Prospectus Supplement to Prospectus Dated February 11, 2003

3,556,895 Shares

NN, INC.

Common Stock

The selling stockholders identified in this prospectus supplement are selling 3,556,895 shares of our common stock, par value \$.01 per share. We will not receive any of the proceeds from the sale of the shares by the selling stockholders.

You should read this prospectus supplement, the accompanying prospectus and the documents that are incorporated by reference in this prospectus supplement and the accompanying prospectus carefully before investing.

Our common stock is quoted on the Nasdaq National Market under the symbol NNBR. On May 12, 2003, the last sale price of the common stock as reported on the Nasdaq Stock Market was \$10.74.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

Investing in our common stock involves risks. See Risk Factors beginning on page S-8 of this prospectus supplement to read about the risks you should consider before buying our common stock.

	<u>Per Share</u>		<u>Total</u>
Public offering price	\$ 10.37	\$	36,885,001
Underwriting discount	\$.60	\$	2,134,137
Proceeds to the selling stockholders, before expenses	\$ 9.77	\$	34,750,864

The Company has granted the underwriters an option to purchase up to 533,600 additional shares of common stock to cover over-allotments. If the over-allotment option is exercised in full, the Company will receive proceeds, before expenses, of \$9.77 per share and \$5,213,272 in total.

We expect that the common stock will be ready for delivery on or about May 16, 2003.

McDonald Investments Inc. Legg Mason Wood Walker

PROSPECTUS SUPPLEMENT SUMMARY

*This prospectus supplement summary highlights certain information contained elsewhere or incorporated by reference in this prospectus supplement and accompanying prospectus. This summary does not contain all of the information that you should consider before deciding to invest in our common stock. If there is any inconsistency between the information in this prospectus supplement and the accompanying prospectus, you should rely on the information in this prospectus supplement. You should read both this prospectus supplement and the accompanying prospectus together with additional information described below under the heading *Where You Can Find More Information*.*

*As used in this prospectus supplement and the accompanying prospectus, the terms *we, us, our, NN or the Company*, refer collectively to NN, Inc. and its subsidiaries, including Industrial Molding Group, L.P., The Delta Rubber Company, NN Arté S. De R.L. De C.V., NN Euroball, ApS (Euroball) and NN Netherlands B.V.*

The Company

NN manufactures and supplies high precision bearing components, consisting of balls, rollers, seals and retainers, for leading bearing manufacturers on a global basis. We are the leading independent manufacturer of precision steel bearing balls for the North American and European markets. In 1998, we began implementing a strategic plan designed to position us as a worldwide supplier of a broad line of bearing components. Through a series of acquisitions executed as part of that plan, we have built on our strong core ball business and greatly expanded our bearing component product offering. Today, we offer the industry's most complete line of bearing components. We emphasize engineered products that take advantage of our competencies in product design and high tolerance manufacturing processes. Our bearing customers use our components in fully assembled ball and roller bearings, which serve a wide variety of industrial applications in the transportation, electrical, agricultural, construction, machinery, mining and aerospace markets.

Our bearing component products presently account for approximately 90% of our consolidated revenue and sales of high precision plastic products account for the balance. We estimate that the size of the global market for balls, rollers, seals and retainers is \$3.2 billion. Captive component production of bearing manufacturers accounts for approximately 53% of this market, while independent manufacturers currently serve approximately 47% of the market. We believe that we are a leader in the independent manufacturers segment of the market with a 17% market share. We also believe that the percentage of the market served by independent manufacturers is growing due to the ongoing component outsourcing trend among our major customers. Outsourcing components enables our global bearing customers to focus on their core competencies in the design and engineering of finished bearing technologies. In addition, it provides them with significant financial advantages, including lower long-term component costs and improved returns on invested capital.

We intend to continue to capitalize on this growing trend of outsourcing within our global bearing customer base. Our successes include joining with our two largest bearing customers, SKF and INA/FAG, to create our majority-owned subsidiary, Euroball, which is now wholly-owned by us. In forming Euroball, we contributed our Ireland ball manufacturing facility, while SKF and INA/FAG contributed their captive ball manufacturing facilities in Italy and Germany. On December 20, 2002, we purchased all of INA/FAG's interest in Euroball and on May 2, 2003, we purchased all of SKF's interest in Euroball to become the sole owner of Euroball. Also, on May 2, 2003, we purchased certain component manufacturing operations of SKF in Veenendaal, The Netherlands. These transactions are described in the Section entitled *Recent Developments* beginning on page S-2. Both SKF and INA/FAG independently entered into long-term supply agreements designating Euroball as their primary supplier of ball products in Europe. Through Euroball, we are Europe's leading provider of precision balls. Separately, as part of the Veenendaal transaction, SKF entered into a long-term supply agreement to purchase tapered rollers and metal cage products from us.

Edgar Filing: NN INC - Form 424B5

We operate nine North American and European manufacturing facilities. Our two U.S. ball and roller production facilities are located in Tennessee and our Euroball subsidiary operates four manufacturing facilities located in The Netherlands, Ireland, Germany and Italy. Our seal, retainer and other plastic products are manufactured in three facilities located in Connecticut, Texas and Mexico.

S-1

Table of Contents

Recent Developments

Acquisitions and Financing Arrangements. On December 20, 2002, we acquired the 23% interest in Euroball held by INA/FAG. We paid approximately 13.4 million Euros (\$13.8 million) for INA/FAG's interest in Euroball. On May 2, 2003, we acquired the 23% interest in Euroball held by SKF. We paid approximately 13.8 million Euros (\$15.5 million) for SKF's interest in Euroball. Upon consummation of these transactions, we became the sole owner of Euroball.

On January 24, 2003, we exercised our call right to purchase the remaining 49% interest in NN Mexico, LLC. The transaction was consummated on April 1, 2003. The transaction is not expected to materially impact our financial condition or results of operations.

