

MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST
Form N-CSR
December 30, 2004

Welcome, Shareholder:

In this report, you'll learn about how your investment in Morgan Stanley Insured Municipal Income Trust performed during the annual period. We will provide an overview of the market conditions, and discuss some of the factors that affected performance during the reporting period. In addition, this report includes the Trust's financial statements and a list of Trust investments.

Market forecasts provided in this report may not necessarily come to pass. There is no assurance that the Trust will achieve its investment objective. The Trust is subject to market risk, which is the possibility that market values of securities owned by the Trust will decline and, therefore, the value of the Trust's shares may be less than what you paid for them. Accordingly, you can lose money investing in this Trust.

Fund Report
For the year ended October 31, 2004

Market Conditions

The U.S. economy continued to expand during the Trust's fiscal year ended October 31, 2004. However, through the spring and summer the economy hit what Federal Reserve Board Chairman Alan Greenspan described as a "soft patch." Oil prices almost doubled, reaching record highs, and employment growth weakened. As a result, real gross domestic product growth that had averaged 4.3 percent in the first half of the fiscal period slowed to 3.5 percent in the second.

Throughout most of the year, the Federal Reserve Open Market Committee (the "Fed") maintained its short-term borrowing rate (the federal funds rate) at an historic low. By April the market had begun to anticipate that the Fed would begin to increase short-term interest rates in response to higher commodity prices and reduced concern about the risk of deflation. In a series of three measured moves between June and the end of October, the Fed did increase

the federal funds rate, from 1.00 to 1.75 percent.

Rising inflation fears led to rising bond yields from April to June. The market reversed course in July, however, with yields falling from July through October as investors became concerned with slower growth. Rising and falling yields tended to offset each other over the entire period, and long-term municipal bond yields at the end of October had changed little from where they had begun the fiscal year. Higher short-term interest rates reduced the yield pickup for extending to longer maturities, and the yield curve flattened.

The supply of new-issue municipal bonds declined by 8 percent in the first 10 months of 2004. California remained the largest issuer, accounting for 16 percent of total underwriting volume. New York was second, and accounted for 9 percent of total underwriting volume. The ratio of municipal yields to Treasury yields, which serves as a gauge of relative performance, indicated that municipals generally remained attractive relative to Treasuries during the period. As a result, taxable investors such as insurance companies and hedge funds that normally focus on other sectors of the bond market supported municipal bond prices by "crossing over" to purchase municipal bonds.

Performance Analysis

The net asset value (NAV) of Morgan Stanley Insured Municipal Income Trust (IIM) moved from \$15.76 to \$15.60 per share. IIM declared tax-free dividends totaling \$0.92 per share and long-term capital gains of \$0.287107 per share. The Trust's total NAV return was 7.46 percent. IIM's value on the New York Stock Exchange (NYSE) decreased from \$14.73 to \$14.09 per share during the same period. Based on this change plus reinvestment of dividends and distributions, IIM's total market return was 3.91 percent. IIM's share price was trading at a 9.68 percent discount to its NAV on October 31, 2004. *Past performance is no guarantee of future results.*

Monthly dividends for the fourth quarter of 2004 declared in September were decreased from \$0.0775 to \$0.0675 per share to reflect the Trust's current and

2

projected earnings level. The Trust's level of undistributed net investment income was \$0.108 per share on October 31, 2004, versus \$0.194 per share 12 months earlier.

One of our key strategies in managing the Trust was to keep its overall interest-rate sensitivity lower than that of its benchmark index. This defensive strategy helped performance early in the period when rates rose but had the net effect of hampering total returns over the whole period by limiting the Trust's participation in the rally later in the period. The Trust's duration,* adjusted for leverage, was 10.1 years. The Trust's net assets, including preferred shares, of \$517 million were diversified across 78 credits in 11 long-term sectors.

