* (SAB 108). The SEC staff provides guidance on how prior year misstatements should be taken into consideration when quantifying misstatements in current year financial statements for the purposes of determining whether the current year's financial statements are materially misstated. In providing this guidance, the SEC staff references both the iron curtain and rollover approaches to quantifying a current year misstatement for purposes of determining its materiality. The iron curtain approach focuses on how the current year's balance sheet would be affected in correcting a misstatement without considering the year(s) in which the misstatement originated. The rollover approach focuses on the amount of the misstatement that originated in the

Table of Contents

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS UNAUDITED
SEPTEMBER 30, 2007
CONTINUED

current year's income statement. The SEC staff indicates in SAB 108 that registrants must quantify the impact of correcting all misstatements, including both the carryover and reversing effects of prior year misstatements, on the current year financial statements. In other words, both the iron curtain approach and rollover approach should be used in assessing the materiality of a current year misstatement. SAB 108 provides that once a current year misstatement has been quantified, the guidance in Staff Accounting Bulletin No. 99, Section M, Topic 1, Financial Statements Materiality (SAB 99), should be applied to determine whether the misstatement is material and should result in an adjustment to the financial statements.

If correcting a misstatement in the current year would materially misstate the current year's income statement, the SEC staff indicates that the prior year financial statements should be adjusted. In addition, adjusting for one misstatement in the current year may alter the amount of the misstatement attributable to prior years that exists in the current year's financial statements. If adjusting for the resultant misstatement is material to the current year's financial statements, the SEC staff again indicates that the prior year financial statements should be adjusted. These adjustments to prior year financial statements are necessary even though such adjustments were appropriately viewed as immaterial in the prior year. In making these adjustments, previously filed reports do not need to be amended. Instead, the adjustments should be reflected the next time the registrant would otherwise be filing those prior year financial statements. It should be noted that if, in the current year, a registrant identifies a misstatement in the prior year financial statements and determines that the misstatement is material to those prior year financial statements, the registrant would be required to restate for the material misstatement in accordance with FASB Statement No. 154, *Accounting Changes and Error Corrections* (SFAS 154).

If a registrant has historically been using either the iron curtain approach or the rollover approach and, upon application of the guidance of SAB 108, determines that there is a material misstatement in its financial statements, the SEC staff will not require the registrant to restate its prior year financial statements provided that: (a) management properly applied the approach it previously used as its accounting policy and (b) management considered all relevant qualitative factors in its materiality assessment. If the registrant does not elect to restate its financial statements for the material misstatements that arise in connection with application of the guidance in SAB 108, then for fiscal years ending after November 15, 2006, it must recognize the cumulative effect of applying SAB 108 in the current year beginning balances of the affected assets and liabilities with a corresponding adjustment to the current year opening balance in retained earnings. Certain disclosures are required in this situation. SAB 108 provides additional transition guidance if it is adopted early in an interim period. The adoption of SAB 108 did not have a material effect on our consolidated financial statements.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OR PLAN OF OPERATION

Cautionary Statements

Certain of the statements included in this quarterly report on Form 10-QSB, including those regarding future financial performance or results or that are not historical facts, are forward-looking statements as that term is defined in Section 21E of the Securities Exchange Act of 1934, as amended, and Section 27A of the Securities Act of 1933, as amended. The words expect, plan, believe, anticipate, project, estimate, and similar expressions are intended to identify forward-looking statements. Blue Dolphin Energy Company (referred to herein, with its predecessors and subsidiaries, as Blue Dolphin, we, us and our) cautions readers that these statements are not guarantees of future performance or events and such statements involve risks and uncertainties that may cause actual results and outcomes to differ materially from those indicated in forward-looking statements. Some of the important factors, risks and uncertainties that could cause actual results to vary from forward-looking statements include:

- § the level of utilization of our pipelines;
- § availability and cost of capital;
- § actions or inactions of third party operators for properties where we have an interest;
- § the risks associated with exploration;
- § the level of production from oil and gas properties;
- § oil and gas price volatility;
- § uncertainties in the estimation of proved reserves and in the projection of future rates of production and timing of development expenditures;
- § regulatory developments; and
- § general economic conditions.