On May 2, 2003, we acquired the tapered roller and metal cage manufacturing operations of SKF in Veenendaal, The Netherlands for approximately 22.2 million Euros (\$25.0 million). This acquisition expands our current bearing component product offering, enabling us to further serve and bring additional value to our global bearing customers. In connection with this acquisition, SKF purchased 700,000 shares of our common stock from us for an aggregate purchase price of approximately \$6.2 million.

In connection with the purchase of SKF's Veenendaal component manufacturing operations and SKF's 23% interest in Euroball, on May 1, 2003, we entered into a new credit facility with AmSouth Bank, under which we borrowed \$60.4 million and 26.3 million Euros (\$29.6 million) to fund the SKF transactions described above. This new financing arrangement replaces our prior credit facility with AmSouth and Euroball's credit facility with HypoVereinsbank Luxembourg, S.A.

First Quarter Results of Operations. Net sales for the first quarter of 2003 reached \$57.6 million, up 22.1% from \$47.2 million for the same period of 2002. Net income for the first quarter of 2003 totaled \$3.6 million or \$0.23 per share as compared to \$1.8 million or \$0.12 per share for the first quarter of 2002.

The first quarter of 2003 represented the fourth consecutive quarter that we have experienced year-over-year improvement in revenues and earnings. However, it is important to note that approximately 50% of the \$10.4 million increase in revenues was attributable to favorable currency fluctuations. The remainder of the increase consists of overall improvements in demand and new program developments.

As a percentage of net sales, the gross profit margin was 25.8% in the first quarter of 2003 versus 24.7% in the first quarter of 2002 and 24.8% in the fourth quarter of 2002. This improvement over the prior year reflects the continuing benefit of the initiatives to lower our cost structure and the associated benefits of higher volumes and inventory builds. Similarly, selling, general and administrative expenses for the first quarter of 2003 declined to 8.0% as a percentage of net sales compared to 9.5% for the same period in the prior year.

Our revenue growth in the first quarter resulted in incremental working capital needs. This was evidenced by significant increases in accounts receivable, inventories and accounts payable balances during the quarter. Correspondingly, our debt increased \$0.1 million from \$53.1 million at year end to \$53.2 million at the end of the first quarter. Net of cash, our debt increased by \$2.0 million. We anticipate our operating cash flow results will improve in subsequent quarters and remain committed to a reduction of debt (excluding the impact of the acquisitions described above) of \$11.0 million for 2003.

Table of Contents

Our Competitive Strengths

We believe that the following elements provide us with significant competitive strengths in our markets:

High Precision, Low-Cost Manufacturing Capabilities. Our focus on lean manufacturing and continuous improvement have earned us a reputation as a supply chain partner that our customers can rely upon to deliver value-added components. We believe that our proprietary machinery, manufacturing processes and attention to quality and service are competitive advantages that allow us to consistently provide high quality precision products that meet exacting tolerances. For example, our grade 3 balls are manufactured to within three-millionths (0.000003) of an inch of roundness and our seal, retainer and plastic products are known for meeting the strict tolerances demanded by our customers. Our efforts to eliminate inefficient processes and improve productivity have enabled us to maintain our status as a low-cost producer.

Leading Outsourcing Alternative to Captive Manufacturing. Euroball is the bearing industry's largest component outsourcing initiative and is an important milestone for the bearing component industry. This innovative model has enhanced the industry's awareness of the benefits of outsourcing and has established us as a proven, independent alternative to captive manufacturing. Our ability to focus solely on component manufacturing allows us to provide our customers with lower cost, higher quality products and improved customer service levels over captive manufacturing operations. Outsourcing also enables our customers to redirect critical capital investments.

Uniquely Positioned as Integrated Supplier of Bearing Components. Through our recent acquisitions, we have become a leading independent supplier with the industry's most complete line of bearing components. Our core ball and roller product offerings, complemented by our more recently acquired tapered roller, bearing retainer and seal products, have allowed us to expand our key customer relationships by offering our customers the value of a single supply chain partner for a wide variety of components.

Established Operating Expertise. Our experienced management team continues to be successful in implementing our strategic plan by completing four major acquisitions since 1998 and executing significant cost rationalization programs domestically and in Europe. Our 11 senior managers average over 13 years of experience in the bearing component industry, which has allowed us to establish excellent working relationships with major bearing companies. Our management team has a proven track record of successfully managing our global businesses through international economic cycles, including the most recent economic downturn.

Table of Contents

Our Business Strategy

Our strategic plan is designed to increase our revenues, income and long-term shareholder value by:

Expanding Our Global Presence. We believe that maintaining production facilities in proximity to our major customers manufacturing operations is essential. We see significant opportunities to increase market share and maintain our competitive cost advantage by expanding our global presence. We established our European presence in 1997 and, through Euroball, have become Europe's leading provider of precision balls to the bearing industry. We see further opportunities to expand our global manufacturing base to Asia, Eastern Europe and other geographic regions to more effectively serve the customers in these markets.

Expanding Our Bearing Component Product Offerings. We seek to build on existing customer relationships and our core manufacturing and service competencies by diversifying into additional bearing component businesses. Our acquisitions have given us full-service design and production capabilities in bearing seals, plastic bearing retainers and tapered rollers. These products serve the same global bearing customers as our core ball and roller products. As a result, we are able to provide, as a single independent company, a more diversified product offering to our global bearing customers.

Continuing to Pursue Strategic Acquisitions and Alliances. Because much of the world's bearing production capacity is located outside of the U.S., we have sought to develop an effective way to serve our customers on a global basis and expand these critical customer relationships. We believe that outsourcing transactions and strategic acquisitions represent the most effective way to expand these relationships. The success of our approach, as in the case of Euroball, provides a framework for future strategic alliances and for future acquisitions of our customers' captive bearing component operations.