As discussed in previous reports, the total income available for distribution to holders of common shares includes incremental income provided by the Trust's outstanding Auction Rate Preferred Shares (ARPS). ARPS dividends reflect prevailing short-term interest rates on maturities ranging from one week to two years. Incremental income to holders of common shares depends on two factors: the amount of ARPS outstanding and the spread between the portfolio's cost yield and its ARPS auction rate and expenses. The greater the spread and the higher the amount of ARPS outstanding, the greater the amount of incremental income available for distribution to holders of common shares. The level of net investment income available for distribution to holders of common shares varies with the level of short-term interest rates. ARPS leverage also increases the price volatility of common shares and has the effect of extending portfolio duration.

During this 12-month period, ARPS leverage contributed approximately \$0.17 per share to common-share earnings. The Trust has five ARPS series totaling \$155 million, representing 30 percent of net assets, including preferred shares. All series are currently in two-year auction modes with maturities ranging from January 2005 to July 2006. The yields ranged from 1.20 to 2.24 percent.

The Trust's procedure for reinvesting all dividends and distributions in common shares is through purchases in the open market. This method helps support the market value of the Trust's shares. In addition, we would like to remind you that the Trustees have approved a procedure whereby the Trust may, when appropriate, purchase shares in the open market or in privately negotiated transactions at a price not above market value or net asset value, whichever is lower at the time of purchase. The Trust may also utilize procedures to reduce or eliminate the amount of ARPS outstanding, including their purchase in the open market or in privately negotiated transactions. During the 12-month period ended October 31, 2004, the Trust purchased and retired 1,001,300 shares of common stock at a weighted average market discount of 8.33 percent.

3

Performance data quoted represents past performance, which is no guarantee of future results, and current performance may be lower or higher than the figures shown. *Investment return, net asset value and common share market price will fluctuate and Trust shares, when sold, may be worth more or less than their original cost.*

There is no guarantee that any securities mentioned will continue to perform well or be held by the Trust in the future.

* A measure of the sensitivity of a bond's price to changes in interest rates, expressed in years. Each year of duration represents an expected 1 percent change in the price of a bond for every 1 percent change in interest rates. The longer a bond's duration, the greater the effect of interest-rate movements on its price. Typically, trusts with shorter durations perform better in rising-interest-rate environments, while trusts with longer durations perform better when rates decline.

All percentages for credit enhancements are as a percentage of total long-term investments. These data are provided for informational purposes only and should not be deemed a recommendation to buy or sell the securities mentioned. Morgan Stanley is a full-service securities firm engaged in securities trading and brokerage activities, investment banking, research and analysis, financing and financial advisory services.

Results of Annual Shareholder Meeting

On October 26, 2004, an annual meeting of the Trust's shareholders was held for the purpose of voting on the following matter, the results of which were as follows:

Election of Trustees:

Michael Bozic	
For:	18,640,576
Withheld:	764,931
James F. Higgins	
For:	18,649,474
Withheld:	756,033

Election of Trustee by preferred shareholders:

Charles A. Fiumefreddo	
For:	2,397

Withheld: 0

The following Trustees were not standing for reelection at this meeting: Edwin J. Garn, Wayne E. Hedien, Manuel H. Johnson, Joseph J. Kearns, Michael E. Nugent and Fergus Reid.

5

Call and Cost (Book) Yield Structure
(Based on Long-Term Portfolio) As of October 31, 2004

Years Bonds Callable — Weighted Average Call Protection: 7 Years

Cost (Book) Yield^(b) — Weighted Average Book Yield: 5.1%

(a) Includes issues initially callable in previous years.

(b) Cost or "book" yield is the annual income earned on a portfolio investment based on its original purchase price before the Trust's operating expenses. For example, the Trust is earning a book yield of 5.9% on 8% of the long-term portfolio that is callable in 2004.

Portfolio structure is subject to change.

Morgan Stanley Insured Municipal Income Trust

Notes to Financial Statements October 31, 2004

1. Organization and Accounting Policies

Morgan Stanley Insured Municipal Income Trust (the "Trust") is registered under the Investment Company Act of 1940, as amended, as a diversified, closed-end management investment company. The Trust's investment objective is to provide current income which is exempt from federal income tax. The Trust was organized as a Massachusetts business trust on March 12, 1992 and commenced operations on February 26, 1993.