Additional factors that could cause actual results to differ materially from those indicated in the forward-looking statements are discussed under the caption Risk Factors in our annual report on Form 10-KSB for the year ended December 31, 2006. Readers are cautioned not to place undue reliance on these forward-looking statements which speak only as of the date thereof. We undertake no duty to update these forward-looking statements. Readers are urged to carefully review and consider the various disclosures made by us which attempt to advise interested parties of the additional factors which may affect our business, including the disclosures made under the caption Management's Discussion and Analysis or Plan of Operation in this report.

Executive Summary

We are engaged in two lines of business: (i) provision of pipeline transportation services to producers/shippers, and (ii) oil and gas exploration and production. We conduct our operations through our subsidiaries. Our assets are located offshore and onshore in the Texas Gulf Coast area. Our goal is to create greater long-term value for our stockholders by increasing the utilization of our existing pipeline assets and acquiring additional strategic assets to diversify our asset base and improve our competitive position. Although we are primarily focused on acquisitions of pipeline assets, we will also continue to review and evaluate opportunities to acquire oil and gas properties.

Through the first three quarters of 2007 we have benefited from an increase in revenues from our pipeline operations resulting from the commencement of deliveries of production from shippers on both the Blue Dolphin System and the GA 350 Pipeline during 2006 and 2007. The level of throughput on the Blue Dolphin System has increased due to the addition of three shippers during 2006 and one shipper in July 2007. The shipper that commenced deliveries in July 2007 represented production from two wells. The GA 350 Pipeline throughput has also increased from the

addition of one shipper in 2006 and two shippers

Table of Contents

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES

in 2007. Shippers commenced deliveries on the GA 350 Pipeline in June 2007 and September 2007. The Blue Dolphin System is currently transporting an aggregate of approximately 27 MMcf of gas per day from ten shippers and the GA 350 Pipeline is currently transporting an aggregate of approximately 35 MMcf of gas per day from six shippers. Production and resulting revenues from our interests in wells in the High Island area have declined as reserves have been depleted. In High Island Block 37, one of the two wells shut in during April 2007 and production from that well has not been re-established. High Island Block 37 is currently producing approximately 2.5 MMcf of gas per day from one well. The High Island Block A-7 well experienced production difficulties during the second quarter of 2007. It has produced only intermittently since late-April and is currently shut in. Production data had previously indicated that the well was nearing the end of its productive life and this point may now have been reached. During the second quarter, a well in which we had previously earned a 2.5% working interest was drilled successfully in the High Island area. We do not yet know the level of production to expect from this well. We expect production to commence late in the fourth quarter 2007.

Despite the recent throughput gains, our pipeline assets remain significantly under-utilized. The Blue Dolphin System is currently operating at approximately 17% of capacity, the GA 350 Pipeline is currently operating at approximately 55% of capacity and the Omega Pipeline is inactive. Production declines, temporary stoppages or cessations of production from wells tied into our pipelines or from the High Island Block 37 well could have a material adverse effect on our cash flows and liquidity if the resulting revenue declines are not offset by revenues from other sources. Due to our small size, geographically concentrated asset base and limited capital resources, any negative event has the potential to have a significant adverse impact on our financial condition. We are continuing our efforts to increase the utilization of our existing assets and acquire additional assets that will diversify the risks to our cash flows and be accretive to earnings.

Liquidity and Capital Resources

At the end of the third quarter 2007, we had working capital of approximately \$5.6 million compared to approximately \$6.7 million at the end of 2006. At the end of the third quarter of 2006, working capital was approximately \$5.9 million. The increase in working capital during 2006 was primarily the result of net proceeds of \$3.8 million received from two private placements that were completed in March and April of 2006, revenues from oil and gas sales and increased revenues from our pipeline operations. Working capital at the end of the third quarter of 2007 reflects the impact of significantly reduced revenues from sales of oil and gas, partially offset by increased revenues from our pipeline operations.