Corporate Information

Our principal executive offices are located at 2000 Waters Edge Drive, Johnson City, Tennessee 37604 and our telephone number is (423) 743-9151. Our Internet website address is www.nnbr.com. Information contained on our website is not part of this prospectus supplement.

Cautionary Statement Concerning Forward-Looking Statements

This prospectus supplement includes and incorporates by reference forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on our current expectations, estimates and projections about the industry and markets in which we operate. Words such as expects, anticipates, intends, plans, believes, seeks, estimates and variations words and similar expressions are intended to identify such forward-looking statements. These statements are not guarantees of future performance and involve risks, uncertainties and assumptions, which are difficult to predict and many of which are beyond our control, including those described in Risk Factors on pages S-8 through S-11 of this prospectus supplement. Therefore, actual outcomes and results may differ materially from what is expressed, forecasted or implied in such forward-looking statements. We undertake no obligation to publicly update any forward-looking statements, whether as a result of new information, future events or otherwise, except as required by applicable law.

The Offering

Common stock being offered by the selling stockholders	3,556,895 shares
Common stock to be outstanding after this offering	16,081,441 shares(1)
Use of Proceeds	We will not receive any proceeds from the sale of shares by any of the selling stockholders. If the over-allotment option is exercised in full, we will use the estimated net proceeds of \$5.1 million for working capital and other general corporate purposes and to repay a portion of our bank indebtedness. See Use of Proceeds.
Nasdaq National Market symbol	NNBR

(1) Does not include up to 533,600 shares the underwriters have the option to purchase from the Company to cover over-allotments.

Table of Contents**Summary Consolidated Financial Data**

The summary consolidated financial data presented below have been derived from our consolidated financial statements. Our consolidated financial statements as of and for the years ended December 31, 2000, 2001 and 2002 have been audited by KPMG LLP. Our consolidated financial statements as of and for the years ended December 31, 1998 and 1999 have been audited by PricewaterhouseCoopers LLP. Data for the three-month periods ended March 31, 2002 and 2003 have been derived from unaudited consolidated financial statements which, in our opinion, reflect all adjustments necessary for a fair presentation. Results for the three-month periods are not necessarily indicative of results for the full year. You should read the summary consolidated financial data presented below in conjunction with our consolidated financial statements and the notes thereto and other financial information included elsewhere in this prospectus supplement or incorporated by reference. For more details on how you can obtain our SEC reports incorporated by reference in this prospectus supplement, you should read the sections of this prospectus supplement and the prospectus entitled *Where You Can Find More Information*.

Table of Contents

RISK FACTORS

You should carefully consider the following risks and uncertainties, and all other information contained in this prospectus supplement and accompanying prospectus or incorporated by reference in this prospectus supplement and accompanying prospectus, before making an investment in our common stock. Any of the following risks could have a material adverse effect on our business, financial condition or operating results. In such case, the trading price of our common stock could decline and you may lose all or part of your investment.

The demand for our products is cyclical, which could adversely impact our revenues.

The end markets for fully assembled bearings are cyclical and tend to decline in response to overall declines in industrial production. As a result, the market for bearing components is also cyclical and impacted by overall levels of industrial production. Our sales in the past have been negatively affected, and in the future will be negatively affected, by adverse conditions in the industrial production sector of the economy or by adverse global or national economic conditions generally.

We depend on a very limited number of foreign sources for our primary raw material and are subject to risks of shortages and price fluctuation.

The steel that we use to manufacture precision balls and rollers is of an extremely high quality and is available from a limited number of producers on a global basis. Due to quality constraints in the U.S. steel industry, we obtain substantially all of the steel used in our U.S. ball and roller production from overseas suppliers. In addition, we obtain substantially all of the steel used in our European ball production from a single European source. If we had to obtain steel from sources other than our current suppliers, particularly in the case of our European operations, we could face higher prices and transportation costs, increased duties or taxes, and shortages of steel. Problems in obtaining steel, and particularly 52100 chrome steel, in the quantities that we require and on commercially reasonable terms, could increase our costs, negatively impact our ability to operate our business efficiently and have a material adverse effect on the operating and financial results of our Company.

We operate in and sell products to customers outside the U.S. and are subject to several related risks.

Because we obtain a majority of our raw materials from overseas suppliers, actively participate in overseas manufacturing operations and sell to a large number of international customers, we face risks associated with the following:

adverse foreign currency fluctuations;

changes in trade, monetary and fiscal policies, laws and regulations, and other activities of governments, agencies and similar organizations;

the imposition of trade restrictions or prohibitions;

high tax rates that discourage the repatriation of funds to the U.S.;

the imposition of import or other duties or taxes; and

unstable governments or legal systems in countries in which our suppliers, manufacturing operations, and customers are located.

We do not have a hedging program in place associated with consolidating the operating results of our foreign businesses into U.S. dollars. An increase in the value of the U.S. dollar and/or the Euro relative to other currencies may adversely affect our ability to compete with our foreign-based competitors for international, as well as domestic, sales. In the first quarter of 2003, approximately 50% of the \$10.4 million increase in revenues was attributable to favorable currency fluctuations. Also, a decline in the value of the Euro relative to the U.S. dollar will negatively impact our consolidated financial results, which are denominated in U.S. dollars.

S-8

Table of Contents

In addition, due to the typical slower summer manufacturing season in Europe, we expect that revenues in the third fiscal quarter will reflect lower sales as compared to other quarters, as our sales to European customers have increased as a percentage of net sales.

We depend heavily on a relatively limited number of customers, and the loss of any major customer would have a material adverse effect on our business.