The following is a summary of significant accounting policies:

A. Valuation of Investments — (1) portfolio securities are valued by an outside independent pricing service approved by the Trustees. The pricing service uses both a computerized grid matrix of tax-exempt securities and evaluations by its staff, in each case based on information concerning market transactions and quotations from dealers which reflect the mean between the last reported bid and asked price. The portfolio securities are thus valued by reference to a combination of transactions and quotations for the same or other securities believed to be comparable in quality, coupon, maturity, type of issue, call provisions, trading characteristics and other features deemed to be relevant. The Trustees believe that timely and reliable market quotations are generally not readily available for purposes of valuing tax-exempt securities and that the valuations supplied by the pricing service are more likely to approximate the fair value of such securities; (2) futures are valued at the latest sale price on the commodities exchange on which they trade unless it is determined that such price does not reflect their market value, in which case they will be valued at their fair value as determined in good faith under procedures established by and under the supervision of the Trustees; and (3) short-term debt securities having a maturity date of more than sixty days at time of purchase are valued on a

mark-to-market basis until sixty days prior to maturity and thereafter at amortized cost based on their value on the 61st day. Short-term debt securities having a maturity date of sixty days or less at the time of purchase are valued at amortized cost.

B. Accounting for Investments — Security transactions are accounted for on the trade date (date the order to buy or sell is executed). Realized gains and losses on security transactions are determined by the identified cost method. Discounts are accreted and premiums are amortized over the life of the respective securities. Interest income is accrued daily.

C. Futures Contracts — A futures contract is an agreement between two parties to buy and sell financial instruments or contracts based on financial indices at a set price on a future date. Upon entering into such a contract, the Trust is required to pledge to the broker cash, U.S. Government securities or other liquid portfolio securities equal to the minimum initial margin requirements of the applicable futures exchange. Pursuant to the contract, the Trust agrees to receive from or pay to the broker an amount of cash equal to the daily fluctuation in the value of the contract. Such receipts or payments known as variation margin are recorded by the Trust as unrealized gains and losses. Upon closing of the contract, the Trust realizes a gain or loss equal to the difference between the value of the contract at the time it was opened and the value at the time it was closed.

16

Morgan Stanley Insured Municipal Income Trust

Notes to Financial Statements October 31, 2004 continued

D. Federal Income Tax Policy — It is the Trust's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable and nontaxable income to its shareholders. Accordingly, no federal income tax provision is required.

E. Dividends and Distributions to Shareholders — Dividends and distributions to shareholders are recorded on the ex-dividend date.

F. Use of Estimates — The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts and disclosures. Actual results could differ from those estimates.

2. Investment Management Agreement

Pursuant to an Investment Management Agreement with Morgan Stanley Investment Advisors Inc. (the "Investment Manager"), the Trust pays the Investment Manager a management fee, calculated weekly and payable monthly, by applying the annual rate of 0.35% to the Trust's weekly total net assets including preferred shares.

3. Security Transactions and Transactions with Affiliates

The cost of purchases and proceeds from sales of portfolio securities, excluding short-term investments, for the year ended October 31, 2004, aggregated \$87,592,822 and \$114,212,146, respectively. Included in the aforementioned are purchases of \$6,422,980 with other Morgan Stanley funds.

Morgan Stanley Trust, an affiliate of the Investment Manager, is the Trust's transfer agent. At October 31, 2004, the Trust had transfer agent fees and expenses payable of approximately \$18,800.

The Trust has an unfunded noncontributory defined benefit pension plan covering certain independent Trustees of the Trust who will have served as independent Trustees for at least five years at the time of retirement. Benefits under this plan are based on factors which include years of service and compensation. Aggregate pension costs for the year ended October 31, 2004, included in Trustees' fees and expenses in the Statement of Operations amounted to \$6,200. At October 31, 2004, the Trust had an accrued pension liability of \$51,514 which is included in accrued expenses in the Statement of Assets and Liabilities. On December 2, 2003, the Trustees voted to close the plan to new participants and eliminate the future benefits growth due to increases to compensation after July 31, 2003.