Remainder of Page Intentionally Left Blank

Table of Contents**BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES**

The following table summarizes our financial position for the periods indicated (in thousands):

	September 30, 2007		December 31, 2006	
	Amount	%	Amount	%
Working capital	\$ 5,591	55	\$ 6,652	57
Property and equipment, net	4,512	45	4,912	43
Other noncurrent assets	11	0	22	
 Total	 \$ 10,114	 100	 \$ 11,586	 100
 Long-term liabilities	 \$ 1,771	 18	 \$ 2,014	 17
Stockholders' equity	8,343	82	9,572	83
 Total	 \$ 10,114	 100	 \$ 11,586	 100

Throughput on the Blue Dolphin System and the GA 350 Pipeline increased significantly during 2006 and 2007 as a result of production from seven shippers commencing deliveries from eight wells. Four of these shippers are delivering production into the Blue Dolphin System and three of the shippers are delivering production into the GA 350 Pipeline. In 2006, one shipper began deliveries into the Blue Dolphin System in each of May, June and November, and in 2007, a shipper began deliveries from two wells in July. On the GA 350 Pipeline, shippers began deliveries in December 2006, and in June and September of 2007. Additionally, in July 2006, an existing shipper successfully recompleted an existing well, resulting in an increase of daily production from that well. In June 2007, another existing shipper drilled a new well, also resulting in an increase of daily production.

We have significant available capacity on the Blue Dolphin System and the inactive Omega Pipeline and available capacity on the GA 350 Pipeline. We believe that the pipelines are in geographic market areas that are of interest to oil and gas operators. This assessment is based on leasing activity and information obtained directly from the operators of properties near our pipelines.

The average rates of throughput on the Blue Dolphin System and the GA 350 Pipeline during the first nine months of 2007 were significantly higher than the first half of 2006, however, the level of utilization of these pipelines is significantly below maximum capacity. The Blue Dolphin System is currently operating at approximately 17% of capacity, the GA 350 Pipeline is currently operating at approximately 55% of capacity and the Omega Pipeline is inactive. The Blue Dolphin System transported an average of 22.4 MMcf of gas per day during the first three quarters of 2007 as compared to 15.3 MMcf of gas per day during the first three quarters of 2006. The GA 350 Pipeline transported an average of 20.3 MMcf of gas per day during the first three quarters of 2007 as compared to 8.3 MMcf of gas per day during the first three quarters of 2006. Year to date revenues from pipeline operations increased to \$1,808,693 in 2007 as compared to \$1,342,699 in 2006, due to the higher volumes.

Our financial condition continues to be adversely affected by the low utilization of our pipeline assets. Ultimately, the future utilization of our pipelines and related facilities will depend upon the success of drilling programs around our pipelines, as well as attraction and retention of producers/shippers to the pipeline systems. If we are successful in our efforts to attract additional reserves to our pipelines, we would gain additional throughput, resulting in additional revenues. Additional throughput will be required to offset the natural decline in throughput from existing wells as reserves are depleted.

Table of Contents**BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES**

The revenues from our working interest in High Island Block 37 are declining as the rate of production declines as expected from the remaining producing well. Daily production from High Island Block 37 has declined by approximately 55% since September 30, 2006. We believe that production could continue into early 2008, however, the well could deplete faster than currently anticipated or could develop production problems resulting in the cessation of production. The High Island Block A-7 well is currently shut in and may have reached the end of its productive life. During the second quarter, a well in which we had previously earned a 2.5% working interest was drilled successfully in the High Island area. We do not yet know the level of production to expect from this well. We expect production to commence late in the fourth quarter 2007. Without the revenues and resulting cash inflows we receive from oil and gas sales, we may not be able to generate sufficient cash from operations to cover our operating and general and administrative expenses.

We recognized gross oil and gas sales revenues of approximately \$242,000 and \$761,000 for the nine months ended September 30, 2007 and 2006, respectively, associated with our 2.8% contractual working interest in two wells in High Island Block 37. One High Island Block 37 well is currently producing at a rate of approximately 2.5 MMcf of gas per day and the second well is shut in. We recognized gross oil and gas sales revenues of approximately \$211,000 and \$1,152,000 for the nine months ended September 30, 2007 and 2006, respectively, associated with our approximate 8.9% working interest in the High Island Block A-7 well. The High Island A-7 well has produced only intermittently since April 2007.