Sales to various U.S. and foreign divisions of SKF, which is one of the largest bearing manufacturers in the world, accounted for approximately 33% of consolidated net sales in 2002, and sales to INA/FAG accounted for approximately 19% of consolidated net sales in 2002. Our recent acquisition of SKF's tapered roller and metal cage production facility, along with the related long-term supply agreement with SKF, will increase our dependence on SKF in the future. During 2002, our ten largest customers accounted for approximately 73% of our consolidated net sales. None of our other customers individually accounted for more than 5% of our consolidated net sales for 2002. Recent consolidation of certain of our bearing customers, including the acquisition of the Torrington Company by Timken, will increase our dependence on a smaller number of customers. The loss of all or a substantial portion of sales to these customers would cause us to lose a substantial portion of our revenue and would lower our profit margin and cash flows from operations.

The costs and difficulties of integrating acquired businesses could impede our future growth.

We cannot assure you that any future acquisition will enhance our financial performance. Our ability to effectively integrate any future acquisitions will depend on, among other things, the adequacy of our implementation plans, the ability of our management to oversee and operate effectively the combined operations and our ability to achieve desired operating efficiencies and sales goals. The integration of any acquired businesses might cause us to incur unforeseen costs, which would lower our profit margin and future earnings and would prevent us from realizing the expected benefits of these acquisitions.

We may not be able to continue to make the acquisitions necessary for us to realize our growth strategy.

Acquiring businesses that complement or expand our operations has been and continues to be an important element of our business strategy. This strategy calls for growth through acquisitions constituting approximately two-thirds of our future growth, with the remainder resulting from internal growth and market penetration. We bought our plastic bearing component business in 1999, formed Euroball with our two largest bearing customers, SKF and INA/FAG, in 2000 and acquired our bearing seal operations in 2001. During 2002, we purchased INA/FAG's minority interest in Euroball and on May 2, 2003, we acquired SKF's minority interest in Euroball, to become the sole owner of Euroball. On May 2, 2003 we acquired SKF's tapered roller and metal cage manufacturing operations in Veenendaal, The Netherlands. We cannot assure you that we will be successful in identifying attractive acquisition candidates or completing acquisitions on favorable terms in the future. In addition, we may borrow funds to acquire other businesses, increasing our interest expense and debt levels. Our inability to acquire businesses, or to operate them profitably once acquired, could have a material adverse effect on our business, financial position, results of operations and cash flows.

Our growth strategy depends on outsourcing, and if the industry trend toward outsourcing does not continue, our business could be adversely affected.

Edgar Filing: NN INC - Form 424B5

Our growth strategy depends in significant part on major bearing manufacturers continuing to outsource components, and expanding the number of components being outsourced. This requires manufacturers to depart significantly from their traditional methods of operations. If major bearing manufacturers do not continue to expand outsourcing efforts or determine to reduce their use of outsourcing, our ability to grow our business could be materially adversely affected.

S-9

Table of Contents

Our market is highly competitive and many of our competitors have significant advantages that could adversely affect our business.

The global market for bearing components is highly competitive, with a majority of production represented by the captive production operations of certain large bearing manufacturers and the balance represented by independent manufacturers. Captive manufacturers make components for internal use and for sale to third parties. All of the captive manufacturers, and many independent manufacturers, are significantly larger and have greater resources than do we. Our competitors are continuously exploring and implementing improvements in technology and manufacturing processes in order to improve product quality, and our ability to remain competitive will depend, among other things, on whether we are able to keep pace with such quality improvements in a cost effective manner.

The production capacity we have added over the last several years has at times resulted in our having more capacity than we need, causing our operating costs to be higher than expected.

We have expanded our ball and roller production facilities and capacity over the last several years. During 1997, we built an additional manufacturing plant in Kilkenny, Ireland, and we continued this expansion in 2000 through the formation of Euroball with SKF and INA/FAG. Our ball and roller facilities have not always operated at full capacity and from time to time our results of operations have been adversely affected by the under-utilization of our production facilities, and we face risks of further under-utilization or inefficient utilization of our production facilities in future years.

The price of our common stock may be volatile.

The market price of our common stock could be subject to significant fluctuations and may decline. Among the factors that could affect our stock price are:

our operating and financial performance and prospects;

quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;

changes in revenue or earnings estimates or publication of research reports by analysts;

loss of any member of our senior management team;

speculation in the press or investment community;

strategic actions by us or our competitors, such as acquisitions or restructurings;

sales of our common stock by stockholders;

general market conditions; and

domestic and international economic, legal and regulatory factors unrelated to our performance.

The stock markets in general have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. These broad market fluctuations may adversely affect the trading price of our common stock.

Provisions in our charter documents and Delaware law may inhibit a takeover, which could adversely affect the value of our common stock.

Our certificate of incorporation and bylaws, as well as Delaware corporate law, contain provisions that could delay or prevent a change of control or changes in our management that a stockholder might consider favorable and may prevent you from receiving a takeover premium for your shares. These provisions include, for example, a classified board of directors and the authorization of our board of directors to issue up to 5,000,000

Table of Contents

preferred shares without a stockholder vote. In addition, our restated certificate of incorporation provides that stockholders may not call a special meeting.

We are a Delaware corporation subject to the provisions of Section 203 of the Delaware General Corporation Law, an anti-takeover law. Generally, this statute prohibits a publicly-held Delaware corporation from engaging in a business combination with an interested stockholder for a period of three years after the date of the transaction in which such person became an interested stockholder, unless the business combination is approved in a prescribed manner. A business combination includes a merger, asset sale or other transaction resulting in a financial benefit to the stockholder. We anticipate that the provisions of Section 203 may encourage parties interested in acquiring us to negotiate in advance with our board of directors, because the stockholder approval requirement would be avoided if a majority of the directors then in office approve either the business combination or the transaction that results in the stockholder becoming an interested stockholder.

