SEMI-ANNUAL REPORT

SEPTEMBER 30, 2003

(TRANSAMERICA INVESTMENT MANAGEMENT, LLC LOGO)

REPORT TO SHAREHOLDERS

In the six months ended September 30, 2003, the U.S. corporate bond market offered superior returns compared to Treasury securities as the spread between corporate and Treasury yields narrowed, fostering considerable price appreciation in the corporate sector during the spring and early summer. We believe that bond yields rose, pushing prices down, as investors sensed that faster economic growth could lead to higher interest rates down the road.

The performance of the fund was driven by three factors. Chief among them was our emphasis on three of the top-performing industries within the corporate sector: telecommunications, utilities and media. For several quarters now, we have emphasized these industries because they offer a wide choice of companies focused on paying down debt and improving their credit quality. It is our belief that the gains in these sectors may have run their course. That, combined with our constructive outlook on the economy, prompted us late in the period to initiate or add to investments in cyclical industries which we believe may gain

## Edgar Filing: TRANSAMERICA INCOME SHARES INC - Form N-CSR

pricing power from the economic upswing. These include companies in the paper and forest products and metals and mining sectors.

In anticipation of rising yields, we reduced the duration, or interest rate sensitivity of the portfolio and invested a modest portion of net assets in high-yield securities, which added to the fund's yield.

At this juncture, we are seeing signs of economic expansion and willingness by businesses to take risk. In light of that, we expect that interest rates may rise slightly and therefore will maintain the fund's shorter duration. We will also continue our search for corporate bonds that may benefit disproportionately from a more robust U.S. economy.

### NOTE 1. SIGNIFICANT ACCOUNTING POLICIES

Transamerica Income Shares, Inc. (the "Fund") is registered under the Investment Company Act of 1940 as a diversified, closed-end management investment company. The Fund's investment objective is to seek as high a level of current income consistent with prudent investment, with capital appreciation as only a secondary objective.

In the normal course of business the Fund enters into contracts that contain a variety of representations and warranties and which provide general indemnifications. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund and/or its affiliates that have not yet occurred. However, based on experience, the Fund expects the risk of loss to be remote.

The following policies were consistently followed by the Fund, in accordance with accounting principles generally accepted in the United States of America ("GAAP").

**SECURITIES VALUATIONS:** Debt securities are valued by commercial pricing services or broker-dealer supplied quotations; however, those that mature in sixty days or less are valued at amortized cost, which approximates market value.

Other securities for which quotations are not readily available are valued at fair value determined in good faith, in accordance with procedures established by and, under the supervision of the Board of Directors and the Fund's Valuation Committee. Centaur Funding Corp. is valued by an independent broker quote as per procedures approved by the board of directors.

**CASH:** The Fund may leave cash overnight in its cash account with the custodian, Investors Bank & Trust Company ("IBT"). IBT has been contracted on behalf of the Fund to invest the excess cash into a savings account, which at September 30, 2003, was paying an interest rate 0.75%.

**SECURITIES LENDING:** The Fund may lend securities to enhance fund earnings from investing cash collateral received in making such loans to qualified borrowers (typically broker/dealers). The Fund has engaged its custodian bank, Investors Bank & Trust Company ("IBT"), as lending agent to administer its securities lending program. IBT earns a portion of program net income for its services. When the Fund makes a security loan, it receives cash collateral as protection

against risk the borrower will default on the loan, and records an asset for the cash invested collateral and a liability for the return of the collateral.

Securities on loan are included in investment securities at value on the Statement of Assets and Liabilities and remain on the Schedule of Investments.

Loans of securities are required at all times to be secured by collateral at least equal to 102% of the value of the securities at the inception of the loan, and not less than 100% thereafter. The Fund may invest cash collateral in short-term money market instruments including: U.S. Treasury Bills, U.S. agency obligations, commercial paper, money market mutual funds, repurchase agreements and other highly rated, liquid investments. During the life of securities loans, the collateral and securities loaned remain subject to fluctuation in market value. IBT marks to

market securities loaned and the collateral each business day. If additional collateral is due (at least \$1,000), IBT collects additional cash collateral from the borrowers. Although securities loaned will be fully collateralized at all times, IBT may experience delays in, or may be prevented from, recovering the collateral on behalf of the Fund. The Fund may recall a loaned security position at any time from the borrower through IBT. In the event the borrower fails to timely return a recalled security, IBT indemnifies the Fund by purchasing replacement securities for the Fund at its own expense and claiming the collateral to fund such a purchase. IBT absorbs the loss if the collateral value is not sufficient to cover the cost of the replacement securities. If replacement securities are not available, IBT will credit the equivalent cash value to the Fund.

Income from securities lending is included in the Statement of Operations. The amount of collateral and value of securities on loan are included in the Statement of Assets and Liabilities as well as in the Schedule of Investments.

SECURITIES TRANSACTIONS AND INVESTMENT INCOME: Security transactions are recorded on the trade date. Security gains and losses are calculated on the specific identification basis. Interest income, including accretion of discounts and amortization of premiums, is recorded on the accrual basis commencing on the settlement date.

DIVIDEND DISTRIBUTIONS: Dividend distributions are declared monthly. Capital gains distributions are declared annually. Distributions are generally paid in the month following the ex-date, on or about the fifteenth calendar day. See "Automatic Reinvestment Plan" on page 17 for

Holders of 50 shares or more of the Fund's common stock are offered the opportunity to reinvest dividends and other distributions in shares of the common stock of the Fund through participation in the Automatic Reinvestment Plan. Under the Plan, Mellon Investor services, as Transfer Agent (the "Transfer Agent"), automatically invests dividends and other distributions in shares of the Fund's common stock by making purchases in the open market. Plan participants may also deposit cash in amounts between \$25 and \$2,500 with the Transfer Agent for the purchase of additional shares.