The following table summarizes certain of our contractual obligations and other commercial commitments at September 30, 2007 (in thousands):

	Total	Payments Due by Period			5 Years or More
		1 Year or Less	1-3 Years	3-5 Years	
Operating leases	\$ 409	\$ 103	\$ 306	\$	\$
Employment agreement	452	175	277		
Asset retirement obligations	2,029	258	87		1,684
 Total contractual obligations and other commercial commitments	 \$ 2,890	 \$ 536	 \$ 670	 \$	 \$ 1,684

Results of Operations

For the three months ended September 30, 2007 (the current quarter), we reported a net loss of \$238,148 compared to net income of \$159,930 for the three months ended September 30, 2006 (the previous quarter). For the nine months ended September 30, 2007 (the current period), we reported a net loss of \$1,341,821 compared to net income of \$364,990 for the nine months ended September 30, 2006 (the previous period).

Table of Contents

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES

Three Months Ended September 30, 2007 Compared to Three Months Ended September 30, 2006

Revenue from Pipeline Operations. Revenues from pipeline operations increased by \$94,094, or 15%, in the current quarter to \$717,118. Revenues in the current quarter from the Blue Dolphin System totaled approximately \$612,000 compared to approximately \$583,000 in the previous quarter primarily as a result of throughput from one new shipper who began deliveries in the current quarter. Daily gas volumes transported on the Blue Dolphin System averaged approximately 25 MMcf of gas per day in the current quarter compared to approximately 23 MMcf of gas per day in the previous quarter. Revenues on the GA 350 Pipeline increased by approximately \$65,000 to approximately \$105,000 in the current quarter due to an increase in average daily gas volumes transported to approximately 23 MMcf of gas per day in the current quarter from approximately 8 MMcf of gas per day in the previous quarter.

Revenue from Oil and Gas Sales. Revenues from oil and gas sales decreased by \$377,214, or 85%, to \$68,470 in the current quarter due to the natural decline in the rate of production from High Island Block 37 and the cessation of production from High Island Block A-7. Revenue breakdown for the current quarter by field was \$67,872 for High Island Block 37 and \$598 for High Island Block A-7. The sales mix by product was 98% gas and 2% condensate and natural gas liquids. Our average realized gas price per Mcf in the current quarter was \$6.32 compared to \$5.52 in the previous quarter. Our average realized price per barrel of condensate was \$70.82 in the current quarter compared to \$68.45 in the previous quarter.

Pipeline Operating Expenses. Pipeline operating expenses increased by \$41,777 to \$349,293 in the current quarter. The increase was due primarily to an increase in insurance expense of approximately \$70,000, offset by decreases in consulting fees of approximately \$20,000 and contract labor costs of approximately \$15,000.

Lease Operating Expenses. Lease operating expenses decreased \$22,684 in the current quarter to \$91,202 primarily due to the cessation of production at High Island Block A-7.

Depletion, Depreciation and Amortization. Depletion, depreciation and amortization expense increased by \$16,472 in the current quarter to \$134,041. Depreciation associated with estimated dismantlement costs increased by approximately \$21,000 due to an increase in asset retirement obligations.

General and Administrative Expenses. General and administrative expenses increased \$91,192 in the current quarter to \$480,197 primarily due to an increase in officer and employee salaries of approximately \$67,000 and approximately \$40,000 in non-cash compensation expense associated with 2007 stock option grants. Also, employee insurance costs increased approximately \$24,000 and office rent increased approximately \$13,000. These increases were partially offset by decreases in consulting costs of approximately \$48,000 and legal fees of approximately \$20,000.

Interest and Other Income. Interest and other income increased \$15,718 in the current quarter due to an increase in the interest rate earned on money market funds from the prior quarter.