These provisions apply even if the offer may be considered beneficial by some of our stockholders. If a change of control or change in management is delayed or prevented, the market price of our common stock could decline.

S-11

USE OF PROCEEDS

We will not receive any proceeds from the sale of the shares of common stock by the selling stockholders.

If the over-allotment option is exercised in full, we estimate that the net proceeds we will receive from this offering, after deducting underwriting discounts, commissions and our estimated offering expenses will be approximately \$5.1 million. We intend to use the net proceeds from this offering for working capital, general corporate purposes and to repay a portion of our borrowings under the U.S. term loan portion of our credit facility, as required under that facility. Our credit facility with AmSouth Bank was used to fund our purchase of SKF's component manufacturing operations in Veenendaal, The Netherlands and SKF's 23% interest in Euroball. This facility replaces our prior credit facility with AmSouth and Euroball's credit facility with HypoVereinsbank Luxembourg, S.A. The U.S. term loan under our credit facility expires on May 1, 2008 and bears interest at a floating rate equal to LIBOR (1.31% on April 30, 2003) plus an applicable margin of 1.25% to 2.0%, based on calculated financial ratios. Approximately \$30.4 million was outstanding under the U.S. term loan as of May 2, 2003.

S-12

Table of Contents**SELLING STOCKHOLDERS**

The following table sets forth certain information regarding the beneficial ownership of our common stock as of May 1, 2003, and as by the stockholders who are selling 3,556,895 shares of common stock in this offering, and as adjusted to reflect the sale of shares offered in this prospectus supplement. Unless otherwise noted, to our knowledge each selling stockholder has sole voting and investment power over the shares shown.

	Shares Beneficially Owned Prior to Offering		Shares Being Offered	Shares Beneficially Owned After Offering	
	Number	Percent (%)(1)		Number	Percent (%)(1)
Richard D. Ennen (2)	2,839,668(3)	17.7	2,839,668		
Michael D. Huff (4)	662,227(5)	4.1	662,227		
Janet M. Huff	225,000	1.4	225,000		
Deborah E. Bagierek	76,169(6)	*	55,000	21,169	*

* Amounts are less than one percent.

(1) Based on 16,081,441 shares of NN's common stock outstanding on May 1, 2003.

(2) Mr. Ennen currently sits on the Company's Board of Directors and has since the Company's formation in 1980. He was Chairman of the Board from the formation of the Company until September of 2001. Mr. Ennen has agreed not to stand for re-election to the Board of Directors at NN's 2003 Annual Meeting of Stockholders.

(3) Includes 1,800,000 shares held by the Richard D. Ennen Charitable Remainder Unitrust of which Mr. Ennen is the trustee and 200,000 shares held by the Ennen Charitable Trust of which Mr. Ennen is the trustee. Mr. Ennen disclaims beneficial ownership to the shares held by his former spouse, Monica Ennen, and his daughter, Deborah E. Bagierek.

(4) Mr. Huff currently sits on the Company's Board of Directors and has since the Company's formation in 1980.

(5) Includes (i) 23,000 shares subject to presently exercisable options, and (ii) 225,000 shares held directly by Mr. Huff's spouse, for which Mr. Huff disclaims beneficial ownership.

(6) All of Ms. Bagierek's shares are held by the Deborah Ennen Bagierek Trust, of which Ms. Bagierek is a trustee.

Table of Contents**UNDERWRITING**

Subject to the terms and conditions set forth in an underwriting agreement by and among the selling stockholders, us and McDonald Investments Inc. and Legg Mason Wood Walker, Incorporated, as representatives for the underwriters named in the agreement, we and the selling stockholders have agreed to sell to each underwriter, and each underwriter has severally agreed to purchase from the selling stockholders, the number of shares of common stock set forth opposite its name in the table below.

<u>Underwriters</u>	<u>Number of Shares of Common Stock</u>
McDonald Investments Inc., a KeyCorp Company	2,311,982
Legg Mason Wood Walker, Incorporated	1,244,913
Total	3,556,895

Under the terms of the underwriting agreement, the underwriters are committed to purchase all of the shares of common stock if any are purchased. If an underwriter defaults, the underwriting agreement provides that the purchase commitments of the nondefaulting underwriters may be increased or the underwriting agreement may be terminated.

We and the selling stockholders have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act of 1933, as amended, or to contribute to payments the underwriters may be required to make in respect thereof.

The underwriting agreement provides that the underwriters' obligations to purchase the shares of common stock depend on the satisfaction of the conditions contained in the underwriting agreement. The conditions contained in the underwriting agreement include the requirement that the representations and warranties made by the selling stockholders and us to the underwriters are true, that there is no material change in the financial markets and that we deliver to the underwriters customary closing documents.

The underwriters propose to offer the selling stockholders' and our shares of common stock directly to the public at \$10.37 per share and to certain dealers at such price less a concession not in excess of \$.36 per share. The underwriters may allow, and such dealers may reallow, a concession not in excess of \$.10 per share to certain dealers.

The following table shows the per share and total underwriting discount that the selling stockholders and we will pay to the underwriters. Such amounts are shown assuming both no exercise and full exercise of the underwriters' option to purchase 533,600 additional shares of common stock.

Per Share

Edgar Filing: NN INC - Form 424B5

		Total Without Option Exercised	Total With Option Exercised
Public offering price	\$ 10.37	\$ 36,885,001	\$ 42,418,433
Underwriting discount(1)			
Payable by us	\$.60	-0-	\$ 320,160
Payable by the selling stockholders	\$.60	\$ 2,134,137	\$ 2,134,137
Proceeds			
Proceeds to us (before expenses)	\$ 9.77	-0-	\$ 5,213,272
Proceeds to the selling stockholders (before expenses)	\$ 9.77	\$ 34,750,864	\$ 34,750,864

(1) The underwriting discount is 5.8%, or \$.60 per share.