Effective April 1, 2004, the Trust began an unfunded Deferred Compensation Plan (the "Compensation Plan") which allows each independent Trustee to defer payment of all, or a portion, of the fees he receives for serving on the Board of Trustees. Each eligible Trustee generally may elect to have the deferred amounts credited with a return equal to the total return on one or more of the Morgan Stanley funds that are offered as

17

Morgan Stanley Insured Municipal Income Trust

Notes to Financial Statements October 31, 2004 continued

investment options under the Compensation Plan. Appreciation/depreciation and distributions received from these investments are recorded with an offsetting increase/decrease in the deferred compensation obligation and do not affect the net asset value of the Trust.

4. Preferred Shares of Beneficial Interest

The Trust is authorized to issue up to 1,000,000 non-participating preferred shares of beneficial interest having a par value of \$.01 per share, in one or more series, with rights as determined by the Trustees, without approval of the common shareholders. The Trust has issued Series 1 through 5 Auction Rate Preferred Shares ("Preferred Shares") which have a liquidation value of \$50,000 per share plus the redemption premium, if any, plus accumulated but unpaid dividends, whether or not declared, thereon to the date of distribution. The Trust may redeem such shares, in whole or in part, at the original purchase price of \$50,000 per share plus accumulated but unpaid dividends, whether or not declared, thereon to the date of redemption.

Dividends, which are cumulative, are reset through auction procedures.

SERIES	SHARES*	AMOUNT IN THOUSANDS*	RATE*	RESET DATE	RANGE OF DIVIDEND RATES**
1	400	\$ 20,000	1.36%	01/10/05	1.36%
2	900	45,000	1.20	07/11/05	1.20
3	1,000	50,000	2.24	07/10/06	2.20 – 2.24

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-CSR

4	400	20,000	1.48	01/09/06	1.48 – 2.47
5	400	20,000	1.70	09/12/05	1.70

* As of October 31, 2004.

** For the year ended October 31, 2004.

Subsequent to October 31, 2004 and up through December 3, 2004, the Trust paid dividends to each of the Series 1 through 5 at rates ranging from 1.20% to 2.24% in the aggregate amount of \$428,028.

The Trust is subject to certain restrictions relating to the preferred shares. Failure to comply with these restrictions could preclude the Trust from declaring any distributions to common shareholders or purchasing common shares and/or could trigger the mandatory redemption of preferred shares at liquidation value.

The preferred shares, which are entitled to one vote per share, generally vote with the common shares but vote separately as a class to elect two Trustees and on any matters affecting the rights of the preferred shares.

18

Morgan Stanley Insured Municipal Income Trust

Notes to Financial Statements October 31, 2004 continued

5. Common Shares of Beneficial Interest

Transactions in common shares of beneficial interest were as follows:

	SHARES	PAR VALUE	CAPITAL PAID IN EXCESS OF PAR VALUE
Balance, October 31, 2002	25,287,513	\$252,875	\$365,366,853
Treasury shares purchased and retired (weighted average discount 7.90%)*	(1,047,375)	(10,474)	(15,224,830)
Balance, October 31, 2003	24,240,138	242,401	350,142,023
Treasury shares purchased and retired (weighted average discount 8.33%)*	(1,001,300)	(10,013)	(14,108,654)
Balance, October 31, 2004	23,238,838	\$232,388	\$336,033,369

* The Trustees have voted to retire the shares purchased.

6. Dividends to Common Shareholders

On September 28, 2004, the Trust declared the following dividends from net investment income:

AMOUNT PER SHARE	RECORD DATE	PAYABLE DATE
\$0.0675	November 5, 2004	November 19, 2004
\$0.0675	December 10, 2004	December 23, 2004

7. Expense Offset

The expense offset represents a reduction of the custodian fees for earnings on cash balances maintained by the Trust.

8. Risks Relating to Certain Financial Instruments

The Trust may invest a portion of its assets in residual interest bonds, which are inverse floating rate municipal obligations. The prices of these securities are subject to greater market fluctuations during periods of changing prevailing interest rates than are comparable fixed rate obligations.