Nine Months Ended September 30, 2007 Compared to Nine Months Ended September 30, 2006

Revenue from Pipeline Operations. Revenues from pipeline operations increased by \$465,994, or 35%, in the current period to \$1,808,693. Revenues in the current period from the Blue Dolphin System totaled approximately \$1,548,000 compared to approximately \$1,223,000 in the previous period primarily as a result of throughput from three new shippers in 2006, one new shipper in 2007 and a new well drilled by an existing shipper in 2007. Daily gas volumes transported through the Blue Dolphin System averaged approximately 22 MMcf of gas per day in the current period compared to approximately 15 MMcf of gas

Table of Contents

BLUE DOLPHIN ENERGY COMPANY AND SUBSIDIARIES

per day in the previous period. Revenues on the GA 350 Pipeline increased by approximately \$141,000 to approximately \$261,000 in the current period primarily due to an increase in average daily gas volumes transported to approximately 20 MMcf of gas per day in the current period from approximately 8 MMcf of gas per day in the previous period.

Revenue from Oil and Gas Sales. Revenues from oil and gas sales decreased by \$1,460,284, or 76%, to \$452,818 in the current period. High Island Block A-7 ceased production in the current period and one well at High Island Block 37 ceased production in the current period, leaving one producing well. Revenues were also negatively affected by a decrease in the realized price of natural gas. Revenue breakdown for the current period by field was approximately \$211,000 for High Island Block A-7 and \$242,000 for High Island Block 37. The sales mix by product was 91% gas and 9% condensate and natural gas liquids. Our average realized gas price per Mcf in the current period was \$6.63 compared to \$7.83 in the previous period. Our average realized price per barrel of condensate was \$56.01 in the current period compared to \$64.59 in the previous period.

Pipeline Operating Expenses. Pipeline operating expenses increased by \$598,036 to \$1,428,156 in the current period. This increase was due primarily to costs of approximately \$154,000 to repair a pipeline leak in January 2007, approximately \$159,000 to repair the compressor at Platform C in Galveston Area Block 288, approximately \$55,000 for painting and repairs to the office, buildings and barge dock at the Freeport facility, increased insurance costs of approximately \$124,000 due to higher renewal rates and increased legal fees of approximately \$45,000. The legal fees are primarily associated with an action filed against us, the outcome of which we do not believe will have a material impact.

Lease Operating Expenses. Lease operating expenses decreased \$80,726 in the current period to \$248,984 primarily due to the cessation of production at High Island Block A-7.

Depletion, Depreciation and Amortization. Depletion, depreciation and amortization expense increased by \$78,391 in the current period to \$423,420. Depreciation associated with estimated dismantlement costs increased by approximately \$63,000 due to an increase in asset retirement obligations.

General and Administrative Expenses. General and administrative expenses increased \$241,722 in the current period to \$1,600,389 primarily due to increased employee-related expenses of approximately \$284,000 associated with a staff addition, salary increases, officer bonuses of \$60,000, 401(K) matching of approximately \$23,000, increased employee health benefits expense of approximately \$58,000 and approximately \$54,000 in non-cash compensation expense associated with 2007 stock option grants. Accounting-related expenses increased approximately \$67,000 primarily due to Sarbanes-Oxley compliance work. These increases were partially offset by decreased legal fees of approximately \$79,000 and consulting fees of approximately \$114,000.

Interest and Other Expense. Interest and other expense decreased \$31,805 in the current period to \$0 due to the elimination of our outstanding debt.

Interest and Other Income. Interest and other income increased \$104,940 in the current period due to an increase in money market funds and an increase in the interest rate earned on those funds.

ITEM 3. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

As of the end of the period covered by this report, we carried out an evaluation under the supervision and with the participation of our management, including our Chief Executive Officer and Principal Accounting and Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act). Based upon this evaluation, as of September 30, 2007, the Chief Executive Officer and Principal Accounting and Financial Officer concluded that our disclosure controls and procedures were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act, are recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms and that such information is accumulated and communicated to our management, including the Chief Executive Officer and Principal Accounting and Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls Over Financial Reporting

There have been no changes in our internal controls over financial reporting during the period covered by this report that have materially affected, or that are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

From time to time we are involved in various claims and legal actions arising in the ordinary course of business. In our opinion, the ultimate disposition of these matters will not have a material effect on our financial position, results of operations or cash flows.