We expect to incur expenses of approximately \$100,000 in connection with this offering.

Table of Contents

We have granted the underwriters an option to purchase up to 533,600 additional shares of common stock at the public offering price less the underwriting discount. The underwriters may exercise the option for 30 days from the date of this prospectus supplement solely to cover any over-allotments. If the underwriters exercise this option, each will be obligated, subject to conditions contained in the underwriting agreement, to purchase a number of additional shares of common stock proportionate to that underwriter's initial amount reflected in the above table.

Each of the selling stockholders has agreed with the underwriters, for a period of 90 days after the date of this prospectus supplement, subject to certain exceptions, not to sell any shares of common stock or any securities convertible into or exchangeable for shares of common stock owned by the holders, without the prior written consent of the underwriters. However, the underwriters may, in their sole discretion and at any time without notice, release all or any portion of the securities subject to these agreements.

Until the distribution of the shares of common stock is completed, Securities and Exchange Commission rules may limit the underwriters and selling group members from bidding for and purchasing our shares of common stock. However, the underwriters may engage in transactions that stabilize the price of the common stock, such as bids or purchases to peg, fix, or maintain that price.

If the underwriters create a short position in the shares of common stock in connection with the offering, i.e., if they sell more shares than are listed on the cover of this prospectus supplement, the underwriters may reduce that short position by purchasing shares in the open market. The underwriters may also elect to reduce any short position by exercising all or part of the over-allotment option described above. Purchases of the shares of common stock to stabilize its price or to reduce a short position may cause the price of the shares of common stock to be higher than it might be in the absence of such purchases.

Neither we nor the underwriters makes any representation or prediction as to the effect the transactions described above may have on the price of the shares of common stock. These transactions may occur on the Nasdaq National Market or otherwise. If such transactions are commenced, they may be discontinued without notice at any time.

In addition, in connection with this offering, some of the underwriters may engage in passive market making transactions in the common stock on the Nasdaq National Market, prior to the pricing and completion of the offering. Passive market making consists of displaying bids on the Nasdaq National Market no higher than the bid prices of independent market makers and making purchases at prices no higher than those independent bids and effected in response to order flow. Net purchases by a passive market maker on each day are limited to a specified percentage of the passive market maker's average daily trading volume in the common stock during a specified period and must be discontinued when that limit is reached. Passive market making may cause the price of the common stock to be higher than the price that otherwise would exist in the open market in the absence of those transactions. If the underwriters commence passive market making transactions, they may discontinue them at any time.

Royce & Associates, LLC, an affiliate of Legg Mason Wood Walker, Incorporated, manages accounts that beneficially own 849,200 shares of our common stock as of April 30, 2003. Additionally, Legg Mason Wood Walker, Incorporated manages accounts that beneficially own 52,550 shares of our common stock as of April 30, 2003, and Legg Mason Trust FSB, an affiliate of Legg Mason Wood Walker, Incorporated, manages accounts that beneficially own 2,000 shares of our common stock as of April 30, 2003. In addition, some of the underwriters and their affiliates have engaged in, and may in the future engage in, investment banking and other commercial dealings in the ordinary course of business with us. They have received customary fees and commissions for these transactions.

LEGAL MATTERS

The validity of the common stock offered hereby will be passed upon for us by Blackwell Sanders Peper Martin LLP, Two Pershing Square, 2300 Main Street, Suite 1000, Kansas City, Missouri 64108. Certain legal matters will be passed upon for the underwriters by Calfee, Halter & Griswold LLP, 1400 McDonald Investment Center, 800 Superior Avenue, Cleveland, Ohio, 44114.

WHERE YOU CAN FIND MORE INFORMATION

We file annual, quarterly and special reports, proxy statements and other information with the SEC. You may read and copy any of these materials at the SEC's Public Reference Room, 450 Fifth Street, N.W., Washington, D.C. 20549. You may obtain information on the operation of the Public Reference Room by calling the SEC at 1-800-SEC-0330. Our SEC filings, including the registration statement, will also be available to you on the SEC's website. The address of this website is <http://www.sec.gov>.

We have filed a registration statement on Form S-3 with the SEC to register shares of our common stock. This prospectus supplement and the accompanying prospectus are part of that registration statement and, as permitted by the SEC's rules, does not contain all of the information included in the registration statement. For further information about us and this offering, you may refer to the registration statement and its exhibits. You can review and copy the registration statement and its exhibits at the public reference rooms maintained by the SEC or on the SEC's website described above.

This prospectus supplement and accompanying prospectus may contain summaries of contracts or other documents. Because they are summaries, they will not contain all of the information that may be important to you. If you would like complete information about a contract or other document, you should read the copy filed as an exhibit to the registration statement.

INCORPORATION OF CERTAIN DOCUMENTS BY REFERENCE

The SEC allows us to incorporate by reference the information we file with them, which means that we can disclose important information to you by referring you to those documents. The information we incorporate by reference is considered to be a part of this prospectus, and information that we file with the SEC at a later date will automatically update or supersede this information. We incorporate by reference the following documents as well as any future filing we will make with the SEC under Sections 13(a), 13(c), 14 or 15(d) of the Securities Exchange Act of 1934:

Our Annual Report on Form 10-K for the year ended December 31, 2002;

Our Current Reports on Form 8-K filed with the SEC on February 25, 2003, March 11, 2003, April 24, 2003, as amended on Form 8-K/A on May 1, 2003, May 2, 2003 and May 5, 2003; and

The description of our common stock contained in the amended registration statement on Form 8-A/A filed with the SEC on November 22, 2002.

You may request a copy of these filings, at no cost, by written or telephone request to:

NN, INC.