To hedge against adverse interest rate changes, the Trust may invest in financial futures contracts or municipal bond index futures contracts ("futures contracts").

These futures contracts involve elements of market risk in excess of the amount reflected in the Statement of Assets and Liabilities. The Trust bears the risk of an unfavorable change in the value of the underlying securities. Risks may also arise upon entering into these contracts from the potential inability of the counterparties to meet the terms of their contracts.

19

Morgan Stanley Insured Municipal Income Trust

Notes to Financial Statements October 31, 2004 continued

9. Federal Income Tax Status

The amount of dividends and distributions from net investment income and net realized capital gains are determined in accordance with federal income tax regulations which may differ from generally accepted accounting principles. These "book/tax" differences are either considered temporary or permanent in nature. To the extent these differences are permanent in nature, such amounts are reclassified within the capital accounts based on their federal tax-basis treatment; temporary differences do not require reclassification. Dividends and distributions which exceed net investment income and net realized capital gains for tax purposes are reported as distributions of paid-in-capital.

The tax character of distributions paid was as follows:

FOR THE YEAR ENDED OCTOBER 31, 2004	FOR THE YEAR ENDED OCTOBER 31, 2003
---	---

Edgar Filing: MORGAN STANLEY INSURED MUNICIPAL INCOME TRUST - Form N-CSR

Tax-exempt income	\$24,793,993	\$24,879,299
Long-term capital gains	6,940,823	—
Total distributions	\$31,734,816	\$24,879,299

As of October 31, 2004, the tax-basis components of accumulated earnings were as follows:

Undistributed tax-exempt income	\$ 2,721,112
Undistributed long-term gains	—

Net accumulated earnings	2,721,112
Capital loss carryforward*	(4,714,427)
Temporary differences	(265,756)
Net unrealized appreciation	28,461,658
Total accumulated earnings	\$26,202,587

*As of October 31, 2004, the Trust had a net capital loss carryforward of \$4,714,427 which will expire on October 31, 2012 to offset future capital gains to the extent provided by regulations.

As of October 31, 2004, the Trust had temporary book/tax differences primarily attributable to book amortization of discounts on debt securities, mark-to-market of open futures contracts and dividend payable and permanent book/tax differences primarily attributable to tax adjustments on debt securities sold by the Trust. To reflect reclassifications arising from the permanent differences, accumulated undistributed net investment income was charged and accumulated net realized loss was credited \$2,338.

Morgan Stanley Insured Municipal Income Trust

Report of Independent Registered Public Accounting Firm

To the Shareholders and Board of Trustees of
Morgan Stanley Insured Municipal Income Trust:

We have audited the accompanying statement of assets and liabilities of Morgan Stanley Insured Municipal Income Trust (the "Trust"), including the portfolio of investments, as of October 31, 2004, and the related statements of operations for the year then ended and changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Trust's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. Our procedures included confirmation of securities owned as of October 31, 2004, by correspondence with the custodian and broker. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Morgan Stanley Insured Municipal Income Trust as of October 31, 2004, the results of its operations for the year then ended, the changes in its net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with accounting principles generally accepted in the United States of America.

Deloitte & Touche LLP
New York, New York
December 14, 2004

2004 Federal Tax Notice (unaudited)

During the year ended October 31, 2004, the Trust paid the following per share amounts from tax-exempt income: \$0.946 to common shareholders, \$602 to Series 1 preferred shareholders, \$520 to Series 2 preferred shareholders, \$944 to Series 3 preferred shareholders, \$689 to Series 4 preferred shareholders and \$766 to Series 5 preferred shareholders. For the year ended October 31, 2004, the Trust paid the following per share amounts from long-term capital gains: \$0.264 to common shareholders, \$128 to Series 1 preferred shareholders, \$131 to Series 2 preferred shareholders, \$261 to Series 3 preferred shareholders, \$296 to Series 4 preferred shareholders and \$138 to Series 5 preferred shareholders.