COMMON STOCK

\$36,000,000 of Company Shares

3,733,664 of Selling Stockholders Shares

By this prospectus from time to time, we may offer and sell shares of our common stock, par value \$.01 per share, having an aggregate offering price of up to \$36,000,000.

Up to 3,733,664 shares of common stock may be sold from time to time in one or more offerings by the selling stockholders identified on page 7. We will not receive any proceeds from sales of shares of our common stock by the selling stockholders.

We will provide you with a prospectus supplement before we or any of the selling stockholders sell any common stock under this prospectus. Any prospectus supplement will inform you about the specific terms of an offering by us or any selling stockholder, will list the names of any underwriters or agents, and may also add, update or change information contained in this prospectus. You should read this prospectus, the documents that are incorporated by reference in this prospectus and any prospectus supplement carefully before investing. This prospectus may not be used to sell any common stock unless it is accompanied by a prospectus supplement.

We may offer these securities directly to investors, or through agents, underwriters or dealers. See **Plan of Distribution** on page 8. Each prospectus supplement will provide the terms of the plan of distribution relating to each offering of common stock.

Our common stock is quoted on the Nasdaq National Market under the symbol **NNBR**.

Investing in our common stock involves risks. See **Risk Factors beginning on page 4 to read about the risks you should consider before buying our common stock.**

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The date of this Prospectus is February 11, 2003

ABOUT THIS PROSPECTUS

This prospectus is part of a registration statement on Form S-3 that we filed with the Securities and Exchange Commission using a shelf registration process. Under the shelf registration process, we may, from time to time, offer and sell shares of our common stock described in this prospectus in one or more offerings up to a total dollar amount of \$36,000,000. In addition, up to 3,733,664 shares of our common stock may be sold from time to time in one or more offerings by several of our stockholders. We will not receive any proceeds from any sale of the shares by the selling stockholders.

This prospectus provides you with a general description of the securities we may offer. Each time we or the selling stockholders sell common stock, we will provide a prospectus supplement that will contain specific information about the method and terms of that offering. The prospectus supplement may also add, update or change information contained in this prospectus. If there is any inconsistency between the information in this prospectus and a prospectus supplement, you should rely on the information in that prospectus supplement. You should read both this prospectus and any applicable prospectus supplement together with additional information described below under the heading **Where You Can Find More Information**.

When acquiring any securities discussed in this prospectus, you should rely upon the information contained in this prospectus and the prospectus supplement, including the information incorporated by reference. We have not authorized any other person to provide you with different information. If anyone provides you with different or inconsistent information, you should not rely on it. We are not making an offer to sell these securities in any jurisdiction where the offer or sale is not permitted.

We and the selling stockholders may sell the common stock to or through underwriters, dealers or agents or directly to purchasers. The applicable prospectus supplement will provide the names of any underwriters, dealers or agents involved in the sale of the common stock, and any applicable fee, commission or discount arrangements with them. For a more detailed description of the various means by which we may distribute the common stock, you should read the information under the heading **Plan of Distribution**.

As used in this prospectus and any prospectus supplement, the terms **we**, **us**, **our**, **NN** or the **Company**, refer collectively to NN, Inc. and its subsidiaries.

RECENT DEVELOPMENTS

On December 20, 2002, we acquired the 23 percent interest in NN Euroball, ApS (Euroball) held by INA/FAG. Euroball was formed in 2000 by the Company, FAG Kugelfischer Georg Schaeffler AG, which was subsequently acquired by INA Schaeffler KG (collectively, INA/FAG) and AB SKF (SKF). INA/FAG is a global bearing manufacturer and one of our largest customers. We paid approximately 13.4 million Euros for INA/FAG s interest in Euroball. Following the closing of the transaction, we own 77 percent of the outstanding shares of Euroball and SKF owns the remaining 23 percent. SKF consented to our purchase of INA/FAG s interest pursuant to the terms of the Euroball Shareholder Agreement. SKF has the right, beginning January 1, 2003 to require us to purchase its interest in Euroball, based on a formula price detailed in the Euroball Shareholder Agreement.

On December 9, 2002, we announced that we had signed a letter of intent to acquire certain component manufacturing operations of SKF in Veenendaal, The Netherlands. SKF, a Swedish corporation, is a global bearing manufacturer and one of our major customers. The transaction,

Edgar Filing: NN INC - Form 424B5

which is expected to close in the first quarter of 2003, is subject to a number of conditions, including the execution of a definitive asset acquisition agreement, completion of due diligence, approval of NN and SKF's boards of directors and any necessary approval of relevant government agencies. The on-going negotiations between the parties have included the possibility of offering shares of our common stock under this prospectus as all or part of the purchase price for the assets.

Table of Contents

RISK FACTORS

You should carefully consider the following risks and uncertainties and any risks and uncertainties contained in the accompanying prospectus supplement, and all other information contained in or incorporated by reference in this prospectus and the prospectus supplement, before making an investment in our common stock. Any of the following risks could have a material adverse effect on our business, financial condition or operating results. In such case, the trading price of our common stock could decline and you may lose all or part of your investment.

The demand for our products is cyclical, which could adversely impact our revenues.

The end markets for fully assembled bearings are cyclical and tend to decline in response to overall declines in industrial production. As a result, the market for bearing components is also cyclical and impacted by overall levels of industrial production. Our sales in the past have been negatively affected, and in the future will be negatively affected, by adverse conditions in the industrial production sector of the economy or by adverse global or national economic conditions generally.

We depend on a very limited number of foreign sources for our primary raw material and are subject to risks of shortages and price fluctuation.

The steel that we use to manufacture precision balls and rollers is of an extremely high quality and is available from a limited number of producers on a global basis. Due to quality constraints in the U.S. steel industry, we obtain substantially all of the steel used in our U.S. ball and roller production from overseas suppliers. In addition, we obtain substantially all of the steel used in our European ball production from a single European source. If we had to obtain steel from sources other than our current suppliers, particularly in the case of our European operations, we could face higher prices and transportation costs, increased duties or taxes, and shortages of steel. Problems in obtaining steel, and particularly 52100 chrome steel, in the quantities that we require and on commercially reasonable terms, could increase our costs, negatively impact our ability to operate our business efficiently and have a material adverse effect on the operating and financial results of our Company.

We operate in and sell products to customers outside the U.S. and are subject to several related risks.

Because we obtain a majority of our raw materials from overseas suppliers, actively participate in overseas manufacturing operations and sell to a large number of international customers, we face risks associated with the following:

adverse foreign currency fluctuations;

changes in trade, monetary and fiscal policies, laws and regulations, and other activities of governments, agencies and similar organizations;

the imposition of trade restrictions or prohibitions;

high tax rates that discourage the repatriation of funds to the U.S.;

the imposition of import or other duties or taxes; and

unstable governments or legal systems in countries in which our suppliers, manufacturing operations, and customers are located.

We do not have a hedging program in place to help limit the risk associated with consolidating the operating results of our foreign businesses into U.S. dollars. An increase in the value of the U.S. dollar and/or the Euro relative to other currencies may adversely affect our ability to compete with our foreign-based competitors for international, as well as domestic, sales. Also, a decline in the value of the Euro relative to the U.S. dollar will negatively impact our consolidated financial results, which are denominated in U.S. dollars.

Table of Contents

In addition, due to the typical slower summer manufacturing season in Europe, we expect that revenues in the third fiscal quarter will reflect lower sales, as our sales to foreign customers have increased as a percentage of net sales.

We depend heavily on a relatively limited number of customers, and the loss of any major customer would have a material adverse effect on our business.

Sales to various U.S. and foreign divisions of SKF, which is one of the largest bearing manufacturers in the world, accounted for approximately 35% of consolidated net sales in 2001, and sales to INA/FAG accounted for approximately 19% of consolidated net sales in 2001. During 2001, our ten largest customers accounted for approximately 73% of our consolidated net sales. None of our other customers individually accounted for more than 5% of our consolidated net sales for 2001. The loss of all or a substantial portion of sales to these customers would cause us to lose a substantial portion of our revenue and would lower our profit margin and cash flows from operations.

The costs and difficulties of integrating acquired business could impede our future growth.

We cannot assure you that any future acquisition will enhance our financial performance. Our ability to effectively integrate any future acquisitions will depend on, among other things, the adequacy of our implementation plans, the ability of our management to oversee and operate effectively the combined operations and our ability to achieve desired operating efficiencies and sales goals. The integration of any acquired businesses might cause us to incur unforeseen costs, which would lower our profit margin and future earnings and would prevent us from realizing the expected benefits of these acquisitions.

We may not be able to continue to make the acquisitions necessary for us to realize our growth strategy.

Acquiring businesses that complement or expand our operations has been and continues to be an important element of our business strategy. This strategy calls for growth through acquisitions constituting approximately two-thirds of our future growth, with the remainder resulting from internal growth and market penetration. We bought our plastic bearing component business in 1999, formed Euroball with our two largest bearing customers, SKF and INA/FAG, in 2000 and acquired our bearing seal operations in 2001. We cannot assure you that we will be successful in identifying attractive acquisition candidates or completing acquisitions on favorable terms in the future. In addition, we may borrow funds to acquire other businesses, increasing our interest expense and debt levels. Our inability to acquire businesses, or to operate them profitably once acquired, could have a material adverse effect on our business, financial position, results of operations and cash flows.

Additionally, SKF, the minority shareholder in Euroball, has the right to require us to purchase its interest beginning in January 2003. The Company may need to borrow funds to pay for all or a portion of the purchase of SKF's interest or may be required to make a purchase at a time that is less favorable to the Company.

Our growth strategy depends on outsourcing, and if the industry trend toward outsourcing does not continue, our business could be adversely affected.

Our growth strategy depends in significant part on major bearing manufacturers continuing to outsource components, and expanding the number of components being outsourced. This requires manufacturers to depart significantly from their traditional methods of operations. If major bearing manufacturers do not continue to expand outsourcing efforts or determine to reduce their use of outsourcing, our ability to grow our business could be materially adversely affected.

Our market is highly competitive and many of our competitors have significant advantages that could adversely affect our business.

The global market for bearing components is highly competitive, with a majority of production represented by the captive production operations of certain large bearing manufacturers and the balance represented by

Table of Contents

independent manufacturers. Captive manufacturers make components for internal use and for sale to third parties. All of the captive manufacturers, and many independent manufacturers, are significantly larger and have greater resources than do we. Our competitors are continuously exploring and implementing improvements in technology and manufacturing processes in order to improve product quality, and our ability to remain competitive will depend, among other things, on whether we are able to keep pace with such quality improvements in a cost effective manner.

The production capacity we have added over the last several years has at times resulted in our having more capacity than we need, causing our operating costs to be higher than expected.

We have significantly expanded our ball and roller production facilities and capacity over the last several years. During 1997, we built an additional manufacturing plant in Kilkenny, Ireland, and we continued this expansion in 2000 through the formation of Euroball with SKF and INA/FAG. Our ball and roller facilities currently are not operating at full capacity and our results of operations for 2001 and the first and second quarters of 2002 were adversely affected by the under-utilization of our production facilities, and we face risks of further under-utilization or inefficient utilization of our production facilities in future years.

The price of our common stock may be volatile.

The market price of our common stock could be subject to significant fluctuations after this offering, and may decline below the public offering price. Among the factors that could affect our stock price are:

our operating and financial performance and prospects;

quarterly variations in the rate of growth of our financial indicators, such as earnings per share, net income and revenues;

changes in revenue or earnings estimates or publication of research reports by
